Table of Contents**Q.E.P. CO., INC. AND SUBSIDIARIES****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS**

(UNAUDITED)

Note 1. Interim Reporting

The accompanying financial statements for the interim periods are unaudited and include the accounts of Q.E.P. Co., Inc. and its subsidiaries (the Company). All significant intercompany transactions and balances have been eliminated. The interim financial statements have been prepared in conformity with Rule 10-01 of Regulation S-X of the Securities and Exchange Commission (SEC) and therefore do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. However, all adjustments (consisting only of normal recurring adjustments) which are, in the opinion of management, necessary for a fair presentation of the financial position and operating results for the periods presented have been included. These financial statements should be read in conjunction with the financial statements and notes thereto, together with Management's Discussion and Analysis of Financial Condition and Results of Operations, contained in the Annual Report on Form 10-K for the year ended February 28, 2005 of the Company as filed with the SEC. The February 28, 2005 balance sheet was derived from audited financial statements, but does not include all disclosures required by accounting principles generally accepted in the United States of America. The results of operations for the six months ended August 31, 2005 are not necessarily indicative of the results for the full fiscal year ending February 28, 2006.

Note 2. Acquisition

In May 2005, the Company purchased the flooring adhesives manufacturing assets of a company in the United States. Consideration for the purchase included cash of \$830,000, issuance of a four-year, non-interest-bearing \$4,000,000 note, and sale of the Company's carpet seaming tape distribution business. A summary of the fair value of assets acquired, liabilities assumed and expenses incurred in connection with this acquisition follows:

Cash consideration paid	\$ 830,000
Fair value of carpet seaming tape distribution business	1,500,000
Discounted value of notes payable issued	3,511,894
	<hr/>
Total consideration	5,841,894
Less: Fair value of assets acquired:	
Inventory	1,734,991
Property and equipment	448,110
Identifiable intangibles	348,206
	<hr/>
	3,310,587
Plus: Fair value of liability assumed and accrued expenses	389,645
	<hr/>
Goodwill	\$ 3,700,232
	<hr/>

Note 3. Inventories

Inventories consist of the following:

	<u>August 31, 2005</u>	<u>February 28, 2005</u>
Raw materials and work-in process	\$ 5,423,276	\$ 4,310,997
Finished goods	27,160,148	25,617,908
	<u>\$ 32,583,424</u>	<u>\$ 29,928,905</u>

Note 4. Goodwill and Other Intangible Assets

The Company performs a fair value based impairment test relating to the carrying value of the Company's goodwill during the second quarter of each fiscal year. Based on the most recent impairment test, the Company determined that there was no impairment to goodwill.

Table of Contents

The Company's intangible assets are subject to amortization as follows:

	Average Life	August 31, 2005		February 28, 2005	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Trademarks	20 years	\$ 2,970,850	\$ (741,707)	\$ 2,866,660	\$ (668,772)
Other Intangibles	5 years	1,154,240	(303,448)	875,738	(265,579)
		<u>\$ 4,125,090</u>	<u>\$ (1,045,155)</u>	<u>\$ 3,742,398</u>	<u>\$ (934,351)</u>

Amortization expense for intangible assets during the first six months of fiscal 2006 and 2005 was \$121,087 and \$67,668, respectively. Estimated amortization expense is approximately \$265,000 for each of the five fiscal years ending February 28, 2006 through 2010.

Note 5. Debt

The Company has a loan agreement with two domestic financial institutions to provide a revolving credit facility, mortgage financing and term note financing. In March 2005, the Company amended the facility to consolidate the Company's term notes and to increase the amount of borrowing capacity under the revolving facility to \$27 million through February 2006 and \$29 million thereafter using the same formula for eligible accounts receivable and inventory that previously existed for the Company. The revolving facility also was extended to July 2008. In addition, in June 2005, the loan agreement was amended and the Company received a waiver of compliance with certain financial covenants.

In connection with the acquisition described in Note 2, the Company issued a four-year, non-interest-bearing \$4,000,000 note due in annual installments of \$1,000,000. The principle balance of the note is discounted at an imputed interest rate of 5.20%; the unamortized discount at August 31, 2005 was \$427,000.

Note 6. Stock Options

The Company has granted stock options for a fixed number of shares to employees and directors with an exercise price equal to at least 85% of the fair market value of the shares at the date of grant. Compensation expense is recorded at the date of grant when the exercise price of the stock option is less than the market price of the underlying stock.

If compensation cost had been determined at the grant date based on the fair value of stock option awards, the Company's net income and diluted earnings per share for the six months ended August 31, 2005 and 2004 would have been as follows:

	Six Months Ended August 31	
	2005	2004
Net income		
As reported	\$ 1,122,000	\$ 2,378,000
Pro forma	\$ 1,055,000	\$ 2,145,000
Diluted earnings per share		
As reported	\$ 0.31	\$ 0.65
Pro forma	\$ 0.29	\$ 0.59

Note 7. Income Taxes

French tax authorities have disallowed certain bad debt deductions from prior years (the bad debt deductions) of a wholly-owned subsidiary and assessed additional income taxes of approximately \$365,000, including interest and penalties. In addition, during the current fiscal quarter, French tax authorities have assessed income and value added taxes on certain transactions of the same subsidiary (the transaction assessment) of approximately \$685,000, including interest and penalties. The Company is appealing the disallowed bad debt deduction and believes that

Table of Contents

adequate provision has been made for any liability related to that assessment. The Company has disputed the transaction assessment and is in the early stages of appealing the assessment; no provision has been made in the financial statements related to this assessment because the ultimate liability, if any, cannot be reasonably determined.

