INVESTMENT ADVISER NAME CHANGE

Effective January 1, 2011, Nuveen Asset Management, the Funds' investment adviser, changed its name to Nuveen Fund Advisors, Inc. ("Nuveen Fund Advisors"). Concurrently, Nuveen Fund Advisors formed a wholly-owned subsidiary, Nuveen Asset Management, LLC, to house its portfolio management capabilities.

NUVEEN INVESTMENTS COMPLETES STRATEGIC COMBINATION WITH FAF ADVISORS

On December 31, 2010, Nuveen Investments completed the strategic combination between Nuveen Asset Management, LLC, the largest investment affiliate of Nuveen Investments, and FAF Advisors. As part of this transaction, U.S. Bancorp the parent of FAF Advisors received cash consideration and a 9.5% stake in Nuveen Investments in exchange for the long term investment business of FAF Advisors, including investment-management responsibilities for the non-money market mutual funds of the First American Funds family.

The approximately \$27 billion of mutual fund and institutional assets managed by FAF Advisors, along with the investment professionals managing these assets and other key personnel, have become part of Nuveen Asset Management, LLC. With these additions to Nuveen Asset Management, LLC, this affiliate now manages more than \$100 billion of assets across a broad range of strategies from municipal and taxable fixed income to traditional and specialized equity investments.

This combination does not affect the investment objectives or strategies of the Funds in this report. Over time, Nuveen Investments expects that the combination will provide even more ways to meet the needs of investors who work with financial advisors and consultants by enhancing the multi-boutique model of Nuveen Investments, which also includes highly respected investment teams at HydePark, NWQ Investment Management, Santa Barbara Asset Management, Symphony Asset Management, Tradewinds Global Investors and Winslow Capital. Nuveen Investments managed approximately \$210 billion of assets as of June 30, 2011.

Chairman's Letter to Shareholders

Dear Shareholders,

The global economy continues to be weighed down by an unusual combination of pressures facing the larger developed economies. Japanese leaders continue to work through the economic aftereffects of the March 2011 earthquake and tsunami. Political leaders in Europe and the U.S. have resolved some of the near term fiscal problems, but the financial markets are not convinced that these leaders are able to address more complex longer term fiscal issues. Despite improved earnings and capital increases, the largest banks in these countries continue to be vulnerable to deteriorating mortgage portfolios and sovereign credit exposure, adding another source of uncertainty to the global financial system.

In the U.S., recent economic statistics indicate that the economic recovery may be losing momentum. Consumption, which represents about 70% of the gross domestic product, faces an array of challenges from seemingly intractable declines in housing values, increased energy costs and limited growth in the job market. The failure of Congress and the administration to agree on the debt ceiling increase on a timely basis and the deep divisions between the political parties over fashioning a balanced program to address growing fiscal imbalances that led to the recent S&P ratings downgrade add considerable uncertainty to the domestic economic picture.

On a more positive note, corporate earnings continue to hold up well and the municipal bond market is recovering from recent weakness as states and municipalities implement various programs to reduce their budgetary deficits. In addition, the Federal Reserve System has made it clear that it stands ready to take additional steps should the economic recovery falter. However, there are concerns that the Fed is approaching the limits of its resources to intervene in the economy.

These perplexing times highlight the importance of professional investment management. Your Nuveen investment team is working hard to develop an appropriate response to increased risk, and they continue to seek opportunities created by stressful markets using proven investment disciplines designed to help your Fund achieve its investment objectives. On your behalf, we monitor their activities to assure that they maintain their investment disciplines.

As always, I encourage you to contact your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of your Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

Robert P. Bremner Chairman of the Board August 23, 2011

Portfolio Managers' Comments

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: S&P, Moody's or Fitch. Credit ratings are subject to change. AAA, AA, A, and BBB are investment grade ratings; BB, B, CCC/CC/C and D are below-investment grade ratings. Bonds backed by U.S. Government or agency securities are given an implied rating equal to the rating of such securities. Holdings designated NR are not rated by a national rating agency.

Nuveen Quality Preferred Income Fund (JTP) Nuveen Quality Preferred Income Fund 2 (JPS) Nuveen Quality Preferred Income Fund 3 (JHP)

During the current fiscal period, the Funds' Board of Trustees approved a change in the Funds' fiscal year ends from December 31 to July 31. As a result, this annual report focuses on the seven-month period ended July 31, 2011. This change in fiscal year ends did not affect the objectives, investment strategies or portfolio management of the Funds.

The Funds are sub-advised by a team of specialists at Spectrum Asset Management, a wholly-owned subsidiary of Principal Global Investors, LLC. Mark Lieb and Phil Jacoby, who have more than 50 years of combined experience in the preferred securities markets, lead the team. Here Mark and Phil talk about their management strategy and the performance of each Fund for the seven-month period ended July 31, 2011.

