Form 10-Q
September 14, 2010

U.S. SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

R QUARTERLY REPORT UNDER SECTION 13 OR 15(D) OF THE
SECURITIES EXCHANGE ACT OF 1934

FOR THE QUARTERLY PERIOD ENDED July 31, 2010.

£ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE
SECURITIES EXCHANGE ACT OF 1934

FOR THE TRANSITION PERIOD OF _____ TO _____.

Commission File Number: 001-33125

METALLINE MINING COMPANY
(Exact name of registrant as specified in its charter)

Nevada
State or other jurisdiction of
incorporation or organization

91-1766677
(I.R.S. Employer
Identification No.)

6400 S. Fiddlers Green Circle, Suite 950, Greenwood Village, CO 80111
(Address of principal executive offices, including zip code)

Registrant's telephone number: (303) 796-3020

Indicate by check mark whether the registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes R No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes o No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or smaller reporting company:

Edgar Filing: METALLINE MINING CO - Form 10-Q

Large accelerated filer

Accelerated filer
Smaller reporting Company R

Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).
Yes No R

As of September 7, 2010, there were 105,901,798 shares of the Registrant's \$.01 par value Common Stock ("Common Stock"), the Registrant's only outstanding class of voting securities, outstanding

NOTE 1 – ORGANIZATION, DESCRIPTION OF BUSINESS AND GOING CONCERN

Organization and Description of Business

Metalline Mining Company (the “Company” or “Metalline”) was incorporated in the State of Nevada on November 8, 1993 as the Cadgie Company for the purpose of acquiring and developing mineral properties. The Cadgie Company was a spin-off from its predecessor, Precious Metal Mines, Inc. On June 28, 1996, at a special directors meeting, the Company’s name was changed to Metalline Mining Company. The Company’s fiscal year-end is October 31. The Company has not realized any revenues from its planned operations and is considered an Exploration Stage Company.

The Company expects to engage in the business of mineral exploration. The Company currently owns several mining concessions in Mexico (collectively known as the Sierra Mojada Property). The Company conducts its operations in Mexico through its wholly-owned subsidiary corporations, Minera Metalin S.A. de C.V. (“Minera Metalin”) and Contratistas de Sierra Mojada S.A. de C.V. (“Contratistas”).

On April 16, 2010, Metalline Mining Delaware, Inc., a wholly-owned subsidiary of the Company, was merged with and into Dome Ventures Corporation (“Dome”). As a result, Dome became a wholly-owned subsidiary of the Company. Dome’s subsidiaries include its wholly-owned subsidiaries Dome Asia Inc., and Dome International Global Inc., which are incorporated in the British Virgin Islands. Dome International Global Inc.’s subsidiaries include its wholly-owned subsidiary, Dome Ventures SARL Gabon, as well as its 99.99%-owned subsidiary incorporated in Nigeria, Dome Minerals Nigeria Limited. Dome conducts its exploration activities in Gabon, Africa through Dome Ventures SARL Gabon. We have included the financial results of Dome and its subsidiaries in our consolidated statement of operations effective April 16, 2010.

The Company’s efforts have been concentrated in expenditures related to exploration properties, principally in the Sierra Mojada Property located in Coahuila, Mexico. The Company has not determined whether the exploration properties contain ore reserves that are economically recoverable. The ultimate realization of the Company’s investment in exploration properties is dependent upon the success of future property sales, the existence of economically recoverable reserves, the ability of the Company to obtain financing or make other arrangements for development, and upon future profitable production. The ultimate realization of the Company’s investment in exploration properties cannot be determined at this time, and accordingly, no provision for any asset impairment that may result, in the event the Company is not successful in developing or selling these properties, has been made in the accompanying consolidated financial statements.

Going Concern

As a result of our recurring losses from operations and limited capital resources during the fiscal year ended October 31, 2009, our independent registered public accounting firm’s report on our financial statements as of October 31, 2009 and for the fiscal years ended October 31, 2009 and 2008 included an explanatory paragraph expressing substantial doubt about the Company’s ability to continue as a going concern.

On April 16, 2010, the Company successfully closed the Dome merger transaction and special warrant offering resulting in an increase in cash and cash equivalents of approximately \$14,580,000. The increase in cash and cash equivalents has improved the Company’s working capital and management believes the Company has sufficient working capital to operate over the next 12 months. Accordingly, management believes there is no longer substantial doubt about the Company’s ability to continue as a going concern for the next twelve months.

NOTE 2 – BASIS OF PRESENTATION

These unaudited interim financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Regulation S-K as promulgated by the Securities and Exchange Commission ("SEC"). Accordingly, these financial statements do not include all of the disclosures required by generally accepted accounting principles in the United States of America for complete financial statements. These unaudited interim financial statements should be read in conjunction with the audited financial statements for the year ended October 31, 2009. In the opinion of management, the unaudited interim financial statements furnished herein include all adjustments, all of which are of a normal recurring nature, necessary for a fair statement of the results for the interim period presented.

NOTE 2 – BASIS OF PRESENTATION (continued)

The preparation of financial statements in accordance with generally accepted accounting principles in the United States of America requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities, disclosure of contingent assets and liabilities known to exist as of the date the financial statements are published, and the reported amounts of revenues and expenses during the reporting period. Uncertainties with respect to such estimates and assumptions are inherent in the preparation of the Company's financial statements; accordingly, it is possible that the actual results could differ from these estimates and assumptions and could have a material effect on the reported amounts of the Company's financial position and results of operations. Operating results for the nine-months ended July 31, 2010 are not necessarily indicative of the results that may be expected for the year ending October 31, 2010.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

This summary of significant accounting policies is presented to assist in understanding the financial statements. The financial statements and notes are representations of the Company's management, which is responsible for their integrity and objectivity. These accounting policies conform to accounting principles generally accepted in the U.S. and have been consistently applied in the preparation of the financial statements.

Concentration of Risk

The Company maintains its domestic cash and cash equivalents in bank and demand deposit accounts with major financial institutions with high credit standings. Although cash deposits held in domestic financial institutions are insured by the Federal Deposit Insurance Corporation (FDIC) for up to \$250,000, certain bank accounts held by the Company exceed these federally insured limits. As of July 31, 2010, the Company's domestic cash and cash equivalent balances included \$12,454,797 which was not federally insured. The Company has not experienced any losses on such accounts and management believes that using major financial institutions with high credit ratings mitigates the credit risk in cash.

The Company also maintains cash in bank accounts in Mexico, Canada, and Gabon. These accounts are denominated in the local currency and are considered uninsured. As of July 31, 2010 and October 31, 2009, the U.S. dollar equivalent balance for these accounts was \$630,316 and \$38,851, respectively.

Earnings Per Share

Basic earnings per share includes no dilution and is computed by dividing net income available to common shareholders by the weighted average common shares outstanding for the period. Diluted earnings per share reflect the potential dilution of securities that could share in the earnings of an entity similar to fully diluted earnings per share. Although there were stock options and warrants in the aggregate of 17,048,238 shares and 21,430,207 shares outstanding at July 31, 2010 and 2009, respectively, they were not included in the calculation of earnings per share because they would have been considered anti-dilutive.

Subsequent Events

The Company has evaluated events, if any, which occurred subsequent to July 31, 2010 to ensure that such events have been properly reflected in these consolidated financial statements. See Note 14 for subsequent events.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

7

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

Exploration Costs

In accordance with accounting principles generally accepted in the United States of America, the Company expenses exploration costs as incurred. Exploration costs expensed during the nine months ended July 31, 2010 and 2009 were \$2,906,056 and \$1,096,203, respectively. The exploration costs expensed to date during the Company's exploration stage amount to \$19,830,554.

Foreign Currency Translation

Assets and liabilities of the Company's foreign operations are translated into U.S. dollars at the year-end exchange rates, and revenue and expenses are translated at the average exchange rates during the period. Exchange differences arising on translation are disclosed as a separate component of stockholders' equity. Realized gains and losses from foreign currency transactions are reflected in the results of operations. Intercompany transactions and balances with the Company's Mexican and Gabonese subsidiaries are considered to be short-term in nature and accordingly all foreign currency transaction gains and losses on intercompany loans are included in the consolidated statement of operations.

Foreign Operations

The Company has significant assets in Coahuila, Mexico and Gabon, Africa. The following table details foreign assets included in the accompanying balance sheet at July 31, 2010:

	Mexico	Gabon
Cash and cash equivalents	\$ 237,612	\$ 365,737
Other receivables	15,567	—
Prepaid expenses	203,244	181,038
Mining concessions	4,203,715	4,496,915
Office & mining equipment, net	1,339,473	42,349
Value-added tax receivable, net	910,151	133,243
Other assets	—	6,729
	\$ 6,909,762	\$ 5,226,011

Although these countries are generally considered economically stable, it is always possible that unanticipated events in foreign countries could disrupt the Company's operations. Neither the Mexican government nor the Gabonese government requires foreign entities to maintain cash reserves in their respective country.

Value-Added Tax Receivable

The Company records a receivable for value added ("IVA") taxes recoverable from governmental authorities on goods and services purchased by its Mexican and Gabonese subsidiaries. As of July 31, 2010, the Company has filed IVA tax returns with the Mexican authorities to recover approximately \$802,000 of IVA taxes paid by its Mexican subsidiaries from 2005 through 2008. IVA tax returns for approximately \$649,000 of IVA taxes paid to vendors for goods and services purchased in 2009 and 2010 have not yet been filed, but are recorded as receivable as amounts are still recoverable.

During 2008, the Mexican authorities reviewed the IVA tax returns filed and requested the Company to provide copies of supporting documentation for amounts filed. Over the last several years, the Company has worked extensively with IVA tax consultants and Mexican authorities to provide the requested documentation and answer

questions related to these tax returns, but has been unable to recover the IVA tax amounts.

At October 31, 2009, management evaluated the estimated collectability of the IVA amounts and increased its allowance for uncollectible taxes to approximately 3.6 million pesos or \$273,761. The allowance for uncollectible taxes was estimated by management based upon a number of factors including the length of time the returns have been outstanding, general economic conditions in Mexico and estimated net recovery after commissions.

8

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

During 2010, management continues to aggressively pursue collection of these IVA taxes. The Company has changed its fiscal reporting jurisdiction to a larger municipality and has hired a new IVA tax consultant in an effort to collect these tax receivables. Due to the continued uncertainty as to ultimate collection of the IVA tax receivable, management evaluated the IVA tax receivable at July 31, 2010 and increased the allowance for uncollectible taxes to 6.3 million pesos or \$492,676. The Company continues to reflect the net IVA tax receivable as a long-term asset on the Consolidated Balance Sheet as of July 31, 2010.

Marketable Securities

The Company classifies marketable securities as trading, available-for-sale, or held-to-maturity. Marketable securities include investments with maturities greater than nine months, but not exceeding twelve months. As of July 31, 2010, the Company did not own any marketable securities.

Accounting for Loss Contingencies and Legal Costs

From time to time, the Company is named as a defendant in legal actions arising from our normal business activities. The Company records an estimated loss contingency when information available prior to issuance of the financial statements indicates that it is probable that a loss has been incurred at the date of the financial statements and the amount of the loss can be reasonably estimated. Legal costs incurred in connection with loss contingencies are considered period costs and accordingly are expensed in the period services are provided.

