EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

(1) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

ORGANIZATION AND BUSINESS

Emrise Corporation (the "Company"), operates through three wholly-owned subsidiaries: Emrise Electronics Corporation (formerly XET Corporation ("Emrise Electronics")), CXR Larus Corporation ("CXR Larus"), and CXR-Anderson Jacobson ("CXR-AJ"). Emrise Electronics and its subsidiaries design, develop, manufacture and market digital and rotary switches, power supplies, radio frequency ("RF") and microwave components and subsystems, and subsystem assemblies. CXR Larus designs, develops, manufactures and markets network access and transmission products, communications test equipment, and communication timing and synchronization products. CXR-AJ designs, develops, manufactures and markets network access and transmission products. The Company conducts its operations out of various facilities in the United States, England, France and Japan and organizes itself in two product line segments: electronic components and communications equipment.

Edgar Filing: Emrise CORP - Form 10-Q/A

BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission and therefore do not include all information and footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America.

The unaudited condensed consolidated financial statements do, however, reflect all adjustments, consisting of only normal recurring adjustments, which are, in the opinion of management, necessary to state fairly the financial position as of March 31, 2005 and December 31, 2004 and the results of operations and cash flows for the related interim periods ended March 31, 2005 and 2004. However, these results are not necessarily indicative of results for any other interim period or for the year. It is suggested that the accompanying condensed consolidated financial statements be read in conjunction with the Company's audited consolidated financial statements included in its 2004 annual report on Form 10-K.

STOCK-BASED COMPENSATION

The Company applies Accounting Principles Bulletin ("APB") Opinion No. 25, "Accounting for Stock Issued to Employees" and related interpretations in accounting for its employee stock-based compensation plans. Accordingly, no compensation cost is recognized for its employee stock option plans unless the exercise price of options granted is less than fair market value on the date of grant. The Company has adopted the disclosure provisions of Statement of Financial Accounting Standards ("SFAS") No. 123, "Accounting for Stock-Based Compensation," as amended by SFAS No. 148 "Accounting for Stock-Based Compensation-Transition and Disclosure."

The following table sets forth the net income, net income available for common stockholders and earnings per share amounts for the periods presented as if the Company had elected the fair value method of accounting for stock options for all periods presented (in thousands, except per share amounts):

F-6

EMRISE CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 MARCH 31, 2005 AND 2004
 (UNAUDITED)

	Three Months Ended March 31,	
	2005	
	2005	2004
Net income (loss):		
As reported	\$ (350)	\$
Add: Stock-based compensation expense included in reported net income, net of related tax effect	--	
Deduct: Stock-based compensation expense determined under the fair value-based method	(47)	

Edgar Filing: Emrise CORP - Form 10-Q/A

Pro forma	\$ (397)	\$
	=====	=====
Basic earnings (loss) per share:		
As reported	\$ (0.01)	\$
Add: Stock based compensation expense included in reported net income, net of related tax effect	--	
Deduct: Stock-based compensation expense determined under the fair value-based method	--	
	-----	-----
Pro forma	\$ (0.01)	\$
	=====	=====
Diluted earnings (loss) per share:		
As reported	\$ (0.01)	\$
Add: Stock based compensation expense included in reported net income, net of related tax effect	--	
Deduct: Stock-based compensation expensed determined under the fair value-based method	--	
	-----	-----
Pro forma	\$ (0.01)	\$
	=====	=====

The above calculations include the effects of all grants in the periods presented. Because options often vest over several years and additional awards are made each year, the results shown above may not be representative of the effects on net income or loss in future periods. The calculations were based on a Black-Scholes pricing model with the following assumptions: no dividend yield; expected volatility of 87% to 92%; risk-free interest rate of 3%; expected lives of 7 years.

F-7

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

(2) EARNINGS PER SHARE

The following table illustrates the computation of basic and diluted earnings per share (in thousands, except per share amounts):

	Three Ended M
	----- 2005 -----
NUMERATOR:	
Net income	\$ (350)
Less: accretion of the excess of the redemption value over the carrying value	

Edgar Filing: Emrise CORP - Form 10-Q/A

of redeemable preferred stock	--

Income attributable to common stockholders	\$ (350)
	=====
DENOMINATOR:	
Weighted average number of common shares outstanding during the period-basic	36,788
Incremental shares from assumed conversions of warrants and options	--

Adjusted weighted average number of outstanding shares-diluted	36,788

Basic earnings per share	\$ (0.01)
	=====
Diluted earnings per share	\$ (0.01)
	=====

The computation of diluted loss per share for the three months ended March 31, 2005 excludes the effect of incremental common shares attributable to the exercise of outstanding common stock options and warrants because their effect was antidilutive due to losses incurred by the Company. The computation of diluted loss per share for the three months ended March 31, 2004 excludes the effect of incremental common shares attributable to the exercise of outstanding common stock options and warrants because their effect was antidilutive as a result of the exercise prices exceeding the average market prices of the underlying shares of common stock.

The following options and warrants were excluded from the computation of diluted earnings per share (in thousands, except per share amounts):

	Three Months Ended March 31,	
	2005	2004
	-----	-----
Options and warrants to purchase shares of common stock	6,065	693
Exercise prices	\$0.20 - \$3.44	\$1.89 - \$3
	-----	-----

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

(3) INVENTORIES

Inventories consist of the following (in thousands):

Edgar Filing: Emrise CORP - Form 10-Q/A

	March 31, 2005 -----	December 31, 2004 -----
Raw materials	\$ 3,912	\$ 3,222
Work-in-process	2,548	1,280
Finished goods	2,425	1,989
	-----	-----
	\$ 8,885	\$ 6,491
	=====	=====

(4) REPORTABLE SEGMENTS

The Company has two reportable segments: electronic components and communications equipment. The electronic components segment operates in the United States, European and Asian markets and designs, manufactures and markets digital and rotary switches, electronic power supplies, RF and microwave components and subsystems and subsystem assemblies. The communications equipment segment also operates in the United States, European and Asian markets and designs, manufactures and distributes network access and transmission products, communications test instruments and network timing and synchronization products.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies. The Company evaluates performance based upon profit or loss from operations before income taxes exclusive of nonrecurring gains and losses. The Company accounts for intersegment sales at prices negotiated between the individual segments.

The Company's reportable segments are comprised of operating entities offering the same or similar products to similar customers. Each segment is managed separately because each business has different customers and different design and manufacturing and marketing strategies.

Each segment has business units or components as described in paragraph 30 of SFAS No. 142. Each component has discrete financial information and a management structure. Following is a description of the Company's segment and component structure as of March 31, 2005:

Reporting Units Within Electronic Components Segment:

- o Emrise Electronics - Rancho Cucamonga, California: Digitran Division - digital and rotary switches, and electronic subsystem assemblies for defense, aerospace and industrial applications
- o Emrise Electronics - Monrovia, California: XCEL Circuits Division - printed circuit boards mostly for intercompany use but with a small base of outside customers
- o XCEL Japan Ltd. - Tokyo, Japan: Reseller of Digitran switches and other third party electronic components

F-9

Edgar Filing: Emrise CORP - Form 10-Q/A

(UNAUDITED)

- o XCEL Corporation Ltd. - Ashford, Kent, England/Isle of Wight, England: Power supplies and radio frequency products for defense and aerospace applications and for a broad range of applications, including in-flight entertainment systems; this reporting unit also includes XCEL Power Systems, Ltd., Belix Wound Components Ltd., Pascall Electronic (Holdings) Limited and Pascall Electronics Limited

Reporting Units Within Communications Equipment Segment:

- o Larus division of CXR Larus - San Jose, California: Communication timing and synchronization devices and network access equipment
- o CXR Telcom division of CXR Larus - San Jose, California: Communications test equipment for the field and central office applications
- o CXR-AJ - Abondant, France: network access equipment.

There were no differences in the basis of segmentation or in the basis of measurement of segment profit or loss from the amounts disclosed in the Company's audited consolidated financial statements included in its 2004 annual report on Form 10-K except for the inclusion of Pascall sales in the electronic components segment for the last 13 days of the three months ended March 31, 2005. Selected financial data for each of the Company's operating segments is shown below (in thousands):

	Three Months Ended March 31, 2005 -----	Three Months Ended March 31, 2004 -----
Sales to external customers: -----		
Electronic Components	\$ 3,807	\$ 3,905
Communications Equipment	3,492	2,287
	\$ 7,299	\$ 6,192
Segment pretax profit (losses): -----		
Electronic Components	\$ 505	\$ 783
Communications Equipment	(187)	(11)
	\$ 318	\$ 772
	-----	-----
	March 31, 2005	March 31, 2004
	-----	-----
Segment assets: -----		
Electronic Components	\$ 20,137	\$ 8,435

 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 MARCH 31, 2005 AND 2004
 (UNAUDITED)

The following is a reconciliation of the reportable segment sales, income or loss and assets to the Company's consolidated totals (in thousands):

	Three Months Ended March 31, 2005	Three Months Ended March 31, 2004
	-----	-----
Income (loss) before income taxes		

Total income (loss) for reportable segments	\$ 318	\$ 772
Unallocated amounts:		
General corporate expenses	(602)	(627)
Consolidated income (loss) before income taxes	\$ (284)	\$ 145
	=====	=====
	March 31, 2005	December 31, 2004
	-----	-----
Assets		

Total assets for reportable segments	\$ 35,740	\$ 24,748
Other assets	5,801	338
Total consolidated assets	\$ 41,541	\$ 25,086
	=====	=====

(5) NEW ACCOUNTING PRONOUNCEMENTS

New accounting pronouncements are discussed under the heading "Impacts of New Accounting Pronouncements" in Part I, Item 2 of this report.

(6) INCOME TAXES

The effective tax rate for the three-month period ended March 31, 2005 is different than the 34% U.S. statutory rate primarily because of foreign taxes on foreign source income that cannot be offset by domestic tax loss carryforwards.

(7) CREDIT FACILITIES

On June 1, 2004, two of the Company's subsidiaries, Emrise Electronics and CXR Larus, together with the Company acting as guarantor, obtained a credit facility from Wells Fargo Bank, N.A. for the Company's domestic operations. This facility is effective through July 1, 2005 and replaced the previous credit facility the Company had with Wells Fargo Business Credit, Inc. No prepayment penalty was due because the prior loan contract excluded from prepayment penalties loans replaced with new credit facilities from Wells Fargo Bank, N.A.

