UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended September 30, 2010

OR

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the transition period from _____ to _____

Commission File Number: 1-768

CATERPILLAR INC.

(Exact name of registrant as specified in its charter)

Delaware

37-0602744

(State or other jurisdiction of incorporation)

(IRS Employer I.D. No.)

100 NE Adams Street, Peoria, Illinois

61629

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code:

(309) 675-1000

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer", "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer	<input checked="" type="checkbox"/>	Accelerated filer	<input type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input type="checkbox"/>

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

At September 30, 2010, 634,702,801 shares of common stock of the registrant were outstanding.

Edgar Filing: CATERPILLAR INC - Form 10-Q

All short-term investments, which consist primarily of highly liquid investments with original maturities of three months or less, are considered to be cash equivalents.

Non-cash activities:

During 2010 and 2009, we contributed 1.5 million and 19.1 million shares of company stock with a fair value of \$93 million and \$688 million, respectively, to our U.S. benefit plans.

See accompanying notes to Consolidated Financial Statements.

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

1. A. Basis of Presentation

In the opinion of management, the accompanying financial statements include all adjustments, consisting only of normal recurring adjustments, necessary for a fair statement of (a) the consolidated results of operations for the three and nine month periods ended September 30, 2010 and 2009, (b) the consolidated financial position at September 30, 2010 and December 31, 2009, (c) the consolidated changes in stockholders' equity for the nine month periods ended September 30, 2010 and 2009, and (d) the consolidated statement of cash flow for the nine month periods ended September 30, 2010 and 2009. The financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America (U.S. GAAP) and pursuant to the rules and regulations of the Securities and Exchange Commission (SEC). Certain amounts for prior periods have been reclassified to conform to the current period financial statement presentation.

Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with the audited financial statements and notes thereto included in our Company's annual report on Form 10-K for the year ended December 31, 2009 (2009 Form 10-K).

The December 31, 2009 financial position data included herein is derived from the audited consolidated financial statements included in the 2009 Form 10-K but does not include all disclosures required by U.S. GAAP.

B. Nature of Operations

We operate in three principal lines of business:

(1) **Machinery** - A principal line of business which includes the design, manufacture, marketing and sales of construction, mining and forestry machinery: track and wheel tractors, track and wheel loaders, pipelayers, motor graders, wheel tractor-scrappers, track and wheel excavators, backhoe loaders, log skidders, log loaders, off-highway trucks, articulated trucks, paving products, skid steer loaders, underground mining equipment, tunnel boring equipment and related parts. Also includes the design, manufacture, remanufacture, maintenance and services of rail-related products and logistics services for other companies.

(2) **Engines** - A principal line of business including the design, manufacture, marketing and sales of engines for Caterpillar machinery; electric power generation systems; marine, petroleum, construction, industrial, agricultural and other applications and related parts. Also includes remanufacturing of Caterpillar engines and a variety of Caterpillar machinery and engine components and remanufacturing services for other companies. Reciprocating engines meet power needs ranging from 10 to 21,800 horsepower (8 to more than 16,000 kilowatts). Turbines range from 1,600 to 30,000 horsepower (1,200 to 22,000 kilowatts).

(3) **Financial Products** - A principal line of business consisting primarily of Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Insurance Holdings, Inc. (Cat Insurance) and their respective subsidiaries. Cat Financial provides a wide range of financing alternatives to customers and dealers for Caterpillar machinery and engines, Solar gas turbines as well as other equipment and marine vessels. Cat Financial also extends loans to customers and dealers. Cat Insurance provides various forms of insurance to customers and dealers to help support the purchase and lease of our equipment.

Our Machinery and Engines operations are highly integrated. Throughout the Notes, Machinery and Engines represents the aggregate total of these principal lines of business.

C. Accumulated Other Comprehensive Income (Loss)

Comprehensive income (loss) and its components are presented in Consolidated Statement of Changes in Stockholders' Equity. Accumulated other comprehensive income (loss), net of tax, consisted of the following:

Table of Contents

(Millions of dollars)	September 30, 2010	September 30, 2009
Foreign currency translation	\$564	\$585
Pension and other postretirement benefits	(5,089)	(5,420)
Derivative financial instruments	63	89
Retained interests		(5)
Available-for-sale securities	50	11
Total accumulated other comprehensive income (loss)	\$(4,412)	\$(4,740)

2. New Accounting Guidance

Fair value measurements - In September 2006, the Financial Accounting Standards Board (FASB) issued accounting guidance on fair value measurements, which provides a common definition of fair value and a framework for measuring assets and liabilities at fair values when a particular standard prescribes it. In addition, this guidance expands disclosures about fair value measurements. In February 2008, the FASB issued additional guidance that (1) deferred the effective date of the original guidance for one year for certain nonfinancial assets and nonfinancial liabilities and (2) removed certain leasing transactions from the scope of the original guidance. We applied this guidance to financial assets and liabilities effective January 1, 2008 and nonfinancial assets and liabilities effective January 1, 2009. The adoption of this guidance did not have a material impact on our financial statements. See Note 17 for additional information.

In January 2010, the FASB issued new accounting guidance that requires the gross presentation of activity within the Level 3 fair value measurement roll forward and details of transfers in and out of Level 1 and 2 fair value measurements. It also clarifies existing disclosure requirements regarding the level of disaggregation of fair value measurements and disclosures on inputs. We adopted this new accounting guidance for the quarterly period ended March 31, 2010. The adoption of this guidance did not have a material impact on our financial statements. See Note 17 for additional information.

Business combinations and noncontrolling interests in consolidated financial statements - In December 2007, the FASB issued accounting guidance on business combinations and noncontrolling interests in consolidated financial statements. The guidance on business combinations requires the acquiring entity in a business combination to recognize the assets acquired and liabilities assumed. Further, it changes the accounting for acquired in-process research and development assets, contingent consideration, partial acquisitions and transaction costs. Under the guidance on noncontrolling interests, all entities are required to report noncontrolling (minority) interests in subsidiaries as equity in the consolidated financial statements. In addition, transactions between an entity and noncontrolling interests are treated as equity transactions. We adopted this new guidance on January 1, 2009. As required, the guidance on noncontrolling interests was adopted through retrospective application. The adoption of this guidance did not have a material impact on our financial statements. See Note 19 for further details.

Disclosures about derivative instruments and hedging activities - In March 2008, the FASB issued accounting guidance on disclosures about derivative instruments and hedging activities. This guidance expands disclosures for derivative instruments by requiring entities to disclose the fair value of derivative instruments and their gains or losses in tabular format. It also requires disclosure of information about credit risk-related contingent features in derivative agreements, counterparty credit risk, and strategies and objectives for using derivative instruments. We adopted this new guidance on January 1, 2009. The adoption of this guidance did not have a material impact on our financial statements. See Note 4 for additional information.

Employers disclosures about postretirement benefit plan assets In December 2008, the FASB issued accounting guidance on employers disclosures about postretirement benefit plan assets. This guidance expands the disclosure set forth in previous guidance by adding required disclosures about (1) how investment allocation decisions are made by management, (2) major categories of plan assets, and (3) significant concentration of risk. Additionally, this guidance requires an employer to disclose information about the valuation of plan assets similar to that required under the accounting guidance on fair value measurements. We adopted this guidance for our financial statements for the annual period ended December 31, 2009. The adoption of this guidance did not have a material impact on our financial statements.

Table of Contents

Recognition and presentation of other-than-temporary impairments - In April 2009, the FASB issued accounting guidance on the recognition and presentation of other-than-temporary impairments. This new guidance amends the existing impairment guidance relating to certain debt securities and requires a company to assess the likelihood of selling the security prior to recovering its cost basis. When a security meets the criteria for impairment, the impairment charges related to credit losses would be recognized in earnings, while noncredit losses would be reflected in other comprehensive income. Additionally, it requires a more detailed, risk-oriented breakdown of major security types and related information. We adopted this guidance on April 1, 2009. The adoption of this guidance did not have a material impact on our financial statements. See Note 8 for additional information.

Subsequent events - In May 2009, the FASB issued accounting guidance on subsequent events that establishes standards of accounting for and disclosure of subsequent events. In addition, it requires disclosure of the date through which an entity has evaluated subsequent events and the basis for that date. This new guidance was adopted for our financial statements for the quarterly period ended June 30, 2009. The adoption of this guidance did not have a material impact on our financial statements.

In February 2010, the FASB issued new accounting guidance that amends the May 2009 subsequent events guidance described above to (1) eliminate the requirement for an SEC filer to disclose the date through which it has evaluated subsequent events, (2) clarify the period through which conduit bond obligors must evaluate subsequent events, and (3) refine the scope of the disclosure requirements for reissued financial statements. We adopted this new accounting guidance for our financial statements for the quarterly period ended March 31, 2010. The adoption of this guidance did not have a material impact on our financial statements.

Accounting for transfers of financial assets - In June 2009, the FASB issued accounting guidance on accounting for transfers of financial assets. This guidance amends previous guidance and includes: the elimination of the qualifying special-purpose entity (QSPE) concept; a new participating interest definition that must be met for transfers of portions of financial assets to be eligible for sale accounting; clarifications and changes to the derecognition criteria for a transfer to be accounted for as a sale; and a change to the amount of recognized gain or loss on a transfer of financial assets accounted for as a sale when beneficial interests are received by the transferor. Additionally, the guidance requires extensive new disclosures regarding an entity's involvement in a transfer of financial assets. Finally, existing QSPEs (prior to the effective date of this guidance) must be evaluated for consolidation by reporting entities in accordance with the applicable consolidation guidance upon the elimination of this concept. We adopted this new guidance on January 1, 2010. The adoption of this guidance did not have a material impact on our financial statements. See Note 15 for additional information.

Consolidation of variable interest entities - In June 2009, the FASB issued accounting guidance on the consolidation of variable interest entities (VIEs). This new guidance revises previous guidance by eliminating the exemption for QSPEs, by establishing a new approach for determining who should consolidate a VIE and by changing when it is necessary to reassess who should consolidate a VIE. We adopted this new guidance on January 1, 2010. The adoption of this guidance resulted in the consolidation of QSPEs related to Cat Financial's asset-backed securitization program that were previously not recorded on our consolidated financial statements. The adoption of this guidance did not have a material impact on our financial statements. See Note 15 for additional information.

Disclosures about the credit quality of financing receivables and the allowance for credit losses - In July 2010, the FASB issued accounting guidance on disclosures about the credit quality of financing receivables and the allowance for credit losses. The guidance expands disclosures for the allowance for credit losses and financing receivables by requiring entities to disclose information at disaggregated levels. It also requires disclosure of credit quality indicators, past due information and modifications of financing receivables. For end of period balances, the new disclosures will be effective December 31, 2010. For activity during a reporting period, the disclosures will be effective January 1, 2011. We do not expect the adoption to have a material impact on our financial statements.

3. Stock-Based Compensation

Accounting for stock-based compensation requires that the cost resulting from all stock-based payments be recognized in the financial statements based on the grant date fair value of the award. Stock-based compensation primarily consists of stock-settled stock appreciation rights (SARs), restricted stock units (RSUs) and stock options. We recognized pretax stock-based compensation cost in the amount of \$58 million and \$196 million for the three and nine months ended September 30, 2010, respectively; and \$34 million and \$108 million for the three and nine months ended September 30, 2009, respectively. Included in the nine months ended September 30, 2010 pretax stock-based compensation cost was \$17 million relating to the modification of awards resulting from separations due to the streamlining of our corporate structure as announced in the second quarter.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Table of Contents

The following table illustrates the type and fair value of the stock-based compensation awards granted during the nine month periods ended September 30, 2010 and 2009, respectively:

	2010		2009	
	# Granted	Fair Value Per Award	# Granted	Fair Value Per Award
SARs	7,125,210	\$22.31	6,260,647	\$7.10
RSUs	1,711,771	53.35	2,185,674	20.22
Stock options	431,271	22.31	562,580	7.10

The stock price on the date of grant was \$57.85 and \$22.17 for 2010 and 2009, respectively.

The following table provides the assumptions used in determining the fair value of the stock-based awards for the nine month periods ended September 30, 2010 and 2009, respectively:

	Grant Year	
	2010	2009
Weighted-average dividend yield	2.32%	3.07%
Weighted-average volatility	36.4%	36.0%
Range of volatilities	35.2-51.8%	35.8-61.0%
Range of risk-free interest rates	0.32-3.61%	0.17-2.99%
Weighted-average expected lives	7 years	8 years

As of September 30, 2010, the total remaining unrecognized compensation cost related to nonvested stock-based compensation awards was \$164 million, which will be amortized over the weighted-average remaining requisite service periods of approximately 2.1 years.

4. Derivative Financial Instruments and Risk Management

Our earnings and cash flow are subject to fluctuations due to changes in foreign currency exchange rates, interest rates and commodity prices. In addition, the amount of Caterpillar stock that can be repurchased under our stock repurchase program is impacted by movements in the price of the stock. Our Risk Management Policy (policy) allows for the use of derivative financial instruments to prudently manage foreign currency exchange rate, interest rate, commodity price and Caterpillar stock price exposures. Our policy specifies that derivatives are not to be used for speculative purposes. Derivatives that we use are primarily foreign currency forward and option contracts, interest rate swaps, commodity forward and option contracts, and stock repurchase contracts. Our derivative activities are subject to the management, direction and control of our senior financial officers. Risk management practices, including the use of financial derivative instruments, are presented to the Audit Committee of the Board of Directors at least annually.

All derivatives are recognized on the Consolidated Statement of Financial Position at their fair value. On the date the derivative contract is entered, we designate the derivative as (1) a hedge of the fair value of a recognized asset or liability (fair value hedge), (2) a hedge of a forecasted transaction or the variability of cash flow to be paid (cash flow hedge), or (3) an undesignated instrument. Changes in the fair value of a derivative that is qualified, designated and highly effective as a fair value hedge, along with the gain or loss on the hedged asset or liability that

Edgar Filing: CATERPILLAR INC - Form 10-Q

is attributable to the hedged risk, are recorded in current earnings. Changes in the fair value of a derivative that is qualified, designated and highly effective as a cash flow hedge are recorded in Accumulated other comprehensive income (loss) (AOCI) on the Consolidated Statement of Financial Position until they are reclassified to earnings in the same period or periods during which the hedged transaction affects earnings. Changes in the fair value of undesignated derivative instruments and the ineffective portion of designated derivative instruments are reported in current earnings. Cash flow from designated derivative financial instruments are classified within the same category as the item being hedged on the Consolidated Statement of Cash Flow. Cash flow from undesignated derivative financial instruments are included in the investing category on the Consolidated Statement of Cash Flow.

We formally document all relationships between hedging instruments and hedged items, as well as the risk-management objective and strategy for undertaking various hedge transactions. This process includes linking all derivatives that are designated as fair value hedges to specific assets and liabilities on the Consolidated Statement of Financial Position and linking cash flow hedges to specific forecasted transactions or variability of cash flow.

Table of Contents

We also formally assess, both at the hedge's inception and on an ongoing basis, whether the designated derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When a derivative is determined not to be highly effective as a hedge or the underlying hedged transaction is no longer probable, we discontinue hedge accounting prospectively, in accordance with the derecognition criteria for hedge accounting.

Foreign Currency Exchange Rate Risk

Foreign currency exchange rate movements create a degree of risk by affecting the U.S. dollar value of sales made and costs incurred in foreign currencies. Movements in foreign currency rates also affect our competitive position as these changes may affect business practices and/or pricing strategies of non-U.S.-based competitors. Additionally, we have balance sheet positions denominated in foreign currencies, thereby creating exposure to movements in exchange rates.

Our Machinery and Engines operations purchase, manufacture and sell products in many locations around the world. As we have a diversified revenue and cost base, we manage our future foreign currency cash flow exposure on a net basis. We use foreign currency forward and option contracts to manage unmatched foreign currency cash inflow and outflow. Our objective is to minimize the risk of exchange rate movements that would reduce the U.S. dollar value of our foreign currency cash flow. Our policy allows for managing anticipated foreign currency cash flow for up to five years.

We generally designate as cash flow hedges at inception of the contract any Australian dollar, Brazilian real, British pound, Canadian dollar, Chinese yuan, euro, Indian rupee, Japanese yen, Mexican peso, Singapore dollar or Swiss franc forward or option contracts that meet the requirements for hedge accounting and the maturity extends beyond the current quarter-end. Designation is performed on a specific exposure basis to support hedge accounting. The remainder of Machinery and Engines foreign currency contracts are undesignated, including any hedges designed to protect our competitive exposure. Periodically we also designate as fair value hedges specific euro forward contracts used to hedge firm commitments.

As of September 30, 2010, \$41 million of deferred net gains, net of tax, included in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position), are expected to be reclassified to current earnings (Other income (expense) in the Consolidated Statement of Results of Operations) over the next twelve months when earnings are affected by the hedged transactions. The actual amount recorded in Other income (expense) will vary based on exchange rates at the time the hedged transactions impact earnings.

In managing foreign currency risk for our Financial Products operations, our objective is to minimize earnings volatility resulting from conversion and the remeasurement of net foreign currency balance sheet positions. Our policy allows the use of foreign currency forward and option contracts to offset the risk of currency mismatch between our receivables and debt. All such foreign currency forward and option contracts are undesignated.

Interest Rate Risk

Edgar Filing: CATERPILLAR INC - Form 10-Q

Interest rate movements create a degree of risk by affecting the amount of our interest payments and the value of our fixed-rate debt. Our practice is to use interest rate derivatives to manage our exposure to interest rate changes and, in some cases, lower the cost of borrowed funds.

Machinery and Engines operations generally use fixed-rate debt as a source of funding. Our objective is to minimize the cost of borrowed funds. Our policy allows us to enter into fixed-to-floating interest rate swaps and forward rate agreements to meet that objective with the intent to designate as fair value hedges at inception of the contract all fixed-to-floating interest rate swaps. Designation as a hedge of the fair value of our fixed-rate debt is performed to support hedge accounting.

Financial Products operations have a match-funding policy that addresses interest rate risk by aligning the interest rate profile (fixed or floating rate) of Cat Financial's debt portfolio with the interest rate profile of their receivables portfolio within predetermined ranges on an ongoing basis. In connection with that policy, we use interest rate derivative instruments to modify the debt structure to match assets within the receivables portfolio. This matched funding reduces the volatility of margins between interest-bearing assets and interest-bearing liabilities, regardless of which direction interest rates move.

Our policy allows us to use fixed-to-floating, floating-to-fixed, and floating-to-floating interest rate swaps to meet the match-funding objective. We designate fixed-to-floating interest rate swaps as fair value hedges to protect debt against changes in fair value due to changes in the benchmark interest rate. We designate most floating-to-fixed interest rate swaps as cash flow hedges to protect against the variability of cash flows due to changes in the benchmark interest rate.

As of September 30, 2010, \$16 million of deferred net losses, net of tax, included in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position), related to Financial Products floating-to-

Table of Contents

fixed interest rate swaps, are expected to be reclassified to current earnings (Interest expense of Financial Products in the Consolidated Statement of Results of Operations) over the next twelve months. The actual amount recorded in Interest expense of Financial Products will vary based on interest rates at the time the hedged transactions impact earnings.

We have, at certain times, liquidated fixed-to-floating and floating-to-fixed interest rate swaps at both Machinery and Engines and Financial Products. The gains or losses associated with these swaps at the time of liquidation are amortized into earnings over the original term of the underlying hedged item.

Commodity Price Risk

Commodity price movements create a degree of risk by affecting the price we must pay for certain raw material. Our policy is to use commodity forward and option contracts to manage the commodity risk and reduce the cost of purchased materials.

Our Machinery and Engines operations purchase aluminum, copper, lead, nickel and rolled coil steel embedded in the components we purchase from suppliers. Our suppliers pass on to us price changes in the commodity portion of the component cost. In addition, we are also subject to price changes on natural gas and diesel fuel purchased for operational use.

Our objective is to minimize volatility in the price of these commodities. Our policy allows us to enter into commodity forward and option contracts to lock in the purchase price of a portion of these commodities within a five-year horizon. All such commodity forward and option contracts are undesignated.

The location and fair value of derivative instruments reported in the Consolidated Statement of Financial Position are as follows:

Stock Repurchase Risk

Payments for stock repurchase derivatives are accounted for as a reduction in stockholders' equity. In February 2007, the Board of Directors authorized a \$7.5 billion stock repurchase program, expiring on December 31, 2011. The amount of Caterpillar stock that can be repurchased under the authorization is impacted by movements in the price of the stock. In August 2007, the Board of Directors authorized the use of derivative contracts to reduce stock repurchase price volatility. There were no stock repurchase derivatives outstanding for the three and nine months ended September 30, 2010 or 2009.

Table of Contents**5. Inventories**

Inventories (principally using the last-in, first-out (LIFO) method) are comprised of the following:

(Millions of dollars)	September 30,	December 31,
	2010	2009
Raw materials	\$2,551	\$1,979
Work-in-process	1,361	656
Finished goods	4,854	3,465
Supplies	240	260
Total inventories	\$9,006	\$6,360

Inventory quantities were reduced during the nine months ended September 30, 2009. This reduction resulted in a liquidation of LIFO inventory layers carried at lower costs prevailing in prior years as compared with current costs. The effect of this reduction of inventory that was not expected to be replaced by the end of 2009 decreased Cost of goods sold in the Consolidated Results of Operations by approximately \$120 million and increased Profit by approximately \$100 million or \$0.16 per share for the three months ended September 30, 2009. For the nine months ended September 30, 2009, LIFO liquidations decreased Cost of goods sold by approximately \$230 million and increased Profit by approximately \$185 million or \$0.30 per share. There were no LIFO inventory liquidations during the three and nine months ended September 30, 2010.

