UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2005

Commission File Number 0-27459

DIGITAL INSIGHT CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

77-0493142
(I.R.S. Employer
Identification Number)

26025 Mureau Road, Calabasas, California 91302

(Address of principal executive offices, including zip code)

(818) 871-0000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

None

Securities registered pursuant to Section 12(g) of the Act:

Common Stock, \$0.001 par value per share

(Title of Class)

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. YES NO

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. YES NO

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). YES NO

Based on the closing sale price of \$23.92 as reported by the Nasdaq National Market System on June 30, 2005, the last business day of the registrant's most recently completed second fiscal quarter, the aggregate market value of the registrant's common stock held by non-affiliates was \$577.5 million. The shares of common stock held by each officer and director and by each person known to the registrant who owns 5% or more of the outstanding common stock have been excluded in that such persons may be deemed to be affiliates. This determination of affiliate status is not necessarily a conclusive determination for other purposes. As of February 28, 2006, registrant had 34,827,596 shares of its common stock outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's proxy statement for the 2006 annual meeting of stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K to the extent stated herein. The proxy statement will be filed within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

In addition to historical information, this Annual Report on Form 10-K as well as other statements made or to be made by Digital Insight in periodic press releases and other public communications contain forward-looking statements that involve risks and uncertainties. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as may, will, should, expect, anticipate, intend, plan, believe, estimate, potential, continue, the negative or comparable terminology. These statements are only predictions. Actual events or results may differ materially from any forward-looking statement. In evaluating these statements, you should specifically consider various factors, including the risks outlined under Risk Factors in Item 1A of Part I.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of the forward-looking statements. We undertake no obligation to update publicly any forward-looking statements for any reason after the date of this Annual Report on Form 10-K.

INFORMATION ABOUT DIGITAL INSIGHT

We file annual, quarterly and current reports, proxy statements, and other documents with the Securities and Exchange Commission, or the SEC, under the Securities Exchange Act of 1934, or the Exchange Act. You may read and copy any materials that we file with the SEC at the SEC's Public Reference Room at 450 Fifth Street, N.W., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Our reports, proxy statements, and other documents filed electronically with the SEC are available at the website maintained by the SEC at <http://www.sec.gov>.

We also make available free of charge on or through our Internet website at <http://www.digitalinsight.com> our annual, quarterly, and current reports, and, if applicable, amendments to those reports, filed or furnished pursuant to Section 13(a) of the Exchange Act as soon as reasonably practicable after we electronically file such reports with, or furnish them to, the SEC.

Table of Contents

PART I

ITEM 1. BUSINESS

Overview

We are a leading provider of outsourced online banking applications and services to banks, credit unions and savings and loan associations, serving more than 1,700 client financial institutions. We offer outsourced software products that are hosted in our data centers and delivered as an on-demand service offering to financial institutions, generally with under \$20 billion in assets. Although we support our clients through a single version of software and common, multi-tenant data center infrastructure, our products are highly configurable to provide a look and feel that preserves the financial institution's unique brand identity. Our contracts with financial institutions are long-term in nature, generally ranging from three to five years. Our clients pay monthly fees that are generally variable with growth in active end users and the number of transactions. More than 90% of our revenues was derived from recurring service fees during 2005.

Our outsourcing operations include three main product lines: online banking for consumers, which also includes bill payment and bill presentment; online banking for businesses (also referred to as business banking); and online lending for consumer loans. We also offer online business banking products to large financial institutions that are available either as a licensed software implementation or hosted in our data centers. Our broad capabilities within online business banking allow us to serve all tiers of financial institutions and their business customers of all sizes. Our clients benefit from an extensive portfolio of complementary products and services that add value to our core offerings, including online check imaging, online statements, target marketing, online account opening, multi-language support, web portal technology, web site development and maintenance, and professional services.

In contrast to in-house software deployments that require significant development resources and lengthy installations, we provide comprehensive Internet applications that can be implemented rapidly and cost-effectively. By using our applications, financial institutions can keep pace with rapid advancements in Internet technology and large development expenditures by large banks without placing demands on in-house technical resources. We also help our clients generate a higher return on investment with our cooperative marketing and support programs, which promote end user adoption and cross-selling. Our comprehensive suite of products enables our clients to generate higher revenues from increased loan and account balances, to increase customer retention and to lower their costs to serve customers by promoting self-service functions available on the Internet.

Since our inception in 1995, we have established a growing range of strategic relationships with the industry's leading data processing vendors to ensure that financial institutions can leverage their investments in existing data processing systems by fully integrating them with our Internet applications. In recent years, we have also established a growing network of relationships with more than 100 developers of third party products that complement our core offerings with full interoperability and integration. Our scale and large client base typically allow us to negotiate more favorable pricing terms with these vendors and preferential support for new product releases relative to other online banking vendors that have less purchasing influence.

Our applications also offer high levels of security, up-time availability and system redundancy, and are designed to be readily expandable, or scalable, as the number of end users grows. We believe our data center facilities are large enough to support our expected growth for the next several years.

We have a large opportunity to grow our future revenues by increasing end user adoption among our current customers. As of December 31, 2005, 6.3 million consumer end users were actively using our Internet banking applications, representing 16.9% penetration of the 37.0 million potential end users among our live Internet banking clients. Of the 6.3 million active Internet banking end users, 1.4 million end users were signed up for our online bill payment service, representing 23.1% of active Internet banking users. As of December 31, 2005, 106,300 business end users were actively using our outsourced business banking solutions.

Table of Contents

We began operations in 1995. Our company was originally organized as a Minnesota limited liability company, which was then converted to a Delaware corporation in 1997.

Industry Background

Consumers, businesses and financial institutions increasingly recognize that the Internet is a powerful and efficient medium for the delivery of financial services, including Internet banking, bill payment and bill presentment, online lending, and a host of other services for retail and business customers of financial institutions. Consumers and businesses increasingly bank online because of the convenience of remote access to account information 24 hours a day, 7 days a week, the rapid growth of broadband technologies that encourage higher Internet use, and generally increasing product awareness and comfort with conducting financial transactions online. According to Jupiter Research, 55 million U.S. households will bank online by 2010, up from 38 million in 2005. Similarly, Forrester Research predicts that the number of households paying bills online at a bank web site will double from 15 million in 2005 to 30 million in 2010.

For financial institutions, the Internet offers a cost-effective service delivery channel from which to market a broad portfolio of products and services in an effort to strengthen and secure customer relationships and generate higher revenues. The Internet channel also enables financial institutions to expand their addressable markets and maintain service availability 24 hours a day, 7 days a week. In addition, a growing body of industry research and case studies, including recent analysis from Forrester Research, Celent, Bank of America and Citibank, has demonstrated that Internet banking and online bill payment end users are more profitable to serve because online users:

generate significantly higher revenues than offline customers, primarily because online customers use more banking products and services, and maintain higher account balances than offline customers;

cost less to serve because online users tend to utilize more self-service functions and therefore interact with the more costly retail branch and call center service channels less frequently than offline customers; and

are retained by financial institutions at significantly higher rates than offline customers.

Research published by Bank of America demonstrated that end users of the bank's online bill payment service experienced attrition that was 80% lower than offline customers, and were 31% more profitable than offline customers within 31 months. Citibank also reported that its online customers are 40% more profitable than customers who do not bank online. Consequently, seven of the top 10 U.S. financial institutions have eliminated their monthly customer fees for online bill payment in recent years and launched aggressive marketing campaigns to promote adoption of the online channel. In response, a fast-growing segment of smaller financial institutions have initiated similar campaigns, increasing the adoption of bill payment throughout the industry, particularly among the two-thirds of U.S. consumers who will not pay for bill payment services, according to Forrester estimates.

The largest U.S. financial institutions generally develop and maintain an internally hosted solution for the delivery of online financial services such as Internet banking. By contrast, we believe that the majority of the approximately 18,000 credit unions, banks, and savings and loans in the U.S. with assets of less than \$20 billion prefer to outsource the development and maintenance of their online banking initiatives to a technology services provider. These community and regional financial institutions increasingly seek to provide advanced Internet-based services to remain competitive, but frequently lack the capital, expertise, or information technology resources to offer such services in-house. Increased regulatory requirements, including new mandates for online security in 2006, have created additional complexity and provided financial institutions greater incentives to consider outsourcing their online banking channel.

Table of Contents

Our Business

We provide a comprehensive portfolio of outsourced online banking software products that are hosted in our data centers and delivered as an on-demand service offering to financial institutions with under \$20 billion in assets. We generate recurring revenues that are generally variable with growth in active Internet banking end users and user transaction volume. Our contracts with financial institutions are long-term in nature, generally ranging between three to five years. More than 90% of our revenues were derived from recurring service fees in 2005.

Our three core product offerings are Internet banking, business banking and lending. Our Internet banking applications for consumers include: account management, account transfers and interfaces to personal financial management software, bill payment and bill presentment, check imaging, online statements, multi-language support, inter-institutional funds transfer, online account opening and other expanded services. Our business banking software products serve the online banking needs of our clients' business customers and include features similar to those of our consumer product, as well as payroll direct deposits, wire and inter-account fund transfers, account reconciliation, foreign exchange trade, and other services. Our business banking software products can be deployed as a licensed software implementation or hosted in our data centers. A licensed implementation allows financial institutions to host our software using their own equipment and facilities. We have a versatile business banking product line that allows us to serve all tiers of financial institutions and their business customers of all sizes. Supporting products and services for consumer and business online banking include web portal technology, wireless capability, target marketing, professional services, and web site development and maintenance.

Our lending software products and related services are hosted in our data center and delivered as an on-demand service offering to client financial institutions. Our lending platforms streamline our clients' lending operations for non-mortgage consumer loans across multiple customer service channels, including back office administrative functions such as document preparation. Lending products and services include a loan origination system for automating workflow throughout the loan approval process, an Internet-based, real-time loan decisioning product, multi-channel automated underwriting services, and call center services to support loan applicants and general customer support inquiries on behalf of our clients, 24 hours a day, 7 days a week.

We offer the following benefits to financial institutions:

Comprehensive and Customizable Solutions. We offer turnkey, subscription-based products and services with all critical applications hosted in our data centers. Our online banking applications can be configured to offer financial institutions and end users the industry's broadest portfolio of standard and optional features, including applications developed internally and in cooperation with our extensive network of product partners. Our web site design and implementation services also enable financial institutions to establish Internet banking services with a look and feel that preserves their unique brand identity.

Rapid and Affordable Implementation. Our applications can be rapidly implemented, and represent an affordable alternative to internally developed Internet banking applications for financial institutions. Average implementation times for our Internet banking applications range from four to six months, depending on the availability of an existing interface with a financial institution's data processing vendor and the financial institution's schedule.

Reliable, Secure, and Scalable Service. Our service is highly reliable. Our systems incorporate sophisticated data encryption techniques, a series of firewalls between the Internet and financial institutions, and several layers of security technology in order to guard against unauthorized access to our network. In addition, our data centers and systems have the capacity to scale rapidly to accommodate an increased number of end users and transactions.

Extensive Data Processing Vendor Relationships. We provide direct connections, or interfaces, to many vendors of core banking software and data processing services to financial institutions. As of

Table of Contents

December 31, 2005, we have developed interfaces to a majority of the major data processing vendors serving our addressable market of financial institutions. By working directly with these vendors, we can quickly and cost-effectively connect our systems allowing relatively more rapid implementation of new customers to the same core processing system. Our interfaces also allow for tight integration with other functions supported by the data processing vendor, such as loan origination, online statements and check imaging. We believe that the number of data processing vendor interfaces we have developed provides us with a unique and significant competitive advantage.

Uniquely Broad Set of Value-Added Products. We enable financial institutions to expand their Internet presence beyond their core banking functions by providing additional value-added products and services to their customers. We believe our product suite offers the broadest capabilities in the industry, including: online bill payment and bill presentment, online lending, online business banking, check imaging, account aggregation, inter-institutional payments, online statements, check reordering, target marketing software, multi-language support, online account opening, professional services, and training seminars. We maintain an extensive network of vendors that have cooperatively developed many of our value-added products and services.

Cooperative Marketing Programs. Our cooperative marketing programs encourage higher end user adoption of the online channel through a series of direct marketing and promotional tools including direct mail, in-branch displays, training programs, online banner advertisements, statement stuffers, and email campaigns.

Our Strategy

Our objective is to further enhance our position as a leading provider of online banking and related online solutions to financial institutions for their retail and business customers. We intend to provide these institutions with a competitive platform that will permit them to achieve additional revenue-producing opportunities, enhance long-term cost-efficiencies, and improve customer service and client retention. To achieve this objective, we intend to:

Increase End User Penetration. As of December 31, 2005, our financial institutions with live Internet banking sites had an average penetration of 16.9% for consumer online banking, and 23.1% of these online banking users were also registered for online bill payment. Although our penetration has grown rapidly, these averages are well below levels achieved by industry-leading financial institutions that have reported online banking penetration in excess of 50%. We believe our base of 37.0 million potential consumer end users among our live Internet banking clients provides a large opportunity to increase our revenues as end user adoption increases in the future. We help clients expand the number of active end users of our Internet banking and bill payment applications through marketing assistance programs and by sharing best practices. These cooperative marketing programs enable clients to increase their returns from the online channel through increased revenue opportunities, lower customer attrition, and reduced service costs.

Pursue Cross-Selling Opportunities Within Our Existing Customer Base. We currently enable financial institutions to offer Internet banking applications and automated lending capabilities to their retail and business customers. We believe that we have a significant opportunity to sell our comprehensive suite of products and services to existing customers as their needs evolve and their customer base expands. For example, at December 31, 2005, we had contracts with 214 financial institutions for our lending products and 644 financial institutions for our business banking products, demonstrating the cross-sale opportunity within our total customer base of 1,748 financial institutions.

Attract New Financial Institution Customers, Particularly Conversions From Competitive Platforms. We intend to further penetrate the substantial market for online banking applications. As of December 31, 2005, we had contracts with 1,748 financial institutions of the estimated 18,000 financial institutions in the U.S. under \$20 billion in assets. Although we continue to contract with financial

Table of Contents

institutions that have yet to offer online banking, we primarily target institutions that currently offer online services and may demand a broader range of product functionality than offered by their current vendor, or those institutions evaluating a move to a fully outsourced online banking solution from an in-house system.

