NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

Seacoast Banking Corporation of Florida and Subsidiaries

NOTE A — BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with U. S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U. S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the nine-month period ended September 30, 2015, are not necessarily indicative of the results that may be expected for the year ending December 31, 2015 or any other period. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended December 31, 2014.

Use of Estimates

The preparation of these condensed consolidated financial statements required the use of certain estimates by management in determining the Company's assets, liabilities, revenues and expenses. Actual results could differ from those estimates.

Specific areas, among others, requiring the application of management's estimates include determination of the allowance for loan losses, the valuation of investment securities available for sale, fair value of impaired loans, contingent liabilities, fair value of other real estate owned, and the valuation of deferred tax assets. Actual results could differ from those estimates.

NOTE B — RECENTLY ISSUED ACCOUNTING STANDARDS, Not adopted as of September 30, 2015

The Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2014-09. The ASU is a converged standard between the FASB and the IASB that provides a single comprehensive revenue recognition model for all contracts with customers across transactions and industries. The primary objective of the ASU is revenue recognition that represents the transfer of promised goods or services to customers in an amount that

reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The ASU is effective on January 1, 2018, with early adoption permitted January 1, 2017. The Company is currently assessing the impact of adoption of ASU 2014-09.

In February 2015, the FASB issued ASU 2015-02. The amendments in this update modify the requirements of consolidation with respect to entities that are or are similar in nature to limited partnerships or are variable interest entities (VIEs). For entities that are or are similar to limited partnerships, the guidance clarifies the evaluation of kick-out rights, removes the presumption that the general partner will consolidate and generally states that such entities will be presumed to be VIEs unless proven otherwise. For VIEs, the guidance modifies the analysis related to the evaluation of servicing fees, excludes servicing fees that are deemed commensurate with the level of service required from the determination of the primary beneficiary and clarifies certain considerations related to the consolidation analysis when performing a related party assessment. The amendments are effective for us on January 1, 2016, with early adoption permitted. The amendments can be applied either through a full retrospective application or on a modified retrospective basis with a cumulative effect adjustment on the date of initial adoption. Management is assessing the impact of the adoption of this guidance.

In April 2015, the FASB issued ASU 2015-03. The amendments in this update require that debt issuance costs be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. Currently debt issuance costs are presented as a deferred charge and are therefore presented as an asset. The recognition and measurement requirements will not change as a result of this guidance. The amendments are effective for us on January 1, 2016, with early adoption permitted. The amendments must be applied with retrospective application, with each balance sheet period presented showing the impacts of applying the guidance. As the guidance only impacts the balance sheet location of the debt discount, the guidance is not expected to have a material impact to our consolidated financial condition or results of operations.

In September 2015, the FASB issued new guidance related to Business Combinations under ASC 805. The ASU requires acquirers to recognize adjustments to provisional amounts (identified during the measurement period) in the reporting period in which the adjustment amounts are determined. The ASU requires such amounts to be disclosed in the consolidated financial statements. The guidance is effective for years beginning after December 15, 2015, and interim periods within those fiscal years. The guidance is not expected to have a material impact to our consolidated financial condition or results of operation.

NOTE C — BASIC AND DILUTED EARNINGS (LOSS) PER COMMON SHARE

For each three month period ended September 30, 2015 and 2014, options to purchase 282,000 shares and 496,000 shares, respectively, were antidilutive and accordingly were excluded in determining diluted earnings per share.

(Dollars in thousands, except per share data)	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
Basic:

	\$746,390	\$ 4,388	\$ (9,403)	\$741,375
SECURITIES HELD FOR INVESTMENT				
Mortgage-backed securities of U.S. Government Sponsored Entities	\$67,535	\$ 812	\$ 0	\$68,347
Collateralized mortgage obligations of U.S. Government Sponsored Entities	114,541	695	(280)	114,956
Collateralized loan obligations	25,828	0	(343)	25,485
	\$207,904	\$ 1,507	\$ (623)	\$208,788

Proceeds from sales of securities during the nine month period ended September 30, 2015 were \$60.3 million, with gross gains of \$632,000 and gross losses of \$472,000. Proceeds from sales of securities during the nine month period ended September 30, 2014 were \$16.4 million with gross gains of \$361,000 and no gross losses.

On May 31, 2014 management identified \$158.8 million of investment securities available for sale and transferred them into held for investment. The unrealized holding losses at the date of transfer totaled \$3.1 million. For those securities that were transferred into the held for investment category from the available for sale category, the unrealized holding losses at the date of the transfer will continue to be reported in other comprehensive income, and will be amortized over the remaining life of the security as an adjustment of yield in a manner consistent with the amortization of a discount. The amortization of unrealized holding losses reported in equity will offset the effect on interest income of the amortization of the discount. As of September 30, 2015, the remaining unrealized holding losses totaled \$2.4 million.

Securities at September 30, 2015 with a carrying and fair value of \$125.0 million and \$124.3 million, respectively, were pledged as collateral for other public and trust deposits. Securities with a carrying value and fair value of \$148.6 were pledged as collateral for repurchase agreements.

The amortized cost and fair value of securities at September 30, 2015, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because prepayments of the underlying collateral for these securities may occur, due to the right to call or repay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Held for Investment		Available for Sale	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in less than one year	\$0	\$0	\$225	\$225
Due after one year through five years	0	0	42,560	42,307
Due after five years through ten years	41,300	40,946	106,746	106,247
Due after ten years	0	0	11,042	11,634
Mortgage-backed securities of U.S. Government Sponsored Entities	41,300	40,946	160,573	160,413
Collateralized mortgage obligations of U.S. Government Sponsored Entities	65,787	67,913	117,458	118,492
Private mortgage backed securities	93,646	95,271	257,486	255,907
Private collateralized mortgage obligations	0	0	32,494	32,216
Corporate and other debt securities	8,314	8,232	82,183	82,188
Private commercial mortgage backed securities	0	0	40,015	39,918
	0	0	39,256	39,027
	\$209,047	\$212,362	\$729,465	\$728,161

The estimated fair value of a security is determined based on market quotations when available or, if not available, by using quoted market prices for similar securities, pricing models or discounted cash flows analyses, using observable market data where available. The tables below indicate the amount of securities with unrealized losses and period of time for which these losses were outstanding at September 30, 2015 and December 31, 2014, respectively.

(Dollars in thousands)	September 30, 2015					
	Less than 12 months		12 months or longer		Total

The two tables above include securities held to maturity that were transferred from available for sale to held to maturity on May 31, 2014. Those securities had unrealized losses of \$3.1 million at the date of transfer. The fair value of those securities in an unrealized loss position for less than 12 months at September 30, 2015 and December 31, 2014 is \$10.3 million and \$11.6 million, respectively. The unrealized losses on those securities in an unrealized loss position for less than 12 months at September 30, 2015 and December 31, 2014 is \$27,000 and \$159,000, respectively. None of these securities were in an unrealized loss position for more than twelve months at September 30, 2015 and December 31, 2014, respectively.

At September 30, 2015, approximately \$1.4 million of the unrealized losses pertain to private label securities secured by collateral originated in 2005 and prior. Their fair value is \$105.7 million and is attributable to a combination of factors, including relative changes in interest rates since the time of purchase. The collateral underlying these mortgage investments are 30- and 15-year fixed and 10/1 adjustable rate mortgage loans with low loan to values and subordination. Based on its assessment of these securities, management believes that the unrealized losses on these debt security holdings are a function of changes in investment spreads and interest rate movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities.

At September 30, 2015, the Company also had \$3.0 million of unrealized losses on collateralized mortgage obligations and mortgage backed securities of government sponsored entities having a fair value of \$229.1 million that were attributable to a combination of factors, including relative changes in interest rates since the time of purchase. The contractual cash flows for these securities are guaranteed by U.S. government agencies and U.S. government-sponsored enterprises. Based on its assessment of these factors, management believes that the unrealized losses on these debt security holdings are a function of changes in investment spreads and interest movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities.

At September 30, 2015, the Company also had \$1.5 million of unrealized losses on collateralized loan obligations having a fair value of \$134.6 million that were attributable to a combination of factors, including relative changes in interest rates since the time of purchase. Management believes that the unrealized losses on these debt security holdings are a function of changes in investment spreads and interest movements and not changes in credit quality. Management expects to recover the entire amortized cost basis of these securities.

Also, as of September 30, 2015, management does not intend to sell securities that are in unrealized loss positions and it is not more likely than not that the Company will be required to sell these securities before recovery of the amortized cost basis. Therefore, management does not consider any investment to be other-than-temporarily impaired at September 30, 2015.

NOTE E — LOANS

Information relating to portfolio loans, purchased credit impaired (PCI), and purchased unimpaired loans (PUL) is summarized as follows:

September 30, 2015	Portfolio Loans	PCI Loans	PUL's	Total
	(Dollars in thousands)			
Construction and land development	\$80,406	\$ 462	\$15,168	\$96,036
Commercial real estate	737,506	10,071	243,610	991,187

Other loans	512	0	0	512
NET LOAN BALANCES (1)	\$1,488,005	\$ 7,814	\$326,066	\$1,821,885

(1) Net loan balances as of September 30, 2015 and December 31, 2014 are net of deferred costs of \$6.6 million and \$3.6 million for each period, respectively.

Purchased Loans - PCI loans are accounted for pursuant to ASC Topic 310-30. The excess of cash flows expected to be collected over the estimated fair value is referred to as the accretable yield and is recognized in interest income over the remaining life of the loan in situations where there is a reasonable expectation about the timing and amount of cash flows expected to be collected. The difference between the contractually required payments and the cash flows expected to be collected, considering the impact of prepayments, is referred to as the nonaccretable difference.

We have applied ASC Topic 310-20 accounting treatment to PULs. The unamortized fair value mark established at acquisition on the loans has been ascribed as an accretable yield that is accreted into interest income over the estimated remaining life of the loans.

The table below summarizes the changes in total contractually required principal and interest cash payments, management's estimate of expected total cash payments and carrying value of PCI loans during the three and nine month periods ending September 30, 2015. Contractually required principal and interest payments have been adjusted for estimated prepayments.

The Company utilizes an internal asset classification system as a means of reporting problem and potential problem loans. Under the Company's risk rating system, the Company classifies problem and potential problem loans as "Special Mention," "Substandard," and "Doubtful" and these loans are monitored on an ongoing basis. Substandard loans include those characterized by the distinct possibility that the Company will sustain some loss if the deficiencies are not corrected. Loans classified as Doubtful, have all the weaknesses inherent in those classified Substandard with the added characteristic that the weaknesses present make collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The principal balance of loans classified as doubtful are generally charged off. Loans that do not currently expose the Company to sufficient risk to warrant classification in one of the aforementioned categories, but possess weaknesses that deserve management's close attention are deemed to be Special Mention. Risk ratings are updated any time the situation warrants.

Loans not meeting the criteria above are considered to be pass-rated loans and risk grades are recalculated at least annually by the loan relationship manager. The following tables present the risk category of loans by class of loans based on the most recent analysis performed as of September 30, 2015 and December 31, 2014:

September 30, 2015

NOTE F — IMPAIRED LOANS AND ALLOWANCE FOR LOAN LOSSES

During the nine months ending September 30, 2015 and 2014, newly identified troubled debt restructurings (“TDRs”) totaled \$2.2 million and \$5.4 million, respectively. Loans that are modified, but where full collection under the modified terms is doubtful are classified as nonaccrual loans from the date of modification.

The Company’s TDR concessions granted generally do not include forgiveness of principal balances. Loan modifications are not reported in calendar years after modification if the loans were modified at an interest rate equal to the yields of new loan originations with comparable risk and the loans are performing based on the terms of the

restructuring agreements.

When a loan is modified as a TDR, there is not a direct, material impact on the loans within the Consolidated Balance Sheet, as principal balances are generally not forgiven. Most loans prior to modification were classified as an impaired loan and the allowance for loan losses is determined in accordance with Company policy.

The following table presents loans that were modified within the nine months ending September 30, 2015:

Nine months ended September 30, 2015

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment	Specific Reserve Recorded	Valuation Allowance Recorded
(Dollars in thousands)					
Residential real estate	1	\$ 26	\$ 25	\$ 0	\$ 1
Commercial real estate	3	1,881	1,787	0	94
Consumer	1	48	45	0	3
	5	\$ 1,955	\$ 1,857	\$ 0	\$ 98

The following table presents loans that were modified within the nine months ending September 30, 2014:

Nine months ended September 30, 2014

	Number of Contracts	Pre- Modification Outstanding Recorded Investment	Post- Modification Outstanding Recorded Investment	Specific Reserve Recorded	Valuation Allowance Recorded
(Dollars in thousands)					
Residential real estate	5	\$ 669	\$ 621	\$ 0	\$ 48
Commercial real estate	1	4,300	3,975	0	325
	6	\$ 4,969	\$ 4,596	\$ 0	\$ 373

Only 1 contract with a pre-modification and post-modification outstanding recorded investment of \$1.0 million and \$0.9 million, respectively, were modified during the three month period ended September 30, 2015, compared to 2 contracts with a pre-modification and post-modification outstanding recorded investment that was nominal for each, respectively, for the three month period ended September 30, 2014.

No accruing loans that were restructured within the twelve months preceding September 30, 2015 and September 30, 2014, defaulted during the nine months ended September 30, 2015 and 2014, respectively. The Company considers a loan to have defaulted when it becomes 60 days or more delinquent under the modified terms, has been transferred to nonaccrual status, or has been transferred to other real estate owned. A defaulted TDR is generally placed on nonaccrual and specific allowance for loan loss is assigned in accordance with the Company's policy.