6. Investments in Unconsolidated Affiliated Companies

Combined financial information of the unconsolidated affiliated companies accounted for by the equity method (generally on a lag of 3 months or less) was as follows:

Results of Operations of unconsolidated affiliated companies:

(Millions of dollars)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Sales	\$216	\$133	\$580	\$400
Cost of sales	171	99	445	299
Gross profit	\$45	\$34	\$135	\$101
Profit (loss)	\$(10)	\$(1)	\$(12)	\$(9)

Edgar Filing: CATERPILLAR INC - Form 10-Q

Financial Position of unconsolidated affiliated companies: (Millions of dollars)	September 30, 2010	December 31, 2009
Assets:		
Current assets	\$368	\$223
Property, plant and equipment - net	198	219
Other assets	25	5
	591	447
Liabilities:		
Current liabilities	228	250
Long-term debt due after one year	78	41
Other liabilities	35	17
	341	308
Equity	\$250	\$139
Caterpillar's investments in unconsolidated affiliated companies: (Millions of dollars)		
Investments in equity method companies	\$125	\$70
Plus: Investments in cost method companies	35	35
Total investments in unconsolidated affiliated companies	\$160	\$105

Table of Contents7. **Intangible Assets and Goodwill****A. Intangible assets**

Intangible assets are comprised of the following:

(Millions of dollars)	September 30, 2010			
	Weighted Amortizable Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	17	\$630	\$(98)	\$532
Intellectual property	9	306	(159)	147
Other	13	193	(66)	127
Total finite-lived intangible assets	14	1,129	(323)	806
Indefinite-lived intangible assets - In-process research & development		18		18
Total intangible assets		\$1,147	\$(323)	\$824

(Millions of dollars)	December 31, 2009			
	Weighted Amortizable Life (Years)	Gross Carrying Amount	Accumulated Amortization	Net
Customer relationships	18	\$396	\$(75)	\$321
Intellectual property	10	211	(143)	68
Other	11	130	(54)	76
Total intangible assets	15	\$737	\$(272)	\$465

During the third quarter of 2010, we acquired finite-lived intangible assets of \$338 million of which \$327 million was due to the purchase of Electro-Motive Diesel, Inc. (EMD). Also, associated with the purchase of EMD, we acquired \$18 million of indefinite-lived intangible assets. During previous quarters of 2010, we acquired finite-lived intangible assets aggregating to \$56 million primarily due to purchases of GE Transportation's Inspection Products business (\$28 million), JCS Company, Ltd. (JCS) (\$12 million) and FCM Rail Ltd. (FCM) (\$10 million). See Note 19 for details on these business combinations.

Amortization expense for the three and nine months ended September 30, 2010 was \$20 million and \$52 million, respectively. Amortization expense for the three and nine months ended September 30, 2009 was \$15 million and \$46 million, respectively. Amortization expense related to intangible assets is expected to be:

(Millions of dollars)					
2010	2011	2012	2013	2014	Thereafter
\$76	\$85	\$80	\$72	\$70	\$493

B. Goodwill

During the third quarter of 2010, we acquired net assets with related goodwill of \$321 million as part of the purchase of EMD. During previous quarters of 2010, we acquired net assets with related goodwill as part of the purchases of FCM (\$16 million), GE Transportation's Inspection Products business (\$14 million) and JCS (\$8 million). See Note 19 for details on the acquisition of these assets.

We test goodwill for impairment annually and whenever events or circumstances make it more likely than not that an impairment may have occurred. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis. Goodwill is reviewed for impairment utilizing a two-step process. The first step requires us to compare the fair value of each reporting unit, which we primarily determine using an income approach based on the present value of discounted cash flows, to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is greater than the fair value, there is an indication that an impairment may exist and the second step is required. In step two, the implied fair value of goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss.

Table of Contents

No goodwill was impaired or disposed of during the three and nine months ended September 30, 2010 or 2009.

The changes in the carrying amount of the goodwill by reportable segment for the nine months ended September 30, 2010 were as follows:

(Millions of dollars)

	Balance at December 31, 2009	Business combinations	Other adjustments ¹	Balance at September 30, 2010
Building Construction Products	\$4	\$	\$	\$4
Cat Japan	256		7	263

Marine & Petroleum Power	60			60
Mining	30		1	31
All Other ²	1,065	351	(2)	1,414
Consolidated Total	\$2,269	\$359	\$6	\$2,634

1 Other adjustments are comprised primarily of foreign currency translation.

2 Includes all other operating segments (See Note 14).

8. Available-For-Sale Securities

We have investments in certain debt and equity securities, primarily at Cat Insurance, that have been classified as available-for-sale and recorded at fair value based upon quoted market prices. These fair values are primarily included in Other assets in the Consolidated Statement of Financial Position. Unrealized gains and losses arising from the revaluation of available-for-sale securities are included, net of applicable deferred income taxes, in equity (Accumulated other comprehensive income (loss) in the Consolidated Statement of Financial Position). Realized gains and losses on sales of investments are generally determined using the FIFO (first-in, first-out) method for debt instruments and the specific identification method for equity securities. Realized gains and losses are included in Other income (expense) in the Consolidated Statement of Results of Operations.

Effective April 1, 2009, we adopted the accounting and disclosure requirements regarding recognition and presentation of other-than-temporary impairments. See Note 2 for additional information.

Edgar Filing: CATERPILLAR INC - Form 10-Q

(Millions of dollars)	September 30, 2010			December 31, 2009

Table of Contents

During the three and nine months ended September 30, 2010, charges for other-than-temporary declines in the market value of securities were \$1 million and \$2 million, respectively. During the three months ended September 30, 2009, there were no charges for other-than-temporary declines in the market value of securities. During the nine months ended September 30, 2009, we recognized pretax charges for other-than-temporary declines in the market values of equity securities in the Cat Insurance investment portfolios of \$11 million. These charges were accounted for as realized losses and were included in Other income (expense) in the Consolidated Statement of Results of Operations. The cost basis of the impacted securities was adjusted to reflect these charges.

Investments in an unrealized loss position that are not other-than-temporarily impaired:

Table of Contents

Government Debt. The unrealized losses on our investments in other U.S. and non-U.S. government bonds are the result of changes in interest rates since time of purchase. We do not intend to sell the investments and it is not likely that we will be required to sell these investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2010.

Corporate Bonds. The unrealized losses on our investments in corporate bonds and asset-backed securities relate primarily to risk aversion and continued volatility in the financial markets since initial purchase. We do not intend to sell the investments and it is not likely that we will be required to sell the investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2010.

Mortgage-Backed Debt Securities. The unrealized losses on our investments in mortgage-backed securities relate primarily to elevated housing delinquencies and default rates, credit-related yield spreads and continued risk aversion. We do not intend to sell the investments and it is not likely that we will be required to sell these investments before recovery of their amortized cost basis. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2010.

Equity Securities. Cat Insurance maintains a well-diversified equity portfolio consisting of two specific mandates: large capitalization value stocks and smaller company growth stocks. Equity valuations continue to fluctuate due to low economic growth and high unemployment. In each case where unrealized losses exist, the respective company's management is taking corrective action in order to increase shareholder value. We do not consider these investments to be other-than-temporarily impaired as of September 30, 2010.

The fair value of the available-for-sale debt securities at September 30, 2010, by contractual maturity, is shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to prepay and creditors may have the right to call obligations.

(Millions of dollars)	Fair Value
Due in one year or less	\$70
Due after one year through five years	\$438
Due after five years through ten years	\$226
Due after ten years	\$499

Proceeds from sale of available-for-sale securities during the three and nine months ended September 30, 2010 were \$51 million and \$141 million, respectively. Proceeds from sale of available-for-sale securities during the three and nine months ended September 30, 2009 were \$62 million and \$232 million, respectively. Gross gains of \$1 million were included in current earnings for the nine months ended September 30, 2010. There were no gross gains for the three months ended September 30, 2010. There were no gross losses for the three or nine months ended September 30, 2010. Gross gains of \$1 million and \$2 million, and gross losses of \$3 million and \$10 million were included in current earnings for the three and nine months ended September 30, 2009, respectively.

9. Postretirement Benefits

A. Pension and postretirement benefit costs

As discussed in Note 18, during 2009 voluntary and involuntary separation programs impacted employees participating in certain U.S. and non-U.S. pension and other postretirement benefit plans. Due to the significance of these events, certain plans were re-measured as follows:

U.S. Separation Programs Plan re-measurements as of January 31, 2009, March 31, 2009 and December 31, 2009 resulted in net curtailment losses of \$127 million to pension and \$55 million to other postretirement benefit plans. Early retirement pension benefit costs of \$6 million were also recognized.

Non-U.S. Separation Programs Certain plans were re-measured as of March 31, 2009 and December 31, 2009, resulting in pension settlement losses of \$34 million, special termination benefits of \$2 million to pension and curtailment losses of \$1 million to other postretirement benefit plans.

The \$225 million of curtailment, settlement and special termination benefit expense for 2009 associated with certain pension and other postretirement benefit plans was reported in Other operating (income) expense in the Consolidated Statement of

Table of Contents

Results of Operations. This includes \$201 million reported for the nine months ended September 30, 2009. There was no curtailment, settlement and special termination benefit expense for the three months ended September 30, 2009.

In March 2009, we amended our U.S. support and management other postretirement benefit plan. Beginning in 2010, certain retirees age 65 and older enrolled in individual health plans that work with Medicare and will no longer participate in a Caterpillar-sponsored group health plan. In addition, Caterpillar began funding a tax-advantaged Health Reimbursement Arrangement (HRA) to assist the retirees with medical expenses. The plan amendment required a plan re-measurement as of March 31, 2009, which resulted in a decrease in our Liability for postretirement benefits of \$432 million and an increase in Accumulated other comprehensive income (loss) of \$272 million net of tax. The plan was further amended in December 2009 to define the HRA benefit that active employees will receive once they are retired and reach age 65. The plan was re-measured at year-end 2009 and the December amendment resulted in a decrease in our Liability for postretirement benefits of \$101 million and an increase in Accumulated other comprehensive income (loss) of \$64 million net of tax. These decreases will be amortized into earnings on a straight-line basis over approximately 7 years, the average remaining service period of active employees in the plan. The amendments reduced other postretirement benefits expense by approximately \$27 million and \$82 million for the three and nine months ended September 30, 2010 and reduced expense by approximately \$20 million and \$40 million for the three and nine months ended September 30, 2009.

In August 2010, we announced changes in our U.S. support and management pension plans. Beginning January 1, 2011, retirement benefits for U.S. support and management employees will transition from defined benefit pension plans to defined contribution plans. The transition date is determined for each employee based upon age and years of service or proximity to retirement. Pension benefit accruals will freeze on either December 31, 2010 or December 31, 2019 at which time the employees will move to the new retirement benefit. This benefit will provide employees with a frozen pension benefit and a 401(k) plan that will include a matching contribution and a new annual employer contribution. The plan change required a re-measurement as of August 31, 2010, which resulted in an increase in our Liability for postretirement benefits of \$1.32 billion and a decrease in Accumulated other comprehensive income (loss) of \$831 million net of tax. The increase in the liability was due to a decline in the discount rate and lower than expected asset returns. Curtailment expense of \$28 million was also recognized for the three and nine months ended September 30, 2010.

In March 2010, the Patient Protection and Affordable Care Act (the PPACA) and the Health Care and Education Reconciliation Act of 2010 (H.R. 4872) which amends certain provisions of the PPACA were signed into law. As discussed in Note 13, the Medicare Part D retiree drug subsidies effectively become taxable beginning in 2013.

Table of Contents

(Millions of dollars)	U.S. Pension		Non-U.S. Pension		Other Postretirement	
	Benefits		Benefits		Benefits	
	September 30,		September 30,		September 30,	
	2010	2009	2010	2009	2010	2009
For the three months ended:						
Components of net periodic benefit cost:						
Service cost	\$53	\$42	\$23	\$21	\$17	\$17
Interest cost	162	173	42	34	62	68
Expected return on plan assets	(193)	(193)	(50)	(43)	(24)	(26)
Amortization of:						
Prior service cost (credit) 1	6	7	1	1	(14)	(13)
Net actuarial loss (gain)	96	62	17	7	9	4
Net periodic benefit cost	124	91	33	20	50	50
Curtailments, settlements and special termination benefits 2	28		9			
Total cost included in operating profit	\$152	\$91	\$42	\$20	\$50	\$50
For the nine months ended:						
Components of net periodic benefit cost:						
Service cost	\$150	\$134	\$69	\$65	\$50	\$53
Interest cost	495	515	124	104	184	211
Expected return on plan assets	(574)	(584)	(148)	(129)	(70)	(85)
Amortization of:						
Transition obligation (asset)					1	1
Prior service cost (credit) 1	20	21	1	1	(41)	(26)
Net actuarial loss (gain)	271	185	51	29	25	14
Net periodic benefit cost	362	271	97	70	149	168
Curtailments, settlements and special termination benefits 2	28	130	17	9		62
Total cost included in operating profit	\$390	\$401	\$114	\$79	\$149	\$230
Weighted-average assumptions used to determine net cost:						
Discount rate	5.6%	6.3%	4.8%	4.7%	5.6%	6.2%
Expected return on plan assets	8.5%	8.5%	7.0%	6.6%	8.5%	8.5%
Rate of compensation increase	4.5%	4.5%	4.2%	3.7%	4.4%	4.4%

1 Prior service costs for both pension and other postretirement benefits are generally amortized using the straight-line method over the average remaining service period to the full retirement eligibility date of employees expected to receive benefits from the plan amendment. For other postretirement benefit plans in which all or almost all of the plan's participants are fully eligible for benefits under the plan, prior service costs are amortized using the straight-line method over the remaining life expectancy of those participants.

2 Curtailments, settlements and special termination benefits were recognized in Other operating (income) expenses in the Consolidated Statement of Results of Operations.

We made \$409 million and \$957 million of contributions to our U.S. and non-U.S. pension plans during the three and nine months ended September 30, 2010, respectively. We currently anticipate additional contributions of approximately \$20 million during the remainder of the year, most of which are voluntary contributions. We made \$35 million and \$988 million of contributions to our U.S. and non-U.S. pension plans during the three and nine months ended September 30, 2009, respectively. Our second-quarter 2009 contribution included a voluntary contribution to our U.S. plans of 18.2 million shares (\$650 million) in Caterpillar stock, held as treasury stock.

B. Defined contribution benefit costs

Beginning in June 2009, we began funding our employer matching contribution for certain U.S. defined contribution plans in Caterpillar stock, held as treasury stock. For the three and nine months ended September 30, 2010, we have made \$31 million (0.5 million shares) and \$93 million (1.5 million shares) of matching contributions in Caterpillar stock, respectively. For the three and nine months ended September 30, 2009, we made \$29 million (0.7 million shares) and \$38 million (0.9 million shares) of matching contributions in Caterpillar stock, respectively.

Table of Contents

Total company costs related to U.S. and non-U.S. defined contribution plans were as follows:

(Millions of dollars)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
U.S. Plans	\$77	\$65	\$160	\$159
Non-U.S. Plans	8	7	24	22
	\$85	\$72	\$184	\$181

10. Guarantees and Product Warranty

We have provided an indemnity to a third-party insurance company for potential losses related to performance bonds issued on behalf of Caterpillar dealers. The bonds are issued to insure governmental agencies against nonperformance by certain dealers. We also provided guarantees to a third party related to the performance of contractual obligations by certain Caterpillar dealers. The guarantees cover potential financial losses incurred by the third party resulting from the dealers' nonperformance.

We provide loan guarantees to third-party lenders for financing associated with machinery purchased by customers. These guarantees have varying terms and are secured by the machinery. In addition, Cat Financial participates in standby letters of credit issued to third parties on behalf of their customers. These standby letters of credit have varying terms and beneficiaries and are secured by customer assets.

Cat Financial has provided a limited indemnity to a third-party bank resulting from the assignment of certain leases to that bank. The indemnity is for the possibility that the insurers of these leases would become insolvent. The indemnity expires December 15, 2012 and is unsecured.

No loss has been experienced or is anticipated under any of these guarantees. At September 30, 2010 and December 31, 2009, the related liability was \$17 million. The maximum potential amount of future payments (undiscounted and without reduction for any amounts that may possibly be recovered under recourse or collateralized provisions) we could be required to make under the guarantees are as follows:

(Millions of dollars)	September 30, 2010	December 31, 2009
Guarantees with Caterpillar dealers	\$344	\$313
Guarantees with customers	184	193
Limited indemnity	17	20
Guarantees other	47	64
Total guarantees	\$592	\$590

We provide guarantees to repurchase certain loans of Caterpillar dealers from a special-purpose corporation (SPC) that qualifies as a variable interest entity. The purpose of the SPC is to provide short-term working capital loans to Caterpillar dealers. This SPC issues commercial paper

Edgar Filing: CATERPILLAR INC - Form 10-Q

and uses the proceeds to fund its loan program. We have a loan purchase agreement with the SPC that obligates us to purchase certain loans that are not paid at maturity. We receive a fee for providing this guarantee, which provides a source of liquidity for the SPC. We are the primary beneficiary of the SPC as our guarantees result in Cat Financial having both the power to direct the activities that most significantly impact the SPC's economic performance and the obligation to absorb losses, and therefore we have consolidated the financial statements of the SPC. As of September 30, 2010 and December 31, 2009, the SPC's assets of \$297 million and \$231 million, respectively, are primarily comprised of loans to dealers and the SPC's liabilities of \$297 million and \$231 million, respectively are primarily comprised of commercial paper. No loss has been experienced or is anticipated under this loan purchase agreement. Our assets are not available to pay creditors of the SPC, except to the extent we may be obligated to perform under the guarantee, and assets of the SPC are not available to pay our creditors.

Our product warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size. Specific rates are developed for each product build month and are updated monthly based on actual warranty claim experience. During the third quarter of 2010, the increase in liability (new warranties) included \$89 million of assumed warranty due to the purchase of EMD. The 2009 provision included approximately \$181 million for changes in estimates for pre-existing warranties due to higher than expected actual warranty claim experience.

Table of Contents

(Millions of dollars)	2010
Warranty liability, January 1	\$1,049
Reduction in liability (payments)	(621)
Increase in liability (new warranties)	573
Warranty liability, September 30	\$1,001

(Millions of dollars)	2009
Warranty liability, January 1	\$1,201
Reduction in liability (payments)	(1,032)
Increase in liability (new warranties)	880
Warranty liability, December 31	\$1,049

11. Computations of Profit Per Share

(Dollars in millions except per share data)		Three Months Ended September 30,		Nine Months Ended September 30,	
		2010	2009	2010	2009
I.	Profit (loss) for the period (A)1:	\$792	\$404	\$1,732	\$663
II.	Determination of shares (in millions):				
	Weighted-average number of common shares outstanding (B)	632.6	622.4	629.6	612.1
	Shares issuable on exercise of stock awards, net of shares assumed to be purchased out of proceeds at average market price	19.0	13.1	17.4	8.5
	Average common shares outstanding for fully diluted computation (C) 2	651.6	635.5	647.0	620.6
III.	Profit (loss) per share of common stock:				
	Assuming no dilution (A/B)	\$1.25	\$0.65	\$2.75	\$1.08
	Assuming full dilution (A/C) 2	\$1.22	\$0.64	\$2.68	\$1.07

1 Profit (loss) attributable to common stockholders.

2 Diluted by assumed exercise of stock-based compensation awards using the treasury stock method.

SARs and stock options to purchase 4,853,298 and 21,652,360 common shares were outstanding for the three and nine months ended September 30, 2010, respectively, but were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive. For the three and nine months ended September 30, 2009, there were outstanding SARs and stock options to purchase 18,596,141 and 29,017,743 common shares, respectively, but were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

12. Environmental and Legal Matters

The company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. Compliance with these existing laws has not had a material impact on our capital expenditures, earnings or global competitive position.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site and those costs can be reasonably estimated, the costs are charged against our earnings. In formulating that estimate, we do not consider amounts expected to be recovered from insurance companies or others. The amount recorded for environmental remediation is not material and is included in Accrued expenses in the Consolidated Statement of Financial Position.

We cannot reasonably estimate costs at sites in the very early stages of remediation. Currently, we have a few sites in the very early stages of remediation, and there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all sites in the aggregate, will be required.

We have disclosed certain individual legal proceedings in this filing. Additionally, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to

Table of Contents

product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters or intellectual property rights. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

On May 14, 2007, the U.S. Environmental Protection Agency (EPA) issued a Notice of Violation to Caterpillar Inc., alleging various violations of Clean Air Act Sections 203, 206 and 207. EPA claims that Caterpillar violated such sections by shipping engines and catalytic converter after-treatment devices separately, introducing into commerce a number of uncertified and/or misbuilt engines, and failing to timely report emissions-related defects. Caterpillar is currently engaged in negotiations with EPA and the U.S. Department of Justice to resolve these issues. On July 9, 2010, the Department of Justice issued a penalty demand to Caterpillar seeking a civil penalty of \$3.2 million and implementation of injunctive relief involving expanded use of certain technologies. Caterpillar continues to cooperate with EPA and the Department of Justice and, while penalties will likely exceed \$100,000, management does not believe that this issue will have a material adverse impact on our consolidated results of operations, financial position or liquidity.

On February 8, 2009, an incident at Caterpillar's Joliet, Illinois facility resulted in the release of approximately 3,000 gallons of wastewater into the Des Plaines River. In coordination with state and federal authorities, appropriate remediation measures have been taken. On February 23, 2009, the Illinois Attorney General filed a Complaint in Will County Circuit Court containing seven counts of violations of state environmental laws and regulations. Caterpillar recently settled this matter with the State of Illinois, resolving all allegations in the Complaint. This settlement does not have a material adverse impact on our consolidated results of operations, financial position, or liquidity. In addition, on March 5, 2009, the EPA served Caterpillar with a Notice of Intent to file a Civil Administrative Action (notice), indicating the EPA's intent to seek civil penalties for alleged violations of the Clean Water Act and Oil Pollution Act. On January 25, 2010, the EPA issued a revised notice seeking civil penalties in the amount of \$167,800, and Caterpillar responded to the revised notice and is engaged in follow up discussions with the EPA. At this time, we do not believe this remaining proceeding will have a material adverse impact on our consolidated results of operations, financial position or liquidity.

13. Income Taxes

The provision for income taxes of \$735 million for the first nine months of 2010 reflects an estimated annual effective tax rate of 28 percent, excluding the discrete items discussed below. The 2010 estimated annual tax rate is expected to be less than the U.S. tax rate of 35 percent primarily due to profits in tax jurisdictions with rates lower than the U.S. rate.

The provision for income taxes for 2010 also includes a first quarter deferred tax charge of \$90 million due to the enactment of U.S. healthcare legislation effectively making government subsidies received for Medicare equivalent prescription drug coverage taxable. Guidance on accounting for income taxes requires that the deferred tax effects of changes in laws be reflected in the financial statements in the period in which the legislation is enacted regardless of the effective date. Deferred tax assets had previously been recorded based on the liability for other postretirement benefits without regard to the tax-free subsidy. As a result of the law change, deferred tax assets were reduced to reflect the expected future income tax on the subsidy. Beginning in 2013, a cash tax cost will be incurred when the subsidies received increase taxable income.

This deferred tax charge was partially offset by a \$34 million benefit related to the recognition of refund claims for prior tax years and a \$26 million benefit for the release of a valuation allowance against the deferred tax assets of certain non-U.S. entities due to tax planning actions

implemented in the second quarter of 2010.

The benefit for income taxes for the first nine months of 2009 was \$179 million, which included \$129 million of benefits related to prior-year tax returns. A discrete calculation was used to report the tax benefit for the first nine months of 2009 rather than an estimated annual tax rate as the estimated range of annual profit/(loss) before tax produced significant variability and made it difficult to reasonably estimate the 2009 annual effective tax rate.