Income Taxes

Income taxes are accounted for based upon the asset and liability method. Under this approach, deferred income taxes are recorded to reflect the tax consequences in future years of differences between the tax basis of assets and liabilities and their financial reporting amounts at each year-end. A valuation allowance is recorded against deferred tax assets if management does not believe the Company has met the "more likely than not" standard imposed by this guidance to allow recognition of such an asset.

Effective November 1, 2007, the Company adopted accounting guidance for uncertainty in income taxes. This guidance addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. The Company may recognize the tax benefit from uncertain tax positions only if it is at least more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement with the taxing authorities. This accounting standard also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure.

Fair Value Measurements

On November 1, 2008, the Company adopted new accounting guidance on fair value measurements. The new guidance defines fair value, establishes a framework for measuring fair value under U.S. GAAP and expands disclosures about fair value measurements. The new fair value accounting guidance is applied prospectively for financial assets and liabilities measured on a recurring basis as of November 1, 2008. The adoption of this guidance did not have a material impact on the Company's financial position, results of operations or cash flows.

In February 2008, the Financial Accounting Standards Board ("FASB") issued further accounting guidance which delayed the effective date of applying fair value measurements for nonfinancial assets and nonfinancial liabilities,

except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually). The new accounting guidance for nonfinancial assets and nonfinancial liabilities was effective for the Company's fiscal year beginning November 1, 2009. The adoption of the new guidance applicable to non financial assets and liabilities did not have a material effect on its financial position, results of operations or cash flows.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The Company measures certain assets and liabilities at fair value. Fair value is defined as an “exit price” which represents the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in valuing an asset or liability. The new accounting guidance also requires the use of valuation techniques to measure fair value that maximize the use of observable inputs and minimize the use of unobservable inputs. As a basis for considering such assumptions and inputs a fair value hierarchy has been established, which identifies and prioritizes three levels of inputs to be used in measuring fair value.

The three levels of the fair value hierarchy are as follows:

- Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;
- Level 2 Quoted prices in markets that are not active, or inputs that are observable, either directly or indirectly, for substantially the full term of the asset or liability;
- Level 3 Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (supported by little or no market activity).

Under fair value accounting, assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. As of July 31, 2010 and October 31, 2009, the Company had no financial or non-financial assets or liabilities required to be reported for fair value purposes.

The carrying amounts of the Company’s financial instruments, including cash and cash equivalents, other receivables, accounts payable, payable to joint venture partner, and income tax payable, approximate fair value at July 31, 2010 and October 31, 2009 due to the short maturities of these financial instruments.

On November 1, 2008, the Company adopted a pronouncement on what is now codified as Accounting Standards Codification 820, Fair Value Measurements and Disclosure. This pronouncement provides authoritative guidance regarding the fair value option for financial assets and financial liabilities. This guidance provides a choice to measure many financial instruments and certain other items at fair value on specified election dates and requires disclosures about the election of the fair value option. Unrealized gains and losses on items for which the fair value option has been elected are reported in earnings. The Company has chosen not to elect the fair value option for any financial or non financial instruments as of the adoption date, thus this authoritative guidance did not have an impact on the Company's financial position or results of operations.

Property Concessions

Costs of acquiring property concessions are capitalized by project area upon purchase or staking of the associated claims. Costs to maintain the property concessions and leases are expensed as incurred. When a property concession reaches the production stage, the related capitalized costs will be amortized, using the units of production method on the basis of periodic estimates of ore reserves. To date, no concessions have reached production stage.

Property concessions are periodically assessed for impairment of value and any diminution in value is charged to operations at the time of impairment. Should a property concession be abandoned, its capitalized costs are charged to operations. The Company charges to operations the allocable portion of capitalized costs attributable to property

concessions sold. Capitalized costs are allocated to property concessions abandoned or sold based on the proportion of claims abandoned or sold to the claims remaining within the project area.

Goodwill

Goodwill represents the excess, at the date of acquisition, of the purchase price of the business acquired over the fair value of the net tangible and intangible assets acquired. Annually, the Company performs a fair value and potential impairment assessment of its goodwill. An impairment analysis is done more frequently if certain events or circumstances arise that would indicate a change in the fair value of the non-financial asset has occurred (i.e., an impairment indicator).

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In evaluating its goodwill, the Company compares the carrying value of the net assets of each reporting unit to its respective fair value. This represents the first step of the impairment test. If the fair value of a reporting unit is less than the carrying value of its net assets, the Company must proceed to step two of the impairment test. Step two involves allocating the calculated fair value to all of the tangible and identifiable intangible assets of the reporting unit as if the calculated fair value was the purchase price in a business combination. To the extent the carrying value of the goodwill exceeds its implied fair value under step two of the impairment test, an impairment charge equal to the difference is recorded. During the quarter ended July 31, 2010, the Company did not identify an impairment indicator relative to its goodwill. As a result, the Company was not required to conduct the first step of the impairment test. However, if in future periods the Company determines that the carrying amount of the net assets of its reporting units exceeds the respective fair value as a result of step one, the application of step two of the impairment test could result in a material impairment charge to the goodwill associated with the Dome transaction. The Company will perform its annual impairment test of goodwill during the quarter ended April 30, 2011.

Recent Accounting Pronouncements

Effective July 1, 2009, the FASB Accounting Standards Codification (“ASC”) became the single official source of authoritative, nongovernmental U.S. GAAP. The historical U.S. GAAP hierarchy was eliminated and the ASC became the only level of authoritative U.S. GAAP, other than guidance issued by the SEC. The Company’s accounting policies were not affected by the conversion to ASC. However, references to specific accounting standards in the notes to our consolidated financial statements have been changed to refer to the appropriate section of the ASC.

In December 2007, the FASB issued a pronouncement on what is now codified as ASC 805, Business Combinations. This pronouncement revised the authoritative guidance on business combinations, including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for pre-acquisition gain and loss contingencies, the recognition of capitalized in-process research and development, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition-related transaction costs, and the recognition of changes in the acquirer’s income tax valuation allowance. The new accounting guidance also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. The new guidance was effective as of the beginning of an entity’s fiscal year that begins after December 15, 2008, and was adopted by the Company on November 1, 2009. The adoption of this new guidance had a material impact on the Company’s financial position, results of operations and cash flows for the nine months ended July 31, 2010 due to the acquisition of Dome.

In April 2009, the FASB issued a pronouncement on what is now codified as ASC 805, Business Combinations. This pronouncement issued authoritative guidance on accounting for assets acquired and liabilities assumed in a business combination that arise from contingencies, which amends the provisions related to the initial recognition and measurement, subsequent measurement and disclosure of assets and liabilities arising from contingencies in a business combination under previously issued guidance. The authoritative guidance requires that such contingencies be recognized at fair value on the acquisition date if fair value can be reasonably estimated during the allocation period. The new guidance was effective as of the beginning of an entity’s fiscal year that begins after December 15, 2008, and was adopted by the Company on November 1, 2009. The adoption of this new guidance had no material impact on the Company’s financial position, results of operations or cash flows.

In August 2009, the FASB issued Accounting Standards Update (“ASU”) 2009-5, Topic 820 which clarified techniques for valuing a liability in circumstances where a quoted price for an identical liability is not available. This new accounting guidance became effective for interim periods beginning after August 31, 2009 and was adopted by the Company on November 1, 2009. The adoption of this new guidance had no material impact on the Company’s financial position, results of operations or cash flows.

NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

In January 2010, the FASB issued ASU No. 2010-06 which provides amendments to ASC Topic 820 that will provide more robust disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value measurements, and (4) the transfers between Levels 1, 2, and 3. The new disclosures and clarifications of existing disclosures are effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those years. The Company does not expect that the adoption of ASU No. 2010-06 will have a material effect on its financial position, results of operations or cash flows.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force) and the United States Securities and Exchange Commission did not or are not believed to have a material impact on the Company's present or future consolidated financial statements.

NOTE 4 – MERGER WITH DOME VENTURES

On April 16, 2010 (the “Merger Date”), a wholly-owned subsidiary of the Company was merged with and into Dome, resulting in Dome becoming a wholly-owned subsidiary of the Company (the “Merger”). To effect the Merger, Dome stockholders received 0.968818 shares of the Company’s common stock for each share of Dome common stock they held as of the Merger Date. Additionally, on the Merger Date, all outstanding warrants to acquire Dome common stock were exchanged for warrants to acquire the Company’s common stock on equivalent terms. As a result of the merger transaction, the holders of the Company’s common stock prior to the Merger Date own approximately 53% of the Company post-merger and the former Dome shareholders own approximately 47% of the Company post-merger. Dome is a resource company that holds three exploration licenses in Gabon, West Africa and recently entered into a joint venture agreement with AngloGold Ashanti Limited (“AngloGold”) on two of its licenses, Ndjole and Mevang. Dome also entered into a second joint venture agreement on the Ogooue license held by AngloGold (Note 6).

Based on the closing price of the Company’s common stock on the Merger Date, the consideration received by Dome shareholders in the Merger had a value of approximately \$26.7 million as detailed below.

	Conversion Calculation	Estimated Fair Value
Dome common stock outstanding on the Merger Date	49,260,624	
Less: Dome common stock issued in connection with the special warrant offering (a)	(28,911,111)	
Dome common stock outstanding on the Merger Date attributable to the merger consideration	20,349,513	
Multiplied by Metalline’s stock price as of the Merger Date multiplied by the exchange ratio of 0.968818 (\$1.26 x 0.968818)	\$ 1.2207	\$ 24,840,886
Fair value of the Metalline warrants issued to replace Dome warrants as of the Merger Date (b)		1,895,252
Merger consideration transferred		\$ 26,736,138

- (a) In accordance with ASC Topic 805-10, Business Combinations — Overall (“ASC 805-10”), transactions entered into primarily for the benefit of the combined entity,

rather than primarily for the benefit of the acquired company should be accounted for as a separate transaction. The special warrant offering described above was completed for the benefit of the combined entity and therefore the value of the

NOTE 4 – MERGER WITH DOME VENTURES (continued)

Metalline common shares issued in exchange for the shares acquired upon the conversion of the special warrants was treated as a separate financing transaction and not included as part of the merger consideration.

- (b) Represents the fair value of warrants to acquire 2,228,281 shares of Company common stock issued to replace Dome warrants outstanding as of the Merger Date. ASC 805-10 requires that the fair value of replacement warrants be included in the consideration transferred. The fair value of the Metalline equivalent warrants was estimated using the Black-Scholes valuation model utilizing the assumptions noted below.

Stock price	\$1.26
Post conversion strike price	\$0.41
Average expected volatility	98%
Dividend yield	None
Average risk-free interest rate	0.12%
Average contractual term	.19 years
Black-Scholes average value per warrant	\$0.8505

The expected volatility of Metalline's stock price is based on the average historical volatility which is based on daily observations and duration consistent with the expected life assumption and implied volatility. The average contractual term of the warrants is based on the remaining contractual exercise term of each warrant. The risk free interest rate is based on U.S. treasury securities with maturities equal to the expected life of the warrants.

The transaction has been accounted for using the acquisition method of accounting which requires, among other things, the assets acquired and liabilities assumed to be recognized at their fair values as of the Merger Date. The following table summarizes the estimated fair values of major assets acquired and liabilities assumed:

	Estimated Fair Value
Cash and cash equivalents	\$ 2,618,548
Other receivables	17,942
Prepaid expenses	6,404
Property Concessions – Gabon, Africa	4,496,915
Equipment	59,331
Value-added tax receivable	65,129
Other assets	4,294
Accounts payable	(251,577)
Accrued expenses	(6,436)
Payable to joint venture partner	(13,274)
Total identifiable net assets	6,997,276
Goodwill	19,738,862
Estimated consideration expected to be transferred	\$ 26,736,138

As of the Merger Date, the expected fair value of other receivables and value-added tax receivable approximated the historical cost. Property concessions do not have a useful life pursuant to the Company's policy on property

concessions described in Note 3.