Retain Existing Customers. Approximately 20%-25% of our client base is subject to contract renewals each year. We intend to maximize client retention through a dedicated account management team, aggressive utilization of sales resources, a strategic approach to managing of key accounts, and other initiatives.

Increase Our Relationships with Core Data Processing Vendors. We intend to increase the number of our relationships with core data processing vendors to allow our applications to interface with more financial institutions and to expand our sales and distribution channel relationships. We currently interface with most of the major vendors that provide data processing services to the financial institutions in our addressable market. We intend to continually increase this coverage and to expand our existing relationships. We believe our uniquely broad portfolio of available products, financial strength, large client base and highly reliable data centers make us an attractive partner for core data processors.

Broaden Product and Service Offerings. We plan to continue to offer new and enhanced products and services to provide our customers with a comprehensive range of capabilities they need to compete effectively. In coming years, we intend to introduce several new products to enable our customers to better compete against larger financial institutions. Our product plans include internal development efforts and an increasing focus on introducing products in cooperation with other vendors. We believe our large client base allows us to negotiate the best available pricing terms with other vendors and receive preferential support for new product releases relative to smaller Internet banking providers with less purchasing influence. Our increasing focus on relationships with other vendors will allow us to introduce products more quickly and with reduced capital investment than if we relied solely on internal development efforts.

Pursue Strategic Merger and Acquisition Opportunities. We intend to continue to evaluate opportunities to acquire businesses that could expand our base of financial institution customers, add complementary technologies or services, or provide other benefits.

Products and Services

Consumer Internet Banking

We offer a broad range of outsourced Internet banking products and services for our financial institution clients' retail customers that include the following features:

View online transaction history, account balances, check images, and statements.

Online bill payment capability to pay anyone through the financial institution's web site.

Online bill presentment capability to receive, view, pay and store electronic bills online.

Two-way data transfer with Microsoft Money® and Intuit Quicken® financial software.

Secure online applications to open new accounts, and apply for credit cards, insurance, loans or other products.

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Inter-institutional and person-to-person payments outside the financial institution.

Wireless banking and alerts through mobile devices.

Promotion and marketing tools to allow financial institutions to market to online users.

E-commerce web portal for marketing third-party financial products.

Table of Contents

Web site design, development, maintenance, and implementation services.

Funds transfer between accounts, current or scheduled.

Re-ordering of checks online.

Online account opening and funding capabilities for new deposit accounts.

Business Banking

Our business banking products serve the business customers of our financial institution clients. We generally provide our business banking products on an outsourced basis; however, we also offer a licensed software option for large financial institutions. Primary features include:

Online administration platform to control access among business users.

View online transaction history and balance information.

Funds transfer between accounts, current or scheduled.

Stop payments for previously issued checks.

File export to business financial management software.

Bill payment and bill presentment.

Automated clearing house (ACH) services for payroll and other payments.

Wire transfers with other financial institutions or vendors.

Foreign exchange rates and trading.

Check reconciliation services.

Lockbox reporting and viewing of lockbox deposit detail.

Online payroll services.

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Through December 31, 2003 we managed the business banking business within Internet banking. With the acquisition of Magnet Communications, Inc., or Magnet, on November 25, 2003, we expanded our business banking products and services and consequently we established business banking as a separate reportable business segment on January 1, 2004.

Consumer Lending

Our lending products provide, on a fully outsourced basis, loan origination capabilities and rules-based underwriting on behalf of our financial institution clients, applying client-specific and client-defined rules to reach a credit decision. We support a wide range of consumer loans including home equity, auto loans and personal loans. We do not support mortgage lending or bear any of the underwriting or financial risk for the loans we service. We charge our clients a predetermined fee per loan application regardless of whether the loan is approved and a fixed monthly maintenance fee for clients utilizing our loan origination system. Lending products are configured to support multiple service channels to match consumer preferences and include:

A loan origination system that manages workflow throughout the lending process, document preparation, and related back-office and administrative functions.

Real-time loan evaluation over the Internet for consumer loans, including the retrieval of an electronic credit report and a credit decision response to the applicant, generally in less than a minute.

Loan evaluation through a 24 hours a day, 7 days a week call center staffed with trained loan officers.

Table of Contents

Loan evaluation by the financial institution client's loan officer, using our Internet-based product for desktop decisioning within the retail branch.

Our lending underwriting products feature interfaces to our loan origination system as well as other major loan origination vendors, online credit bureau verification, and pre-qualification capabilities for home equity and consumer loans.

Data Centers

We currently provide our Internet banking services out of our main data center located in Westlake Village, California. Our disaster recovery data center in Norcross, Georgia allows for emergency backup and disaster recovery functions in the event of system interruption or shutdown involving the Westlake Village data center.

Both data centers maintain a controlled access environment with security measures ranging from alarms, video cameras, security guards, biometric access controls and a centrally monitored key card access system. Our data centers are also equipped with a self-contained power system that includes a high capacity battery backup system, providing continuous power to all production systems. In addition, diesel power generators provide backup power to each of our facilities in the event of an extended power outage. We maintain and test our Norcross disaster recovery data center to provide system redundancy, fail-over and emergency backup capabilities.

We believe our data center facilities are large enough to support our expected growth for the next several years.

Customers

As of December 31, 2005, we had contracts with 1,748 financial institutions, including 1,505 for Internet banking services, 644 for business banking services and 214 for lending services. We had approximately 6.3 million active Internet banking end users representing a 16.9% penetration of the 37.0 million potential end users among 1,400 live client sites at December 31, 2005.

For the year ended December 31, 2005, no individual financial institution accounted for over 10% of our total revenues.

Third Party Relationships

We have relationships and have developed interfaces with most of the major vendors of core data processing software and outsourced data processing services to financial institutions. These system interfaces enable us to access a financial institution's host system to provide end users access to their account data. In addition to developing new interfaces, we continue to significantly enhance our many existing interfaces in order to deliver more robust connectivity and increase operating efficiencies. We have developed interfaces to the majority of the core data processing systems that provide services to financial institutions, most of which are supported within joint marketing arrangements that we have in place with data processing vendors. More than 50% of our revenue is derived from these referral and reseller agreements with core processing vendors, including Fiserv, BISYS, Fidelity Information Services, Inc., Metavante (including Kirchman Corp., its affiliate), Computer Services Inc., Data Center Inc., re:Member Data (a division of Open Solutions, Inc.), Harland Financial Solutions, Bradford Scott, and BMA.

To deliver bill payment and bill presentment services, we maintain value-added reseller relationships with major providers such as Metavante Corporation and CheckFree Services Corporation, and have fully integrated these products into our offerings. We market bill payment and bill presentment services as an integral part of our product suite, enabling financial institutions to offer bill payment within their online banking site with the

Table of Contents

convenience of a single password. Our agreement with Metavante expires in June 2010. Our agreement with CheckFree is renewable for additional one-year terms following the expiration of the initial term in September 2007. Our agreements require us to pay variable fees based on factors such as the number of bill payment transactions, customers, and end users, and generally provide improved pricing terms as transaction volumes increase.

We entered into an outsourcing agreement with PSCU Financial Services, or PSCU, a credit union service organization, to provide outsourced call center services to Digital Insight clients through 2012. As of December 31, 2005, we were in the process of migrating clients served by our call center to call centers operated by PSCU. We also entered into a license and reseller agreement with PSCU through 2010, whereby PSCU has licensed our new lending platform and named Digital Insight as its preferred provider of Internet banking, business banking and lending products to PSCU clients. The license and reseller agreements include minimum payments to us beginning in 2006.

Sales and Marketing

We sell to our customers and potential customers primarily utilizing a direct sales model and, to a lesser extent, in cooperation with core processing partners. As of December 31, 2005, our sales, marketing and client relations staff consisted of 95 people, who are responsible for prospecting and acquiring new accounts, managing existing client relationships and renewals, and cross-selling additional products to those accounts. Our sales and account management team is primarily organized by financial institution asset size and location.

Our target market for outsourced online consumer Internet banking, business banking and consumer lending services is comprised of small to medium sized financial institutions seeking a comprehensive Internet solution to compete with the larger national banks in their market. The majority of our sales opportunities are with financial institutions evaluating a conversion from a competitive Internet banking platform, often in response to increased functionality demands among end users. To a lesser degree, we continue to market to newly-created banks and other financial institutions that have yet to offer online banking to their customers.

Our typical sales cycle is approximately six to eight months for new financial institution customers and approximately two months for add-on sales to existing financial institution customers. We have a dedicated account management and sales staff to manage the client renewal process, and a sales compensation plan that rewards client retention. Our account managers identify customers whose contracts are subject to renewal with sufficient lead-time to allow the customer, our sales staff, and executive sponsors to manage the renewal process and maximize client retention.

Our primary marketing efforts are focused on identifying potential customers and marketing our services to consumer end users in cooperation with our financial institution clients. Our marketing efforts include: press relations, advertising, direct mail, trade show meetings with Internet banking user groups, and client conferences hosted by us and our core processing partners. We also offer cooperative marketing programs for existing customers, under which financial institutions partner with us to promote higher adoption and retention of the online channel, and cross-selling of additional products to online end users. Sales compensation plans are aligned with our primary goal of increasing online adoption among our customer base.

In addition, we receive marketing benefits from endorsements and promotional arrangements. We are exclusively endorsed by the American Bankers Association, or ABA, for our Internet banking product. The ABA endorsement, issued by the Corporation for American Banking, or CAB, an ABA subsidiary, was granted to us after an extensive due diligence process which included an analysis of our management, financial soundness, solution functionality, marketing capabilities and customer service standards, as well as a review of other national providers of Internet banking solutions. Our endorsement agreement requires CAB to promote our Internet banking services to all ABA members in the United States and permits us to display the American Bankers Association-Sponsored logo in all of our marketing materials related to Internet banking services. We

Table of Contents

provide CAB with a small percentage share of the revenues received from ABA members who have become our customers since the effective date of the endorsement agreement, subject to annual minimum payments. In addition, we have promotional arrangements with several state banking associations that promote our products to their constituents in exchange for referral fees.

Product Development

As of December 31, 2005, our product development staff consisted of 254 software developers and engineers, as well as product and project managers. Their development efforts are focused on:

Enhancements to Existing Products. We are continuously developing new features and functions for our consumer and business banking and lending products in order to provide a broader range of capabilities. Additional product enhancements will provide greater usability for our financial institution clients and their end users.

Introduction of New Product Lines Through Internal Development. We are continuously seeking to expand our product offerings. For example, we recently introduced a loan origination system to complement our lending underwriting products, and to allow our customers to streamline workflow and administrative functions throughout the lending process.

Introduction of New Product Lines Provided by Technology Vendors. We are increasingly committed to expanding our product portfolio by introducing new products through relationships with technology vendors. For example, we recently entered into an agreement with CashEdge to introduce a product that allows consumers to open and fund new deposit accounts online within a single Internet session. During 2006, we will also introduce a multi-factor authentication solution in conjunction with a technology vendor. Multi-factor authentication is a security feature that helps protect end users from online fraud by implementing enhanced user-verification during account login beyond username and password.

Interfaces with Data Processing Vendors and Other Third Parties. We are continuing to enhance and expand our interfaces to financial institutions' core data processing systems and other third-party systems, such as vendors of online check imaging systems. Our research and development expenses were \$23.9 million in 2005, \$23.4 million in 2004, and \$15.6 million in 2003. These expenses relate to product development and are charged to operations as incurred.

Competition

The market for Internet banking services is highly fragmented with many providers. In the area of retail Internet banking, we primarily compete with other companies that provide outsourced online banking services to financial institutions, including Online Resources, S1 Corporation and FundsXpress. Also, vendors such as Corillian and Financial Fusion (a subsidiary of Sybase) that primarily target the largest financial institutions occasionally compete with us in our market segment. In addition, Fiserv, Open Solutions, Jack Henry, Metavante and several other vendors of data processing services to financial institutions offer their own online banking products, although many of these firms also offer our products through a referral or reseller arrangement with us to clients demanding a broad set of online capabilities.

Our primary competitors in the business banking services segment are vendors of business banking systems for large corporations such as P&H Solutions, BankLink, Fundtech, and S1 Corporation. Our primary competitors for providing lending products to financial institutions are APPRO (a division of Equifax), IA Systems, and Lending Solutions, Inc.

Government Regulation

The financial services industry is subject to extensive and complex federal and state regulation. Our current and prospective customers, which consist of financial institutions such as commercial banks, savings and loans

Table of Contents

associations, credit unions and savings banks, operate in markets that are subject to rigorous regulatory oversight and supervision. The compliance of our products and services with these requirements depends on a variety of factors including the particular functionality, the interactive design, and the charter or license of the financial institution. Our financial services customers must independently assess and determine what is required of them under these regulations and are responsible for ensuring that our system and the design of their web sites conform to their regulatory obligations.

We are not licensed by the Office of the Comptroller of the Currency, the Board of Governors of the Federal Reserve System, the Office of Thrift Supervision, the Federal Deposit Insurance Corporation, the National Credit Union Administration or other federal or state agencies that regulate or supervise depository institutions or other providers of financial services. We are examined by the Federal Financial Institution Examination Council under the Information Technology examination guidelines. Although we believe we are not subject to direct supervision by federal and state banking agencies relating to other regulations, we have from time to time agreed to examinations of our business and operations by these agencies. We are also subject to encryption and security export laws and regulations, which, depending on future developments, could render our business or operations more costly, less efficient or impossible.

Proprietary Rights

Our proprietary rights are important to our products and services, and we continually seek to expand the technology that we use in our business through internal development, licensing and acquisitions. We generally rely on copyright, trademark and trade secret laws, and contractual rights to establish and maintain our proprietary rights in our technology and products. In 2002, the Digital Insight mark was approved as a registered trademark by the U.S. Patent and Trademark Office. Due to the nature of the technology associated with our products and services, we believe that our ability to compete does not depend to any significant extent on whether or not our technology is patented, and none of our technology is currently patented. In order to protect our proprietary information we limit access to and distribution of our source code and other intellectual property, and we also enter into confidentiality agreements with our employees, consultants, resellers and customers.

