NEWS RELEASE

November 18, 2003

### IMA Prepares For Drilling On Its 100% Owned Navidad Project, Patagonia, Argentina

IMA Exploration Inc. (IMR:TSX-V) is pleased to announce all required permits for drilling have been received by the Company and a drill contract has been awarded to Connors Argentina, S.A. Construction of drill pads and improvement of trails to allow access for drilling equipment is now underway and is expected to be completed shortly. The upcoming two-phase 6,000 metre diamond drill program is to begin immediately after site preparation is completed.

The drill program will focus on the three distinct (yet related) styles of mineralization that have been defined at the Navidad project. Individually, each style of mineralization could develop into a significant resource; combined, the three styles of mineralization demonstrate the overall size and grade potential of the entire Navidad system. Phase I drilling will initially target the bonanza grade silver-copper-lead mineralization on Navidad Hill and Galena Hill. (see September 3, 2003 news release for overview of results to date)

The Navidad discovery is the culmination of several years of ongoing generative exploration programs that IMA has been conducting throughout Argentina, including the Patagonia region. IMA acquired the project by staking and holds a 100% interest with no underlying royalties. Dr. Paul Lhotka, P.Geo. will act as the Company's independent "Qualified Person" on the Navidad Project.

IMA Exploration Inc. has over \$4,000,000 in its treasury to fund its exploration objectives. The Company focuses on quality exploration work designed to define economic gold and silver deposits in Argentina and Peru. IMA has put together an enviable property portfolio including over 37 well-located, high-potential projects and is continuing to add to this package through grass-roots exploration and staking.