Goodwill is calculated as the excess of the consideration transferred over the net assets recognized and represents the expected cost synergies of the combined business, assembled workforce, and the going concern nature of Dome and its subsidiaries. The Company estimates that the \$19.7 million of goodwill, relating to Dome's pre-merger historical tax basis, will be not deductible for tax purposes.

13

NOTE 4 – MERGER WITH DOME VENTURES (continued)

A single estimate of fair value results from a complex series of judgments about future events and uncertainties and relies heavily on estimates and assumptions. The Company's judgments used to determine the estimated fair value assigned to each class of assets acquired and liabilities assumed, as well as asset lives, can materially impact the Company's results from operations. The Company's management allocated the acquisition cost to the assets acquired and liabilities assumed based on the estimated fair value of Dome's tangible and identifiable assets and liabilities. The amount allocated to the property concessions was based on a valuation report prepared by a third party appraisal firm. The allocation is not considered final as of the date of this report as management is still reviewing certain of the underlying assumptions and calculations used in the allocation relating primarily to the current assets and liabilities of Dome that were acquired. However, the Company believes the final purchase price allocation will not be materially different than presented herein

During the nine months ended July 31, 2010, the Company incurred merger related transaction costs consisting primarily of legal and accounting fees of \$260,672. These costs are included in professional fees on the consolidated statement of operations.

Actual and Pro-forma Impact of the Merger

Dome's net loss of \$56,806 and \$92,040 for the three months ended July 31, 2010 and for period from the Merger Date through July 31, 2010, respectively are included in the Company's consolidated statement of operations for the three and nine months ended July 31, 2010. The net loss for Dome represents a net loss per share of less than \$0.01 per share for the Company during the three and nine months ended July 31, 2010.

The following table presents supplemental pro forma information as if the Merger had occurred on November 1, 2009 for the three and nine months ended July 31, 2010 and November 1, 2008 for the three and nine months ended July 31, 2009. As such, all periods presented include merger related charges. The pro forma consolidated results are not necessarily indicative of what the Company's consolidated net loss would have been had the Company completed the Merger on November 1, 2009, or November 1, 2008. In addition, the pro forma consolidated results do not purport to project the future results of the combined Company nor do they reflect the expected realization of any cost savings associated with the Merger.

	Three Months Ended July 31, 2009		Nine Months Ended July 31, 2010		2009	
Revenues	\$	—	\$	—	\$	—
Net loss		(195,000)		(6,909,000)		(5,664,000)
Loss per share	\$		* \$	(0.07)	\$	(0.06)

*Less than \$0.01 per share

2010 Pro forma Results – Nine Months Ended July 31, 2010

The 2010 pro forma results were calculated by combining the results of Metalline with the stand-alone historical results of Dome for the six months ended March 31, 2010. Additionally the following adjustments were made to account for certain costs which would have been incurred had the acquisition commenced on November 1, 2009:

- Record additional depreciation of \$15,000 for estimated fair value of fixed assets identified in the merger using an estimated remaining life of two years.
-

Edgar Filing: METALLINE MINING CO - Form 10-Q

Eliminate historical compensation costs for Dome officers/directors incurred during the period and record additional director's fees for the chairman and two additional independent directors added in conjunction with the merger.

2009 Pro forma Results - Three and Nine Months Ended July 31, 2009

The 2009 pro forma results were calculated by combining the historical financial results of Metalline with the stand-alone historical results of Dome for the three and nine months ended July 31, 2009. Additionally, the following adjustments

14

NOTE 4 – MERGER WITH DOME VENTURES (continued)

were made to account for certain costs that would have been incurred had the acquisition commenced on November 1, 2008:

- Recorded additional depreciation of \$7,000 and \$21,000 for three and nine months ended July 31, 2009 for estimated fair value of fixed assets identified in the merger using an estimated remaining life of two years.
- Eliminated historical compensation costs for Dome officers/directors incurred during the period and record additional directors' fees for the chairman and two additional independent directors added in conjunction with the merger.
- Added \$8,000 and \$642,000 of transaction costs that were incurred to consummate the merger during the three and nine months ended July 31, 2010, respectively.

NOTE 5 – MINING CONCESSIONS

Sierra Mojada Mining Concessions

The Company owns or has an option to acquire 27 mining concessions consisting of 19,580 hectares (about 48,385 acres) in the mining region known as the Sierra Mojada District located in Sierra Mojada, Coahuila, Mexico. The mining concessions are considered one prospect area and are collectively referred to as the Sierra Mojada Project.

During the nine months ended July 31, 2010, the Company entered into agreements with several Mexican individuals to acquire seven mining concessions in the Sierra Mojada prospect area. The agreements are considered option purchase agreements and give the Company the option, but not the obligation, to acquire the seven concessions at established prices over the next 3 to 5 years. Pursuant to the option purchase agreements, the Company is required to make certain payments on a semi-annual or annual basis over the terms of these contracts. The Company will record these payments as mining concession assets. In the event the Company elects not to move forward with the purchase option outlined in the agreements, the Company will expense all cumulative costs deferred for each respective concession. As of July 31, 2010, the Company has capitalized \$385,000 of payments pursuant to these option purchase agreements.

The Company purchased eleven of the concessions from Mexican entities and/or Mexican individuals and nine concessions were granted by the Mexican government. Each mining concession enables the Company to explore the underlying concession in consideration for the payment of a semi-annual fee to the Mexican government and completion of certain annual assessment work. Annual assessment work in excess of statutory annual requirements can be carried forward and applied to future periods. The Company has completed sufficient work to meet future requirements for many years.

Gabon Mining Concessions

The Company, through its wholly-owned subsidiary Dome, owns three exploration licenses (Ndjole, Mevang, and Mitzi) each covering approximately 2,000 square kilometers in Gabon, Africa. The exploration licenses were granted in July 2008 and entitle the Company to employ sub-surface exploration methods, such as drilling and trial mining.

As discussed in Note 6, two of Dome's licenses, Ndjole and Mevang, are subject to a joint venture agreement with AngloGold, whereby AngloGold has a right to earn certain interests in these licenses. Dome also has a joint venture interest in the Ogooue license that is owned by AngloGold. Dome's third license, the Mitzi license, has iron ore potential and the Company, through Dome, is looking for a joint venture partner on this license.

The exploration licenses are valid for three years and are renewable twice with each renewal lasting for three years. The Company must spend 200,000,000 CFA francs in order to renew each exploration license for a second term of three years and 400,000,000 CFA francs in order to renew the license for a third term of three years. The Company must spend 800,000,000 CFA francs in the third term. Dome may apply for a mining license at any time during these periods. As of July 31, 2010, one United States dollar approximates 515 CFA francs.

NOTE 6 – JOINT VENTURE AGREEMENTS

In October 2009, Dome and AngloGold entered into two joint venture agreements; the Ogooue Joint Venture Agreement and Ndjole and Mevang Joint Venture Agreement.

Ogooue Joint Venture Agreement

AngloGold acquired a reconnaissance license over an area comprising 8,295 square kilometers in Gabon, Africa. This license was acquired by AngloGold for its gold potential. The joint venture is an 80/20 joint venture in favor of AngloGold. AngloGold has made a firm commitment to spend \$100,000 on exploration and will solely fund the first \$3 million of exploration expenditures, after which the parties will contribute on an 80/20 basis. Joint venture dilution provisions apply whereby if Dome is diluted in the future to a joint venture interest of 5% or less due to lack of contribution to exploration budgets, its interest will be converted to a 2% Net Smelter Return which can be purchased at an appraised value 14 months after commencement of commercial production. Should AngloGold elect not to spend the aforesaid \$3 million, the lease shall be assigned to Dome.

Ndjole and Mevang Joint Venture Agreement

Dome is the owner of the Ndjole and Mevang exploration licenses, each comprised of 2,000 square kilometers. Under the terms of the joint venture, AngloGold earned a 20% interest by paying Dome \$400,000 upon signing of the joint venture agreement in October 2009. AngloGold can earn an additional 40% interest by paying Dome \$100,000 per year over the next three years and by incurring exploration expenditures in the amount of \$3.7 million over the next three years at the rate of \$1 million in the first year, \$1.2 million in the second year and \$1.5 million in the third year. As of July 31, 2010, AngloGold has paid approximately \$1,793,000 of exploration costs pursuant to the provision above.

Once it has earned a 60% interest, AngloGold can earn an additional 10% interest (70% total) by spending \$5 million on exploration expenditures within two years of earning into a 60% interest as set out above. When the parties have a 70/30 joint venture, if Dome elects not to contribute to work programs and budgets, AngloGold can elect to earn an additional 15% interest (85% total) by carrying the project to a completed pre-feasibility study. Should AngloGold fail to perform as set out above, a 100% interest in the licenses shall revert to Dome and the joint venture will cease. AngloGold shall be entitled to withdraw from the joint venture after it has spent \$1 million on exploration expenditures.

Joint venture dilution provisions apply whereby if Dome is diluted in the future to a joint venture interest of 5% or less due to lack of contribution to exploration budgets, its interests will be converted to a 2% Net Smelter Return which can be purchased at appraised value 14 months after commencement of commercial production.

Dome is operating the exploration program on behalf of AngloGold and receives funds from time-to-time to continue the joint venture operations in Gabon. As at July 31, 2010 Dome had a balance of \$486,002 received from Anglo for ongoing exploration costs. These funds are reflected as a payable to joint venture partner on the Company's consolidated balance sheet.

As mutually agreed by both Dome and AngloGold, effective August 21, 2010 AngloGold assumed the role of project manager for both the Ogooue Joint Venture and the Ndjole and Mevang Joint Venture.

NOTE 7 - EQUIPMENT

The following is a summary of the Company's property and equipment at July 31, 2010 and October 31, 2009, respectively:

	July 31, 2010	October 31, 2009
Mining equipment	\$ 1,590,438	\$ 1,209,471
Well equipment	40,654	31,239
Communication equipment	7,514	7,288
Buildings and structures	190,636	139,679
Vehicles	190,541	114,369
Computer equipment and software	172,934	160,629
Office equipment	37,414	10,238
Assets under construction	—	12,479
	2,230,131	1,685,392
Less: Accumulated depreciation	(833,784)	(679,659)
	\$ 1,396,347	\$ 1,005,733

Depreciation expense for the nine months ended July 31, 2010 and 2009 was \$158,828 and \$148,326 respectively. The Company evaluates the recoverability of property and equipment when events and circumstances indicate that such assets might be impaired. The Company determines impairment by comparing the undiscounted future cash flows estimated to be generated by these assets to their respective carrying amounts. Maintenance and repairs are expensed as incurred. Replacements and betterments are capitalized. The cost and related reserves of assets sold or retired are removed from the accounts, and any resulting gain or loss is reflected in results of operations.

NOTE 8 - COMMON STOCK

On December 22, 2009, the Company closed a private placement of 6,500,000 units, at a price of \$0.46 per unit, with each unit consisting of one share of common stock of the Company and one common stock purchase warrant of the Company, two of which warrants entitled the holder to purchase one share of common stock. As a result of the closing of the Merger on April 16, 2010, the warrants issued as part of this private placement were terminated in accordance with their terms. Total proceeds from this private placement were \$2,990,000.