Employees

As of December 31, 2005, we had approximately 800 employees, including 19 part-time employees. None of our work force is unionized. We have not experienced any work stoppages and consider our relations with our employees to be good. Following the completion of the call center outsourcing, we will reduce our staff count by approximately 90 employees in our lending division.

ITEM 1A. RISK FACTORS

You should carefully consider the following risk factors in your evaluation of us. Our business and results of operations could be seriously harmed by any of the following risks. The trading price of our common stock could decline due to any of these risks, and you may lose part or all of your investment.

Fluctuations of our operating results could cause our stock price to fluctuate.

Our operating results may fluctuate significantly in the future based upon a number of factors, many of which are not within our control. We base our operating expenses on anticipated revenue growth and many of our operating expenses are relatively fixed in the short-term. Our revenue model is based largely on recurring revenues, billed monthly, predominately derived from growth in end users and transaction volume within a monthly billing period. The number of total end users accessing our systems is affected by many factors, several of which are beyond our control, including the number of new user registrations, end user turnover, loss of customers, and general consumer trends. We may expend funds and management resources to increase end user

Table of Contents

penetration and still fail to achieve the targeted growth objectives. Accordingly, our results of operations for a particular period may be adversely affected if fluctuating growth in end users causes revenues and operating results to be lower than expectations of market analysts or investors. If this were to occur, the price of our common stock would likely decrease.

Our operating results may also fluctuate in the future due to a variety of other factors, including:

the overall level of demand for Internet banking services by consumers and businesses and the demand for our products, product enhancements and services in particular;

loss of significant customers due to non-renewals of the service contracts, acquisition of customers by non-customer financial institutions, customer insolvencies and other reasons;

consolidation among core data processing vendors, which may affect our reseller and revenue-sharing agreements with certain core processor organizations or reduce the likelihood of extending our agreements at expiration;

actions taken by our competitors, including the introduction of new products or changes in their pricing models;

spending patterns and budgetary resources of financial institutions and their end user customers;

the timing of upgrades to our computer hardware infrastructure;

the timing of customer product implementations or our failure to timely complete scheduled product implementations;

delays in the product development schedule of one or more of our new products or services;

a negative outcome in any significant legal proceeding or prolonged litigation;

the adoption of new accounting standards;

governmental actions affecting Internet operations or content; and

general economic trends and the impact of external factor or events, such as war or acts of terrorism.

If we are unable to implement appropriate systems, procedures and controls, we may not be able to successfully offer our services and grow our business.

Our ability to successfully offer our products and services and to grow our business requires an effective planning and management process. We updated our operations and financial systems, procedures and controls following our prior acquisitions. Our systems, however, will continue to require additional modifications and improvements to respond to current and future changes in our business. If we cannot grow our business, and manage that growth effectively, or if we fail to implement in a timely and cost-effective manner appropriate internal systems, procedures,

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

controls and necessary modifications and improvements to these systems, our business will suffer. For example, our billing system must keep pace with our business and be able to interoperate with our contract database and production database.

Security breaches could damage our reputation and business.

Our products and networks may be vulnerable to unauthorized access, computer viruses and other disruptive problems. We transmit confidential financial information in providing our services. Users of Internet banking and other electronic commerce services are concerned about the security of transmissions over public networks. Therefore, it is critical that our facilities and infrastructure remain secure and be perceived by the marketplace as secure. A material security breach affecting us or one of our key vendors could damage our reputation, deter financial institutions from purchasing our products, deter their end user customers from using our products, or

Table of Contents

result in liability to us. Further, any material security breach affecting our competitors could affect the marketplace's perception of Internet banking in general and have the same adverse effects.

Concerns over security and the privacy of end users have intensified both within and outside of the U.S., and may inhibit the growth of the Internet and other online services generally, especially as a means of conducting commercial transactions. Any well-publicized compromise of security or a widespread epidemic involving identity theft could deter people from using the Internet or using it to conduct transactions that involve transmitting confidential information. We may need to expend significant capital or other resources to protect against the threat of security breaches or to alleviate problems caused by breaches. Although we intend to continue to implement state-of-the-art security measures and upgrade our products to address these issues, persons may be able to circumvent the measures that we implement in the future. Eliminating computer viruses and alleviating other security problems may result in interruptions, delays or cessation of service to users accessing web sites that deliver our services, any of which could harm our business.

Any failure in our disaster recovery or emergency fail-over procedures could cause interruption in our system and loss of customers.

Most of our communications and network equipment related to our Internet banking operation is currently located in our main data center in Westlake Village, California. We also maintain a backup data center in Norcross, Georgia for the Westlake Village data center. We maintain these two data centers in a manner that will continue to provide system redundancy, fail-over from the Westlake facility to the Norcross facility and emergency backup capabilities. While the architecture of the two systems is largely integrated, the process of failing over to a recovery site currently involves some manual intervention, and there is some attendant delay and loss of use of non-key features and functionality. In addition, we may experience problems during the recovery or fail-over process that could cause system failures and decreased levels of service. Although we perform testing on a periodic basis to ensure that recovery mechanisms perform as planned, unexpected failure of any of these mechanisms may prevent a successful recovery.

A natural disaster, such as a fire, an earthquake or a flood, at any of our data centers could result in failures or interruptions in providing our products and services to our customers. Although we maintain and regularly test an uninterruptible power supply system for our critical systems in all of our data centers, there is no assurance that this system, consisting of a backup battery and a diesel generator, will function properly, or at all, in case of a power loss. In addition to a potential loss of power, our systems are vulnerable to operational failures, telecommunications failures and similar events. We have contracted to provide a certain level of service to our customers and, consequently, an unexpected interruption of our system has in the past caused, and in the future could cause, us to refund fees to some of our customers to compensate for decreased levels of service. Even with our disaster recovery plan and the integration of our two main facilities, we could experience a failure or interruption in our systems that could lead to loss of data or the inability to provide services to our customers.

If we do not retain our customers or they do not successfully market our products, we will not be able to increase our revenues.

We also depend on our financial institution clients to market and promote our products to their end user customers. Neither we nor our financial institution customers may be successful in marketing our current or future Internet banking products and services.

Moreover, financial institutions generally agree to use our products and services pursuant to contracts with durations that range from three to five years. Upon expiration, these contracts may be discontinued and we may lose customers as a result. We lose customers every quarter for a variety of reasons, and continually seek to replace these and add new customers. Unless our Internet banking products and services are successfully deployed and marketed by a significant number of financial institutions and achieve widespread market acceptance by their end user customers for a significant period of time, we will not be able to achieve our business objectives and increase our revenues.

Table of Contents

We depend on the efficient operation of the Internet, other networks and systems of third parties; if they do not operate efficiently, we will not be able to effectively provide our products and services.

We depend on the efficient operation of network connections from our financial institution clients, their data processing vendors and other third-party vendors such as bill payment providers. Further, portions of our revenue are dependent on continued usage by end users of Internet banking services and their connections to the Internet. Each of these connections, in turn, depends on the secure and efficient operation of web browsers, Internet service providers and Internet backbone service providers, all of which have had periodic operational problems or have experienced outages. In addition, the majority of our services depend on real-time connections to the systems of financial institutions, data processing vendors and bill payment providers. Any operational problems or outages in these systems would cause us to be unable to provide a real-time connection to these systems and we would be unable to process transactions for end users, resulting in decreased revenues. In addition, any system delays, failures or loss of data, whatever the cause, could reduce customer and end user satisfaction with our products and services and harm our revenues.

If we are unable to rapidly integrate third-party software, we may not be able to deliver service to our clients on a timely basis, resulting in lost revenues and potential liability.

As part of our strategy to provide integrated services, we integrate software applications from a variety of third party vendors on to product platform and resell them. If we are unable to implement and integrate this software in a fully functional manner for our clients, we may experience difficulties that could delay or prevent the successful development, introduction or marketing of services. Software often contains errors or defects, particularly when first introduced or when new versions or enhancements are released. Despite internal testing and testing by current and potential vendors, our current and future solutions may contain serious defects due to third-party software or software we develop or customize for clients. Serious defects or errors could result in liability for damages, lost revenues or a delay in implementation of our solutions.

Our past and potential future acquisitions involve risks to our business and financial results.

We have acquired various businesses over the last several years and may acquire complementary technologies or businesses in the future. We closed our acquisitions of nFront Inc. on February 10, 2000; 1View Network Corporation, or 1View, on June 21, 2000; AnyTime Access, Inc., or ATA, on July 31, 2000; Virtual Financial Services, Inc., or ViFi, on January 28, 2002; and Magnet on November 25, 2003. Acquisitions may not perform as we expect and may involve large one-time write-offs, including goodwill impairment charges, and amortization expenses related to intangible assets. In this regard, any of these factors could adversely affect our operating results or stock price. Acquisitions involve numerous risks, including, but not limited to:

difficulties in assimilating the operations, products, technology, information systems and personnel of the acquired company with our operations;

diverting our management's attention from other business concerns;

impairing relationships with our employees, affiliates, strategic marketing alliances and third-party vendors;

the inability to maintain uniform standards, controls, procedures and policies;

loss of acquired customers and strategic partners beyond projected thresholds;

entering markets and adopting business models in which we have no direct prior experience; and

losing key employees of the acquired company.

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Some or all of these risks could result in a material adverse effect on our business, financial condition and operating results. In addition, we cannot assure you that we will be able to identify suitable acquisition

Table of Contents

candidates that are available for sale at reasonable prices. We may elect to finance future acquisitions with debt financing, which would create debt service requirements, or through the issuance of additional common or preferred stock, which could result in dilution to our stockholders. We cannot assure you that we will be able to arrange adequate financing, if required, for any acquisitions on acceptable terms.

We depend on cooperation from data processing vendors for financial institutions, including vendors that have resisted efforts in the past to allow the integration of our products and services with their systems.

Our products involve integration with products and systems developed by data processing vendors that serve financial institutions. If any of our products fail to be supported by financial institutions' data processing vendors, we would have to redesign our products to suit these financial institutions. We cannot assure that any redesign could be accomplished in a cost-effective or timely manner. We rely on these vendors to jointly develop technology with us and to disclose source code specifications to enable our products to integrate effectively with their products and systems. In the past, some vendors have resisted integrating our products or have caused delays or other disruptions in the implementation process. Several of these data processing vendors offer or are planning to offer Internet banking products and services that are directly competitive with our products and services. In addition, financial institutions' data processing vendors may develop new products and systems that are incompatible with our products. Our failure to integrate our products effectively with financial institutions' data processing vendors could result in higher implementation costs or the loss of current and potential customers.

Competition could reduce or eliminate demand or result in lower prices for our products and services.

The market for Internet banking services is highly competitive and fragmented with many providers. We face competition from two main areas: other companies similar to us with outsourced Internet banking offerings, and vendors of data processing services to financial institutions. Also, vendors that primarily target the largest financial institutions occasionally compete in our target market. Some of our current and potential competitors have longer operating histories and may be in a better position to produce and market their services due to their greater financial, technical, marketing and other resources, as well as their significantly greater name recognition and larger installed bases of customers. In addition, many of our competitors have well-established relationships with our current and potential financial institution customers and data processing vendors and have extensive knowledge of our industry.

We may not be able to compete successfully against our current or future competitors and, accordingly, we cannot be certain that we will be able to expand the number of our customers and end users, retain our current customers or third-party service providers, or maintain our current pricing levels for our products and services. In particular, as we negotiate the renewal of long-term service contracts with current customers, we may be subject to competitive pressures and other factors that may require concessions on pricing and other material contract terms to induce the customer to remain with us.

We could be subject to potential liability claims related to use of our products and services.

Financial institutions use our products and services to provide Internet banking services to their customers. Any errors, defects or other performance problems in our products and services could result in financial or other damages to these financial institutions for which we may be liable. Moreover, we may be liable for transactions executed using Internet services based on our products and services even if the errors, defects or other problems are unrelated to our products and services. A claim brought against us, even if not successful, would likely be time consuming, result in costly litigation, and could seriously harm our business and reputation.

Our stock price is volatile, which could cause you to lose some or all of your investment.

The market price of our common stock has fluctuated significantly in the past and could fluctuate in the future in response to the following particular factors:

Table of Contents

actual or anticipated variations in operating results;

announcements by us or our competitors of new products, significant contracts, acquisitions or relationships;

additions or departures of key personnel;

changes in estimates or ratings of securities analysts;

future equity or debt offerings or acquisitions or our announcements of these transactions; and

economic well-being of financial institutions.

Our stock price could also be impacted by shares purchased by us through our stock repurchase program or shares sold by our executive officers upon the exercise of vested options and restricted stock. In addition, in recent years, the stock market in general, and the Nasdaq National Market and the securities of technology companies in particular, have experienced extreme price and volume fluctuations. These fluctuations have often been unrelated or disproportionate to the operating performance of individual companies. These broad market fluctuations may materially adversely affect our stock price, regardless of our operating results.

The lengthy sales cycles of our business banking products may cause our business banking revenues and operating results to be unpredictable and to vary significantly from period to period.

The sale and implementation of our business banking products and services for large financial institutions are often subject to delays because of our customers' internal budgets and procedures for approving large capital expenditures and deploying new technologies. The time elapsed between the date of initial contact with a potential customer and the execution of a contract typically ranges from six to twelve months. In addition, our prospective customers' decision-making processes require us to provide a significant amount of information to them regarding the use and benefits of our business banking products. We may expend substantial management resources and fail to make the sale. These delays have adversely affected sales of our business banking products for large financial institutions. Any future delays in closing orders or implementation of products or services can cause our operating results to fall short of anticipated levels for any quarter.

If we estimate incorrectly the time required to complete our business banking projects, we will lose money on fixed-price contracts.

A majority of our professional services contracts for business banking are fixed-price contracts, rather than contracts in which the client pays us on a time and materials basis. We must estimate the number of hours and the materials required before entering into a fixed-price contract. Our future success will depend on our ability to continue to set rates and fees accurately and to maintain targeted rates of employee utilization and project quality. If we fail to accurately estimate the time and the resources required for a project, any required increase in the time and resources to complete the project could cause our profits to decline.