Note 8. Other Income and Expense

Other (income) expense includes the following:

	<u>Six Months Ended</u>		<u>Three Months Ended</u>	
	<u>August 31, 2005</u>	<u>August 31, 2004</u>	<u>August 31, 2005</u>	<u>August 31, 2004</u>
Gain on sale of carpet seaming tape business	\$ (1,120,000)	\$	\$	\$
Change in the fair value of warrant put liability	158,341	95,000	(346,159)	25,000
Other (income) expense	(44,547)	34,244	(12,112)	13,678
	<u>\$ (1,006,206)</u>	<u>\$ 129,244</u>	<u>\$ (358,271)</u>	<u>\$ 38,678</u>

Note 9. Earnings per Share

Basic earnings per share is computed by dividing net income, after deducting preferred stock dividends accumulated, by the weighted average number of shares of common stock outstanding. Diluted earnings per share is computed by dividing net income, after deducting preferred stock dividends accumulated, by the weighted average number of shares of common and dilutive common stock equivalent shares outstanding.

Diluted common stock equivalent shares consist of stock options and warrant common stock equivalent shares, which are not used when the effect is anti-dilutive. For the six and three months ended August 31, 2005 and 2004, 325,000 common stock equivalent shares related to stock options with an exercise price of \$3.63 per share were not used due to their anti-dilutive effect.

For the six and three months ended August 31, 2005, the weighted average number of basic shares of common stock outstanding was 3,457,792 and 3,458,288 respectively. For the six and three months ended August 31, 2004, the weighted average number of basic shares of common stock outstanding was 3,437,508 and 3,448,467 respectively.

For the six and three months ended August 31, 2005, the weighted average number of diluted shares of common stock outstanding was 3,609,778 and 3,601,290 respectively. For the six and three months ended August 31, 2004, the weighted average number of diluted shares of common stock outstanding was 3,647,563 and 3,649,474 respectively.

Note 10. Comprehensive Income

The Company records foreign currency translation adjustments as other comprehensive income. For the six months ended August 31, 2005 and 2004, the Company's comprehensive income totaled \$140,000 and \$2,198,000, respectively. For the three months ended August 31, 2005 and 2004, the Company's comprehensive income totaled \$293,000 and \$1,127,000, respectively.

Note 11. Contingent Liabilities

The Company owns or operates, or has owned or operated, properties that are, or have been, used for industrial purposes. Use of these properties may subject the Company to liability relating to the investigation and cleanup of contaminants, claims alleging personal injury, or property damage as a result of exposures to, or release of, hazardous substances. The major environmental laws to which the Company may be subject, include, among others, the Federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLA can impose joint and several liability for cleanup and investigation costs, without regard to fault or legality of the original conduct, on current and predecessor owners and operators of a site, as well as those who generate, or arrange for disposal of, hazardous substances.

Table of Contents

The Company is subject to federal, state and local laws, regulations and ordinances governing activities or operations that may have adverse environmental effects, such as discharges to air and water, handling and disposal practices for solid, special and hazardous wastes, and imposing liability for the cost of cleaning up, and certain damages resulting from sites of past spills, disposal or other releases of hazardous substances (together, Environmental Laws). Sanctions that may be imposed for violation of Environmental Laws include the payment or reimbursement of investigative and clean up costs, administrative penalties and, in certain cases, prosecution under environmental criminal statutes. The Company's manufacturing facilities are subject to environmental regulation by, among other agencies, the Environmental Protection Agency, the Occupational Safety and Health Administration, and various state authorities in the states where such facilities are located. The activities of the Company, including its manufacturing operations at its leased facilities, are subject to the requirements of Environmental Laws. The Company believes that the cost of compliance with Environmental Laws to date has not been material to the Company. The Company is not currently aware of any situations requiring remedial or other action that would involve a material expense to the Company or that would expose the Company to material liability under Environmental Laws. As the operations of the Company involve the storage, handling, discharge and disposal of substances that are subject to regulation under Environmental Laws, there can be no assurance that the Company will not incur any material liability under Environmental Laws in the future or will not be required to expend funds in order to effect compliance with applicable Environmental Laws.