As of September 30, 2015 and December 31, 2014, the Company's recorded investment in impaired loans and the related valuation allowance were as follows:

(Dollars in thousands)	September 30, 2015

Commercial real estate	7,312	223	10,502	485
Residential real estate	15,658	270	21,518	370
Commercial and financial	0	0	61	0
Consumer	507	17	543	18
Total:				
Construction & land development	2,544	46	3,404	98
Commercial real estate	10,324	236	13,120	495
Residential real estate	26,403	373	33,096	484
Commercial and financial	106	1	162	7
Consumer	633	17	865	19
	\$ 40,010	\$ 673	\$ 50,647	\$ 1,103

Impaired loans also include loans that have been modified in troubled debt restructurings where concessions to borrowers who experienced financial difficulties have been granted. At September 30, 2015 and December 31, 2014, accruing TDRs totaled \$20.5 million and \$25.0 million, respectively.

Interest payments received on impaired loans are recorded as interest income unless collection of the remaining recorded investment is doubtful at which time payments received are recorded as reductions to principal. For the nine months ended September 30, 2015 and 2014, the Company recorded \$673,000 and \$1,103,000, respectively, in interest income on impaired loans.

For impaired loans whose impairment is measured based on the present value of expected future cash flows, a total of \$235,000 and \$305,000, respectively, was included in interest income for the nine months ended September 30, 2015

and 2014, and represents the change in present value attributable to the passage of time.

Activity in the allowance for loan losses (excluding PCI loans) for the three-month and nine-month periods ended September 30, 2015 is summarized as follows:

Allowance for Loan Losses for the Three Months Ended September 30, 2015						
(Dollars in thousands)	Beginning Balance	Provision for Loan Losses	Charge-Offs	Recoveries	Net (Charge-Offs) Recoveries	Ending Balance
Construction & land development	\$ 887	\$ 891	\$ (859)	\$ 109	\$ (750)	\$ 1,028
Commercial real estate	5,278	925	(128)	315	187	6,390
Residential real estate	9,686	(686)	(193)	359	166	9,166
Commercial and financial	945	193	(160)	107	(53)	1,085

	\$ 20,068	\$ (3,604)	\$ (1,611)	\$ 2,718	\$ 1,107	\$ 17,571

The allowance for loan losses is composed of specific allowances for certain impaired loans and general allowances grouped into loan pools based on similar characteristics. The Company's loan portfolio (excluding PCI loans) and related allowance at September 30, 2015 and December 31, 2014 is shown in the following tables:

(Dollars in thousands)	At September 30, 2015					
	Individually Evaluated for Impairment		Collectively Evaluated for Impairment		Total	
	Carrying Value	Associated Allowance	Carrying Value	Associated Allowance	Carrying Value	Associated Allowance
Construction & land development	\$ 1,524	\$ 235	\$ 94,050	\$ 793	\$ 95,574	\$ 1,028
Commercial real estate	9,777	432	971,339	5,958	981,116	6,390
Residential real estate	22,701	2,335	699,224	6,831	721,925	9,166
Commercial and financial	18	0	209,185	1,085	209,203	1,159
Consumer	654	74	78,302	1,536	78,956	1,536
	\$ 34,674	\$ 3,076	\$ 2,052,100	\$ 16,203	\$ 2,086,774	\$ 19,279

(Dollars in thousands)	At December 31, 2014					
	Individually Evaluated for Impairment		Collectively Evaluated for Impairment		Total	
	Carrying Value	Associated Allowance	Carrying Value	Associated Allowance	Carrying Value	Associated Allowance
Construction & land development	\$ 2,710	\$ 159	\$ 82,769	\$ 563	\$ 85,479	\$ 722
Commercial real estate	11,446	529	821,609	3,999	833,055	4,528
Residential real estate	28,702	2,741	657,344	7,043	686,046	9,784
Commercial and financial	120	0	155,964	1,179	156,084	1,179
Consumer	599	112	52,808	682	53,407	794
	\$ 43,577	\$ 3,541	\$ 1,770,494	\$ 13,466	\$ 1,814,071	\$ 17,007

Loans collectively evaluated for impairment at September 30, 2015 and December 31, 2014 included loans acquired from BANKshares on October 1, 2014 and Grand Bankshares on July 17, 2015 that are not PCI loans. These loans are performing loans recorded at estimated fair value at the acquisition date. The fair value adjustment represents the total fair value discount of each PUL, is accreted into interest income over the remaining lives of the related loans on a level yield basis, and remained adequate at September 30, 2015.

The table below summarizes PCI loans that were individually evaluated for impairment based on expected cash flows at September 30, 2015 and December 31, 2014:

(Dollars in thousands)	PCI Loans Individually Evaluated for Impairment			
	September 30, 2015		December 31, 2014	
	Carrying Value	Associated Allowance	Carrying Value	Associated Allowance
Construction & land development	\$ 462	\$ 49	\$ 1,557	\$ 43
Commercial real estate	10,071	0	4,092	3
Residential real estate	1,008	0	851	18
Commercial and financial	1,132	0	1,312	0
Consumer	0	0	2	0
	\$ 12,673	\$ 49	\$ 7,814	\$ 64

NOTE G — SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE

Securities sold under agreements to repurchase are accounted for as secured borrowings. For securities sold under agreements to repurchase, the Company would be obligated to provide additional collateral in the event of a significant decline in fair value of collateral pledged. At September 30, 2015 and December 31, 2014, Company securities pledged were as follows by collateral type and maturity:

(Dollars in thousands)	Overnight and Continuous Maturity	
	September 30, 2015	December 31, 2014
Fair Value		
Mortgage backed securities and collateralized mortgage obligations of U.S. Government Sponsored Entities	\$ 148,607	\$ 153,640

NOTE H — EQUITY CAPITAL

The Company is well capitalized and at September 30, 2015, the Company and the Company's principal banking subsidiary, Seacoast National Bank, or "Seacoast National", met the new common equity Tier 1 capital ratio (CET1) regulatory threshold of 6.5% for well-capitalized institutions under the new Basel III standardized transition approach, as well as risk-based and leverage ratio requirements for well capitalized banks under the regulatory framework for prompt corrective action.

NOTE I — CONTINGENCIES

The Company and its subsidiaries, because of the nature of their businesses, are at all times subject to numerous legal actions, threatened or filed. Management presently believes that none of the legal proceedings to which it is a party are likely to have a materially adverse effect on the Company's consolidated financial condition, operating results or cash flows, although no assurance can be given with respect to the ultimate outcome of any such claim or litigation.

NOTE J — FAIR VALUE

Under ASC 820, fair value measurements for items measured at fair value on a recurring and nonrecurring basis at September 30, 2015 and December 31, 2014 included:

(Dollars in thousands)	Fair Value Measurements	Quoted Prices		
		in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
At September 30, 2015:				
Available for sale securities (1)	\$ 728,161	\$ 3,929	\$ 724,232	\$ 0
Loans held for sale (2)	16,738	0	16,738	0
Loans (3)	8,226	0	6,206	2,020
Other real estate owned (4)	7,433	0	1,091	6,342
At December 31, 2014:				
Available for sale securities (1)	\$ 741,375	\$ 3,899	\$ 737,476	\$ 0
Loans held for sale (2)	12,078	0	12,078	0
Loans (3)	10,409	0	8,324	2,085
Other real estate owned (4)	7,462	0	1,468	5,994

(1) See Note D for further detail of fair value of individual investment categories.

(2) Recurring fair value basis determined using observable market data.

See Note F. Nonrecurring fair value adjustments to loans identified as impaired reflect full or partial write-downs (3) that are based on the loan's observable market price or current appraised value of the collateral in accordance with ASC 310.

(4) Fair value is measured on a nonrecurring basis in accordance with ASC 360.

The fair value of impaired real estate loans which are collateral dependent is based on recent real estate appraisals less estimated costs of sale. For residential real estate impaired loans, appraised values or internal evaluation are based on the comparative sales approach. These impaired loans are considered level 2 in the fair value hierarchy. For commercial and commercial real estate impaired loans, evaluations may use either a single valuation approach or a combination of approaches, such as comparative sales, cost and/or income approach. A significant unobservable input in the income approach is the estimated capitalization rate for a given piece of collateral. At September 30, 2015 the range of capitalization rates utilized to determine fair value of the underlying collateral averaged approximately 8.0%. Adjustments to comparable sales may be made by an appraiser to reflect local market conditions or other economic factors and may result in changes in the fair value of an asset over time. As such, the fair value of these impaired loans is considered level 3 in the fair value hierarchy. Impaired loans measured at fair value total \$8.2 million with a specific reserve of \$2.4 million at September 30, 2015, compared to \$10.4 million with a specific reserve of \$2.4 million at December 31, 2014.

Fair value of available for sale securities are determined using valuation techniques for individual investments as described in Note D.

When appraisals are used to determine fair value and the appraisals are based on a market approach, the fair value of other real estate owned (“OREO”) is classified as a level 2 input. When the fair value of OREO is based on appraisals which require significant adjustments to market-based valuation inputs or apply an income approach based on unobservable cash flows, the fair value of OREO is classified as Level 3 inputs. For OREO carried at fair value, the valuation allowance totaled \$0.8 million as of September 30, 2015 and December 31, 2014.

Transfers between levels of the fair value hierarchy are recognized on the actual date of the event or circumstances that caused the transfer, which generally coincides with the Company's monthly and/or quarterly valuation process.

During the nine months ended September 30, 2015, there were no transfers between level 1 and level 2 assets carried at fair value.

For loans classified as level 3, transfers in totaled \$1.0 million for the first nine months of 2015. Transfers out consisted of charge-offs of \$0.3 million, and principal payments and other reductions totaling \$0.8 million for loans classified as level 3.

Charge-offs recognized upon loan foreclosures are generally offset by general or specific allocations of the allowance for loan losses and generally do not, and did not during the reported periods, significantly impact the Company's provision for loan losses.

For OREO classified as level 3 during the first nine months of 2015, foreclosed loans transferred in totaled \$3.1 million. Transfers out summed to \$2.7 million, with \$2.6 million in sales.

The carrying amount and fair value of the Company's other significant financial instruments that are not measured at fair value on a recurring basis in the balance sheet as of September 30, 2015 and December 31, 2014 is as follows:

(Dollars in thousands)	Carrying Amount	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
At September 30, 2015:				
Financial Assets				
Securities held to maturity (1)	\$209,047	\$ 0	\$ 212,362	\$ 0
Loans, net	2,071,893	0	0	2,085,632
Financial Liabilities				
Deposit liabilities	2,742,296	0	0	2,742,915
Borrowings	50,000	0	52,387	0
Subordinated debt	69,891	0	59,169	0

At December 31, 2014:

Financial Assets

Securities held to maturity (1)	\$207,904	\$ 0	\$ 208,788	\$ 0
Loans, net	1,794,405	0	0	1,814,746

Financial Liabilities

Deposit liabilities	2,416,534	0	0	2,417,355
Borrowings	50,000	0	53,584	0
Subordinated debt	64,583	0	53,861	0

(1) See Note D for further detail of fair value of individual investment categories.

The short maturity of Seacoast's assets and liabilities results in having a significant number of financial instruments whose fair value equals or closely approximates carrying value. Such financial instruments are reported in the following balance sheet captions: cash and cash equivalents, interest bearing deposits with other banks, federal funds purchased and securities sold under agreement to repurchase, maturing within 30 days.

The following methods and assumptions were used to estimate the fair value of each class of financial instrument for which it is practicable to estimate that value at September 30, 2015 and December 31, 2014:

Securities: U.S. Treasury securities are reported at fair value utilizing Level 1 inputs. Other securities are reported at fair value utilizing Level 2 inputs. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information and the bond's terms and conditions, among other things.

The Company reviews the prices supplied by the independent pricing service, as well as their underlying pricing methodologies, for reasonableness and to ensure such prices are aligned with traditional pricing matrices. In general, the Company does not purchase investment portfolio securities that are esoteric or that have a complicated structure. The Company's portfolio consists of traditional investments, nearly all of which are U.S. Treasury obligations, federal agency bullet or mortgage pass-through securities, or general obligation or revenue based municipal bonds. Pricing for such instruments is fairly generic and is easily obtained. The fair value of collateralized loan obligations are determined from broker quotes. From time to time, the Company will validate, on a sample basis, prices supplied by the independent pricing service by comparison to prices obtained from other brokers and third-party sources or derived using internal models.

Loans: Fair values are estimated for portfolios of loans with similar financial characteristics. Loans are segregated by type such as commercial, mortgage, etc. Each loan category is further segmented into fixed and adjustable rate interest terms and by performing and nonperforming categories. The fair value of loans, except residential mortgages, is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risks inherent in the loan. For residential mortgage loans, fair value is estimated by discounting contractual cash flows adjusting for prepayment assumptions using discount rates based on secondary market sources. The estimated fair value is not an exit price fair value under ASC 820 when this valuation technique is used.

Loans held for sale: These loans are intended for sale and the Company believes that the fair value is the best indicator of the resolution of these loans. Interest income is recorded based on the contractual terms of the loan and in accordance with Company's policy on loans held for investment. None of the loans are 90 days or more past due or on nonaccrual as of September 30, 2015 and December 31, 2014. Fair values are based upon estimated values to be received from independent third party purchasers.

At September 30, 2015 and December 31, 2014, the aggregate fair value, contractual balance (including accrued interest) and gains or losses was as follows:

	September 30,	December 31,
(Dollars in thousands)	2015	2014
Aggregate fair value	\$ 16,738	\$ 12,078
Contractual balance	16,310	11,769
Gains (losses)	428	309

Deposit Liabilities: The fair value of demand deposits, savings accounts and money market deposits is the amount payable at the reporting date. The fair value of fixed maturity certificates of deposit is estimated using the rates currently offered for funding of similar remaining maturities.

Borrowings: The fair value of floating rate borrowings is the amount payable on demand at the reporting date. The fair value of fixed rate borrowings is estimated using the rates currently offered for borrowings of similar remaining maturities.

Subordinated debt: The fair value of the floating rate subordinated debt is estimated using discounted cash flow analysis, estimates of the Company's current incremental borrowing rate for similar instruments and dealer quotes for similar debt.