Edgar Filing: Emrise CORP - Form 10-Q/A

The new credit facility is subject to an unused commitment fee equal to 0.25% per annum, payable quarterly based on the average daily unused amount of the line of credit described in the following paragraph.

The credit facility provides a \$3,000,000 revolving line of credit secured by accounts receivable, other rights to payment and general intangibles, inventories and equipment. Borrowings do not need to be supported by specific receivables or inventory balances unless aggregate borrowings under the line of credit and the term loan described in the following paragraph exceed \$2,000,000

F-11

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

for 30 consecutive days (a "conversion event"). If a conversion event occurs, the line of credit will convert into a formula-based line of credit until the borrowings are equal to or less than \$2,000,000 for 30 consecutive days. The formula generally provides that outstanding borrowings under the line of credit may not exceed an aggregate of 80% of eligible accounts receivable, plus 15% of the value of eligible raw material inventory, plus 30% of the value of eligible finished goods inventory. The interest rate is variable and is adjusted monthly based on the prime rate plus 0.5%. The prime rate at March 31, 2005 was 5.50%.

The credit facility also provides for a term loan of \$150,000 secured by equipment, amortizable over 36 months at a variable rate equal to the prime rate plus 1.5%. The term loan portion of the facility had a balance of \$112,000 at March 31, 2005.

Wells Fargo Bank, N.A. has also provided the Company with \$300,000 of credit available for the purchase of new capital equipment when needed through July 1, 2005, of which a balance of \$142,000 was outstanding at March 31, 2005. The interest rate is equal to the 90-day London InterBank Offered Rate ("LIBOR") rate (3.10% at March 31, 2005) plus 3.75% per annum. Amounts borrowed under this arrangement are amortized over 60 months from the respective dates of borrowing.

As of March 31, 2005, the Company had no outstanding balance owing under the revolving credit line, and the Company had \$2,000,000 of availability on the non-formula based portion of the credit line. The credit facility is subject to various financial covenants. As of March 31, 2005, the Company was in compliance with each of those covenants. The minimum debt service coverage ratio of each of Emrise Electronics and CXR Larus must be not less than 1.50:1.00 on a trailing four-quarter basis. "Debt service coverage ratio" is defined as net income plus depreciation plus amortization, minus non-financed capital expenditures, divided by current portion of long-term debt measured quarterly. The current ratio of each of Emrise Electronics and CXR Larus must be not less than 1.50:1.00, determined as of each fiscal quarter end. "Current ratio" is defined as total current assets divided by total current liabilities. Net income after taxes of each of Emrise Electronics and CXR Larus must be not less than \$1.00 on an annual basis, determined as of the end of each quarter. Net profit after taxes of each of Emrise Electronics and CXR Larus must be not less than \$1.00 in each fiscal quarter immediately following a fiscal quarter in which that entity incurred a net loss after taxes. Total liabilities divided by tangible net worth of our domestic operations on a consolidated basis must not at any time be greater than 2.00:1.00, determined as of each fiscal quarter end. Tangible net worth of us and all of our subsidiaries on a consolidated basis

Edgar Filing: Emrise CORP - Form 10-Q/A

must not at any time be less than \$5,200,000, measured at the end of each quarter. "Total liabilities" is defined as current liabilities plus non-current liabilities, minus subordinated debt. "Tangible net worth" is defined as stockholders' equity plus subordinated debt, minus intangible assets.

The credit facility expires in July 2005. However, the bank has informally extended the term of the revolving line by two months and has indicated that it is amenable to renewing and expanding the credit facility. However, if the Company is unable to obtain a renewal of the credit facility, the Company believes that it will have sufficient funds available to timely repay any additional amounts it may borrow under the credit facility prior to its expiration.

F-12

EMRISE CORPORATION AND SUBSIDIARIES
 NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
 MARCH 31, 2005 AND 2004
 (UNAUDITED)

As of March 31, 2005, the Company's foreign subsidiaries had credit facilities, including lines of credit and term loans, with Venture Finance PLC, a subsidiary of the global Dutch ABN AMRO Holdings, N.V. financial institution, in England, IFN Finance, a subsidiary of ABN AMRO Holdings, N.V., Banc National de Paris, Societe Generale in France and Sogelease and Johnan Shinkin Bank in Japan. At March 31, 2005, the balances outstanding under the Company's United Kingdom, France and Japan credit facilities were \$1,230,000, \$692,000 and \$52,000, respectively.

On July 13, 2004, the Company issued two promissory notes to the former stockholders of Larus totaling \$3,000,000 in addition to paying cash and issuing shares of common stock (see Note 8), in exchange for 100% of the outstanding capital stock of Larus. These notes are subordinated to the Company's bank debt and are payable in 72 monthly equal payments of principal totaling \$41,667 per month plus interest at the 30-day LIBOR rate plus 5% with a maximum interest rate of 7% during the first two years of the term of the notes, 8% during the third and fourth years and 9% thereafter. As of March 31, 2005, the 30-day LIBOR rate was 2.86%. The total balance of these promissory notes as of March 31, 2005 was \$2,625,000.

Future maturities of notes payable to stockholders are as follows:

Year Ending December 31, -----	Dollars in Thousands -----
2005	\$ 375
2006	500
2007	500
2008	500
2009	500
Thereafter	250

	\$ 2,625
	=====

Total interest paid on these notes for the quarter ended March 31, 2005 was \$53,000.

Edgar Filing: Emrise CORP - Form 10-Q/A

F-13

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

(8) RELATED PARTY TRANSACTIONS

On July 13, 2004, the Company issued two promissory notes to the former stockholders of Larus Corporation totaling \$3,000,000 in addition to paying cash and issuing shares of common stock and two zero interest short-term notes totaling \$887,500 that were repaid in 2004, in exchange for 100% of the common stock of Larus Corporation (see Note 7).

The Company entered into an above-market real property lease with the former stockholders of Larus Corporation. This lease represents an obligation that exceeds the fair market value by approximately \$756,000. The lease term is for 7 years and expires on June 30, 2011. It is renewable for a 5-year term priced under market conditions. The base rent is based on a minimum rent of \$0.90 per square foot per month, which is \$27,000 monthly or \$324,000 per year, subject to monthly adjustments of the interest rate based on the Federal Reserve Discount Rate that match the lessor's variable interest rate mortgage payments on the building. The maximum increase in any year is 1.5%, with a cumulative maximum increase of 8% over the life of the lease. The increases apply to that portion of the rent that corresponds to the interest portion of the lessor's mortgage. Lease payments paid to the related parties during the three months ended March 31, 2005 totaled \$92,000.

(9) JANUARY 2005 PRIVATE PLACEMENT

On January 5, 2005, the Company issued to 17 accredited record holders in a private offering an aggregate of 12,503,500 shares of common stock at a purchase price of \$1.44 per share and five-year investor warrants to purchase up to an additional 3,125,875 shares of our common stock at an exercise price of \$1.73 per share, for total proceeds of approximately \$18,005,000. The Company paid cash placement agent fees and expenses of approximately \$961,000, and issued five-year placement warrants to purchase up to an aggregate of 650,310 shares of common stock at an exercise price of \$1.73 per share in connection with the offering. The total warrants issued, representing 3,776,185 shares of the Company's common stock, have an estimated value of \$4,400,000. Additional costs related to the financing include legal, accounting and consulting fees that totaled approximately \$192,000 through March 31, 2005 and continue to be incurred in connection with the resale registration described below. The Company used a portion of the proceeds from this financing to fund the acquisition of Pascall described below. The Company intends to use the remaining proceeds from this financing for additional acquisitions and for investments in new products and enhancements to existing products.

The Company agreed to register for resale the shares of common stock issued to investors and the shares of common stock issuable upon exercise of the investor warrants and placement warrants. The registration obligations require, among other things, that a registration statement be declared effective no later than June 4, 2005. The Company was unable to meet this obligation and therefore paid to each investor liquidated damages equal to 1% of the amount paid by the investor to the Company in the offering, which damage payments totaled an aggregate of approximately \$180,000. The Company also paid or must pay to each investor liquidated damages for the period from June 5, 2005 through the date

Edgar Filing: Emrise CORP - Form 10-Q/A

the registration was declared effective, and for any future periods in which the Company is unable to maintain the effectiveness of the registration in accordance with the requirements contained in the registration rights agreement the Company entered into with the investors. These liquidated damages are equal to 2% of the amount paid by each investor for the common shares still owned by the investor on each monthly anniversary of the date of the default that occurs prior to the cure of the default, pro rated on a daily basis for periods of default shorter than one month. The maximum aggregate liquidated damages payable to any investor will be equal to 10% of the aggregate amount paid by the investor for the shares of the Company's common stock. Accordingly, the maximum aggregate penalty that the Company would be required to pay under this provision is 10% of the \$18,005,000 initial purchase price of the common stock, which would be approximately \$1,801,000. Although the Company anticipates that it will be able to meet its future registration obligations, it also anticipates that it will have sufficient cash available to pay the maximum penalties if required.

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

(10) LARUS CORPORATION AND PASCALL ACQUISITIONS

LARUS CORPORATION ACQUISITION

Pursuant to the terms of a Stock Purchase Agreement executed on July 13, 2004, the Company acquired all of the issued and outstanding common stock of Larus Corporation. Larus Corporation was based in San Jose, California and engaged in the manufacturing and sale of telecommunications products. Larus Corporation had one wholly-owned subsidiary, Vista Labs, Incorporated ("Vista"), which provided engineering services to Larus Corporation. Assets held by Larus Corporation included intellectual property, cash, accounts receivable and inventories owned by each of Larus Corporation and Vista.

The purchase price for the acquisition totaled \$6,539,500 and consisted of \$1,000,000 in cash, the issuance of 1,213,592 shares of the Company's common stock with a fair value of \$1,000,000, \$887,500 in the form of two short-term, zero interest promissory notes that were repaid in 2004, \$3,000,000 in the form of two subordinated secured promissory notes, warrants to purchase up to an aggregate of 150,000 shares of the Company's common stock at \$1.30 per share, and approximately \$580,000 of acquisition costs. The number of shares of the Company's common stock issued as part of the purchase price was calculated based on the \$0.824 per share average closing price of the Company's common stock for the five trading days preceding the transaction. The warrants to purchase 150,000 shares of common stock were valued at \$72,000 using a Black-Scholes formula that included a volatility of 107.19%, an interest rate of 3.25%, a life of three years and no assumed dividend.