The Company completed testing at its facility in Bramalea, Ontario, Canada for leakage of hazardous materials and, as a result, in fiscal 1999 the Company prepared a plan to remediate the contamination over a period of years and this plan was subsequently approved by the Canadian Ministry of Environment. The Company recorded a reserve for potential environmental liability on the closing date of the Roberts Consolidated Industries, Inc. acquisition of approximately \$325,000 and this amount was subsequently increased by \$275,000 to \$600,000 based on an estimate for the cost of remediation. During fiscal 2005, the Company increased the reserve by an additional \$125,000. Through August 31, 2005, the Company has spent approximately \$643,000 and anticipates spending additional amounts on ongoing monitoring of wells and other environmental activity at the approximate rate of approximately \$30,000 per year for the next several years.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The Company is a worldwide leader in the manufacturing, marketing and distribution of a broad line of specialty tools and flooring related products. The Company markets over 3,000 specialty tools and related products used primarily for surface preparation and installation of ceramic tile, carpet, vinyl and wood flooring. The Company's products are sold to home improvement retailers; specialty distributors to the hardware, construction, flooring and home improvement trades; chain or independent hardware, tile and carpet retailers for use by the do-it-yourself consumer, as well as the construction or remodeling professional; and original equipment manufacturers. The Company has embarked on a growth strategy that encompasses acquisitions, the reduction of risk associated with certain large customer concentrations and the enhancement of cross selling of its product among the Company's channels of distribution.

During the first half of fiscal year 2006, the Company continued to grow both internally and through the acquisition of certain flooring adhesives manufacturing assets in the United States.

The Company maintains inventory levels based on anticipated demand from its customers taking into consideration the lead-time necessary to receive product from the Company's suppliers. The Company pays such suppliers on open account based on negotiated terms with the supplier. The Company grants credit to its customers based on their credit worthiness and selling arrangements. The Company generally maintains its inventory at a level to ensure prompt delivery to its customers and to provide safety stock levels necessitated by the longer lead times of its foreign suppliers.

A summary of significant accounting policies followed by the Company is set forth in Note B to the Company's consolidated financial statements contained in the Company's Annual Report on Form 10-K for the year ended February 28, 2005.

All amounts included herein have been rounded to thousands.

Forward-Looking Statements

This report contains certain forward-looking statements that are made pursuant to the safe harbor provisions of the Securities Litigation Reform Act of 1995. Forward-looking statements present the Company's expectations or forecasts of future events. These statements can be identified by the fact that they do not relate strictly to historical or current facts. They are frequently accompanied by words such as believe, intend, expect, anticipate, plan, or estimate and other words of similar meaning. In particular, such statements include statements relating to the adequacy of the Company's liquidity sources to meet the Company's working capital needs and anticipated expenditures; the Company's ability to increase the amount of sales of its products; the Company's ability to increase prices and maintain or improve its gross margins; the Company's ability to maintain good relationships with its suppliers and major customers; the Company's ability to continue to do business around the world; the Company's ability to successfully capitalize on new customers and cross-selling in connection with its business acquisitions; and the Company's ability to continue its performance and that of its products and to increase stockholder returns.

These forward-looking statements are based on currently available information and are subject to risks and uncertainties that could cause actual results to differ materially from those discussed in the forward-looking statements and from historical results of operations. Among the risks and uncertainties that could cause such a difference are the assumptions upon which the Company bases its assessments of its future working capital and capital expenditures; the Company's ability to satisfy its working capital needs and to finance its anticipated capital expenditures; the

Edgar Filing: QEP CO INC - Form 10-Q

Company's dependence upon a limited number of customers for a substantial portion of its sales and the continued success of initiatives with those customers; the success of the Company's marketing and sales efforts; improvements in productivity and cost reductions; increased pricing pressures from customers and competitors and the ability to defend market share in the face of price competition; the Company's ability to maintain and improve its brands; the Company's reliance upon certain major foreign suppliers; the Company's reliance upon suppliers and sales agents for the purchase of finished products which are then resold by

it; the level of demand for the Company's products among existing and potential new customers; the Company's ability to successfully integrate its acquired businesses; the Company's dependence upon the efforts of Mr. Lewis Gould, the Company's Chief Executive Officer, and certain other key personnel; the Company's ability to successfully integrate new management personnel into the Company; the Company's ability to accurately predict the number and type of employees required to conduct its operations and the compensation required to be paid to such personnel; the Company's ability to manage its growth, and the risk of economic and market factors affecting the Company or its customers; the impact of new accounting standards on the Company; the Company's belief that there will be no future adverse effect on the fair value of the Company's goodwill or other intangible assets; decisions by management related to accounting issues, regulation and litigation matters; the general economic conditions in North America and the world; and other risks and uncertainties described elsewhere herein.

All forward-looking statements included herein are made only as of the date such statements are made and the Company does not undertake any obligation to publicly update or correct any forward-looking statements to reflect events or circumstances that subsequently occur or of which the Company hereafter becomes aware. Subsequent written and oral forward-looking statements attributable to the Company or persons acting on its behalf are expressly qualified in their entirety by the cautionary statements set forth above and elsewhere in this report and in other reports filed by the Company with the Securities and Exchange Commission.

Risk Factors Affecting the Company's Performance

In addition to other information contained in the Company's Annual Report on Form 10-K filed with the SEC on June 15, 2005, the Company is subject to the following risk factors. While the Company believes its expectations are reasonable, they are not guarantees of future performance. The Company's results could differ substantially from its expectations if any of the events described in these risks occur.

The Company may be unable to pass on increases in the costs of raw materials and finished goods to its customers.