On January 10, 2010, Dome raised \$13,010,000 through a private placement of special warrants. The private placement was completed through a syndicate of Canadian investment dealers and each special warrant automatically converted into one share of Dome common stock immediately prior to the closing of the Merger. The funds were held in escrow pending the closing.

On April 16, 2010, the Company completed the Merger and issued a total of 47,724,583 shares of common stock for all the issued and outstanding shares of Dome. Based upon the closing exchange ratio of 0.968818 shares of Metalline common shares for each single share of Dome common stock, the Company determined that 28,009,594 common shares of Metalline were issued pursuant to the special warrant offering and 19,714,989 common shares of Metalline were issued for merger consideration. After deducting offering costs of \$1,048,484, the total net proceeds from the special warrant offering were \$11,961,516.

Pursuant to ASC 805-10, the 19,714,989 shares issued for merger consideration was measured at \$1.26, the closing market price of the Company's common stock on April 16, 2010.

Edgar Filing: METALLINE MINING CO - Form 10-Q

During nine months ended July 31, 2010, the Company issued 2,308,281 shares of common stock upon the exercise of warrants at an average cash consideration of \$0.41 per share and issued 118,800 shares of common stock at an average market price of \$0.81 per share to its independent directors for services provided. In addition, during the nine months ended July 31, 2010, options to acquire 353,250 shares of common stock were exercised by way of a cashless exercise whereby the recipients elected to receive 197,269 shares without payment of the exercised price and the remaining options for 155,981 shares were cancelled.

17

NOTE 8 - COMMON STOCK (continued)

A summary of the common stock and additional paid in capital activity for the nine months ended July 31, 2010 is as follows:

	Common Shares Issued	Common Share Amount	Additional Paid-In Capital	Total Capital
Balance, October 31, 2009	48,834,429	\$488,344	\$55,144,214	\$55,632,558
Common stock issued in private placement at average price of \$0.46 per share	6,500,000	65,000	2,925,000	2,990,000
Common stock issued in special warrant offering at average price of \$0.46 per share less offering costs of \$1,048,484	28,009,594	280,096	11,681,420	11,961,516
Common stock issued for Dome merger consideration at \$1.26 per share	19,714,989	197,150	24,643,736	24,840,886
Common stock issued for exercise of warrants at an average price of \$0.41 per share	2,308,281	23,082	930,513	953,595
Common stock issued for exercise of stock options at an average price of \$0.34 per share	197,269	1,973	(1,973)	—
Common stock issued for directors fees at an average price of \$0.81 per share	118,800	1,188	94,644	95,832
Warrants issued for replacement of Dome warrants at merger	—	—	1,895,252	1,895,252
Stock based compensation for options	—	—	57,312	57,312
Balance, July 31, 2010	105,683,362	\$1,056,833	\$97,370,118	\$98,426,951

During the nine months ended July 31, 2009, the Company completed a private placement of 4,756,040 units at \$0.25 per unit. Each unit consisted of one share of restricted common stock and one half of a warrant. Each whole warrant is exercisable at \$0.50 per share and has a term of 3 years. Net proceeds from these placements were \$1,189,010. The Company also issued 97,200 shares of common stock at an average market price of \$0.30 per share to its independent directors for services provided during the nine months ended July 31, 2009.

Shareholder Rights Plan

On June 11, 2007, the Board of Directors adopted a Shareholders' Right Plan through the adoption of a Rights Agreement, which became effective immediately. In connection with the adoption of the Rights Agreement, the Board of Directors declared a distribution of one Right for each outstanding share of the Company's common stock, payable to shareholders of record at the close of business on June 22, 2007. The Right is attached to the underlying common share and will remain with the common share if the share is sold or transferred.

In certain circumstances, in the event that any person acquires beneficial ownership of 20% or more of the outstanding shares of the Company's common stock, each holder of a Right, other than the acquirer, would be entitled to receive, upon payment of the purchase price, which is initially set at \$20 per Right, a number of shares of the Company's common stock having a value equal to two times such purchase price. The anti-takeover mechanisms of the Rights

Agreement were not triggered by the merger transaction with Dome and no holders of the Rights were entitled to exercise their Rights as a result of that transaction or any events described in the Merger Agreement. The Rights will expire on June 11, 2017.

18

NOTE 9 - STOCK OPTIONS

The Company has three existing qualified stock option plans. Under the 2006 Stock Option Plan (the "2006 Plan") the Company may grant non-statutory and incentive options to employees, directors and consultants for up to a total of 5,000,000 shares of common stock. Under the 2000 Equity Incentive Plan (the "2000 Plan") the Company may grant non-statutory and incentive options to employees, directors, and consultants for up to a total of 1,000,000 shares of common stock. Under the 2010 Stock Option and Stock Bonus Plan (the "2010 Plan"), the lesser of (i) 30,000,000 shares or (ii) 10% of the total shares outstanding will be reserved to be issued upon the exercise of options or the grant of stock bonuses. As of July 31, 2010, the Company has obtained approval from NYSE Amex to issue up to 10,300,000 shares under the 2010 Plan.

Options are typically granted with an exercise price equal to the closing market price of the Company's stock at the date of grant and have a contractual term of 5 to 10 years. Prior to October 31, 2006, most stock option grants were immediately vested at date of grant. Subsequent grants have typically been issued with a graded vesting schedule over approximately 2 to 3 years. Certain option awards provide for accelerated vesting if there is a change in control (as defined in the 2006 Plan). New shares are issued upon exercise of stock options.

The fair value of each option award is estimated on the date of grant using the Black-Scholes-Merton valuation model. Expected volatility is based upon weighted average of historical volatility over the expected term of the option and implied volatility. The expected term of stock options is based upon historical exercise behavior and expected exercised behavior. The risk-free interest rate is based upon implied yield on a U.S. Treasury zero-coupon issue with a remaining term equal to the expected term of the option. The dividend yield is assumed to be none as the Company does not anticipate paying any dividends in the foreseeable future.

During the nine months ended July 31, 2010, options to acquire 197,269 shares of common stock were exercised by way of a cashless exercise at an average exercise price of \$0.34 per share. The options had an intrinsic value of \$84,827 at the time of exercise. No options were granted during the nine months ended July 31, 2010.

During the nine months ended July 31, 2009, the Company granted options to acquire 705,619 shares of common stock with a weighted-average grant-date fair value of \$0.25. No options were exercised during 2009.

The following is a summary of stock option activity for the nine months ended July 31, 2010 is as follows:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at November 1, 2009	5,005,623	\$ 2.27		
Granted	--	--		
Exercised	(197,269)	0.34		
Forfeited or Expired	(355,981)	1.36		
Outstanding at July 31, 2010	4,452,373	\$ 2.43	6.29	\$ 158,566
Vested or Expected to Vest at July 31, 2010	4,452,373	\$ 2.43	6.29	\$ 158,566
Exercisable at July 31, 2010	4,385,705	\$ 2.43	6.27	\$ 158,566

The Company recognized stock-based compensation costs for stock options of \$57,312 and \$578,616 for the nine months ended July 31, 2010 and 2009, respectively. The Company typically does not recognize any tax benefits for stock options due to the Company's recurring losses. The Company currently expects all outstanding options to vest. Compensation cost is revised if subsequent information indicates that the actual number of options vested is likely to differ from previous estimates.

NOTE 9 - STOCK OPTIONS (continued)

Summarized information about stock options outstanding and exercisable at July 31, 2010 is as follows:

Options Outstanding			Options Exercisable		
Exercise Price	Number Outstanding	Weighted Ave. Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$ 0.34	352,369	8.54	\$ 0.34	352,369	\$ 0.34
1.32	100,000	0.18	1.32	100,000	1.32
2.18 - 2.85	3,750,004	6.20	2.53	3,683,336	2.53
4.30	250,000	6.89	4.30	250,000	4.30
0.34 - 4.30	4,452,373	6.29	\$ 2.43	4,385,705	\$ 2.43

A summary of the nonvested shares as of July 31, 2010, and changes during the nine months ended July 31, 2010 is as follows:

Nonvested Shares	Shares	Weighted-Average Grant-Date Fair Value
Nonvested at November 1, 2009	266,670	\$ 1.69
Granted	—	—
Vested	(200,002)	1.67
Forfeited	—	—
Nonvested at July 31, 2010	66,668	\$ 1.73

As of July 31, 2010, there was \$16,259 of total unrecognized compensation costs related to nonvested share based compensation arrangements granted under the qualified stock option plans. That cost is expected to be recognized over a weighted average period of 0.42 years.

NOTE 10 - WARRANTS

At times the Company has issued warrants to investors in connection with private placements of Company stock or in consideration for financial services. Warrants issued in consideration for financial services are typically granted with an exercise price equal to the market price of the Company's stock at the date of grant. The fair value of each warrant is estimated on the date of grant using the Black-Scholes-Merton valuation model. Expected volatility is based upon weighted average of historical volatility over the contractual term of the warrant and implied volatility. The risk-free interest rate is based upon implied yield on a U.S. Treasury zero-coupon issue with a remaining term equal to the expected term of the option. The dividend yield is assumed to be none as the Company has not paid dividends nor does not anticipate paying any dividends in the foreseeable future.

NOTE 10 – WARRANTS (continued)

A summary of warrant activity for the nine months ended July 31, 2010 is as follows:

Warrants	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life (Years)	Aggregate Intrinsic Value
Outstanding at November 1, 2009	12,979,090	\$ 1.23		
Issued with private placement	3,250,000	0.57		
Issued in merger with Dome	2,228,281	0.41		
Exercised	(2,308,281)	0.41		
Forfeited or expired	(3,553,225)	0.69		
Outstanding at July 31, 2010	12,595,865	\$ 1.22	0.84	\$ 784,633
Exercisable at July 31, 2010	12,595,865	\$ 1.22	0.84	\$ 784,633

Pursuant to the private placement transaction that closed in December 2009 and described in Note 8, the Company issued warrants to acquire 3,250,000 of common stock. The warrants were only to be exercisable if the merger agreement between Dome and Metalline was terminated and then only for a term extending until one year following the date of issuance, with an exercise price of \$0.57 per share of common stock. As a result of the closing of the Merger on April 16, 2010, the warrants issued in this private placement were terminated in accordance with their terms.

In connection with the Merger, the Company issued 2,228,281 warrants with an exercise price of \$0.41 to replace all of the outstanding warrants of Dome at the time of the Merger. As detailed in Note 4, the fair value of the warrants using the Black-Scholes valuation model was \$1,895,252. All of these warrants were subsequently exercised in June 2010. The warrants had an intrinsic value of \$631,669 at time of exercise.

During the nine months ended July 31, 2010, warrants to acquire 80,000 shares of common stock were exercised at an average exercise price of \$0.50 per share. The warrants had an intrinsic value of \$54,800 at time of exercise.

Summarized information about warrants outstanding and exercisable at July 31, 2010 is as follows:

Warrants Outstanding			Warrants Exercisable		
Exercise Price	Number Outstanding	Weighted Ave. Remaining Contractual Life (Years)	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
\$0.34 -					
\$0.50	2,655,976	1.98	\$ 0.49	2,655,976	\$ 0.49
\$1.25	8,981,944	0.48	1.25	8,981,944	1.25
\$2.00 -					
\$2.42	457,945	0.68	2.38	457,945	2.38
\$3.40	500,000	1.43	3.40	500,000	3.40

\$0.34 -						
\$3.40	12,595,865	0.84	\$	1.22	12,595,865	\$ 1.22

21

NOTE 11 - COMMITMENTS AND CONTINGENCIES

Compliance with Environmental Regulations

The Company's mining activities are subject to laws and regulations controlling not only the exploration and mining of mineral properties, but also the effect of such activities on the environment. Compliance with such laws and regulations may necessitate additional capital outlays, affect the economics of a project, and cause changes or delays in the Company's activities.