In addition, the Company assumed \$245,000 in accounts payable and accrued expenses and entered into an above-market real property lease with the sellers. This lease represents an obligation that exceeds the fair market value by approximately \$756,000 and is part of the acquisition accounting. The cash portion of the acquisition purchase price was funded with proceeds from the Company's credit facility with Wells Fargo Bank, N.A. and cash on-hand.

Edgar Filing: Emrise CORP - Form 10-Q/A

In determining the purchase price for Larus Corporation, the Company took into account the historical and expected earnings and cash flow of Larus Corporation, as well as the value of companies of a size and in an industry similar to Larus Corporation, comparable transactions and the market for such companies generally. The purchase price represented a significant premium over the \$1,800,000 recorded net worth of Larus Corporation's assets. In determining this premium, the Company considered the Company's potential ability to refine various Larus Corporation products and to use the Company's marketing resources and status as a qualified supplier to qualify and market those products for sale to large telecommunications companies. The Company believes that large telecommunications companies desired to have an additional choice of suppliers for those products and would be willing to purchase Larus Corporation's products following some refinements. The Company also believes that if Larus Corporation had remained independent, it was unlikely that it would have been able to

F-15

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

qualify to sell its products to the large telecommunications companies due to its small size and lack of history selling to such companies. Therefore, Larus Corporation had a range of value separate from the net worth it had recorded on its books.

In conjunction with the acquisition of Larus Corporation, the Company commissioned a valuation firm to determine what portion of the purchase price should be allocated to identifiable intangible assets. Although the valuation analysis is still in progress, the Company has estimated that the Larus Corporation trade name and trademark are valued at \$2,800,000 and that the technology and customer relationships are valued at \$800,000. Goodwill associated with the Larus Corporation acquisition totaled \$3,363,000. The Larus Corporation trade name and trademark were determined to have indefinite lives and therefore are not being amortized but rather are being periodically tested for impairment. The technology and customer relationships were both estimated to have ten-year lives and, as a result, \$40,000 of amortization expense was recorded and charged to administrative expense in 2004. The valuation of the identified intangible assets is expected to be completed during the quarter ending June 30, 2005 and could result in changes to the value of these identified intangible assets and corresponding changes to the value of goodwill. However, the Company does not believe these changes will be material to its financial position or results of operations.

The following table summarizes the unaudited assets acquired and liabilities assumed in connection with this acquisition:

	Dollars in Thousands -----
Current assets	\$ 2,460
Property, plant and equipment	90
Intangible assets other than goodwill	3,600
Goodwill	3,363 -----
Total assets acquired	9,513

Edgar Filing: Emrise CORP - Form 10-Q/A

Current liabilities	(685)
Deferred income taxes	(1,400)
Unfavorable lease obligation and other liabilities	(888)

Total liabilities assumed	(2,973)

Net assets acquired	\$ 6,540
	=====

The intangible assets other than goodwill consist of non-amortizable trade names with a carrying value of \$2,800,000, and technology and customer relationships with carrying values of \$500,000 and \$300,000, respectively, that are amortizable over ten years. Amortization for the intangibles subject to amortization as of March 31, 2005 is anticipated to be approximately \$80,000 per year for each of the next five years.

PASCALL ACQUISITION

On March 1, 2005, the Company and XCEL Corporation Limited, a second-tier wholly-owned subsidiary of the Company ("XCEL"), entered into an agreement ("Purchase Agreement") to acquire all of the issued and outstanding capital stock of Pascall Electronic (Holdings) Limited ("PEHL") by XCEL. The

F-16

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

closing of the purchase occurred on March 18, 2005. The Company loaned to XCEL the funds that XCEL used to purchase PEHL. PEHL has one wholly-owned subsidiary, Pascall Electronics Limited ("Pascall"), which produces, designs, develops, manufactures and sells power supplies and radio frequency products for a broad range of applications, including in-flight entertainment systems and military programs.

Under the Purchase Agreement, XCEL purchased all of the outstanding capital stock of PEHL, using funds loaned to XCEL by the Company. The purchase price for the acquisition totaled \$9,669,000, subject to adjustments as described below, and included a \$5,972,000 cash payment to PEHL's former parent, a \$3,082,000 loan to PEHL and Pascall and approximately \$615,000 in acquisition costs, as described below.

The initial portion of the purchase price was 3,100,000 British pounds sterling (approximately U.S. \$5,972,000 based on the exchange rate in effect on March 18, 2005). The initial portion of the purchase price was paid in cash at the closing and is subject to upward or downward adjustment on a pound for pound basis to the extent that the value of the net assets of Pascall as of the closing date was greater or less than 2,520,000 British pounds sterling.

On May 6, 2005, the Company submitted to Intelek Properties Limited (which is a subsidiary of Intelek PLC, a London Stock Exchange public limited company, and is the former parent of PEHL), the Company's calculation of the value of the net assets of Pascall as of the closing date, which the Company believes slightly exceeded 2,520,000 British pounds sterling. Intelek Properties Limited has indicated that its own calculation exceeds the Company's calculation by approximately 100,000 British pounds sterling (approximately U.S. \$193,000

Edgar Filing: Emrise CORP - Form 10-Q/A

based on the exchange rate in effect on March 18, 2005). The Company is working to resolve this discrepancy. Any payment relating to the increase or reduction of the purchase price based on the value of the net assets of Pascall will be due from XCEL or Inteltek Properties Limited, as the case may be, within 14 days of the acceptance of the calculation. A default rate of interest equal to 3% above the base lending rate of Barclays Bank plc London will apply if the adjustment payment is not timely made. However, the Company anticipates that any adjustment payment based on this calculation will not be material to the Company's financial results and that it will be timely made. The purchase price is also subject to downward adjustments for any payments that may be made to XCEL under indemnity, tax or warranty provisions of the Purchase Agreement.

XCEL loaned to PEHL and Pascall at the closing 1,600,000 British pounds sterling (approximately U.S. \$3,082,000 based on the exchange rate in effect on March 18, 2005) in accordance with the terms of a Loan Agreement entered into by those entities at the closing. The loaned funds were used to immediately repay outstanding intercompany debt owed by PEHL and Pascall to the seller.

The Company and Inteltek PLC have agreed to guarantee payment when due of all amounts payable by XCEL and Inteltek Properties Limited, respectively, under the Purchase Agreement. The Company and XCEL agreed to seek to replace the guaranty that Inteltek Properties Limited has given to Pascall's landlord with a guaranty by the Company, and XCEL has agreed to indemnify Inteltek Properties Limited and its affiliates for damages they suffer as a result of any failure to obtain the release of the guarantee of the 17-year lease that commenced in May 1999. The leased property is a 30,000 square foot administration, engineering and manufacturing facility located off the south coast of England.

F-17

EMRISE CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2005 AND 2004
(UNAUDITED)

Inteltek Properties Limited has agreed to various restrictive covenants that apply for various periods following the closing. The covenants include non-competition with Pascall's business, non-interference with Pascall's customers and suppliers, and non-solicitation of Pascall's employees. In conjunction with the closing, Inteltek Properties Limited, Inteltek PLC, XCEL, and the Company entered into a Supplemental Agreement dated March 18, 2005. The Supplemental Agreement provides, among other things, that an interest-free bridge loan of 200,000 British pounds sterling (approximately U.S. \$385,000 based on the exchange rate in effect on March 17, 2005) that was made by the seller to Pascall on March 17, 2005 would be repaid by Pascall by March 31, 2005. XCEL agreed to ensure that Pascall had sufficient funds to repay the bridge loan. The bridge loan was repaid in full by Pascall on the March 31, 2005 due date.

The following table summarizes the unaudited assets acquired and liabilities assumed in connection with this acquisition, including \$615,000 in acquisition costs:

	Dollars in Thousands -----
Current assets	\$ 6,196

Edgar Filing: Emrise CORP - Form 10-Q/A

Property, plant and equipment	1,367
Intangibles, including goodwill	4,721

Total assets acquired	12,284
Current liabilities	2,535
Other liabilities	80

Total liabilities assumed	2,615

Net assets acquired	\$ 9,669
	=====

The purchase price represented a significant premium over the recorded net worth of Pascall's assets. In determining to pay this premium, we considered various factors, including the opportunities that Pascall presented for us to add RF components and RF subsystem assemblies to our product offerings, the marketing resources of Pascall in the United States power supplies market, and expected synergies between Pascall's business and our existing power supplies business.

In conjunction with the acquisition of Pascall, the Company has selected a valuation firm to determine what portion of the purchase price should be allocated to identifiable intangible assets. The Company has considered whether the acquisition included various types of identifiable intangible assets, including trade names, trademarks, patents, covenants not to compete, customers, workforce, technology and software. The Company has estimated that the Pascall trade name and trademark are valued at \$50,000. The Company has estimated that the covenants not to compete that were obtained from Pascall's former affiliates are valued at \$100,000 in light of public statements made by those affiliates indicating that they were strategically existing the power supply business, which the Company believes result in a low probability that they would return to the power supply business absent the covenants not to compete. The Company believes that no other identifiable intangible assets of value were acquired. No patents were acquired. The Company has not ascribed any value to Pascall's customer base because the Company's United Kingdom subsidiary, XCEL Power Systems, Ltd., already sells to Pascall's key customers. Pascall's workforce does not hold any special skills that are not readily available from other sources. The Company did not identify any valuable completed technology that was acquired, because Pascall utilizes non-proprietary technology to produce custom power supplies pursuant to customer specifications. Pascall does not develop or design software and does not own software of any material value.

Accordingly, the Company has estimated that the goodwill associated with the Pascall acquisition totaled \$4,571,000. The Pascall trade name and trademark were determined to have indefinite lives and therefore are not being amortized but rather are being periodically tested for impairment. The covenants not to compete will be amortized over their three-year duration. The valuation of the identified intangible assets is expected to be completed during the quarter ending September 30, 2005 and could result in changes to the value of these identified intangible assets and corresponding changes to the value of goodwill. However, the Company does not believe these changes will be material to its financial position or results of operations.

Edgar Filing: Emrise CORP - Form 10-Q/A

(UNAUDITED)

PRO FORMA RESULTS OF OPERATIONS

The following table summarizes, on an unaudited pro forma basis, the combined results of operations of the Company, Larus Corporation and Pascall, as though the Larus Corporation and Pascall acquisitions occurred as of January 1, 2004. The pro forma amounts give effect to appropriate adjustments for interest expense and income taxes. The pro forma amounts presented are not necessarily indicative of future operating results (in thousands, except per share amounts).

