PHOENIX
INVESTMENT PARTNERS, LTD.

August 1, 2005

Dear Fellow ZTR Shareholder:

I am pleased to share with you the manager's report and commentary for The Zweig Total Return Fund, Inc. for the quarter ended June 30, 2005. In it, Dr. Martin Zweig, president of Zweig Consulting, subadviser to the Fund, presents his market review and outlook, and Carlton Neel, the Fund's portfolio manager, reports on changes to the portfolio during the quarter, including sector allocations and top holdings.

For the quarter ended June 30, 2005, The Zweig Total Return Fund's net asset value increased 1.54%, including \$0.136 in reinvested distributions. During the period, the Fund's benchmark, a composite index (62.5% Lehman Brothers Government Bond Index and 37.5% S&P 500(R) Index), returned 2.63%, including reinvested dividends. The Fund's overall exposure to the bond and equity markets for the quarter was approximately 95%.

For the six months ended June 30, 2005, the Fund's net asset value increased 1.84%, including reinvested distributions. During the period, the Fund's benchmark composite index (see above description), returned 1.56%, including reinvested dividends. The Fund's overall exposure to the bond and equity markets for the first half of the year was approximately 93%.

As previously announced, the Fund's most recent distribution was \$0.045 payable July 25, 2005, to holders of record on July 11, 2005. Including this

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

distribution, the Fund's total payout since inception is \$13.083.

For updates on The Zweig Total Return Fund, Inc., including performance and holdings, please visit the Individual Investors section of our Web site, PhoenixFunds.com.

Thank you for your continued investment in The Zweig Total Return Fund, Inc. We are firmly committed to serving your best interests.

Sincerely,

/s/ Daniel T. Geraci

President
The Zweig Total Return Fund, Inc.

MARKET REVIEW AND OVERLOOK

The Fund's bond exposure on June 30, 2005 was 66%, with average duration (a measure of sensitivity to interest rates) of 4.1 years. This compares with our bond exposure at 59%, with average duration of 3.7 years, on March 31, 2005. If we were fully invested, 62.5% of our portfolio would be in bonds and 37.5% in stocks. Consequently, with 66% in bonds we are slightly above our target allocation.

The Federal Reserve (the "Fed") maintained its steady tightening pace throughout the first half of the year, increasing its short-term benchmark interest rate by a quarter-point to 3.25%. Remarkably, the bond market has generally reacted favorably to the recent increases, viewing the moves by the Fed as an attempt to contain growth and keep inflation muted. That didn't happen in past tightening cycles when yields of all bond maturities tended to rise.

The tightening of short-term rates has corresponded with a decrease in the yields of the 10-year note from just over 4.5% to around 4%. We believe this flattening of the yield curve has

made bonds and longer maturities a very solid investment. Our Fund has been generally well positioned for the move because we have had a bias toward a flatter yield curve. We have also been slightly more invested in 10-year and longer-dated Treasuries than the fixed income index within our benchmark, the Lehman Brothers Government Bond Index.

Also contributing to the rally in bonds are higher oil prices, which are commonly viewed as a drag on the economy and a drain on consumer spending. Lower discretionary spending by consumers is historically a contributing factor to an economic slowdown. As households feel the "pinch at the pump," spending levels tend to drop. The bond market seems to be viewing simultaneous Fed tightening and slower consumer spending as a positive sign that inflation will hold steady and even fall lower. The expectation of higher inflation tends to be the most common reason that bond prices fall and yields rise during an economic expansion. It seems that the Fed has found a way to anticipate the economic cycle just enough to assuage the concern of bond holders and give them a reason to buy bonds.

As our models moved from a somewhat bullish stance to a slightly negative outlook, our Fund recently reduced its bond holdings and lowered the duration.

Our exposure to U.S. common stocks was 30% on June 30, 2005 against 28% on

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

March 31. At 30% we are at about 80% of a full position (30%/37.5%).

The stock market's performance in the second quarter was nothing to write home about. The Dow Jones Industrial Average finished off 1.6%. The S&P 500(R) Index scratched out a mere 1.4% gain while the NASDAQ Composite Index rose 3.1%. All three major markets closed lower for the first half. The Dow was down 3.8%, falling back to its level at the close of 2003. The S&P dipped 0.8% and the NASDAQ slumped 5.1%.

As widely expected, the Fed raised its short-term benchmark interest rate by a quarter-point to 3.25%, the ninth consecutive increase by that amount in a year. Although the chief of the Dallas Fed previously said that we are in the "eighth inning" of the current tightening cycle, Fed chairman Alan Greenspan took us into extra innings, with no indication as to when this particular game will be over.