Our business banking and consumer lending business results could suffer if we lose key customers or fail to add additional customers.

Our business banking and consumer lending businesses derive a significant portion of their revenues from a limited number of customers in each period. Accordingly, for each business segment, if an existing contract expires or is cancelled and we fail to replace the contract with new business, revenues for the segment would be adversely affected. Our lending division has been adversely affected by customer losses in the past, which has led to a decrease in the number of loan applications processed and corresponding revenues. We expect that a limited number of customers will continue to account for a substantial portion of our business banking revenues and consumer lending revenues in each quarter for the foreseeable future.

Table of Contents

Our consumer lending operation could be adversely impacted by a downturn in the economy and by seasonal demand.

A softening of demand for our outsourced solutions caused by a weakening of the economy generally may result in decreased revenues or lower growth rates. Also, the lending industry is also generally subject to seasonal trends affecting loan demand.

Government regulation of our business could cause us to incur significant expenses, and failure to comply with certain regulations, if adopted, could make our business less efficient or impossible.

The financial services industry is subject to extensive and complex federal and state regulation. Financial institutions such as commercial banks, savings and loans associations, savings banks, and credit unions operate under high levels of government supervision. Our customers must ensure that our services and related products work within the extensive and evolving regulatory requirements applicable to them.

Neither federal depository institution regulators nor other federal regulators of financial services require us to obtain any licenses. We are examined by the Federal Financial Institution Examination Council under the Information Technology guidelines. Although we believe we are not subject to direct supervision by federal and state banking agencies relating to other regulations, we have from time to time agreed to examinations of our business and operations by these agencies. These regulators have broad supervisory authority to remedy any shortcomings identified in any such examination which could lead to changes in our business.

Federal, state or foreign authorities could also adopt laws, rules or regulations relating to the financial services industry that affect our business, such as requiring us or our customers to comply with data, record keeping and processing, and other requirements. It is possible that laws and regulations may be enacted or modified with respect to the Internet, covering issues such as end user privacy, pricing, content, characteristics, taxation and quality of services and products. If enacted or deemed applicable to us, these laws, rules or regulations could be imposed on our activities or our business, thereby rendering our business or operations more costly, burdensome, less efficient or impossible, and requiring us to modify our current or future products or services.

We may be found to infringe proprietary rights of others, which could harm our business.

We are subject to the risk of claims and litigation alleging infringement of the intellectual property rights of others. Third parties may assert infringement claims in the future with respect to our current or future products, or those of our key vendors. Any assertion of such claims, regardless of its merit, could require us to pay damages or settlement amounts and could require us to develop non-infringing technology, pay for a license for the technology that is the subject of the asserted infringement, or contract with a vendor that has non-infringing technology. For example, we have in the past received notices claiming infringement of intellectual property rights related to our Internet banking application. Any litigation or potential litigation could result in product delays, increased costs, or both. In addition, the cost of litigation and the resulting distraction of our management resources could adversely affect our operating results. We also cannot assure that any licenses for technology necessary for our business will be available or that, if available, these licenses can be obtained on commercially reasonable terms.

Consolidation of the banking and financial services industry could cause our revenues to fall.

Consolidation of the banking and financial services industry could result in a smaller market for our products and services. A variety of factors could cause our customers to reassess their purchase or potential purchase of our products and could result in termination of services by existing customers. Although our contracts typically provide for an early termination fee, the loss of customers may negatively impact our operating results in future periods. After consolidation, banks and other financial institutions may experience a

Table of Contents

realignment of management responsibilities and a reexamination of strategic and purchasing decisions. We may lose relationships with key constituencies within our customers' organizations due to budget cuts, layoffs, or other disruptions following a consolidation. In addition, consolidation may result in a change in the technological infrastructure of the combined entity. Our products and services may not integrate with this new technological infrastructure. The acquiring institution may also have its own in-house system or outsource to competitors.

Our charter and bylaws and Delaware law contain provisions which could discourage a takeover.

Provisions of our charter and bylaws may make it more difficult for a third party to acquire, or may discourage a third party from attempting to acquire, control of us, even if doing so would be beneficial to our stockholders. These provisions could limit the price that investors might be willing to pay in the future for shares of our common stock. These provisions include:

division of the board of directors into three separate classes;

elimination of cumulative voting in the election of directors;

prohibitions on our stockholders from acting by written consent and calling special meetings;

procedures for advance notification of stockholder nominations and proposals; and

the ability of the board of directors to alter key provisions of our bylaws without stockholder approval.

In addition, our board of directors has the authority to issue up to 5,000,000 shares of preferred stock and to determine the price, rights, preferences, privileges and restrictions, including voting rights, of those shares without any further vote or action by the stockholders. The issuance of preferred stock, while providing flexibility in connection with possible financings or acquisitions or other corporate purposes, could have the effect of making it more difficult for a third party to acquire a majority of our outstanding voting stock.

We are also subject to Section 203 of the Delaware General Corporation Law, which, subject to exceptions, prohibits a Delaware corporation from engaging in any business combination with any interested stockholder for a period of three years following the date that the stockholder became an interested stockholder. The preceding provisions of our charter and bylaws, as well as Section 203 of the Delaware General Corporation Law, could discourage potential acquisition proposals, delay or prevent a change of control and prevent changes in our management.

ITEM 1B. UNRESOLVED STAFF COMMENTS

There are no unresolved written comments that were received from the SEC staff 180 days or more before the end of our fiscal year relating to our periodic or current reports under the Securities Exchange Act of 1934.

ITEM 2. PROPERTIES

Our principal offices currently occupy approximately 46,000 square feet in Calabasas, California, pursuant to a lease that expires May 31, 2011. We also occupy an aggregate of approximately 167,000 square feet of office space in Westlake Village and Sacramento, California, and Athens, Atlanta and Norcross, Georgia pursuant to long-term leases with eighteen months to eight year terms. We believe that suitable additional or alternative space will be available in the future on commercially reasonable terms as needed.

ITEM 3. LEGAL PROCEEDINGS

In Re Digital Insight Corporation Initial Public Offering Securities Litigation

On December 6, 2001, Digital Insight and two of its former officers and one current director were named as defendants in a class-action lawsuit filed in the United States District Court for the Southern District of New

Table of Contents

York. The lawsuit is captioned In Re Digital Insight Corp. Initial Public Offering Securities Litigation, No. 01 CV 11231. The claims, which were also asserted against the managing underwriters in our previous public offerings, are based on allegations that the underwriter defendants solicited and received from certain investors, in exchange for allocating Digital Insight shares to the investors in connection with the previous public offerings, additional, excessive and undisclosed commissions and undisclosed commitments to purchase additional Digital Insight shares in the aftermarket. Other actions have been filed in New York making similar allegations regarding the IPOs of more than 300 other companies. Plaintiffs are seeking unspecified damages along with these companies and the individual defendants, but not the underwriter defendants, we have entered into a settlement agreement with the plaintiffs to settle the claims. As part of the settlement, once the settlement documents become effective, the plaintiffs will dismiss with prejudice the settling companies and individual defendants. On August 2005, the court issued an order preliminarily approving the proposed settlement and scheduling a settlement fairness hearing in April 2006. In the opinion of management, after consultation with legal counsel and based on currently available information, the ultimate disposition of these matters is not expected to have a material adverse effect on our business, financial condition or results of operations, and hence no amounts have been accrued for this lawsuit.

Magnet Claims

Currently, approximately \$3.4 million of cash and 144,834 shares of our common stock issuable in connection with our acquisition of Magnet are held in escrow. We have notified the prior stockholders of Magnet that we have various claims against them in connection with the acquisition, and we are seeking recovery of damages, including the amounts in escrow. In response, the prior stockholders initiated arbitration proceedings in Los Angeles, California, seeking release of the escrowed amounts. Even a favorable resolution of our claims could result in distraction of our management and significant legal and other related costs. No amounts have been recorded in our financial statements for claims in connection with these matters at December 31, 2005 as we cannot determine the final outcome.

Other

In addition, we may be involved from time to time in litigation arising in the normal course of our business. Although we are currently not a party to such litigation that we believe would have a material adverse effect, individually or in the aggregate, on our business, financial condition or results of operations, it is possible that in the future we could become a party to such proceedings.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of 2005.

Table of Contents**PART II****ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES****Market for Common Equity**

Our common stock is traded on the Nasdaq National Market under the symbol DGIN. As of December 31, 2005, there were 180 holders of record of our common stock. The following table sets forth the range of high and low closing sale prices reported on the Nasdaq National Market for our common stock for the periods indicated.

	Common Stock Price	
	High	Low
2004		
First Quarter	\$ 28.01	\$ 18.59
Second Quarter	\$ 22.72	\$ 17.55
Third Quarter	\$ 19.78	\$ 13.21
Fourth Quarter	\$ 18.75	\$ 13.70
2005		
First Quarter	\$ 18.01	\$ 15.88
Second Quarter	\$ 25.96	\$ 16.56
Third Quarter	\$ 27.72	\$ 23.20
Fourth Quarter	\$ 35.18	\$ 25.63

We have never paid cash dividends on our common stock, and we anticipate that in the foreseeable future we will continue to retain any earnings for use in the operations of our business. [See Part III, Item 12 for information regarding securities authorized for issuance under our equity compensation plans.]

ITEM 6. SELECTED FINANCIAL DATA

The following table presents selected consolidated statement of operations data and selected consolidated balance sheet data. We derived this data from our audited consolidated financial statements for the years presented.

You should read this data together with our audited consolidated financial statements and related notes included elsewhere in this annual report.

Table of Contents

	2005	Year Ended December 31,			2001 ⁽²⁾
		2004	2003 ⁽¹⁾	2002 ⁽¹⁾⁽²⁾	
(in thousands, except per share data)

(1) The selected consolidated financial data includes the results of the purchase method acquisitions of ViFi and Magnet for periods subsequent to their acquisition dates in January 2002 and November 2003, respectively.

(2) In 2002, we adopted SFAS No. 142 which established an impairment approach to accounting for goodwill and discontinued amortization of goodwill prospectively for all acquisitions. We recorded an impairment charge of \$29.0 million in the first quarter of 2002 from the adoption of SFAS No. 142.

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Amortization of goodwill included in operating expenses was \$25.5 million in 2001. The pro forma net loss and net loss per share excluding goodwill amortization in 2001 was as follows:

	2001	
	(in thousands, except per share data)	
Pro forma net loss	\$	(26,440)
Pro forma net loss per share	\$	(0.90)

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The forward-looking statements included in this section involve risks and uncertainties, including anticipated financial performance, business prospects, anticipated capital expenditures and other similar matters, which reflect management's best judgment based on factors currently known. Actual results and experience could differ materially from the anticipated results or other expectations expressed in our forward-looking statements as a result of a number of factors, including but not limited to those discussed under the caption "Risk Factors" in Item 1A of Part I.

The following discussion should be read together with our financial statements and related notes.

Overview

Summarized results of operations for our reportable segments were as follows for the three years ended December 31, 2005, 2004 and 2003:

	2005		Year Ended December 31, 2004 (in thousands)		2003	
	Dollars	%	Dollars	%	Dollars	%

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

For the years ended December 31, 2005, 2004 and 2003, no customer comprised more than 10% of total revenues. We have no significant foreign operations.

-
- (1) The operating results of Magnet included in the business banking segment for the year ended December 31, 2003 from the acquisition date of November 25, 2003 were as follows: Revenue, \$1,256; Gross profit, \$685; Operating expenses, \$806 and Loss from operations, \$121.

Table of Contents

(2) Unallocated expenses include charges that are not included in the measurement of segment profit or loss used internally to manage the segments.

(3) Unallocated operating expenses include \$7,784 of intangible asset amortization and \$22,811 of general and administrative expenses.

(4) Unallocated operating expenses include \$8,284 of intangible asset amortization and \$19,428 of general and administrative expenses.

(5) Unallocated operating expenses include \$5,868 of intangible asset amortization and \$19,993 of general and administrative expenses.

A large portion of our Internet banking revenue results from the number of active Internet banking end users at our financial institution clients. Summarized end users, in thousands, at December 31 of each of the last three years were as follows:

	2005		2004		2003	
	End Users	Penetration (1)	End Users	Penetration (1)	End Users	Penetration (1)
Potential end users at all sites ⁽³⁾	38,000	n/a	36,300	n/a	35,900	n/a
Potential end users at live sites	37,000	n/a	35,000	n/a	34,400	n/a
Active Internet banking end users ⁽²⁾	6,256	16.9%	5,285	15.1%	4,404	12.8%
Bill payment end users	1,445	23.1%	1,003	19.0%	663	15.1%

(1) Penetration for active end users is calculated as a percentage of potential end users at live sites. Penetration for bill payment end users is calculated as a percentage of active Internet banking end users.

(2) Active Internet banking end users are consumers whose basic account information is available online as specified by our contract with the financial institution.

(3) Includes potential end users at live sites as well as potential end users at financial institutions that are in the implementation process.

Known Trends and Uncertainties

The following discussion identifies known trends and uncertainties currently impacting each of our business segments.

The growth in our Internet banking revenues during the year ended December 31, 2005 was driven primarily by an 18% increase in Internet banking end users and a 44% increase in online bill payment users when compared to December 31, 2004. Revenue from end user growth was partially offset by a slight decrease in the average revenue per end user, due primarily to price discounts experienced at the time of contract renewal (generally once every three to five years) and the effects of tiered pricing incentives in most of our contracts. We expect a continuing modest decline in average monthly revenue per Internet banking end user over the next several years as our base of end users continues to increase and as customers renew their contracts with us.

Our business banking revenues for the years ended December 31, 2004 and 2005 reflect the acquisition of Magnet in November 2003 that has been combined with our existing business banking operations. Revenues from the acquired business banking operations during the year ended December 31, 2004, and to a lesser extent, December 31, 2005 were negatively impacted by delays in certain professional services projects that limited our ability to begin new professional services projects from which to generate additional revenues. We also continue to invest significant resources to further develop our business banking software for large financial institutions, which increased costs and reduced our resources dedicated to supporting new sales. Although our financial results and outlook for the acquired business have improved, we believe that these trends will continue for the Magnet business into 2006. Recurring revenue contributions from our outsourced business banking products, including the Magnet products hosted in our data center, remained strong and we expect that this performance will continue.