	Three Months Ended March 31,	
	2005	2004
Revenues	\$ 10,540	\$ 12,215
Net income	\$ (189)	\$ 644

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis should be read in conjunction with our condensed consolidated financial statements and notes to financial statements included elsewhere in this document. This report and our condensed consolidated financial statements and notes to financial statements contain forward-looking statements, which generally include the plans and objectives of management for future operations, including plans and objectives relating to our future economic performance and our current beliefs regarding revenues we might earn if we are successful in implementing our business strategies. The forward-looking statements and associated risks may include, relate to or be qualified by other important factors, including, without limitation:

- o the projected growth or contraction in the electronic components and communications equipment markets in which we

Edgar Filing: Emrise CORP - Form 10-Q/A

operate;

- o our business strategy for expanding, maintaining or contracting our presence in these markets;
- o our ability to efficiently and effectively integrate and operate the businesses of our newly-acquired subsidiary, Pascall Electronics Limited ("Pascall");
- o our ability to identify, fund and integrate additional businesses;
- o anticipated trends in our financial condition and results of operations; and
- o our ability to distinguish ourselves from our current and future competitors.

We do not undertake to update, revise or correct any forward-looking statements.

The information contained in this document is not a complete description of our business or the risks associated with an investment in our common stock. Before deciding to buy or maintain a position in our common stock, you should carefully review and consider the various disclosures we made in this report, and in our other materials filed with the Securities and Exchange Commission that discuss our business in greater detail and that disclose various risks, uncertainties and other factors that may affect our business, results of operations or financial condition. In particular, you should review our annual report on Form 10-K for the year ended December 31, 2004, and the "Risk Factors" we included in that report.

Any of the factors described above could cause our financial results, including our net income or loss or growth in net income or loss to differ materially from prior results, which in turn could, among other things, cause the price of our common stock to fluctuate substantially.

2

OVERVIEW

Through our three wholly-owned operating subsidiaries, Emrise Electronics Corporation ("Emrise Electronics", formerly XET Corporation), CXR Larus Corporation ("CXR Larus") and CXR-Anderson Jacobson ("CXR-AJ"), and through the divisions and subsidiaries of those subsidiaries, we design, develop, manufacture, assemble, and market products and services in the following two material business segments:

- o Electronic Components
 - digital and rotary switches
 - electronic power supplies
 - subsystem assemblies
 - radio frequency ("RF") components and subsystem assemblies
- o Communications Equipment

Edgar Filing: Emrise CORP - Form 10-Q/A

- network access and transmission products
- communication timing and synchronization products
- communications test instruments

Sales to customers in the electronic components segment, primarily to aerospace customers, defense contractors and industrial customers, were 52.2% and 63.1% of our total net sales during the three months ended March 31, 2005 and 2004, respectively. Sales of communications equipment and related services, primarily to private customer premises and public carrier customers, were 47.8% and 36.9% of our total net sales during the three months ended March 31, 2005 and 2004, respectively.

Sales of our electronic components segment decreased \$98,000 (2.5%) for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004. Excluding sales of \$722,000 from our new subsidiary, Pascall, which we acquired March 18, 2005, our electronic components segment sales declined \$820,000 (21.0%) for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004, primarily due to the higher levels of shipments of our digital switches to meet the military's demand for the Iraq war not repeating in the three months ended March 31, 2005, and a \$693,000 (29.0%) decrease in net sales of power supplies manufactured by our XCEL Power Systems Ltd. subsidiary that we believe was primarily because the second tranche of power supply shipments on the Eurofighter Typhoon program had not yet begun during the three months ended March 31, 2005.

We achieved a \$1,205,000 (52.7%) sales increase in our communications equipment segment for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004. Excluding \$1,509,000 of sales by the Larus division of CXR Larus that are attributable to the business previously conducted by Larus Corporation that we acquired in July 2004, our communications equipment segment sales declined \$304,000 (13.3%) for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004. This was primarily due to a continued low demand for our test equipment by the major United States telecommunications companies, a delay in continued shipments on a long-term United States government infrastructure program due to customer technical issues, and delays in French military program orders that had been expected in early 2005. Of our subsidiaries, CXR Larus was the most affected by the telecommunications downturn, because CXR Larus had the greatest dependence on sales to Regional Bell Operating Companies and other public carriers.

3

We continue to reduce costs at CXR Larus by reducing its work force and increasing our sourcing of test equipment components from offshore manufacturers that produce components for lower prices than we previously paid to our former suppliers. Outsourcing of manufacturing to Asia was a primary reason we were able to increase our gross margin from 34% in 2002 to 67% in 2004 in our CXR Larus test equipment business, which resulted in an annual cost reductions of approximately \$1,372,000 during 2004. During the three months ended March 31, 2005, we began working toward establishing a similar arrangement for the manufacture of our communication timing and synchronization products, which we anticipate will result in further improvements in our gross margin. We also reduced costs elsewhere in our communications equipment segment and lowered the breakeven point both in our United States and France operations through various cost-cutting methods, such as using offshore contract manufacturers, reducing facility rent expense by approximately \$327,350 on an annual basis as compared

Edgar Filing: Emrise CORP - Form 10-Q/A

to the three months ended March 31, 2004, and downsizing our administrative office in Paris, France.

As described in our annual report on Form 10-K for the year ended December 31, 2004, we paid \$6,539,500 to acquire the outstanding common stock of Larus Corporation on July 13, 2004 and have consolidated the results of operations of Larus Corporation beginning from the date of acquisition, July 13, 2004. We are beginning to now benefit from increased sales of our French subsidiary's products in the United States market as a result of sales and marketing support for the French products by CXR Larus' United States-based sales and marketing staff, which has resulted in the securing of relationships with two new major United States-based distributors during the three months ended March 31, 2005. We consolidated our CXR Larus subsidiary's operations into Larus Corporation's facility, which resulted in annual savings in rent and facilities expense of approximately \$250,000 beginning in the third quarter of 2004. Subsequent to March 31, 2005, we implemented further administrative, engineering and sales cost savings through staffing reductions of approximately \$700,000 on an annual basis as compared to our costs in the three months ended March 31, 2005. These staffing reductions related to eliminating redundancies in our electronic components segment personnel (including nine sales, marketing and administrative positions and one engineering director) that occurred as a result of our acquisition of Larus Corporation.

On March 18, 2005, XCEL Corporation Ltd. ("XCEL") purchased all of the outstanding capital stock of Pascall Electronic (Holdings) Limited ("PEHL"), the parent holding company of Pascall, using funds loaned to XCEL by Emrise. The purchase price for the acquisition totaled \$9,669,000, subject to adjustments as described below, and included a \$5,972,000 cash payment to PEHL's former parent, a \$3,082,000 loan from XCEL to PEHL and Pascall, and approximately \$615,000 in acquisition costs, as described below.

The initial purchase price was 3,100,000 British pounds sterling (approximately U.S. \$5,972,000 based on the exchange rate in effect on March 18, 2005). The purchase price was paid in cash and is subject to upward or downward adjustment on a pound for pound basis to the extent that the value of the net assets of Pascall as of the closing date was greater or less than 2,520,000 British pounds sterling. On May 6, 2005, we submitted to Intelek Properties Limited (which is a subsidiary of Intelek PLC, a London Stock Exchange public limited company, and is the former parent of PEHL), our calculation of the value of the net assets of Pascall as of the closing date, which we believe slightly exceeded 2,520,000 British pounds sterling. Intelek Properties Limited has indicated that its own calculation exceeds our calculation by approximately 100,000 British pounds sterling (approximately U.S. \$193,000 based on the exchange rate in effect on March 18, 2005). We are working to resolve this discrepancy. Any payment relating to the increase or reduction of the purchase price based on the value of the net assets of Pascall will be due from XCEL or Intelek Properties Limited, as the case may be, within 14 days of the acceptance of the calculation. A default rate of interest equal to 3% above the base

4

lending rate of Barclays Bank plc London will apply if the adjustment payment is not timely made. However, we anticipate that any adjustment payment based on this calculation will not be material to our financial results and that it will be timely made. The purchase price is subject to downward adjustments for any payments that may be made to XCEL under indemnity, tax or warranty provisions of the purchase agreement.

XCEL loaned to Pascall and PEHL at the closing 1,600,000 British pounds

Edgar Filing: Emrise CORP - Form 10-Q/A

sterling (approximately U.S. \$3,082,000 based on the exchange rate in effect on March 18, 2005) in accordance with the terms of a loan agreement entered into by those entities at the closing. The loaned funds were used to immediately repay outstanding intercompany debt owed by Pascall and PEHL to Intelek Properties Limited.

We and Intelek PLC have agreed to guarantee payment when due of all amounts payable by XCEL and Intelek Properties Limited, respectively, under the PEHL purchase agreement. Emrise and XCEL have agreed to seek to replace the guaranty that Intelek Properties Limited has given to Pascall's landlord with a guaranty from us, and XCEL has agreed to indemnify Intelek Properties Limited and its affiliates for damages they suffer as a result of any failure to obtain the release of the guarantee of the 17-year lease that commenced in May 1999. The leased property is a 30,000 square-foot administration, engineering and manufacturing facility located off the south coast of England.

Intelek Properties Limited has agreed to various restrictive covenants that apply for various periods following the closing. The covenants include non-competition with Pascall's business, non-interference with Pascall's customers and suppliers, and non-solicitation of Pascall's employees. In conjunction with the closing, Intelek Properties Limited, XCEL, Intelek PLC and we entered into a Supplemental Agreement dated March 18, 2005. The Supplemental Agreement provides, among other things, that an interest-free bridge loan of 200,000 British pounds sterling (approximately U.S. \$385,400 based on the exchange rate in effect on March 17, 2005) that was made by Intelek Properties Limited to Pascall on March 17, 2005 would be repaid by Pascall by March 31, 2005. XCEL agreed to ensure that Pascall has sufficient funds to repay the bridge loan. The bridge loan was repaid in full by Pascall to the seller on the March 31, 2005 due date.