The costs of many of the Company's raw materials for the manufacture of flooring adhesives and tile spacers vary with market conditions. In addition, the costs of many of the Company's finished goods are impacted by changes in raw materials costs, freight costs and currency exchange rates. The Company's ability to pass increases in costs on to its customers varies depending on the product line, and the rate and magnitude of any increase. There may be periods of time during which increases in these costs cannot be recovered, which may have a material adverse effect on the Company's results of operations.

The Company's largest customers seek to purchase product directly from foreign suppliers.

Certain of the Company's larger customers have in the past contacted one or more of the Company's foreign suppliers to discuss purchasing home improvement products directly from these suppliers. Although the Company believes that its diversified product line, brand recognition and customer service will continue to offer benefits not otherwise available to the Company's customers from foreign manufacturers, the Company could experience competition from one or more foreign manufacturers that now serve as suppliers to the Company.

The Company has exposures related to buying, selling and financing in currencies other than the local currencies in which it operates.

Edgar Filing: QEP CO INC - Form 10-Q

A significant portion of the Company's business is conducted in foreign currencies; as such, fluctuations in currency exchange rates can have a material impact on the Company's results of operations. Although the Company finances certain foreign operations utilizing debt denominated in the currency of the local operating unit in order to mitigate its currency exposure, the Company cannot predict the effect currency fluctuations will have on its results of operations during fiscal 2006.

The Company estimates that a 10% change in the value of the U.S. dollar against local currencies would have changed its first half and second quarter operating income by approximately \$101,000 and \$27,000, respectively, in fiscal 2006 and approximately \$144,000 and \$39,000, respectively, in fiscal 2005. However, this quantitative measure has inherent limitations. The sensitivity analysis disregards the possibility that rates can move in opposite directions and that changes in currency may or may not be offset by losses from another currency.

Table of Contents

In addition, a substantial portion of the Company's finished goods are purchased in US dollars from foreign suppliers whose prices may be influenced by fluctuations in currency exchange rates.

The translation of the assets and liabilities of international operations is made using the currency exchange rates as of the end of the reporting period. Translation adjustments are not included in determining net income but are disclosed as Accumulated Other Comprehensive Income within shareholders' equity. In certain markets, the Company could recognize a significant gain or loss related to unrealized cumulative translation adjustments if it were to exit the market and liquidate its net investment. As of August 31, 2005, the net foreign currency translation adjustments reduced shareholders' equity by \$3.4 million.

The Company is exposed to fluctuations in interest rates.

A substantial portion of the Company's debt bears interest at rates that vary with changes in market indexes. As such, the Company is exposed to the risk of fluctuations in market interest rates. In order to limit the effect of changes in market interest rates the Company purchased, in February 2003 for \$125,000, a three year 4% LIBOR CAP on \$10 million of the Company's floating rate debt.

If interest rates had been 10% higher during the six and three month periods ended August 31, 2005, the Company's interest expense would have increased by \$81,000 and \$42,000, respectively.

The Company fails to identify suitable acquisition candidates, complete acquisitions or integrate successfully the operations of businesses it may acquire.

As part of its business strategy, the Company has pursued acquisitions that enhance its current product line and distribution channels both in the United States and around the world. Although the Company may continue to regularly evaluate acquisition opportunities, it may not be able to successfully identify suitable acquisition candidates, obtain sufficient financing on acceptable terms to fund acquisitions, or profitably manage the acquired businesses. In addition, the Company may not be able to successfully integrate the acquired operations and the acquired operations may not achieve the expected results. Any of these events may have a material adverse effect on the Company's results of operations.

The Company has been and in the future may be subject to claims and liabilities under environmental, health and safety laws and regulations that could be significant.

The activities of the Company, including its manufacturing operations at its leased facilities, are subject to the requirements of federal, state and local laws, regulations and ordinances governing activities or operations that may have adverse environmental effects, such as discharges to air and water, and handling and disposal practices for solid, special and hazardous wastes (together Environmental Laws). The Company has received various notices from state and federal agencies that it may be responsible for certain environmental remediation activities and is, or has been, a defendant in environmental litigation. Although the Company is not currently aware of any situation requiring remedial or other action that would involve a material expense to the Company or expose the Company to material liability under Environmental Laws, the Company cannot provide assurance that it will not incur any material liability under Environmental Laws in the future or that it will not be required to expend funds in order to comply with applicable Environmental Laws, either of which could have a material adverse effect on the Company.

Edgar Filing: QEP CO INC - Form 10-Q

The Company faces intense competition in its industry that could decrease demand for its products and could have a material adverse effect on its profitability.

The Company's industry is highly competitive. The Company faces competition from a large number of manufacturers and independent distributors. Many of its competitors are larger, have longer operating histories and have greater resources and access to capital than the Company. In order to maintain the Company's competitive position, the Company will need to continue to develop new products and expand its customer base both domestically and internationally. Competitive pressures may also result in decreased demand for the Company's products. Any of these factors could have a material adverse effect on the Company.