We believe that many investors were disappointed when the Fed repeated its previous assertions that it expects to continue to increase rates at a "measured pace" and the market closed down sharply after that announcement. In its economic outlook, the Fed said that, despite higher energy prices, expansion remains firm and labor conditions continue to improve gradually. It added that pressures on inflation have stayed elevated but longer-term expectations remain well contained.

In our opinion, one problem with the Fed is that it seems to wait too long and then goes too far. It may do the same this time around. We believe it should not have driven rates down to 1% at a time when the economy was improving. Now it may do the reverse by raising rates too high as the economy is slowing.

Some analysts point to last year's market surge after the presidential election and predicted a similar response this year if the Fed stops raising interest rates. To us, that is not a reasonable assumption. When an election is over, you know who won and the market can rally. But, we believe that Greenspan will never ring a bell and announce that he has finished raising rates because he wants to stay flexible. In our view, he'll leave himself enough of an opening to do what he thinks is necessary.

We agree with Greenspan on one issue: his view of the housing boom. Greenspan said that a nationwide bubble is unlikely but saw signs of "froth" in some areas, with speculation a possible growing factor. Sales of new homes rose 21% in

2

May and home prices climbed 51% in the five years ended March 31, according to the Office of Federal Housing Enterprise Oversight.

To put the situation in perspective, a 51% rise over five years comes out to about 8.6% a year. Assets gaining 8.6% a year doesn't seem like a bubble to us. When the stock market was soaring 25% a year for five years and the NASDAQ was doing a lot more, people were denying there was a bubble. With housing, we are getting a fraction of those gains and analysts are talking about a bubble that may burst.

As Greenspan suggested, there are certain pockets where there is excessive speculation in housing. For example, in the city of Miami alone, 62,000 condo units are either being built or planned. In the previous decade, there were

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

only about 7,000 condos built in all of Miami. Heavy growth is also taking place in certain areas of California, New York and Nevada. On balance, the housing boom is very localized, with a lot of the country not seeing overspeculation.

With mortgage rates linked to the 10-year Treasury bond yield, housing has become very contra-cyclical to most of the rest of the economy. We feel that if the economy softens and bond yields decline, the housing market will stay strong; but if the economy strengthens and bond yields rise, the housing market will weaken. So we are not too concerned about a housing bubble hurting the stock market.

We are also not losing much sleep over the trade imbalance. While U.S. imports and exports set records in April (the last month for which figures are available), the trade deficit widened 6.3% to \$57 billion from \$53.6 billion in March, according to the Commerce Department. Year to date through April, the gap was 22% higher than for the same period in 2004 and is on track to surpass last year's record \$618 billion.

Many people seem to worry about the trade deficit unnecessarily. Foreigners want to give us dollars and are willing to take our dollars in return for goods that are less expensive. We believe that it really does help the American consumer to import goods that are cheaper. We may have fewer jobs because of this, but that is sometimes a trade-off. We are not saying it is good to lose jobs, but we think protectionism would be worse. We believe the U.S. should try to be more efficient and produce things better than the rest of the world.

Speaking of deficits, the Federal government's budget deficit declined dramatically in May. Reflecting a surge in tax receipts, the May deficit was \$35.29 billion, down from \$62.46 billion in the like month a year ago, and the smallest gap for May since the \$27.9 billion in 2001. It is good that the deficit is narrowing. We have always felt that the economy would benefit from lower taxes and that eventually the deficit would disappear. While it is counterintuitive, our research has shown that the stock market does better when there is a federal deficit than when there is a surplus.

Continuing to show unexpected strength, the dollar climbed 7% against the euro and 3.5% against the yen in the second quarter. It was the second straight quarter of increases and represented the dollar's best showing in over four years. For the first half of the year, the dollar rose 12% against the euro, the highest figure since the euro was launched in 1999. We have tested the dollar against stock market trends but haven't found any consistent relationship.

An interesting question to ask is: "Why would the dollar rally when the trade and budget deficits and housing inflation are so terrible?" We believe that much of the rest of the world is eager to buy these dollars and hold them. The U.S. still tends to be a safe haven and foreigners seem to like investing here, possibly because they feel secure buying our bonds, real estate or stocks.

The second quarter saw a decline in initial public offerings. Forty-seven deals were com-

pleted, compared to 58 in the like period a year ago, according to Thomson Financial. The second quarter deals totaled \$8.15 billion against last year's \$9.5 billion. These figures seem to indicate that we're not at the hysteria

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

level we saw in the late 90s when the volume of new issues pointed to an extremely overheated market. We feel that the current amount of offerings is reasonable.