The 2010 estimated annual tax rate is based on current tax law and therefore does not include the U.S. research and development tax credit and other benefits that have not been extended past 2009. The U.S. active finance exception for interest earned offshore also expired at the end of 2009, but will have a more significant impact on our 2011 tax rate. Without extension of this legislation, we are forecasting an increase in our 2011 tax rate due to higher U.S. taxes on interest earned outside the U.S.

The IRS has completed its field examination of our tax returns for 1992 to 2006. For tax years 1992 to 1994, we expect to litigate the unagreed adjustments related to transfer pricing. In 2009, we reached a settlement with the IRS for tax years 1995 to 1999. For tax years 2000 to 2004, we are in the appeals process for unagreed adjustments primarily related to export tax

Table of Contents

benefits. In the second quarter of 2010, we received notice of proposed adjustments related to tax years 2005 and 2006 and have appealed the unagreed adjustments primarily related to export tax benefits. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our consolidated financial position, liquidity or results of operations.

We have recorded income tax expense at U.S. tax rates on all profits, except for undistributed profits of non-U.S. subsidiaries which are considered indefinitely reinvested. While uncertain, it is possible that we will change our assertion related to undistributed profits of certain non-U.S. subsidiaries in the near term resulting in the recognition of a tax benefit.

14. Segment Information

A. Basis for segment information

Caterpillar is organized based on a decentralized structure that has established responsibilities to continually improve business focus and increase our ability to react quickly to changes in the global business cycle, customer needs and competitors' actions. Our current reporting structure uses a matrix organization comprised of multiple profit and cost center divisions.

Our divisional reporting structure and responsibilities are as follows:

- Machine business divisions are profit centers primarily responsible for product management, development, marketing, sales and product support. Machine business divisions also have select manufacturing responsibilities. Inter-segment sales of components are a source of revenue for some of these divisions.
- Engine business divisions are profit centers primarily responsible for product management, development, manufacturing, marketing, sales and product support. Inter-segment sales of engines and/or components are a source of revenue for some of these divisions.
- Component business divisions are profit centers primarily responsible for product management, development, manufacturing, marketing, sales and product support for internal and external customers. Inter-segment sales of components are a source of revenue for these divisions.
- Service business divisions are profit centers primarily responsible for various services and service-related products to customers including financial, logistics, remanufacturing and rail services. Inter-segment sales of services and service-related products are a source of revenue for some of these divisions.
- Manufacturing services divisions are cost centers primarily responsible for the manufacture of products and/or components within the geographic regions of the Americas and EAME.
- Corporate services divisions are cost centers primarily responsible for the performance of certain support functions globally (e.g., Finance, Human Resources, Information Technology, Legal and Purchasing) and to provide centralized services.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- Regional distribution services divisions are cost centers primarily responsible for the total portfolio of business with each dealer, the dealer relationship, dealer development and ensuring the most efficient and effective distribution of machines, engines and parts.
- Centers of excellence divisions are cost centers primarily responsible for Caterpillar's most critical/differentiating processes in the areas of Marketing and Product Support, Production and Product Development.

The segment information for 2009 has been retrospectively adjusted to conform to the 2010 presentation. Core Components, formerly included in the all other category, is now a reportable segment. The portion of postretirement benefit expense (\$89 million and \$267 million for the three and nine months ended September 30, 2009, respectively) that was allocated to Machinery and Engines business divisions based on budgeted external and inter-segment sales, is now a methodology difference between segment and external reporting.

Our measurement system is complex and is designed to evaluate performance and to drive continuous improvement. We have chosen to disclose financial results by our three principal lines of business (Machinery, Engines and Financial Products) in our Management's Discussion and Analysis rather than by reportable segment based on the following:

- Our Machinery and Engines businesses are vertically integrated and there are a significant amount of inter-segment transactions that make information for individual segments less meaningful.
- A significant amount of corporate and other costs (\$217 million and \$632 million for the three and nine months ended September 30, 2010, respectively, and \$247 million and \$756 million for the three and nine months ended September 30, 2009, respectively) are allocated to Machinery and Engines business divisions based on budgeted external and inter-segment sales. It would be difficult to provide meaningful information by reportable segment for these costs as the allocation method does not directly reflect the benefited segment and the allocation is done in

Table of Contents

total, not by financial statement line item. In addition, the budgeted amount is allocated to segments; any differences from budget are treated as a reconciling item between reportable segment and consolidated results.

- As discussed below, there are various methodology differences between our segment reporting and U.S. GAAP. This results in numerous reconciling items between reportable segment and consolidated results.
- We have twenty-five operating segments, of which twelve are reportable segments. Reporting financial information for this number of businesses, especially considering our level of vertical integration, would not be meaningful to our financial statement users.

In summary, due to Caterpillar's high level of integration and our concern that segment disclosures have limited value for our external readers, we are continuing to disclose financial results for our three principal lines of business (Machinery, Engines and Financial Products) in our Management's Discussion and Analysis beginning on page 45.

B. Description of segments

Profit center divisions meet the definition of operating segments specified in the accounting guidance on segment reporting; however, the cost center divisions do not. Following is a brief description of our twelve reportable segments and the business activities included in all other operating segments:

Building Construction Products: A machine business division primarily responsible for the product management, development, manufacture, marketing, sales and product support of light construction machines and select work tools.

Cat Japan: A business division primarily responsible for the development of small, medium and large hydraulic excavators, manufacturing of select machinery and components, marketing, sales and product support of machinery, engines and components in Japan. Inter-segment sales of machinery and components are a source of revenue for this division.

Core Components: A component business division primarily responsible for the product management, development, manufacture, marketing and product support of undercarriage, specialty products, hardened barstock components and ground engaging tools. Inter-segment sales of components are a source of revenue for this division.

Earthmoving: A machine business division primarily responsible for the product management, development, marketing, sales and product support of medium wheel loaders, medium track-type tractors, track-type loaders, motor graders and pipelayers. Also responsible for manufacturing of select machines in Asia.

Electric Power: An engine business division primarily responsible for the product management, development, manufacture, marketing, sales and product support of reciprocating engine powered generator sets as well as integrated systems used in the electric power generation industry.

Excavation: A machine business division primarily responsible for the product management, development, marketing, sales and product support of small, medium and large excavators, wheel excavators and articulated trucks. Also responsible for manufacturing of select machines in Asia and articulated trucks.

Large Power Systems: An engine business division primarily responsible for the product management, development, manufacture and product support of reciprocating engines supplied to Caterpillar machinery and the electric power, petroleum, marine and industrial industries. Also responsible for engine component manufacturing. Inter-segment sales of engines and components are a source of revenue for this division.

Logistics: A service business division primarily responsible for logistics services for Caterpillar and other companies.

Marine & Petroleum Power: An engine business division primarily responsible for the product management, development, marketing, sales and product support of reciprocating engines supplied to the marine and petroleum industries. Also responsible for manufacturing of certain reciprocating engines for marine, petroleum and electric power applications.

Mining: A machine business division primarily responsible for the product management, development, marketing, sales and product support of large track-type tractors, large mining trucks, underground mining equipment and tunnel boring equipment. Also responsible for manufacturing of underground mining equipment and tunnel boring equipment. Inter-segment sales of components are a source of revenue for this division.

Turbines: An engine business division primarily responsible for the product management, development, manufacture, marketing, sales and product support of turbines and turbine-related services.

Table of Contents

Financing & Insurance Services: Provides financing to customers and dealers for the purchase and lease of Caterpillar and other equipment, as well as some financing for Caterpillar sales to dealers. Financing plans include operating and finance leases, installment sale contracts, working capital loans and wholesale financing plans. The division also provides various forms of insurance to customers and dealers to help support the purchase and lease of our equipment.

All Other: Primarily includes activities such as: the product management, development, marketing, sales and product support of large wheel loaders, quarry and construction trucks, wheel tractor scrapers, wheel dozers, compactors and select work tools. Also responsible for manufacturing of select machines in Asia; the product management, development, manufacture, marketing, sales and product support of forestry products; the product management, development, manufacture, marketing, sales and product support of reciprocating engines used in industrial applications; the product management, development, manufacture, marketing, sales and product support of machinery and engine components, electronics and control systems; the product management, development, manufacture, remanufacture, maintenance, leasing and service of rail-related products and services; remanufacturing of Caterpillar engines and components and remanufacturing services for other companies; the product management, development, manufacture, marketing, sales and product support of paving products. Inter-segment sales are a source of revenue for some of these divisions. Results for All Other operating segments are included as reconciling items between reportable segments and consolidated external reporting.

C. Segment measurement and reconciliations

There are several methodology differences between our segment reporting and our external reporting. The following is a list of the more significant methodology differences:

- Generally, liabilities are managed at the corporate level and are not included in segment operations. Segment accountable assets generally include inventories, receivables and property, plant and equipment.

- Segment inventories and cost of sales are valued using a current cost methodology.

- Currency exposures are generally managed at the corporate level and the effects of changes in exchange rates on results of operations within the year are not included in segment results. The net difference created in the translation of revenues and costs between exchange rates used for U.S. GAAP reporting and exchange rates used for segment reporting are recorded as a methodology difference.

- Postretirement benefit expenses are split; segments are generally responsible for service and prior service costs, with the remaining elements of net periodic benefit cost included as a methodology difference.

- Interest expense is not included in Machinery and Engines segment results.

- Accountable profit is determined on a pretax basis.

Reconciling items are created based on accounting differences between segment reporting and our consolidated external reporting. Please refer to pages 31 to 36 for financial information regarding significant reconciling items. Most of our reconciling items are self-explanatory given the above explanations. For the reconciliation of profit (loss), we have grouped the reconciling items as follows:

- **Corporate costs:** Certain corporate costs are allocated and included in the business division's accountable profit at budgeted levels. Any differences are treated as reconciling items. These costs are related to corporate requirements and strategies that are considered to be for the benefit of the entire organization.
- **Redundancy costs:** Redundancy costs include pension and other postretirement benefit plan curtailments, settlements and special termination benefits as well as employee separation charges. Most of these costs are reconciling items between accountable profit and consolidated profit before tax. Table Reconciliation of Redundancy Costs on pages 33-34 has been included to illustrate how segment accountable profit would have been impacted by the redundancy costs. See Notes 9 and 18 for more information.
- **Methodology differences:** See previous discussion of significant accounting differences between segment reporting and consolidated external reporting.
- **Timing:** Timing differences in the recognition of costs between segment reporting and consolidated external reporting.

15. Securitizations

Cat Financial transfers certain finance receivables relating to retail installment sale contracts and finance leases as part of their asset-backed securitization program. In addition, Cat Financial has sold interests in wholesale receivables to third-party commercial paper conduits. These transactions provide a source of liquidity and allow for better management of their balance sheet capacity.

Securitized Retail Installment Sale Contracts and Finance Leases

Cat Financial periodically transfers certain finance receivables relating to retail installment sale contracts and finance leases to special purpose entities (SPEs) as part of their asset-backed securitization program. The SPEs have limited purposes and generally are only permitted to purchase the finance receivables, issue asset-backed securities and make payments on the securities. The SPEs only issue a single series of securities and generally are dissolved when those securities have been paid in full. The SPEs issue debt to pay for the finance receivables they acquire from Cat Financial. The primary source for repayment of the debt is the cash flows generated from the finance receivables owned by the SPEs. The assets of the SPEs are legally isolated and are not available to pay Cat Financial creditors. Cat Financial retains interests in the securitization transactions, including subordinated certificates issued by the SPEs, rights to cash reserves, and residual interests. For bankruptcy analysis purposes, Cat Financial has sold the finance receivables to the SPEs in a true sale and the SPEs are separate legal entities. The investors and the SPEs have no recourse to any of Cat Financial's other assets for failure of debtors to pay when due.

In accordance with the new consolidation accounting guidance adopted on January 1, 2010, these SPEs were concluded to be VIEs. Cat Financial determined that it was the primary beneficiary based on its power to direct activities through its role as servicer and its obligation to absorb losses and right to receive benefits and therefore consolidated the entities using the carrying amounts of the SPEs' assets and liabilities.

The restricted assets (Receivables-finance, Long-term receivables-finance, Prepaid expenses and other current assets, and Other assets) of these consolidated SPEs totaled \$160 million at September 30, 2010. The liabilities (Accrued expenses and Long-term debt due within one year-Financial Products) of these consolidated SPEs totaled \$99 million at September 30, 2010.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Prior to January 1, 2010, the SPEs were considered to be QSPEs and thus not consolidated. Cat Financial's retained interests in the securitized assets were classified as available-for-sale securities and were included in Other assets in the Consolidated Statement of Financial Position at fair value. Cat Financial estimated fair value and cash flows using a valuation model and key assumptions for credit losses, prepayment rates and discount rates. These assumptions were based on Cat Financial's historical experience, market trends and anticipated performance relative to the particular assets securitized. Cat Financial periodically evaluated for impairment and recognized the credit component of an other-than-temporary impairment in Profit and the noncredit component in Accumulated other comprehensive income (loss) for those retained interests in which Cat Financial did not intend to sell and it was not likely that they would be required to sell prior to recovery.

Table of Contents

The fair value of the retained interests in all securitizations of retail finance receivables outstanding totaled \$102 million (cost basis of \$107 million) as of December 31, 2009. The fair value of the retained interests as of December 31, 2009 that have been in a continuous unrealized loss position for twelve months or longer totaled \$102 million (cost basis of \$107 million). Key assumptions used to determine the fair value of the retained interests as of December 31, 2009 were:

	December 31, 2009
Cash flow weighted-average discount rates on retained interests	7.7% to 12.4%
Weighted-average maturity in months	22
Expected prepayment rate	18.0%
Expected credit losses	4.7% to 4.8%

During 2009, the assumptions used to determine the expected cash flows for Cat Financial's securitization transactions were revised, which resulted in other-than-temporary impairments to earnings of \$2 million and \$33 million during the three and nine months ended September 30, 2009, respectively. The impairment charge was recorded in Revenues of Financial Products on the Consolidated Statement of Results of Operations. The impairments recognized in earnings were primarily driven by an increase in the credit loss assumption due to the continuing adverse economic conditions in the U.S. The noncredit related gains of \$2 million and losses of \$13 million for the three and nine months ended September 30, 2009, respectively, recorded in Accumulated other comprehensive income (loss), were primarily driven by changes in discount rates.

To maintain competitiveness in the capital markets and to have effective and efficient use of alternative funding sources, Cat Financial may elect to provide additional reserve support to previously issued asset-backed securitizations.

Cat Financial also retains servicing responsibilities and receives a servicing fee of approximately one percent of the remaining value of the finance receivables for their servicing responsibilities.

Sales and Servicing of Trade Receivables

Our Machinery and Engines operations generate trade receivables from the sale of inventory to dealers and customers. Certain of these receivables are sold to Cat Financial.

During 2009, Cat Financial sold interests in a certain pool of trade receivables through a revolving structure to third-party commercial paper conduits, which are asset-backed commercial paper issuers that are special purpose entities (SPEs) of the sponsor bank and are not consolidated by Cat Financial. Cat Financial services the sold trade receivables and receives an annual servicing fee of approximately 0.5 percent of the average outstanding principal balance. Consolidated expenses of \$4 million related to the sale of trade receivables were recognized for the nine months ended September 30, 2009, and are included in Other income (expense) in the Consolidated Statement of Results of Operations. There were no consolidated expenses related to the sale of trade receivables for the three months ended September 30, 2009. As of September 30, 2010 and December 31, 2009, there were no trade receivables sold to the third-party commercial paper conduits.

The cash collections from this pool of receivables are first applied to satisfy any obligations of Cat Financial to the third-party commercial paper conduits. The third-party commercial paper conduits have no recourse to Cat Financial's assets, other than the remaining interest, for failure of debtors to pay when due.

Cash flows from sale of trade receivables:

(Millions of dollars)	Nine Months Ended	
	September 30,	
	2010	2009
Cash proceeds from sales of receivables to the conduits	\$	\$ 887
Cash flows received on the interests that continue to be held	\$5,762	\$6,005

Table of Contents**16. Redeemable Noncontrolling Interest Caterpillar Japan Ltd.**

On August 1, 2008, Shin Caterpillar Mitsubishi Ltd. (SCM) completed the first phase of a share redemption plan whereby SCM redeemed half of Mitsubishi Heavy Industries (MHI's) shares in SCM. This resulted in Caterpillar owning 67 percent of the outstanding shares of SCM and MHI owning the remaining 33 percent. As part of the share redemption, SCM was renamed Caterpillar Japan Ltd. (Cat Japan). Both Cat Japan and MHI have options, exercisable beginning August 1, 2013, to require the redemption of the remaining shares owned by MHI, which if exercised, would make Caterpillar the sole owner of Cat Japan.

The remaining 33 percent of Cat Japan owned by MHI has been reported as redeemable noncontrolling interest and classified as mezzanine equity (temporary equity) in the Consolidated Statement of Financial Position. The redeemable noncontrolling interest is reported at its estimated redemption value. Any adjustment to the redemption value impacts Profit employed in the business, but does not impact Profit. If the fair value of the redeemable noncontrolling interest falls below the redemption value, profit available to common stockholders would be reduced by the difference between the redemption value and the fair value. This would result in lower profit in the profit per common share computation in that period. Reductions impacting the profit per common share computation may be partially or fully reversed in subsequent periods if the fair value of the redeemable noncontrolling interest increases relative to the redemption value. Such increases in profit per common share would be limited to cumulative prior reductions. During the nine months ended September 30, 2009, the estimated redemption value decreased, resulting in adjustments to the carrying value of the redeemable noncontrolling interest. Profit employed in the business increased by \$91 million due to these adjustments. During the nine months ended September 30, 2010, the estimated redemption value decreased, resulting in adjustments to the carrying value of the redeemable noncontrolling interest. Profit employed in the business increased by \$26 million due to these adjustments. As of September 30, 2010, the fair value of the redeemable noncontrolling interest remained greater than the estimated redemption value.

We estimate the fair value of the redeemable noncontrolling interest using a discounted five year forecasted cash flow with a year-five residual value. Based on our current expectations for Cat Japan, we expect the fair value of the redeemable noncontrolling interest to remain greater than the redemption value. However, if economic conditions deteriorate and Cat Japan's business forecast is negatively impacted, it is possible that the fair value of the redeemable noncontrolling interest may fall below the estimated redemption value. Should this occur, profit would be reduced in the profit per common share computation by the difference between the redemption value and the fair value. Lower long-term growth rates, reduced long-term profitability as well as changes in interest rates, costs, pricing, capital expenditures and general market conditions may reduce the fair value of the redeemable noncontrolling interest.

With the consolidation of Cat Japan's results of operations, 33 percent of Cat Japan's comprehensive income or loss is attributed to the redeemable noncontrolling interest, impacting its carrying value. Because the redeemable noncontrolling interest must be reported at its estimated future redemption value, the impact from attributing the comprehensive income or loss is offset by adjusting the carrying value to the redemption value. This adjustment impacts Profit employed in the business, but not Profit. For the nine months ended September 30, 2009, the carrying value had decreased by \$41 million due to Cat Japan's comprehensive loss. This resulted in an offsetting adjustment of \$41 million to increase the carrying value to the redemption value and a corresponding reduction to Profit employed in the business. For the nine months ended September 30, 2010, the carrying value had increased by \$34 million due to Cat Japan's comprehensive income. This resulted in an offsetting adjustment of \$34 million to decrease the carrying value to the redemption value and a corresponding increase to Profit employed in the business. As Cat Japan's functional currency is the Japanese yen, changes in exchange rates affect the reported amount of the redeemable noncontrolling interest. At September 30, 2010, the redeemable noncontrolling interest was \$457 million.

17. Fair Value Measurements

A. Fair value measurements

The guidance on fair value measurements defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants. This guidance also specifies a fair value hierarchy based upon the observability of inputs used in valuation techniques. Observable inputs (highest level) reflect market data obtained from independent sources, while unobservable inputs (lowest level) reflect internally developed market assumptions. In accordance with this guidance, fair value measurements are classified under the following hierarchy:

- **Level 1** Quoted prices for identical instruments in active markets.

Table of Contents

- **Level 2** Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets.
- **Level 3** Model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable.

When available, we use quoted market prices to determine fair value, and we classify such measurements within Level 1. In some cases where market prices are not available, we make use of observable market based inputs to calculate fair value, in which case the measurements are classified within Level 2. If quoted or observable market prices are not available, fair value is based upon internally developed models that use, where possible, current market-based parameters such as interest rates, yield curves and currency rates. These measurements are classified within Level 3.

Fair value measurements are classified according to the lowest level input or value-driver that is significant to the valuation. A measurement may therefore be classified within Level 3 even though there may be significant inputs that are readily observable.

The guidance on fair value measurements expanded the definition of fair value to include the consideration of nonperformance risk. Nonperformance risk refers to the risk that an obligation (either by a counterparty or Caterpillar) will not be fulfilled. For our financial assets traded in an active market (Level 1 and certain Level 2), the nonperformance risk is included in the market price. For certain other financial assets and liabilities (Level 2 and 3), our fair value calculations have been adjusted accordingly.

Available-for-sale securities

Our available-for-sale securities, primarily at Cat Insurance, include a mix of equity and debt instruments (see Note 8 for additional information). Fair values for our U.S. treasury bonds and equity securities are based upon valuations for identical instruments in active markets. Fair values for other government bonds, corporate bonds and mortgage-backed debt securities are based upon models that take into consideration such market-based factors as recent sales, risk-free yield curves and prices of similarly rated bonds.

Derivative financial instruments

The fair value of interest rate swap derivatives is primarily based on models that utilize the appropriate market-based forward swap curves and zero-coupon interest rates to determine discounted cash flows. The fair value of foreign currency and commodity forward and option contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

Securitized retained interests

The fair value of securitized retained interests is based upon a valuation model that calculates the present value of future expected cash flows using key assumptions for credit losses, prepayment rates and discount rates. These assumptions are based on our historical experience, market

trends and anticipated performance relative to the particular assets securitized.

Guarantees

The fair value of guarantees is based upon the premium we would require to issue the same guarantee in a stand-alone arms-length transaction with an unrelated party. If quoted or observable market prices are not available, fair value is based upon internally developed models that utilize current market-based assumptions.

Assets and liabilities measured at fair value, primarily related to Financial Products, included in our Consolidated Statement of Financial Position as of September 30, 2010 and December 31, 2009 are summarized below:

Edgar Filing: CATERPILLAR INC - Form 10-Q

Below are roll-forwards of assets and liabilities measured at fair value using Level 3 inputs for the nine months ended September 30, 2010 and 2009. These instruments, primarily related to Cat Financial, were valued using pricing models that, in management's judgment, reflect the assumptions a marketplace participant would use.