Table of Contents

Results of Operations

Six months ended August 31, 2005 compared to six months ended August 31, 2004

Net sales for the six months ended August 31, 2005 (the fiscal 2006 period) were \$105,672,000 compared to \$85,695,000 for the six months ended August 31, 2004 (the fiscal 2005 period), an increase of \$19,977,000 or 23.3%. Sales of flooring adhesives, including acquired operations, represented \$9,243,000 of the increase, while acquisitions other than acquired flooring adhesives operations and changes in exchange rates represented \$2,636,000 and \$1,521,000 of the increase, respectively. The balance of the increase was a result of further penetration of the Company's existing offerings across more home center locations and distribution customers.

Gross profit for the fiscal 2006 period was \$31,605,000 compared to \$28,930,000 for the fiscal 2005 period, an increase of \$2,675,000 or 9.2%. As a percentage of net sales, gross profit decreased to 29.9% in the fiscal 2006 period from 33.8% in the fiscal 2005 period. The decrease in gross profit as a percentage of sales principally resulted from (1) increases in the costs of raw materials and finished goods related to, among other matters, increases in the costs of crude oil and other commodities, (2) the relative increase in flooring adhesives sales that have lower overall margins than specialty tools, and (3) increased rebates associated with increased sales volumes to our larger customers. Further, \$962,000 of the increase in gross profit was the result of acquisitions other than flooring adhesives and \$484,000 of the change was a result of changes in currency exchange rates.

Overall, the pricing of individual product offerings has increased modestly. In addition, the Company is seeking additional price increases that reflect recent cost increases and is actively managing its flooring adhesive product offerings in order to raise overall adhesive margins.

Shipping expenses for the fiscal 2006 period were \$10,320,000 compared to \$8,697,000 for the fiscal 2005 period, an increase of \$1,623,000 or 18.7%. As a percentage of net sales these expenses decreased to 9.8% from 10.1% in the fiscal 2005 period, which resulted from spreading certain fixed costs across a larger sales base offset by increases in freight rates charged by common carriers due to increases in fuel costs. Acquisitions accounted for \$163,000 of the increase but at a lower percentage of sales. Changes in currency exchange rates accounted for \$105,000 of the increase. The remaining increase was a result of the increase in volume.

General and administrative expenses for the fiscal 2006 period were \$9,222,000 compared to \$7,455,000 for the fiscal 2005 period, an increase of \$1,767,000 or 23.7%. As a percentage of net sales, these expenses remained constant at 8.7% in both the fiscal 2006 and 2005 periods. The increase was predominantly related to depreciation of merchandising displays, acquisitions, non-recurring professional fees, increases in personnel costs and changes in exchange rates of \$583,000, \$493,000, \$200,000, \$179,000 and \$143,000, respectively, offset by a \$440,000 decrease in accrued bonuses.

Selling and marketing costs for the fiscal 2006 period were \$9,964,000 compared to \$8,201,000 for the fiscal 2005 period, an increase of \$1,763,000 or 21.5%. As a percentage of net sales these costs decreased to 9.4% in the fiscal 2006 period from 9.6% in the fiscal 2005 period as a result of certain fixed costs being absorbed by a higher volume of sales. Acquisitions and changes in currency exchange rates represented approximately \$214,000, and \$153,000 of the increase, respectively. The balance is a result of the increase in sales commissions and fees as a result of the increase in volume for the quarter.

Edgar Filing: QEP CO INC - Form 10-Q

Other income was \$1,006,000 for the fiscal 2006 period compared to other expense of \$129,000 for the fiscal 2005 period. The fiscal 2006 period includes a gain of \$1,120,000 as a result of the sale of the Company's carpet seaming tape distribution business in connection with its purchase of a flooring adhesive business. The balance of other expenses for both the fiscal 2006 and the fiscal 2005 periods was predominantly associated with the change in the warrant put liability.

Net interest expense increased to \$1,131,000 in the fiscal 2006 period from \$630,000 in the fiscal 2005 period. The increase is a result of the increase in borrowings to fund the Company's fiscal 2006 and fiscal 2005 acquisitions, as well as an increase in interest rates. Interest income was not significant for the fiscal 2006 and fiscal 2005 periods.

The provision for income taxes was \$852,000 in the fiscal 2006 period compared to \$1,440,000 in the fiscal 2005 period. The effective tax rate was 43.2% for the fiscal 2006 period and 37.7% for the fiscal 2005 period. The

Table of Contents

provision is based upon the most recent statutory tax rates available in every jurisdiction in which the Company operates as adjusted for nondeductible items, principally the change in the warrant put liability, and for tax contingencies.

Net income for the fiscal 2006 period was \$1,122,000 compared to \$2,378,000 in the fiscal 2005 period. Net income as a percentage of sales decreased to 1.1% in the fiscal 2006 period compared to 2.8% in the fiscal 2005 period primarily as a result of the decrease in margins and for the other reasons outlined above.

Three months ended August 31, 2005 compared to three months ended August 31, 2004.

Net sales for the three months ended August 31, 2005 (the fiscal 2006 period) were \$54,414,000 compared to \$42,591,000 for the three months ended August 31, 2004 (the fiscal 2005 period), an increase of \$11,823,000 or 27.8%. Sales of flooring adhesives, including acquired operations, represented \$5,299,000 of the increase, while acquisitions other than acquired flooring adhesives operations and changes in exchange rates represented \$1,133,000 and \$616,000 of the increase, respectively. The balance of the increase was a result of further penetration of the Company's existing offerings across more home center locations and distribution customers.