NOTE K — BUSINESS COMBINATIONS

Acquisition of Grand Bankshares, Inc.

On July 17, 2015, the Company completed its previously announced acquisition of Grand Bankshares, Inc. ("Grand") as set forth in the Agreement and Plan of Merger ("Agreement") whereby Grand merged with and into the Company. Pursuant to and simultaneously with the merger of Grand with and into the Company, Grand's wholly owned subsidiary bank, Grand Bank & Trust of Florida ("GB"), merged with and into the Company's subsidiary bank, Seacoast National Bank.

The Company's primary reasons for the transaction were to further solidify its market share in the attractive Palm Beach market and expand its customer base and leverage operating cost through economies of scale. The acquisition is expected to positively affect the Company's operating results to the extent the Company earns more from interest earning assets than it pays in interest on its interest bearing liabilities. Merger related charges summed to \$2.7 million for the third quarter of 2015, primarily impacting salaries and wages, outsourced data processing costs, and legal and professional fees. All of these costs were expensed in the third quarter of 2015.

The Company acquired 100% of the outstanding common stock of Grand. The purchase price consisted of stock, and additionally the Company paid approximately \$1.48 million in cash for all of Grand's outstanding shares of preferred B stock, representing the par value of \$1,000 per share of preferred B stock. Each share of Grand common stock and Preferred A stock was exchanged for 0.3114 shares of the Company's common stock, or approximately 1.09 million shares of Company stock. Based on the price of the Company's common stock of \$15.75 per share on July 17, 2015, plus cash paid for Grand's outstanding shares of preferred B stock, the total purchase price was \$18.7 million.

	July 17, 2015
Grand preferred B shares exchanged for cash	\$ 1,481,000
Number of Grand common shares outstanding	3,501,185
Per share exchange ratio	0.3114
Number of shares of common stock issued	1,090,269
Multiplied by common stock price per share on July 17, 2015	\$ 15.75
Value of common stock issued	17,171,737
Total purchase price	\$ 18,652,737

The following table summarizes the fair values of the assets acquired and liabilities assumed at the date of acquisition. The fair values listed are preliminary and are subject to adjustment. While they are not expected to be materially different than those shown, any adjustments to the estimates will be reflected retroactively as of the date of acquisition.

Date of acquisition July 17, 2015
(in thousands)

Assets:

Cash and cash equivalents	\$ 34,408
Securities available for sale	46,366
Loans	109,988
Bank premises	4,191
Other real estate owned	2,424
Core deposit intangible	2,564
Goodwill	555
Other assets	14,163
Total assets acquired	\$ 214,659

Liabilities:

Deposits	\$ 188,469
Repurchase agreements	1,658
Subordinated debt	5,151
Other liabilities	728
Total liabilities assumed	\$ 196,006

The acquisition is accounted for under the acquisition method in accordance with ASC Topic 805, *Business Combinations*. Both the purchased assets and liabilities assumed are recorded at their respective acquisition date fair values. Determining fair values of assets and liabilities, especially the loan portfolio and foreclosed real estate, is a complicated process involving significant judgment regarding methods and assumptions used to calculate estimated fair values.

The table below presents information with respect to the fair value of acquired loans, as well as their unpaid principal balance (“Book Balance”) at acquisition date.

(Dollars in thousands)	July 17, 2015	
	Book Balance	Fair Value
Loans:		
Single family residential real estate	\$6,158	\$ 6,379
Commercial real estate	82,782	79,887

Construction/development/land	979	913
Commercial loans	2,393	1,516
Consumer and other loans	14,575	13,692
Purchased credit-impaired	10,993	7,601
Total loans	\$ 117,880	\$ 109,988

For the loans acquired we first, segregated all acquired loans with specifically identified credit deficiency factor(s). The factors we considered to identify loans as Purchase Credit Impaired (“PCI”) loans were all acquired loans that were nonaccrual, 60 days or more past due, designated as Trouble Debt Restructured (“TDR”), graded “special mention” or “substandard.” These loans were then evaluated to determine estimated fair values as of the acquisition date. As required by generally accepted accounting principles, we are accounting for these loans pursuant to ASC Topic 310-30. The table below summarizes total contractually required principal and interest cash payments, management’s estimate of expected total cash payments and fair value of the loans as of July 17, 2015 for purchase credit impaired loans. Contractually required principal and interest payments have been adjusted for estimated prepayments.

(Dollars in thousands)	July 17, 2015
Contractually required principal and interest	\$ 12,552
Non-accretable difference	4,249
Cash flows expected to be collected	8,303
Accretable yield	702
Total purchased credit-impaired loan acquired	\$ 7,601

Second, loans without specifically identified credit deficiency factors are referred to as Purchased Unimpaired Loans (“PULs”) for disclosure purposes. These loans were then evaluated to determine estimated fair values as of the acquisition date. Although no specific credit deficiencies were identifiable, we believe there is an element of risk as to whether all contractual cash flows will be eventually received. Factors that were considered included the economic environment both nationally and locally as well as the real estate market particularly in Florida. We have applied ASC Topic 310-20 accounting treatment to the PULs.

The Company believes the deposits assumed from the acquisition have an intangible value. The Company applied ASC Topic 805, which prescribes the accounting for goodwill and other intangible assets such as core deposit intangibles, in a business combination. In determining the valuation amount, a third party analyzed the deposits based on factors such as type of deposit, deposit retention, interest rates and age of deposit relationships.

The Company recognized goodwill on this acquisition which is nondeductible for tax purposes as this acquisition is a nontaxable transaction. The goodwill has been calculated based on the fair values of the assets acquired and liabilities assumed as of the acquisition date and, in some instances, based on use of third party experts for valuations. The acquisition of Grand constituted a business combination. Accordingly, the assets acquired and liabilities assumed are presented at their fair values. The determination of fair value requires management to make estimates about discount rates, future expected cash flows, market conditions and other future events that are highly subjective in nature and subject to change. These fair value estimates are considered preliminary and are subject to change for up to one year after closing date of the acquisition as additional information becomes available. Immaterial amounts of the intangible assets recognized are deductible for income tax purposes

The operating results of the Company for the three months and nine months ended September 30, 2015 includes the operating results of the acquired assets and assumed liabilities since the date of acquisition of July 17, 2015.

Pro-forma data for the nine months ending September 30, 2015 and 2014 listed in the table below presents pro-forma information as if the acquisition occurred at the beginning of 2014.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2015	2014	2015	2014
(Dollars in thousands, except per share amounts)				
Net interest income	\$29,333	\$19,358	\$83,927	\$55,734
Net income available to common shareholders	4,870	3,690	18,803	9,281
EPS - basic	\$0.14	\$0.14	\$0.55	\$0.35
EPS - diluted	\$0.14	\$0.14	\$0.55	\$0.34

Acquisition of BMO Harris Central Florida Offices, Deposits and Loans

On October 14, 2015, the Company announced that Seacoast's wholly-owned subsidiary, Seacoast National Bank, entered into a Branch Sale Agreement with BMO Harris Bank N.A. ("BMO") pursuant to which it has agreed to purchase, subject to the terms of the Agreement, fourteen branches of BMO located in the Orlando Metropolitan Statistical Area ("MSA"). Seacoast National Bank will assume approximately \$355 million in deposits, of which approximately 56% are checking accounts, and approximately \$70 million in loans related to business banking customers at a deposit premium of 3.0 percent of the deposit balances. Subject to regulatory approval and the satisfaction of customary closing conditions, the acquisition is expected to close in the first half of 2016.

Acquisition of Floridian Financial Group, Inc

On November 3, 2015, the Company announced that it signed a definitive agreement to acquire Floridian Financial Group, Inc. (“Floridian”), the parent company of Floridian Bank. Upon completion of the merger, Seacoast expects that Floridian Bank will be merged into Seacoast National Bank. Floridian, headquartered in Lake Mary, Florida, currently operates 10 branches in Orlando and Daytona Beach and will add approximately \$426 million in assets, \$361 million in deposits, and \$289 million in loans to Seacoast.

Under the terms of the definitive agreement, Floridian shareholders will have the right to receive, at their election, (i) the combination of \$4.29 in cash and 0.5291 shares of Seacoast common stock, (ii) \$12.25 in cash, or (iii) 0.8140 shares of Seacoast common stock, subject to a customary proration mechanism so that the aggregate consideration mix equals 35% cash and 65% Seacoast shares (based on Seacoast’s ten-day average closing price of \$15.05 per share as of October 29, 2015).

The transaction is expected to close in the first quarter of 2016, and is subject to approval by Floridian’s shareholders, receipt of regulatory approvals and other customary closing conditions.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

THIRD QUARTER 2015

The following discussion and analysis is designed to provide a better understanding of the significant factors related to the Company's results of operations and financial condition. Such discussion and analysis should be read in conjunction with the Company's Condensed Consolidated Financial Statements and the related notes included in this report. For purposes of the following discussion, the words the "Company," "we," "us," and "our" refer to the combined entities of Seacoast Banking Corporation of Florida and its direct and indirect wholly owned subsidiaries.

STRATEGIC OVERVIEW

Seacoast continues to execute on its plan to grow our core business organically, innovate to build franchise and increase efficiency, and grow through mergers and acquisitions. We believe that these investments are better positioning us to increase net income to common shareholders in 2015, and prospectively. These included:

- Investment in the Accelerate lending model, expanding geographically with low cost, high service community banking offices;
- continued investments in digital technology and improved processes providing significant cross sell to legacy customers and reducing overhead;
- completion of our acquisitions of The BANKshares, Inc. ("BANKshares") on October 1, 2014, and Grand Bankshares, Inc. ("Grand") on July 17, 2015, and prospective purchase from BMO Harris Bank, N.A. ("BMO") and Floridian Financial Group, Inc. ("Floridian") in 2016;
- consolidation of branch locations, totaling more than 25% of total branch locations over the past five years.

Through ongoing investments in loan production personnel, digital technology and the effects of asset quality improvements and expense management, we have proactively positioned our business for growth. We believe our targeted plan to grow our customer and commercial franchise is the best way to build shareholder value.

While our focus is organic growth, we have periodically supplemented this growth through strategic acquisition opportunities. Nearly a year after completing our BANKshares acquisition, customer metrics for Winter Park, Florida based BankFIRST are encouraging, with household growth in the former BankFIRST Orlando market of 7.5% annualized and an accelerated rate of cross-sell to BankFIRST customers, with the number of products used by each household, increasing at a 9.4% annualize rate. Recently, we completed an enhancement to our footprint in the Palm Beach County, Florida market. On July 17, 2015, the acquisition of Grand, and its subsidiary, Grand Bank & Trust of Florida, was completed, further solidifying our market share in the Palm Beach county market, expanding our customer base further, enhancing deposit fee income, and leveraging operating costs through economies of scale. The Grand acquisition contributed approximately \$212 million in assets, \$118 million in loans and \$190 million in deposits that include transaction accounts totaling around 47% of total deposits complementing our overall funding. The acquisition also provides excellent opportunities for growth in one of Florida's most vibrant markets, and was completed with no tangible book value dilution and is immediately accretive to our earnings per share.

The Company continues to focus on reaching customers in unique ways, focusing on convenience and service, building higher customer satisfaction. Additionally, our newest commercial lending offices provide our customers with talented, results-oriented staff, specializing in loans to the business market segment. In addition, the acquisition of a receivables factoring subsidiary in the BANKshares merger was further enhanced by the addition of a receivables funding team from First Capital Growth (FGC) in the Palm Beach County market in the second quarter of 2015, providing an additional product vehicle to better serve customers. Seacoast intends to build customer relationships with depth that surpass traditional commercial lending.

We refreshed and reintroduced our brand in 2014, retooling our logo and associated signage throughout our branch network and digital platforms in the fourth quarter. Our new brand reflects our forward-looking strategy and has included investments in digital delivery and products that we believe have contributed to increasing core customer funding. As of September 30, 2015, almost 64% of our online customers have adopted our mobile product offerings, and the total number of services utilized by our retail customers increased to an average of 4.3 per household, and increased core product sales added to an increase in debit card activation, direct deposit and mobile banking users. Personal and business mobile banking has grown from 13,659 users at December 31, 2013 to 21,587 users at December 31, 2014 to 29,839 users at September 30, 2015.

Embracing technology, especially electronic delivery channels, has helped us improve efficiency. As an example, over the past five years we have been successful in closing more than 25% of our branches. This has allowed us to improve our deposit to facilities square footage from between \$9,000 and \$10,000 of deposits per square foot to approximately \$13,000 of deposits per square foot, a more than 35% improvement.

CRITICAL ACCOUNTING ESTIMATES

The preparation of consolidated financial statements requires management to make judgments in the application of certain of its accounting policies that involve significant estimates and assumptions. These estimates and assumptions, which may materially affect the reported amounts of certain assets, liabilities, revenues and expenses, are based on information available as of the date of the financial statements, and changes in this information over time and the use of revised estimates and assumptions could materially affect amounts reported in subsequent financial statements. Management, after consultation with the Company's Audit Committee, believes the most critical accounting estimates and assumptions that involve the most difficult, subjective and complex assessments are:

- the allowance and the provision for loan losses;
- fair value measurements;

- acquisition accounting and purchased loans
- intangible assets
- other than temporary impairment of securities;
- realization of deferred tax assets; and
- contingent liabilities.

The following is a discussion of the critical accounting policies intended to facilitate a reader's understanding of the judgments, estimates and assumptions underlying these accounting policies and the possible or likely events or uncertainties known to us that could have a material effect on our reported financial information.

Allowance and Provision for Loan Losses

The information contained on pages 42-43 and 48-55 related to the "Provision for Loan Losses", "Loan Portfolio", "Allowance for Loan Losses" and "Nonperforming Assets" is intended to describe the known trends, events and uncertainties which could materially affect the Company's accounting estimates related to our allowance for loan losses.