Table of Contents

(Millions of dollars)	Securitized Retained Interests	Guarantees
Balance at December 31, 2009	\$102	\$17
Adjustment to adopt accounting for variable-interest entities	(102)	
Issuance of guarantees		6
Expiration of guarantees		(6)
Balance at September 30, 2010	\$	\$17
Balance at December 31, 2008	\$52	\$14
Gains or losses included in earnings (realized / unrealized)	(31)	
Changes in Accumulated other comprehensive income (loss)	3	
Purchases, issuances, and settlements	75	1
Balance at September 30, 2009	\$99	\$15

The amount of unrealized losses on securitized retained interests included in earnings for the three and nine months ended September 30, 2009 related to assets still held at September 30, 2009 was \$2 million and \$28 million, respectively. These losses were reported in Revenues of Financial Products in the Consolidated Statement of Results of Operations.

In addition to the amounts above, we had impaired loans of \$184 million and \$208 million as of September 30, 2010 and December 31, 2009, respectively. A loan is considered impaired when management determines that collection of contractual amounts due is not probable. In these cases, an allowance for credit losses is established based primarily on the fair value of associated collateral. As the collateral's fair value is based on observable market prices and/or current appraised values, the impaired loans are classified as Level 2 measurements.

B. Fair values of financial instruments

In addition to the methods and assumptions we use to record the fair value of financial instruments as discussed in the Fair value measurements section above, we used the following methods and assumptions to estimate the fair value of our financial instruments.

Cash and short-term investments

Carrying amount approximated fair value.

Restricted cash and short-term investments

Carrying amount approximated fair value. Restricted cash and short-term investments are included in Prepaid expenses and other current assets in the Consolidated Statement of Financial Position.

Finance receivables

Edgar Filing: CATERPILLAR INC - Form 10-Q

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Wholesale inventory receivables

Fair value was estimated by discounting the future cash flows using current rates, representative of receivables with similar remaining maturities.

Short-term borrowings

Carrying amount approximated fair value.

Long-term debt

Fair value for Machinery and Engines fixed rate debt was estimated based on quoted market prices. For Financial Products, fixed and floating rate debt was estimated based on quoted market prices. Commercial paper carrying amounts approximated fair value. For deposit obligations, carrying value approximated fair value.

Please refer to the table below for the fair values of our financial instruments.

Table of Contents**Fair Values of Financial Instruments**

(Millions of dollars)	September 30, 2010		December 31, 2009		Reference
	Carrying Amount	Fair Value	Carrying Amount	Fair Value	
Assets

Financial Products	19,964	21,154	21,594	22,367	
Guarantees	17	17	17	17	Note 10

¹ Total excluded items have a net carrying value at September 30, 2010 and December 31, 2009 of \$7,349 million and \$7,780 million, respectively.

18. Employee separation charges

In 2009, we reported employee separation charges of \$481 million in Other operating (income) expenses in the Consolidated Statement of Results of Operations related to various voluntary and involuntary separation programs. These programs were in response to a sharp decline in sales volume due to the global recession.

For the three and nine months ended September 30, 2010, we recognized employee separation charges of \$7 million and \$27 million in Other operating (income) expenses in the Consolidated Statement of Results of Operations primarily related to involuntary separations due to the streamlining of our corporate structure as announced in the second quarter. In addition, see Note 3 for information regarding stock-based compensation cost associated with the modification of equity awards for employees affected by the separations.

Our accounting for separations is dependent upon how the particular program is designed. For voluntary programs, eligible separation costs are recognized at the time of employee acceptance. For involuntary programs, eligible costs are recognized when management has approved the program, the affected employees have been properly identified and the costs are estimable.

The following table summarizes the 2009 and 2010 separation activity by geographic region:

Edgar Filing: CATERPILLAR INC - Form 10-Q

(Millions of dollars)	Machinery and Engines					Total
	North America	Latin America	EAME	Asia Pacific	Financial Products ¹	
Liability balance at December 31, 2008	\$4	\$2	\$5	\$	\$	\$11
Increase in liability (separation charges) ²	\$323	\$15	\$102	\$31	\$10	\$481
Reduction in liability (payments and other adjustments)	(313)	(17)	(78)	(25)	(10)	(443)
Liability balance at December 31, 2009	\$14	\$	\$29	\$6	\$	\$49
Increase in liability (separation charges).	\$15	\$	\$7	\$5	\$	\$27
Reduction in liability (payments and other adjustments)	(24)		(20)	(7)		(51)
Liability balance at September 30, 2010	\$5	\$	\$16	\$4	\$	\$25

1 Includes \$8 million for North America and \$2 million for EAME in 2009.

2 Includes \$440 million for the nine months ended September 30, 2009.

Table of Contents

The remaining liability balances as of September 30, 2010 represent costs for employees that have either not yet separated from the Company or their full severance has not yet been paid. The majority of these remaining costs are expected to be paid in 2011.

In addition to the 2009 separation charges noted above, we reported \$225 million (\$201 million for the nine months ended September 30, 2009) of costs associated with certain pension and other postretirement benefit plans, which were also recognized in Other operating (income) expenses in the Consolidated Statement of Results of Operations. See Note 9 for additional information.

The majority of the separation charges, made up primarily of cash severance payments, pension and other postretirement benefit costs, and stock-based compensation costs noted above were not assigned to operating segments. They are included in the reconciliation of total accountable profit from reportable segments to total profit (loss) before taxes. See Note 14 for additional details surrounding this reconciliation.

19. Business combinations

Electro-Motive Diesel, Inc.

In August 2010, we acquired 100 percent of the equity in privately held Electro-Motive Diesel, Inc. (EMD) for approximately \$928 million, which includes a preliminary net working capital adjustment anticipated to be finalized in the fourth quarter. Headquartered in LaGrange, Illinois with additional manufacturing facilities in Canada and Mexico, EMD designs, manufactures and sells diesel-electric locomotives for commercial railroad applications and sells its products to customers throughout the world. EMD has a significant field population in North America and throughout the world supported by an aftermarket business offering customers replacement parts, maintenance solutions, and a range of value-added services. EMD is also a global provider of diesel engines for marine propulsion, offshore and land-based oil well drilling rigs, and stationary power generation. The acquisition supports our strategic plan to grow our presence in the global rail industry. The EMD acquisition will enable us to provide rail and transit customers a range of locomotive, engine and emissions solutions, as well as aftermarket product and parts support and a full line of rail-related services and solutions.

The transaction was financed with available cash. Tangible assets acquired of \$890 million, recorded at their fair values, primarily were receivables of \$186 million, inventories of \$551 million and property, plant and equipment of \$132 million. Finite-lived intangible assets acquired of \$327 million were primarily related to customer relationships and also included intellectual property and trade names. The finite-lived intangible assets are being amortized on a straight-line basis over a weighted-average amortization period of approximately 15 years. An additional intangible asset acquired of \$18 million, related to in-process research and development, is considered indefinite-lived until the completion or abandonment of the development activities. Liabilities assumed of \$518 million, recorded at their fair values, primarily included accounts payable of \$124 million and accrued expenses of \$161 million. Additionally, net deferred tax liabilities were \$110 million. Goodwill of \$321 million, substantially all of which is non-deductible for income tax purposes, represents the excess of cost over the fair value of the net tangible and intangible assets acquired. Factors that contributed to a purchase price resulting in the recognition of goodwill include EMD's strategic fit into our product and services portfolio, aftermarket support opportunities and the acquired assembled workforce. These values represent a preliminary allocation of the purchase price subject to finalization of post-closing procedures. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and are reported in the All Other category in Note 14. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

FCM Rail Ltd.

In May 2010, we acquired 100 percent of the equity in privately held FCM Rail Ltd. (FCM) for approximately \$97 million, including the assumption of \$59 million in debt. We paid \$32 million at closing with an additional \$6 million to be paid by May 2012. FCM is one of the largest lessors of maintenance-of-way (MOW) equipment in the United States, and is located in Fenton, Michigan. This acquisition strengthens Progress Rail's position in the MOW industry by expanding its service offerings.

The transaction was financed with available cash. Tangible assets acquired of \$93 million, primarily consisting of property, plant and equipment, were recorded at their fair values. Finite-lived intangible assets acquired of \$10 million related to customer relationships are being amortized on a straight-line basis over 15 years. Liabilities assumed of \$81 million, including \$59 million of assumed debt, were recorded at their fair values. Goodwill of \$16 million, non-deductible for income tax purposes, represents the excess of cost over the fair value of net tangible and finite-lived intangible assets.

Table of Contents

acquired. These values represent a preliminary allocation of the purchase price subject to finalization of post-closing procedures. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the All Other category in Note 14. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

GE Transportation's Inspection Products Business

In March 2010, we acquired the Inspection Products business from GE Transportation's Intelligent Control Systems division for approximately \$45 million. The acquired business has operations located primarily in the United States, Germany and Italy that design, manufacture and sell hot wheel and hot box detectors, data acquisition systems, draggers and other related inspection products for the global freight and passenger rail industries. The acquisition supports our strategic initiative to expand the scope and product range of our rail signaling business and will provide a foundation for further global expansion of this business.

The transaction was financed with available cash. Tangible assets acquired of \$12 million and liabilities assumed of \$9 million were recorded at their fair values. Finite-lived intangible assets acquired of \$28 million related to customer relationships and intellectual property are being amortized on a straight-line basis over a weighted-average amortization period of approximately 13 years. Goodwill of \$14 million, approximately \$8 million of which is deductible for income tax purposes, represents the excess of cost over the fair value of the net tangible and finite-lived intangible assets acquired. These values represent a preliminary allocation of the purchase price subject to finalization of post-closing procedures. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and are reported in the All Other category in Note 14. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

JCS Company, Ltd.

In March 2010, we acquired 100 percent of the equity in privately held JCS Company Ltd. (JCS) for approximately \$34 million, consisting of \$32 million paid at closing and an additional \$2 million post-closing adjustment paid in June 2010. Based in Pyongtaek, South Korea, JCS is a leading manufacturer of centrifugally cast metal face seals used in many of the idlers and rollers contained in our undercarriage components. JCS is also a large supplier of seals to external customers in Asia and presents the opportunity to expand our customer base. The purchase of this business provides Caterpillar access to proprietary technology and expertise which we will be able to replicate across our own seal production processes.

The transaction was financed with available cash. Tangible assets acquired of \$22 million and liabilities assumed of \$8 million were recorded at their fair values. Finite-lived intangible assets acquired of \$12 million related to intellectual property and customer relationships are being amortized on a straight-line basis over a weighted-average amortization period of approximately 9 years. Goodwill of \$8 million, non-deductible for income tax purposes, represents the excess of cost over the fair value of net tangible and finite-lived intangible assets acquired. The results of the acquired business for the period from the acquisition date are included in the accompanying consolidated financial statements and reported in the Core Components segment in Note 14. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

We reported a third-quarter profit of \$792 million, 96 percent higher than the third-quarter 2009 profit of \$404 million. Profit per share was \$1.22, an increase from \$0.64 per share in the third quarter of 2009. Sales and revenues of \$11.134 billion were up 53 percent from \$7.298 billion in the third quarter of 2009.

Profit per share for the nine months ended September 30, 2010 was \$2.68 per share, an increase of \$1.61 per share from a profit of \$1.07 per share for the nine months ended September 30, 2009. Profit of \$1.732 billion was 161 percent higher than profit of \$663 million for the nine months ended September 30, 2009. Sales and revenues for the nine months ended September 30, 2010 were \$29.781 billion, up \$5.283 billion, or 22 percent, from the nine months ended September 30, 2009.

Third-quarter results reflect higher end-user demand and lower inventory reductions by dealers. Continuing economic growth in the developing world has been key to improving sales. In addition, sales in developed countries have improved substantially from very low levels in 2009. While demand has increased, dealer new machine inventories and rental fleets have remained relatively flat, and the age of rental fleets has not improved, which should be beneficial for sales in the future.

Sales and revenues were up \$3.836 billion from the third quarter of 2009. **Sales volume** improved \$3.714 billion, **price realization** was favorable \$262 million, and **currency** had an unfavorable impact of \$107 million. **Financial Products** revenues were down \$33 million from the third quarter of 2009. Profit was up \$388 million, with the increase primarily the result of higher sales volume, favorable price realization and improved **manufacturing costs** driven by the **Caterpillar Production System**, partially offset by higher taxes, incentive compensation and higher research and development expenses.

Highlights for the third quarter of 2010 include:

- Third-quarter sales and revenues of \$11.134 billion were 53 percent higher than the third quarter of 2009. The improvement is a result of economic growth in the developing world and improvement from low levels of machine demand in 2009 in developed countries.
- **Machinery** sales increased 84 percent due to higher end-user demand, absence of dealer inventory reductions that occurred in the third quarter of 2009 and better price realization.
- **Engines** sales increased 21 percent, and Financial Products revenues declined 5 percent from the third quarter of 2009 primarily due to lower average **earning assets**.

- Manufacturing costs improved \$142 million. Excluding pre-tax *LIFO inventory decrement benefits* of \$120 million in the third quarter of 2009, manufacturing costs improved \$262 million.
- *Machinery and Engines* (M&E) operating cash flow was \$3.215 billion through the first three quarters of 2010, compared with \$1.535 billion through the first three quarters of 2009.
- The acquisition of Electro-Motive Diesel (EMD) was completed on August 2, 2010, and added \$216 million to sales in the quarter but had little impact on profit.
- Machinery and Engines *debt-to-capital ratio* was 39.1 percent at the end of the third quarter of 2010, compared to 49.5 percent at the end of the third quarter of 2009 and 47.2 percent at year-end 2009.

2010 Outlook

The outlook for 2010 sales and revenues is a range of \$41 to \$42 billion, an increase of 28 percent from 2009 sales and revenues at the midpoint of the range. The previous outlook range was \$39 to \$42 billion. The 2010 profit outlook is a range of \$3.80 to \$4.00 per share, an increase of 173 percent from 2009 profit at the midpoint of the range. The previous outlook range was \$3.15 to \$3.85 per share.

Table of Contents

Preliminary 2011 Outlook

Our preliminary outlook for 2011 reflects sales and revenues approaching \$50 billion. Developing economies are leading our growth in 2010, and we expect them to continue to grow in 2011. We are expecting developed countries to grow in 2011 as well, but at a slower pace than the developing world.

Notes:

- Glossary of terms is included on pages 61-63; first occurrence of terms shown in bold italics.
- Information on non-GAAP financial measures is included on page 74.

Table of Contents

Consolidated Results of Operations

THREE MONTHS ENDED SEPTEMBER 30, 2010 COMPARED WITH THREE MONTHS ENDED SEPTEMBER 30, 2009

SALES AND REVENUES

The chart above graphically illustrates reasons for the change in Consolidated Sales and Revenues between third quarter 2009 (at left) and third quarter 2010 (at right). Items favorably impacting sales and revenues appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting sales and revenues appear as downward stair steps with dollar amounts reflected in parentheses above each bar. The bar entitled Machinery Volume includes EMD sales. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Sales and revenues for the third quarter of 2010 were \$11.134 billion, up \$3.836 billion, or 53 percent, from the third quarter of 2009. Machinery sales volume was up \$3.116 billion due to higher end-user demand and the absence of dealer inventory reductions that occurred in the third quarter of 2009. Engines sales volume increased \$598 million, primarily because of higher sales of engines for electric power and industrial applications. Price realization improved \$262 million, and currency had a negative impact on sales of \$107 million. Financial Products revenues decreased \$33 million primarily due to lower average earning assets.

Our *integrated service businesses* tend to be more stable through the business cycle than new machines and engines. Third-quarter 2010 sales and revenues for these businesses were higher compared to the third quarter of 2009 primarily because of higher sales of replacement parts. However, with the increase in sales of new machines and engines this quarter, integrated service businesses represented a lower percent of total company sales and revenues than the prior period. These businesses represented about 39 percent of total company sales and revenues in the third quarter of 2010, down from about 50 percent in the third quarter of 2009.

Table of Contents

Sales and Revenues by Geographic Region

(Millions of dollars)	Total	% Change	North America	% Change	Latin America	% Change	EAME	% Change	Asia/Pacific	% Change
<u>Third Quarter 2010</u>										
Machinery	\$7,201	84%	\$2,811	89%	\$1,165	121%	\$1,409	60%	\$1,816	81%
Engines ¹	3,251	21%	1,044	26%	519	71%	1,059	11%	629	6%

	\$11,134	53%	\$4,248	55%	\$1,759	95%	\$2,570	31%	\$2,557	51%
<u>Third Quarter 2009</u>										
Machinery	\$3,904		\$1,490		\$527		\$882		\$1,005	
Engines ¹	2,679		828		303		957		591	
Financial Products ²	715		418		71		123		103	
	\$7,298		\$2,736		\$901		\$1,962		\$1,699	

1 Does not include internal engines transfers of \$669 million and \$370 million in third quarter 2010 and 2009, respectively. Internal engines transfers are valued at prices comparable to those for unrelated parties.

2 Does not include internal revenues earned from Machinery and Engines of \$67 million and \$73 million in third quarter 2010 and 2009, respectively.

Machinery Sales - Sales were \$7.201 billion, an increase of \$3.297 billion, or 84 percent, from the third quarter of 2009.

- Excluding EMD sales of \$216 million, sales volume increased \$2.900 billion.
- Price realization increased \$229 million.
- Currency decreased sales by \$48 million.
- Geographic mix between regions (included in price realization) was \$21 million favorable.
- Dealers reported a small increase in inventories during the quarter compared to about a \$1.1 billion reduction in the third quarter of 2009.
- Deliveries to end users, as reported by dealers, was the most significant factor in our growth in sales volume. The improvement was from depressed levels in 2009.

- Dealer-reported inventories were lower than last year in both dollars and months of supply. Months of supply were also below the historical average.
- Developing countries accounted for about half the growth in sales volume. Construction increased in many countries in response to continuing economic recoveries. Higher metals and energy prices led to increased output of those commodities which was positive for mining-related sales.
- Dealer deliveries in developed countries improved even though construction activity remained weak. We believe the improvement is a result of customers replacing some aging equipment. This follows a weak 2009, when end users reduced machine purchases below historic fleet replenishment rates. However, despite higher deliveries this year, we estimate existing fleet capabilities continued to deteriorate.
- Machine sales to dealers for use in rental fleets increased. However, the average age of rental fleets has not improved, and rental utilization has continued to increase.

North America Sales increased \$1.321 billion, or 89 percent.

- Excluding EMD sales of \$77 million, sales volume increased \$1.147 billion.
- Price realization increased \$97 million.
- Dealer-reported inventories were about flat during the quarter, compared with a nearly \$500 million reduction in the third quarter of 2009. Dealer-reported inventories in dollars were well below last year, and months of supply were below the historical average.

Table of Contents

- An increase in deliveries to end users, as reported by dealers, accounted for more than half the volume growth. More favorable economic environments in both the United States and Canada, including increased output in some key mining industries, encouraged buying.
- We do not believe that reported deliveries, although higher than last year's depressed levels, offset the depletion rates of end-user and dealer-rental fleets.
- Sales of machines typically used in housing and nonresidential building more than doubled from the third quarter of 2009, despite weak construction activity in the United States.
- Construction in Canada was stronger, with housing starts up 23 percent and nonresidential permits up 22 percent. Unemployment declined, and new home prices rebounded to near the 2008 peak.
- Spending and contracting for highway construction declined in the United States as increased federal government funding did not offset reductions in state and local government investment spending.
- Sales of large mining machines increased significantly from last year's depressed levels, benefiting from better metals and coal prices. Copper prices increased 24 percent, gold rose 28 percent, and Central Appalachian coal was up 37 percent.
- In the United States, metals mining increased 12 percent and coal production increased 2 percent. Coal exports were up 55 percent in July, and an increase in electricity production of 6 percent resulted in higher coal consumption.
- In Canada, coal production increased 11 percent and metals mining was up 34 percent.
- U.S. nonmetals mining and quarrying increased 7 percent, and Canadian production increased 1 percent. These production gains helped increase sales of quarry products.

Latin America Sales increased \$638 million, or 121 percent.

- Excluding EMD sales of \$2 million, sales volume increased \$574 million.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- Price realization increased \$49 million.
- Currency benefited sales by \$13 million.
- Dealers reported stable inventories during the quarter compared to a drawdown last year. This change contributed to the growth in sales volume.
- Dealer-reported inventories in dollars and months of supply ended the quarter higher than a year earlier. Months of supply were below the historical average.
- Dealers reported higher deliveries to end users, which accounted for most of the sales volume growth. Low interest rates in many countries allowed economic recoveries to develop, and industrial production returned to near pre-recession peaks.
- Higher commodity prices benefited both oil and mining production. Regional oil production increased more than 3 percent, and drill rig activity grew 10 percent. Brazil increased mining output 10 percent, Chile 1 percent and Mexico 6 percent.
- Economic recoveries led to increased construction. Permits rose 4 percent in Argentina, 2 percent in Chile and 23 percent in Colombia. Brazilian construction employment increased 25 percent.

EAME Sales increased \$527 million, or 60 percent.

- Excluding EMD sales of \$97 million, sales volume increased \$490 million.
- Price realization increased \$5 million.
- Currency decreased sales by \$65 million.
- Dealer-reported inventories were about flat during the quarter, compared with a reduction of about \$250 million in the third quarter of 2009. This change contributed to sales volume growth.

- Both dealer-reported inventories in dollars and the months of supply were well below the third quarter of 2009. Months of supply were below the historical average.
- Sales volume increased in Europe largely due to increased deliveries to end users, as reported by dealers. The European economy continued to recover in the third quarter, with industrial production up 4 percent in the Euro-zone and 7 percent in the United

Table of Contents

Kingdom. Construction increased in response to low interest rates, increased lending for home purchases and higher capacity utilization.

- Africa/Middle East was the largest contributor to sales volume growth. Sales to oil producing countries increased in response to increases in oil production and oil prices.
- Economic recoveries led to volume growth in both South Africa and Turkey. Residential building construction improved in South Africa, and construction spending increased in Turkey.
- Volume growth in the CIS was concentrated in Russia. Positive factors included lower interest rates, increased government spending on housing and transportation and higher oil revenues.

Asia/Pacific Sales increased \$811 million, or 81 percent.

