Matsushita Group to Reorganize and Consolidate

Industrial Equipment Business

Osaka, Japan Matsushita Electric Industrial Co., Ltd. (MEI [NYSE symbol: MC]), best known for its Panasonic brand products, and Matsushita Electric Works, Ltd. (MEW) today announced a reorganization plan of their industrial equipment businesses in line with the comprehensive collaboration efforts between the two companies. The plan, involving businesses mainly carried out by MEI's subsidiary, Matsushita Industrial Information Equipment Co., Ltd. (MIIE), aims to eliminate overlaps, further maximizing the group's growth potential in the industrial equipment business and the electrical supplies business in the commercial building market.

The details of specific initiatives are as follows:

1. High-voltage power distribution equipment business and central monitoring and control system business to be integrated into MEW

Matsushita's power distribution equipment business will be consolidated by transferring MIIE's high-voltage power distribution equipment (CUBICLE) business and MEW's low-voltage power distribution equipment business (i.e. power distribution boards) for commercial buildings into a new MEW subsidiary, which will be established in January, 2005. The consolidation will allow MEW to offer a complete range of power distribution equipment, a critical component in electrical supplies business, from high voltage to low voltage.

Edgar Filing: MATSUSHITA ELECTRIC INDUSTRIAL CO LTD - Form 6-K

MIIE s central monitoring and control system business for facility management will be merged into MEW and placed under the management of its Security and Building Automation System (BAS) Business Promotion Department.

Table of Contents

2. Information equipment and systems businesses to be integrated into Panasonic Communications Co., Ltd.

Panasonic Communications Co., Ltd. (PCC) will take over MIIE's information equipment business, including such products as credit authorization terminals, barcode readers and Radio Frequency Identification (RFID) devices, as well as credit authorization terminal development and manufacturing functions currently carried out by Panasonic System Solutions Company (PSS).

At the same time, distribution systems business being done at Matsushita Industrial System Engineering Co., Ltd. (MISEC), a subsidiary of MIIE, will be transferred to a subsidiary of PCC.

This reorganization will boost the group's capability of developing new products with future growth potential such as contactless IC card and wireless tag readers in the RFID field. It will also contribute to increasing synergy effects in the areas of the manufacturing, procuring and marketing operations.

3. MIIE's two subsidiaries to be transferred to Matsushita Welding Systems Co., Ltd.

Two subsidiaries of MIIE, Kaga Matsushita Electric Co., Ltd. and MISEC, will be transferred to Matsushita Welding Systems Co., Ltd. Kaga Matsushita now serves as MIIE's manufacturing base for welding and CUBICLE related products, while MISEC offers public infrastructure businesses which include utility machinery and related services such as tunnel ventilation control systems and water and sewage treatment plants.

As a result of those consolidations and transfers, MEI will eventually take over MIIE. The reorganization is scheduled to take place on April 1, 2005. Two transfers, however, will be carried out on March 31, 2005: MIIE's CUBICLE business to the new subsidiary of MEW and MIIE's central monitoring and control system business to MEW.

About Matsushita Electric Industrial Co., Ltd. (Panasonic)

Matsushita Electric Industrial Co., Ltd., best known for its Panasonic brand name, is a worldwide leader in the development and manufacture of electronic products for a wide range of consumer, business, and industrial needs. Based in Osaka, Japan, the company recorded consolidated sales of US\$71.92 billion for the fiscal year ended March 31, 2004. Matsushita's shares are listed on the Tokyo, Osaka, Nagoya, New York (NYSE:MC), Euronext Amsterdam and Frankfurt stock exchanges. For more information on the company and its Panasonic brand, visit the Matsushita website at <http://www.panasonic.co.jp/global/top.html>.

To Our Shareholders

Fiscal 2005 First-half Business Results

During the first half of the current fiscal year, ending March 31, 2005 (fiscal 2005), the domestic economy in Japan showed moderate recovery in consumer spending, as well as increases in both exports and capital investment by corporations, although concerns arose regarding inventory adjustments that began in some areas of the electronic components industry and rising materials costs, including crude oil prices. Overseas, the U.S. economy showed modest progress, mainly a result of proactive monetary and low-interest rate policies. Meanwhile, the economy in China also continued high growth, despite government policies to curb excessive capital expenditure.

In fiscal 2005, the first year of Matsushita's three-year Leap Ahead 21 plan, the company implemented initiatives relating to product competitiveness, enhanced profitability and strengthened overseas businesses, all aimed at achieving global excellence and sustainable growth.