Acquisition Accounting and Purchased Loans

The Company accounts for its acquisitions under ASC Topic 805, *Business Combinations*, which requires the use of the acquisition method of accounting. All identifiable assets acquired, including loans, are recorded at fair value. No allowance for loan losses related to the acquired loans is recorded on the acquisition date as the fair value of the loans acquired incorporates assumptions regarding credit risk. All loans acquired are recorded at fair value in accordance with the fair value methodology prescribed in ASC Topic 820. The fair value estimates associated with the loans include estimates related to expected prepayments and the amount and timing of expected principal, interest and other cash flows.

Over the life of the purchased credit impaired loans acquired, the Company continues to estimate cash flows expected to be collected. The Company evaluates at each balance sheet date whether the present value of the acquired loans using the effective interest rates has decreased and if so, recognizes a provision for loan loss in its consolidated statement of income. For any increases in cash flows expected to be collected, the Company adjusts the amount of accretable yield recognized on a prospective basis over the loan's remaining life.

Intangible Assets

Intangible assets consist of goodwill and core deposit intangibles. Goodwill represents the excess purchase price over the fair value of net assets acquired in business acquisitions. The core deposit intangible represents the excess intangible value of acquired deposit customer relationships as determined by valuation specialists. The core deposit intangibles from the BANKshares and Grand acquisitions are being amortized over 74 months and 94 months, respectively, on a straight-line basis. Goodwill is not amortized but rather is evaluated for impairment on at least an annual basis. We will perform an annual impairment test of goodwill and the core deposit intangible as required by FASB ASC 350, *Intangibles—Goodwill and Other*, in the fourth quarter for the BANKshares acquisition (on October 1, 2014). Fair value estimates are based on the information available, and are subject to change for up to one year after the closing date of the acquisition as additional information relative to closing date fair values becomes available.

Other Than Temporary Impairment of Securities

Our investments are reviewed quarterly for other than temporary impairment (“OTTI”). The following primary factors are considered for securities identified for OTTI testing: percent decline in fair value, rating downgrades, subordination, duration, amortized loan-to-value, and the ability of the issuers to pay all amounts due in accordance with the contractual terms. Prices obtained from pricing services are usually not adjusted. Based on our internal review procedures and the fair values provided by the pricing services, we believe that the fair values provided by the pricing services are consistent with the principles of ASC 820, Fair Value Measurement. However, on occasion pricing provided by the pricing services may not be consistent with other observed prices in the market for similar securities. Using observable market factors, including interest rate and yield curves, volatilities, prepayment speeds, loss severities and default rates, the Company may at times validate the observed prices using a discounted cash flow model and using the observed prices for similar securities to determine the fair value of its securities.

Changes in the fair values, as a result of deteriorating economic conditions and credit spread changes, should only be temporary. Further, management believes that the Company’s other sources of liquidity, as well as the cash flow from principal and interest payments from its securities portfolio, reduces the risk that losses would be realized as a result of a need to sell securities to obtain liquidity.

Realization of Deferred Tax Assets

At September 30, 2015, the Company had net deferred tax assets (“DTA”) of \$61.0 million. In comparison, at September 30, 2014 the Company had a net DTA of \$58.5 million. The increase is primarily due to acquisitions, offset by Seacoast’s earnings over this period. Although realization is not assured, management believes that realization of the carrying value of the DTA is more likely than not, based upon expectations as to future taxable income and tax planning strategies, as defined by ASC 740 Income Taxes.

Contingent Liabilities

The Company is subject to contingent liabilities, including judicial, regulatory and arbitration proceedings, and tax and other claims arising from the conduct of our business activities. These proceedings include actions brought against the Company and/or our subsidiaries with respect to transactions in which the Company and/or our subsidiaries acted as a lender, a financial advisor, a broker or acted in a related activity. Accruals are established for legal and other claims when it becomes probable that the Company will incur an expense and the amount can be reasonably estimated. Company management, together with attorneys, consultants and other professionals, assesses the probability and estimated amounts involved in a contingency. Throughout the life of a contingency, the Company or our advisors may learn of additional information that can affect our assessments about probability or about the estimates of amounts involved. Changes in these assessments can lead to changes in recorded reserves. In addition, the actual costs of resolving these claims may be substantially higher or lower than the amounts reserved for the claims. At September 30, 2015 the Company had no significant accruals for contingent liabilities and had no known pending matters that could potentially be significant.

RESULTS OF OPERATIONS

EARNINGS OVERVIEW

The Company has steadily improved results over the past several quarters and particularly into 2015. Third quarter revenue (net interest income and noninterest income, combined) rose \$2.6 million or 7.5% to \$37.1 million, compared to \$34.5 million in the prior quarter. Net income increased \$1.4 million or 48.2% to \$4.4 million or \$0.13 per average common diluted share, compared to the third quarter of 2014. Net income improved 123.3% to \$16.1 million or \$0.48 per diluted common share for the first three quarters of 2015, from \$7.2 million or \$0.28 per diluted common share for the first three quarters of 2015.

Adjusted net income (1) (excluding merger costs and other adjustments) increased \$3.1 million or 95.8% from the third quarter a year ago, and adjusted diluted earnings per share of \$0.19 for the third quarter of 2015, compared with \$0.13 in the third quarter of 2014 and \$0.19 for the second quarter of 2015.

Non-GAAP measures regarding Net Income

(Dollars in thousands except per share data)	Quarters				
	Third 2015	Second 2015	First 2015	Fourth 2014	Third 2014

Adjusted diluted earnings per share (1)	\$0.19	\$0.19	\$0.19	\$0.13	\$0.13

(1) Non-GAAP measure

The table above provides reconciliation between Generally Accepted Accounting Principles (“GAAP”) net income and adjusted net income (1). Management uses these non-GAAP financial amounts in its analysis of the Company’s performance and believes the presentation provides a clearer understanding of the Company’s performance. The Company believes the presentation of adjusted net income (1) enhances investor understanding of the performance trend and facilitates comparisons with the performance of other financial institutions. The limitations associated with adjusted net income (1) are the risk that persons might disagree as to the appropriateness of items comprising the measure and that different companies might calculate the measure differently. The Company provides reconciliations between GAAP and non-GAAP measures, and these measures should not be considered an alternative to GAAP.

We believe that our success in increasing net income is the result of our success in significantly growing our businesses and balance sheet, while attaining operating efficiency. This success also reflects the success we have had in identifying and incorporating acquisitions. We expect that the Company’s capital will continue to increase with positive earnings. The board and management currently believe that the Company’s overall level of capital is more

than sufficient to support growth, given the current economic environment.

NET INTEREST INCOME

Net interest income (on a tax equivalent basis) for the quarter totaled \$29.1 million, increasing \$11.8 million or 68.6% during the third quarter of 2015 compared to the same period in 2014, and was \$3.3 million or 13.0% higher than second quarter 2015's result. Net interest margin expanded to 3.75% or 58 basis points compared to third quarter 2014's margin and 25 basis points higher than for second quarter 2015. Linked quarter results reflect an improved balance sheet mix and acquisition activity. In addition, net interest income benefited from excess purchased loan accretion recognized during the third quarter of 2015 from significant loan modifications and early loan payoffs, contributing approximately 10 basis points. Year-over-year net interest income and margin increases reflect acquisition activity, core deposit and loan growth, and the strategic investment of excess liquidity.

The following table details the trend for the yield on earning assets (on a tax equivalent basis) which has improved significantly over the past five quarters, as well as, the rate paid for interest bearing liabilities that has changed nominally over this period:

	Third Quarter 2015	Second Quarter 2015	First Quarter 2015	Fourth Quarter 2014	Third Quarter 2014
Yield	3.98 %	3.73 %	3.84 %	3.78 %	3.40 %
Rate	0.33 %	0.33 %	0.32 %	0.31 %	0.32 %

Loans have increased substantially from acquisition and core growth. Total loans were \$2.10 billion at September 30, 2015, an increase of \$708 million or 51% from a year ago. Excluding acquired loans, loans increased \$227 million or 16% from the prior year's third quarter. For the third quarter of 2015, average loans as a percentage of average earning assets totaled 66.8%, compared to 63.1% a year ago. The mix of loans also improved, with volumes related to commercial and commercial real estate loans representing 59.9% of total loans at September 30, 2015 (compared to 49.6% at September 30, 2014) (see "Loan Portfolio").

Commercial and commercial real estate loan production for 2015 totaled almost \$219 million, with almost \$72 million originated in the third quarter of 2015, compared to production for all of 2014 and 2013 of \$258 million and \$200 million, respectively. Consumer loan and small business originations (inclusive of lines of credit) totaled \$51.1 million for the third quarter of 2015, compared to \$55.3 million in the second quarter of 2015 and \$24.5 million one year ago.

Along with this strong loan growth, the portfolio continued to build granularity, with industry diversification. The average commercial and small business loan originated in the first three quarters of 2015 totaled \$278,000.

Closed residential production totaled \$74.0 million, compared with \$66.0 million a year ago.

Deposit growth reflects organic household growth and acquisitions. Total deposits increased 51.6% to \$2.74 billion at September 30, 2015, from year ago levels. Core customer funding (total deposits and customer sweep repurchase agreements less time certificates of deposit) increased to \$2.58 billion at September 30, 2015, an 892.2 million increase from the third quarter of 2014. Excluding acquisitions, core customer funding increased \$292.6 million or 17.4% from one year ago and total deposits increased \$229.0 million from one year ago. Excluding Grand, core customer funding decreased \$45.5 million compared to the second quarter of 2015, entirely due to seasonal declines in public funds.

Customer Relationship Funding (Dollars in thousands)	Quarters					
	Third 2015	Second 2015	First 2015	Fourth 2014	Third 2014	
Noninterest demand	\$869,877	\$808,429	\$793,336	\$725,238	\$522,001	
Interest-bearing demand	618,344	599,268	634,854	652,353	479,827	
Money market	660,632	621,973	596,600	450,172	344,726	
Savings	286,810	282,588	272,963	264,738	215,076	
Time certificates of deposit	306,633	292,919	312,072	324,033	246,920	
Total deposits	\$2,742,296	\$2,605,177	\$2,609,825	\$2,416,534	\$1,808,550	
Customer sweep accounts	\$148,607	\$157,676	\$170,023	\$153,640	\$124,436	
Total core customer funding (1)	\$2,584,270	\$2,469,934	\$2,467,776	\$2,246,141	\$1,686,066	
Noninterest demand deposit mix	31.7	% 31.0	% 30.4	% 30.0	% 28.9	%

(1) Total deposits and customer sweep accounts, excluding time certificates of deposit

Noninterest demand deposits grew \$61.4 million or 7.6% from the second quarter of 2015 and \$347.9 million or 66.6% from the third quarter of 2014. Noninterest demand deposits increased to 31.7% of total deposits, up from 28.9% a year ago. The overall cost of total deposits has been low and stable at 0.13%, one basis point above the rate paid for all of 2014.

Short-term borrowings have been principally comprised of sweep repurchase agreements with customers of Seacoast National. At September 30, 2014, the Company also utilized \$80 million in term federal funds purchased from the FHLB at 0.16% (maturing in 30 days) to invest in adjustable rate securities, pending expected seasonal funding. Term federal funds purchased were more nominal for the third quarter of 2015, averaging \$20.1 million.

For third quarter 2015, average other borrowings were comprised of subordinated debt of \$69.0 million related to trust preferred securities issued by subsidiary trusts of the Company (including subordinated debt for BANKshares added on October 1, 2014 and Grand acquisition on July 17, 2015) and advances from the FHLB of \$50.0 million. With the exception of the acquired subordinated debt from BANKshares and Grand, no changes have occurred to other borrowings since year-end 2009.

The following table details average balances, net interest income and margin results (on a tax equivalent basis) for the third and second quarter of 2015, and the third quarter of 2014.

On a fully taxable equivalent basis, a non-GAAP measure, as defined (see Non-GAAP Measure on page 44). All (1) yields and rates have been computed on an annual basis using amortized cost. Fees on loans have been included in interest on loans. Nonaccrual loans are included in loan balances.

Non-GAAP Measures regarding Net Interest Income and Margin

Fully taxable equivalent net interest income is a common term and measure used in the banking industry but is not a term used under generally accepted accounting principles (“GAAP”). We believe that these presentations of tax-equivalent net interest income and tax equivalent net interest margin aid in the comparability of net interest income arising from both taxable and tax-exempt sources over the periods presented. We further believe these non-GAAP measures enhance investors’ understanding of the Company’s business and performance, and facilitate an understanding of performance trends and comparisons with the performance of other financial institutions. The limitations associated with these measures are the risk that persons might disagree as to the appropriateness of items comprising these measures and that different companies might calculate these measures differently, including as a result of using different assumed tax rates. These disclosures should not be considered as an alternative to GAAP. The following information is provided to reconcile GAAP measures and tax equivalent net interest income and net interest margin on a tax equivalent basis.

	Third Quarter 2015	Second Quarter 2015	First Quarter 2015	Fourth Quarter 2014	Third Quarter 2014
(Dollars in thousands)					
Nontaxable interest income	\$119	\$122	\$124	\$150	\$54
Tax Rate	35 %	35 %	35 %	35 %	35 %
Net interest income (TE)	\$29,130	\$25,788	\$25,834	\$24,883	\$17,282
Total net interest income (not TE)	29,011	25,666	25,710	24,733	17,228
Net interest margin (TE)	3.75 %	3.50 %	3.62 %	3.56 %	3.17 %
Net interest margin (not TE)	3.73	3.48	3.60	3.54	3.16

PROVISION FOR LOAN LOSSES

Management determines the provision for loan losses charged to operations by continually analyzing and monitoring delinquencies, nonperforming loans and the level of outstanding balances for each loan category, as well as the amount of net charge-offs, and by estimating losses inherent in its portfolio. While the Company’s policies and procedures used to estimate the provision for loan losses charged to operations are considered adequate by management, factors beyond the control of the Company, such as general economic conditions, both locally and nationally, make management’s judgment as to the adequacy of the provision and allowance for loan losses necessarily approximate and imprecise (see “Nonperforming Assets” and “Allowance for Loan Losses”).