What were the general market conditions for the seven-month period?

Economic growth was quite uneven over the reporting period. Early in 2011 there was widespread concern about financial contagion from several European countries and very slow growth, raising the probability of a double-dip recession in the United States. These fears seemed to be quelled as another round of quantitative easing was introduced by the Federal Reserve and consumer spending began to rebound. However, this relief was relatively short lived as renewed weakness in housing and higher food and energy prices put a damper on consumption at about the same time that supply chain disruptions from the Japanese tsunami and earthquake were distorting growth and suppressing job creation in many areas in the U.S. and around the world.

Throughout the period, the Fed continued to hold the benchmark fed funds rate in a target range of zero to 0.25% since cutting it to this record low level in December 2008. At its June 2011 meeting, the central bank downgraded growth estimates for the year while reaffirming that it anticipated keeping the fed funds rate at "exceptionally low levels" for an "extended period."

From a macro perspective, we ended the fiscal period facing many of the same uncertainties that we did as the period began. The Greek bailout had yet to be finalized and fiscal concerns had spread to other European countries such as Ireland, Portugal, Italy and Spain. At the same time, fears about slowing U.S.

economic growth bubbled to the surface again, causing consumer spending to pull back. The employment situation seemed to plateau, with the national jobless rate registering 9.1% in July 2011. Also, the overall housing market continued to show weakness, weighed down by a backlog of distressed properties on the market and falling prices. For the twelve months ended

Nuveen Investments

5

Past performance is not predictive of future results. Current performance may be higher or lower than the data shown. Returns do not reflect the deduction of taxes that shareholders may have to pay on Fund distributions or upon the sale of Fund shares.

For additional information, see the individual Performance Overview for your Fund in this report.

- * Seven month returns are cumulative. All other returns are annualized.
- 1. The Barclays Capital Aggregate Bond Index is an unmanaged index that includes all investment-grade, publicly issued, fixed-rate, dollar denominated, nonconvertible debt issues and commercial mortgage backed securities with maturities of at least one year and outstanding par values of \$150 million or more. Index returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in an index.
- 2. Comparative benchmark performance is a blended return consisting of: 1) 55% of the Merrill Lynch Core Fixed Rate Preferred Securities Index, is designed to replicate the total return of a diversified group of investment-grade preferred securities.; and 2) 45% of the Barclays Capital Tier 1 Capital Securities Index, an unmanaged index that includes securities that can generally be viewed as hybrid fixed-income securities that either receive regulatory capital treatment or a degree of "equity credit" from a rating agency. Returns do not include the effects of any sales charges or management fees. It is not possible to invest directly in this benchmark.

June 2011 (the most recent data available at the time this report was prepared), property values in the Standard & Poor's (S&P)/Case-Shiller index of 20 major metropolitan areas had fallen 4.5% from one year earlier. U.S. gross domestic product (GDP), a broad measure of the nation's economic health, was revised downward to an anemic 0.4% annual growth rate for the first quarter of 2011 and estimated to be 1.3% for the second quarter, according to the Commerce Department.

For the reporting period, preferred securities were up about 4.5%, on average, according to the broad hybrid preferred securities indices.

What was your management strategy during the period?

The investment objective of each Fund is to earn high current income consistent with capital preservation. Each Fund's secondary objective is to enhance portfolio value. Under normal market conditions, the Funds seek to invest at least 80% of their net assets in preferred securities and up to 20% in debt securities, including convertible debt securities and convertible preferred securities.

Our basic strategy is to stay relatively balanced between the individual investor-oriented \$25 par preferred securities often traded on securities exchanges and the institutional investor-oriented \$1000 par preferred securities traded over-the-counter in the capital markets. Both types of securities offer unique short term capital performance differences, which together with the broad diversification benefits of the combined universe, help to produce potentially attractive risk-adjusted rates of return.

We keep a risk-averse posture toward security structure. This is an important core aspect of our strategy, which, over the long-term, seeks to preserve capital and provide attractive income.

We also maintain approximately a 60% weighting to U.S. names and a 40% weighting to foreign names as part of the basic strategy that keeps all the Funds in a neutral position relative to the benchmark.

How did the Funds perform over this seven-month period?

The performance of JTP, JPS and JHP, as well as a comparative index and benchmark, is presented in the accompanying table.

Average Annual Returns on Common Share Net Asset Value*

For periods ended 7/31/11

	7-Month*	1-Year	5-Year
JTP	6.74%	14.00%	-1.05%
JPS	5.99%	14.28%	-0.19%
JHP	5.69%	14.61%	-0.66%
Barclays Capital Aggregate Bond			
Index ¹	4.35%	4.44%	6.57%
Comparative Benchmark ²	4.53%	9.67%	1.77%

For this seven-month period, JTP, JPS and JHP outperformed the general market and comparative benchmark indexes.