Gross profit for the fiscal 2006 period was \$15,867,000 compared to \$14,318,000 for the fiscal 2005 period, an increase of \$1,549,000 or 10.8%. As a percentage of net sales, gross profit decreased to 29.2% in the fiscal 2006 period from 33.6% in the fiscal 2005 period. The decrease in gross profit as a percentage of sales principally resulted from (1) increases in the costs of raw materials and finished goods related to, among other matters, increases in the costs of crude oil and other commodities, (2) the relative increase in flooring adhesives sales that have lower overall margins than specialty tools, and (3) increased rebates associated with increased sales volumes to our larger customers. Further, \$410,000 of the increase in gross profit was the result of acquisitions other than flooring adhesives and \$175,000 of the change was a result of changes in currency exchange rates.

Overall, the pricing of individual product offerings has increased modestly. In addition, the Company is seeking additional price increases that reflect recent cost increases and is actively managing its flooring adhesive product offerings in order to raise overall adhesive margins.

Shipping expenses for the fiscal 2006 period was \$5,286,000 compared to \$4,288,000 for the fiscal 2005 period, an increase of \$998,000 or 23.3%. As a percentage of net sales these expenses decreased to 9.7% from 10.1% in the fiscal 2005 period, which resulted from spreading certain fixed costs across a larger sales base offset by increases in freight rates charged by common carriers due to increases in fuel costs. Acquisitions accounted for \$64,000 of the increase but at a lower percentage of sales. Changes in currency exchange rates accounted for \$41,000 of the increase. The remaining increase was a result of the increase in volume.

General and administrative expenses for the fiscal 2006 period were \$4,640,000 compared to \$3,717,000 for the fiscal 2005 period, an increase of \$923,000 or 24.8%. As a percentage of net sales, these expenses decreased to 8.5% in the fiscal 2006 period from 8.7% in the fiscal 2005 period. The increase predominantly related to depreciation of merchandising displays, acquisitions, increases in personnel costs and changes in exchange rates of \$293,000, \$260,000, \$160,000 and \$46,000, respectively, offset by a \$472,000 decrease in accrued bonuses (including the reversal of \$236,000 of bonuses accrued during the first quarter of the current fiscal year).

Selling and marketing costs for the fiscal 2006 period were \$5,133,000 compared to \$4,017,000 for the fiscal 2005 period, an increase of \$1,116,000 or 27.8%. As a percentage of net sales these costs remained constant at 9.4% in both the fiscal 2006 and 2005 periods as a result of

Edgar Filing: QEP CO INC - Form 10-Q

certain fixed costs being absorbed by a higher volume of sales offset by increases from acquisitions and changes in currency exchange rates of approximately \$102,000, and \$69,000, respectively, and increased sales commissions and fees as a result of the increase in volume for the quarter.

Other income was \$358,000 for the fiscal 2006 period compared to other expense of \$39,000 for the fiscal 2005 period. The fiscal 2006 income principally results from the change in the warrant put liability.

Net interest expense increased to \$643,000 in the fiscal 2006 period from \$320,000 in the fiscal 2005 period. The increase is a result of the increase in borrowings to fund the Company's fiscal 2006 and fiscal 2005 acquisitions, as well as an increase in interest rates. Interest income was not significant for the fiscal 2006 and fiscal 2005 periods.

Table of Contents

The provision for income taxes was \$172,000 in the fiscal 2006 period compared to \$722,000 in the fiscal 2005 period. The effective tax rate was 32.9% for the fiscal 2006 period and 37.7% for the fiscal 2005 period. The provision is based upon the most recent statutory tax rates available in every jurisdiction in which the Company operates as adjusted for nondeductible items, principally the change in the warrant put liability, and for tax contingencies.

Net income for the fiscal 2006 period was \$352,000 compared to \$1,216,000 in the fiscal 2005 period. Net income as a percentage of net sales decreased to 0.6% in the fiscal 2006 period compared to 2.9% in the fiscal 2005 period primarily as a result of the decrease in margins and for the other reasons outlined above.

Liquidity and Capital Resources

Working capital increased to \$11,898,000 as of August 31, 2005 from \$11,369,000 at February 28, 2005, an increase of \$529,000 primarily as a result of (1) net assets acquired in connection with the purchase of a United States flooring adhesives manufacturing operation in March 2005 net of debt issued to fund the purchase, (2) the refinancing of the Company's term loan facility and (3) operating profits, offset by (4) the classification of the warrant put liability as a current liability. The warrant put liability has been classified as a current liability starting with the fiscal 2006 period because the warrant can be put to the Company on and after April 5, 2006, although that is not necessarily indicative of the point in time at which that obligation will require the use of Company funds.

Any cash in excess of anticipated requirements is invested in commercial paper or overnight repurchase agreements with a financial institution. The Company states the value of such investments at market price and classifies them as cash equivalents on its balance sheet.