We have consolidated the results of operations of Pascall beginning from the date of acquisition, March 18, 2005. Based on current sales projections, we anticipate that the Pascall acquisition will be accretive to our earnings per share despite the associated expenses relating both to the payment of the purchase price and the operation and integration of the Pascall business. We expect to increase Pascall's sales to its existing customers in the United States and to sell Pascall's products to Emrise's existing customers as a result of our local presence and enhanced support from our United States-based sales and marketing staff. We plan to consolidate a number of administrative functions of our two United Kingdom-based subsidiary's operations into the Pascall facility, which we anticipate will result in significant administrative and facilities cost savings.

5

The following table summarizes the unaudited assets acquired and liabilities assumed in connection with this acquisition, including \$615,000 in acquisition costs:

	Dollars in Thousands -----
Current assets	\$ 6,196
Property, plant and equipment	1,367
Intangibles, including goodwill	4,721

Total assets acquired	12,284

	=====

The purchase price represented a significant premium over the recorded net worth of Pascall's assets. In determining to pay this premium, we considered various factors, including the opportunities that Pascall presented for us to add RF components and RF subsystem assemblies to our product offerings, the marketing resources of Pascall in the United States power supplies market, and expected synergies between Pascall's business and our existing power supplies business.

The following table summarizes, on an unaudited pro forma basis, the combined results of operations of Emrise, Larus Corporation and Pascall, as though the acquisition occurred as of January 1, 2004. The pro forma amounts give effect to appropriate adjustments for interest expense and income taxes. The pro forma amounts presented are not necessarily indicative of future operating results (in thousands, except per share amounts).

CRITICAL ACCOUNTING POLICIES

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of net sales and expenses for each period. The following represents a summary of our critical accounting policies, defined as those policies that we believe are the most important to the portrayal of our financial condition and results of operations and that require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain.

REVENUE RECOGNITION

We derive revenues from sales of electronic components and communications equipment products and services. Our sales are based upon written agreements or purchase orders that identify the type and quantity of the item being purchased and the purchase price. We recognize revenues when delivery of

Edgar Filing: Emrise CORP - Form 10-Q/A

products has occurred or services have been rendered, no significant obligations remain on our part, and collectibility is reasonably assured based on our credit and collections practices and policies.

We recognize revenues from domestic sales of our electronic components and communications equipment at the point of shipment of those products. Product returns are infrequent and require prior authorization because our sales are final and we quality test our products prior to shipment to ensure they meet the specifications of the binding purchase orders under which they are shipped. Normally, when a customer requests and receives authorization to return a product, the request is accompanied by a purchase order for a replacement product.

Revenue recognition for products and services provided by our United Kingdom subsidiaries depends upon the type of contract involved. Engineering/design services contracts generally entail design and production of a prototype over a term of up to several years, with all revenue deferred until all services under the contracts have been completed. Production contracts provide for a specific quantity of products to be produced over a specific period of time. Customers issue binding purchase orders for each suborder to be produced. At the time each suborder is shipped to the customer, we recognize revenue relating to the products included in that suborder. Returns are infrequent and permitted only with prior authorization because these products are custom made to order based on binding purchase orders and are quality tested prior to shipment. Generally, these products carry a one-year limited parts and labor warranty. We do not offer customer discounts, rebates or price protection on these products.

We recognize revenues for products sold by our French subsidiary at the point of shipment. Customer discounts are included in the product price list provided to the customer. Returns are infrequent and permitted only with prior authorization because these products are shipped based on binding purchase orders and are quality tested prior to shipment. Generally, these products carry a two-year limited parts and labor warranty.

Generally, our electronic components, network access and transmission products and communication timing and synchronization products carry a one-year limited parts and labor warranty and our communications test instruments and European network access and transmission products carry a two-year limited parts and labor warranty. Products returned under warranty are tested and repaired or replaced at our option. Historically, warranty repairs have not been material. Product returns during 2004 were less than \$1,000. We do not offer customer discounts, rebates or price protection on these products.

Revenues from services such as repairs and modifications are recognized when the service has been completed and invoiced. For repairs that involve shipment of a repaired product, we recognize repair revenues when the product is shipped back to the customer. Service revenues represented 4.8% and 5.7% of net sales during the three months ended March 31, 2005 and the year ended December 31, 2004, respectively.

INVENTORY VALUATION

Our finished goods electronic components inventories generally are built to order. Our communications equipment inventories generally are built to forecast, which requires us to produce a larger amount of finished goods in our communications equipment business so that our customers can promptly be served. Our products consist of numerous electronic and other parts, which necessitates that we exercise detailed inventory management. We value our inventory at the lower of the actual cost to purchase or manufacture the inventory (first-in, first-out) or the current estimated market value of the inventory (net

Edgar Filing: Emrise CORP - Form 10-Q/A

realizable value). We perform physical inventories at least once a year. We

7

regularly review inventory quantities on hand and record a provision for excess and obsolete inventory based primarily on our estimated forecast of product demand and production requirements for the next twelve months. Additionally, to determine inventory write-down provisions, we review product line inventory levels and individual items as necessary and periodically review assumptions about forecasted demand and market conditions. Any parts or finished goods that we determine are obsolete, either in connection with the physical count or at other times of observation, are reserved for and subsequently discarded and written-off. Demand for our products can fluctuate significantly. A significant increase in the demand for our products could result in a short-term increase in the cost of inventory purchases, while a significant decrease in demand could result in an increase in the amount of excess inventory quantities on hand.

In addition, the communications equipment industry is characterized by rapid technological change, frequent new product development, and rapid product obsolescence that could result in an increase in the amount of obsolete inventory quantities on hand. Also, our estimates of future product demand may prove to be inaccurate, in which case we may have understated or overstated the provision required for excess and obsolete inventory. In the future, if our inventory is determined to be overvalued, we would be required to recognize such costs in our cost of goods sold at the time of such determination. Likewise, if our inventory is determined to be undervalued, we may have over-reported our costs of goods sold in previous periods and would be required to recognize additional operating income at the time of sale. Therefore, although we make every effort to ensure the accuracy of our forecasts of future product demand, any significant unanticipated changes in demand or technological developments could have a significant impact on the value of our inventory and our reported operating results.

FOREIGN CURRENCY TRANSLATION

We have foreign subsidiaries that together accounted for 57.3% of our net revenues, 46.0% of our assets and 39.0% of our total liabilities as of and for the year ended December 31, 2004, and 55.0% of our net revenues, 54.3% of our assets and 48.2% of our total liabilities as of and for the three months ended March 31, 2005. In preparing our consolidated financial statements, we are required to translate the financial statements of our foreign subsidiaries from the currencies in which they keep their accounting records into United States dollars. This process results in exchange gains and losses which, under relevant accounting guidance, are either included within our statement of operations or as a separate part of our net equity under the caption "accumulated other comprehensive income (loss)."

Under relevant accounting guidance, the treatment of these translation gains or losses depends upon our management's determination of the functional currency of each subsidiary. This determination involves consideration of relevant economic facts and circumstances affecting the subsidiary. Generally, the currency in which the subsidiary transacts a majority of its transactions, including billings, financing, payroll and other expenditures, would be considered the functional currency. However, management must also consider any dependency of the subsidiary upon the parent and the nature of the subsidiary's operations.

If management deems any subsidiary's functional currency to be its local currency, then any gain or loss associated with the translation of that

Edgar Filing: Emrise CORP - Form 10-Q/A

subsidiary's financial statements is included as a separate component of stockholders' equity in accumulated other comprehensive income (loss). However, if management deems the functional currency to be United States dollars, then any gain or loss associated with the translation of these financial statements would be included within our statement of operations.

8

If we dispose of any of our subsidiaries, any cumulative translation gains or losses would be realized into our statement of operations. If we determine that there has been a change in the functional currency of a subsidiary to United States dollars, then any translation gains or losses arising after the date of the change would be included within our statement of operations.

Based on our assessment of the factors discussed above, we consider the functional currency of each of our international subsidiaries as each subsidiary's local currency. Accordingly, we had cumulative translation gains of \$46,000 and \$487,000 that were included as part of accumulated other comprehensive income within our balance sheet at March 31, 2005 and December 31, 2004, respectively. During the three months ended March 31, 2005 and the year ended December 31, 2004, we included translation adjustments of losses of approximately \$441,000 and \$379,000, respectively, under accumulated other comprehensive income (loss).

If we had determined that the functional currency of our subsidiaries was United States dollars, these gains or losses would have decreased or increased our loss for these periods. The magnitude of these gains or losses depends upon movements in the exchange rates of the foreign currencies in which we transact business as compared to the value of the United States dollar. These currencies include the euro, the British pound sterling and the Japanese yen. Any future translation gains or losses could be significantly higher or lower than those we recorded for these periods.

INTANGIBLES, INCLUDING GOODWILL

We periodically evaluate our intangibles, including goodwill, for potential impairment. Our judgments regarding the existence of impairment are based on legal factors, market conditions and operational performance of our acquired businesses.

In assessing potential impairment of goodwill, we consider these factors as well as forecasted financial performance of the acquired businesses. If forecasts are not met, we may have to record additional impairment charges not previously recognized. In assessing the recoverability of our goodwill and other intangibles, we must make assumptions regarding estimated future cash flows and other factors to determine the fair value of those respective assets. If these estimates or their related assumptions change in the future, we may be required to record impairment charges for these assets that were not previously recorded. If that were the case, we would have to record an expense in order to reduce the carrying value of our goodwill. On January 1, 2002, we adopted Statement of Financial Accounting Standards ("SFAS") No. 142, "Goodwill and Other Intangible Assets," and were required to analyze our goodwill for impairment issues by June 30, 2002, and then at least annually after that date or more frequently if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. At March 31, 2005 and December 31, 2004, the reported goodwill totaled \$10,552,000 and \$5,881,000, respectively (net of accumulated amortization of \$1,084,000). During the quarter ended March 31, 2005 and the year ended December

Edgar Filing: Emrise CORP - Form 10-Q/A

31, 2004, we did not record any impairment losses related to goodwill and other intangible assets.

In conjunction with our July 2004 acquisition of Larus Corporation, we have commissioned a valuation firm to determine what portion of the purchase price should be allocated to identifiable intangible assets. Although the valuation analysis is still in progress, we have estimated that the Larus trade name and trademark are valued at \$2,800,000 and that the technology and customer relationships are valued at \$800,000. Goodwill associated with the Larus Corporation acquisition totaled \$3,363,000. The Larus trade name and trademark were determined to have indefinite lives and therefore are not being amortized but rather are being periodically tested for impairment. The technology and

9

customer relationships were both estimated to have ten-year lives and, as a result, \$40,000 of amortization expense was recorded and charged to administrative expense in 2004. The valuation of the identified intangible assets is expected to be completed during the quarter ending June 30, 2005 and could result in changes to the value of these identified intangible assets and corresponding changes to the value of goodwill. However, we do not believe these changes will be material to our financial position or results of operations.