Employment Agreements

The Company previously entered into executive employment agreements with four of its executive officers. The employment agreements have (or had) a term through January 1, 2011, and provide for an automatic extension of a one year term unless the agreement(s) was otherwise terminated. The employment agreements also provide for severance payments under certain circumstances, including if the agreements are terminated or not renewed for the calendar year following a change in control event. The employment agreements were entered into with Merlin Bingham (the Company's former President), Roger Kolvoord (the Company's former Executive Vice President), Robert Devers (Chief Financial Officer), and Terry Brown (Vice President – Operations), and provide (or provided) for an annual base salary of \$247,000, \$224,000, \$165,000 and \$150,000, respectively.

Effective July 1, 2010, Merlin Bingham ceased serving as the Company's President and Chief Executive Officer. Effective July 31, 2010 Roger Kolvoord ceased serving as the Company's Executive Vice President. On August 3, 2010, the Company entered into a Severance Agreement with each of Mr. Bingham and Mr. Kolvoord. Pursuant to the termination and change in control provisions set forth in their employment agreements, Mr Bingham and Mr. Kolvoord were paid lump sum severance amounts of \$349,916 and \$317,333, respectively. Accordingly, the Company has accrued \$676,924 of severance and payroll tax costs and included them in accrued liabilities on the Company's consolidated balance sheet as of July 31, 2010. In connection with his severance agreement Mr. Bingham and the Company agreed that his employment agreement was terminated effective as of July 1, 2010. In connection with his severance agreement Mr. Kolvoord and the Company agreed that his employment agreement was terminated effective as of August 1, 2010.

Effective July 1, 2010, Greg Hahn was appointed as the Company's interim President and Chief Executive Officer. Mr. Hahn agreed to serve as the interim Chief Executive Officer and President for up to six months as the Company continues to search for a person to permanently fill those positions. Initially Mr. Hahn was compensated at the rate of \$12,000 per month while serving as an executive officer, however effective September 1, 2010 his compensation was increased to \$18,000 due to the increased time demands imposed on Mr. Hahn. On August 4, 2010 (although effective as of July 1, 2010), the Company entered into a consulting agreement with an entity controlled by Mr. Hahn, that sets forth the terms by which Mr. Hahn is serving as the Company's interim President and Chief Executive Officer. The agreement provides that Mr. Hahn will devote approximately half of his business related time to the Company and be entitled to the monthly compensation for a minimum of three months even if the Company appoints another person to permanently serve as its Chief Executive Officer and/or President prior to September 30, 2010. Effective September 1, 2010 the agreement was amended to provide that Mr. Hahn will devote approximately 75% of his business related time to the Company (which resulted in the increase in his compensation). Mr. Hahn is subject to standard confidentiality and non-competition restrictions that are commonly required of executive level persons.

On April 16, 2010 the Company and Brian Edgar, the Executive Chairman of the Board of Directors, agreed to the materials terms of his compensation but have not yet executed an agreement memorializing those terms. Mr. Edgar will receive \$7,500 per month in his capacity as Executive Chairman. If Mr. Edgar is terminated from his position of Executive Chairman without cause or if he is terminated from that position within twelve months of a change of control event he will be entitled to a payment equal to twelve months of his base compensation.

NOTE 11 - COMMITMENTS AND CONTINGENCIES (continued)

Effective September 1, 2010, the Company entered into an employment agreement with Timothy Barry, as Vice President Exploration, that provides for a base salary of \$650 per day (or approximately \$156,000 annually) and potential bonus of \$150 per day if certain performance targets are met. Mr. Barry's employment agreement contains substantially the same terms and conditions as those in the employment agreements between the Company and its other executive officers. The agreement is effective September 1, 2010.

Deferred Salaries & Directors Fees

Effective February 1, 2009, the persons then serving as the Company's executive officers and corporate employees entered into salary deferral agreements with the Company to defer 25% to 50% of their base salaries in order to help the Company conserve working capital. Similarly, each of the persons then serving as the Company's three independent directors entered into a deferral agreement with the Company to defer 100% of the cash portion of their director's fees effective February 1, 2009. The Company continued to defer these costs until December 24, 2009, when the Board of Directors determined that the Company had obtained sufficient operating capital to fund its operations.

Royalty Agreement

In connection with the purchase of certain mining concessions, the Company has agreed to pay the previous owners a net royalty interest on revenue from future mineral sales.

Mining Concessions - Mexico

The Company holds title to several mining concessions in Mexico that require the Company to conduct a certain amount of work each year to maintain these concessions. Annual work in excess of these statutory requirements can carry forward to future periods. The Company has accumulated a large enough carry forward to meet future requirements for several years. The mining concessions also require the Company to pay semi-annual fees to the Mexican government.

NOTE 12 – INCOME TAXES

Provision for Taxes

The Company files a United States federal income tax return on a fiscal year-end basis and files Mexican income tax returns for its two Mexican subsidiaries on a calendar year-end basis. The Company and one of its wholly-owned subsidiaries, Minera Metalin, have not generated taxable income since inception. Contratistas, another wholly-owned Mexican subsidiary, has historically generated taxable income based upon intercompany fees billed to Minera.

On April 16, 2010, a wholly-owned subsidiary of the Company, was merged with and into Dome Ventures Corporation ("Dome") resulting in Dome becoming a wholly-owned subsidiary of the Company. Dome, a Delaware corporation with offices in Canada, files tax returns in the United States and Canada and Dome Ventures SARL Gabon files tax returns in Gabon, Africa. Dome and its subsidiaries do not currently generate taxable income.

The Company's provision for income taxes for the nine months ended July 31, 2010 consisted of a tax credit of \$8,318 related to a provision to return true-up for foreign income taxes for Contratistas for the calendar year ended December 31, 2009. The Company's provision for income taxes for the nine months ended July 31, 2009 consists tax credit of \$439 for a provision to return true-up for Contratistas for 2008 foreign income taxes. There was no federal or state income tax provision for the nine months ended July 31, 2010 and 2009.

NOTE 12 – INCOME TAXES (continued)

Mexico Tax Legislation

In December 2009, tax reform legislation proposed by Mexican Congress was published in the Official Journal of the Federation and became law. Under the provisions of the new law, the corporate tax rate will increase from 28% to 30% beginning in calendar year 2010, decrease from 30% to 29% in calendar year 2013, and return to 28% in calendar year 2014. The increase in the corporate tax rate will result in higher foreign income taxes for Contratistas. The Company has elected not to adjust the effective tax rate for deferred tax purposes as it anticipates that the corporate income tax rate will return back to 28% in the years in which the tax differences are expected to reverse.

Net Operating Loss Carryforward Limitation

The Tax Reform Act of 1986 contains provisions that limit the utilization of net operating loss and tax credit carry forwards if there has been a change in ownership as described in Section 382 of the Internal Revenue Code. As a result of the Dome merger in April 2010, substantial changes in the Company’s ownership have occurred that may limit or reduce the amount of net operating loss carryforward that the Company could utilize in the future to offset taxable income. We have not completed a detailed Section 382 study at this time to determine what impact, if any, that ownership changes may have had on our operating loss carryforwards. In each period since our inception, we have recorded a valuation allowance for the full amount of our deferred tax assets, as the realization of the deferred tax asset is uncertain. As a result, we have not recognized any federal or state income tax benefit in our consolidated statement of operations.

Accounting for Uncertainty in Income Taxes

Effective November 1, 2007, the Company adopted accounting guidance for uncertainty in income taxes. This guidance addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the financial statements. The Company may recognize the tax benefit from uncertain tax positions only if it is at least more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such a position should be measured based on the largest benefit that has a greater than 50% likelihood of being realized upon settlement with the taxing authorities. This accounting standard also provides guidance on de-recognition, classification, interest and penalties, accounting in interim periods and disclosure.

The Company did not have any unrecognized tax benefits or changes in unrecognized tax benefits during the nine month period ended July 31, 2010 and accordingly no reconciliation of the beginning and ending amount of unrecognized tax benefits is presented. The Company does not have any unrecognized tax benefits as of July 31, 2010 and accordingly the Company’s effective tax rate will not be materially affected by unrecognized tax benefits.

The following tax years remain open to examination by the Company’s principal tax jurisdictions:

United States:	1993 and all following years
Mexico:	1997 and all following years
Canada:	1999 and all following years
Gabon, Africa:	2008 and all following years

The Company has not identified any uncertain tax position for which it is reasonably possible that the total amount of unrecognized tax benefit will significantly increase or decrease within the next twelve months.

The Company's policy is to classify tax related interest and penalties as income tax expense. There is no interest or penalties estimated on the underpayment of income taxes as a result of unrecognized tax benefits.

24

NOTE 13 – SEGMENT INFORMATION

The Company operates in one business segment being the exploration of mineral property interests. The Company has mineral property interests in Sierra Mojada, Mexico and Gabon, Africa.

Geographic information is approximately as follows:

	July 31, 2010	October 31, 2009
Identifiable assets		
Mexico	\$ 6,910,000	\$ 5,566,000

NOTE 14 – SUBSEQUENT EVENTS

On August 23 2010, the Company implemented a new compensation structure for its independent directors pursuant to a recently completed independent compensation report prepared for the Company. Effective August 1, 2010, the Board of Directors approved a reduction in the quarterly director fees from \$9,000 per quarter to \$5,000 per quarter and eliminated quarterly stock grants of 10,800 shares per quarter in favor of issuing certain discretionary stock options. As further outlined in the compensation report, the Board of Directors granted stock options to purchase 200,000 shares of common stock under the 2010 Stock Option Plan to each of its independent directors of the Company with an exercise price of \$0.72 and an expiration date of five years. The options vested 50% on the date of grant and the remaining 50% vest on August 23, 2011. The Board also granted options to acquire 600,000 shares to Chairman Brian Edgar, 200,000 shares to Merlin Bingham, and 200,000 shares to Greg Hahn (none of whom is currently considered independent) with identical vesting, pricing and terms. Officers of the Company, including the recently hired Vice President Exploration, received option grants aggregating 1,400,000 shares of common stock with an exercise price of \$0.72 and an expiration date of five years. Stock options granted to the Interim President and CEO to purchase 200,000 shares vested immediately and the remaining options vest 1/3 on the date of grant, 1/3 on August 23, 2011, and 1/3 on August 23, 2012.

On August 26, 2010, the Company closed a private placement and issued a total of 200,000 units. Each unit consisted of one share of common stock and one warrant. The units were issued at \$0.60 per unit, which was the closing sales price of the Company's common stock on the date the private placement was initiated. The Company received aggregate gross proceeds of \$120,000 through the issuance of the units. Each warrant is exercisable to purchase one share of common stock at \$0.70 for a one year term.

On August 30, 2010, options to acquire 34,931 shares of the Company's common stock were exercised by way of a cashless exercise provision of the Plan whereby the recipient elected to receive 18,436 shares without payment of the exercise price, and the remaining options for 16,495 shares were cancelled.