During the seven-month reporting period, we bought call protection and traded out of higher priced securities in favor of discount paper to provide more opportunity for

capital upside. We reduced our European banking concentration the first two weeks of May by reducing exposure to French banks by 50% and Spanish banks by 25% ahead of the sovereign debt turmoil that played out into mid-June. We also increased concentration in Australian property & casualty insurance companies and U.S. non-financials, which helped to preserve capital amidst declines in the European banking sector.

We remained overweight in capital securities by 7% relative to the custom benchmark in order to more fully benefit from the technical value inherent in certain hybrid securities this is in keeping with current trends underway in the hybrid preferred securities market.

Several specific holdings contributed to positive performance, including Deutsche Bank 6.55% (DXB), Aegon 6.375% (AEH), ING 7.05 (IND), XL Capital 6.50% and Centaur Funding 9.08%.

As mentioned previously, the market had two shocks to contend with during the period. The reinsurance industry paid out increased catastrophe loss payments to satisfy claims from the tsunami damage in Japan. This was coupled with the protracted European sovereign debt concerns that revalued financial risk in the foreign bank names of the region, as well as in some of the foreign insurance issues.

Several specific positions underperformed with marginally breakeven returns for the seven-month period. These included Dai-ichi Life, AXA Insurance, Credit Suisse, LBG (Lloyds) Capital and Credit Suisse.

During the period, each Fund also entered into interest rate swaps to partially fix the interest cost of leverage, which each Fund uses through the use of bank borrowings. This portion of the Funds is overseen by Nuveen Fund Advisors, Inc., an affiliate of Nuveen Investments.

IMPACT OF THE FUNDS' LEVERAGE STRATEGY ON PERFORMANCE

One important factor impacting the return of the Funds relative to the benchmarks was the Funds' use of financial leverage through the use of bank borrowings. The Funds use leverage because their managers believe that, over time, leveraging provides opportunities for additional income and total return for common shareholders. However, use of leverage also can expose common shareholders to additional volatility. For example, as the prices of securities held by a Fund decline, the negative impact of these valuation changes on common share net asset value and common shareholder total return is magnified by the use of leverage. Conversely, leverage may enhance common share returns during periods when the prices of securities held by a Fund generally are rising. Leverage made a positive contribution to the performance of these Funds over this reporting period.

RECENT DEVELOPMENTS REGARDING THE FUNDS' REDEMPTION OF AUCTION RATE PREFERRED SHARES

Shortly after their inceptions, the Funds issued auction rate preferred shares (ARPS) to create structural leverage. As noted in past shareholder reports, the weekly auctions for those ARPS shares began in February 2008 to consistently fail, causing the Funds to pay the so called "maximum rate" to ARPS shareholders under the terms of the ARPS in the

Funds' charter documents. The Funds redeemed their ARPS at par in 2009 and since then have relied upon bank borrowings to create structural leverage.

During 2010 and 2011, certain Nuveen leveraged closed-end funds (including these Funds) received a demand letter from a law firm on behalf of purported holders of common shares of each such fund, alleging that Nuveen and the funds' officers and Board of Directors/Trustees breached their fiduciary duties related to the redemption at par of the funds' ARPS. In response, the Board established an ad hoc Demand Committee consisting of certain of its disinterested and independent Board members to investigate the claims. The Demand Committee retained independent counsel to assist it in conducting an extensive investigation. Based upon its investigation, the Demand Committee found that it was not in the best interests of each fund or its shareholders to take the actions suggested in the demand letters, and recommended that the full Board reject the demands made in the demand letters. After reviewing the findings and recommendation of the Demand Committee, the full Board of each fund unanimously adopted the Demand Committee's recommendation.

Subsequently, 33 of the funds that received demand letters (including these Funds) were named in a consolidated complaint as nominal defendants in a putative shareholder derivative action captioned *Martin Safier*, *et al. v. Nuveen Asset Management*, *et al.* that was filed in the Circuit Court of Cook County, Illinois, Chancery Division (the "Cook County Chancery Court") on February 18, 2011 (the "Complaint"). The Complaint, filed on behalf of purported holders of each fund's common shares, also name Nuveen Fund Advisors, Inc. as a defendant, together with current and former Officers and interested Director/Trustees of each of the funds (together with the nominal defendants, collectively, the "Defendants"). The Complaint contains the same basic allegations contained in the demand letters. The suits seek a declaration that the Defendants have breached their fiduciary duties, an order directing the Defendants not to redeem any ARPS at their liquidation value using fund assets, indeterminate monetary damages in favor of the funds and an award of plaintiffs' costs and disbursements in pursuing the action. The funds and other Defendants have filed a motion to dismiss the suit, which is still pending before the court. Nuveen Fund Advisors, Inc. believes that the Complaint is without merit, and is defending vigorously against these charges.