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

The decrease in our lending revenues during the year ended December 31, 2005 primarily reflects certain key customer losses in 2004 that led to a reduction in the number of lending applications processed. In addition,

Table of Contents

we encountered performance stability issues with our recently introduced loan origination system that delayed certain product implementations and sales opportunities. We expect that our agreement to outsource our lending call center, signed during the fourth quarter of 2005, and continuing progress towards resolving the performance issues encountered with our new lending product will result in stabilizing revenues and improved operating contributions in 2006.

Summary of Financial Statement Captions

The following section sets forth a general description of the items that comprise our primary financial statement captions.

Revenues: We derive revenues primarily from long-term service contracts with our financial institution clients, which pay recurring service fees, based primarily on the number of active end users or end user transactions, or fixed monthly amounts, primarily for hosting and maintaining web sites. We also earn recurring service fee revenue from the annual software maintenance fee billings for the license customers using our business banking product. In addition, our revenues include fees earned for implementation services, software license fees, professional services, and other revenues. Revenues from recurring service fees are recognized as services are provided. See Critical Accounting Policies and Estimates for a description of our revenue recognition policy. Recurring service fees were over 90% of total revenues in 2005, 2004, and 2003.

Cost of Revenues and Gross Profit: Revenues are reduced by costs of revenues that are comprised primarily of salaries and related personnel expenses, network costs, depreciation and amortization of equipment and software used in providing our service, expenses related to the operation of our data centers and call center, and fees paid to third parties, including bill payment vendors, online statement and check imaging vendors and communication services providers. Cost of revenues also includes the recognition of deferred implementation costs which are recognized ratably over the estimated term of our customer relationships.

Operating Expenses: We include sales, general and administrative expenses, research and development expenses, amortization of intangibles resulting from acquisitions, restructuring, asset impairment and other charges in operating expenses.

Sales, general and administrative expenses consist primarily of salaries and related expenses for executive, sales, marketing, finance, human resources and administrative personnel; sales commissions; and other general corporate expenses. In addition, these expenses include marketing expenses such as trade shows, promotional costs and end user marketing campaigns and payments to core data processing vendors under marketing alliance agreements.

Research and development expenses consist primarily of salaries, related personnel expenses and consultant fees related to the design, development, testing and enhancement of our products and our data processing vendor interface software.

Amortization of intangibles consists of the amortization of identifiable intangible assets resulting from our acquisitions of ATA, ViFi and Magnet.

In 2005, we initiated restructuring activities involving the outsourcing of the call center associated with the lending division and realigning certain resources to enhance profitability in the lending division. As a result of these restructuring activities, we will reduce space utilized at one of our facilities, dispose of certain related assets and eliminate approximately 90 employee positions. We expect that the call center migration and the work force reduction will continue in phases until fully transitioned by March 31, 2006. We expect the lending division to incur approximately \$2.3 million for these activities between December 2005 through the completion of the transition in 2006. We also estimate that approximately \$1.4 million of these charges will result in cash expenditures.

Table of Contents

Income Tax Provision (Benefit): We record the estimated future tax effects of temporary differences between the tax bases of assets and liabilities and the amounts reported in the accompanying consolidated balance sheets, as well as operating loss and tax credit carryforwards. We assess the recoverability of any tax assets recorded on the balance sheet and provide any necessary valuation allowances as required. If we were to determine that it was more likely than not that we would be unable to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would be charged to operations in the period that such determination was made.

Results of Operations

Comparison of Year Ended December 31, 2005 to Year Ended December 31, 2004

Revenues: Revenues for the year ended December 31, 2005 were \$214.0 million, an increase of 13% from the \$188.9 million reported for the same period of the prior year.

The Internet banking division reported revenues of \$173.3 million for the year ended December 31, 2005 compared to \$151.9 million for the same period last year. This increase of \$21.4 million, or 14%, was primarily due to an increased number of active Internet banking end users and bill payment end users within our existing customer base partially offset by a decrease in average revenue per end user. Active Internet banking end users increased 18% from approximately 5.3 million users at December 31, 2004 to approximately 6.3 million users at December 31, 2005. Bill payment end users increased 44% from approximately 1.0 million users at December 31, 2004 to approximately 1.4 million users at December 31, 2005.

Revenues generated by the business banking division were \$28.6 million for the year ended December 31, 2005 compared to \$22.9 million for the year ended December 31, 2004. The increase of \$5.7 million is primarily attributable to an increase in the number of business banking hosted end users.

Revenues related to the lending division for the year ended December 31, 2005 were \$12.1 million compared to \$14.1 million for the year ended December 31, 2004. This decrease of \$2.0 million, or 14%, resulted primarily from certain key customer losses in 2004 that led to a decrease in loan applications processed, partially offset by license fee revenue of \$500,000 in 2005.

Cost of Revenues: Cost of revenues increased \$5.6 million, or 7%, to \$89.8 million for the year ended December 31, 2005 from \$84.3 million for the same period last year.

Cost of revenues for the year ended December 31, 2005 included \$69.9 million related to the Internet banking division compared to \$63.2 million for the year ended December 31, 2004. This increase of \$6.7 million, or 11%, was primarily due to an increase in third party costs related to our bill pay product that was driven by an increase in bill pay end users.

Cost of revenues for the business banking division was unchanged at \$11.2 million for the years ended December 31, 2005 and 2004. Our flat cost of revenues reflects our relatively fixed cost base in the outsourced business, and product and service mix.

Cost of revenues related to the lending division was \$8.7 million for the year ended December 31, 2005, a decrease of \$1.1 million compared to \$9.8 million for the year ended December 31, 2004. The decrease is primarily attributable to lower revenues and a continued shift in application mix from the call center to the Internet channel which results in a lower cost per application.

Gross Profit: Gross profit increased \$19.5 million, or 19%, from \$104.6 million for the year ended December 31, 2004 to \$124.1 million for the year ended December 31, 2005.

Table of Contents

Gross profit margin for the Internet banking division increased to 60% for the year from 58% for the year ended December 31, 2004. The increase in gross profit margin for the Internet banking division is primarily attributable to the leverage in our scalable business model as revenues increase above our relatively fixed cost base and reduced per unit costs for products offered in partnership with outside technology vendors due to volume pricing incentives, and, in certain instances, improved contract terms.

The business banking gross profit margin increased to 61% in the year ended December 31, 2005 from 51% in the same period last year. This increase reflects continuing growth in business banking end users contributing revenues while cost of revenues remained flat.

Gross profit margin for the lending division decreased to 28% for the year ended December 31, 2005 from 30% for the same period last year. The decrease in gross margin for the lending division is primarily due to the 14% decrease in revenues, partially offset by the reduced cost of revenues outlined above.

Operating Expenses: Operating expenses were \$83.9 million for the year ended December 31, 2005, an increase of \$7.4 million, or 10%, from \$76.4 million for the prior year. This increase in operating expenses is primarily due to increased sales and marketing and general and administrative expenses as described below.

Sales, General and Administrative: Sales, general and administrative expenses increased \$7.0 million, or 16%, from \$44.7 million for the year ended December 31, 2004 to \$51.7 million for the year ended December 31, 2005. This increase was primarily due to a \$2.6 million increase in payments to core data processing vendors under marketing alliance agreements resulting from an increase in revenues, \$2.5 million higher incentive compensation, and \$1.8 million growth in legal and audit fees for the year ended December 31, 2005. As a percentage of revenues, sales, general and administrative expenses increased from 23.7% for the year ended December 31, 2004 to 24.2% for the year ended December 31, 2005. The increase in sales, general and administrative costs as a percentage of revenues primarily reflects the additional costs as described above, partially offset by the leverage in our business model as revenues increase over a relatively fixed cost base.

Research and Development: Research and development expenses increased to \$23.9 million for the year ended December 31, 2005 from \$23.4 million for the prior year. The increase of \$500,000 was primarily due to an increase in product development personnel and engineering costs in the year ended December 31, 2005.

Amortization of Intangible Assets: Amortization of intangible assets was \$7.8 million for the year ended December 31, 2005 and \$8.3 million for the comparable prior year period. The decrease is due to certain intangibles becoming fully amortized during 2005.

Interest and Other Income, Net: Interest and other income, net was \$3.1 million for the year ended December 31, 2005, an increase of \$2.3 million, compared to \$838,000 for the prior year. This increase was primarily due to an increase in interest income as result of higher rates of return on our cash and investment balances and an increase in amounts invested in 2005.

Provision for Income Taxes: During the twelve months ended December 31, 2005, we recorded a provision for income taxes of \$16.8 million compared to \$12.3 million for 2004. The current year provision reflects a tax rate of 38.8% which includes the effect of a change in estimated research and development credits of \$323,000. The 2004 tax rate was 42.4% which included an adjustment for one-time charges that reduced the carrying value of certain deferred tax assets, increased tax contingency reserves and decreased additional paid-in capital totaling \$1.2 million.

For 2006, we expect that we will have an effective tax rate of 39.5%. As discussed in Liquidity and Capital Resources, we do not expect to make significant cash tax payments until 2007 due to utilization of our net operating loss and research and development carry-forwards to offset our current income tax liabilities.

Table of Contents

Comparison of Year Ended December 31, 2004 to Year Ended December 31, 2003

Revenues: Revenues for the year ended December 31, 2004 were \$188.9 million, an increase of 22% from the \$154.4 million reported for the same period of the prior year.

The Internet banking division reported revenues of \$151.9 million for the year ended December 31, 2004 compared to \$129.3 million for the prior year. This increase of \$22.6 million, or 17%, was primarily due to an increased number of active Internet banking end users and bill payment end users within our existing customer base partially offset by a decrease in average revenue per end user. Active Internet banking end users increased 20% from approximately 4.4 million users at December 31, 2003 to approximately 5.3 million users at December 31, 2004. Bill payment end users increased 51% from approximately 663,000 users at December 31, 2003 to approximately 1.0 million users at December 31, 2004.

Revenues generated by the business banking division were \$22.9 million for the year ended December 31, 2004 compared to \$8.4 million for the year ended December 31, 2003. The increase of \$14.6 million is primarily attributable to our acquisition of Magnet in November 2003 and, to a lesser extent, organic growth within our historical business banking operations.

Revenues related to the lending division for the year ended December 31, 2004 were \$14.1 million compared to \$16.7 million for the year ended December 31, 2003. This decrease of \$2.6 million, or 16%, resulted primarily from certain key customer losses as well as a decrease in applications processed and a continued shift in applications from the call center to the Internet channel which results in lower revenue per application.

Cost of Revenues: Cost of revenues increased \$11.7 million, or 16%, to \$84.3 million for the year ended December 31, 2004 from \$72.6 million for the prior year.

Cost of revenues for the year ended December 31, 2004 included \$63.2 million related to the Internet banking division compared to \$58.5 million for the year ended December 31, 2003. This increase of \$4.7 million, or 8%, was primarily due to an increase in third party costs related to our bill pay product that was driven by an increase in online bill payment end users and bill payment transactions.

Cost of revenues for the business banking division was \$11.2 million for the year ended December 31, 2004, an increase of \$7.0 million compared to \$4.2 million in the same period last year. The increase is primarily comprised of costs in the current period from Magnet which was acquired in the fourth quarter of 2003.

Cost of revenues related to the lending division was \$9.8 million for both the year ended December 31, 2004 and 2003. Cost of revenues for the year ending December 31, 2004 include an increase in costs related to our transition to a new product platform offset by decreased personnel and other costs due to fewer applications processed.

Gross Profit: Gross profit increased \$22.8 million, or 28%, from \$81.8 million for the year ended December 31, 2003 to \$104.6 million for the year ended December 31, 2004.

Gross profit margin for the Internet banking division increased to 58% for the year from 55% for the year ended December 31, 2003. The increase in gross profit margin for the Internet banking division is primarily attributable to the leverage in our business model that leads to an expansion in gross profit margin as revenues increase above our relatively fixed cost base.

The business banking gross profit margin increased to 51% in the year ended December 31, 2004 from 49% in the same period last year. This increase reflects an increase in our business banking margin for the services hosted in our data centers attributable to an increase in revenues at a greater rate than cost of revenues, partially offset by lower gross margins for the Magnet license and professional services products.

Table of Contents

Gross profit margin for the lending division decreased to 30% for the year ended December 31, 2004 from 41% for the same period last year. The decrease in gross margin for the lending division is due to the 16% decrease in revenues and the flat cost of revenues discussed above.

Operating Expenses: Operating expenses were \$76.4 million for the year ended December 31, 2004, an increase of \$12.2 million, or 19%, from \$64.2 million for the prior year. This increase in operating expenses is primarily due to the addition of Magnet sales and research and development expenses, and amortization of acquired intangible assets from the Magnet acquisition during the twelve months ended December 31, 2004 discussed below.

Sales, General and Administrative: Sales, general and administrative expenses increased \$2.0 million, or 5%, from \$42.7 million for the year ended December 31, 2003 to \$44.7 million for the year ended December 31, 2004. This increase is due to the addition of Magnet sales costs and increased commission expense, severance costs, costs under core data processing vendor marketing alliance agreements, and professional services costs related to compliance with the Sarbanes-Oxley Act. These expense increases were partially offset by decreases in other professional service costs which include costs to recruit and retain our Chairman, President, and CEO in 2003. As a percentage of revenues, sales, general and administrative expenses decreased from 28% for the year ended December 31, 2003 to 24% for the year ended December 31, 2004. The decrease in sales, general and administrative costs as a percentage of revenues primarily reflects the leverage in our business model as revenues increase over a relatively fixed cost base.

Research and Development: Research and development expenses increased to \$23.4 million for the year ended December 31, 2004 from \$15.6 million for the prior year. The increase of \$7.8 million was primarily due to the addition of Magnet research and development expenses of \$6.2 million as well as increases in headcount in other product research and development areas in the year ended December 31, 2004.

Amortization of Intangible Assets: Amortization of intangible assets was \$8.3 million for the year ended December 31, 2004 and \$5.9 million for the comparable prior year period. The increase is due to amortization of acquired intangibles from the Magnet acquisition in November 2003.