NOTE 14 – SUBSEQUENT EVENTS

On September 7, 2010, the Board of Directors granted stock options to purchase 295,000 shares of common stock under the 2010 Stock Option Plan to the key employees of the Company with an exercise price of \$0.72 and an expiration date of five years. The options vest 1/3 on the date of grant, 1/3 on September 7, 2011, and 1/3 on September 7, 2012.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

When we use the terms "Metalline Mining Company," the "Company," "we," "us," "our," or "Metalline," we are referring to Metalline Mining Company and its subsidiaries, unless the context otherwise requires. We have included technical terms important to an understanding of our business under "Glossary of Common Terms" in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009. Throughout this document we make statements that are classified as "forward-looking."

Cautionary Statement about Forward-Looking Statements

This Quarterly Report on Form 10-Q includes certain statements that may be deemed to be "forward-looking statements." All statements, other than statements of historical facts, included in this Form 10-Q that address activities, events or developments that our management expects, believes or anticipates will or may occur in the future are forward-looking statements. Such forward-looking statements include discussion of such matters as:

- The amount and nature of future capital, development and exploration expenditures;
- The timing of exploration activities; and
- Business strategies and development of our business plan.

Forward-looking statements also typically include words such as "expects", "anticipates", "targets", "goals", "projects", "intends", "plans", "believes", "seeks", "estimates", "expect", "potential", "could" or similar words suggesting future outcomes. Forward-looking statements are based on certain assumptions and analyses made by us in light of our experience and our perception of historical trends, current conditions, expected future developments and other factors we believe are appropriate in the circumstances. Such statements are subject to a number of assumptions, risks and uncertainties, including such factors as the volatility and level of commodity prices, currency exchange rate fluctuations, uncertainties in cash flow, expected acquisition benefits, exploration mining and operating risks, competition, litigation, environmental matters, the potential impact of government regulations, and other matters discussed under the caption "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended October 31, 2009 and subsequent periodic reports, many of which are beyond our control. Readers are cautioned that forward-looking statements are not guarantees of future performance, and that actual results or developments may differ materially from those expressed or implied in the forward-looking statements.

The Company is under no duty to update any of these forward-looking statements after the date of this report. You should not place undue reliance on these forward-looking statements.

Cautionary Note

The Company is an exploration stage company and does not currently have any known reserves and cannot be expected to have reserves unless, and until, a feasibility study is completed for the concessions showing proven and probable reserves. There can be no assurance that the Company's concessions contain proven and probable reserves and investors may lose their entire investment in the Company. See "Risk Factors" set forth in the Company's Annual Report on Form 10-K for the year ended October 31, 2009.

Business Overview

Metalline, incorporated in Nevada is an exploration stage company, engaged in the business of mineral exploration. The Company currently owns several concessions, which are located in the municipality of Sierra Mojada, Coahuila, Mexico (the "Property"). The Company's primary objective is to define sufficient mineral reserves on the Property to justify the development of a mechanized mining operation (the "Project"). The Company conducts its operations in Mexico through its wholly owned Mexican subsidiaries, Minera Metalin S.A. de C.V. ("Minera") and Contratistas de Sierra Mojada S.A. de C.V. ("Contratistas").

On April 16, 2010, the Company completed a merger transaction with Dome Ventures Corporation (“Dome”), whereby Dome became a wholly owned subsidiary of the Company. Dome holds three exploration licenses in Gabon, West Africa covering approximately 6,000 square kilometers and recently entered into a joint venture agreement with AngloGold Ashanti Limited (“AngloGold”) on two of its licenses, Ndjole and Mevang. Dome also entered into a second joint venture agreement on the Ogooue license held by AngloGold. Dome’s third license, the Mitzic license, has iron ore potential and the Company is currently looking for joint venture partners for this license. Operations in Gabon are conducted by Dome’s subsidiary Dome Ventures SARL Gabon.

Current Developments

Sierra Mojada Project

Following the successful closing of the merger transaction with Dome on April 16, 2010, the Company moved forward with its 2010 budget plan for the Sierra Mojada project, which calls for an aggressive exploration drilling program on the silver mineralization located north of the Sierra Mojada fault. Approximately 44,000 meters of drilling were originally planned for calendar 2010, of which over 10,000 meters were drilled as of the end of July. Initially the drilling program included three company-owned diamond drills, three contract drills, and a recently purchased company-owned reversed circulation drill.

Core recovery from drilling in May and June was significantly lower than expected. As a result, the Company made several changes and adjustments during June and July. The Company released two contractor drill rigs in June for performance reasons and parked two company-owned diamond drill rigs in July for mechanical and performance issues. The Company also started utilizing HQ sized equipment and triple tube core barrels to improve recovery. Use of the larger diameter equipment and more sensitive core barrel greatly improved core recovery, especially in loose, friable and often higher grade material. Re-drilling with the larger diameter HQ sized equipment and utilization of triple tube core barrels has returned recovery of +85% in ten holes where previously recovery averaged only 59% from NQ-sized equipment. Accordingly, the Company has decided to re-drill several previously completed holes within the resource that reported less than 75% recovery.

The Company plans to complete another 10,000 meters of drilling through the end of calendar 2010. Phase 1 drilling covers the resource from 629600E to 631500E, where the resource is covered by a thin veneer of alluvium. Drilling is being completed on a 100 meter x 40 meter grid spacing for resource calculation purposes. This resource has been identified and intercepted by drill holes from Section 629600E all the way to Section 632500E, covering a total strike length of roughly three kilometers. It remains open beyond the east end of this trend. Upon completion of the Phase 1 drilling program, Phase 2 drilling of this resource will commence on 100 meter x 40 meter grid spacing between Sections 631500E and 632700E.

In a press release dated September 2, 2010, the Company announced drilling results from two sections that we refer to as “bookend” sections for the Phase 1 drilling program. These sections were derived from recently received commercial assay results from drill samples in 2009 and 2010. Section 631500E included five drill holes with an average length of 26.5 meters at 156 grams per tonne (“gpt”) silver and 2.40% zinc. The other bookend section 629800E included five drill holes with an average length of 45.4 meters at 56.3 gpt silver and 2.18% zinc. Individual assay intervals for these drill holes ranged from 0.1 meter to 1 meter in length and a cutoff grade of 30 gpt silver or 1% zinc external was used.

These intercepts approximate true width intercepts and are contained in partially dolomitized limestone beneath a late Cretaceous or Tertiary erosional surface and Quaternary alluvium. They are entirely oxidized and represent a near-surface open pitable resource. Results reported above are from two completed drill sections located 1,700 meters apart. Graphic presentation of the drill intercepts on these two sections can be accessed on the Company’s website at: www.metallinemining.com/downloads/Sections_631500E_629800E.pdf.

In July 2010, the Company began surface mapping Sections 630400-630600E where the shallow silver-zinc zone comes to the surface. Surface geologic mapping reveals the presence of multiple styles of mineralized breccias trending northeasterly within the overall east-west trending mineralized zone. These surface breccias correlate well with the general location of old workings at depth and provide a further guide to understanding the distribution of grade within the deposit. Elsewhere the resource is covered by alluvium.

In July 2010, the Company commenced drilling and blasting of a metallurgical trench for bulk sampling purposes and metallurgical testing across a portion of the shallow silver-zinc zone where it comes to surface on Section 630600E. A comprehensive request for proposal has been sent to five selected metallurgical labs for proposals to undertake a metallurgical testing program. Testing on bulk samples from the metallurgical trench is expected to start in September 2010.

During the quarter ended July 31, 2010, the Company also completed the shipment to ALS Chemex of approximately 7,000 samples that were accumulated in 2008 and 2009 when capital resources were limited. These samples were previously analyzed by the Company's assay lab and exceeded the screen limit of 10 grams per tonne silver and/or 1% zinc. The Company has started to receive the commercial assay results from these samples and has started to incorporate this data into its resource database.

Also in July 2010, the Company shut down its internal sample preparation laboratory in favor of submitting sawed core directly to ALS Chemex for sample preparation and assaying. The Company determined that submitting the core directly to ALS Chemex was more cost effective than operating the onsite laboratory.

The Company plans to complete a comprehensive update of the resource model in early 2011. An initial program of metallurgical test work is underway to assess recoveries by various process methods that can be expected from the silver and associated zinc, and lead mineralization. This program will be expanded as a bulk sample from a trench dug on an exposed portion of the deposit becomes available for testing. The results of drilling and metallurgy studies are scheduled to be available for use in a Preliminary Economic Assessment (Scoping Study) beginning early next year.

Management Changes

On July 1, 2010, Merlin Bingham retired as the Company's Chief Executive Officer and President and was replaced by Greg Hahn who will serve as the Company's interim Chief Executive Officer and President. Mr. Hahn will serve for up to six months while the Company continues to search for a person to permanently fill those positions.

On July 31, 2010, Roger Kolvoord retired as the Company's Executive Vice President. Mr. Kolvoord's responsibility for managing the Sierra Mojada Projected will be assumed by Mr. Hahn and Terry Brown, the Company's Vice President Operations.

Toronto Stock Exchange Listing

On August 26, 2010, the Company received final approval for the listing of its common stock on the Toronto Stock Exchange and started trading under the symbol "MMZ". The Company's common stock will also continue to trade on the NYSE Amex under the symbol "MMG". As a result of the merger transaction completed with Dome Ventures Corporation in April 2010, the Company now has a significant number of Canadian shareholders and is optimistic that the dual listing of its common stock on both the Toronto Stock Exchange and the NYSE Amex will provide additional liquidity to the Company's current and future shareholders, as well as provide increased following and presence in the Canadian investment community.

Gabon Project

In August 2010, the Company and its joint venture partner, AngloGold Ashanti, commenced a 4000m diamond drilling program on the Company's Ndjole and Mevang Exploration licenses in Gabon, Africa. The drilling program will be conducted under the direction of joint venture partner AngloGold Ashanti and is composed of four drill lines and a combined total of 20 holes up to 200 meters in depth. This initial drilling program is a follow-up on three large soil grids, each in excess of 10km x 5km in size and over 2,500 samples targeted areas with known mineralization and favorable geology. Results from these grids were then followed up with 4 infill soil grids and targeted geological

mapping aimed at better defining the anomalous zones. In testament to the joint venture's team in Gabon, a total of over 13,000 samples have been taken in steep terrain and dense jungle since the start of the year.

To date, three main coherent gold anomalies above 50 parts per billion (“ppb”) and over 5km in length and up to 1.5km wide and several smaller anomalous zones up to 2km in length and up to 1km wide have been identified. Background gold values in the region are less than 5ppb and results above 20ppb are considered anomalous. Over 25% of the results received to date are above 30ppb with peak values in excess of 5,000ppb in the soils. The anomalies appear to have strong structural controls concentrating along mapped or inferred lithological contacts, structural breaks, and fold hinges. There is also a strong spatial relationship of the gold anomalies to a thick graphitic lithological unit in the area which is thought to represent an ideal lithological trap for mineralizing fluids. Initial prospecting in these anomalous zones has identified a number of gold bearing quartz veins, many of which run between 2 gpt to 5 gpt gold.

Results of Operation

Upon the closing of the Merger on April 16, 2010, Dome became a wholly owned subsidiary of the Company. The Company’s consolidated balance sheet as of July 31, 2010 includes Dome’s assets and liabilities as of that date. Further, the financial results from Dome from April 16, 2010 through July 31, 2010 are included in the Company’s consolidated statement of operations and statements of cash flows for the three and nine month periods ended July 31, 2010.