Noncore credit related expenses, losses on other real estate owned (“OREO”) and asset disposition expense have declined as nonperforming assets decreased and the economy improved. During the first three quarters of 2015, net loan loss charge-offs of \$18,000 and provisioning for loan losses of \$2.275 million was recorded, reflective of the increase in loans outstanding since December 31, 2014 (see “Loan Portfolio” and “Allowance for Loan Losses”).

For the third quarter of 2015 we recorded a provision of the allowance for loan losses \$1.0 million, compared to a recapture of the allowance for loan losses in the third quarter of 2014 totaling \$1.4 million. Net charge-offs for the third quarter of 2015 were \$0.4 million, comparing to net recoveries of \$0.9 million in the third quarter of 2014. Net charge-offs approximate zero as a percent of average total loans for the first nine months of 2015, versus net recoveries of 0.11% of average total loans for the first nine months of 2014. Delinquency trends remain low and show continued stability (see “Nonperforming Assets”).

Note F to the financial statements (titled “Impaired Loans and Allowance for Loan Losses”) provides additional information concerning the Company’s allowance and provisioning for loan losses.

NONINTEREST INCOME

Noninterest income (excluding securities gains or losses) totaled \$8.1 million for the third quarter of 2015, \$1.9 million or 31.4% higher than 2014’s third quarter and \$0.8 million or 8.6% lower than the second quarter 2015. Noninterest income for the second quarter of 2015 included a gain on a participated loan of \$725,000. Accounting treatment for this gain, related to a discount accreted on a BANKshares loan that was participated during the second quarter of 2015, required this income to be included in other operating income rather than through the margin. Excluding the \$725,000, noninterest income was down very slightly.

Year over year growth in all categories of noninterest income reflects strength in customer acquisition and cross sell, as well as benefits from acquisition activity.

Noninterest income for the third quarter of 2015, compared to second quarter 2015 and the third quarter of 2014, is detailed as follows:

	Third Quarter 2015	Second Quarter 2015	Third Quarter 2014
(Dollars in thousands)			
Service charges on deposits	\$2,217	\$2,115	\$1,753
Trust income	781	759	817
Mortgage banking fees	1,177	1,032	825
Brokerage commissions and fees	604	576	408
Marine finance fees	258	492	281
Interchange income	1,925	2,033	1,452
Other deposit-based EFT fees	88	96	70

Edgar Filing: SEACOAST BANKING CORP OF FLORIDA - Form 10-Q

BOLI Income	366	334	0
Gain on participated loan	0	725	0
Other income	666	684	543
Total	\$8,082	\$8,846	\$6,149

43

Service charges on deposits for the third quarter of 2015 were \$464,000 or 26.5% higher year over year versus third quarter 2014's result, and were \$1,590,000 or 33.5% higher for the first nine months of 2015 when compared to the same period in 2014. Service charge increases in 2015 reflect our growing base of core deposit relationships over the past twelve months, including organic growth, the addition of BANKshares customers in the fourth quarter of 2014 and Grand customers during the third quarter. Overdraft fees represent 67% of total service charges on deposits year-to-date for 2015. Regulators continue to review banking industry's practices for overdraft programs and additional regulation could reduce fee income for the Company's overdraft services.

For the third quarter of 2015, revenues from the Company's wealth management services businesses (trust and brokerage) increased by \$160,000 or 13.1% year over year versus third quarter 2014, and were higher for the first nine months of 2015 compared to 2014 by \$574,000 or 16.9%. Growth was driven by revenues from the Company's brokerage business.

Greater usage of check or debit cards related to efforts to promote card usage, increased our interchange income for the third quarter of 2015 by \$473,000 or 32.6% compared to third quarter 2014, and by \$1,326,000 or 30.4% during the first nine months of 2015 versus 2014's income. Interchange revenue is dependent upon business volumes transacted, as well as the fees permitted by VISA® and MasterCard®.

Originated residential mortgage loans are processed by commissioned employees of Seacoast, with many mortgage loans referred by the Company's branch personnel. Mortgage banking fees in the third quarter of 2015 increased \$352,000 or 42.7% from 2014's third quarter result, and were \$956,000 or 40.8% greater for the nine months ended September 30, 2015, compared to last year for the same period. Mortgage banking revenue as a component of overall noninterest income was 13.6% year-to-date for 2015, compared to 12.4% for all of 2014. The Company was the number one originator of home purchase mortgages in Martin, St. Lucie and Indian River counties during 2014 and the first eight months of 2015, based on the data available to date.

Bank owned life insurance ("BOLI") investments were transferred to the Company from BANKshares and Grand, and were added to by policies directly acquired by us during the fourth quarter of 2014. BOLI income of \$366,000 was recognized during the third quarter of 2015, versus none a year ago for the third quarter. The addition of these investments is expected to provide approximately \$1.4 million in tax exempt revenues in 2015. No BOLI investments existed for the Company prior to fourth quarter 2014.

NONINTEREST EXPENSES

For the third quarter of 2015, noninterest expenses increased \$9.2 million or 46.5% from the third quarter of 2014, and totaled \$29.1 million. Year over year expense increases reflect the acquisitions of BANKshares, FGC and Grand, with merger related expenses and other expenses totaling \$3.0 million in the third quarter of 2015 compared to \$0.6 million in the prior year, with investments to promote and support organic growth also contributing to the increase.

Noninterest expenses increased \$4.8 million or 19.9% from the second quarter of 2015. Excluding merger related charges and other one-time items, noninterest expenses grew \$2.1 million or 9.1%. A significant amount of the increase is related to nearly a full quarter's operating expense impact for the Grand acquisition. Other areas of investment in the franchise included a full quarter's expense related to the acquisition of FGC during the second quarter 2015 which contributed approximately \$309,000 in additional expense, production-driven commission and incentive expense which added approximately \$352,000, core legal and professional fees that typically vary from quarter to quarter totaling \$396,000, and marketing expense focused on customer acquisition and corporate brand awareness surrounding the Grand Palm Beach footprint which contributed \$133,000 to the increase.

Seacoast's efficiency ratio was 76.3% for the third quarter 2015, improving from 82.8% for the same period in the prior year. The decrease is related to improving operating leverage, as revenue growth outpaced expenses offset by a significant amount of merger related costs.

Salaries and wages totaling \$11.9 million were \$3.8 million or 46.9% higher for the third quarter of 2015 than the third quarter of 2014. Base salaries were \$2.7 million or 36.8% higher, reflecting additional personnel retained as part of the fourth quarter acquisition of BANKshares and this quarter's acquisition of Grand. The addition of FGC personnel in receivable funding were incremental as well, comprising \$309,000 of the increase during the third quarter of 2015, versus prior year. Improved revenue generation and lending production, among other factors resulted in commissions, cash and stock incentives (aggregated) that were \$1,433,000 higher compared to third quarter a year ago, but that were partially offset by deferred loan origination costs (a contra expense), higher by \$0.8 million. Severance related to the Grand acquisition summed to \$525,000 for the third quarter 2015. For the nine months ended September 30, 2015, salaries and wages were \$6.5 million or 27.6% higher than the comparable period in 2014.

In the third quarter of 2015, employee benefits costs increased \$381,000 or 18.6% to \$2.4 million from a year ago. These costs reflect the increased staffing and salary costs, discussed above.

Seacoast National utilizes third parties for its core data processing systems and outsourced data processing costs are directly related to the number of transactions processed. Outsourced data processing costs totaled \$3.3 million for the third quarter of 2015, an increase of \$1.5 million or 85.2% from a year ago, and were \$2.4 million or 45.9% higher for the first nine months of 2015, when compared to the same period in 2014. Increased data processing costs included one-time charges for conversion activity related to our acquisition. We continue to improve and enhance our mobile and other digital products and services through our core data processor, which may increase our outsourced data processing costs as customers adopt improvements and products.

Telephone and data line expenditures, including electronic communications with customers and between branch locations and personnel, as well as third party data processors, increased \$133,000 or 42.5% to \$446,000 for 2015 when compared to third quarter 2014, and were \$473,000 or 51.9% higher for the first nine months of 2015 versus

2014's first nine months. The addition of BANKshares and Grand locations and customers were the primary contributor to the increase.

Total occupancy, furniture and equipment expenses for the third quarter of 2015 increased \$772,000 or 30.8% (on an aggregate basis) to \$3.3 million year over year versus 2014's third quarter expense. Year-to-date through September 30, 2015, these expenses were \$1.5 million or 19.7% greater than for 2014. This increase was primarily driven by the twelve branches acquired in the BANKshares acquisition, and two offices acquired from Grand. A third Grand office was closed during the third quarter, due to its proximity to our existing location and resulted in a charge of \$121,000. Branch consolidations during the fourth quarter of 2014 lessened the impact of acquired locations as well. Branch consolidations are likely to continue for the Company and the banking industry in general, as customers increase their usage of digital and mobile products thereby lessening the necessity to visit offices.

For the third quarter of 2015, marketing expenses, including sales promotion costs, ad agency production and printing costs, digital, newspaper, TV and radio advertising, and other public relations costs, increased by \$174,000 or 18.8% to \$1.1 million, compared to the third quarter of 2014. Year-to-date these costs were \$887,000 or 36.8% higher, versus 2014. Primary to the increase during the third quarter of 2015 were efforts to solidify customer acquisition and corporate brand awareness surrounding the Grand Palm Beach footprint that contributed \$133,000.

Legal and professional fees were higher by \$1.1 million or 98.5% from the third quarter a year ago, and were \$1.1 million higher for the first nine months of 2015, versus 2014. Third quarter 2015 included acquisition related fees.

Other expenses were higher by \$987,000 or 43.3% for the third quarter of 2015 compared to a year ago, totaling \$3.3 million. Year-to-date for 2015, other expenses were \$2.3 million or 33.9% higher, compared to 2014. Larger increases during the third quarter of 2015 were driven by the BANKshares and Grand acquisitions and variable costs related to our successful lending activity.

CAPITAL RESOURCES

The Company's equity capital at September 30, 2015 has increased \$114.3 million to \$350.3 million since September 30, 2014, and the ratio of shareholders' equity to period end total assets was 10.37% at September 30, 2015, 26 basis points higher than at December 31, 2014. During the third quarter of 2015, the Grand transaction increased shareholder's equity \$17.2 million and during the fourth quarter of 2014, the BANKshares transaction increased shareholders' equity \$76.8 million as we issued shares of common stock as consideration for each merger.

Activity in shareholders' equity for the nine months ended September 30, 2015 and 2014 follows:

Edgar Filing: SEACOAST BANKING CORP OF FLORIDA - Form 10-Q

(Dollars in thousands)	2015	2014
Beginning balance at December 31, 2014 and 2013	\$312,651	\$198,604
Net income	16,105	7,213
Issuance of stock pursuant to acquisition of Grand	17,172	0
Issuance of stock, net of related expense	0	24,637
Stock compensation	1,862	700
Treasury shares acquired	(47)	(250)
Change in other comprehensive income	2,537	5,051
Ending balance at September 30, 2015 and 2014	\$350,280	\$235,955

Seacoast's management uses certain "non-GAAP" financial measures in its analysis of the Company's capital adequacy. Seacoast's management uses these measures to assess the quality of capital and believes that investors may find it useful in their analysis of the Company. The capital measures are not necessarily comparable to similar capital measures that may be presented by other companies.

Capital ratios remain healthy and are well above regulatory requirements for well-capitalized institutions.

	Seacoast (Consolidated)		Seacoast National		Minimum to be Well Capitalized*	
September 30, 2015:						
Common equity Tier 1 ratio (CET1)	12.94	%	12.79	%	6.5	%
Tier 1 capital ratio	14.73	%	12.79	%	8	%
Total risk-based capital ratio	15.55	%	13.61	%	10	%
Tier 1 leverage ratio	10.56	%	9.17	%	5	%

* For subsidiary bank only

The Company and Seacoast National are subject to various general regulatory policies and requirements relating to the payment of dividends, including requirements to maintain adequate capital above regulatory minimums. The appropriate federal bank regulatory authority may prohibit the payment of dividends where it has determined that the payment of dividends would be an unsafe or unsound practice. The Company is a legal entity separate and distinct from Seacoast National and its other subsidiaries, and the Company's primary source of cash and liquidity, other than securities offerings and borrowings, is dividends from its bank subsidiary. Without Office of the Comptroller of the Currency ("OCC") approval, Seacoast National can pay over \$75 million of dividends to the Company.

The OCC and the Federal Reserve have policies that encourage banks and bank holding companies to pay dividends from current earnings, and have the general authority to limit the dividends paid by national banks and bank holding companies, respectively, if such payment may be deemed to constitute an unsafe or unsound practice. If, in the particular circumstances, either of these federal regulators determined that the payment of dividends would constitute an unsafe or unsound banking practice, either the OCC or the Federal Reserve may, among other things, issue a cease and desist order prohibiting the payment of dividends by Seacoast National or us, respectively. Under a recently adopted Federal Reserve policy, the board of directors of a bank holding company must consider different factors to ensure that its dividend level is prudent relative to the organization's financial position and is not based on overly optimistic earnings scenarios such as any potential events that may occur before the payment date that could affect its ability to pay, while still maintaining a strong financial position. As a general matter, the Federal Reserve has indicated that the board of directors of a bank holding company, such as Seacoast, should consult with the Federal Reserve and eliminate, defer, or significantly reduce the bank holding company's dividends if: (i) its net income available to shareholders for the past four quarters, net of dividends previously paid during that period, is not sufficient to fully fund the dividends; (ii) its prospective rate of earnings retention is not consistent with its capital needs and overall current and prospective financial condition; or (iii) it will not meet, or is in danger of not meeting, its minimum regulatory capital adequacy ratios.