While IPOs were lower, mergers and acquisitions made a strong showing. The amounts spent on deals spurted 73% in the second quarter against the like period last year and increased 20% from this year's first quarter, according to Thomson Financial.

This level of activity tends to be bullish. It doesn't surprise us because we believe that corporations are loaded with cash. The debt-equity ratios of non-financial corporations are way down. The amount of cash held by corporations relative to their assets is at its highest level for at least the last 25 years for which we have data. So there seems to be plenty of money around, and we feel that many companies are ripe for takeover or may seek to become buyers themselves. We think this situation will continue and is a plus for the stock market.

The New York Stock Exchange reported that margin debt at its member firms fell 2.7% from the end of the first quarter through May. After dropping sharply after April's big market decline, margin debt rose in May as stock prices recovered but not enough to offset April's large drop. We believe that this is a figure to watch. Just like the new issues market, it can get excessive when there is too much speculation. When margin debt rises quickly, it can be a warning sign, but we don't think it has done that here.

American investors seem to be chasing the hottest markets. In May, Americans invested \$5.178 billion in mutual funds that invest primarily in domestic stocks, more than double the \$2.260 billion in April, according to the Investment Company Institute. However Americans poured much more money into world stock funds during these two months, with \$6.011 billion invested in May and \$6.372 billion in April.

We don't think it is a great idea for people to chase what is hot. Historically, foreigners tend to be wrong when they plunge into our markets, and U.S. investors tend to do just as bad in foreign markets. So these numbers may not be a great sign for foreign markets where there may be too much exuberance. As far as our domestic markets are concerned, these mutual fund numbers appear positive.

We also like the figures on stock buybacks by companies in the S&P 500 Index. These buybacks were a major factor in building company holdings of cash and cash-equivalent securities in the first quarter, according to Thomson Financial. Their holdings grew 10.1% to a record \$766 billion. Buybacks showed the biggest gain as a share of total cash, climbing to 8% in the first quarter against 3.1% in the like 2004 period. The stock buyback total nearly tripled to \$61 billion. As indicated earlier, this excessive cash can be put to good use. Some companies will continue to use it for buying their own stock, buying other companies or paying out higher dividends. We feel that all of the above are bullish for the market.

Stock market advisors became more optimistic as the market rallied recently. A recent survey by Investors Intelligence of advisors found 55.1% bullish and only 19.1% bearish. The bullish figure is the highest since March of this year, while the bearish total is the lowest since July of 2004. We don't think these figures are excessive yet. We believe it would have to go to a much greater extreme to indicate a market top.

S&P 500-listed companies are now trading at about 19.6 times earnings over the past 12 months. Historically, the rate has been about

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

4

15 times earnings. At these figures, we don't believe the market is excessively valued, but we don't think it is cheap either.

The same mixed picture holds true for the economy in general. It has definitely slowed but we don't think we are headed into a recession nor do we see a boom. Actually, it looks fairly good to us because it is not strong enough to make inflation a worry -- but it is not weak either.

At this writing, virtually all of our indicators are smack in the neutral range. When this happens, the market has generally risen at a reasonable rate. Historically, it has gone up about 10% a year. We might cut a few points off that number because we had above normal gains in the 1980s and 90s. So with that in mind, perhaps we'll adjust the projected gain to 7% or 8%. We'll take it.

Overall, we think the market is okay. It has six months to consolidate the gains it made in the fourth quarter of 2004.

Sincerely,

/s/Martin E. Zweig, Ph.D.

President
Zweig Consulting LLC

PORTFOLIO COMPOSITION

Conforming to our Fund's investment policy guidelines, all of our bonds are U.S. Government and agency obligations. These bonds are highly liquid and provide the flexibility to respond quickly to changing market conditions.

Our top equity sectors on June 30, 2005, included financials, consumer staples, health care, information technology, and industrials. Although there were changes in allocation amounts, all of the above groups were in our previous report. During the quarter, we added to our positions in consumer discretionary and information technology and trimmed our holdings in telecommunication services and industrials.

As of June 30, 2005, our leading individual positions included Allstate, Altria Group, Bank of America, Bristol-Myers Squibb, Dow Chemical, Huntington Bancshares, Kimberly Clark, Merck, National City, and Wells Fargo. New to this list are Allstate, where there was no change in shares held, and Dow Chemical, where we added to our position. No longer in this grouping are AT&T, where we closed our position, and Sara Lee, where there was no change in shares held.