Interest and Other Income, Net: Interest and other income, net was \$838,000 for the year ended December 31, 2004, an increase of \$282,000, compared to \$556,000 for the prior year. This increase was primarily due to an increase in interest income as result of higher rates of return on our cash and investment balances and larger amounts invested.

Benefit (Provision) for Income Taxes: During the twelve months ended December 31, 2004, we recorded a provision for income taxes of \$12.3 million compared to an income tax benefit for 2003 of \$28.4 million. The current year provision reflects a tax rate of 38% and a tax adjustment related to certain amounts recorded in 2003 of \$1.2 million to reduce the carrying value of certain of our deferred tax assets, to establish tax contingency reserves and to reduce the tax benefit recorded to equity. For the year ended December 31, 2003, we recorded an income tax benefit of \$28.4 million comprised of \$31.3 million related to the release of our deferred tax asset valuation allowance partially offset by a net provision for current and deferred federal and state income taxes of \$2.9 million.

Critical Accounting Policies and Estimates

Management's discussion and analysis of financial condition and results of operations is based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of our financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, we evaluate our estimates, including those related to revenue recognition, allowance for doubtful accounts, deferred taxes, impairment of long-lived assets,

Table of Contents

and contingencies and litigation. We base our estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

We apply the following critical accounting policies in the preparation of our consolidated financial statements:

Revenue Recognition Policy. The following sections set forth the revenue recognition policy for our primary sources of revenue as well as the accounting policies followed for certain other revenue arrangements.

Application Service Provider Revenues. We earn revenues from application service provider (ASP) arrangements for which we host our customers' Internet banking, business banking and lending applications. Revenues are earned for upfront fees for implementation services and amounts billed for recurring monthly services. We recognize revenue from ASP arrangements in accordance with Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition in Financial Statements, and Emerging Issues Task Force (EITF) Issue No. 00-21, Accounting for Revenue Arrangements with Multiple Deliverables. Under SAB 104, we recognize revenues when fees are fixed and determinable, no obligations remain related to the earned fees and collection of the related receivable is reasonably assured. Under EITF 00-21, we allocate revenues in arrangements with multiple deliverables to each qualifying separate unit of accounting based on either their relative fair values or the fair value of the undelivered elements. Fair value is determined by the prices charged when the element is sold separately or other specific objective evidence.

We defer recognition of certain implementation fee revenue, which includes set up fees for each service element and mandatory training, that are not the culmination of a separate earnings process and recognize them ratably over the greater of the initial life of the customer contract or the estimated life of the customer service relationship, generally between four and five years. We also defer the recognition of the related direct incremental implementation costs and recognize them ratably over the same period. Recurring service fees are billed on a monthly basis and are based on the number of end users, end user transactions, or a flat monthly fee. Revenue from recurring service fees are recognized as services are provided.

Arrangements With Data Processing Vendors. We have joint sales and marketing agreements with several data processing software vendors of our financial institution clients. Generally, we pay a recurring referral fee to these data processing software vendors based on fees billed by us to our financial institution customers for the services provided by us. Under these arrangements, we are the primary obligor, perform all services, establish prices charged to the financial institution for our services, and bear all performance and collection risks. Because of these factors, we recognize revenue under these arrangements based on the gross amount earned from the customer in accordance with EITF 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent. The referral fees earned by the data processing software vendors are recognized as incurred in sales, general and administrative expenses.

We bill three data processing software vendors directly for the services provided by us to financial institution customers. Under these arrangements, the data processing vendor sets the actual price charged to the financial institution, bundles our services with other vendor services, performs administrative functions including billing, and bears all collection risk. Because of these factors, we recognize the revenue under these arrangements based on the net revenue earned from the data processing vendor in accordance with EITF No. 99-19.

Third Party Service Provider Arrangements. We have agreements with third party vendors to resell the services of those third party vendors to our financial institution customers. These services include bill

Table of Contents

payment, online statements, online account opening and funding, and check imaging services. We are obligated to provide these services to our customers, and there is no contractual arrangement between the third party vendors and our customers. In addition, we price these services independent of the amounts billed by the third party vendors to us, and we bear all collection risk for the amounts billed to our customers. In accordance with EITF No. 99-19, amounts earned from our customers from the resale of these services are recorded as revenue on a gross basis, and the costs incurred from the third party service providers are recorded as cost of revenues in the accompanying consolidated statements of operations.

Software License Revenues. Revenue from the sale of software licenses is recognized in accordance with Statement of Position No. 97-2 (SOP 97-2), Software Revenue Recognition, as amended by SOP 98-9, Software Revenue Recognition with Respect to Certain Transactions. For arrangements that require significant production, modification, or customization of software, we apply the provisions of Accounting Research Bulletin No. 45, Long-Term Construction-Type Contracts, and SOP 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. Revenue is derived from the sale of software licenses, professional services, and customer support (maintenance). Revenue is allocated to each element of the arrangement based on the fair value of undelivered elements based on prices charged when the elements are sold separately. Revenue is recognized upon delivery if there is evidence of an arrangement, collection of the fee is reasonably assured and the fee is fixed or determinable.

Fees for software licenses and professional services are typically billed under fixed-price arrangements. Revenues derived from license and professional service fees that require significant production, modification, or customization of the software is recognized using the percentage-of-completion method. The percentage-of-completion is measured by the percentage of labor effort incurred to date to estimated total labor effort to complete the delivery of each license. Provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Revenues to provide professional services on a time-and-materials basis to software license customers are recognized as the related services are performed.

Maintenance revenue is earned for providing technical support and software updates on a when-and-if available basis. We recognize all maintenance revenue ratably over the applicable maintenance period. We determine the amount of maintenance revenue to be deferred through reference to maintenance renewal provisions contained in the agreement or, in the absence of such renewal provisions, through reference to vendor specific objective evidence of maintenance renewal rates.

Other Revenues. Other revenues are derived from web site design; optional training services; and other optional products or services purchased separately by customers, which represents the culmination of a separate earnings process. We also earn revenue for early termination fees when customers terminate their services prior to the expiration date of their service contract. These other revenues are recognized when the fees are fixed and determinable, no obligations remain related to the earned fees and collection of the related receivable is reasonably assured.

Allowance for Doubtful Accounts. We maintain an allowance for billing adjustments for the resolution of potential billing disputes and an allowance for estimated losses associated with the potential inability of our customers to make required payments. We perform ongoing credit evaluations of our customers financial condition and limit the amount of credit extended when necessary. The estimate of the amount of receivables we will not be able to collect requires judgment and is based on factors including our historical loss and billing adjustment experience, current market conditions, the nature of any current billing disputes and the financial health of specific customers. If the financial condition of our customers were to deteriorate resulting in an impairment of their ability to make payments, or our current loss profile was to change, additional allowances may be required. Receivables are charged against the allowance when management believes the uncollectibility of a receivable balance, or portion thereof, has been confirmed.

Table of Contents

Income Taxes. We use the asset and liability method to account for income taxes. Under this method, deferred income taxes are determined based on differences between the financial statement and tax basis of assets and liabilities, and are measured at the enacted tax rates that will be in effect when those differences are expected to reverse. A valuation allowance is established when it is more likely than not that some or all of the deferred tax assets will not be realized. Prior to 2003, we had determined it was more likely than not that our deferred tax assets were not realizable. Accordingly, we fully reserved our deferred tax assets to reflect our history of operating losses and the inherent uncertainties surrounding future profitability. In the fourth quarter of 2003, based on our history of achieving operating objectives, the achievement of operating profitability beginning in the third quarter of 2002, our projections of future taxable income and tax planning strategies, the long-term nature of our contracts and our established customer relationships, and the lack of significant limitations on the use of acquired net operating losses, we determined that it is more likely than not that we will be able to realize our deferred tax assets. At December 31, 2005, we have deferred tax assets of \$36.4 million. Should we determine that we will not be able to realize all or part of our net deferred tax asset in the future, an adjustment to the deferred tax asset would reduce income in the period such determination is made. We maintain an income tax contingency reserve for differences between the as-filed and book basis of certain tax assets. The income tax contingency reserve was \$5.2 million and \$4.0 million at December 31, 2005 and 2004, respectively.

Impairment of Goodwill, Intangible Assets and Long-Lived Assets. We evaluate the recoverability of our identifiable intangible assets, goodwill and other long-lived assets in accordance with SFAS No. 142 and SFAS No. 144, both adopted on January 1, 2002, which generally require us to assess these assets for recoverability at least annually or when events or circumstances indicate a potential impairment. We use the fair value method to assess the recoverability of our goodwill and have three reporting units, Internet banking, business banking, and lending. We use the undiscounted cash flows method to assess the recoverability of our identifiable intangible assets and other long-lived assets. Future impairment assessments could result in additional impairment charges that would further reduce the carrying values of these assets.

Accounting Change. Our year-end closing and reporting process has been truncated in order to meet current, as well as future accelerated periodic filing requirements, resulting in significant constraints in our resources during the first fiscal quarter. Accordingly, in the fourth quarter of 2005, we changed the designated date of the annual goodwill impairment test from December 31 to October 1, in order to perform the test at a point in the reporting cycle other than during the year-end closing and reporting process such that additional resources are available.

No more than 12 months have elapsed between test dates and the change in the test date is not intended to avoid, accelerate or delay an impairment charge. Therefore, we believe that the accounting change described above is to an alternative principle that is preferable under the circumstances.

Contingencies and Litigation. We evaluate contingent liabilities, including threatened or pending litigation and potential disputes related to tax positions, in accordance with SFAS No. 5, Accounting for Contingencies, and record accruals when the outcome of these matters is deemed probable and the liability is reasonably estimable. We make these assessments based on the facts and circumstances and, in some instances, based in part on the advice of outside legal counsel.

Liquidity and Capital Resources

At December 31, 2005, we had cash and cash equivalents of \$50.7 million, short-term investments of \$65.4 million and \$8.8 million of long-term investments. Our investments are comprised of readily marketable commercial paper, certificates of deposit, corporate debt, U.S. government agency securities and auction rate debt and preferred securities, and our warrants in CashEdge described below. For financial statement presentation, we classify our investments as short-term and long-term based upon their maturity dates. Short-term investments primarily mature within one year of the date of the financial statements and long-term investments

Table of Contents

mature between one and two years from December 31, 2005. We classify auction rate securities with maturity dates of more than one year as short-term investments as the established interest rate reset periods are less than one year.

The market value of our investments is sensitive to changes in the level of U.S. interest rates and the market ratings of the underlying companies. Therefore, if investments we hold are sold prior to their maturity date, a gain or loss may result. We invest our cash in debt instruments of the U.S. government and its agencies, and in high-quality, investment grade corporate issuers. By policy, we limit the amount of credit exposure to any one issuer.

As of December 31, 2005, we had net operating loss carry-forwards for federal and state tax purposes of \$77.3 million and \$32.7 million, respectively. Under the provisions of the Internal Revenue Code of 1986, as amended, certain substantial changes in ownership may limit the amount of net operating loss carry-forwards that could be utilized annually in the future to offset taxable income. At December 31, 2005, we are limited as to the amount of the net operating loss carry-forward related to the Magnet acquisition we are able to utilize per year. We anticipate that we will be able to utilize the full amount of the Magnet net operating loss carry-forwards prior to the expiration of the utilization period. As of December 31, 2005 we also had research and other credit carry-forwards for federal and state tax purposes of \$8.4 million and \$2.7 million, respectively. The research and other credit carry-forwards will begin to expire in 2011 for federal income tax purposes; however, these credits do not expire for state income tax purposes. Although we expect our effective income tax rate to be 39.5% in 2006, we do not expect to make significant cash tax payments until 2007 as we utilize these carry-forwards to offset our current income tax liabilities.

In October 2004, we announced that our Board of Directors had approved a share repurchase program for up to \$25.0 million of our common stock for 12 months. As of March 31, 2005, we had repurchased 1,503,244 shares for an aggregate cost of \$25.0 million.

In April 2005, our Board of Directors approved an additional \$25.0 million stock repurchase program. As of June 30, 2005, we had completed the stock repurchase of 1,038,100 shares for an aggregate purchase price of \$25.0 million.

In February 2006, we announced a \$50.0 million stock repurchase program approved by our Board of Directors which expires in December 2006. As of March 8, 2006, we had repurchased 811,000 shares at an aggregate purchase price of \$26.7 million.

In January 2005, we renewed and amended our agreement with a bank for a \$20 million revolving credit commitment through October 2005. In October 2005, we renewed and amended our revolver to expire on October 31, 2007. We increased the facility from \$20.0 million to \$30.0 million, kept the interest rate terms and drawdown provisions and made certain other amendments. The interest rate on this facility is equal to either (1) the bank's prime rate; or (2) LIBOR plus 1.75%. We may draw down against this facility by electing either the bank's prime rate or LIBOR for specified 1-month, 2-month, 3-month, or 6-month LIBOR terms. The revolver is collateralized by all of our assets. There were no amounts outstanding under our bank facility as of December 31, 2005. The Revolver includes covenants that require us to (i) maintain a tangible net worth of not less than \$110.0 million at all times, (ii) maintain positive quarterly income before taxes of not less than \$4,000,000, and (iii) maintain a ratio of current assets to current liabilities of greater than 1.50 to 1.0. We were in compliance with the covenants at December 31, 2005 and 2004.

In June 2005, we entered into a strategic alliance agreement with CashEdge Inc., a leading provider of online financial applications, to become a distributor for CashEdge's account opening and funding solution. As part of this agreement, we pre-purchased transactions from CashEdge for use over a five year term, as well as obtained warrants to purchase common shares in CashEdge for aggregate consideration of \$6.25 million.

Table of Contents

The estimated fair value of the warrants of \$500,000 was recorded in long-term investments. The warrants contain a cash-less exercise feature and are therefore considered a derivative financial instrument for accounting purposes. We evaluate the fair value of the warrants at the end of each reporting period and record changes in the fair value to net income. The remaining \$5.75 million has been recorded in other assets in the balance sheet in 2005 reflecting the value of the new account opening transactions prepurchased from CashEdge.