Three Months Ended July 31, 2010 and July 31, 2009

For the three months ended July 31, 2010, the Company experienced a consolidated net loss of \$4,462,000 or approximately \$0.04 per share, compared to a consolidated net loss of \$177,000 or less than \$0.01 per share during the comparable period last year. The \$4,285,000 increase in the consolidated net loss was primarily due to a \$1,781,000 increase in exploration and property holding costs, \$1,016,000 increased in general and administrative costs, and a \$1,530,000 increase in foreign currency translation losses.

Exploration and property holding costs

Exploration and property holding costs increased \$1,781,000 or 522% to \$2,122,000 for the three months ended July 31, 2010 compared to \$341,000 for the same period last year. This increase was principally due to a significant increase in drilling and exploration activity on the Sierra Mojada properties. Specifically, the Company increased its workforce to approximately 115 employees, hired three contract drillers, and began sending quantities of its sample backlog to ALS Chemex for assaying. Exploration activities on the Gabon properties (recently acquired in the Dome merger) will continue to be funded by our joint venture partner, AngloGold.

General and Administrative Costs

General and administrative expenses increased \$1,016,000 or 172% to \$1,606,000 for the three months ended July 31, 2010 as compared to \$590,000 for the comparable period last year. This increase was largely due to an increase in salaries and payroll expenses of \$596,000 and an increase of \$285,000 in professional fees.

Salaries and payroll expense increased \$596,000 or 184% to \$920,000 for the three months ended July 31, 2010 as compared to \$324,000 for the same period last year. This increase was primarily due to accrued severance of \$677,000 paid to Mr. Bingham and Mr. Kolvoord. This increase was partially mitigated by lower stock based compensation related to stock options which decreased to \$10,000 in 2010 as compared to \$88,000 during the comparable period in 2009.

Office and administrative expenses increased \$35,000 or 46% to \$111,000 for the three months ended July 31, 2010 as compared to \$76,000 for the same period last year. Higher travel costs and additional costs associated with the Vancouver office contributed to this increase.

Professional services increased \$285,000 or 232% to \$408,000 for the three months ended July 31, 2010 as compared to \$123,000 for the same period last year. The increase is mainly due to higher engineering and professional fees on the Sierra Mojada properties. In addition, legal and accounting fees were higher due to the Dome merger transaction and application for listing on the Toronto Stock Exchange.

Directors' fees increased \$41,000 or 65% to \$104,000 for the three months ended July 31, 2010 as compared to \$63,000 for the same period last year. The increase was attributable to the cash compensation and shares issued to the two new independent directors, who were both added to the Board of Directors in conjunction with the Merger. This increase was partially mitigated by lower stock based compensation for shares granted to independent directors.

During the quarter ended July 31, 2010, the Company recorded an additional provision of \$59,000 for uncollectible value-added taxes. The Company continues to aggressively pursue collection of these taxes in Mexico, but has been unsuccessful in recovering these amounts from the Mexican authorities.

Other Income (Expense)

For the three months ended July 31, 2010, the Company recorded a foreign currency exchange loss of \$766,000 as compared to a \$764,000 foreign currency gain for the comparable period last year. During the three months ended July 31, 2010, the Mexican Peso to U.S. dollar exchange rate increased from 12.28 pesos per USD to 12.70 pesos per USD resulting in a loss of \$766,000 whereas in 2009 the Mexican Peso to U.S. dollar exchange rate decreased from 13.76 to 13.26 resulting in a gain of \$764,000. As of July 31, 2009, the Company has a \$25 million dollar intercompany receivable from Minera that is subject to exchange rate fluctuations.

Interest income was \$32,000 higher in 2010 as compared to 2009 due to the increase in cash and cash equivalents from the special warrant offering and the closing of the Dome merger transaction.

Nine months Ended July 31, 2010 and July 31, 2009

For the nine months ended July 31, 2010, the Company experienced a consolidated net loss of \$5,803,000 or \$0.08 per share, compared to a consolidated net loss of \$3,917,000 or \$0.10 per share during the comparable period last year. The \$1,886,000 increase in consolidated net loss is primarily due to increased exploration and property holding costs of \$1,830,000, and increased general and administrative expenses of \$1,205,000. Mitigating these increased expenses was a \$1,097,000 change in foreign currency translation gain (loss).

Exploration and property holding costs

Exploration and property holding costs increased \$1,830,000 or 149% to \$3,058,000 for the nine months ended July 31, 2010 compared to \$1,229,000 for the comparable period last year. This increase was principally due to a significant increase in drilling and exploration activity on the Sierra Mojada properties during fiscal 2010. Specifically, the Company increased its exploration drilling activities and began sending quantities of its sample backlog to ALS Chemex for assaying. The increase in drilling and exploration activities in large part began upon the successful closing of the private placement in December 2009 and increased further upon the closing of the Dome merger transaction on April 16, 2010.

General and Administrative Costs

General and administrative expenses increased \$1,205,000 or 55% to \$3,379,000 for the nine months ended July 31, 2010 as compared to \$2,174,000 for the same period last year. Increased salaries and payroll expenses, higher professional fees, and the increased provision for uncollectible value-added taxes for the 2010 period were partially offset by lower stock based compensation from stock options. Stock based compensation for options account for a significant part of general and administrative expenses and was a primary factor for several of the fluctuations described below.

Salaries and payroll expense increased \$289,000 or 25% to \$1,452,000 for the nine months ended July 31, 2010 as compared to \$1,163,000 for the same period in 2009. This increase was primarily due to \$677,000 of accrued

severance paid to former officers of the Company. This one-time expense was offset by lower stock based compensation, which decreased to \$57,000 in 2010 as compared to \$457,000 during the comparable period in 2009.

Office and administrative expenses increased \$121,000 or 57% to \$333,000 for the nine months ended July 31, 2010 as compared to \$212,000 for the comparable period last year. This increase was due to higher travel costs and shareholder relation costs due to the associated shareholder meeting and proxy statement for the Dome merger.

Professional services increased \$597,000 or 108% to \$1,148,000 for the nine months ended July 31, 2010 as compared to \$552,000 for the comparable period last year. The increase was due to higher legal and accounting costs related to the Dome Merger and higher engineering costs related to work on the resource model at Sierra Mojada. Legal costs in the comparable period in 2009 included \$125,000 of legal costs related to the Mineros Nortenos lawsuit (which was settled in early November 2009).

Directors' fees decreased \$10,000 or 4% to \$221,000 for the nine months ended July 31, 2010 as compared to \$231,000 for the comparable period last year. Stock based compensation associated with stock options decreased \$122,000 from the comparable period last year and were partially mitigated by a higher average market price of shares granted to independent directors for quarterly services. In addition, two new independent directors were added in April 2010.

Other Income (Expense)

For the nine months ended July 31, 2010, the Company recognized Other Income of \$625,000, compared to Other Expense of \$515,000 for the comparable period last year. The \$1,140,000 increase in Other Income (Expense) was largely due to a \$1,097,000 increase in foreign currency translation gains on intercompany loans to its Mexican subsidiaries. During the nine months ended July 31, 2010, the Mexican Peso to U.S. dollar exchange rate decreased from 13.09 pesos per USD to 12.70 pesos per USD resulting in a gain of \$581,000 whereas the exchange rate increased from 12.90 pesos per USD to 13.25 pesos per USD resulting in a loss of \$516,000. As of July 31, 2009, the Company has a \$25 million dollar intercompany receivable from Minera and Contratistas, which is subject to foreign currency translation gains and losses.

Interest income was \$38,000 higher in 2010 as compared to 2009 due to recent increase in cash and cash equivalents from the special warrant offering and the closing of the Dome merger transaction.

Material Changes in Financial Condition; Liquidity and Capital Resources

Cash Flows

During the nine months ended July 31, 2010, the Company primarily utilized cash and cash equivalents and proceeds from issuances of its common stock to fund its operations which primarily consisted of development and exploration of the Sierra Mojada property. During the nine months ended July 31, 2010, the Company received \$14,952,000 of proceeds from the sale of common stock and acquired \$2,619,000 of cash in the merger with Dome Ventures. As a result, cash and cash equivalents increased from \$1,483,000 at October 31, 2009 to \$13,335,000 at July 31, 2010.

Cash flows used in operations for the nine months ended July 31, 2010 increased to \$5,762,000 as compared to \$2,554,000 for the comparable period in 2009. Higher exploration costs at Sierra Mojada and higher general and administrative costs due to the Dome merger were the primary reasons for this increase. In addition, payment of deferred salaries and costs and increases in prepaid expenses and value tax receivable also contributed to the increase in cash used in operations. During the nine months ended, July 31, 2010, the Company purchased \$483,000 of equipment and spent \$373,000 on the acquisition of mining concessions. Prior year capital spending of 4,000 was significantly lower due to limited working capital.

Capital Resources

As of July 31, 2010, the Company had cash and cash equivalents of \$13,335,113 and working capital of \$11,873,458 as compared to cash and cash equivalents of \$1,482,943 and working capital of \$830,692 as of October 31, 2009. The significant increases in the Company's liquidity and working capital were the result of the funds raised in the private placement transaction completed in December 2009 and the successful completion of the Dome merger transaction in April 2010. The closing of the Dome transaction and special warrant offering resulted in an increase in cash and cash equivalents of \$14,580,000. The Company expects to primarily use its current resources to expand exploration activities at Sierra Mojada over the next 2 to 3 years.

Since inception, the Company has primarily relied upon proceeds from private placements of its equity securities and warrant exercises to fund its operations. Although we believe our current financial resources are sufficient to fund the Company's planned operations over the next 2 to 3 years, we anticipate continuing to rely on sales of our securities in order to continue to fund our business operations. Issuances of additional shares will result in dilution to our existing stockholders. There is no assurance that we will be able to complete any additional sales of our equity securities or that we will be able arrange for other financing to fund our planned business activities.

Resolution of Former NYSE Amex Listing Deficiencies

On April 29, 2010, the NYSE Amex notified the Company that it deemed the Company to have regained compliance with the deficiencies it referenced in a notice of deficiency letter received from NYSE Amex dated May 1, 2009.

Capital Requirements and Liquidity; Need for Subsequent Funding

The Company will adjust its expenditures in consideration of its available resources and the tasks to be performed. Company management and our board of directors monitor our overall costs and expenses and, if necessary, adjust Company programs and planned expenditures in an attempt to ensure we have sufficient operating capital. We continue to evaluate our costs and planned expenditures for our on-going project at our Sierra Mojada mining concessions.

The continued exploration and development of the Sierra Mojada project will require significant amounts of additional capital. Once the Company has gathered sufficient drilling data on the Silver Polymetallic Mineralization, the Company (subject to having sufficient financial resources) can then resume work on a feasibility study. Following the completion of a feasibility study, the Company would then proceed to the construction phase, which would entail construction of a mine and related infrastructure pursuant to a mine plan developed specifically for the Company's concessions, and construction of an extraction plant to extract metal from the ore that would be mined. In order to proceed with the construction phase, the Company would need to rely on additional equity or debt financing, or the Company may seek joint venture partners or other alternative financing sources.

Off Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to our stockholders.

Recent Accounting Pronouncements

Effective July 1, 2009, the FASB Accounting Standards Codification ("ASC") became the single official source of authoritative, nongovernmental U.S. GAAP. The historical U.S. GAAP hierarchy was eliminated and the ASC became the only level of authoritative U.S. GAAP, other than guidance issued by the SEC. The Company's accounting policies were not affected by the conversion to ASC. However, references to specific accounting standards in the notes to our consolidated financial statements have been changed to refer to the appropriate section of the ASC.