Regulatory Matters

During May 2011, Nuveen Securities, LLC, known as Nuveen Investments, LLC, prior to April 30, 2011, entered into a settlement with the Financial Industry Regulatory Authority (FINRA) with respect to certain allegations regarding Nuveen-sponsored closed-end fund ARPS marketing brochures. As part of this settlement, Nuveen Securities, LLC neither admitted to nor denied FINRA's allegations. Nuveen Securities, LLC is the broker-dealer subsidiary of Nuveen Investments.

The settlement with FINRA concludes an investigation that followed the widespread failure of auctions for ARPS and other auction rate securities, which generally began in mid-February 2008. In the settlement, FINRA alleged that certain marketing materials provided by Nuveen Securities, LLC were false and misleading. Nuveen Securities, LLC agreed to a censure and the payment of a \$3 million fine.

RISK CONSIDERATIONS

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

Investment Risk. The possible loss of the entire principal amount that you invest.

Price Risk. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your common shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

Leverage Risk. Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful.

Tax Risk. The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations. This is particularly true for funds employing a managed distribution program.

Issuer Credit Risk. This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

Interest Rate Risk. Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

Reinvestment Risk. If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

Preferred Stock Risk. Preferred stocks are subordinated to bonds and other debt instruments in a company's capital structure, and therefore are subject to greater credit risk.

Call Risk or Prepayment Risk. Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

Non-U.S. Securities Risk. Investments in non-U.S securities involve special risks not typically associated with domestic investments including currency risk and adverse political, social and economic development. These risks often are magnified in emerging markets.

Common Share Distribution and Share Price Information

The following information regarding your Fund's distributions is current as of July 31, 2011, and likely will vary over time based on each Fund's investment activities and portfolio investment value changes.

During the seven-month reporting period, the Funds did not make any changes to their monthly distributions to common shareholders. Some of the important factors affecting the amount and composition of these distributions are summarized below.

The Funds employ financial leverage through the use of bank borrowings. Financial leverage provides the potential for higher earnings (net investment income), total returns and distributions over time, but as noted earlier also increases the variability of common shareholders' net asset value (NAV) per share in response to changing market conditions.

During certain periods, the Funds may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Funds during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of earnings, the excess constitutes negative UNII that is likewise reflected in a Funds' NAV. As of July 31, 2011, all three Funds had positive UNII balances for tax purposes. JTP and JPS had positive UNII balances and JHP had a negative UNII balance for financial reporting purposes.

Common Share Repurchases and Shares Price Information

As of July 31, 2011, and since the inception of the Funds' repurchase program, the Funds have not repurchased any of their outstanding common shares.

At July 31, 2011, the Funds' common share prices were trading at (-) discounts to their common share NAVs as shown in the accompanying table.

Fund	7/31/11 (-) Discount	Seven-Month Average (-) Discount
	* *	` '
JTP	(-)8.61%	(-)7.42%
JPS	(-)7.98%	(-)7.42%

Report of INDEPENDENT REGISTERED

PUBLIC ACCOUNTING FIRM

The Board of Trustees and Shareholders Nuveen Quality Preferred Income Fund Nuveen Quality Preferred Income Fund 2 Nuveen Quality Preferred Income Fund 3

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Quality Preferred Income Fund, Nuveen Quality Preferred Income Fund 2, and Nuveen Quality Preferred Income Fund 3 (the "Funds") as of July 31, 2011, and the related statements of operations, changes in net assets, cash flows, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We are not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of July 31, 2011, by correspondence with the custodian, brokers and counterparty. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Quality Preferred Income Fund, Nuveen Quality Preferred Income Fund 3 at July 31, 2011, and the results of their operations, the changes in their net assets, their cash flows, and the financial highlights for each of the periods indicated therein in conformity with U.S. generally accepted accounting principles.

* Annualized.

For Fund portfolio compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications into sectors for reporting ease.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investor Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
 - (3) Non-income producing; issuer has not declared a dividend within the past twelve months.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in derivatives.
 - (5) Borrowings as a percentage of Total Investments is 22.5%.
- (6) The Fund may pledge up to 100% of its eligible investments in the Portfolio of Investments as collateral for Borrowings. As of July 31, 2011, investments with a value of \$352,044,169 have been pledged as collateral for Borrowings.
- (7) Other Assets Less Liabilities includes the Value and/or the Unrealized Appreciation (Depreciation) of derivative instruments as noted within Investments in Derivatives.

N/R Not rated.

144A Investment is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. These investments may only be resold in transactions exempt from registration, which are normally those transactions with qualified institutional buyers.