Sincerely,

[SIGNATURE]

/s/ Carlton Neel

OUR PRIVACY COMMITMENT

The Zweig Total Return Fund, Inc. recognizes that protecting the privacy and security of the confidential personal information we collect about you is an important responsibility. The following information will help you understand our privacy policy and how we will handle and maintain confidential personal information as we fulfill our obligations to protect your privacy. "Personal information" refers to the nonpublic financial information obtained by us in connection with providing you a financial product or service.

Information We Collect

We collect personal information to help us serve your financial needs, offer new products or services, provide customer service and fulfill legal and regulatory requirements. The type of information that we collect varies according to the products or services involved, and may include:

- . Information we receive from you on applications and related forms (such as name, address, social security number, assets and income); and
- . Information about your transactions and relationships with us, our affiliates, or others (such as products or services purchased, account balances and payment history).

Information Disclosed in Administering Products and Services

We will not disclose personal information about current or former customers to non-affiliated third parties except as permitted or required by law. We do not sell any personal information about you to any third party. In the normal course of business, personal information may be shared with persons or entities involved in servicing and administering products and services on our behalf, including your broker, financial advisor or financial planner and other service providers and affiliates assisting us.

Procedures to Protect Confidentiality and Security of Your Personal Information

We have procedures in place that limit access to personal information to those employees and service providers who need to know such information in order to perform business services on our behalf. We educate our employees on the importance of protecting the privacy and security of confidential personal information. We also maintain physical, electronic and procedural safeguards that comply with federal and state regulations to guard your personal information.

We will update our policy and procedures where necessary to ensure that your privacy is maintained and that we conduct our business in a way that fulfills our commitment to you. If we make any material changes in our privacy policy, we will make that information available to customers through our Web site and/or other communications.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

Glossary

American Depositary Receipt (ADR): Represents shares of foreign companies traded in U.S. dollars on U.S. exchanges that are held by a bank or a trust. Foreign companies use ADRs in order to make it easier for Americans to buy their shares.

Benchmark Index for The Zweig Total Return Fund: A composite index consisting of 62.5% Lehman Brothers Government Bond Index and 37.5% S&P 500(R) Index.

Dow Jones Industrial Average/SM/: A price-weighted average of 30 blue chip stocks. The index is calculated on a total return basis with dividends reinvested.

Duration: A measure of a fixed income fund's sensitivity to interest rate changes. For example, if a fund's duration is 5 years, a 1% increase in interest rates would result in a 5% decline in the fund's price. Similarly, a 1% decline in interest rates would result in a 5% gain in the fund's price.

Office of Federal Housing Enterprise Oversight (OFHEO): The OFHEO promotes housing and a strong economy by ensuring the safety and soundness of Fannie Mae and Freddie Mac and fostering the vitality of the nation's housing finance system.

Federal Reserve (the "Fed"): The central bank of the United States, responsible for controlling the money supply, interest rates and credit with the goal of keeping the U.S. economy and currency stable. Governed by a seven-member board, the system includes 12 regional Federal Reserve Banks, 25 branches and all national and state banks that are part of the system.

Inflation: Rise in the prices of goods and services resulting from increased spending relative to the supply of goods on the market.

Initial public offering (IPO): A company's first sale of stock to the public.

Investors Intelligence Survey: A weekly survey published by Chartcraft, an investment services company, of the current sentiment of approximately 150 market newsletter writers. Participants are classified into three categories: bullish, bearish or waiting for a correction.

Lehman Brothers Government/Credit Bond Index: Measures U.S. investment grade government and corporate debt securities. The index is calculated on a total return basis.

NASDAQ Composite(R) Index: A market capitalization-weighted index of all issues listed in the NASDAQ (National Association Of Securities Dealers Automated Quotation System) Stock Market, except for closed-end funds, convertible debentures, exchange traded funds, preferred stocks, rights, warrants, units and other derivative securities. The index is calculated on a total return basis with dividends reinvested.

S&P 500(R) Index: A market capitalization-weighted index of 500 of the largest U.S. companies. The index is calculated on a total return basis with dividends reinvested.

Indexes cited are unmanaged and not available for direct investment; therefore their performance does not reflect the expenses associated with the active management of an actual portfolio.

THE ZWEIG TOTAL RETURN FUND, INC.