- Excluding EMD sales of \$40 million, sales volume increased \$710 million.
- Price realization increased \$57 million.
- Currency benefited sales by \$4 million.
- Dealer-reported inventories increased, which contrasted with a drawdown during the third quarter of 2009. This change accounted for more than half the growth in sales volume.
- Dealer-reported inventories were higher than a year earlier in dollars, but months of supply declined. Months of supply were below the historical average.
- Most countries continued economic recoveries, the result of low interest rates, increased liquidity and growing exports. Industrial production has surpassed pre-recession peaks in Australia, China, India, Indonesia, South Korea and the Philippines. Sales increased in nearly all countries in the region.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- China had a large increase in sales volume, benefiting from more than 9-percent growth in the economy and 18-percent credit growth. Coal mining, housing construction and nonresidential construction were all up. Home prices increased 12 percent despite government restrictions on home ownership.
- The mining industry was a major contributor to volume growth in Australia. Coal prices rose 31 percent, and metals prices increased 8 percent. Mining companies increased employment 20 percent to improve output.
- Sales volume increased in Indonesia due to growth in construction and mining. Indonesia, the world's largest thermal coal exporter, is increasing production in response to higher prices.
- India increased interest rates to slow inflation, but liquidity expanded by 18 percent. As a result, construction increased 8 percent, and mining output rose 8 percent, leading to higher sales volume.

Engines Sales Sales were \$3.251 billion, an increase of \$572 million, or 21 percent, from the third quarter of 2009.

- Sales volume increased \$598 million.
- Price realization increased \$33 million.
- Currency decreased sales by \$59 million.
- Geographic mix between regions (included in price realization) was \$3 million favorable.
- Dealer-reported inventories in dollars and months of supply were down from the third quarter of 2009.

North America Sales increased \$216 million, or 26 percent.

- Sales volume increased \$199 million.
- Price realization increased \$17 million.

- Sales for industrial applications increased 56 percent due to higher sales to Original Equipment Manufacturers (OEMs) and higher demand in construction.

Table of Contents

- Sales for electric power applications increased 81 percent primarily due to increased sales into dealer rental fleets and dealer inventory replenishment.
- Sales for petroleum applications decreased 6 percent as lower turbine sales were partially offset by increased sales into well service.

Latin America Sales increased \$216 million, or 71 percent.

- Sales volume increased \$211 million.
- Price realization increased \$2 million.
- Currency increased sales by \$3 million.
- Sales for petroleum applications increased 72 percent due to higher turbine sales from one large order.
- Sales of electric power applications increased 118 percent due to higher turbine sales from one large order and improvements in industry demand.
- Sales for marine and industrial applications were about flat.

EAME Sales increased \$102 million, or 11 percent.

- Sales volume increased \$136 million.
- Price realization increased \$16 million.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- Currency decreased sales by \$50 million.
- Sales for electric power applications increased 33 percent primarily due to higher demand throughout the region, partially offset by lower turbine sales.
- Sales for industrial applications increased 62 percent due to higher demand in construction and agricultural applications.
- Sales for petroleum applications decreased 13 percent primarily due to lower turbine sales partially offset by slightly higher demand for engines used in production applications and land-based drilling.
- Sales for marine applications decreased 45 percent due to weak industry demand and a declining order backlog.

Asia/Pacific Sales increased \$38 million, or 6 percent.

- Sales volume increased \$55 million.
- Price realization decreased \$5 million.
- Currency decreased sales by \$12 million.
- Sales for electric power applications increased 29 percent primarily due to higher demand throughout the region, partially offset by lower turbine sales.
- Sales for industrial applications increased 85 percent primarily due to higher demand from OEMs.
- Sales for petroleum applications were about flat as higher sales into China land-based drilling offset lower turbine sales.
- Sales for marine applications decreased 24 percent due to weak industry demand, partially offset by higher sales for workboat and general cargo vessels.

Financial Products Revenues - Revenues were \$682 million, a decrease of \$33 million, or 5 percent, from the third quarter of 2009.

- Revenues decreased \$44 million due to a decrease in average earning assets and \$9 million due to the unfavorable impact of lower interest rates on new and existing finance receivables.
- Other revenues at Cat Financial increased \$25 million, driven by a \$24 million favorable change from returned and repossessed equipment.

Table of Contents

OPERATING PROFIT

The chart above graphically illustrates reasons for the change in Consolidated Operating Profit between third quarter 2009 (at left) and third quarter 2010 (at right). Items favorably impacting operating profit appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting operating profit appear as downward stair steps with dollar amounts reflected in parentheses above each bar. The bar entitled Other includes the operating profit impact of EMD and *consolidating adjustments* and *Machinery and Engines other operating (income) expenses*. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Operating profit in the third quarter of 2010 was \$1.187 billion compared to \$277 million in the third quarter of 2009. The improvement was primarily the result of higher sales volume, which includes the impact of an unfavorable mix of products, better price realization and lower manufacturing costs. The improvements were partially offset by higher selling, general and administrative (SG&A) and research and development (R&D) expenses and an unfavorable impact of currency.

Manufacturing costs improved \$142 million primarily due to variable labor and burden efficiencies and lower warranty and material costs, partially offset by the absence of \$120 million of LIFO inventory decrement benefits.

SG&A and R&D expenses increased by \$378 million primarily due to provisions related to incentive pay and increased expense to support new product development programs, including those related to emissions requirements.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Currency had a \$46 million negative impact on operating profit as the negative impact on sales more than offset the benefit to costs.

Operating Profit (Loss) by Principal Line of Business

(Millions of dollars)	Third Quarter 2010	Third Quarter 2009	\$ Change	% Change	
Machinery ¹	\$615	\$(124)	\$739		2
Engines ¹	531	370	161	44%	
Financial Products	96	92	4	4%	
Consolidating Adjustments	(55)	(61)	6		
Consolidated Operating Profit	\$1,187	\$277	\$910	329%	

1 Caterpillar operations are highly integrated; therefore, the company uses a number of allocations to determine lines of business operating profit for Machinery and Engines.

2 Because the third quarter 2009 was a loss for Machinery, the percent change is not meaningful.

Table of Contents

Operating Profit/Loss by Principal Line of Business

- **Machinery** operating profit was \$615 million compared to an operating loss of \$124 million in the third quarter of 2009. Positive factors included higher sales volume, which included the impact of an unfavorable mix of products, improved price realization and lower manufacturing costs (despite the absence of LIFO decrement benefits). These improvements were partially offset by higher SG&A and R&D expenses.
- **Engines** operating profit of \$531 million was up \$161 million from the third quarter of 2009. Higher sales volume and improved manufacturing costs were partially offset by higher SG&A and R&D expenses. Although total engines operating profit improved from the third quarter of 2009, both sales and operating profit for turbines were about flat and represented a lower proportion of total engine sales and operating profit.
- **Financial Products** operating profit of \$96 million was up \$4 million, or 4 percent, from the third quarter of 2009. The increase was primarily attributable to a \$24 million favorable change from returned or repossessed equipment and an \$8 million decrease in the provision for credit losses at Cat Financial, partially offset by a \$17 million unfavorable impact from lower average earning assets and \$9 million due to incentive pay.

Other Profit/Loss Items

- **Interest expense excluding Financial Products** decreased \$6 million from the third quarter of 2009.
- **Other income/expense** was income of \$1 million compared with income of \$66 million in the third quarter of 2009. The decrease was primarily driven by an unfavorable impact from currency exchange gains and losses.
- **The provision for income taxes** of \$295 million in the third quarter of 2010 reflects an estimated annual effective tax rate of 28 percent, which is expected to be less than the U.S. tax rate of 35 percent primarily due to profits in tax jurisdictions with rates lower than the U.S. rate. The provision for income taxes in the third quarter of 2010 also includes a \$14 million benefit related to the decrease in the 2010 estimated annual tax rate from 29 to 28 percent. The decrease is primarily attributable to a more favorable expected geographic mix of profits from a tax perspective. The 2010 estimated annual tax rate is based on current tax law and therefore does not include the U.S. research and development tax credit and other benefits that have not been extended past 2009.

The benefit for income taxes in the third quarter of 2009 was \$139 million, which included \$129 million of benefits related to prior-year tax returns.

- **Equity in profit/loss of unconsolidated affiliated companies** was a loss of \$7 million compared with profit of \$1 million in the third quarter of 2009. The change is primarily related to start-up expenses from NC2 Global LLC, our joint venture with Navistar.

- **Profit (loss) attributable to noncontrolling interests** negatively impacted profit by \$21 million from the third quarter of 2009, primarily due to improved financial performance of *Caterpillar Japan Ltd.* (Cat Japan). We own two-thirds of Cat Japan, meaning one-third of its profits or losses are attributable to our partner, Mitsubishi Heavy Industries.

Table of Contents

NINE MONTHS ENDED SEPTEMBER 30, 2010 COMPARED WITH NINE MONTHS ENDED SEPTEMBER 30, 2009

SALES AND REVENUES

The chart above graphically illustrates reasons for the change in Consolidated Sales and Revenues between the nine months ended September 30, 2009 (at left) and the nine months ended September 30, 2010 (at right). Items favorably impacting sales and revenues appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting sales and revenues appear as downward stair steps with dollar amounts reflected in parentheses above each bar. The bar entitled Machinery Volume includes EMD sales. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Sales and revenues for the nine months ended September 30, 2010 were \$29.781 billion, up \$5.283 billion, or 22 percent, from the nine months ended September 30, 2009. Machinery sales volume was up \$5.053 billion due to the absence of significant dealer inventory reductions that occurred in the nine months ended September 30, 2009 and higher end-user demand. Engines volume declined \$353 million, primarily because of lower sales of engines for petroleum and marine applications. Price realization improved \$621 million, and currency had a positive impact on sales of \$58 million. Financial Products revenues decreased \$96 million.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Our integrated service businesses tend to be more stable through the business cycle than new machines and engines. The sales and revenues for the first nine months of 2010 for these businesses were higher compared to the first nine months of 2009 primarily because of higher sales of replacement parts. However, with the increase in sales of new machines in the current period, integrated service businesses represented a lower percent of total company sales and revenues than the prior period. These businesses represented about 42 percent of total company sales and revenues in the first nine months of 2010, down from about 45 percent in the first nine months of 2009.

Table of Contents**Sales and Revenues by Geographic Region**

(Millions of dollars)	Total	% Change	North America	% Change	Latin America	% Change	EAME	% Change	Asia/ Pacific	% Change
<u>Nine months ended September 30, 2010</u>										
Machinery	\$19,196	41%	\$7,179	32%	\$3,064	75%	\$3,767	20%	\$5,186	60%
Engines ¹	8,530	(3)%	2,858	(1)%	1,076	31%	2,801	(15)%	1,795	2%
Financial Products ²	2,055	(4)%	1,197	(8)%	219	12%	324	(13)%	315	11%
	\$29,781	22%	\$11,234	17%	\$4,359	57%	\$6,892	1%	\$7,296	38%
<u>Nine months ended September 30, 2009</u>										
Machinery	\$13,584		\$5,436		\$1,754		\$3,150		\$3,244	
Engines ¹	8,763		2,901		824		3,282		1,756	
Financial Products ²	2,151		1,298		195		374		284	
	\$24,498		\$9,635		\$2,773		\$6,806		\$5,284	

1 Does not include internal engines transfers of \$1,772 million and \$1,126 million in the nine months ended September 30, 2010 and 2009, respectively. Internal engines transfers are valued at prices comparable to those for unrelated parties.

2 Does not include internal revenues earned from Machinery and Engines of \$193 million and \$247 million in the nine months ended September 30, 2010 and 2009, respectively.

Machinery Sales - Sales were \$19.196 billion, an increase of \$5.612 billion, or 41 percent, from the nine months ended September 30, 2009.

- Excluding EMD sales of \$216 million, sales volume increased \$4.837 billion.
- Price realization increased \$475 million.
- Currency increased sales by \$84 million.
- Geographic mix between regions (included in price realization) was \$10 million unfavorable.
- A small increase in dealer-reported inventories compared with a reduction of about \$2.6 billion during the same period a year earlier, accounted for over half the increase in volume.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- Dealer-reported inventories were lower than last year in both dollars and months of supply. Months of supply were below the historical average.
- Developing countries recovered sooner, and with more strength, than developed countries. As a result, developing countries accounted for about two-thirds of the volume growth. Low interest rates and economic recovery led to increased construction spending in many countries. Higher metals and energy prices benefited production of commodities and mining-related sales.
- Weak economic recoveries, coupled with low construction spending, limited volume growth in the developed regions of North America and Europe. Dealer-reported inventories in these regions declined slightly this year, and we believe increases in deliveries to end users largely reflected efforts to limit deterioration in their machine fleets.
- Deliveries into rental fleets increased. However, units in rental fleets continued to decline, and rental utilization rates increased.

North America Sales increased \$1.743 billion, or 32 percent.

- Excluding EMD sales of \$77 million, sales volume increased \$1.469 billion.
- Price realization increased \$195 million.
- Currency increased sales by \$2 million.
- An increase in deliveries to end users, as reported by dealers, was the major contributor to volume growth.
- Dealers reduced reported inventories this year, but at a slower rate than last year. This change benefited sales volume.

Table of Contents

- Dealer-reported inventories declined from last year in both dollars and months of supply. Months of supply were also below the historical average.
- The improvement in end-user demand resulted from a somewhat more favorable economic environment in the United States and Canada, which allowed some gains in construction and mining output. In addition, we believe end users increased purchases to slow deterioration of their fleets.
- U.S. housing starts increased 9 percent in response to lower mortgage interest rates, and a more than 40-year low in unsold new homes. Canadian starts were up 42 percent, benefiting from increased employment and low mortgage rates.
- U.S. nonresidential building contracts decreased 16 percent due to lower commercial property prices and excess capacity. Highway construction contracts increased 5 percent, benefiting from the U.S. government's recovery program. This gain occurred early in the year. In Canada, nonresidential construction permits rose 9 percent.
- Metals prices were 48 percent higher, and U.S. metals mines expanded production 6 percent. Gains accelerated throughout the year.
- Central Appalachian coal prices averaged 21 percent higher, but a weak first quarter resulted in a 1 percent year-to-date decline in U.S. coal production. Canadian production expanded 33 percent.

Latin America Sales increased \$1.310 billion, or 75 percent.

- Excluding EMD sales of \$2 million, sales volume increased \$1.095 billion.
- Price realization increased \$124 million.
- Currency benefited sales by \$89 million.
- Dealers reported increases in their inventories this year compared to a decrease of about \$500 million last year. This change was the major contributor to volume growth.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- Dealer-reported inventories ended the period higher than a year earlier in both dollars and months of supply. However, months of supply were below the historical average.
- Dealers reported increased deliveries to end users, the result of better economic growth, more construction spending and increased mine production. Interest rates averaged lower than last year in major economies, and commodity prices were higher, both of which benefited construction and mining.
- Brazil contributed the most to higher volume. Construction increased, with employment up 30 percent, and iron ore production grew 36 percent. That gain was in response to a 43-percent increase in iron ore prices.
- Large volume gains also occurred in Chile and Mexico. Chile benefited from higher copper prices and a slight increase in its production. Higher oil prices and increased mining production were positive factors in Mexico.

EAME Sales increased \$617 million, or 20 percent.

- Excluding EMD sales of \$97 million, sales volume increased \$601 million.
- Price realization decreased \$31 million.
- Currency decreased sales by \$50 million.
- Dealers continued to reduce reported inventories this year, although at a much slower rate than last year. This change accounted for most of the volume increase.
- Dealer-reported inventories in dollars were well below last year, as were months of supply. Months of supply were also below the historical average.
- Low interest rates strengthened recoveries in Europe, with industrial production up 4 percent in the Euro-zone and 3 percent in the United Kingdom. Although construction spending was weak, sales volume increased in most major European economies. These gains resulted from dealers rebuilding inventories this year and users reducing the deterioration of their fleets.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- In Africa/Middle East, volume gains occurred largely in oil producing countries and Turkey. Regional oil revenues benefited from a 36-percent increase in oil prices, and lower interest rates in Turkey led to a 31-percent increase in building permits.

Table of Contents

- Russia was the most significant contributor to volume growth in the CIS. Interest rates were less than half the year earlier rates, and the money supply increased more than 30 percent. Oil production increased 3 percent, and natural gas output increased 13 percent.

Asia/Pacific Sales increased \$1.942 billion, or 60 percent.

- Excluding EMD sales of \$40 million, sales volume increased \$1.662 billion.
- Price realization increased \$197 million.
- Currency benefited sales by \$43 million.
- Dealers increased reported inventories this year, which contrasted with a large drawdown last year. This change accounted for more than half the volume growth.
- Dealer-reported inventories in dollars were higher than last year but months of supply declined. Months of supply were below the historical average.
- Dealers reported higher deliveries to end users, further increasing sales volume. Interest rates averaged close to rates last year, money supplies increased, and exports increased 35 percent. Industrial production in many countries increased more than 15 percent.
- China accounted for over half the regional sales volume growth, the result of a large stimulus program and over 20 percent credit growth. Construction spending increased more than 30 percent, and coal production increased 22 percent.
- Volume growth in Indonesia resulted from higher coal prices, increased mine output and more mineral exports. Construction increased 7 percent.
- Australia's mining sector drove volume growth in that country. Production increased 6 percent, and mines spent 24 percent more on exploration.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Engines Sales Sales of \$8.530 billion, a decrease of \$233 million, or 3 percent, from the nine months ended September 30, 2009.

- Sales volume decreased \$353 million.
- Price realization increased \$146 million.
- Currency decreased sales by \$26 million.
- Geographic mix between regions (included in price realization) was \$11 million favorable.
- Dealer-reported inventories in both dollars and months of supply were down from the nine months ended September 30, 2009.

North America Sales decreased \$43 million, or 1 percent.

- Sales volume decreased \$60 million.
- Price realization increased \$16 million.
- Currency increased sales by \$1 million.
- Sales for petroleum applications decreased 22 percent primarily due to a decrease in sales of engines used for gas compression and drilling and lower turbine sales.
- Sales for industrial applications increased 38 percent due to higher sales to OEMs and higher demand in construction.
- Sales for electric power applications were about flat.

Latin America Sales increased \$252 million, or 31 percent.

Table of Contents

- Sales volume increased \$230 million.
- Price realization increased \$11 million.
- Currency increased sales by \$11 million.
- Sales of electric power applications increased 78 percent due to higher turbine sales from one large order and improvements in industry demand.
- Sales for petroleum applications increased 18 percent due to higher turbine sales from one large order.

EAME Sales decreased \$481 million, or 15 percent.

- Sales volume decreased \$522 million.
- Price realization increased \$69 million.
- Currency decreased sales by \$28 million.
- Sales for petroleum applications decreased 35 percent primarily due to lower turbine sales as well as a slowdown in demand for engines used in production applications and land-based drilling.
- Sales for marine applications decreased 37 percent due to weak industry demand and a declining order backlog.
- Sales for industrial applications increased 14 percent due to higher demand in construction and agricultural applications.

Asia/Pacific Sales increased \$39 million, or 2 percent.

- Sales volume increased \$10 million.
- Price realization increased \$39 million.
- Currency decreased sales by \$10 million.
- Sales for electric power applications increased 17 percent primarily due to higher demand throughout the region and higher turbine sales.
- Sales for industrial applications increased 47 percent primarily due to increased demand from OEMs.
- Sales for petroleum applications were about flat.
- Sales for marine applications decreased 19 percent due to weak industry demand, partially offset by higher sales for workboat and general cargo vessels.

Financial Products Revenues - Revenues of \$2.055 billion, a decrease of \$96 million, or 4 percent, from the nine months ended September 30, 2009.

- Revenues decreased \$156 million due to a decrease in average earning assets, partially offset by an increase of \$21 million due to the favorable impact of higher interest rates on new and existing finance receivables.
- Other revenues at Cat Financial increased \$39 million. The increase was due to the absence of \$33 million in write-downs on retained interests related to the securitized asset portfolio in 2009 and a \$30 million favorable change from returned and repossessed equipment, partially offset by the unfavorable impact from various other revenue items.

Table of Contents

OPERATING PROFIT

The chart above graphically illustrates reasons for the change in Consolidated Operating Profit between the nine months ended September 30, 2009 (at left) and the nine months ended September 30, 2010 (at right). Items favorably impacting operating profit appear as upward stair steps with the corresponding dollar amounts above each bar, while items negatively impacting operating profit appear as downward stair steps with dollar amounts reflected in parentheses above each bar. The bar entitled Other/M&E Redundancy includes the operating profit impact of EMD and consolidating adjustments and Machinery and Engines other operating (income) expenses, which include Machinery and Engines redundancy costs. Caterpillar management utilizes these charts internally to visually communicate with the company's Board of Directors and employees.

Operating profit in the nine months ended September 30, 2010 was \$2.672 billion compared to \$449 million in the nine months ended September 30, 2009. The improvement was primarily the result of lower manufacturing costs, higher sales volume, which includes the impact of an unfavorable mix of products, better price realization and the absence of 2009 redundancy costs. The improvements were partially offset by higher SG&A and R&D expenses and an unfavorable impact of currency.

Manufacturing costs improved \$1.024 billion primarily due to variable labor and burden efficiencies and lower warranty and material costs, partially offset by the absence of \$230 million of LIFO inventory decrement benefits.

Edgar Filing: CATERPILLAR INC - Form 10-Q

SG&A and R&D expenses increased by \$624 million primarily due to provisions related to incentive pay and increased expense to support new product development programs, including those related to emissions requirements.

Currency had a \$161 million negative impact on operating profit as the negative impact on costs more than offset the benefit to sales.

Redundancy costs were \$641 million for the nine months ended September 30, 2009.

Table of Contents**Operating Profit (Loss) by Principal Line of Business**

(Millions of dollars)	Nine Months Ended September 30, 2010	Nine Months Ended September 30, 2009	\$ Change	% Change
Machinery ¹	\$1,286	\$(885)	\$2,171	2
Engines ¹	1,257	1,223	34	3%
Financial Products	285	318	(33)	(10)%
Consolidating Adjustments	(156)	(207)	51	
Consolidated Operating Profit	\$2,672	\$449	\$2,223	495%

1 Caterpillar operations are highly integrated; therefore, the company uses a number of allocations to determine lines of business operating profit for Machinery and Engines.

2 Because the nine months ended September 30, 2009 was a loss for Machinery, the percent change is not meaningful.

Operating Profit /Loss by Principal Line of Business

- **Machinery** operating profit was \$1.286 billion compared to an operating loss of \$885 million in the nine months ended September 30, 2009. Positive factors included higher sales volume, which includes the impact of an unfavorable mix of products, lower manufacturing costs (despite the absence of LIFO decrement benefits), improved price realization, and the absence of 2009 redundancy costs. These improvements were partially offset by higher SG&A and R&D expenses and the negative impact of currency.
- **Engines** operating profit of \$1.257 billion was up \$34 million from the nine months ended September 30, 2009. Improved manufacturing costs, absence of 2009 redundancy costs and improved price realization were partially offset by lower sales volume, which includes the impact of an unfavorable mix of products, higher SG&A and R&D expenses and the negative impact of currency.
- **Financial Products** operating profit of \$285 million was down \$33 million, or 10 percent, from the nine months ended September 30, 2009. The decrease was primarily attributable to a \$68 million unfavorable impact from lower average earning assets and a \$35 million increase in SG&A expenses (excluding the provision for credit losses), partially offset by the absence of \$33 million in write-downs on retained interests related to the securitized asset portfolio in 2009 and a \$30 million favorable change from returned and repossessed equipment.