FINANCIAL CONDITION

Total assets increased \$1.016 billion or 43.0% from September 30, 2014 to \$3.4 billion at September 30, 2015. The acquisition of BANKshares and Grand, along with organic growth, has driven this balance sheet success.

LOAN PORTFOLIO

Total loans (net of unearned income) were \$2.1 billion at September 30, 2015, \$708.4 million or 50.9% more than at September 30, 2014, and \$277.6 million or 15.2% more than at December 31, 2014. The BANKshares acquisition on October 1, 2014 and Grand acquisition on July 17, 2015, contributed \$365 million and \$112 million in loans, respectively. The Company continues to look for opportunities to invest excess liquidity, and believes the best current use is to fund loan growth. Additional new commercial relationship managers hired over the past three years have increased loan growth, and are expected to continue to do so prospectively. The following tables detail loan portfolio composition at September 30, 2015, December 31, 2014 and September 30, 2014:

September 30, 2015	Portfolio Loans (Dollars in thousands)	PCI Loans	PUL's	Total

-----------------------	-------------	----	---	----	---	-------------

The Company defines commercial real estate in accordance with the guidance on “Concentrations in Commercial Real Estate Lending” (the “Guidance”) issued by the federal bank regulatory agencies in 2006.

Commercial real estate mortgages were higher by \$420.5 million or 73.7% to \$991.2 million at September 30, 2015, compared to September 30, 2014, a result of improving loan production and loans acquired in the mergers. Granularity of commercial real estate lending is an aim, with office buildings of \$239.1 million comprising the largest concentration, a substantial portion owner-occupied. Portfolio composition also includes lending for retail trade, industrial, healthcare, churches and educational facilities, recreation, multifamily, mobile home parks, lodging, restaurants, agriculture, convenience stores, marinas, and other types of real estate.

The Company's ten largest commercial real estate funded and unfunded loan relationships at September 30, 2015 aggregated to \$118.6 million (versus \$106.7 million a year ago) and for the 43 commercial real estate relationships in excess of \$5 million the aggregate funded and unfunded totaled \$350.4 million, of which \$291.5 million was funded (compared to 29 relationships of \$233.2 million a year ago, of which \$202.9 million was funded).

Fixed rate and adjustable rate loans secured by commercial real estate, excluding construction loans, totaled approximately \$712 million and \$279 million, respectively, at September 30, 2015, compared to \$390 million and \$181 million, respectively, a year ago.

Adjustable and fixed rate residential real estate mortgages were higher at September 30, 2015, by \$18.0 million or 4.3% and \$18.4 million or 20.0%, respectively, compared to a year ago. At September 30, 2015, approximately \$435 million or 60% of the Company's residential mortgage balances were adjustable (including hybrid adjustable rate mortgages), compared to \$417 million or 67% at September 30, 2014. Loans secured by residential properties having fixed rates totaled approximately \$111 million at September 30, 2015, of which 15- and 30-year mortgages totaled approximately \$26 million and \$85 million, respectively. The remaining fixed rate balances were comprised of home improvement loans, most with maturities of 10 years or less, that increased \$18.0 million or 34.5% since September 30, 2014. In comparison, loans secured by residential properties having fixed rates totaled approximately \$92 million at September 30, 2014, with 15- and 30-year fixed rate residential mortgages totaling approximately \$22 million and \$70 million, respectively. The Company also has a growing home equity line portfolio, primarily floating rates, totaling approximately \$107 million at September 30, 2015, higher than the \$62 million that was outstanding at September 30, 2014, and validating improving property values.

Reflecting the impact of improved economic conditions and the BankFIRST and Grand acquisitions, commercial loans outstanding at third quarter end 2015 increased to \$210.3 million, more than doubling from \$91.3 million a year ago. Commercial lending activities are directed principally towards businesses whose demand for funds are within the Company's lending limits, such as small- to medium-sized professional firms, retail and wholesale outlets, and light industrial and manufacturing concerns. Such businesses are smaller and subject to the risks of lending to small to medium sized businesses, including, but not limited to, the effects of a downturn in the local economy, possible business failure, and insufficient cash flows.

At September 30, 2015, the Company had unfunded commitments to make loans of \$335 million, compared to \$168 million at September 30, 2014.

Loan Concentrations

Over the past five years, the Company has been pursuing an aggressive program to reduce exposure to loan types that have been most impacted by stressed market conditions in order to achieve lower levels of credit loss volatility. Commercial loan relationships greater than \$10 million were reduced by \$62.8 million to \$98.8 million (or 4.7% of the total loan portfolio) at September 30, 2015, compared with \$161.7 million (or 13.0% of the total portfolio) at year-end 2010.

Concentrations in total construction and land development loans and total commercial real estate (CRE) loans (as defined by regulatory guidance) have been substantially reduced. Construction and land development and commercial real estate loan concentrations as a percentage of total risk based capital, have decreased from 39% and 218%, respectively, at December 31, 2010, to 30% and 198%, respectively, as of September 30, 2015.

ALLOWANCE FOR LOAN LOSSES

Management continuously monitors the quality of the loan portfolio and maintains an allowance for loan losses it believes sufficient to absorb probable losses inherent in the loan portfolio. The allowance for loan losses totaled \$19.3 million at September 30, 2015, compared to \$17.6 million at September 30, 2014. This amount was \$2.3 million more than at December 31, 2014, reflecting the growth in the portfolio. The allowance for loan losses (“ALLL”) framework has four basic elements. Specific allowances for loans individually evaluated for impairment. General allowances for pools of homogeneous non-purchased loans (“portfolio loans”) within the portfolio that have similar risk characteristics, which are not individually evaluated. Specific allowances for purchased impaired loans which are individually evaluated based on the loans expected principal and interest cash flows. General allowances for purchased unimpaired pools of homogeneous loans that have similar risk characteristics. The aggregate of these four components results in our total allowance for loan losses.

The first element of the ALLL analysis involves the estimation of allowance specific to individually evaluated impaired portfolio loans, including accruing and nonaccruing restructured commercial and consumer loans. In this process, a specific allowance is established for impaired loans based on an analysis of the most probable sources of repayment, including discounted cash flows, liquidation of collateral, or the market value of the loan itself. It is the Company’s policy to charge off any portion of the loan deemed a loss. Restructured consumer loans are also evaluated in this element of the estimate. As of September 30, 2015, the specific allowance related to impaired loans individually evaluated totaled \$3.1 million, compared to \$4.4 million as of September 30, 2014.

The second element of the ALLL analysis, the general allowance for homogeneous portfolio loan pools not individually evaluated, is determined by applying allowance factors to pools of loans within the portfolio that have similar risk characteristics. The general allowance factors are determined using a baseline factor that is developed from an analysis of historical net charge-off experience and qualitative factors designed and intended to measure expected losses. These baseline factors are developed and applied to the various portfolio loan pools. Adjustments may be made to baseline reserves for some of the loan pools based on an assessment of internal and external influences on credit quality not fully reflected in the historical loss. These influences may include elements such as changes in concentration risk, macroeconomic conditions, and/or recent observable asset quality trends.

The third component consists of amounts reserved for purchased credit-impaired loans. On a quarterly basis, the Company updates the amount of loan principal and interest cash flows expected to be collected, incorporating assumptions regarding default rates, loss severities, the amounts and timing of prepayments and other factors that are reflective of current market conditions. Probable decreases in expected loan principal cash flows trigger the recognition of impairment, which is then measured as the present value of the expected principal loss plus any related foregone interest cash flows discounted at the pool's effective interest rate. Impairments that occur after the acquisition date are recognized through the provision for loan losses. Probable and significant increases in expected principal cash flows would first reverse any previously recorded allowance for loan losses; any remaining increases are recognized prospectively as interest income. The impacts of (i) prepayments, (ii) changes in variable interest rates, and (iii) any other changes in the timing of expected cash flows are recognized prospectively as adjustments to interest income. Disposals of loans, which may include sales of loans, receipt of payments in full by the borrower, or foreclosure, result in removal of the loan from the purchased credit impaired portfolio.

The final component consists of amounts reserved for purchased unimpaired loans. Loans collectively evaluated for impairment reported at September 30, 2015 include loans acquired from BANKshares on October 1, 2014, and Grand on July 17, 2015, that are not PCI loans. These loans are performing loans recorded at estimated fair value at the acquisition date. This amount will accrete into interest income over the remaining lives of the related loans on a level yield basis, but remains adequate at September 30, 2015.

Our analyses of the adequacy of the allowance for loan losses also takes into account qualitative factors such as credit quality, loan concentrations, internal controls, audit results, staff turnover, local market conditions and loan growth.

The Company's independent Credit Administration Department assigns all loss factors to the individual internal risk ratings based on an estimate of the risk using a variety of tools and information. Its estimate includes consideration of the general economic environment which is incorporated into the overall allowance. In addition, the portfolio loans are segregated into a graded loan portfolio, residential, installment, home equity, and unsecured signature lines, and loss factors are calculated for each portfolio.

The loss factors assigned to the graded loan portfolio are based on the historical migration of actual losses by grade over 4, 8, 12, 16, 20 and 24 quarter intervals. Minimum and maximum average historical loss rates over one to five years are referenced in setting the loss factors by grade within the graded portfolio. Management uses historical loss factors as its starting point, and qualitative elements are considered to capture trends within each portion of the graded portfolio. The direction and expectations of past dues, charge-offs, nonaccruals, classified loans, portfolio mix, market conditions, and risk management controls are considered in setting loss factors for the graded portfolio. The loan loss migration indicates that the minimum and maximum average loss rates and median loss rates over the past many quarters have been declining. Also, the level of criticized and classified loans has been declining as a result of a combination of upgrades, loan payoff and loan sales, which are reducing the risk profile of the loan portfolio. Additionally, the risk profile has declined given the shift in complexion of the graded portfolio, particularly a reduced level of commercial real estate loan concentrations.

Residential and consumer loans (installment, secured lines, and unsecured lines) are analyzed differently as risk ratings, or grades, are not assigned to individual loans. Residential and consumer loan losses are tracked by pool. Management examines the historical losses over one to five years in its determination of the appropriate loss factor for vintages of loans currently in the portfolio rather than the vintages that produced the significant losses in prior years. These loss factors are then adjusted by qualitative factors determined by management to reflect potential probable losses inherent in each loan pool. Qualitative factors may include various loan or property types, loan to value, concentrations and economic and environmental factors.

Residential loans that become 90 days past due are placed on nonaccrual and a specific allowance is made for any loan that becomes 120 days past due. Residential loans are subsequently written down if they become 180 days past due and such write-downs are supported by a current appraisal, consistent with current banking regulations.

Our charge-off policy meets or exceeds regulatory minimums. Losses on unsecured consumer loans are recognized at 90 days past due compared to the regulatory loss criteria of 120 days. Secured consumer loans, including residential real estate, are typically charged-off or charged down between 120 and 180 days past due, depending on the collateral type, in compliance with Federal Financial Institution Examination Council guidelines. Commercial loans and real estate loans are typically placed on nonaccrual status when principal or interest is past due for 90 days or more, unless the loan is both secured by collateral having realizable value sufficient to discharge the debt in-full and the loan is in the legal process of collection. Secured loans may be charged-down to the estimated value of the collateral with previously accrued unpaid interest reversed. Subsequent charge-offs may be required as a result of changes in the market value of collateral or other repayment prospects. Initial charge-off amounts are based on valuation estimates derived from appraisals, broker price opinions, or other market information. Generally, new appraisals are not received until the foreclosure process is completed; however, collateral values are evaluated periodically based on market information and incremental charge-offs are recorded if it is determined that collateral values have declined from their initial estimates.

Management continually evaluates the allowance for loan losses methodology and seeks to refine and enhance this process as appropriate. As a result, it is likely that the methodology will continue to evolve over time.

Our Loan Review unit is independent, and performs loan reviews and evaluates a representative sample of credit extensions after the fact for appropriate individual internal risk ratings. Loan Review has the authority to change internal risk ratings and is responsible for assessing the adequacy of credit underwriting. This unit reports directly to the Directors' Loan Committee of Seacoast National's board of directors.

Net recoveries for the first and second quarters of 2015 totaled \$217,000 and \$217,000, respectively, and net charge-offs summed to \$450,000 for the third quarter of 2015. In comparison, net recoveries of \$139,000, \$112,000, and \$856,000 were recorded for the same periods in 2014. Note F to the financial statements (titled "Impaired Loans

and Allowance for Loan Losses”) summarizes the Company’s allocation of the allowance for loan losses to construction and land development loans, commercial and residential real estate loans, commercial and financial loans, and consumer loans, and provides more specific detail regarding charge-offs and recoveries for each loan component and the composition of the loan portfolio at September 30, 2015 and December 31, 2014. Although there is no assurance that we will not have elevated charge-offs in the future, we believe that we have significantly reduced the risks in our loan portfolio and that with stabilizing market conditions, future charge-offs should continue to decline.

The allowance as a percentage of portfolio loans outstanding was 0.92% at September 30, 2015, compared to 1.26% at September 30, 2014. Excluding acquired loans, the allowance as a percentage of portfolio loans outstanding was 1.11% at September 30, 2015, compared to 1.26% at September 30, 2014. The allowance for loan losses represents management's estimate of an amount adequate in relation to the risk of losses inherent in the loan portfolio. The reduced level of impaired loans contributed to a lower risk of loss and the lower allowance for loan losses as of September 30, 2015, compared to September 30, 2014. The risk profile of the loan portfolio has been reduced by implementing a program to decrease the level of credit risk in such portfolio by strengthening credit management methodologies and implementing a low risk "back-to-basics" strategic plan for loan growth. New loan production has shifted to adjustable rate residential real estate loans, owner-occupied commercial real estate, small business loans for professionals and businesses, and consumer lending. Strategies, processes and controls are in place to ensure that new production is well underwritten and maintains a focus on smaller, diversified and lower-risk lending. Aided by initiatives embodied in new loan programs and continued aggressive collection actions and the acquired loans, the portfolio mix has changed dramatically and has become more diversified. The improved mix is most evident by a lower percentage of loans in income producing commercial real estate and construction and land development loans. Prospectively, we anticipate that the allowance will likely benefit from continued improvement in our credit quality, but offset by more normal loan growth as business activity and the economy continues to improve.