NOTES TO FINANCIAL STATEMENTS

June 30, 2005
(Unaudited)

NOTE 1 -- ORGANIZATION

The Zweig Total Return Fund, Inc. (the "Fund") is a closed-end, diversified management investment company registered under the Investment Company Act of

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

1940 (the "Act"). The Fund was incorporated under the laws of the State of Maryland on July 21, 1988. The Fund's objective is to seek the highest total return, consisting of capital appreciation and current income, consistent with the preservation of capital.

NOTE 2 -- SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in conformity with accounting principals generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, contingent assets and liabilities at the date of the financial statements and the reported amount of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

A. Security Valuation:

Equity securities are valued at the official closing price (typically last sale) on the exchange on which the securities are primarily traded, or if no closing price is available, at the last bid price.

Debt securities are valued on the basis of broker quotations or valuations provided by a pricing service, which utilizes information with respect to recent sales, market transactions in comparable securities, quotations from dealers, and various relationships between securities in determining value.

As required, some securities and other assets may be valued at fair value as determined in good faith by or under the direction of the Directors.

Certain foreign common stocks may be fair valued in cases where closing prices are not readily available or are deemed not reflective of readily available market prices. For example, significant events (such as movement in the U.S. securities market, or other regional and local developments) may occur between the time that foreign markets close (where the security is principally traded) and the time that the Fund calculates its net asset value (generally, the close of the NYSE) that may impact the value of securities traded in these foreign markets. In these cases, information from an external vendor may be utilized to adjust closing market prices of certain foreign common stocks to reflect their fair value. Because the frequency of significant events is not predictable, fair valuation of certain foreign common stocks may occur on a frequent basis.

Short-term investments having a remaining maturity of 60 days or less are valued at amortized cost, which approximates market.

16

B. Security Transactions and Related Income:

Security transactions are recorded on the trade date. Dividend income is recorded on the ex-dividend date, or in the case of certain foreign securities, as soon as the Fund is notified. Interest income is recorded on the accrual basis. The Fund amortizes premiums and accretes discounts using the effective interest method. Realized gains and losses are determined on the identified cost basis.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

C. Income Taxes:

It is the policy of the Fund to comply with the requirements of the Internal Revenue Code and to distribute substantially all of its taxable income to its shareholders. Therefore, no provision for federal income taxes or excise taxes has been made.

The Fund may be subject to foreign taxes on income, gains on investments or currency repatriation, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable based upon current interpretations of the tax rules and regulations that exist in the markets in which they invest.

D. Dividends and Distributions to Shareholders:

Distributions are declared and recorded by the Fund on the ex-dividend date. Income and capital gain distributions are determined in accordance with income tax regulations, which may differ from accounting principles generally accepted in the United States of America. These differences may include the treatment of non-taxable dividends, market premium and discount, non-deductible expenses, expiring capital loss carryovers, foreign currency gain or loss, operating losses and losses deferred due to wash sales. Permanent book and tax basis differences relating to shareholder distributions will result in reclassifications to capital paid in on shares of beneficial interest.

The Fund has \$41,511,380 of capital loss carryovers, \$36,736,454 expiring in 2010 and \$4,774,926 expiring in 2011 which may be used to offset future capital gains. The Fund may not realize the benefit of these losses to the extent it does not realize gains on investments prior to the expiration of the capital loss carryovers. In addition, under certain conditions, the Fund may lose the benefit of these losses to the extent that distributions to shareholders exceed required distribution amounts as defined under the Internal Revenue Code. Shareholders may also pay additional taxes on these excess distributions.

E. Foreign Currency Translation:

Foreign securities and other assets and liabilities are valued using the foreign currency exchange rate effective at the end of the reporting period. Cost of investments is translated at the currency exchange rate effective at the trade date. The gain or loss resulting from a change in currency exchange rates between the trade and settlement date of a portfolio transaction is treated as a gain or loss on foreign currency. Likewise, the gain or loss resulting from a change in currency exchange rates between the date income is accrued and paid, is treated as a gain or loss on foreign currency. The Fund does not isolate that portion of the results of operations arising from changes in exchange rates and that portion arising from changes in the market prices of securities.

F. Forward Currency Contracts:

The Fund may enter into forward currency contracts in conjunction with the planned purchase or sale of foreign denominated securities in order to hedge the U.S. dollar cost or proceeds. Forward

currency contracts involve, to varying degrees, elements of market risk in excess of the amount recognized in the Statement of Assets and Liabilities. Risks arise from possible movements in foreign exchange rates or if the

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

counterparty does not perform under the contract.