In February 2008, the FASB issued authoritative guidance which delays the effective date for non-financial assets and non-financial liabilities, except for items that are recognized or disclosed at fair value in the financial statements on a recurring basis (that is, at least annually) The new guidance was adopted by the Company on November 1, 2009. The adoption of this new guidance had no material impact on the Company's financial position, results of operations or cash flows.

In December 2007, the FASB issued a pronouncement on what is now codified as ASC 805, Business Combinations. This pronouncement revised the authoritative guidance on business combinations, including the measurement of acquirer shares issued in consideration for a business combination, the recognition of contingent consideration, the accounting for pre-acquisition gain and loss contingencies, the recognition of capitalized in-process research and development, the accounting for acquisition-related restructuring cost accruals, the treatment of acquisition-related transaction costs, and the recognition of changes in the acquirer's income tax valuation allowance. The new accounting guidance also establishes disclosure requirements to enable the evaluation of the nature and financial effects of the business combination. The new guidance was effective as of the beginning of an entity's fiscal year that begins after December 15, 2008, and was adopted by the Company on November 1, 2009. The adoption of this new guidance had a material impact on the Company's financial position, results of operations or cash flows for the nine months ended July 31, 2010 due to the Dome merger transaction.

In April 2009, the FASB issued a pronouncement on what is now codified as ASC 805, Business Combinations. This pronouncement issued authoritative guidance on accounting for assets acquired and liabilities assumed in a business combination that arise from contingencies, which amends the provisions related to the initial recognition and measurement, subsequent measurement and disclosure of assets and liabilities arising from contingencies in a business combination under previously issued guidance. The authoritative guidance requires that such contingencies be recognized at fair value on the acquisition date if fair value can be reasonably estimated during the allocation period. The new guidance was effective as of the beginning of an entity's fiscal year that begins after December 15, 2008, and was adopted by the Company on November 1, 2009. The adoption of this new guidance had no material impact on the Company's financial position, results of operations or cash flows.

In August 2009, the FASB issued Accounting Standards Update ("ASU") 2009-5, Topic 820 which clarified techniques for valuing a liability in circumstances where a quoted price for an identical liability is not available. This new accounting guidance became effective for interim periods beginning after August 31, 2009 and was adopted by the Company on November 1, 2009. The adoption of this new guidance had no material impact on the Company's financial position, results of operations or cash flows.

In January 2010, the FASB issued Accounting Standards Update ("ASU") No. 2010-06 which provides amendments to ASC Topic 820 that will provide more robust disclosures about (1) the different classes of assets and liabilities measured at fair value, (2) the valuation techniques and inputs used, (3) the activity in Level 3 fair value measurements, and (4) the transfers between Levels 1, 2, and 3. The new disclosures and clarifications of existing disclosures are effective of interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those years. The Company does not expect that the adoption of Update No. 2010-06 will have a material effect on its results of operations and financial position.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force) and the United States Securities and Exchange Commission did not or are not believed to have a material impact on the Company's present or future consolidated financial

Critical Accounting Policies

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make a variety of estimates and assumptions that affect (i) the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities as of the date of the financial statements and (ii) the reported amounts of revenues and expenses during the reporting periods covered by the financial statements.

Our management routinely makes judgments and estimates about the effect of matters that are inherently uncertain. As the number of variables and assumptions affecting the future resolution of the uncertainties increase, these judgments become even more subjective and complex. Although we believe that our estimates and assumptions are reasonable, actual results may differ significantly from these estimates. Changes in estimates and assumptions based upon actual results may have a material impact on our results of operation and/or financial condition. We have identified certain accounting policies that we believe are most important to the portrayal of our current financial condition and results of operations.

34

Property Concessions

Costs of acquiring property concessions are capitalized by project area upon purchase or staking of the associated claims. Costs to maintain the property concessions and leases are expensed as incurred. When a property concession reaches the production stage, the related capitalized costs will be amortized, using the units of production method on the basis of periodic estimates of ore reserves. To date no concessions have reached production stage.

Property concessions are periodically assessed for impairment of value and any diminution in value is charged to operations at the time of impairment. Should a property concession be abandoned, its capitalized costs are charged to operations. The Company charges to operations the allocable portion of capitalized costs attributable to property concessions sold. Capitalized costs are allocated to property concessions abandoned or sold based on the proportion of claims abandoned or sold to the claims remaining within the project area.

Deferred tax assets and liabilities

The Company recognizes the expected future tax benefit from deferred tax assets when the tax benefit is considered to be more likely than not of being realized. Assessing the recoverability of deferred tax assets requires management to make significant estimates related to expectations of future taxable income. Estimates of future taxable income are based on forecasted cash flows and the application of existing tax laws in each jurisdiction. To the extent that future cash flows and taxable income differ significantly from estimates, the ability of the Company to realize deferred tax assets could be impacted. Additionally, future changes in tax laws in the jurisdictions in which the Company operates could limit the Company's ability to obtain the future tax benefits.

Estimates

The process of preparing financial statements in conformity with accounting principles generally accepted in the United States of America requires the use of estimates and assumptions regarding certain types of assets, liabilities, revenues, and expenses. Such estimates primarily relate to unsettled transactions and events as of the date of the financial statements. Accordingly, upon settlement, actual results may differ from estimated amounts.

Foreign Currency Translation

While the Company's functional currency is the U.S. dollar, the local currency is the functional currency of the Company's wholly-owned foreign subsidiaries. The assets and liabilities relating to foreign operations are exposed to exchange rate fluctuations. Assets and liabilities of the Company's foreign operations are translated into U.S. dollars at the period-end exchange rates, and revenue and expenses are translated at the average exchange rates during the period. Exchange differences arising on translation are disclosed as a separate component of shareholders' equity. Realized gains and losses from foreign currency transactions are reflected in the results of operations. Intercompany transactions and balances with the Company's Mexican and Gabonese subsidiaries are considered to be short-term in nature and accordingly all foreign currency translation gains and losses on intercompany loans are included in the consolidated statement of operations.

Accounting for Stock Options and Warrants Granted to Employees and Non-employees

On November 1, 2006, the Company adopted accounting guidance for share-based payments that generally requires the fair value of share-based payments, including grants of employee stock options, be recognized in the statement of operations based on their grant date fair values. Prior to the Company's adoption this guidance, the fair value of the Company's stock options was determined using a Black-Scholes pricing model, which assumed no expected dividends and estimated the option expected life, volatility and risk-free interest rate at the time of grant. Prior to the adoption of this accounting guidance, the Company used historical and implied market volatility as a basis for calculating

expected volatility.

The Company uses the Black-Scholes pricing model as a method for determining the estimated fair value for employee stock awards. The expected term of the options is based upon evaluation of historical and expected future exercise behavior. The risk-free interest rate is based upon U.S. Treasury rates at the date of grant with maturity dates approximately equal to the expected life of the grant. Volatility is determined upon historical volatility of the Company's stock and adjusted if future volatility is expected to vary from historical experience. The Company has not historically issued any dividends and it does not expect to in the future. The Company uses the graded vesting attribution method to recognize compensation costs over the requisite service period.

35

The Company also used the Black-Scholes valuation model to determine the fair market value of warrants. Expected volatility is based upon weighted average of historical volatility over the contractual term of the warrant and implied volatility. The risk-free interest rate is based upon implied yield on a U.S. Treasury zero-coupon issue with a remaining term equal to the contractual term of the option. The dividend yield is assumed to be none as the Company has not paid dividends nor does not anticipate paying any dividends in the foreseeable future.

Impairment of Long-Lived Assets

We review the net carrying value of all facilities, including idle facilities, on a periodic basis. We estimate the net realizable value of each property based on the estimated undiscounted future cash flows that will be generated from operations at each property, the estimated salvage value of the surface plant and equipment and the value associated with property interests. These estimates of undiscounted future cash flows are dependent upon the estimates of metal to be recovered from proven and probable ore reserves and mineral resources expected to be converted into mineral reserves, future production cost estimates and future metals price estimates over the estimated remaining mine life. If undiscounted cash flows are less than the carrying value of a property, an impairment loss is recognized based upon the estimated expected future cash flows from the property discounted at an interest rate commensurate with the risk involved.

Environmental Matters

When it is probable that costs associated with environmental remediation obligations will be incurred and they are reasonably estimable, we accrue such costs at the most likely estimate. Accruals for estimated losses from environmental remediation obligations generally are recognized no later than completion of the remedial feasibility study for such facility and are charged to provisions for closed operations and environmental matters. We periodically review our accrued liabilities for such remediation costs as evidence becomes available indicating that our remediation liability has potentially changed. Such costs are based on our current estimate of amounts that are expected to be incurred when the remediation work is performed within current laws and regulations. Recoveries of environmental remediation costs from other parties are recorded as assets when their receipt is deemed probable.

Accounting for reclamation and remediation obligations requires management to make estimates unique to each mining operation of the future costs the Company will incur to complete the reclamation and remediation work required to comply with existing laws and regulations. Actual costs incurred in future periods could differ from amounts estimated. Additionally, future changes to environmental laws and regulations could increase the extent of reclamation and remediation work required. Any such increases in future costs could materially impact the amounts charged to earnings. As of July 31, 2010, the Company has no accrual for reclamation and remediation obligations because the Company has not engaged in any significant activities that would require remediation under its current concessions or inherited any known remediation obligations from acquired concessions. Any reclamation or remediation costs related to abandoned concessions has been previously expensed.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

Although a large amount of our expenditures are in U.S. dollars, certain purchases of labor, operating supplies and capital assets are denominated in Mexican pesos or other currencies. As a result, currency exchange fluctuations may impact the costs of our operations. Specifically, the appreciation of Mexican Peso against the U.S. dollar may result in an increase in operating expenses and capital costs at the Sierra Mojada Project in U.S. dollar terms. To reduce this risk, we maintain minimum cash balances in foreign currencies, including Mexican Pesos and complete most of our purchases, including capital expenditures relating to the Sierra Mojada Project, in U.S. dollars. We currently do not engage in any currency hedging activities.

ITEM 4T. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures.

As of July 31, 2010, we have carried out an evaluation under the supervision of, and with the participation of our Chief Executive Officer and our Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) under the Securities and Exchange Act of 1934, as amended. Based on the evaluation as of July 31, 2010, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e)) under the Securities Exchange Act of 1934) were effective.

Disclosure controls and procedures are controls and other procedures that are designed to ensure that information required to be disclosed in our reports filed or submitted under the Securities Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and our principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

(b) Changes In Internal Controls Over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting during the quarter ended July 31, 2010 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

Item 1. LEGAL PROCEEDINGS

None.

Item 1A. RISK FACTORS

There were no material changes from the risk factors included in our Form 10-K for the year ended October 31, 2009, or included in our quarterly report for the quarter ended April 30, 2010.

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND PROCEEDS

Recent Sales of Unregistered Securities

There were no recent sales of unregistered Company equity securities during the third fiscal quarter and as of September 7, 2010 that were not previously reported.

Item 3. DEFAULT UPON SENIOR SECURITIES

None.

Item 4. [RESERVED]

Item 5. OTHER INFORMATION

Effective September 1, 2010, the Company moved its corporate office from Coeur d'Alene, Idaho to Denver, Colorado. The Company's new corporate address is 6400 S. Fiddler's Green Circle, Suite 950, Greenwood Village, CO 80111. The Company's new phone number is 303-796-3020.