Net cash provided by operating activities during the six month period ended August 31, 2005 (the fiscal 2006 period) was \$342,000 compared to cash used in operations of \$208,000 for the six months ended August 31, 2005 (the fiscal 2005 period). The increase of \$550,000 in cash provided by operations is substantially the result of an investment in inventories net of acquisitions in the fiscal 2006 period of \$2,710,000 less than the fiscal 2005 period, offset by a decrease of \$1,740,000 in the Company's net income as adjusted for non-cash charges, and an increase in accounts receivable, accounts payable and accrued liabilities of \$507,000.

Net cash used in investing activities was \$3,146,000 in the fiscal 2006 period compared to \$2,515,000 for the comparable period in fiscal 2005. The increase in cash used in investing activities of \$631,000 is the result of a modest increase in cash being used in the current fiscal year for acquisitions and an increase during the current fiscal year for capital expenditures, principally related to upgraded computer systems.

Net cash provided by financing activities was \$1,667,000 in the fiscal 2006 period compared to \$3,139,000 in the fiscal 2005 period. The change is principally the result of a reduction in total debt repayments of \$1,226,000 during the fiscal 2006 period when compared to the fiscal 2005 period as a result of the Company's refinancing of its term loan facility.

In March 2005, the Company consolidated its term loans and received an additional \$3 million in term loan financing. Under the terms of the new agreement, which will mature in 2008, the Company will pay \$166,000 per month for 36 consecutive months. The agreement also increased the Company's borrowing capacity under a revolving loan facility to \$27 million through February 2006 and \$29 million thereafter using the same formula for eligible accounts receivable and inventory that previously existed for the Company. The term loan has an interest rate that ranges from LIBOR plus 2.125% to LIBOR plus 2.625% (6.325% at August 31, 2005) while the revolver rate ranges from LIBOR plus 1.50% to

Edgar Filing: QEP CO INC - Form 10-Q

LIBOR plus 2.00% (5.70% at August 31, 2005) and are collateralized by substantially all of the Company's assets. The agreement also prohibits the Company from incurring certain additional indebtedness, limits certain investments, advances or loans, restricts substantial asset sales and capital expenditures, and prohibits the payment of dividends, except for dividends due on the Company's Series A and C preferred stock. At August 31, 2005, the Company had \$4,828,000 available for future borrowings under its revolving loan facility net of \$378,000 in outstanding letters of credit. During the fiscal 2006 period, the Company became aware that it was in violation of financial covenants under the Company's credit facility with its senior lender that required the Company to maintain a certain senior debt to trailing EBITDA ratio and a certain fixed charge coverage ratio as of February 28, 2005. In June 2005 the Company's loan agreements were further amended to remove and relax certain of the financial covenants for periods during and subsequent to fiscal 2005.

Table of Contents

During the six month period ended August 31, 2005, the Company borrowed \$14,163,000 and repaid \$14,210,000 under all revolving credit facilities. This resulted in an average outstanding indebtedness under lines of credit of \$24,494,000 during the period.

In July 2003, the Company refinanced its mortgage loan in Canada and financed its expansion of the Canadian facility. The balance of the mortgage at August 31, 2005 of CAD 2,264,000 (approximately US\$1.9 million) is being amortized over a 15-year period. The mortgage bears interest at LIBOR plus 2.00% and will mature in October 2007. The mortgage loan requires principal payments of approximately CAD 14,000 per month.

In May 2003, the Company prepaid its subordinated loan facility with HillStreet Fund LP (HillStreet). Funding for this prepayment came from a second term facility provided by the Company's two financial lenders under its then existing facilities. This term facility required monthly payments of \$125,000 during the first five months and \$141,667 monthly thereafter. The interest on this loan was LIBOR plus 3.25% and was consolidated with the Company's other term loan in connection with the March 2005 refinancing.

In connection with the subordinated loan agreement between the Company and HillStreet entered into on April 5, 2001, which was paid in full on May 12, 2003, the Company issued 325,000 10-year warrants (the Put Warrants) at an exercise price of \$3.63 per share. The Put Warrants continue to remain outstanding and can be put to the Company on and after April 5, 2006 based on criteria set forth in the warrant agreement. In addition, the Company may call these warrants on and after April 5, 2007 based on the same criteria. The Company recorded the initial liability for the Put Warrants based on an independent appraisal. The Company estimates the value of the liability for the Put Warrants on a quarterly basis. The liability value of the Put Warrants is calculated based on the greatest of (1) the fair market value of the Company if a capital transaction or public offering occurs; or (2) a formula value based on a multiple of the estimated twelve month EBITDA calculation; or (3) an appraised value as if the Company was sold as a going concern. Changes to the fair value of the Put Warrants are recognized in the earnings of the Company.

The Company's Australian subsidiary has a payment facility that allows it to borrow against a certain percentage of inventories and accounts receivable and that is guaranteed by the Company. At August 31, 2005, the maximum permitted borrowing was AUD 2,200,000 (approximately US \$1.6 million), of which AUD 2,067,000 was utilized.