In conjunction with our March 2005 acquisition of Pascall, we have selected a valuation firm to determine what portion of the purchase price should be allocated to identifiable intangible assets. We have considered whether the acquisition included various types of identifiable intangible assets, including trade names, trademarks, covenants not to compete, patents, customers, workforce, technology and software. We have estimated that the Pascall trade name and trademark are valued at \$50,000. We have estimated that the covenants not to compete that were obtained from Pascall's former affiliates are valued at \$100,000 in light of public statements made by those affiliates indicating that they were strategically exiting the power supply business, which we believe results in a low probability that they would return to the power supply business absent the covenants not to compete. We believe that no other identifiable intangible assets of value were acquired. No patents were acquired. We have not ascribed any value to Pascall's customer base because our United Kingdom subsidiary, XCEL Power Systems, Ltd., already sells to Pascall's key customers. Pascall's workforce does not hold any special skills that are not readily available from other sources. We did not identify any valuable completed technology that was acquired, because Pascall utilizes non-proprietary technology to produce custom power supplies pursuant to customer specifications. Pascall does not develop or design software and does not own software of any material value.

Accordingly, we have estimated that the goodwill associated with the Pascall acquisition totaled \$4,571,000. The Pascall trade name and trademark were determined to have indefinite lives and therefore are not being amortized but rather are being periodically tested for impairment. The covenants not to compete will be amortized over their three-year duration. The valuation of the identified intangible assets is expected to be completed during the quarter ending September 30, 2005 and could result in changes to the value of these identified intangible assets and corresponding changes to the value of goodwill. However, we do not believe these changes will be material to our financial position or results of operations.

RESULTS OF OPERATIONS

The table presented below, which compares our results of operations for

Edgar Filing: Emrise CORP - Form 10-Q/A

the three months ended March 31, 2005 to our results of operations for the three months ended March 31, 2004, presents the results for each period, the change in those results from one period to another in both dollars and percentage change, and the results for each period as a percentage of net sales. The columns present the following:

- o The first two data columns show the absolute results for each period presented.
- o The columns entitled "Dollar Variance" and "Percentage Variance" show the change in results, both in dollars and percentages. These two columns show favorable changes as a positive and unfavorable changes as negative. For example, when our net sales increase from one period to the next, that change is shown as a positive number in both columns. Conversely, when expenses increase from one period to the next, that change is shown as a negative in both columns.
- o The last two columns show the results for each period as a percentage of net sales.

<hr style="border-top: 3px double black;"/>							

NET SALES. The \$1,107,000 (17.9%) increase in total net sales for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004 resulted from the combination of a \$98,000 (2.5%) decrease in net sales of our electronic components and a \$1,205,000 (52.7%) increase in net sales of our communications equipment products and services.

ELECTRONIC COMPONENTS. The decrease in net sales of our electronic components segment resulted from a \$177,000 (13.4%) decrease in net sales of switches by Emrise Electronics' Digitran division that we believe was primarily due to the higher levels of shipments of our digital switches to meet the military's demand for the Iraq war not repeating in the three months ended March 31, 2005, and a \$693,000 (29.0%) decrease in net sales of power supplies manufactured by our XCEL Power Systems Ltd. subsidiary that we believe was primarily because the second tranche of power supply shipments on the Eurofighter Typhoon program had not yet begun during the three months ended March 31, 2005.

These decreases were partially offset by the contribution of \$722,000 in net sales of power supplies and RF components and subsystem assemblies by Pascall, which subsidiary we acquired on March 18, 2005. The three months ended March 31, 2005 is the first period in which we reported sales of RF components and RF subsystem assemblies. Excluding these sales by Pascall, our electronic components segment sales declined 21.0% in the three months ended March 31, 2005 as compared to the three months ended March 31, 2004. We currently anticipate that our sales of electronic components will increase in subsequent quarters of 2005, with the greatest anticipated period of growth occurring in late 2005 and throughout 2006 based upon informal indications we have received from various customers.

COMMUNICATIONS EQUIPMENT. The \$1,205,000 (52.7%) increase in net sales of our communications equipment segment resulted primarily from the inclusion of \$1,509,000 of net sales of communication timing and synchronization products attributable to our acquisition of Larus Corporation that occurred on July 13, 2004. This increase was partially offset by a \$314,000 (18.4%) decline in net sales of network access equipment and transmission products manufactured by CXR-AJ, which we believe primarily was due to the delay in placement of key military communication contracts in Europe. Communications test equipment net sales remained flat at \$583,000 for the three months ended March 31, 2005 as compared to \$573,000 for the three months ended March 31, 2004, primarily due to a continued low demand by the major United States telecommunications companies and a delay in continued shipments on a long-term government infrastructure program due to customer technical issues. We anticipate that sales of our communications test equipment will remain flat throughout the remainder of 2005. However, we anticipate that sales of our network access products both in France and more importantly in the United States will grow as new sales channels and our stronger marketing presence becomes effective and we work to utilize our two new United States-based distributors we established relationships with during the three months ended March 31, 2005. We also anticipate that sales of our communication timing and synchronization products will show further growth as we build our business with telecommunications companies in 2005 and beyond.

Edgar Filing: Emrise CORP - Form 10-Q/A

GROSS PROFIT. The 1.8 percentage point decrease in gross profit as a percentage of total net sales and the \$365,000 (13.3%) increase in total gross profit for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004 resulted from a gross profit decrease in our electronic components segment that was offset by a gross profit increase in our communications equipment segment.

ELECTRONIC COMPONENTS. The \$202,000 (12.3%) decrease in gross profit for our electronic components segment was primarily due to lower sales volumes in both our digital switch and power supply businesses. The 4.2 percentage point decrease in gross profit as a percentage of total net sales of electronic components primarily resulted from the increased cost of sales in the manufacture of our switch products due to higher material costs, which decreased Digitran's gross profit for digital switches by \$250,000 (28.0%). This decrease was partially offset by a \$73,000 (11.0%) increase in gross profit on power supplies and RF components and subsystems primarily due to the contribution from Pascall of \$181,000 in the last 13 days of the three months ended March 31, 2005, which masked a \$112,000 (18.0%) decrease in gross profit contributed by XCEL Corporation Ltd. primarily due to lower sales volumes of power supplies as discussed above. We expect overall sales of power supplies in 2005 to exceed overall sales of power supplies in 2004 and to grow further in 2006 based upon informal indications we have received from various customers.

COMMUNICATIONS EQUIPMENT. The \$567,000 (51.3%) increase in gross profit for our communications equipment segment was primarily due to the inclusion of \$675,000 in gross profit during the quarter ended March 31, 2005 attributable to net sales of network access and communication timing and synchronization products that we did not offer prior to our acquisition of Larus Corporation in July 2004. Excluding the addition of these sales, gross profit for communications equipment decreased approximately \$108,000 (9.8%) primarily due to a \$130,000 (17.4%) decrease in gross profit at CXR-AJ due to lower sales volume of its network access products as compared to the prior year period.

The 0.5 percentage point decrease in this segment's gross profit as a percentage of total net sales was primarily the result of the larger contribution of the lower margin CXR Larus communication timing and synchronization products and CXR-AJ network access products as compared to the higher margin test equipment.

12

SELLING, GENERAL AND ADMINISTRATIVE EXPENSES. The \$614,000 (27.7%) increase in selling, general and administrative expenses for the three months ended March 31, 2005 as compared to the three months ended March 31, 2004 and the 3.0 percentage point increase in selling, general and administrative expenses as a percentage of total net sales were primarily due to:

- o a \$27,000 (20.0%) increase in sales commissions primarily due to the inclusion of our Larus division's sales commission expenses;
- o a \$361,000 (53.0%) increase in other selling and marketing expenses primarily due to the inclusion of our Larus division's selling expenses, attendance at tradeshow and increased advertising and marketing of our electronic components;
- o a \$225,000 (16.0%) increase in administrative expenses

Edgar Filing: Emrise CORP - Form 10-Q/A

primarily due to the inclusion of \$166,000 and \$30,000 of administrative costs for our Larus division and for Pascall, respectively; and

- o \$72,000 in administrative expenses relating to our review of internal controls pursuant to Section 404 of the Sarbanes Oxley Act of 2002.

We anticipate that selling, general and administrative expenses for the remainder of 2005 will remain at levels higher than those we experienced last year due to the Larus Corporation and Pascall acquisitions, increased investments in new products, sales and marketing expenses for our new low profile rotary and digital switches, increased activity in searching for and analyzing potential acquisitions, expansion of our investor relations program and increased corporate governance activities in response to the Sarbanes-Oxley Act of 2002 and recently adopted rules and regulations of the Securities and Exchange Commission. However we continue to seek efficiency and cost savings at all operations and anticipate we will further reduce our selling, general and administrative expenses by an estimated \$625,000 on an annual basis over the current levels as a result of sales, marketing and administrative staffing reductions implemented in our communications equipment segment subsequent to March 31, 2005.

ENGINEERING AND PRODUCT DEVELOPMENT EXPENSES. Engineering and product development expenses consist primarily of research and product development activities. The \$249,000 (88.0%) increase in these expenses resulted primarily from the inclusion of \$190,000 expenses attributable to our Larus division and a \$37,000 increase in research and engineering expenses related to our new low profile rotary switches. We expect this higher level of expense to continue throughout 2005 as we continue to develop our new family of rotary switches and pursue long -term opportunities in the timing and synchronization market. Subsequent to March 31, 2005, we eliminated one of our two engineering directors at CXR Larus, which we anticipate will offset approximately \$75,000 of our increased engineering expenses on an annual basis.

INTEREST EXPENSE, NET. Interest expense increased marginally by \$6,000 (6.3%) to \$102,000 for the three months ended March 31, 2005 as compared to \$96,000 for the three months ended March 31, 2004 due to the issuance of \$3,000,000 of notes for the acquisition of Larus Corporation. This increase was partially offset by reduced interest expenses related to our new Wells Fargo Bank loan and reduced loan balances of our United Kingdom operations. In addition, we recorded \$72,000 of interest income in the three months ended March 31, 2005, which was earned on the proceeds of the January 2005 private placement. We did not have interest income during the three months ended March 31, 2004.