Other Profit/Loss Items

- **Interest expense excluding Financial Products** decreased \$33 million from the nine months ended September 30, 2009.

- **Other income/expense** was income of \$114 million compared with income of \$293 million in the nine months ended September 30, 2009. The decrease was primarily driven by an unfavorable impact from currency exchange gains and losses.

- **The provision for income taxes** of \$735 million for the first nine months of 2010 reflects an estimated annual effective tax rate of 28 percent, which is expected to be less than the U.S. tax rate of 35 percent primarily due to profits in tax jurisdictions with rates lower than the U.S. rate. The 2010 estimated annual tax rate is based on current tax law and therefore does not include the U.S. research and development tax credit and other benefits that have not been extended past 2009.

The provision for income taxes for 2010 also includes a first quarter deferred tax charge of \$90 million due to the enactment of U.S. healthcare legislation effectively making government subsidies received for Medicare equivalent prescription drug coverage taxable. Guidance on accounting for income taxes requires that the deferred tax effects of changes in laws be reflected in the financial statements in the period in which the legislation is enacted regardless of the effective date. Deferred tax assets had previously been recorded based on the liability for other postretirement benefits without regard to the tax-free subsidy. As a result of the law change, deferred tax assets were reduced to reflect the expected future income tax on the subsidy. Beginning in 2013, a cash tax cost will be incurred when the subsidies received increase taxable income.

Table of Contents

This deferred tax charge was partially offset by a \$34 million benefit related to the recognition of refund claims for prior tax years and a \$26 million benefit for the release of a valuation allowance against the deferred tax assets of certain non-U.S. entities due to tax planning actions implemented in the second quarter of 2010.

The benefit for income taxes for the first nine months of 2009 was \$179 million, which included \$129 million of benefits related to prior-year tax returns.

- **Equity in profit/loss of unconsolidated affiliated companies** was a loss of \$13 million compared with profit of \$1 million in the nine months ended September 30, 2009. The change is primarily related to higher start-up expenses from NC2 Global LLC, our joint venture with Navistar.
- **Profit/loss attributable to noncontrolling interests** negatively impacted profit by \$80 million from the nine months ended September 30, 2009, primarily due to improved financial performance of Cat Japan. We own two-thirds of Cat Japan, meaning one-third of its profits or losses are attributable to our partner, Mitsubishi Heavy Industries.

Electro-Motive Diesel, Inc. Acquisition

In August 2010, we acquired 100 percent of the equity in privately held Electro-Motive Diesel, Inc. (EMD) for approximately \$928 million, which includes a preliminary net working capital adjustment anticipated to be finalized in the fourth quarter. Headquartered in LaGrange, Illinois with additional manufacturing facilities in Canada and Mexico, EMD designs, manufactures and sells diesel-electric locomotives for all commercial railroad applications and sells its products to customers throughout the world. EMD has a significant field population in North America and throughout the world supported by an aftermarket business offering customers replacement parts, maintenance solutions, and a range of value-added services. EMD is also a global provider of diesel engines for marine propulsion, offshore and land-based oil well drilling rigs, and stationary power generation. The acquisition supports our strategic plan to grow our presence in the global rail industry. The EMD acquisition will enable us to provide rail and transit customers a range of locomotive, engine and emissions solutions, as well as aftermarket product and parts support and a full line of rail-related services and solutions.

The transaction was financed with available cash. Tangible assets acquired of \$890 million, recorded at their fair values, primarily were receivables of \$186 million, inventories of \$551 million and property, plant and equipment of \$132 million. Finite-lived intangible assets acquired of \$327 million were primarily related to customer relationships and also included intellectual property and trade names. The finite-lived intangible assets are being amortized on a straight-line basis over a weighted-average amortization period of approximately 15 years. An additional intangible asset acquired of \$18 million, related to in-process research and development, is considered indefinite-lived until the completion or abandonment of the development activities. Liabilities assumed of \$518 million, recorded at their fair values, primarily included accounts payable of \$124 million and accrued expenses of \$161 million. Additionally, net deferred tax liabilities were \$110 million. Goodwill of \$321 million, substantially all of which is non-deductible for income tax purposes, represents the excess of cost over the fair value of the net tangible and intangible assets acquired. Factors that contributed to a purchase price resulting in the recognition of goodwill include EMD's strategic fit into our product and services portfolio, aftermarket support opportunities and the acquired assembled workforce. These values represent a preliminary allocation of the purchase price subject to finalization of post-closing procedures. Assuming this transaction had been made at the beginning of any period presented, the consolidated pro forma results would not be materially different from reported results.

GLOSSARY OF TERMS

1. **Caterpillar Japan Ltd. (Cat Japan)** A Caterpillar subsidiary formerly known as Shin Caterpillar Mitsubishi Ltd. (SCM). SCM was a 50/50 joint venture between Caterpillar and Mitsubishi Heavy Industries Ltd. (MHI) until SCM redeemed one half of MHI's shares on August 1, 2008. Caterpillar now owns 67 percent of the renamed entity. We began consolidating Cat Japan in the fourth quarter of 2008.

2. **Caterpillar Production System** The Caterpillar Production System is the common Order-to-Delivery process being implemented enterprise-wide to achieve our safety, quality, velocity, earnings and growth goals for 2010 and beyond.

3. **Consolidating Adjustments** Eliminations of transactions between Machinery and Engines and Financial Products.

4. **Currency** With respect to sales and revenues, currency represents the translation impact on sales resulting from changes in foreign currency exchange rates versus the U.S. dollar. With respect to operating profit, currency represents the net translation impact on sales and operating costs resulting from changes in foreign currency exchange rates versus

Table of Contents

the U.S. dollar. Currency includes the impact on sales and operating profit for the Machinery and Engines lines of business only; currency impacts on Financial Products revenues and operating profit are included in the Financial Products portions of the respective analyses. With respect to other income/expense, currency represents the effects of forward and option contracts entered into by the company to reduce the risk of fluctuations in exchange rates and the net effect of changes in foreign currency exchange rates on our foreign currency assets and liabilities for consolidated results.

5. **Debt-to-Capital Ratio** A key measure of financial strength used by both management and our credit rating agencies. The metric is a ratio of Machinery and Engines debt (short-term borrowings plus long-term debt) and redeemable noncontrolling interest to the sum of Machinery and Engines debt, redeemable noncontrolling interest and stockholders' equity.

6. **EAME** Geographic region including Europe, Africa, the Middle East and the Commonwealth of Independent States (CIS).

7. **Earning Assets** Assets consisting primarily of total finance receivables net of unearned income, plus equipment on operating leases, less accumulated depreciation at Cat Financial.

8. **Engines** A principal line of business including the design, manufacture, marketing and sales of engines for Caterpillar machinery; electric power generation systems; marine, petroleum, construction, industrial, agricultural and other applications and related parts. Also includes remanufacturing of Caterpillar engines and a variety of Caterpillar machinery and engine components and remanufacturing services for other companies. Reciprocating engines meet power needs ranging from 10 to 21,800 horsepower (8 to more than 16,000 kilowatts). Turbines range from 1,600 to 30,000 horsepower (1,200 to 22,000 kilowatts).

9. **Financial Products** A principal line of business consisting primarily of Caterpillar Financial Services Corporation (Cat Financial), Caterpillar Insurance Holdings, Inc. (Cat Insurance) and their respective subsidiaries. Cat Financial provides a wide range of financing alternatives to customers and dealers for Caterpillar machinery and engines, Solar gas turbines as well as other equipment and marine vessels. Cat Financial also extends loans to customers and dealers. Cat Insurance provides various forms of insurance to customers and dealers to help support the purchase and lease of our equipment.

10. **Integrated Service Businesses** A service business or a business containing an important service component. These businesses include, but are not limited to, aftermarket parts, Cat Financial, Cat Insurance, Cat Logistics, Cat Reman, Progress Rail, OEM Solutions and Solar Turbine Customer Services.

11. **Latin America** Geographic region including Central and South American countries and Mexico.

12. **LIFO Inventory Decrement Benefits** A significant portion of Caterpillar's inventory is valued using the last-in, first-out (LIFO) method. With this method, the cost of inventory is comprised of layers at cost levels for years when inventory increases occurred. A LIFO

Edgar Filing: CATERPILLAR INC - Form 10-Q

decrement occurs when inventory decreases, depleting layers added in earlier, generally lower cost, years. A LIFO decrement benefit represents the impact on profit of charging cost of goods sold with prior-year cost levels rather than current period costs.

13. **Machinery** A principal line of business which includes the design, manufacture, marketing and sales of construction, mining and forestry machinery track and wheel tractors, track and wheel loaders, pipelayers, motor graders, wheel tractor-scrappers, track and wheel excavators, backhoe loaders, log skidders, log loaders, off-highway trucks, articulated trucks, paving products, skid steer loaders, underground mining equipment, tunnel boring equipment and related parts. Also includes the design, manufacture, remanufacture, maintenance and services of rail-related products and logistics services for other companies.

14. **Machinery and Engines (M&E)** Due to the highly integrated nature of operations, it represents the aggregate total of the Machinery and Engines lines of business and includes primarily our manufacturing, marketing and parts distribution operations.

15. **Machinery and Engines Other Operating (Income) Expenses** Comprised primarily of gains/losses on disposal of long-lived assets, long-lived asset impairment charges, pension curtailment charges and employee redundancy costs.

Table of Contents

16. **Manufacturing Costs** Manufacturing costs exclude the impacts of currency and represent the volume-adjusted change for variable costs and the absolute dollar change for period manufacturing costs. Variable manufacturing costs are defined as having a direct relationship with the volume of production. This includes material costs, direct labor and other costs that vary directly with production volume such as freight, power to operate machines and supplies that are consumed in the manufacturing process. Period manufacturing costs support production but are defined as generally not having a direct relationship to short-term changes in volume. Examples include machinery and equipment repair, depreciation on manufacturing assets, facility support, procurement, factory scheduling, manufacturing planning and operations management.

17. **Price Realization** The impact of net price changes excluding currency and new product introductions. Consolidated price realization includes the impact of changes in the relative weighting of sales between geographic regions.

18. **Redundancy Costs** Costs related to employment reduction including employee severance charges, pension and other postretirement benefit plan curtailments and settlements and health care and supplemental unemployment benefits.

19. **Sales Volume** With respect to sales and revenues, sales volume represents the impact of changes in the quantities sold for machinery and engines as well as the incremental revenue impact of new product introductions. With respect to operating profit, sales volume represents the impact of changes in the quantities sold for machinery and engines combined with product mix the net operating profit impact of changes in the relative weighting of machinery and engines sales with respect to total sales.

20. **6 Sigma** On a technical level, 6 Sigma represents a measure of variation that achieves 3.4 defects per million opportunities. At Caterpillar, 6 Sigma represents a much broader cultural philosophy to drive continuous improvement throughout the value chain. It is a fact-based, data-driven methodology that we are using to improve processes, enhance quality, cut costs, grow our business and deliver greater value to our customers through black belt-led project teams. At Caterpillar, 6 Sigma goes beyond mere process improvement it has become the way we work as teams to process business information, solve problems and manage our business successfully.

LIQUIDITY AND CAPITAL RESOURCES

Sources of funds

We generate significant capital resources from operating activities, which are the primary source of funding for our Machinery and Engines operations. Funding for these businesses is also provided by commercial paper and long-term debt issuances. Financial Products operations are funded primarily from commercial paper, term debt issuances and collections from their existing portfolio. Throughout the first nine months of 2010, we continued to experience favorable liquidity conditions in both our Machinery and Engines and Financial Products operations. On a consolidated basis, we ended the first nine months of 2010 with \$2.3 billion of cash, a decrease of \$2.6 billion from year-end 2009. Our cash balances are held in numerous locations throughout the world. Most of the amounts held outside the U.S. could be repatriated to the U.S. but generally would be subject to incremental U.S. income taxes.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Consolidated operating cash flow for the first nine months of 2010 was \$2.83 billion, down from \$4.52 billion for the same period a year ago. Improving economic conditions in the first nine months of 2010 compared with recessionary conditions a year ago have resulted in significant changes in the components of operating cash flow from 2009 to 2010. Operating cash flow in the first nine months of 2010 benefited from profit of consolidated and affiliated companies of \$1.77 billion and an increase in accounts payable, reflecting higher levels of material purchases for production to meet increasing demand. Offsetting these items were higher receivables resulting from improved sales volume, and an increase in inventory, also related to higher production. The first nine months of 2009 benefited from significant declines in receivables and inventory, partially offset by lower accounts payable and changes in other working capital items. See further discussion of operating cash flow under Machinery and Engines and Financial Products.

Total debt as of September 30, 2010, was \$28.61 billion, a decrease of \$3.02 billion from year-end 2009. Debt related to Machinery and Engines decreased \$1.13 billion in the first nine months of 2010. Debt related to Financial Products decreased \$1.89 billion reflecting declining portfolio balances at Cat Financial.

We have three global credit facilities with a syndicate of banks totaling \$7.23 billion (Credit Facility) available in the aggregate to both Caterpillar and Cat Financial to support their commercial paper programs in the event those programs become unavailable and for general liquidity purposes. Based on management's allocation decision, which can

Table of Contents

be revised from time to time, the portion of the Credit Facility available to Cat Financial as of September 30, 2010 was \$5.73 billion.

- The five-year facility of \$1.62 billion expires in September 2012.
- In September 2010, we replaced the \$2.98 billion five-year facility expiring in September 2011 with a four-year facility of \$2.09 billion that expires in September 2014.
- In September 2010, we renewed the 364-day facility. The amount was increased from \$2.39 billion to \$3.52 billion and expires in September 2011.

At September 30, 2010, Caterpillar's consolidated net worth was \$14.96 billion, which was above the \$9.00 billion required under the Credit Facility. The consolidated net worth is defined as the consolidated stockholder's equity including preferred stock but excluding the pension and other postretirement benefits balance within Accumulated other comprehensive income (loss).

At September 30, 2010, Cat Financial's covenant interest coverage ratio was 1.29 to 1. This is above the 1.15 to 1 minimum ratio of (1) profit excluding income taxes, interest expense and net gain/(loss) from interest rate derivatives to (2) interest expense calculated at the end of each calendar quarter for the rolling four quarter period then most recently ended.

In addition, at September 30, 2010, Cat Financial's covenant leverage ratio was 7.32 to 1. This is below the maximum ratio of debt to net worth of 10 to 1, calculated (1) on a monthly basis as the average of the leverage ratios determined on the last day of each of the six preceding calendar months and (2) at each December 31 required by the Credit Facility.

In the event Caterpillar or Cat Financial does not meet one or more of their respective financial covenants under the Credit Facility in the future (and are unable to obtain a consent or waiver), the bank group may terminate the commitments allocated to the party that does not meet its covenants. Additionally, in such event, certain of Cat Financial's other lenders under other loan agreements where similar financial covenants or cross default provisions are applicable, may, at their election, choose to pursue remedies under those loan agreements, including accelerating the repayment of outstanding borrowings. At September 30, 2010, there were no borrowings under the Credit Facility.

Our total credit commitments as of September 30, 2010 were:

(Millions of dollars)	Consolidated	Machinery and Engines	Financial Products
Credit lines available:			
Global credit facilities	\$7,230	\$1,500	\$5,730
Other external	3,992	334	3,658
Total credit lines available	11,222	1,834	9,388
Less: Global credit facilities supporting commercial paper	(2,284)		(2,284)
Less: Utilized credit	(2,193)	(136)	(2,057)

Edgar Filing: CATERPILLAR INC - Form 10-Q

Available credit	\$6,745	\$1,698	\$5,047
------------------	---------	---------	---------

Other consolidated credit lines with banks as of September 30, 2010 totaled \$3.99 billion. These credit lines, which may be eligible for renewal at various future dates or have no specified expiration date, are used primarily by our subsidiaries for local funding requirements. Caterpillar or Cat Financial may guarantee subsidiary borrowings under these lines.

In the event that Caterpillar or Cat Financial, or any of their debt securities, experiences a credit rating downgrade it would likely result in an increase in our borrowing costs and make access to certain credit markets more difficult. While we expect continued growth in the global economy, in the event conditions deteriorate from current levels or access to debt markets becomes unavailable, our Machinery and Engines operations would rely on cash flow from operations, use of existing cash balances, borrowings from Cat Financial and access to our Credit Facility. Our Financial Products operations would rely on cash flow from its existing portfolio, utilization of existing cash balances, access to our Credit Facility and other credit line facilities of Cat Financial and potential borrowings from Caterpillar. In addition, Caterpillar maintains a support agreement with Cat Financial, which requires Caterpillar to remain the sole owner of Cat Financial and may, under certain circumstances, require Caterpillar to make payments to Cat Financial should Cat Financial fail to maintain certain financial ratios.

Table of Contents

Machinery and Engines

Net cash provided by operating activities was \$3.22 billion in the first nine months of 2010 compared to \$1.54 billion in the first nine months of 2009. The change was primarily due to increased profit and a \$600 million dividend from Cat Financial in the first quarter of 2010. Profit of consolidated and affiliated companies in the first nine months of 2010 was \$1.76 billion compared to \$609 million for the same period a year ago. Improving economic conditions in the first nine months of 2010 compared with recessionary conditions a year ago have resulted in significant changes in the components of working capital from 2009 to 2010. During the first nine months of 2010, we experienced increased demand and a production ramp-up, resulting in an increase in accounts payable and customer advances, which was more than offset by increases in inventory and receivables. In the first nine months of 2009, we were executing our strategic trough plans as demand and production were decreasing. This resulted in significant decreases in inventory and receivables, which were partially offset by decreases in accounts payable and accrued expenses. Net cash used for investing activities in the first nine months of 2010 was \$2.45 billion compared to \$133 million for the same period in 2009. The change was primarily due to the use of cash for the acquisition of Electro-Motive Diesel (EMD) and loans to Cat Financial in 2010, compared with net payments from Cat Financial in 2009. Net cash used for financing activities in the first nine months of 2010 was \$2.16 billion, primarily a result of payments on long-term debt and dividend payments. During the same period in 2009, net cash used for financing activities was \$1.08 billion, as proceeds from loans with Cat Financial of \$965 million were more than offset by payments on short-term borrowings and dividends.

Our priorities for the use of cash are maintaining a strong financial position that helps protect our credit rating, providing capital to support growth, appropriately funding employee benefit plans, paying dividends and repurchasing common stock with excess cash.

Strong financial position A key measure of Machinery and Engines financial strength used by both management and our credit rating agencies is Machinery and Engines debt-to-capital ratio. Debt-to-capital is defined as short-term borrowings, long-term debt due within one year, redeemable noncontrolling interest and long-term debt due after one year (debt) divided by the sum of debt (including redeemable noncontrolling interest) and stockholders' equity. Debt also includes borrowings from Financial Products. The debt-to-capital ratio for Machinery and Engines was 39.1 percent at September 30, 2010 compared to 49.5 percent at September 30, 2009, within our target range of 35 to 45 percent. Higher profits during the first nine months of 2010 along with lower debt levels have contributed to the reduction in the debt-to-capital ratio. Partially offsetting the improvement was an after-tax charge to Accumulated other comprehensive income (loss) to recognize the re-measurement of certain pension plans during the third quarter due to plan changes. This charge reduced equity by \$831 million. See Retirement Benefits for further discussion. In addition to the debt-to-capital ratios, certain rating agencies have increased their focus on the extent to which Caterpillar and Cat Financial have cash and cash equivalents and unused credit lines available to meet short-term debt requirements. Caterpillar and Cat Financial have been taking this focus into account when planning for liquidity needs. This focus has resulted in historically higher cash balances for Caterpillar and Cat Financial.

Capital to support growth Capital expenditures during the first nine months of 2010 were \$909 million, an increase of \$160 million compared to the first nine months of 2009. We expect capital expenditures to be about \$1.6 billion in 2010, up from \$1.3 billion in 2009. During the third quarter of 2010, we completed the acquisition of EMD for \$928 million.

Appropriately funded employee benefit plans We contributed \$957 million to our pension plans in the first nine months of 2010 and we anticipate additional contributions of approximately \$20 million during the remainder of the year. In addition, beginning in June 2009, the company began funding the 401(k) match with company stock. This equated to a contribution of \$93 million (1.5 million shares) for the first nine months of 2010.

Edgar Filing: CATERPILLAR INC - Form 10-Q

Paying dividends Dividends paid totaled \$804 million in the first nine months of 2010, representing 42 cents per share paid in the first and second quarters and 44 cents per share paid in the third quarter. Each quarter, our Board of Directors reviews the company's dividend and determines whether to increase, maintain or decrease the dividend for the applicable quarter. The Board evaluates the financial condition of the company and considers the economic outlook, corporate cash flow, the company's liquidity needs, and the health and stability of global credit markets to determine whether to maintain or change the quarterly dividend. On June 9, 2010, we increased the quarterly cash dividend 5 percent to 44 cents per share.

Table of Contents

Common stock repurchases Pursuant to the February 2007 Board-authorized stock repurchase program, which expires on December 31, 2011, \$3.8 billion of the \$7.5 billion authorized was spent through 2008. The stock repurchase program has been temporarily suspended since the first quarter of 2009. Basic shares outstanding as of September 30, 2010 were 635 million.

Financial Products

Operating cash flow was \$623 million through the first three quarters of 2010, compared with \$883 million for the same period a year ago. The decrease in operating cash flow was primarily related to the absence of cash proceeds from liquidated interest rate swaps. Net cash provided by investing activities was \$793 million through the third quarter of 2010, compared to \$2.96 billion for the same period in 2009. This change is primarily the result of higher additions to finance receivables and lower proceeds from the sale of finance receivables at Cat Financial, partially offset by lower intercompany lendings. Net cash used for financing activities was \$2.57 billion through the third quarter of 2010, compared to \$2.71 billion for the same period in 2009, primarily due to higher intercompany borrowings, partially offset by a \$600 million dividend payment to Caterpillar Inc. and lower debt requirements.

At the end of the third quarter of 2010, past dues were 4.88 percent, down from 5.33 percent at the end of the second quarter and 5.54 percent at the end of 2009. At the end of the third quarter of 2009, past dues were 5.79 percent. The reduction in past dues from year end is primarily due to the general improvement in global economic conditions. We expect past dues to gradually trend lower during the remainder of 2010.