Regarding product competitiveness, Matsushita is focusing management resources into growth areas, while developing a new line of competitive V-products that incorporate proprietary black-box technologies, universal design concepts and environmentally friendly features. To enhance profitability, the company is accelerating business restructuring initiatives that will improve productivity. Matsushita is also focusing efforts on the reduction of inventories and further strengthen its management structure through aggressive corporate cost reduction projects. To strengthen overseas businesses, Matsushita will continue to promote simultaneous global product introductions to meet rising worldwide demand for digital products for consumer use. Finally, through collaboration activities with Matsushita Electric Works, Ltd. (MEW), the new Matsushita Group will become a company that creates value for its customers by providing customers all over the world with solutions for comfortable living based on the concepts of security and brand loyalty, as well as providing products that are easy to use and inspiring.

Table of Contents

[Consolidated First-half Results]

An unusually hot summer in Japan, rising demand for digital audiovisual (AV) products and consumer demand related to the Athens Olympics contributed to steady sales gains in digital AV products, including V-products, as well as Home Appliances, and Components and Devices. The consolidation of MEW and PanaHome is also a factor for the increase in consolidated sales. Accordingly, consolidated sales increased 19% to 4,318.5 billion yen.

Regarding consolidated earnings, negative factors such as a strong yen, rising raw materials costs and intensified global price competition were more than offset by sales increases through positive introduction of V-products, as well as overall cost reductions and other positive factors. As a result, operating profit for the first fiscal half increased 96% to 156.3 billion yen, from 79.6 billion yen in the comparable period a year ago. Income before income taxes for the six-month period more than doubled to 137.3 billion yen, compared with 57.3 billion yen a year ago. In other income (deductions), the company incurred restructuring charges of 48.2 billion yen, while recording a 31.5 billion yen gain from the transfer of the substitutional portion of the Employees Pension Funds to the Government. Net income was also up, increasing 143% to 56.2 billion yen, as compared with 23.1 billion yen in the first half of the previous year.

[Non-consolidated (Parent Company Alone) First-half Results]

First-half parent-alone sales increased 6% to 2,071.3 billion yen, from 1,958.9 billion yen in the same six-month period a year ago. Sales increases were recorded in all product categories.

Regarding parent-alone earnings, operating profit totaled 59.7 billion yen, up 288% from 15.4 billion yen a year ago. This increase was realized mainly by sales gains and various cost reduction initiatives. Recurring profit also increased 27% to 68.1 billion yen, from 53.7 billion yen in the previous first half. In addition to operating profit, factors affecting recurring profit included dividend income and provisions for losses on investments. Parent-alone net income increased, up 10% to 50.4 billion yen, from 45.9 billion yen in the first half of last year, despite restructuring charges of 11.5 billion yen.

Table of Contents

New Policy for Providing Return to Shareholders

Company's Board of Directors decided to adopt a new policy for providing return to its shareholders and, based upon the policy, to increase the interim dividend per share for the current fiscal year to 7.5 yen and revise upward the year-end dividend forecast to 7.5 yen per share.

Matsushita will take all necessary measures to complete structural reforms by the end of the current fiscal year, and is accelerating the growth strategy of the new Matsushita Group to achieve its new mid-term management plan, Leap Ahead 21. Historically, Matsushita has distributed dividends at a stable level to its shareholders, however, Matsushita aims for providing return to shareholders, taking into consideration the results of operations, in order to further implement shareholder-oriented management. Matsushita aims to maximize corporate value by enhancing its reputation in capital markets through the steady growth of its mid-term business performance and return of profits to shareholders, based on its consolidated business performance. In particular, Matsushita will provide return to shareholders through dividend payments and own share repurchases, upon careful consideration of consolidated free cash flows (Matsushita defines free cash flows as the sum of net cash provided by operating activities and net cash used in investing activities).

From the perspective of return on the capital investment made by shareholders, Matsushita will, in principle, distribute profits to shareholders based on its consolidated business performance. Matsushita aims for promoting stable and continuous growth of return to shareholders, while at the same time taking into consideration various factors including mid-term business performance, capital expenditures requirements and the company's financial condition.

Matsushita will implement shareholder-oriented management by enhancing shareholder value per share through a reduction, in effect, of the number of issued and outstanding shares. This will be accomplished by repurchasing the company's own shares with surplus cash flows. Concurrently, Matsushita aims to enhance its business value by utilizing treasury stock for various business strategies. I would like to thank all our shareholders for your continued support in these endeavors.