Concentrations of credit risk, discussed under the caption "Loan Portfolio" of this discussion and analysis, can affect the level of the allowance and may involve loans to one borrower, an affiliated group of borrowers, borrowers engaged in or dependent upon the same industry, or a group of borrowers whose loans are predicated on the same type of collateral. The Company's most significant concentration of credit is a portfolio of loans secured by real estate. At September 30, 2015, the Company had \$1.810 billion in loans secured by real estate, representing 86.2% of total loans, up from \$1.252 billion but slightly lower as a percent of total loans (versus 90.0%) at September 30, 2014. In addition, the Company is subject to a geographic concentration of credit because it only operates in central and southeastern Florida.

While it is the Company's policy to charge off in the current period loans in which a loss is considered probable, there are additional risks of future losses that cannot be quantified precisely or attributed to particular loans or classes of loans. Because these risks include the state of the economy, borrower payment behaviors and local market conditions as well as conditions affecting individual borrowers, management's judgment of the allowance is necessarily approximate and imprecise. The allowance is also subject to regulatory examinations and determinations as to adequacy, which may take into account such factors as the methodology used to calculate the allowance for loan losses and the size of the allowance for loan losses in comparison to a group of peer companies identified by the regulatory agencies.

In assessing the adequacy of the allowance, management relies predominantly on its ongoing review of the loan portfolio, which is undertaken both to ascertain whether there are probable losses that must be charged off and to assess the risk characteristics of the portfolio in aggregate. This review considers the judgments of management, and also those of bank regulatory agencies that review the loan portfolio as part of their regular examination process. Our bank regulators have generally agreed with our credit assessment, however in the future, regulators could seek additional provisions to our allowance for loan losses, which would reduce our earnings.

NONPERFORMING ASSETS

Nonperforming assets (“NPAs”) at September 30, 2015 totaled \$24.5 million and were comprised of \$14.5 million of nonaccrual portfolio loans, \$2.6 million of nonaccrual purchased loans, \$4.2 million of non-acquired other real estate owned (“OREO”) and \$3.2 million of acquired OREO. In comparison, NPAs at September 30, 2014 totaled \$24.0 million (comprised of \$18.9 million in nonaccrual loans and \$5.0 million of OREO). At September 30, 2015, approximately 98.4% of nonaccrual loans were secured with real estate, the remainder principally by marine vessels, automobiles and trucks. At September 30, 2015, nonaccrual loans have been written down by approximately \$4.4 million or 22.2% of the original loan balance (including specific impairment reserves).

As anticipated, the Company closed a number of OREO sales during the last twelve months that reduced non-acquired OREO outstanding. Since September 30, 2014, non-acquired OREO has declined \$0.8 million or 16.6%. This is reflective of our improving credit quality.

The table below shows the nonperforming loan inflows by quarter for 2015, 2014 and 2013:

New Nonperforming Loans (Dollars in thousands)	2015	2014	2013	2012
First quarter	\$2,576	\$1,651	\$2,868	\$20,207
Second quarter	2,349	810	2,949	17,291
Third quarter	820	523	2,019	14,521
Fourth quarter		5,525	2,167	6,891

During the nine months ended September 30, 2015, \$5.7 million in loans were moved to nonperforming, compared to \$8.5 million for all of 2014. Of the \$5.5 million total for the fourth quarter 2014, \$4.0 million was related to loans purchased in the fourth quarter. Most of these loans are collateralized by real estate. NPAs are subject to changes in the economy, both nationally and locally, changes in monetary and fiscal policies, changes in borrowers’ payment behaviors and changes in conditions affecting various borrowers from Seacoast National. Based on lower classified assets and impaired loan balances as of September 30, 2015, management believes that prospective inflows to nonaccrual loans will continue to be reduced.

The Company pursues loan restructurings in selected cases where it expects to realize better values than may be expected through traditional collection activities. The Company has worked with retail mortgage customers, when possible, to achieve lower payment structures in an effort to avoid foreclosure. TDRs have been a part of the Company’s loss mitigation activities and can include rate reductions, payment extensions and principal deferrals. Company policy requires TDRs that are classified as nonaccrual loans after restructuring remain on nonaccrual until

performance can be verified, which usually requires six months of performance under the restructured loan terms. We are optimistic that some of these credits will rehabilitate and be upgraded versus migrating to nonperforming or OREO prospectively. Accruing restructured loans totaled \$20.5 million at September 30, 2015 compared to \$29.0 million at September 30, 2014, with \$3.4 million of the decline in accruing TDR commercial real estate mortgages and \$3.5 million in accruing TDR residential real estate mortgages. The tables below set forth details related to nonaccrual and restructured loans.

September 30, 2015 (Dollars in thousands)	Nonaccrual Loans			Accruing
	Noncurrent	Performing	Total	Restructured Loans
Construction & land development				
Residential	\$8	\$ 519	\$527	\$ 289
Commercial	343	42	385	61
Individuals	0	282	282	365
	351	843	1,194	715
Residential real estate mortgages	524	10,323	10,847	12,203
Commercial real estate mortgages	2,614	2,188	4,802	7,220
Real estate loans	3,489	13,354	16,843	20,138
Commercial and financial	0	0	0	18
Consumer	68	199	267	387
	\$3,557	\$ 13,553	\$17,110	\$ 20,543

At September 30, 2015 and 2014, total TDRs (performing and nonperforming) were comprised of the following loans by type of modification:

(Dollars in thousands)	2015		2014	
	Number	Amount	Number	Amount
Rate reduction	94	\$16,255	108	\$21,258
Maturity extended with change in terms	62	7,459	76	9,766
Forgiveness of principal	0	0	1	1,588
Chapter 7 bankruptcies	48	2,816	57	3,691
Not elsewhere classified	14	1,876	10	2,548
	218	\$28,406	252	\$38,851

During the first nine months of 2015, newly identified TDRs totaled \$2.2 million, compared to \$5.5 million for all of 2014. Loan modifications are not reported in calendar years after modification if the loans were modified at an interest rate equal to the yields of new loan originations with comparable risk and the loans are performing based on the terms of the restructuring agreements. No accruing loans that were restructured within the twelve months preceding September 30, 2015 defaulted during the nine months ended September 30, 2015, or for the first nine months of 2014. A restructured loan is considered in default when it becomes 60 days or more past due under the modified terms, has been transferred to nonaccrual status, or has been transferred to other real estate owned.

At September 30, 2015, portfolio loans totaling \$34.7 million were considered impaired (comprised of nonaccrual, loans 90 days or more past due, and TDRs) and \$3.1 million of the allowance for loan losses was allocated for potential losses on these loans, compared to \$47.9 million and \$4.4 million, respectively, at September 30, 2014.

In accordance with regulatory reporting requirements, loans are placed on nonaccrual following the Retail Classification of Loan interagency guidance. Typically loans 90 days or more past due are reviewed for impairment, and if deemed impaired, are placed on nonaccrual. Once impaired, the current fair market value of the collateral is assessed and a specific reserve and/or charge-off taken. Quarterly thereafter, the loan carrying value is analyzed and any changes are appropriately made as described above.

CASH AND CASH EQUIVALENTS

Total cash and cash equivalents decreased slightly, by \$0.1 million, during the first nine months of 2015, compared to December 31, 2014.

SECURITIES

At September 30, 2015, the Company had no trading securities, \$728.2 million in securities available for sale (representing 77.7% of the total portfolio), with the remainder of \$209.0 million in securities held for investment (representing 22.3% of the total portfolio). The Company's total securities portfolio increased \$158.9 million or 20.4% from September 30, 2014, primarily as a result of efforts to invest excess liquidity and short-term borrowings, and the addition of securities from the mergers with BANKshares and Grand. Since year-end, the total securities portfolio decreased modestly, by \$12.1 million or 1.3%.

As part of the Company's interest rate risk management process, an average duration for the securities portfolio is targeted. In addition, securities are acquired which return principal monthly that can be reinvested.

The effective duration of the investment portfolio at September 30, 2015 was 3.3 years, compared to a year ago when the duration was 3.8 years.

At September 30, 2015, available for sale securities had gross unrealized losses of \$5.6 million and gross unrealized gains of \$4.3 million, compared to gross unrealized losses of \$9.4 million and gross unrealized gains of \$4.4 million at December 31, 2014. All of the securities with unrealized losses are reviewed for other-than-temporary impairment at least quarterly. As a result of these reviews during the first, second and quarters of 2015 and all four quarters of 2014, it was determined that unrealized losses were not other-than-temporarily impaired, and the Company has the intent and ability to retain these securities until recovery over the periods presented (see additional discussion under "Critical Accounting Estimates—Fair Value Measurements").

Company management considers the overall quality of the securities portfolio to be high. The Company has no exposure to securities with subprime collateral. The Company holds no interests in trust preferred securities.

DEPOSITS AND BORROWINGS

The Company's balance sheet continues to be primarily core funded.

Total deposits increased \$933.7 million or 51.6% to \$2.74 billion at September 30, 2015, compared to one year earlier. The acquisition of BANKshares in the fourth quarter 2014 contributed approximately \$516.3 million in total deposits. The acquisition of Grand in July 2015 contributed approximately \$188.4 million in total deposits. Since September 30, 2014, interest bearing deposits (interest bearing demand, savings and money markets deposits) increased \$526.2 million or 50.6% to \$1.57 billion, noninterest bearing demand deposits increased \$347.9 million or 66.6% to \$869.9 million, and CDs increased \$59.7 million or 24.2% to \$306.6 million.

Excluding the Grand acquisition, total deposits increased \$140.4 million since December 31, 2014, reflecting strong household growth and, in part, due to \$42.2 million from relationships with governmental entities. Also contributing was an increased focus on small business relationships in the more populated metropolitan areas of Palm Beach County and Central Florida.

Customer repurchase agreements totaled \$148.6 million at September 30, 2015, increasing \$24.2 million or 19.4% from September 30, 2014. The repurchase agreements are offered by Seacoast to select customers who wish to sweep excess balances on a daily basis for investment purposes. Funds from local government entities comprise a significant amount of the outstanding balance, with safety a major concern for these customers.

At September 30, 2015, other borrowings were comprised of subordinated debt of \$69.9 million related to trust preferred securities issued by trusts organized or acquired by the Company, and advances from the Federal Home Loan Bank ("FHLB") of \$50.0 million. The FHLB advances mature in 2017. For 2015 and 2014, the weighted average cost of these FHLB advances was 3.22%.

The Company has two wholly owned trust subsidiaries, SBCF Capital Trust I and SBCF Statutory Trust II that were both formed in 2005. In 2007, the Company formed an additional wholly owned trust subsidiary, SBCF Statutory Trust III. The 2005 trusts each issued \$20.0 million (totaling \$40.0 million) of trust preferred securities and the 2007 trust issued an additional \$12.0 million in trust preferred securities. As part of the October 1, 2014 BANKshares acquisition the Company inherited three junior subordinated debentures totaling \$5.2 million, \$4.1 million, and \$5.2 million, respectively. Also, as part of the Grand acquisition, the Company inherited an additional junior subordinated debenture totaling \$7.2 million. The acquired junior subordinated debentures (in accordance with ASU 805 Business Combinations) were recorded at fair value, which collectively is \$5.4 million lower than face value and amortizing into interest expense over their remaining term to maturity. All trust preferred securities are guaranteed by the Company on a junior subordinated basis.

Under Basel III and Federal Reserve rules, qualified trust preferred securities and other restricted capital elements can be included as Tier 1 capital, within limitations. The Company believes that its trust preferred securities qualify under these capital rules. The weighted average interest rate of our outstanding subordinated debt related to trust preferred securities was 2.38% for the nine month period ended September 30, 2015, compared to 1.87% for all of 2014.

OFF-BALANCE SHEET TRANSACTIONS

In the normal course of business, we may engage in a variety of financial transactions that, under generally accepted accounting principles, either are not recorded on the balance sheet or are recorded on the balance sheet in amounts that

differ from the full contract or notional amounts. These transactions involve varying elements of market, credit and liquidity risk.

Lending commitments include unfunded loan commitments and standby and commercial letters of credit. A large majority of loan commitments and standby letters of credit expire without being funded, and accordingly, total contractual amounts are not representative of our actual future credit exposure or liquidity requirements. Loan commitments and letters of credit expose the Company to credit risk in the event that the customer draws on the commitment and subsequently fails to perform under the terms of the lending agreement.

Loan commitments to customers are made in the normal course of our commercial and retail lending businesses. For commercial customers, loan commitments generally take the form of revolving credit arrangements. For retail customers, loan commitments generally are lines of credit secured by residential property. These instruments are not recorded on the balance sheet until funds are advanced under the commitment. For loan commitments, the contractual amount of a commitment represents the maximum potential credit risk that could result if the entire commitment had been funded, the borrower had not performed according to the terms of the contract, and no collateral had been provided. Loan commitments were \$335 million at September 30, 2015 and \$168 million at September 30, 2014.

INTEREST RATE SENSITIVITY

Fluctuations in interest rates may result in changes in the fair value of the Company's financial instruments, cash flows and net interest income. This risk is managed using simulation modeling to calculate the most likely interest rate risk utilizing estimated loan and deposit growth. The objective is to optimize the Company's financial position, liquidity, and net interest income while limiting their volatility.