Bad debt write-offs, net of recoveries, were \$78 million for the third quarter of 2010, up \$13 million from the third quarter of 2009. The increase in write-offs reflects the lingering effect the economic downturn has had on some of our customers, most notably U.S. and European customers in the housing and general construction industries. Third quarter year-to-date 2010 annualized losses were 1.03 percent of the average retail portfolio, compared to 0.90 percent for the same period in 2009, and 1.03 percent for the full-year 2009.

During the third quarter, Cat Financial's allowance for credit losses was reduced from 1.70 to 1.61 percent of net finance receivables. The reduction was the result of write-downs taken during the quarter for accounts that had been specifically identified as potential credit losses and included in the allowance account. By comparison, Cat Financial's allowance for credit losses was 1.62 percent of net finance receivables at the end of the third quarter of 2009 and 1.64 percent of net finance receivables at the end of 2009. The year-on-year allowance comparisons are impacted by new accounting guidance implemented during the first quarter of 2010 under which Cat Financial began consolidating securitized assets that had previously been off-balance sheet. On January 1, 2010, the consolidation of these assets had the impact of increasing the allowance for credit losses by \$18 million and the total allowance as a percent of net finance receivables by 6 basis points. At the end of the third quarter of 2010, the allowance for credit losses totaled \$367 million, compared with \$377 million on December 31, 2009, and \$381 million at the end of the third quarter of 2009. The decrease of \$14 million in allowance for credit losses year-over-year reflected an \$11 million decrease due to a reduction in the overall net finance receivable portfolio and a \$3 million decrease associated with the lower allowance rate.

Cat Financial continued to experience favorable liquidity conditions in all key global funding markets during the third quarter of 2010. Commercial Paper (CP) market liquidity and pricing continued to be favorable, with CP outstanding totaling \$2.3 billion at quarter-end supported by a \$5.7 billion revolving credit facility. During the third quarter of 2010, Cat Financial issued AUD 50 million and \$200 million in medium-term notes. Our third-quarter 2010 CP, term debt issuance and year-to-date portfolio cash receipts have provided sufficient liquidity for operations.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts. The more significant estimates include: residual values for leased assets, fair values for goodwill impairment tests, impairment of available-for-sale securities, warranty liability, stock-based compensation, reserves for product liability and insurance losses, postretirement benefits, post-sale discounts, credit losses and income taxes. We have incorporated many years of data into the determination of each of these estimates and we have not historically experienced significant adjustments. These assumptions are reviewed at least annually with the Audit Committee of the Board of Directors. Following are the methods and assumptions used in determining our estimates and an indication of the risks inherent in each.

Table of Contents

Residual values for leased assets The residual values for Cat Financial's leased assets, which are based upon the estimated wholesale market value of leased equipment at the time of the expiration of the lease, are based on a careful analysis of historical wholesale market sales prices, projected forward on a level trend line without consideration for inflation or possible future pricing action. At the inception of the lease, residual values are derived from consideration of the following critical factors: market size and demand, any known significant market/product trends, total expected hours of usage, machine configuration, application, location, model changes, quantities and past re-marketing experience, third-party residual guarantees and contractual customer purchase options. During the term of the leases, residual amounts are monitored. If estimated market values reflect a non-temporary impairment due to economic factors, obsolescence or other adverse circumstances, the residuals are adjusted to the lower estimated values by a charge to earnings. For equipment on operating leases, the charge is recognized through depreciation expense. For finance leases, it is recognized through a reduction of finance revenue.

Fair values for goodwill impairment tests We test goodwill for impairment annually, at the reporting unit level, and whenever events or circumstances make it likely that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell all or a portion of a reporting unit. We perform our annual goodwill impairment test as of October 1 and monitor for interim triggering events on an ongoing basis.

Goodwill is reviewed for impairment utilizing a two-step process. The first step requires us to compare the fair value of each reporting unit to the respective carrying value, which includes goodwill. If the fair value of the reporting unit exceeds its carrying value, the goodwill is not considered impaired. If the carrying value is greater than the fair value, there is an indication that an impairment may exist and the second step is required. In step two, the implied fair value of the goodwill is calculated as the excess of the fair value of a reporting unit over the fair values assigned to its assets and liabilities. If the implied fair value of goodwill is less than the carrying value of the reporting unit's goodwill, the difference is recognized as an impairment loss.

The impairment test process requires valuation of the respective reporting unit, which we primarily determine using an income approach based on a discounted five year forecasted cash flow with a year-five residual value. The residual value is computed using the constant growth method, which values the forecasted cash flows in perpetuity. The income approach is supported by a reconciliation of our calculated fair value for Caterpillar to the company's market capitalization. The assumptions about future cash flows and growth rates are based on each reporting unit's long-term forecast and are subject to review and approval by senior management. The discount rate is based on our weighted average cost of capital, which we believe approximates the rate from a market participant's perspective. The estimated fair value could be impacted by changes in market conditions, interest rates, growth rates, tax rates, costs, pricing and capital expenditures.

A prolonged economic downturn resulting in lower long-term growth rates and reduced long-term profitability may reduce the fair value of our reporting units. Industry specific events or circumstances that have a negative impact to the valuation assumptions may also reduce the fair value of our reporting units. Should such events occur and it becomes more likely than not that a reporting unit's fair value has fallen below its carrying value, we will perform an interim goodwill impairment test(s), in addition to the annual impairment test. Future impairment tests may result in a goodwill impairment, depending on the outcome of both step one and step two of the impairment review process. A goodwill impairment would be reported as a non-cash charge to earnings.

Impairment of available-for-sale securities Available-for-sale securities, primarily at Cat Insurance, are reviewed at least quarterly to identify fair values below cost which may indicate that a security is impaired and should be written down to fair value.

Edgar Filing: CATERPILLAR INC - Form 10-Q

For debt securities, once a security's fair value is below cost we utilize data gathered by investment managers, external sources and internal research to monitor the performance of the security to determine whether an other-than-temporary impairment has occurred. These reviews, which include an analysis of whether it is more likely than not that we will be required to sell the security before its anticipated recovery, consist of both quantitative and qualitative analysis and require a degree of management judgment. Securities in a loss position are monitored and assessed at least quarterly based on severity of loss and may be deemed other-than-temporarily impaired at any time. Once a security's fair value has been twenty percent or more below its original cost for six consecutive months, the security will be other-than-temporarily impaired unless there are sufficient facts and circumstances supporting otherwise.

For equity securities in a loss position, determining whether the security is other-than-temporarily impaired requires an analysis of the securities historical sector returns and volatility. This information is utilized to estimate the security's future

Table of Contents

fair value to assess whether the security has the ability to recover to its original cost over a reasonable period of time as follows:

- Historical annualized sector returns over a two-year period are analyzed to estimate the security's fair value over the next two years.
- The volatility factor for the security is applied to the sector historical returns to further estimate the fair value of the security over the next two years.

In the event the estimated future fair value is less than the original cost, qualitative factors are then considered in determining whether a security is other-than-temporarily impaired, which includes reviews of the following: significant changes in the regulatory, economic or technological environment of the investee, significant changes in the general market condition of either the geographic area or the industry in which the investee operates, and length of time and the extent to which the fair value has been less than cost. These qualitative factors are subjective and require a degree of management judgment.

Warranty liability At the time a sale is recognized, we record estimated future warranty costs. The warranty liability is determined by applying historical claim rate experience to the current field population and dealer inventory. Generally, historical claim rates are based on actual warranty experience for each product by machine model/engine size. Specific rates are developed for each product build month and are updated monthly based on actual warranty claim experience. Warranty costs may differ from those estimated if actual claim rates are higher or lower than our historical rates.

Stock-based compensation We use a lattice-based option-pricing model to calculate the fair value of our stock options and SARs. The calculation of the fair value of the awards using the lattice-based option-pricing model is affected by our stock price on the date of grant as well as assumptions regarding the following:

- Volatility is a measure of the amount by which the stock price is expected to fluctuate each year during the expected term of the award and is based on historical and current implied volatilities from traded options on Caterpillar stock. The implied volatilities from traded options are impacted by changes in market conditions. An increase in the volatility would result in an increase in our expense.
- The expected term represents the period of time that awards granted are expected to be outstanding and is an output of the lattice-based option-pricing model. In determining the expected term of the award, future exercise and forfeiture patterns are estimated from Caterpillar employee historical exercise behavior. These patterns are also affected by the vesting conditions of the award. Changes in the future exercise behavior of employees or in the vesting period of the award could result in a change in the expected term. An increase in the expected term would result in an increase in our expense.
- The weighted-average dividend yield is based on Caterpillar's historical dividend yields. As holders of stock-based awards do not receive dividend payments, this could result in employees retaining the award for a longer period of time if dividend yields decrease or exercising the award sooner if dividend yields increase. A decrease in the dividend yield would result in an increase in our expense.
- The risk-free interest rate is based on the U.S. Treasury yield curve in effect at time of grant. As the risk-free interest rate increases, the expected term increases, resulting in an increase in our expense.

The fair value of our RSUs is determined by reducing the stock price on the date of grant by the present value of the estimated dividends to be paid during the vesting period. The estimated dividends are based on Caterpillar's weighted-average dividend yields. A decrease in the dividend yield would result in an increase in our expense.

Stock-based compensation expense recognized during the period is based on the value of the number of awards that are expected to vest. In determining the stock-based compensation expense to be recognized, a forfeiture rate is applied to the fair value of the award. This rate represents the number of awards that are expected to be forfeited prior to vesting and is based on Caterpillar employee historical behavior. Changes in the future behavior of employees could impact this rate. A decrease in this rate would result in an increase in our expense.

Product liability and insurance loss reserve We determine these reserves based upon reported claims in process of settlement and actuarial estimates for losses incurred but not reported. Loss reserves, including incurred but not reported reserves, are based on estimates and ultimate settlements may vary significantly from such estimates due to increased claims frequency or severity over historical levels.

Table of Contents

Postretirement benefits Primary actuarial assumptions were determined as follows:

- The U.S. expected long-term rate of return on plan assets is based on our estimate of long-term passive returns for equities and fixed income securities weighted by the allocation of our plan assets. Based on historical performance, we increase the passive returns due to our active management of the plan assets. A similar process is used to determine the rate for our non-U.S. pension plans. This rate is impacted by changes in general market conditions, but because it represents a long-term rate, it is not significantly impacted by short-term market swings. Changes in our allocation of plan assets would also impact this rate. For example, a shift to more fixed income securities would lower the rate. A decrease in the rate would increase our expense.
- The assumed discount rate is used to discount future benefit obligations back to today's dollars. The U.S. discount rate is based on a benefit cash flow-matching approach and represents the rate at which our benefit obligations could effectively be settled as of our measurement date, December 31. The benefit cash flow-matching approach involves analyzing Caterpillar's projected cash flows against a high quality bond yield curve, calculated using a wide population of corporate Aa bonds available on the measurement date. The very highest and lowest yielding bonds (top and bottom 10 percent) are excluded from the analysis. A similar approach is used to determine the assumed discount rate for our most significant non-U.S. plans. This rate is sensitive to changes in interest rates. A decrease in the discount rate would increase our obligation and future expense.
- The expected rate of compensation increase is used to develop benefit obligations using projected pay at retirement. It represents average long-term salary increases. This rate is influenced by our long-term compensation policies. An increase in the rate would increase our obligation and expense.
- The assumed health care trend rate represents the rate at which health care costs are assumed to increase and is based on historical and expected experience. Changes in our projections of future health care costs due to general economic conditions and those specific to health care (e.g., technology driven cost changes) will impact this trend rate. An increase in the trend rate would increase our obligation and expense.

Post-sale discount reserve We provide discounts to dealers through merchandising programs. We have numerous programs that are designed to promote the sale of our products. The most common dealer programs provide a discount when the dealer sells a product to a targeted end user. The amount of accrued post-sale discounts was \$701 million and \$662 million as of September 30, 2010 and December 31, 2009 respectively. The reserve represents discounts that we expect to pay on previously sold units and is reviewed at least quarterly. The reserve is adjusted if discounts paid differ from those estimated. Historically, those adjustments have not been material.

Credit loss reserve Management's ongoing evaluation of the adequacy of the allowance for credit losses considers both impaired and unimpaired finance receivables and takes into consideration past loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay, estimated value of underlying collateral and current economic conditions. In estimating probable losses we review accounts that are past due, non-performing, in bankruptcy or otherwise identified as at risk for potential credit loss including accounts which have been modified. Accounts are identified as at risk for potential credit loss using information available about the customer, such as financial statements, news reports and published credit ratings as well as general information regarding industry trends and the general economic environment.

The allowance for credit losses attributable to specific accounts is based on the most probable source of repayment, which is normally the liquidation of collateral. In determining collateral value we estimate current fair value of collateral and factor in credit enhancements such as additional collateral and third-party guarantees. The allowance for credit losses attributable to the remaining accounts is a general allowance based upon the risk in the portfolio, primarily using probabilities of default and an estimate of associated losses. In addition, qualitative factors

Edgar Filing: CATERPILLAR INC - Form 10-Q

not able to be fully captured in previous analysis including industry trends, macroeconomic factors and model imprecision are considered in the evaluation of the adequacy of the allowance for credit losses. These qualitative factors are subjective and require a degree of management judgment.

While management believes it has exercised prudent judgment and applied reasonable assumptions, there can be no assurance that in the future, changes in economic conditions or other factors would not cause changes in the financial health of our customers. If the financial health of our customer deteriorates, the timing and level of payments received could be impacted and therefore, could result in a change to our estimated losses.

Table of Contents

Income tax reserve We are subject to the income tax laws of the many jurisdictions in which we operate. These tax laws are complex, and the manner in which they apply to our facts is sometimes open to interpretation. In establishing the provision for income taxes, we must make judgments about the application of these inherently complex tax laws.

Despite our belief that our tax return positions are consistent with applicable tax laws, we believe that taxing authorities could challenge certain positions. Settlement of any challenge can result in no change, a complete disallowance, or some partial adjustment reached through negotiations or litigation. We record tax benefits for uncertain tax positions based upon management's evaluation of the information available at the reporting date. To be recognized in the financial statements, a tax benefit must be at least more likely than not of being sustained based on technical merits. The benefit for positions meeting the recognition threshold is measured as the largest benefit more likely than not of being realized upon ultimate settlement with a taxing authority that has full knowledge of all relevant information. Significant judgment is required in making these determinations and adjustments to unrecognized tax benefits may be necessary to reflect actual taxes payable upon settlement. Adjustments related to positions impacting the effective tax rate affect the provision for income taxes. Adjustments related to positions impacting the timing of deductions impact deferred tax assets and liabilities.

Our income tax positions and analysis are based on currently enacted tax law. Future changes in tax law could significantly impact the provision for income taxes, the amount of taxes payable, and the deferred tax asset and liability balances. Deferred tax assets generally represent tax benefits for tax deductions or credits available in future tax returns. Certain estimates and assumptions are required to determine whether it is more likely than not that all or some portion of the benefit of a deferred tax asset will not be realized. In making this assessment, management analyzes and estimates the impact of future taxable income, reversing temporary differences and available prudent and feasible tax planning strategies. Should a change in facts or circumstances lead to a change in judgment about the ultimate realizability of a deferred tax asset, we record or adjust the related valuation allowance in the period that the change in facts and circumstances occurs, along with a corresponding increase or decrease in the provision for income taxes.

A provision for U.S. income taxes has not been recorded on undistributed profits of our non-U.S. subsidiaries that we have determined to be indefinitely reinvested outside the U.S. If management intentions or U.S. tax law changes in the future, there may be a significant negative impact on the provision for income taxes in the period the change occurs.

EMPLOYMENT

Caterpillar's worldwide employment was 102,336 at the end of the third quarter of 2010. Year to date we have added about 6,200 full-time employees primarily due to increases in production and additionally about 2,300 from our acquisition of EMD.

In addition to the increase in full-time employees, our flexible workforce, made up of agency workers and part-time and temporary Caterpillar employees, has increased by about 9,000 people so far this year.

OTHER MATTERS

Environmental and Legal Matters

The company is regulated by federal, state and international environmental laws governing our use, transport and disposal of substances and control of emissions. In addition to governing our manufacturing and other operations, these laws often impact the development of our products, including, but not limited to, required compliance with air emissions standards applicable to internal combustion engines. Compliance with these existing laws has not had a material impact on our capital expenditures, earnings or global competitive position.

We are engaged in remedial activities at a number of locations, often with other companies, pursuant to federal and state laws. When it is probable we will pay remedial costs at a site and those costs can be reasonably estimated, the costs are charged against our earnings. In formulating that estimate, we do not consider amounts expected to be recovered from insurance companies or others. The amount recorded for environmental remediation is not material and is included in Accrued expenses in the Consolidated Statement of Financial Position.

We cannot reasonably estimate costs at sites in the very early stages of remediation. Currently, we have a few sites in the very early stages of remediation, and there is no more than a remote chance that a material amount for remedial activities at any individual site, or at all sites in the aggregate, will be required.

Table of Contents

We have disclosed certain individual legal proceedings in this filing. Additionally, we are involved in other unresolved legal actions that arise in the normal course of business. The most prevalent of these unresolved actions involve disputes related to product design, manufacture and performance liability (including claimed asbestos and welding fumes exposure), contracts, employment issues, environmental matters or intellectual property rights. Although it is not possible to predict with certainty the outcome of these unresolved legal actions, we believe that these actions will not individually or in the aggregate have a material adverse effect on our consolidated results of operations, financial position or liquidity.

On May 14, 2007, the U.S. Environmental Protection Agency (EPA) issued a Notice of Violation to Caterpillar Inc., alleging various violations of Clean Air Act Sections 203, 206 and 207. EPA claims that Caterpillar violated such sections by shipping engines and catalytic converter after-treatment devices separately, introducing into commerce a number of uncertified and/or misbuilt engines, and failing to timely report emissions-related defects. Caterpillar is currently engaged in negotiations with EPA and the U.S. Department of Justice to resolve these issues. On July 9, 2010, the Department of Justice issued a penalty demand to Caterpillar seeking a civil penalty of \$3.2 million and implementation of injunctive relief involving expanded use of certain technologies. Caterpillar continues to cooperate with EPA and the Department of Justice and, while penalties will likely exceed \$100,000, management does not believe that this issue will have a material adverse impact on our consolidated results of operations, financial position or liquidity.

On February 8, 2009, an incident at Caterpillar's Joliet, Illinois facility resulted in the release of approximately 3,000 gallons of wastewater into the Des Plaines River. In coordination with state and federal authorities, appropriate remediation measures have been taken. On February 23, 2009, the Illinois Attorney General filed a Complaint in Will County Circuit Court containing seven counts of violations of state environmental laws and regulations. Caterpillar recently settled this matter with the State of Illinois, resolving all allegations in the Complaint. This settlement does not have a material adverse impact on our consolidated results of operations, financial position or liquidity. In addition, on March 5, 2009, the EPA served Caterpillar with a Notice of Intent to file a Civil Administrative Action (notice), indicating the EPA's intent to seek civil penalties for alleged violations of the Clean Water Act and Oil Pollution Act. On January 25, 2010, the EPA issued a revised notice seeking civil penalties in the amount of \$167,800, and Caterpillar responded to the revised notice and is engaged in follow up discussions with the EPA. At this time, we do not believe this remaining proceeding will have a material adverse impact on our consolidated results of operations, financial position or liquidity.

Retirement Benefits

We recognized pension expense of \$194 million and \$504 million for the three and nine months ended September 30, 2010, as compared to \$111 million and \$480 million for the three and nine months ended September 30, 2009. The increase in expense for the three months ended September 30, 2010 was primarily the result of increased amortization of net actuarial losses due to significant asset losses in 2008 and lower discount rates at the end of 2009 and \$28 million of curtailment costs due to a U.S. plan change (discussed below). The increase in expense for the nine months ended September 30, 2010 was primarily the result of increased amortization of net actuarial losses due to significant asset losses in 2008, lower discount rates at the end of 2009 and \$28 million of curtailment costs due to a U.S. plan change (discussed below), partially offset by \$139 million of curtailment, settlement and special termination benefit costs due to voluntary and involuntary separation programs (discussed below) recognized in 2009. Accounting guidance on retirement benefits requires companies to discount future benefit obligations back to today's dollars using a discount rate that is based on high-quality fixed-income investments. A decrease in the discount rate increases the pension benefit obligation, while an increase in the discount rate decreases the pension benefit obligation. This increase or decrease in the pension benefit obligation is recognized in Accumulated other comprehensive income (loss) and subsequently amortized into earnings as an actuarial gain or loss. The guidance also requires companies to use an expected long-term rate of asset return for computing current year pension expense. Differences between the actual and expected returns are also recognized in Accumulated other comprehensive income (loss) and subsequently amortized into earnings as actuarial gains and losses. As of September 30, 2010, total actuarial losses, recognized in Accumulated other comprehensive income (loss), related to pensions were \$7.39 billion. The actuarial losses are primarily the result of significant asset losses during 2008, several years of declining discount rates and losses resulting from other demographic and economic assumptions over the past several years.

Other postretirement benefit expense was \$50 million and \$149 million for the three and nine months ended September 30, 2010, as compared to \$50 million and \$230 million for the three and nine months ended September 30, 2009. The decrease in expense for the nine months ended September 30, 2010 is due to curtailment losses of \$62 million recognized in 2009 as a result of employee separation programs (discussed below) and the impact of amendments to our U.S. support and management other postretirement benefit plan (discussed below) on 2010 expense. Actuarial losses, recognized in Accumulated other comprehensive income (loss), for other postretirement benefit plans were \$634 million at September 30, 2010. These losses mainly reflect several years of declining discount rates and significant asset losses during 2008, partially offset by gains from lower than expected health care costs.

Table of Contents

Actuarial losses for both pensions and other postretirement benefits will be impacted in future periods by actual asset returns, actual health care inflation, discount rate changes, actual demographic experience and other factors that impact these expenses. These losses, reported in Accumulated other comprehensive income (loss), will be amortized as a component of net periodic benefit cost on a straight-line basis over the average remaining service period of active employees expected to receive benefits under the benefit plans. At the end of 2009, the average remaining service period of active employees was 11 years for our U.S. pension plans, 11 years for our non-U.S. pension plans and 7 years for other postretirement benefit plans.

First quarter 2009 voluntary and involuntary separation programs impacted employees participating in U.S. and non-U.S. pension and other postretirement benefit plans. Due to the significance of these events, certain plans were re-measured as of January 31 and March 31, 2009. Re-measurements for U.S. separation programs resulted in curtailment losses of \$124 million to pension and \$61 million to other postretirement benefit plans. Special termination benefits of \$6 million were also recognized for a U.S. pension early retirement program. Re-measurements for non-U.S. separation programs resulted in settlement losses of \$9 million to pension and curtailment losses of \$1 million to other postretirement benefit plans.