A forward currency contract involves an obligation to purchase or sell a specific currency at a future date, which may be any number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. These contracts are traded directly between currency traders and their customers. The contract is marked-to-market daily and the change in market value is recorded by the Fund as unrealized gain or loss. When the contract is closed or offset with the same counterparty, the Fund records a realized gain or loss equal to the change in the value of the contract when it was opened and the value at the time it was closed or offset.

G. Foreign Security Country Determination:

A combination of the following criteria is used to assign the countries of risk listed in the schedule of investments and securities sold short: country of incorporation, actual building address, primary exchange on which the security is traded and country in which greatest percentage of company revenue is generated.

H. Options:

The Fund may write covered options or purchase options contracts for the purpose of hedging against changes in the market value of the underlying securities or foreign currencies.

The Fund will realize a gain or loss upon the expiration or closing of the option transaction. Gains and losses on written options are reported separately in the Statement of Operations. When a written option is exercised, the proceeds on sales or amounts paid are adjusted by the amount of premium received. Options written are reported as a liability in the Statement of Assets and Liabilities and subsequently marked-to-market to reflect the current value of the option. The risk associated with written options is that the change in value of options contracts may not correspond to the change in value of the hedged instruments. In addition, losses may arise from changes in the value of the underlying instruments, or if a liquid secondary market does not exist for the contracts.

The Fund may purchase options, which are included in the Fund's Schedule of Investments and Securities Sold Short and subsequently marked-to-market to reflect the current value of the option.

When a purchased option is exercised, the cost of the security is adjusted by the amount of premium paid. The risk associated with purchased options is limited to the premium paid.

18

Transactions in written options for the period ended June 30, 2005 were as follows:

	Number of Premiums Contracts Received		
	-----	-----	
Option contracts outstanding at December 31, 2004	--	\$	--

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

Option contracts written.....	120	51,240
Option contracts sold.....	--	--
Option contracts exercised.....	--	--
Option contracts expired.....	--	--
	---	-----
Option contracts outstanding as of June 30, 2005.	120	\$51,240
	===	=====

As of June 30, 2005, the Fund had outstanding written options as follows:

	Shares			
Call Option	Subject	Expiration	Exercise	Market
-----	to Call	Date	Price	Value
-----	-----	-----	-----	-----
Valero Energy Corp.	12,000	9/19/05	\$85.00	\$40,800

I. Short Sales:

A short sale is a transaction in which the Fund sells a security it does not own in anticipation of a decline in market price. To sell a security short, the Fund must borrow the security. The Fund's obligation to replace the security borrowed and sold short will be fully collateralized at all times by the proceeds from the short sale retained by the broker and by cash and securities deposited in a segregated account with the Fund's custodian. If the price of the security sold short increases between the time of the short sale and the time the Fund replaces the borrowed security, the Fund will realize a loss, and if the price declines during the period, the Fund will realize a gain. Any realized gain will be decreased, and any realized loss increased, by the amount of transaction costs. On ex-dividend date, dividends on short sales are recorded as an expense to the Fund. At June 30, 2005, the value of securities sold short amounted to \$16,212,740 against which collateral of \$29,197,519 was held. The collateral includes the deposits with broker for securities held short and the value of the segregated investments held long, as shown in the Schedule of Investments and Securities Sold Short. Short selling used in the management of the Fund may accelerate the velocity of potential losses if the prices of securities sold short appreciate quickly. Stocks purchased may decline in value at the same time stocks sold short may appreciate in value, thereby increasing potential losses.

J. Indemnifications:

Under the Fund's organizational documents, its directors and officers are indemnified against certain liabilities arising out of the performance of their duties to the Fund. In addition, the Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

NOTE 3 -- PURCHASES AND SALES OF SECURITIES

Purchases and sales of securities (excluding U.S. Government and agency

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

securities, options, forward currency contracts and short-term securities) for the period ended June 30, 2005, were as follows:

Purchases.....	\$42,153,130
Sales.....	44,504,524
Short sales.....	10,840,172
Purchases to cover short sales	1,760,951

Purchases and sales of long-term U.S. Government and agency securities for the period ended June 30, 2005, were as follows:

Purchases	\$169,699,979
Sales....	163,458,600

NOTE 4 -- INVESTMENT ADVISORY FEES AND RELATED PARTY TRANSACTIONS

a) Investment Advisory Fee: The Investment Advisory Agreement ("the Agreement") between Phoenix/Zweig Advisers LLC (the "Adviser") and the Fund provides that, subject to the direction of the Board of Directors of the Fund and the applicable provisions of the Act, the adviser is responsible for the actual management of the Fund's portfolio. Phoenix/Zweig Advisers LLC is a wholly-owned subsidiary of Phoenix Investment Partners, Ltd. ("PXP"). PXP is an indirect, wholly-owned subsidiary of The Phoenix Companies, Inc. ("PNX"). The responsibility for making decisions to buy, sell, or hold a particular investment rests with the Adviser, subject to review by the Board of Directors and the applicable provisions of the Act. For the services provided by the Adviser under the Agreement, the Fund pays the Adviser a monthly fee equal on an annual basis to 0.70% of the Fund's average daily net assets. During the period ended June 30, 2005 the Fund incurred advisory fees of \$1,772,104.