Senior management regularly reviews the overall interest rate risk position and evaluates strategies to manage the risk. The Company's most recent Asset and Liability Management Committee ("ALCO") model simulation indicates net interest income would increase 10.3% if interest rates are shocked 200 basis points up over the next 12 months and 4.8% if interest rates are shocked up 100 basis points. This compares with the Company's third quarter 2014 model simulation, which indicated net interest income would increase 7.1% if interest rates are shocked 200 basis points up over the next 12 months and 3.9% if interest rates are shocked up 100 basis points. Recent regulatory guidance has placed more emphasis on rate shocks.

The Company's most recent ALCO model simulation had a positive gap position based on contractual and prepayment assumptions for the next 12 months, with a positive cumulative interest rate sensitivity gap as a percentage of total earning assets of 14.8%. This result includes assumptions for core deposit re-pricing validated for the Company by an independent third party consulting group.

The computations of interest rate risk do not necessarily include certain actions management may undertake to manage this risk in response to changes in interest rates. Derivative financial instruments, such as interest rate swaps, options, caps, floors, futures and forward contracts may be utilized as components of the Company's risk management profile.

LIQUIDITY MANAGEMENT

Liquidity risk involves the risk of being unable to fund assets with the appropriate duration and rate-based liability, as well as the risk of not being able to meet unexpected cash needs. Liquidity planning and management are necessary to ensure the ability to fund operations cost effectively and to meet current and future potential obligations such as loan commitments and unexpected deposit outflows.

Funding sources primarily include customer-based core deposits, collateral-backed borrowings, cash flows from operations, and asset securitizations and sales.

Cash flows from operations are a significant component of liquidity risk management and we consider both deposit maturities and the scheduled cash flows from loan and investment maturities and payments. Deposits are also a primary source of liquidity. The stability of this funding source is affected by numerous factors, including returns available to customers on alternative investments, the quality of customer service levels, safety and competitive forces. We routinely use securities and loans as collateral for secured borrowings. In the event of severe market disruptions, we have access to secured borrowings through the FHLB and the Federal Reserve Bank of Atlanta under its borrower-in-custody program.

Contractual maturities for assets and liabilities are reviewed to meet current and expected future liquidity requirements. Sources of liquidity, both anticipated and unanticipated, are maintained through a portfolio of high quality marketable assets, such as residential mortgage loans, securities held for sale and interest bearing deposits. The Company is also able to provide short term financing of its activities by selling, under an agreement to repurchase, United States Treasury and Government agency securities not pledged to secure public deposits or trust funds. At September 30, 2015, Seacoast National had available unsecured lines of \$40 million and lines of credit under current lendable collateral value, which are subject to change, of \$868 million. Seacoast National had \$575 million of United States Treasury and Government agency securities, mortgage backed securities and collateral lending obligations not pledged and available for use under repurchase agreements, and had an additional \$275 million in residential and commercial real estate loans available as collateral. In comparison, at September 30, 2014, the Company had available unsecured lines of \$35 million and lines of credit of \$565 million, and had \$509 million of Treasury and Government agency securities, mortgage backed securities and collateral lending obligations not pledged and available for use under repurchase agreements, as well as an additional \$145 million in residential and commercial real estate loans available as collateral.

Liquidity, as measured in the form of cash and cash equivalents (including interest bearing deposits), totaled \$100.6 million on a consolidated basis at September 30, 2015 as compared to \$58.9 million at September 30, 2014. The composition of cash and cash equivalents has changed from a year ago. Over the past twelve months, cash and due from banks increased \$29.7 million to \$69.6 million and interest bearing deposits increased to \$31.0 million from \$19.0 million. The interest bearing deposits are maintained in Seacoast's account at the Federal Reserve Bank of Atlanta. Cash and cash equivalents vary with seasonal deposit movements and are generally higher in the winter than in the summer, and vary with the level of principal repayments and investment activity occurring in Seacoast National's securities and loan portfolios. Our intent is to reinvest excess liquidity into the loan and securities portfolios.

The Company does not rely on and is not dependent on off-balance sheet financing or wholesale funding.

The Company is a legal entity separate and distinct from Seacoast National and its other subsidiaries. Various legal limitations, including Section 23A and 23B of the Federal Reserve Act and Federal Reserve Regulation W, restrict Seacoast National from lending or otherwise supplying funds to the Company or its non-bank subsidiaries. The Company has traditionally relied upon dividends from Seacoast National and securities offerings to provide funds to pay the Company's expenses, to service the Company's debt and to pay dividends upon Company common stock and preferred stock. At September 30, 2015, the Company had cash and cash equivalents at the parent of approximately \$44.5 million, compared to \$38.3 million at December 31, 2014.

EFFECTS OF INFLATION AND CHANGING PRICES

The condensed consolidated financial statements and related financial data presented herein have been prepared in accordance with U.S. GAAP, which require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money, over time, due to inflation.

Unlike most industrial companies, virtually all of the assets and liabilities of a financial institution are monetary in nature. As a result, interest rates have a more significant impact on a financial institution's performance than the general level of inflation. However, inflation affects financial institutions by increasing their cost of goods and services purchased, as well as the cost of salaries and benefits, occupancy expense, and similar items. Inflation and related increases in interest rates generally decrease the market value of investments and loans held and may adversely affect liquidity, earnings, and shareholders' equity. Mortgage originations and re-financings tend to slow as interest rates increase, and higher interest rates likely will reduce the Company's earnings from such activities and the income from the sale of residential mortgage loans in the secondary market.

SPECIAL CAUTIONARY NOTICE REGARDING FORWARD LOOKING STATEMENTS

Various of the statements made herein under the captions "Management's Discussion and Analysis of Financial Condition and Results of Operations", "Quantitative and Qualitative Disclosures about Market Risk", "Risk Factors" and elsewhere, are "forward-looking statements" within the meaning and protections of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act").

Forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, estimates and intentions, and involve known and unknown risks, uncertainties and other factors, which may be beyond our control, and which may cause the actual results, performance or achievements of Seacoast to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. You should not expect us to update any forward-looking statements.

All statements other than statements of historical fact are statements that could be forward-looking statements. You can identify these forward-looking statements through our use of words such as "may," "will," "anticipate," "assume," "should," "support," "indicate," "would," "believe," "contemplate," "expect," "estimate," "continue," "further," "point to," "project," "co" other similar words and expressions of the future. These forward-looking statements may not be realized due to a variety of factors, including, without limitation:

- the effects of future economic and market conditions, including seasonality;
- governmental monetary and fiscal policies, as well as legislative, tax and regulatory changes;

legislative and regulatory changes, including changes in banking, securities and tax laws and regulations and their application by our regulators, and changes in the scope and cost of FDIC insurance and other coverage;

- changes in accounting policies, rules and practices;

the risks of changes in interest rates on the level and composition of deposits, loan demand, liquidity and the values of loan collateral, securities, and interest sensitive assets and liabilities; interest rate risks, sensitivities and the shape of the yield curve;

the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market areas and elsewhere, including institutions operating regionally, nationally and internationally, together with such competitors offering banking products and services by mail, telephone, computer and the Internet;

- the failure of assumptions underlying the establishment of reserves for possible loan losses;

the risks of mergers and acquisitions, include, without limitation, unexpected transaction costs, including the costs of integrating operations; the risks that the businesses will not be integrated successfully or that such integration may be more difficult, time-consuming or costly than expected;

the potential failure to fully or timely realize expected revenues and revenue synergies, including as the result of revenues following the merger being lower than expected;

the risk of deposit and customer attrition; any changes in deposit mix; unexpected operating and other costs, which may differ or change from expectations;

the risks of customer and employee loss and business disruption, including, without limitation, as the result of difficulties in maintaining relationships with employees; increased competitive pressures and solicitations of customers by competitors; as well as the difficulties and risks inherent with entering new markets; and

other risks and uncertainties described herein and in our annual report on Form 10-K for the year ended December 31, 2014 and otherwise in our Securities and Exchange Commission, or "SEC", reports and filings.

All written or oral forward-looking statements attributable to us are expressly qualified in their entirety by this cautionary notice. We have no obligation and do not undertake to update, revise or correct any of the forward-looking statements after the date of this report, or after the respective dates on which such statements otherwise are made.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

See Management's discussion and analysis "Interest Rate Sensitivity".

Market risk refers to potential losses arising from changes in interest rates, and other relevant market rates or prices.

Interest rate risk, defined as the exposure of net interest income and Economic Value of Equity, or "EVE," to adverse movements in interest rates, is the Company's primary market risk, and mainly arises from the structure of the balance sheet (non-trading activities). The Company is also exposed to market risk in its investing activities. The Company's Asset/Liability Committee, or "ALCO," meets regularly and is responsible for reviewing the interest rate sensitivity position of the Company and establishing policies to monitor and limit exposure to interest rate risk. The policies established by the ALCO are reviewed and approved by the Company's Board of Directors. The primary goal of interest rate risk management is to control exposure to interest rate risk, within policy limits approved by the Board. These limits reflect the Company's tolerance for interest rate risk over short-term and long-term horizons.

The Company also performs valuation analyses, which are used for evaluating levels of risk present in the balance sheet that might not be taken into account in the net interest income simulation analyses. Whereas net interest income simulation highlights exposures over a relatively short time horizon, valuation analysis incorporates all cash flows over the estimated remaining life of all balance sheet positions. The valuation of the balance sheet, at a point in time, is defined as the discounted present value of asset cash flows minus the discounted value of liability cash flows, the net result of which is the EVE. The sensitivity of EVE to changes in the level of interest rates is a measure of the longer-term re-pricing risks and options risks embedded in the balance sheet. In contrast to the net interest income simulation, which assumes interest rates will change over a period of time, EVE uses instantaneous changes in rates.

EVE values only the current balance sheet, and does not incorporate the growth assumptions that are used in the net interest income simulation model. As with the net interest income simulation model, assumptions about the timing and variability of balance sheet cash flows are critical in the EVE analysis. Particularly important are the assumptions driving prepayments and the expected changes in balances and pricing of the indeterminate life deposit portfolios. Core deposits are a more significant funding source for the Company, making the lives attached to core deposits more important to the accuracy of our modeling of EVE. The Company periodically reassesses its assumptions regarding the indeterminate lives of core deposits utilizing an independent third party resource to assist. With lower interest rates over a prolonged period, the average lives of core deposits have trended higher and favorably impacted model estimates of EVE for higher rates. Based on our third quarter 2015 modeling, an instantaneous 100 basis point increase in rates is estimated to increase the EVE 10.4% versus the EVE in a stable rate environment, while a 200 basis point increase in rates is estimated to increase the EVE 19.0%.

While an instantaneous and severe shift in interest rates is used in this analysis to provide an estimate of exposure under an extremely adverse scenario, a gradual shift in interest rates would have a much more modest impact. Since EVE measures the discounted present value of cash flows over the estimated lives of instruments, the change in EVE does not directly correlate to the degree that earnings would be impacted over a shorter time horizon, i.e., the next fiscal year. Further, EVE does not take into account factors such as future balance sheet growth, changes in product mix, change in yield curve relationships, and changing product spreads that could mitigate the adverse impact of changes in interest rates.

Item 4. CONTROLS AND PROCEDURES

The Company's management, with the participation of its chief executive officer and chief financial officer has evaluated the effectiveness of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) and Rule 15d-15(e) under the Exchange Act) as of September 30, 2015 and concluded that those disclosure controls and procedures are effective. There have been no changes to the Company's internal control over financial reporting that occurred since the beginning of the Company's third quarter of 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

While the Company believes that its existing disclosure controls and procedures have been effective to accomplish these objectives, the Company intends to continue to examine, refine and formalize its disclosure controls and procedures and to monitor ongoing developments in this area.

Part II OTHER INFORMATION**Item 1. Legal Proceedings**

The Company and its subsidiaries are subject, in the ordinary course, to litigation incident to the business in which they are engaged. Management presently believes that none of the legal proceedings to which the Company or any of its subsidiaries is a party or of which any of their property is the subject are materially likely to have a material adverse effect on the Company's consolidated financial position, or operating results or cash flows, although no assurance can be given with respect to the ultimate outcome of any such claim or litigation.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should consider the factors discussed in "Part I, Item 1A. Risk Factors" in our report on Form 10-K for the year ended December 31, 2014, which could materially affect our business, financial condition and prospective results. The risks described in this report, in our Form 10-K or our other SEC filings are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or future results. There have been no material changes with respect to the risk factors disclosed in our Annual Report on form 10-K for the year ended December 31, 2014.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer purchases of equity securities during the first nine months of 2015, entirely related to equity incentive plan activity, were as follows:

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as part of Public Announced Plan*	Maximum Number of Shares that May yet be Purchased Under the Plan
1/1/15 to 1/31/15	0	\$ 0.00	179,828	235,172
2/1/15 to 2/28/15	2,880	12.66	182,708	232,292
3/1/15 to 3/31/15	0	0.00	182,708	232,292

Edgar Filing: SEACOAST BANKING CORP OF FLORIDA - Form 10-Q

Total - 1st Quarter	2,880	12.66	182,708	232,292
4/1/15 to 4/30/15	740	14.13	183,448	231,552
5/1/15 to 5/31/15	0	0.00	183,448	231,552
6/1/15 to 6/30/15	0	0.00	183,448	231,552
Total - 2nd Quarter	740	14.13	183,448	231,552
7/1/15 to 7/31/15	0	0.00	183,448	231,552
8/1/15 to 8/31/15	0	0.00	183,448	231,552
9/1/15 to 9/30/15	0	0.00	183,448	231,552
Total - 3rd Quarter	0	0.00	183,448	231,552

*The plan to purchase equity securities totaling 165,000 was approved on September 18, 2001, with no expiration date. An additional 250,000 shares was added to the plan and approved on May 20, 2014.

Item 3. Defaults upon Senior Securities

None

Item 4. Mine Safety Disclosures

None

Item 5. Other Information