In September 2005, we issued restricted stock for 165,170 shares to our employees resulting in deferred stock-based compensation of \$4.5 million. The restricted stock vests over four years. In 2004, we issued restricted stock for 34,000 shares to two of our officers. On the grant dates, the restricted stock for the two officers had a total fair value of \$560,000. The restricted stock awards vest over two years for one officer and four years for the other officer. We are amortizing the fair value of the restricted stock awards over the vesting periods. For the years ended December 31, 2005 and 2004, we had \$525,000 and \$18,000, respectively, of compensation expense related to the amortization of deferred stock-based compensation for restricted stock. In addition, as of December 31, 2005 and 2004 there was \$4.5 million and \$542,000, respectively, remaining in deferred stock-based compensation.

Cash provided by operating activities for the year ended December 31, 2005 was \$57.3 million, an increase of \$8.9 million compared to \$48.4 million for the year ended December 31, 2004. The increase in cash from operations was primarily the result of our operating income of \$40.2 million during the year ended December 31, 2005 as compared to \$28.2 million for the year ended December 31, 2004, offset by amounts paid to CashEdge as described above.

Cash provided by operating activities for the year ended December 31, 2003 was \$34.4 million. The improvement in 2004 as compared to 2003 of \$14.0 million was primarily the result of our operating income of \$28.2 million during the year ended December 31, 2004 as compared to \$17.6 million for the year ended December 31, 2003. Cash provided by operating activities in 2003 also included the payment of a litigation settlement, net of insurance recoveries, of \$6.9 million.

Cash used in investing activities for the year ended December 31, 2005 was \$39.5 million, compared to \$27.8 million for the year ended December 31, 2004. The increase in cash used in investing activities in 2005 was primarily due to an increase in acquisition of property and equipment of \$9.0 million and an increase in net purchases of investments of \$3.7 million. Cash used in investing activities for the year ended December 31, 2003 was \$48.1 million. The decrease in cash used in investing activities in 2004 compared to 2003 is due to an increase in net purchases from investments of \$9.5 million offset by a decrease in acquisition payments of \$30.6 million in 2004 as compared to 2003.

Cash used in financing activities was \$31.8 million for the year ended December 31, 2005, compared to cash provided by financing activities of \$8.4 million for the year ended December 31, 2004. The increase in cash used in financing activities in 2005 was due to a \$42.4 million increase in cash used to acquire treasury stock compared to 2004. The increase in cash used in financing activities in 2005 was partially offset by an increase in cash proceeds from issuance of common stock of \$2.2 million. The increase in cash provided by financing activities in 2004 compared to 2003 was primarily due to an increase in proceeds from the issuance of common stock of \$2.4 million and also reflects the absence of debt repayments in 2004 compared to 2003 debt repayments of \$8.6 million.

Future capital requirements will depend upon many factors, including the timing of research and product development efforts, any expansion of our marketing efforts, purchases of our common stock and any acquisitions. We expect to continue to expend significant amounts on ongoing research and development, computer and related data center equipment, and personnel. We believe that our cash, cash equivalents, investments and our funds from operations will be sufficient to satisfy our cash requirements for the foreseeable future.

Table of Contents**Off-balance Sheet Arrangements**

During our normal course of business, we have made certain indemnities and guarantees under which we may be required to make payments in relation to certain transactions. Those indemnities include intellectual property indemnities to our customers in connection with the licensing of its technology, indemnities for liabilities associated with the infringement of other parties' technology based upon the our technology, and indemnities to our directors and officers to the maximum extent permitted under the laws of the State of Delaware. The duration of these indemnities and guarantees varies, and in certain cases, is indefinite. The majority of these indemnities and guarantees generally do not provide for any limitation on the maximum potential future payments that we could be obligated to make. We have not recorded any liability for these indemnities and guarantees in the accompanying balance sheets and, to date, no payments have ever been required under any of these indemnities and guarantees. We do, however, accrue for losses for any known contingent liability, including those that may arise from these indemnification provisions, when the required future payment is material.

Commitments

As of December 31, 2005, we had no material commitments other than our operating and capital leases and minimum vendor commitments. Our commitments under these obligations are as follows:

	Total	2006	Payment Schedule				Thereafter
			2007	2008	2009	2010	
			(in thousands)				
Operating leases	\$ 14,192	\$ 2,914	\$ 2,639	\$ 2,598	\$ 2,753	\$ 2,628	\$ 660
Capital leases	2,415	500	500	500	500	415	
Minimum vendor commitments	109,294	27,183	23,684	22,439	21,669	11,582	2,737
Total obligations	\$ 125,901	\$ 30,597	\$ 26,823	\$ 25,537	\$ 24,922	\$ 14,625	\$ 3,397

New Accounting Standards

In December 2004, the FASB revised SFAS No. 123 (SFAS 123R), *Share-Based Payment*, which requires companies to expense the estimated fair value of employee stock options and similar awards. We will adopt the provisions of SFAS 123R effective on January 1, 2006 using a modified prospective application. Under a modified prospective application, SFAS 123R, which provides certain changes to the method for valuing stock-based compensation among other changes, will apply to new awards and to awards that are outstanding on the effective date. Compensation expense for outstanding awards for which the requisite service had not been rendered as of the effective date will be recognized over the remaining service period. While we expect that SFAS 123R will increase our stock-based compensation expense, we have not completed our evaluation of SFAS 123R and have not fully quantified its effect.

In May 2005, the FASB issued SFAS No. 154 *Accounting Changes and Error Corrections*. SFAS No. 154 replaces APB Opinion No. 20, *Accounting Changes*, and FASB Statement No. 3, *Reporting Accounting Changes in Interim Financial Statements*, and changes the requirements for the accounting for and reporting of a change in accounting principle. SFAS No. 154 applies to all voluntary changes in accounting principle and to changes required by an accounting pronouncement in the instance that the pronouncement does not include specific transition provisions. APB Opinion No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 requires retrospective application to prior periods' financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS No. 154 defines *retrospective application* as the application of a different accounting principle to prior accounting periods as if that principle had always been used or as the adjustment of previously issued financial statements to reflect a change in the reporting

Table of Contents

entity. SFAS No. 154 also redefines *restatement* as the revising of previously issued financial statements to reflect the correction of an error. SFAS No. 154 carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and a change in accounting estimate. SFAS No. 154 also carries forward the guidance in APB Opinion No. 20 requiring justification of a change in accounting principle on the basis of preferability. SFAS No. 154 is effective in fiscal years beginning after December 31, 2005. We do not expect the adoption of SFAS No. 154 to have a material effect on our consolidated financial statements.

On November 3, 2005, the FASB issued FASB Staff Position (FSP) No. FAS 115-1 which addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. This FSP also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in this FSP amends FASB Statements No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. FSP No. 115-1 is effective in fiscal years beginning after December 15, 2005. We do not expect the adoption of FSP No. 115-1 to have a material effect on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

We are exposed to the impact of interest rate changes and changes in the market values of our investments. In this regard, changes in U.S. interest rates affect the interest earned on our cash equivalents and our investment portfolio. We invest our excess cash in debt instruments of the U.S. government and its agencies, and in high-quality corporate issuers and, by policy, limit the amount of credit exposure to any one issuer.

An increase or decrease in market interest rates by 10% as of December 31, 2005 would not cause a significant change in the fair value of our investments. Although the fair value of investments may change due to interest rate fluctuations, we have historically held our investments to maturity, which reduces the overall risk of changes in the fair value of our investments.

We are also exposed to the impact of interest rate changes as they affect our revolving credit commitment. The interest rate charged on our bank facility varies with the bank's prime rate or LIBOR and, consequently, our interest expense would fluctuate with changes in the general level of these interest rates if we were to borrow any amounts under the facility. As of December 31, 2005, we had no amounts outstanding under our bank facility.

We are not exposed to foreign currency risk since we have no foreign operations and all revenues and expenses are in U.S. dollars.

There were no significant changes to our market risk in 2005.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

Financial statements are submitted as a separate section of this Form 10-K beginning on page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

No disagreements with accountants on accounting and financial disclosure have occurred during the two most recent fiscal years.

On March 26, 2004, our board and its audit committee engaged Deloitte & Touche LLP to serve as the company's independent registered public accounting firm for the year ending December 31, 2004. PricewaterhouseCoopers LLP previously served as our independent registered public accounting firm until

Table of Contents

March 22, 2004. Prior to the engagement, we did not consult with Deloitte & Touche LLP regarding any of the following:

1. The application of accounting principles to a specified transaction, either completed or proposed;
2. The type of audit opinion that might be rendered on our financial statements, and none of the following was provided to us by Deloitte & Touche LLP: (a) a written report, or (b) oral advice that Deloitte & Touche LLP concluded was an important factor considered by the company in reaching a decision as to an accounting, auditing or financial reporting issue;
3. Any matter that was the subject of a disagreement, as that term is defined in Item 304(a)(1)(iv) of Regulation S-K and the related instructions to Item 304 of Regulation S-K; or
4. A reportable event, as that item is defined in Item 304(a)(1)(v) of Regulation S-K.

The report of our former independent registered public accounting firm, PricewaterhouseCoopers LLP, on our consolidated financial statements for 2003 contained no adverse opinion or disclaimer of opinion and were not qualified or modified as to uncertainty, audit scope or accounting principle. In connection with its audit for 2003 and through March 22, 2004, there have been no disagreements with PricewaterhouseCoopers LLP on any matter of accounting principle or practices, financial statement disclosure or auditing scope or procedure, which disagreements if not resolved to the satisfaction of PricewaterhouseCoopers LLP would have caused it to make reference thereto in its reports on the consolidated financial statements for such years. From January 1, 2003 through March 22, 2004, there have been no reportable events (as defined in Item 304(a)(1)(v) of Regulation S-K).

We provided PricewaterhouseCoopers LLP with a copy of the foregoing disclosures. A copy of PricewaterhouseCoopers LLP's letter, dated March 26, 2004, stating its agreement with such statements, is incorporated by reference to Exhibit 16.1 attached to the Current Report on Form 8-K filed with the SEC on March 26, 2004.

ITEM 9A. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

As of December 31, 2005, we carried out an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) and 15d-15(e)) under the supervision and with the participation of our management, including our Chief Executive Officer and our Chief Financial Officer. Our disclosure controls and procedures are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported on a timely basis.

Based upon that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures are effective in alerting them, in a timely manner, to material information to be included in our periodic SEC filings.

(b) Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining an adequate system of internal control over financial reporting, as defined in the Exchange Act Rule 13a-15(f). Our internal control over financial reporting is a process designed under the supervision of our Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with accounting principles generally accepted in the U.S. Management conducted an assessment of our internal control over financial reporting based on the framework established by the Committee of Sponsoring Organizations of the Treadway Commission in *Internal*

Table of Contents

Control Integrated Framework. In accordance with the Sarbanes-Oxley Act of 2002, management makes the following assertions:

Management has implemented a process to monitor and assess both the design and operating effectiveness of internal control over financial reporting.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Based on our assessment, management has concluded that our internal control over financial reporting was effective as of December 31, 2005. We review the results of management's assessment with the Audit Committee of our Board of Directors.

Our independent registered public accounting firm, Deloitte & Touche LLP, audited management's assessment and independently assessed the effectiveness of the Company's internal control over financial reporting. Deloitte & Touche LLP has issued an attestation report, which is included in section (d) of Item 9A. The Company's financial statements as of and for the year ended December 31, 2005, have been audited by Deloitte & Touche LLP in accordance with the standards of the Public Company Accounting Oversight Board (United States).

(c) Changes in Our Controls

Changes in Our Controls: In our Annual Report on Form 10-K, we disclosed that, as of December 31, 2004, we did not maintain effective internal control over the preparation of our income tax provision calculation. During the review of our financial statements, certain errors were identified which required correction in the calculation of our income tax provision and related deferred tax asset and tax contingency reserve accounts. The errors, which were not material in the aggregate, were corrected prior to our earnings press release dated February 17, 2005 and our filing of the Form 10-K. These errors were the result of a deficiency in the operation of controls requiring the reconciliation of the components of our income tax provision calculation to appropriate supporting documentation. This deficiency resulted in a more than remote likelihood that a material misstatement to our income tax provision and related deferred tax asset and tax contingency reserve accounts in the annual or interim financial statements may not be prevented or detected. Accordingly, management determined that this condition constituted a material weakness. Because of this material weakness, we concluded that we did not maintain effective internal control over financial reporting as of December 31, 2004 based on the criteria in the *Internal Control Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

In 2005, we hired a Director of Tax in order to enhance the focus and technical expertise devoted to our income tax provision calculation, including the related analysis of the deferred tax asset and tax contingency reserve accounts. In addition, we have implemented certain procedures and controls related to our income tax provision and related balance sheet accounts, including the reconciliation of the components of our income tax provision calculation to supporting documentation. Management believes that as a result of these actions, the previously reported condition is no longer a material weakness as of December 31, 2005.

Other than as described above, there has been no significant change in our internal control over financial reporting during the quarter ended December 31, 2005 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting. Our internal control over financial reporting is designed with the objective of providing reasonable assurance regarding the reliability of our financial reporting and preparation of financial statements for external purposes in accordance with generally accepted accounting principles.

Table of Contents

It should be noted that the design of any system of controls is based in part on certain assumptions about the likelihood of future events, any design may not succeed in achieving its stated goals under all potential future conditions, regardless of how remote such conditions may be.

(d) Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of

Digital Insight Corporation

Calabasas, California

We have audited management's assessment, included in the accompanying Management's Report on Internal Control Over Financial Reporting, that Digital Insight Corporation (the "Company") maintained effective internal control over financial reporting as of December 31, 2005, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions.