Zweig Consulting LLC (the "Sub-Adviser") performs certain asset allocation research and analysis and provides such advice to the Adviser. Effective March 2, 2004, the Sub-Adviser assumed an expanded role in reviewing the Fund's investment portfolio and collaborating in the security selection process with the Adviser's portfolio management team. The Sub-Adviser's fees are paid by the Adviser.

b) Administration Fee: Phoenix Equity Planning Corporation ("PEPCO"), an indirect wholly owned subsidiary of PNX serves as the Fund's Administrator (the "Administrator") pursuant to an Administration Agreement. The Administrator receives a fee for financial reporting, tax services, and oversight of the subagent's performance at a rate of 0.13% of the Fund's average daily net assets. During the period ended June 30, 2005, the Fund incurred Administration fees of \$329,105.

c) Directors Fee: The Fund pays each Director who is not an interested person of the Fund or the Adviser a fee of \$10,000 per year plus \$1,500 per Directors' or committee meeting attended, together with the out-of-pocket costs relating to attendance at such meetings. Any Director of the Fund who is an interested person of the Fund or the Adviser receives no remuneration from the Fund.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

NOTE 5 -- CAPITAL STOCK AND REINVESTMENT PLAN

At June 30, 2005, the Fund had one class of common stock, par value \$.001 per share, of which 500,000,000 shares are authorized and 92,891,488 shares are outstanding.

Registered shareholders may elect to have all distributions paid by check mailed directly to the shareholder by EquiServe as dividend paying agent. Pursuant to the Automatic Reinvestment and Cash Purchase Plan (the "Plan"), shareholders not making such election will have all such amounts automatically reinvested by EquiServe, as the Plan agent, in whole or fractional shares of the Fund, as the case may be. During the six-months ended June 30, 2005, and the year ended December 31, 2004, there were no shares issued pursuant to the Plan.

NOTE 6 -- CREDIT RISK AND ASSET CONCENTRATIONS

In countries with limited or developing markets, investments may present greater risks than in more developed markets and the prices of such investments may be volatile. The consequences of political, social or economic changes in these markets may have disruptive effects on the market prices of these investments and the income they generate, as well as the Fund's ability to repatriate such amounts.

The Fund may invest a high percentage of its assets in specific sectors of the market in its pursuit of a greater investment return. Fluctuations in these sectors of concentration may have a greater impact on the Fund, positive or negative, than if the Fund did not concentrate its investments in such sectors.

Ratio of net investment income to average net assets.....	2.20%/(4)/	2.13%	1.66%	2.37
Portfolio turnover rate.....	48.0%/(5)/	75.8%	94.1%	90.8

/ (1) / Closing Price -- New York Stock Exchange.
/ (2) / Total investment return is calculated assuming a purchase of common stock on the opening of the first business day and a sale on the closing of the last business day of each period reported. Dividends and distributions, if any, are assumed for the purchase of this calculation, to be reinvested at prices obtained under the Fund's Automatic Reinvestment and Cash Purchase Plan. Generally, total investment return based on net asset value will be higher than total investment return based on market value in periods where there is an increase in the discount or a decrease in the premium of the market value to the net assets from the beginning to the end of such years. Conversely, total investment return based on net asset value will be lower than total investment return based on market value in periods where there is a decrease in the discount or an increase in the premium of the market value to the net asset value from the beginning to the end of such periods.
/ (3) / As required, effective January 1, 2001, the Fund adopted the provision of AICPA Audit and Accounting Guide for Investment Companies and Began amortizing premium on debt securities. The effect of the change for the year ended December 31, 2001 is shown below. Per share ratios and supplemental data for periods prior to January 1, 2001, have not been restated to reflect this change in presentation.

Decrease net investment income..... \$(.02)
Increase net realized and unrealized gains and losses \$0.02
Decrease ratio of net investment income..... (.23)%

/ (4) / Annualized.
/ (5) / Not annualized.