13

INCOME TAX EXPENSE. Income tax expense for the three months ended March 31, 2005 was \$66,000, compared to \$75,000 for the three months ended March 31, 2004. Although we are reporting a consolidated loss before income taxes of \$284,000 for the quarter, our foreign subsidiaries achieved combined income before income taxes of \$190,000, which at the rates effective in the respective countries resulted in the reported current tax expense of \$66,000.

NET INCOME (LOSS). The net income (loss) for the three months ended March 31, 2005 decreased by \$420,000 to a loss of \$350,000 as compared to net income of \$70,000 for the three months ended March 31, 2004. The decrease was primarily due to the impact of planned increased sales and marketing expenses to

Edgar Filing: Emrise CORP - Form 10-Q/A

launch new products and improve the marketing and sales efforts in promoting our existing products and the addition of similar expenses of Larus Corporation designed to increase future revenue and net income together with the substantial increase in research and development associated primarily with our communication timing products. Also contributing to the loss were delays in significant telecommunications orders in France for network access products and in the United States for test equipment, that had been expected during the three months ended March 31, 2005. We continue to closely monitor costs throughout our operations and have reduced costs through staffing reductions in our communications equipment operations in the United States as detailed above.

LIQUIDITY AND CAPITAL RESOURCES

During the year ended December 31, 2004, we funded our operations primarily through revenue generated from our operations and through our existing and previous lines of credit with Wells Fargo Bank, N.A., Wells Fargo Business Credit, Inc. and various foreign banks. During the three months ended March 31, 2005, we continued to rely on these sources and also raised approximately \$16,893,000 in net proceeds through a private placement of equity securities in January 2005 as described below. As of March 31, 2005, we had working capital of \$14,932,000, which represented a \$9,392,000 (169.5%) increase from working capital of \$5,540,000 at December 31, 2004, primarily due to the proceeds from the private placement and the addition of the working capital of Pascall. At March 31, 2005 and December 31, 2004, we had accumulated deficits of \$16,756,000 and \$16,406,000, respectively, and cash and cash equivalents of \$6,861,000 and \$1,057,000, respectively.

Accounts receivable increased \$1,849,000 (31.9%) during the three months ended March 31, 2005 from \$5,796,000 as of December 31, 2004 to \$7,645,000 as of March 31, 2005. Sales attributable to the Pascall acquisition contributed \$2,700,000 to accounts receivable at March 31, 2005. Without the acquisition of Pascall, our receivables would have decreased \$851,000 (14.7)% during the three months ended March 31, 2005, primarily due to increased collections. Days sales outstanding, which is a measure of our average accounts receivable collection period, increased from 69 days for the year ended December 31, 2004 to 83 days for the three months ended March 31, 2005. This calculation is skewed because \$2,700,000 of Pascall receivables were included in our accounts receivable balance at March 31, 2005 while only 13 days of Pascall's sales, totaling \$722,000, were included in our results for the quarter ended March 31, 2005. Excluding Pascall's sales, days sales outstanding was 68, which represents a slight improvement for the quarter as compared to fiscal 2004. Our customers include many Fortune 500 companies in the United States and similarly large companies in Europe and Asia. Because of the financial strength of our customer base, we have virtually eliminated our bad debt reserves.

Inventory balances increased \$2,394,000 (36.9%) during the three months ended March 31, 2005, from \$6,491,000 at December 31, 2004 to \$8,885,000 at March 31, 2005. Inventory represented 21.4% and 25.9% of our total assets as of March 31, 2005 and December 31, 2004, respectively. Included in the March 31, 2005 amount is \$2,165,000 of inventory attributable to Pascall. Excluding the effect of this inclusion, inventory would have increased by \$229,000 (3.4%) and would have represented 18.8% of total assets (excluding the \$5,841,000 of total

assets related to Pascall) at March 31, 2005. Inventory turnover, which is a ratio that indicates how many times our inventory is sold and replaced over a specified period, declined to 2.2 times (excluding Pascall, turnover would have decline to 1.8 times) for the three months ended March 31, 2005 as compared to

Edgar Filing: Emrise CORP - Form 10-Q/A

2.6 times for the year ended December 31, 2004 due to the decline in sales revenues.

We took various actions to reduce costs in 2004. These actions were intended to reduce the cash outlays of our communications equipment segment to match its revenue rate. We also have contracted with offshore manufacturers for production of test equipment components at lower prices than we previously paid to our former suppliers and have received shipments of quality components from these offshore suppliers. We continued with this method of operation throughout the three months ended March 31, 2005 and anticipate implementing this method in our communication timing and synchronization business.

Cash used in our operating activities totaled \$1,365,000 for the three months ended March 31, 2005 as compared to cash provided by operating activities of \$632,000 for the three months ended March 31, 2004. This \$1,997,000 decrease in operating cash flows primarily resulted from net losses in the three months ended March 31, 2005 as compared to net income in the comparable period in the prior year, as well as increased payment of accounts payable and accrued expenses.

Cash used in our investing activities totaled \$9,374,000 for the three months ended March 31, 2005 as compared to \$96,000 for the three months ended March 31, 2004. Included in the results for the three months ended March 31, 2005 are net cash of \$9,341,000 used to acquire Pascall and \$33,000 of property, plant and equipment purchases for production facility upgrade, telecommunications, management information systems and computer controlled production machinery for our new low profile rotary and digital switches. The investments for the three months ended March 31, 2004 were mostly property, plant and equipment purchases.

Cash provided by our financing activities totaled \$16,993,000 for the three months ended March 31, 2005 as compared to \$569,000 of cash used in our financing activities for the three months ended March 31, 2004. The change is primarily due to the net proceeds of \$16,893,000 from the issuance of common stock in the January 2005 private placement.

On June 1, 2004, Emrise Electronics and CXR Larus, together with Emrise acting as guarantor, obtained a credit facility from Wells Fargo Bank, N.A. for our domestic operations. This facility is effective through July 1, 2005 and replaced the previous credit facility we had with Wells Fargo Business Credit, Inc. No prepayment penalty was due because the prior loan contract excluded from prepayment penalties loans replaced with new credit facilities from Wells Fargo Bank, N.A. The new credit facility is subject to an unused commitment fee equal to 0.25% per annum, payable quarterly based on the average daily unused amount of the line of credit described in the following paragraph.

The new credit facility provides a \$3,000,000 revolving line of credit secured by accounts receivable, other rights to payment and general intangibles, inventories and equipment. Borrowings do not need to be supported by specific receivables or inventory balances unless aggregate borrowings under the line of credit and the term loan described in the following paragraph exceed \$2,000,000 for 30 consecutive days (a "conversion event"). If a conversion event occurs, the line of credit will convert into a formula-based line of credit until the borrowings are equal to or less than \$2,000,000 for 30 consecutive days. The formula generally provides that outstanding borrowings under the line of credit may not exceed an aggregate of 80% of eligible accounts receivable, plus 15% of the value of eligible raw material inventory, plus 30% of the value of eligible finished goods inventory. The interest rate is variable and is adjusted monthly based on the prime rate plus 0.5%. The prime rate at March 31, 2005 was 5.50%.

Edgar Filing: Emrise CORP - Form 10-Q/A

The credit facility also provides for a term loan of \$150,000 secured by equipment, amortizable over 36 months at a variable rate equal to the prime rate plus 1.5%. The term loan portion of the facility had a balance of \$112,000 at March 31, 2005.

Wells Fargo Bank, N.A. has also provided us with \$300,000 of credit available for the purchase of new capital equipment when needed through July 1, 2005, of which a balance of \$142,000 was outstanding at March 31, 2005. The interest rate is equal to the 90-day London InterBank Offered Rate ("LIBOR") rate (3.10% at March 31, 2005) plus 3.75% per annum. Amounts borrowed under this arrangement are amortized over 60 months from the respective dates of borrowing.

The previous credit facility bore interest at the prime rate plus 1.0% and was subject to a \$13,500 minimum monthly interest fee plus an unused commitment fee equal to 0.25% per annum. The average amounts outstanding on the revolving portions of the previous and new credit facilities during the year ended December 31, 2004 and the three months ended March 31, 2005 were \$1,035,000 and \$400,000, respectively. The prime rate averaged approximately 4.25% in 2004 and approximately 5.5% during the three months ended March 31, 2005. Therefore, during 2004 the average annual interest cost on the new revolving line of credit was approximately \$49,162 while the average annual interest cost on the prior revolving line of credit was approximately \$162,000 due to the minimum interest rate charge of \$13,500 per month. During the three months ended March 31, 2005, interest on the new revolving line of credit totaled approximately \$7,000 and was not subject to the \$13,500 per month minimum interest charge that applied during the three months ended March 31, 2004.

At March 31, 2005, we had no outstanding balance owing under the revolving credit line and we had \$2,000,000 of availability on the non-formula based portion of the credit line. The credit facility is subject to various financial covenants. At March 31, 2005, we were in compliance with those financial covenants. The minimum debt service coverage ratio of each of Emrise Electronics and CXR Larus must be not less than 1.50:1.00 on a trailing four-quarter basis. "Debt service coverage ratio" is defined as net income plus depreciation plus amortization, minus non-financed capital expenditures, divided by current portion of long-term debt measured quarterly. The current ratio of each of Emrise Electronics and CXR Larus must be not less than 1.50:1.00, determined as of each fiscal quarter end. "Current ratio" is defined as total current assets divided by total current liabilities. Net income after taxes of each of Emrise Electronics and CXR Larus must be not less than \$1.00 on an annual basis, determined as of the end of each quarter. Net profit after taxes of each of Emrise Electronics and CXR Larus must be not less than \$1.00 in each fiscal quarter immediately following a fiscal quarter in which that entity incurred a net loss after taxes. Total liabilities divided by tangible net worth of our domestic operations on a consolidated basis must not at any time be greater than 2.00:1.00, determined as of each fiscal quarter end. Tangible net worth of us and all of our subsidiaries on a consolidated basis must not at any time be less than \$5,200,000, measured at the end of each quarter. "Total liabilities" is defined as current liabilities plus non-current liabilities, minus subordinated debt. "Tangible net worth" is defined as stockholders' equity plus subordinated debt, minus intangible assets.