November 2004

Sincerely,

Kunio Nakamura

President

Table of Contents

Leaping Ahead toward a Company that Creates Value for Customers

With the Value Creation 21 plan, which started April 1, 2001 and ended March 31, 2004, Matsushita carried out sweeping management reforms and organizational restructuring indicative of the Company's shift to a new growth strategy. In the process to open a path to further growth, the new mid-term Leap Ahead 21 plan was started on April 1, 2004.

The Company aims to achieve global excellence by 2010 to fulfill its mission of creating value for customers. The Leap Ahead 21 plan represents the midpoint toward achieving this goal, and will establish a foundation for sustainable growth.

Opening a Path to Further Growth with the Leap Ahead 21 plan

There are two main objectives in the Leap Ahead 21 plan. The first is to raise the Capital Cost Management (CCM)* results of all business domain companies to zero or above by the year ending March 31, 2006 (fiscal 2006). The second objective is to achieve a consolidated operating profit to sales ratio of 5% or more, and increase CCM to zero or above on a consolidated Group basis by fiscal 2007. We believe these objectives are the bare minimum for becoming a top global company, and we will make every effort to achieve them.

* CCM is a management benchmark created by Matsushita that emphasizes return on capital and efficient management.

Table of Contents

Growth Strategy (1)

Targeting Further Growth through V-products

One of Matsushita's strategies for further growth under the Leap Ahead 21 plan is the promotion of V-products, incorporating the Company's cutting-edge technologies. Under the previous Value Creation 21 plan, the successful launch of a wide variety of V-products, along with aggressive sales promotion and advertising, were the driving force behind the V-shaped recovery in Matsushita's business results. In fiscal 2005, the Company will continue to manufacture superior products, targeting sales of 1.5 trillion yen for 71 V-products. Matsushita will thereby establish solid pillars for future growth at each business domain company, based on these V-products.

V-products Become the Driving Force of Future Growth

V-products are those that can achieve a top share in high volume markets and contribute to enhanced overall profitability. In fiscal 2005, the Company will develop products and accelerate further growth under the following concepts.

New V-products for fiscal 2005 will:

- (1) utilize black-box technologies that cannot be easily imitated by competitors,
- (2) incorporate universal design concepts to improve convenience for all customers, and
- (3) have minimal impact on the environment in terms of energy and resource conservation.

V-products Based on Black-box Technologies

Black-box technologies are technologies and technological know-how that cannot be easily imitated by competitors. By utilizing such technologies, Matsushita will develop differentiated products and enhance the product competitiveness.

Black-box technologies are:

- (1) protected under intellectual property rights, such as patents,

- (2) made of complex materials, processes and know-how that cannot be copied, or
- (3) made using unique production methods, systems or control technologies.

Table of Contents

Growth Strategy (2)

Overseas Operations Play a Vital Role as a Growth Engine in Expanding Business and Enhancing Overall Earnings

Matsushita's overseas sales in fiscal 2004 exceeded domestic sales. In the Leap Ahead 21 plan, Matsushita has designated overseas operations as a growth engine. The Company will achieve growth by providing value-added products and services to customers worldwide, thus maintaining Matsushita's position as a global leader.

Strengthening of Businesses in China and Enhancing the Panasonic Brand Image

In recent years, China has become an extremely important region not only as a production base, but also as a market for the Company's products. As a high-growth region, China is therefore essential to Matsushita's business strategy. Matsushita aims to achieve a total business size of one trillion yen in China by fiscal 2006.

Also, beginning in fiscal 2004, Matsushita designated Panasonic as its unified global brand as part of efforts to enhance product and brand image throughout the world.

Further Synergies in Product Competitiveness and Marketing Strategies

With a trend toward shortened product lifecycles, the gradual launch of products into global markets results in lost profit opportunities. Matsushita therefore shortened the development lead-time of its DIGA series of DVD recorders. As a result, the time required for the global launch of these products was reduced from seven to two months. Matsushita will continue to promote simultaneous global product introductions of strategic products aiming at expanding sales and enhancing earnings.

Table of Contents

Growth Strategy (3)

Solutions for Comfortable Living by the New Matsushita Group

In the comprehensive business collaboration with MEW, which began in fiscal 2005, Matsushita and MEW, as a new Matsushita Group, will strive to improve corporate value through the development of new business fields.

Under a unified brand and business strategy, combining Matsushita's management resources with those of MEW, and providing customers all over the world with solutions for comfortable living, the two companies aim for global excellence.