Not applicable.

Item 10. Submission of Matters to a Vote of Security Holders.

At a Board of Trustees meeting held May 16, 2005, the Trustees approved a Policy for the Consideration of Trustee Nominees as follows:

PHOENIX FUNDS

Policy for the Consideration of Trustee Nominees

The following Policy for the Consideration of Trustee Nominees (the "Policy") shall be followed by the Governance and Nominating Committee (the "Committee") of the Phoenix Funds (the "Trust") in filling vacancies on the

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

Board of Trustees or when Trustees are to be nominated for election by shareholders.

Minimum Nominee Qualifications

1. With respect to nominations for Trustees who are not interested persons of the Trust as defined by Section 2(a)(19) of the Investment Company Act of 1940 (the "1940 Act") ("Disinterested Trustees"), nominees shall be independent of the Trust's investment advisers and other principal service providers. The Committee shall also consider the effect of any relationship beyond those delineated in the 1940 Act that might impair independence, such as business, financial or family relationships with the investment adviser or its affiliates.
2. Disinterested Trustee nominees must qualify for service on the Trust's Audit Committees.
3. With respect to all Trustees, nominees must qualify under all applicable laws and regulations.
4. The proposed nominee may not be within five years of the Trust's retirement age for Trustees.
5. The Committees may also consider such other factors as they may determine to be relevant.

Other Qualifications

1. With respect to all proposed nominees, the Committee shall consider whether the proposed nominee serves on boards of or is otherwise affiliated with competing financial service organizations or their related fund complexes or companies in which the Trust may invest.
2. The Committee shall consider whether the proposed nominee is able to and intends to commit the time necessary for the performance of Trustee duties.
3. The Committee shall consider the integrity and character of the proposed nominee, and the proposed nominee's compatibility with the current Trustees.
4. The Committee may require an interview with the proposed nominee.

Nominees Recommended by Shareholders

1. The Committee shall consider nominations for openings on the Board of Trustees from shareholders who have individually held for at least one full year five percent of the shares of a series of the Trust.
2. The Committee shall give candidates recommended by shareholders the same consideration as any other candidate.
3. Shareholder recommendations should be sent to the attention of the Committee in care of the Trust's Secretary and should include biographical information, including business experience for the past ten years and a description of the qualifications of the proposed nominee, along with a statement from the proposed nominee that he or she is willing to serve and meets the requirements to be a Disinterested Trustee, if applicable.

Edgar Filing: ZWEIG TOTAL RETURN FUND INC - Form N-CSRS

Process for Identifying and Evaluating Trustee Nominees

1. When identifying and evaluating prospective nominees for openings on the Board of Trustees, the Committee shall review all recommendations in the same manner, including those received from shareholders.
2. The Committee shall first determine if the prospective nominee meets the minimum qualifications set forth above. Those proposed nominees meeting the minimum qualifications will then be considered by the Committee with respect to the other qualifications listed above, and any other qualifications deemed to be important by the Committee.
3. Those nominees selected by the Committee shall be recommended to the Board of Trustees.

Item 11. Controls and Procedures.

- (a) The registrant's principal executive and principal financial officers, or persons performing similar functions, have concluded that the registrant's disclosure controls and procedures (as defined in Rule 30a-2(c) under the Investment Company Act of 1940, as amended (the "1940 Act") (17 CFR 270.30a-2(c))) are effective, as of a date within 90 days of the filing date of the report that includes the disclosure required by this paragraph, based on their evaluation of these controls and procedures required by Rule 30a-3(b) under the 1940 Act (17 CFR 270.30a-3(b)) and Rules 13a-15(b) or 15d-15(b) under the Securities Exchange Act of 1934, as amended (17 CFR 240.13a-15(b) or 240.15d-15(b)).
- (b) There were no changes in the registrant's internal control over financial reporting (as defined in Rule 30a-3(d) under the 1940 Act (17 CFR 270.30a-3(d))) that occurred during the second fiscal quarter of the period covered by this report that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting.

Item 12. Exhibits.

- (a) (1) Not applicable.
- (a) (2) Certifications pursuant to Rule 30a-2(a) under the 1940 Act and Section 302 of the Sarbanes-Oxley Act of 2002 are attached hereto.
- (a) (3) Not applicable.
- (b) Certifications pursuant to Rule 30a-2(b) under the 1940 Act and Section 906 of the Sarbanes-Oxley Act of 2002 are attached hereto.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the registrant has duly caused this report to be