In March 2009, we amended our U.S. support and management other postretirement benefit plan. Beginning in 2010, certain retirees age 65 and older enrolled in individual health plans that work with Medicare and will no longer participate in a Caterpillar-sponsored group health plan. Instead, the retirees are in individual health plans that work with Medicare, such as Medicare Advantage and Medicare Supplement plans. In addition, Caterpillar began funding a tax-advantaged Health Reimbursement Arrangement (HRA) to assist the retirees with medical expenses. The plan amendment required a plan re-measurement as of March 31, 2009, which resulted in a decrease in our Liability for postretirement benefits of \$432 million and an increase in Accumulated other comprehensive income (loss) of \$272 million net of tax. The plan was further amended in December 2009 to define the HRA benefit that active employees will receive once they are retired and reach age 65. The plan was re-measured at year-end 2009 and the December amendment resulted in a decrease in our Liability for postretirement benefits of \$101 million and an increase in Accumulated other comprehensive income (loss) of \$64 million net of tax. These decreases will be amortized into earnings on a straight-line basis over approximately 7 years, the average remaining service period of active employees in the plan. The amendments reduced other postretirement benefits expense by approximately \$27 million and \$82 million for the three and nine months ended September 30, 2010, respectively, and reduced expense by approximately \$20 million and \$40 million for the three and nine months ended September 30, 2009, respectively.

In March 2010, the Patient Protection and Affordable Care Act (the PPACA) and the Health Care and Education Reconciliation Act of 2010 (H.R. 4872) which amends certain provisions of the PPACA were signed into law. The Medicare Part D retiree drug subsidies effectively become taxable beginning in 2013.

In August 2010, we announced changes in our U.S. support and management pension plans. Beginning January 1, 2011, retirement benefits for U.S. support and management employees will transition from defined benefit pension plans to defined contribution plans. The transition date is determined for each employee based upon age and years of service or proximity to retirement. Pension benefit accruals will freeze on either December 31, 2010 or December 31, 2019 at which time the employees will move to the new retirement benefit. This benefit will provide employees with a frozen pension benefit and a 401(k) plan that will include a matching contribution and a new annual employer contribution. The plan change required a plan re-measurement as of August 31, 2010, which resulted in an increase in our Liability for postretirement benefits of \$1.32 billion and a decrease in Accumulated other comprehensive income (loss) of \$831 million net of tax. The increase in the liability was due to a decline in the discount rate and lower than expected asset returns. Curtailment expense of \$28 million was also recognized for the three and nine months ended September 30, 2010.

Accounting guidance requires recognition of the overfunded or underfunded status of pension and other postretirement benefit plans on the balance sheet. Due to a decline in the discount rate during 2010, our funded status has been negatively impacted as the lower discount rate

Edgar Filing: CATERPILLAR INC - Form 10-Q

increases our benefit obligation. Based on discount rates (approximately 4.75 percent for our U.S. plans) and plan asset values as of September 30, 2010, we would be required to recognize an increase in our underfunded status of approximately \$1.5 billion at December 31, 2010. This would result in an increase in our Liability for postretirement benefits of approximately \$1.5 billion and a decrease in Accumulated other comprehensive income (loss) of approximately \$1.0 billion net of tax. It is difficult to predict the adjustment amount, as it is dependent on several factors including the discount rate, actual returns on plan assets and other actuarial assumptions. Final determination will only be known on the measurement date, which is December 31, 2010.

Table of Contents

We expect our total defined benefit expense to increase approximately \$210 million in 2010 as compared to 2009, excluding the impact from the 2009 curtailment, settlement and special termination benefits discussed above. This increase in expense is primarily due to increased amortization of net actuarial losses due to significant asset losses in 2008, a decrease in a discount rate during 2009 and 2010 and \$28 million of curtailment costs due to the U.S. pension amendment discussed above. This increase is partially offset by reductions in U.S. other postretirement benefit costs as a result of prior year plan amendments.

We made \$957 million of contributions to our U.S. and non-U.S. pension plans during the nine months ended September 30, 2010 and we currently anticipate additional contributions of approximately \$20 million during the remainder of the year, most of which are voluntary contributions. We believe we have adequate liquidity resources to fund both U.S. and non-U.S. plans. We made \$988 million of contributions to our U.S. and non-U.S. pension plans during the nine months ended September 30, 2009, including a voluntary contribution to our U.S. plans of 18.2 million shares (\$650 million) in Caterpillar stock, held as treasury stock.

Employee Separation Charges

In 2009, we reported employee separation charges of \$481 million in Other operating (income) expenses in the Consolidated Statement of Results of Operations related to various voluntary and involuntary separation programs. These programs were in response to a sharp decline in sales volume due to the global recession.

For the three and nine months ended September 30, 2010, we recognized employee separation charges of \$7 million and \$27 million in Other operating (income) expenses in the Consolidated Statement of Results of Operations primarily related to involuntary separations due to the streamlining of our corporate structure as announced in the second quarter.

Our accounting for separations is dependent upon how the particular program is designed. For voluntary programs, eligible separation costs are recognized at the time of employee acceptance. For involuntary programs, eligible costs are recognized when management has approved the program, the affected employees have been properly identified and the costs are estimable.

The following table summarizes the 2009 and 2010 separation activity by geographic region:

(Millions of dollars)	North America	Machinery and Engines			Asia Pacific	Financial Products ¹	Total
		Latin America	EAME				
Liability balance at December 31, 2008	\$4	\$2	\$5	\$	\$	\$11	
Increase in liability (separation charges) ²	\$323	\$15	\$102	\$31	\$10	\$481	
Reduction in liability (payments and other adjustments)	(313)	(17)	(78)	(25)	(10)	(443)	
Liability balance at December 31, 2009	\$14	\$	\$29	\$6	\$	\$49	
Increase in liability (separation charges)	\$15	\$	\$7	\$5	\$	\$27	
Reduction in liability (payments and other adjustments)	(24)		(20)	(7)		(51)	
Liability balance at September 30, 2010	\$5	\$	\$16	\$4	\$	\$25	

Edgar Filing: CATERPILLAR INC - Form 10-Q

¹Includes \$8 million for North America and \$2 million for EAME in 2009.

²Includes \$440 million for the nine months ended September 30, 2009.

The remaining liability balances as of September 30, 2010 represent costs for employees that have either not yet separated from the Company or their full severance has not yet been paid. The majority of these remaining costs are expected to be paid in 2011.

In addition to the 2009 separation charges noted above, we reported \$225 million (\$201 million for the nine months ended September 30, 2009) of costs associated with certain pension and other postretirement benefit plans, which were also recognized in Other operating (income) expenses in the Consolidated Statement of Results of Operations.

Table of Contents

Order Backlog

The dollar amount of backlog believed to be firm was approximately \$17.4 billion at September 30, 2010 and \$9.6 billion at December 31, 2009. Of the total backlog, approximately \$3.1 billion at September 30, 2010 and \$2.5 billion at December 31, 2009 was not expected to be filled in the following twelve months. The acquisition of EMD in August 2010 increased the order backlog by approximately \$1 billion. The remaining increase for third quarter compared to 2009 year end is primarily due to an increase in volume across most business units.

NON-GAAP FINANCIAL MEASURES

The following definition for Machinery and Engines is provided for non-GAAP financial measures in connection with Item 10(e) of Regulation S-K issued by the Securities and Exchange Commission. This non-GAAP financial measure has no standardized meaning prescribed by U.S. GAAP and therefore is unlikely to be comparable to the calculation of similar measures for other companies. Management does not intend this item to be considered in isolation or as a substitute for the related GAAP measure.

SUPPLEMENTAL CONSOLIDATING DATA

We are providing supplemental consolidating data for the purpose of additional analysis. The data has been grouped as follows:

Consolidated Caterpillar Inc. and its subsidiaries.

Machinery and Engines The Machinery and Engines data contained in the schedules on pages 75 to 82 are non-GAAP financial measures as defined by the Securities and Exchange Commission in Item 10(e) of Regulation S-K. This non-GAAP financial measure has no standardized meaning prescribed by U.S. GAAP, and therefore, is unlikely to be comparable with the calculation of similar measures for other companies. Management does not intend this item to be considered in isolation or as a substitute for the related GAAP measure. Caterpillar defines Machinery and Engines as it is presented in the supplemental data as Caterpillar Inc. and its subsidiaries with Financial Products accounted for on the equity basis. Machinery and Engines information relates to our design, manufacturing, marketing and parts distribution operations. Financial Products information relates to the financing to customers and dealers for the purchase and lease of Caterpillar and other equipment. The nature of these businesses is different especially with regard to the financial position and cash flow items. Caterpillar management utilizes this presentation internally to highlight these differences. We also believe this presentation will assist readers in understanding our business.

Financial Products Our finance and insurance subsidiaries, primarily Cat Financial and Cat Insurance.

Consolidating Adjustments Eliminations of transactions between Machinery and Engines and Financial Products.

Pages 75 to 82 reconcile Machinery and Engines with Financial Products on the Equity Basis to Caterpillar Inc. consolidated financial information.

1 Represents Caterpillar Inc. and its subsidiaries with Financial Products accounted for on the equity basis.

Edgar Filing: CATERPILLAR INC - Form 10-Q

- 2 Elimination of Financial Products' profit after tax due to equity method of accounting.
- 3 Elimination of non-cash adjustment for the undistributed earnings from Financial Products.
- 4 Elimination of non-cash adjustments and changes in assets and liabilities related to consolidated reporting.
- 5 Reclassification of Cat Financial's cash flow activity from investing to operating for receivables that arose from the sale of inventory.
- 6 Elimination of net proceeds and payments to/from Machinery and Engines and Financial Products.
- 7 Elimination of change in investment and common stock related to Financial Products.

Table of Contents

OUTLOOK

2010 Economic Outlook

Global industrial production continued strong growth in the third quarter, and we expect few changes in the fourth quarter. Metals prices have strengthened, with some hitting new highs for the year. Crude oil and coal prices also trended upward. We anticipate that commodity prices will remain attractive for new investment this year.

Overall, we expect the world economy will grow more than 3.5 percent in 2010 with developing economies at about 7 percent and developed economies slightly more than 2 percent.

Developed Economies

- The major developed economies – United States, Euro-zone and Japan – are recovering slowly from the worst postwar recession. Economic growth has been insufficient to offset productivity gains, and unemployment remains a serious concern.
- With unemployment high and inflation near historical lows, central banks are reluctantly considering additional stimulus. The Bank of Japan has recently announced new stimulus measures, and we expect the U.S. Federal Reserve Bank will increase liquidity in the fourth quarter. We anticipate the European Central Bank will hold its current policy through year end, although turmoil in government debt markets could result in additional government bond purchases.
- Business investment has generally fared better than consumer spending due to profit growth and the need to restore investment that was cut during the recession. We expect business investment, particularly in equipment, to continue in the fourth quarter.
- For 2010 we expect the U.S. economy to grow 2.5 percent, Europe slightly more than 1.5 percent and Japan almost 3 percent.

Developing Economies

- Industrial production has grown rapidly in 2010, and for many countries it has increased more than 10 percent. Several countries, primarily in Asia, have already exceeded pre-recession peaks.

- While robust growth has increased inflation, it is well below peaks reached before the recession in nearly all countries. We do not believe inflation is a serious threat to growth in 2010.
- Less than half of major developing countries have raised interest rates, and most rate increases were less than one percentage point and have left rates well below pre-recession peaks.
- We anticipate few changes in interest rates in the fourth quarter. Low rates, along with recoveries in exports, should result in the best year for growth in developing economies since 2007.
- Asia/Pacific economies are expected to continue as the fastest growing in the world, with growth of 8.5 percent this year. The outlook incorporates 10.5 percent growth in China, 8.5 percent in India and about 6 percent in Indonesia.
- In other regions, our outlook assumes 4.5 percent growth in both Africa/Middle East and CIS and 5.5 percent in Latin America.

2011 Preliminary Economic Outlook

We anticipate the world economy will continue its recovery in 2011, with growth exceeding 3.5 percent.

- We expect growth in the world's developed economies to be about 2.5 percent in 2011. Such growth is unlikely to be sufficient to generate significant job growth, so we expect that unemployment will persist as the dominant economic problem in developed economies.
- Bank lending in the United States and the Euro-zone generally declined throughout 2010 as a result of tight lending standards and the desire by both consumers and businesses to reduce debt. Central bank liquidity additions should enable banks to ease credit standards and increase lending. These central bank policies, coupled with continued low interest rates, should improve economic growth in 2011. Our outlook reflects 3-percent growth in the United States, almost 2 percent in Europe and 2.5 percent in Japan.
- Overall, developing economies are expected to continue to grow in 2011. Many will likely raise interest rates further but keep them well below 2008 highs. Overall, we expect growth in developing economies to be about 6.5 percent.

Table of Contents

- Asia/Pacific is likely to continue as the fastest growing region in the world with growth at about 7.5 percent. We expect growth in China to moderate in 2011 to about 9.5 percent, reflecting government efforts to reduce inflation. Growth in the other two large economies in the region, India and Indonesia, should average about 8.5 percent and 6 percent, respectively about the same as in 2010.
- Latin American countries, particularly Brazil, have been more aggressive in raising interest rates, and we expect further increases in 2011. As a result, economic growth should slow to slightly more than 4 percent, but is expected to remain favorable for our business.
- Both Africa/Middle East and CIS were somewhat slower to recover than other developing regions. Few countries raised interest rates in 2010, and some countries reduced rates in 2010. As a result, we expect growth in both regions to improve to about 5 percent.
- Demand for metals, coal, gas and oil should increase, with some upward pressure on prices. Our assumptions for average 2011 prices are \$3.50 per pound for copper, \$85 per barrel for West Texas Intermediate crude oil, \$67 per ton for Central Appalachian coal and \$5.20 per million BTUs for natural gas. These prices, as well as prices for most other commodities, will encourage companies to expand production and investment.
- Construction spending is expected to increase in developing economies to keep pace with economic growth, and construction activity in developed economies is also expected to begin to recover.

Economic Risks

- Our major concern is that central banks in developed countries will remain too cautious, either by providing too little liquidity or trying to remove it too quickly. We believe these economies are fragile and will need a long period of growth to repair damage from the severe downturn.
- High unemployment is undermining public support for open trade. If recognizable progress does not occur in reducing unemployment, governments may impose restrictions on imports that would disrupt world trade.
- Governments in several developed countries have started pursuing deep reductions in budget deficits. Those actions could disrupt economic recoveries, particularly if central banks begin tightening their policies. Not much more than a year ago, governments launched massive spending programs to help cope with their worst postwar recessions. Recoveries from those recessions are far from complete.

2010 Outlook for Sales and Revenues and Profit per Share

The outlook for sales and revenues is a range of \$41 to \$42 billion, up from the previous forecast of \$39 to \$42 billion. The increase in the midpoint of the outlook is a result of the acquisition of EMD, which added about \$500 million, continuing improvement in end-user demand and higher price realization.

Profit is expected to be in a range of \$3.80 to \$4.00 per share, with a midpoint of \$3.90. The previous outlook anticipated profit in a range of \$3.15 to \$3.85 per share with a midpoint of \$3.50 per share. The increase in the profit outlook is primarily due to the improvement in sales (excluding EMD), the continuing focus on cost management and lower taxes, partially offset by higher provisions for incentive pay, which are expected to total about \$700 million for the year.

2011 Preliminary Outlook for Sales and Revenues

Good economic growth in developing countries and weak, but continued, growth in the developed world should result in Caterpillar sales and revenues that approach \$50 billion in 2011. Key points related to our preliminary outlook for sales and revenues include:

- Demand has outpaced sales in 2010, with production and sales ramping up throughout the year. At the midpoint of the 2010 outlook, sales and revenues for the second half are expected to be about \$23 billion. That reflects an annualized run rate for the second half of 2010 near \$46 billion.
- Demand for new machines is expected to continue with strong growth in developing countries and moderate growth in the developed world.
- Demand for engines is also expected to improve, but at a slower rate than machines. Turbine sales are expected to decline slightly.
- Dealers will likely need to add to new machine and rental inventories as the overall industry improves.

Table of Contents

- The full-year impact of EMD sales is expected to add about \$1.0 billion.
- Emissions-related price increases will begin in 2011 for machines in the United States and Europe. However, price realization, excluding emissions, will be modest and will likely be less than one percent. We have announced price increases for products designed to meet EPA Tier 4 Interim emissions requirements in the United States and Stage IIIB in the European Union. The increases impact products over 130KW in the United States and between 130KW and 560KW in Europe. Price increases are a result of additional costs related to achieving these standards.

While we are implementing emissions-related price increases, the majority of our sales are not being impacted in 2011. For example, products below 130KW, all sales outside the United States and Europe and almost all of our integrated services businesses are not affected.

In 2011, emissions-related price increases will vary by product in a range from 2 to 6 percent including those products using transitional provisions. On February 11, 2010, we announced that Tier 4 Interim emissions-related increases could be as much as 12 percent for machines, and to minimize the impact on dealers and customers, the increase would be spread across product families and over multiple years.

Although we are not providing a 2011 preliminary profit outlook, we expect some cost pressure as we move into 2011. We expect increased pension and retiree medical expense primarily as a result of lower discount rates and higher research and development expense related to emissions, and we expect our effective tax rate will increase. The U.S. active finance exception for interest earned offshore expired at the end of 2009, but will have a more significant impact on our 2011 tax rate. Without extension of this legislation, we are forecasting an increase in our 2011 tax rate due to higher U.S. taxes on interest earned outside the United States.

Forward-looking Statements

Certain statements in this Form 10-Q relate to future events and expectations and, as such, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are subject to known and unknown factors that may cause actual results of Caterpillar Inc. to be different from those expressed or implied in the forward-looking statements. Words such as believe, estimate, will be, will, would, expect, anticipate, plan, project, intend, could, should or other similar words or expressions forward-looking statements. All statements other than statements of historical fact are forward-looking statements, including, without limitation, statements regarding our outlook, projections, forecasts or trend descriptions. These statements do not guarantee future performance, and Caterpillar does not undertake to update its forward-looking statements.

It is important to note that actual results of the company may differ materially from those described or implied in such forward-looking statements based on a number of factors, including, but not limited to: (i) economic volatility in the global economy generally and in capital and credit markets; (ii) Caterpillar's ability to generate cash from operations, secure external funding for operations and manage liquidity needs; (iii) adverse changes in the economic conditions of the industries or markets Caterpillar serves; (iv) government regulations or policies, including those affecting interest rates, liquidity, access to capital and government spending on infrastructure development; (v) commodity price increases and/or limited availability of raw materials and component products, including steel; (vi) compliance costs associated with environmental laws and regulations; (vii) Caterpillar's and Cat Financial's ability to maintain their respective credit ratings, material increases in either company's cost of borrowing or an inability of either company to access capital markets; (viii) financial condition and credit worthiness of

Edgar Filing: CATERPILLAR INC - Form 10-Q

Cat Financial's customers; (ix) material adverse changes in our customers' access to liquidity and capital; (x) market acceptance of Caterpillar's products and services; (xi) effects of changes in the competitive environment, which may include decreased market share, lack of acceptance of price increases, and/or negative changes to our geographic and product mix of sales; (xii) Caterpillar's ability to successfully implement Caterpillar Production System or other productivity initiatives; (xiii) international trade and investment policies, such as import quotas, capital controls or tariffs; (xiv) failure of Caterpillar or Cat Financial to comply with financial covenants in their respective credit facilities; (xv) adverse changes in sourcing practices for our dealers or original equipment manufacturers; (xvi) additional tax expense or exposure; (xvii) political and economic risks associated with our global operations, including changes in laws, regulations or government policies, currency restrictions, restrictions on repatriation of earnings, burdensome tariffs or quotas, national and international conflict, including terrorist acts and political and economic instability or civil unrest in the countries in which Caterpillar operates; (xviii) currency fluctuations, particularly increases and decreases in the U.S. dollar against other currencies; (xix) increased payment obligations under our pension plans; (xx) inability to successfully integrate and realize expected benefits from acquisitions; (xxi) significant legal proceedings, claims, lawsuits or investigations; (xxii) imposition of significant costs or restrictions due to the enactment and implementation of health care reform legislation and proposed financial regulation legislation; (xxiii) changes in accounting standards or adoption of new accounting standards; (xxiv) adverse effects of natural disasters; and (xxv) other

factors described in more detail under Item 1A. Risk Factors in Part I of our Form 10-K filed with the SEC on February 19, 2010 for the year ended December 31, 2009 and in Part II of our Form 10-Q filed with the SEC on May 3, 2010 for the quarter ended March 31, 2010. These filings are available on our website at www.cat.com/sec_filings.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The information required by this Item is incorporated by reference from Note 4 Derivative Financial Instruments and Risk Management included in Part I, Item 1 and Management's Discussion and Analysis included in Part I, Item 2 of this Form 10-Q.

Item 4. Controls and Procedures

Evaluation of disclosure controls and procedures

An evaluation was performed under the supervision and with the participation of the company's management, including the Chief Executive Officer (CEO) and Chief Financial Officer (CFO), of the effectiveness of the design and operation of the company's disclosure controls and procedures as of the end of the period covered by this quarterly report. Based on that evaluation, the company's management, including the CEO and CFO, concluded that the company's disclosure controls and procedures are effective as of the end of the period covered by this quarterly report.

Changes in internal control over financial reporting

Except for the change noted below, there has been no change in the company's internal control over financial reporting during the third quarter 2010 that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

In August 2010, we acquired 100 percent of the equity in Electro-Motive Diesel, Inc. (EMD). As part of the post-closing integration, we are engaged in refining and harmonizing the internal controls and processes of the acquired business with those of the company. Management intends to exclude the internal controls of EMD from its annual assessment of the effectiveness of the company's internal control over financial reporting (Section 404) for 2010. This exclusion is in accordance with the general guidance issued by the Securities and Exchange Commission that an assessment of a recent business combination may be omitted from management's report on internal control over financial reporting in the year of consolidation.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The information required by this Item is incorporated by reference from Note 12 included in Part I, Item 1 of this Form 10-Q.

Non-U.S. Employee Stock Purchase Plans

We have 30 employee stock purchase plans administered outside the United States for our non-U.S. employees. As of September 30, 2010 those plans had approximately 10,700 active participants in the aggregate. During the third quarter of 2010, approximately 434,000 shares of Caterpillar common stock or foreign denominated equivalents were distributed under the plans. Participants in some foreign plans have the option of receiving non-U.S. share certificates (foreign-denominated equivalents) in lieu of U.S. shares of Caterpillar common stock upon withdrawal from the plan. These equivalent certificates are tradable only on the local stock market and are included in our determination of shares outstanding.

Distributions of Caterpillar stock under the plans are exempt from registration under the Securities Act of 1933 (Act) pursuant to 17 CFR 230.903.