Maximizing Synergy Effects through Comprehensive Business Collaboration with MEW

In the new Matsushita Group, products in the domestic market will be marketed under the National brand, whereas Panasonic will be used for products in overseas markets. At the same time, MEW's Shiodome Showroom (located in Shiodome, Tokyo) was renamed National Center Tokyo. Together with Matsushita's Panasonic Center (in Ariake, Tokyo), these showrooms constitute the main corporate communications facilities for the new Matsushita Group, through which the Company and MEW will communicate imaginative and innovative product concepts to customers.

Aiming to Become the Top-runner in Home Networking

To maximize the strengths of the two companies in development, manufacturing and sales, Matsushita will reorganize the electrical supplies, building materials and equipment, and home appliances businesses in April 2005. By combining the respective strengths of both companies, Matsushita aims to achieve the top position in the networking business, which links electrical appliances and AV products with networking systems.

Table of Contents

Corporate News

LCD Panel Joint Venture with Hitachi and Toshiba

Matsushita concluded a joint venture agreement with Hitachi, Ltd. and Toshiba Corporation to establish a company to manufacture and sell LCD panels for flat-panel TVs. The joint venture is scheduled to commence operations in January 2005. Ownership of the new company will be Matsushita (21-25%); Hitachi Displays, a wholly owned subsidiary of Hitachi (50%); and Toshiba (21-25%). The new company will seek capital investment from other LCD panel manufacturers in the future.

The joint venture will manufacture Amorphous TFT LCD panels for TVs of 23-32 inches, featuring a wider viewing-angle, outstanding color reproduction and lower cost. The Company's manufacturing line will be built within Hitachi Display's Mobara plant in Japan. Mass production is scheduled to begin in 2006, with a planned capacity of approximately 2.5 million 32-inch panels per year in 2008.

Construction of a New Semiconductor Production Facility at the Uozu Plant

Matsushita began construction of a new semiconductor production facility at its Uozu Plant in Japan to increase production capacity of advanced system LSIs. Matsushita is a leader in digital home electronics with its 0.13-micron process system LSIs. The Company will continue toward its vision of realizing a ubiquitous networking society through technologies such as the latest 90-nanometer production process for large-diameter 300mm wafers. Matsushita will provide advanced system LSIs focusing on DVDs, DTVs, mobile communications equipment, and network-related equipment as well as CCD image sensors. Production is scheduled to begin at the end of 2005, gradually increasing to 7,500 wafers per month. Toward the future, Matsushita will utilize further-advanced 65-nanometer processes, while expanding capacity.

World's Largest 65-inch High-definition PDP TV

Matsushita launched a new 65-inch high-definition PDP TV to meet the needs of consumers who wish to enjoy realistic, high-quality images available through DVDs and terrestrial digital broadcasting.

By employing the new PEAKS (Picture Enhancement Accelerator with Kinetic System) driver, Matsushita has realized the industry's highest picture quality of 3.62 billion colors² and 1,536 shades of gradation. Moreover, the new high-definition PDP TV boasts the world's highest contrast ratio of up to 3000:1.

(Notes) 1. As of September 6, 2004; plasma displays/plasma displays TVs available through consumer sales channels. (source: MEI)
2. Number of colors that can be constantly displayed on all pixels.

Table of Contents

The Industry s First SD Card integrated with smart card function

Matsushita developed the industry s first smartSD Card, an SD Memory Card with contactless smart card capabilities. The smartSD Card uses non-volatile FeRAM², which enables high-speed data writing and contactless data communication capabilities. The large-capacity flash memory in the smartSD Card can be used as an extra storage area for the smart card module with stored data protected by encryption technology.

The Company views the smartSD Card as a key to realizing a secure ubiquitous networking society, and will create new business opportunities not only in device sector but also in the system and solution service fields.

- (Notes)
1. Memory cards proposed and promoted by Matsushita with Toshiba Corporation and SanDisk Corporation.
 2. A type of non-volatile RAM. Compared to flash memory, EEPROM and other non-volatile memory formats, FeRAM enables high-speed data writing and data transfer with lower energy consumption.

Matsushita Wins Mecenat Award for Contribution to Children s Culture

As part of Matsushita s philanthropic activities, the Company has sponsored performances of The Shakespeare Drama Series for Children since 1995, offering a chance for children to appreciate classic drama during summer vacation. Since 2000, Matsushita has hosted this event as part of its Panasonic Tours, including participation by employees and their families in various parts of Japan. These events have been a great success in providing an enjoyable and educational experience for children and parents.

The Association for Corporate Support of the Arts, Japan recognized Matsushita s contributions in areas such as workshops for elementary and junior high school students, and fostering an appreciation for the arts. Matsushita was therefore awarded the Mecenat Award for Contribution to Children s Culture 2004 , for its outstanding support for arts and culture.