At March 31, 2005, there was no balance outstanding under the revolving line of credit. The credit facility expires in July 2005. However, the bank has informally extended the term of the revolving line by two months and has indicated that it is amenable to renewing and expanding the credit facility. However, if we are unable to obtain a renewal of the credit facility, we believe we will have sufficient funds available to timely repay any additional amounts

Edgar Filing: Emrise CORP - Form 10-Q/A

we may borrow under the credit facility prior to its expiration.

16

On July 13, 2004, we issued two promissory notes to the former stockholders of Larus Corporation totaling \$3,000,000 in addition to paying cash and issuing shares of common stock and two zero interest short-term notes totaling \$887,500 that we repaid in 2004, in exchange for 100% of the capital stock of Larus Corporation. These notes are subordinated to our bank debt and are payable in 72 equal monthly payments of principal totaling \$41,667 per month plus interest at the 30-day LIBOR rate plus 5% with a maximum interest rate of 7% during the first two years of the term of the notes, 8% during the third and fourth years and 9% thereafter. As of March 31, 2005, the 30-day LIBOR rate was 2.86%. The total balance on these promissory notes as of March 31, 2005 was \$2,625,000.

As of March 31, 2005, our foreign subsidiaries had credit facilities, including lines of credit and term loans, with Venture Finance PLC, a subsidiary of the global Dutch ABN AMRO Holdings, N.V. financial institution, in England, IFN Finance, a subsidiary of ABN AMRO Holdings, N.V., Banc National de Paris, Societe Generale in France and Sogelease and Johnan Shinkin Bank in Japan. As of March 31, 2005, the balances outstanding under our United Kingdom, France and Japan credit facilities were \$1,230,000, \$692,000 and \$52,000, respectively.

XCEL Japan Ltd., or XJL, obtained a term loan on November 29, 2002 from Johnan Shinkin Bank. The loan is amortized over five years, carries an annual fixed interest rate of 3.25% and is secured by the assets of XJL. The balance of the loan as of March 31, 2005 was \$52,000 using the exchange rate in effect at that date for conversion of Japanese yen into United States dollars. There are no financial performance covenants applicable to this loan.

XPS, one of our United Kingdom subsidiaries, obtained a credit facility with Venture Finance PLC in November 2002. This credit facility expires on November 15, 2005. Using the exchange rate in effect at March 31, 2005 for the conversion of British pounds sterling into United States dollars, the facility is for a maximum of \$2,685,000 and includes a \$627,000 unsecured cash flow loan, a \$143,000 term loan secured by fixed assets, and the remainder is a loan secured by accounts receivable and inventory. The interest rate is the base rate of Venture Finance PLC (4.75% at March 31, 2005) plus 2%, and is subject to a minimum rate of 4% per annum. There are no financial performance covenants applicable to this credit facility.

In April 2003, CXR-AJ obtained a credit facility from IFN Finance, a subsidiary of ABN AMRO N.V. This credit facility is for a maximum of \$1,488,000, based on the exchange rate in effect at March 31, 2005 for the conversion of euros into United States dollars. CXR-AJ also had \$74,000 of term loans with several French banks outstanding as of March 31, 2005. The IFN Finance facility is secured by accounts receivable and carries an annual interest rate of 1.6% above the French "T4M" rate. At March 31, 2005, the French T4M rate was 2.05% and this facility had a balance of \$692,000. This facility has no financial performance covenants.

Our backlog was \$15,021,000 as of March 31, 2005 as compared to \$9,830,000 as of March 31, 2004. The increase in backlog was primarily due to the addition of \$4,925,000 of backlog for Pascall. Our backlog as of March 31, 2005 was 91.7% related to our electronic components business, which business tends to provide us with long lead-times for our manufacturing processes due to the custom nature of the products, and 8.3% related to our communications equipment business, which business tends to deliver standard products from stock

Edgar Filing: Emrise CORP - Form 10-Q/A

as orders are received. The amount of backlog orders represents revenue that we anticipate recognizing in the future, as evidenced by purchase orders and other purchase commitments received from customers, but on which work has not yet been initiated or with respect to which work is currently in progress. However, there can be no assurance that we will be successful in fulfilling such orders and commitments in a timely manner or that we will ultimately recognize as revenue the amounts reflected as backlog.

17

As described above under the heading "Overview," we acquired Larus Corporation and Vista in July 2004. As a result of the acquisition, we acquired all of the assets and liabilities of Larus Corporation, including the intellectual property, cash, accounts receivable and inventories owned by each of Larus Corporation and Vista. The \$6,539,500 purchase price consisted of \$1,000,000 in cash, the issuance of 1,213,592 shares of our common stock with a fair value of \$1,000,000, \$887,500 in the form of two short-term, zero interest promissory notes that were repaid in 2004, \$3,000,000 in the form of two subordinated secured promissory notes, warrants to purchase up to an aggregate of 150,000 shares of our common stock at \$1.30 per share, and approximately \$580,000 of acquisition costs. In addition, we assumed \$245,000 worth of accounts payable and accrued expenses and entered into an above-market seven-year real property lease with the sellers. This lease represents an obligation that exceeds the fair market value by approximately \$756,000 and is part of the acquisition accounting. We funded the cash portion of the purchase price using proceeds from our credit facility with Wells Fargo Bank, N.A. and our cash on-hand.

On January 5, 2005, we issued to 17 accredited record holders in a private offering an aggregate of 12,503,500 shares of common stock at a purchase price of \$1.44 per share and five-year investor warrants to purchase up to an additional 3,125,875 shares of our common stock at an exercise price of \$1.73 per share, for a total purchase price of \$18,005,000. We paid cash placement agent fees and expenses of approximately \$961,000, and issued five-year placement warrants to purchase up to an aggregate of 650,310 shares of common stock at an exercise price of \$1.73 per share in connection with the offering. Additional costs related to the financing include legal, accounting and consulting fees that continue to be incurred in connection with the resale registration described below.

We agreed to register for resale the shares of common stock issued to investors and the shares of common stock issuable upon exercise of the investor warrants and placement warrants. The registration obligations require, among other things, that a registration statement be declared effective no later than June 4, 2005. We were unable to meet this obligation and therefore paid to each investor liquidated damages equal to 1% of the amount paid by the investor to us in the offering, which damage payments totaled an aggregate of approximately \$180,000. We also paid or must pay to each investor liquidated damages for the period from June 5, 2005 through the date the registration statement is declared effective, and for any future periods in which we are unable to maintain the effectiveness of the registration in accordance with the requirements contained in the registration rights agreement we entered into with the investors. These liquidated damages are equal to 2% of the amount paid by each investor for the common shares still owned by the investor on each monthly anniversary of the date of the default that occurs prior to the cure of the default, pro rated for periods of default shorter than one month. The maximum aggregate liquidated damages payable to any investor will be equal to 10% of the aggregate amount paid by the investor for the shares of our common stock. Accordingly, the maximum aggregate penalty that we would be required to pay under this provision

Edgar Filing: Emrise CORP - Form 10-Q/A

is 10% of the \$18,005,000 initial purchase price of the common stock, which would be \$1,801,000. Although we anticipate that we will be able to meet our future registration obligations, we also anticipate that we will have sufficient cash available to pay the maximum penalties if required.

We used a portion of the proceeds from the January 2005 private placement to fund the acquisition of Pascall described above under the heading "Overview." In connection with the Pascall acquisition, we loaned to XCEL Corporation Ltd. approximately \$10,100,000 in cash that was used to acquire Pascall and to repay Pascall's existing intercompany debt. As described above, the Pascall purchase price is subject to upward or downward adjustment, and we have guaranteed obligations of XCEL Corporation Ltd. in connection with the Pascall acquisition and have agreed to indemnify Pascall's former parent in connection with obligations under Pascall's facilities lease.

18

We included in our annual report on Form 10-K for the year ended December 31, 2004 a contractual obligations table that outlines payments due from us or our subsidiaries under our lines of credit and other significant contractual obligations through 2009, exclusive of interest. During the three months ended March 31, 2005, no material changes in this information occurred outside the ordinary course of business.

We intend to grow our business through both internal growth and through further acquisitions that we identify as being potentially both synergistic and accretive of our earnings. Any additional acquisitions would likely be funded through the use of cash and/or a combination of cash and our stock.

We believe that current and future available capital resources, revenues generated from operations, and other existing sources of liquidity, including the credit facilities we have and the remaining proceeds we have from the January 2005 private placement, will be adequate to meet our anticipated working capital and capital expenditure requirements for at least the next twelve months. If, however, our capital requirements or cash flow vary materially from our current projections, if unforeseen circumstances occur, or if we require a significant amount of cash to fund future acquisitions, we may require additional financing. Our failure to raise capital, if needed, could restrict our growth, limit our development of new products or hinder our ability to compete.

EFFECTS OF INFLATION

The impact of inflation and changing prices has not been significant on the financial condition or results of operations of either our company or our operating subsidiaries.

IMPACTS OF NEW ACCOUNTING PRONOUNCEMENTS

In November 2004, the Financial Accounting Standards Board ("FASB") issued SFAS No. 151, "Inventory Costs, an amendment of ARB No. 43, Chapter 4," SFAS No. 151 clarifies that abnormal inventory costs such as costs of idle facilities, excess freight and handling costs, and wasted materials (spoilage) are required to be recognized as current period costs. The provisions of SFAS No. 151 are effective for our fiscal 2006. We are currently evaluating the provisions of SFAS No. 151 and do not expect that adoption will have a material effect on our financial position, results of operations or cash flows.

In December 2004, the FASB issued SFAS No. 123 (revised 2004),

Edgar Filing: Emrise CORP - Form 10-Q/A

"Share-Based Payment," which addresses the accounting for employee stock options. SFAS No. 123(R) eliminates the ability to account for shared-based compensation transactions using APB Opinion No. 25 and generally would require instead that such transactions be accounted for using a fair value-based method. SFAS No. 123(R) also requires that tax benefits associated with these share-based payments be classified as financing activities in the statement of cash flow rather than operating activities as currently permitted. SFAS No. 123(R) becomes effective for interim or annual periods beginning after June 15, 2005. Accordingly, we are required to apply SFAS No. 123(R) beginning in the quarter ending September 30, 2005. SFAS No. 123(R) offers alternative methods of adopting this final rule. At the present time, we have not yet determined which alternative method we will use.