The Company's Australian subsidiary also has two term loan facilities with an Australian financial institution that are guaranteed by the Company and that provide financing of up to AUD 2,125,000 (approximately US \$1.6 million). These term facilities expire in April 2007 and June 2008, respectively, and require quarterly payments of AUD 550,000 (approximately US \$0.4 million) and a final balloon payment.

In connection with the purchase of the assets of Vitrex Ltd., a manufacturer and distributor of accessory flooring and safety products in the United Kingdom, the Company's United Kingdom subsidiary entered into two financing arrangements with a financial institution in the United Kingdom. The first financing arrangement allows for borrowing of up to £950,000 (approximately U.S. \$1.7 million) based on the advancement of up to 80% of the value of accounts receivable. In addition, the subsidiary may borrow up to £400,000 (approximately U.S. \$0.7 million) against the value of the inventory. Both of these facilities are collateralized by substantially all of the assets of the subsidiary and a guaranty by the Company.

In connection with certain acquisitions during fiscal years 1999 through 2000, the Company issued two unsecured notes. The first note was amended on February 2, 2004 to extend the final \$250,000 due as of February 29, 2004 to October 10, 2006 with interest payable quarterly at 7%. The final payment of the second note was made on July 1, 2005.

Edgar Filing: QEP CO INC - Form 10-Q

In fiscal 2005 the Company issued three additional notes in connection with acquisitions. The total of these notes is \$2,664,000 and are substantially paid ratably over a four-year period.

During the first quarter of fiscal 2006, the Company issued another unsecured non-interest bearing note in connection with an acquisition to a seller in the amount of \$4,000,000 that is payable in equal installments over a four year period.

Table of Contents

Impact of Inflation and Changing Prices

The Company has experienced inflation related to the purchase of raw materials and finished goods. In addition to the relative increase in flooring adhesives sales that have lower overall margins than specialty tools, the Company believes that the change in its gross profit is directly affected by the change in the price of its raw materials and finished goods. The Company cannot accurately determine the extent of inflation on net sales, although to date, it has been only able to increase prices to a small portion of its customer base.

Table of Contents

ITEM 3. QUALITATIVE AND QUANTITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's exposure to market risk results primarily from fluctuations in interest rates. In addition the Company has international subsidiaries that expose the financial condition and results of operations to fluctuations in currency exchange rates. For the six months ended August 31, 2005, the exchange rate fluctuation was not material to the financial condition or results of operations of the Company.

In order to limit the effect of changes in interest rates, the Company purchased, in February 2003 for \$125,000, a three year 4% LIBOR CAP on \$10 million of the Company's floating rate debt. The Company averaged \$24,494,000 and \$24,904,000 of variable rate debt during the six and three month periods ended August 31, 2005, respectively. If interest rates had been 10% higher during the six and three month periods ended August 31, 2005, the Company's interest expense would have increased by \$81,000 and \$42,000, respectively.

The Company issued 325,000 warrants associated with certain of its previously existing subordinated debt. These warrants contain put and call provisions as defined in the agreement. If the fair value of the warrant changes by \$0.10 in any period, the effect on the Company would be an adjustment to earnings of \$32,500 for that period.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

The Company has carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures as of the end of the period covered by this report pursuant to Exchange Act Rule 13a-15(b). Based upon the evaluation, the Chief Executive Officer and the Chief Financial Officer concluded that, as further described below, the Company's disclosure controls and procedures were not effective in alerting them in a timely manner to material information relating to the Company and its consolidated subsidiaries required to be included in the Company's periodic filings.

As discussed in Item 9A of the Company's Annual Report on Form 10-K filed on June 15, 2005, the Company has concluded that the procedures to reconcile intercompany balances, record debt related to the acquisition of a subsidiary, and ensure the documentation and review of all consolidating adjusting journal entries were not effective. The Company is continuing its assessment and implementation of the corrective actions necessary to cure these material weaknesses, including, but not limited to (1) retention of additional personnel to respond to the financial reporting and control complexities associated with the Company's expanding operations; (2) developing and implementing additional control procedures over the recording of intercompany transactions, reconciliation of intercompany balances, and monitoring of compliance with those procedures; and (3) developing and implementing additional control procedures over the initiation and review of adjusting journal entries. On July 19, 2005, representatives of the Company met with representatives of the Securities and Exchange Commission to explain the restatement described in Note C to the consolidated financial statements included in the Company's Annual Report on Form-K for the year ended February 28, 2005. Since that meeting, no questions or requests for additional information have been made by the Securities and Exchange Commission.

A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Management necessarily applied its judgment in assessing the benefits of controls relative to their costs. Because of the

Edgar Filing: QEP CO INC - Form 10-Q

inherent limitations in all control systems, no evaluation of controls or any related mitigating actions can provide absolute assurance that all control issues and instances of fraud, if any, within the company have been detected. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Because of the inherent limitations in a control system, misstatements due to error or fraud may occur and may not be detected.

(b) Changes in Internal Controls Over Financial Reporting.

The Company has taken certain steps in order to moderate the effects of the material weaknesses described in Item 4(a) above, including hiring an additional senior accountant experienced in international consolidations, implementing a review of current period inter-company transactions and implementing certain review procedures related to consolidating adjusting journal entries.