A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, management's assessment that the Company maintained effective internal control over financial reporting as of December 31, 2005, is fairly stated, in all material respects, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Table of Contents

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and the financial statement schedule as of and for the year ended December 31, 2005 of the Company and our report dated March 15, 2006 expressed an unqualified opinion on those financial statements and the financial statement schedule.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Digital Insight Corporation:

Calabasas, California

We have audited the accompanying consolidated balance sheets of Digital Insight Corporation (the Company) as of December 31, 2005 and 2004, and the related consolidated statements of operations, stockholders' equity, and cash flows for the years then ended. Our audits also included the financial statement schedule listed in the Index to Consolidated Financial Statements. These financial statements and the financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such 2005 and 2004 financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2005 and 2004, and the results of its operations and its cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2005, based on the criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 15, 2006 expressed an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Digital Insight Corporation

In our opinion, the accompanying consolidated statements of operations, stockholders' equity (deficit) and cash flows present fairly, in all material respects, the results of operations and cash flows of Digital Insight Corporation and subsidiaries (the "Company") for the year ended December 31, 2003, in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed on the index and appearing on page F-34 for the year ended December 31, 2003 presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial statement schedule based on our audit. We conducted our audit of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. THE COMPANY

Digital Insight Corporation (the Company), incorporated in March 1997 in Delaware, provides outsourced online banking applications and services to banks, credit unions, and savings and loan associations. Its outsourcing operations include three operating segments: Internet banking, business banking, and lending. The Internet banking segment includes online banking for consumers, including bill payment and presentment, and the business banking segment includes online banking for businesses. The lending operation offers online lending for consumer loans. As a result of its acquisition of Magnet Communications, Inc. (Magnet) in November 2003, the Company offers online business banking products to large financial institutions that are available either as a licensed software implementation or hosted in the Company's data centers. Substantially all of the Company's revenues are derived from these products and services. The Company's consolidated financial statements include the accounts of its subsidiaries, and there were no inter-company transactions requiring elimination in consolidation.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of estimates and critical accounting policies

Accounting principles generally accepted in the United States require management of the Company to make estimates and assumptions in the preparation of these consolidated financial statements that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

The most significant areas that require management judgment are revenue recognition, allowance for doubtful accounts, deferred income taxes, impairment of long-lived assets and contingencies and litigation. The accounting policies for these areas are discussed in this or other footnotes to these consolidated financial statements.

Cash, cash equivalents and investments

The Company considers all highly liquid investments purchased with a maturity at the time of purchase of three months or less to be cash equivalents. Cash equivalents at December 31, 2005 consist of commercial paper, certificates of deposit, money-market funds and U.S. government agency securities.

The Company considers all investments with maturities of four to 12 months, or those investments in auction rate securities with interest reset periods of less than one year, to be short-term investments and investments maturing after 12 months to be long-term investments.

Investments in debt and equity securities

The Company accounts for its short-term and long-term investments in debt and equity securities in accordance with Statement of Financial Accounting Standards (SFAS) No. 115, Accounting for Certain Investments in Debt and Equity Securities, and Emerging Issues Task Force (EITF) Issue No. 03-01, The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments. These investments are comprised of readily marketable commercial paper, certificates of deposit, debt instruments of the U.S. government and its agencies, corporate debt securities and auction rate debt and preferred securities. All investments, with the exception of the auction rate securities, are classified as held-to-maturity securities and carried at amortized cost using the specific identification method. The Company intends to and has the ability to

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

hold these investments to maturity. Auction rate securities are classified as available-for-sale investments and are carried at their fair value. Unrealized gains and losses on available-for-sale securities would be reported in comprehensive income; however, at December 31, 2005 and 2004, the fair value of the available-for-sale securities approximated cost. Realized gains and losses, if any, are included in earnings. There were no realized gains or losses in the years ended December 31, 2005, 2004 and 2003.

The Company assesses whether an other-than-temporary impairment loss on an investment has occurred due to declines in fair value or other market conditions. There were no other-than-temporary impairment losses in the years ended December 31, 2005, 2004 and 2003.

In June 2005, the Company entered into a strategic alliance with CashEdge Inc., a leading provider of online financial applications, and became a distributor for CashEdge's account opening and funding solution. As part of this agreement, the Company pre-purchased transactions from CashEdge for use over a five-year term as well as obtained warrants to purchase common shares in CashEdge for aggregate consideration of \$6.25 million. The estimated fair value of the warrants of \$500,000 was recorded in long-term investments. The warrants contain a cash-less exercise feature and are therefore considered a derivative financial instrument for accounting purposes. The Company evaluates the fair value of the warrants at the end of each reporting period and records changes in the fair value to net income. The remaining \$5.75 million was recorded in other assets in the accompanying consolidated 2005 balance sheet reflecting the value of the new account opening transactions prepurchased from CashEdge.

Fair value of financial instruments

The Company's financial instruments include cash and cash equivalents, short-term and long-term investments, accounts receivable, accounts payable, and accrued expenses and other liabilities. The carrying value of these financial instruments approximates fair value due to their short-term nature or the current market trends.

Property and equipment

Property and equipment is carried at cost. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the assets, generally three to five years. Leasehold improvements are amortized using the straight-line method over the lesser of the lease term or the estimated useful life of the asset.

When assets are sold or retired, the asset and related accumulated depreciation are eliminated and any gain or loss on disposal is included in operations. Expenditures for maintenance and repairs are charged to operations when incurred.

Capitalized software costs

The Company capitalizes the costs of computer software developed or obtained for internal use in accordance with Statement of Position 98-1, Accounting for the Costs of Computer Software Developed or Obtained for Internal Use. Capitalized computer software costs consist of purchased software licenses, implementation costs, consulting costs and payroll-related costs for certain projects that qualify for capitalization. The Company expenses costs related to preliminary project assessment, research and development, re-engineering, training and application maintenance as incurred. Capitalized software costs included in fixed assets at December 31, 2005 and 2004 were \$31.1 million and \$25.1 million, respectively, and the related accumulated amortization was \$22.6 and \$18.0, respectively. The capitalized software costs are being amortized

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

on the straight-line method over a period of three years upon being placed in service. Amortization of \$4.6 million, \$4.7 million and \$4.7 million was charged to expense for the years ended December 31, 2005, 2004 and 2003, respectively.

Goodwill and intangible assets

As of January 1, 2002, the Company adopted SFAS No. 141, Business Combinations and SFAS No. 142, Goodwill and Other Intangible Assets. SFAS No. 141 established new standards for accounting and reporting requirements for business combinations and prohibits the use of the pooling-of-interest method for combinations initiated after June 30, 2001. SFAS No. 142 changed the accounting for goodwill from an amortization method to an impairment only approach. Under SFAS No. 142, goodwill is tested at the reporting unit level at least annually or whenever events or circumstances indicate that goodwill might be impaired. Amortization of goodwill, including goodwill from past business combinations, ceased on January 1, 2002. In 2005, the Company changed its designated date for the annual evaluation of goodwill for all reporting units from December 31 to October 1. (Note 6).

Other intangible assets include customer relationships, acquired technology, acquired backlog and trade name intangibles that are amortized using the straight-line method over the periods benefited, ranging from one to eight years. Other intangibles represent long-lived assets and are assessed for potential impairment whenever significant events or changes occur that might impact recovery of recorded costs.

Long-lived assets

The Company assesses potential impairments to its long-lived assets in accordance with the provisions of SFAS No. 144, Accounting for the Impairment or Disposal of Long-lived Assets. An impairment review is performed whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Factors considered by the Company include, but are not limited to: significant underperformance relative to expected historical or projected future operating results; significant changes in the manner of use of the acquired assets or the strategy for the Company's overall business; significant negative industry or economic trends; a significant decline in the Company's stock price for a sustained period of time; and the Company's market capitalization relative to net book value. When the Company determines that the carrying value of a long-lived asset (excluding goodwill) may not be recoverable based upon the existence of one or more of the above indicators of impairment, the Company estimates the future undiscounted cash flows expected to result from the use of the asset and its eventual disposition. If the sum of the expected future undiscounted cash flows is less than the carrying amount of the asset, the Company recognizes an impairment loss to reduce the carrying amount of the asset to its fair value.

Concentration of business and credit risks

The Company operates in the market for Internet banking in the United States. The industry is characterized by rapid technological developments, frequent new product introductions and changes in end user requirements. The Company's future success will depend on its ability to develop, introduce and market enhancements to its existing products and services, to introduce new products and services in a timely manner that meet customer requirements, and to respond to competitive pressures and technological advances. Further, the emergence of new industry standards, whether through adoption by official standards committees or widespread use by financial institutions or other financial institution data processing vendors, could require the Company to redesign its products and services.

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Certain of the Company's service offerings including bill payment, online statement and check imaging services are purchased from and provided by third party vendors according to the Company's specifications. Although the Company uses multiple vendors to provide these services, a disruption in a single vendor's ability to provide these services could require the Company to incur additional costs to transition these services to new vendors.

During the years ended December 31, 2005, 2004 and 2003, no customer accounted for 10% or more of total revenue.

The Company performs ongoing credit evaluations of its customers' financial condition and limits the amount of credit extended when deemed necessary, but generally does not require collateral. Management believes that any risk of loss is significantly reduced due to the nature of the customers being financial institutions and credit unions as well as the number of its customers and geographic areas. The Company maintains an allowance for doubtful accounts for estimated losses associated with the potential inability of its customers to make required payments or for resolution of potential billing disputes. Receivables are charged against the allowance when management believes the uncollectibility of a receivable balance, or portion thereof, has been confirmed.

The Company has cash in financial institutions that is insured by the Federal Deposit Insurance Corporation (FDIC) up to \$100,000 per institution. At December 31, 2005 and 2004, the Company had cash and cash equivalent accounts in excess of the FDIC insured limits.

Revenue recognition

The following sections set forth the revenue recognition policy for the Company's primary sources of revenue as well as the accounting policies followed for certain other revenue arrangements.

Application service provider revenues. The Company earns revenues from application service provider (ASP) arrangements for which the Company hosts its customers' Internet banking, business banking and lending applications. Revenues are earned for upfront fees for implementation services and amounts billed for recurring monthly services. The Company recognizes revenue from ASP arrangements in accordance with Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition in Financial Statements, and Emerging Issues Task Force (EITF) Issue No. 00-21, Accounting for Revenue Arrangements with Multiple Deliverables. Under SAB 104, the Company recognizes revenues when fees are fixed and determinable, no obligations remain related to the earned fees and collection of the related receivable is reasonably assured. Under EITF 00-21, the Company allocates revenues in arrangements with multiple deliverables to each qualifying separate unit of accounting based on either their relative fair values or the fair value of the undelivered elements. Fair value is determined by the prices charged when the element is sold separately or other specific objective evidence.

The Company defers recognition of certain implementation fee revenue, which includes set up fees for each service element and mandatory training, that are not the culmination of a separate earnings process and recognizes them ratably over the greater of the initial life of the customer contract or the estimated life of the customer service relationship, generally between four and five years. The Company also defers the recognition of the related direct incremental implementation costs and recognizes them ratably over the same period. Recurring service fees are billed on a monthly basis and are based on the number of end users, end user transactions, or a flat monthly fee. Revenue from recurring service fees are recognized as services are provided.

Arrangements with data processing vendors. The Company has joint sales and marketing agreements with several data processing software vendors of the Company's financial institution clients. Generally, the

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Company pays a recurring referral fee to these data processing software vendors based on fees billed by the Company to the financial institution customers for the services provided by the Company. Under these arrangements, the Company is the primary obligor, performs all services, establishes prices charged to the financial institution for the Company's services, and bears all performance and collection risks. Because of these factors, the Company recognizes revenue under these arrangements based on the gross amount earned from the customer in accordance with EITF 99-19, Reporting Revenue Gross as a Principal versus Net as an Agent. The referral fees earned by the data processing software vendors are recognized as incurred in sales, general and administrative expenses.

The Company bills three data processing software vendors directly for the services provided by the Company to financial institution customers. Under these arrangements, the data processing vendor sets the actual price charged to the financial institution, bundles the Company's services with other vendor services, performs administrative functions including billing, and bears all collection risk. Because of these factors, the Company recognizes the revenue under these arrangements based on the net revenue earned from the data processing vendor in accordance with EITF No. 99-19.

Third party service provider arrangements. The Company has agreements with third party vendors to resell the services of those third party vendors to the Company's financial institution customers. These services include bill payment, online statement, online account opening and funding, and check imaging services. The Company is obligated to provide these services to its customers and there is no contractual arrangement between the third party vendors and the Company's customers. In addition, the Company prices these services independent of the amounts billed by the third party vendors to the Company and the Company bears all collection risk for the amounts billed to its customers. In accordance with EITF No. 99-19, amounts earned from the Company's customers from the resale of these services are recorded as revenue on a gross basis and the costs incurred from the third party service providers are recorded as cost of revenues in the accompanying consolidated statements of operations.

Software license revenues. Revenue from the sale of software licenses is recognized in accordance with Statement of Position No. 97-2 (SOP 97-2), Software Revenue Recognition, as amended by SOP 98-9, Software Revenue Recognition with Respect to Certain Transactions. For arrangements that require significant production, modification, or customization of software, the Company applies the provisions of Accounting Research Bulletin No. 45, Long-Term Construction-Type Contracts, and SOP 81-1, Accounting for Performance of Construction-Type and Certain Production-Type Contracts. Revenue is derived from the sale of software licenses, professional services, and customer support (maintenance). Revenue is allocated to each element of the arrangement based on the fair value of undelivered elements based on prices charged when the elements are sold separately. Revenue is recognized upon delivery if the following criteria have been met: there is evidence of an arrangement, collection of the fee is reasonably assured and the fee is fixed or determinable.

Fees for software licenses and professional services are typically billed under fixed-price arrangements. Revenues derived from license and professional service fees that require significant production, modification, or customization of the software is recognized using the percentage-of-completion method. The percentage-of-completion is measured by the percentage of labor effort incurred to date to estimated total labor effort to complete the delivery of each license. Contract provisions for estimated losses on uncompleted contracts are made in the period in which such losses are determined. Revenues to provide professional services on a time-and-materials basis to software license customers are recognized as the related services are performed.

Maintenance revenue is earned for providing technical support and software updates on a when-and-if available basis. The Company recognizes all maintenance revenue ratably over the applicable maintenance

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

period. The Company determines the amount of maintenance revenue to be deferred through reference to substantive maintenance renewal provisions contained in the agreement or, in the absence of such renewal provisions, through reference to vendor specific objective evidence of maintenance renewal rates.

Other revenues. Other revenues are derived from web site design; optional training services; and other optional products or services purchased separately by customers, which represent the culmination of a separate earnings process. The Company also earns revenue for early termination fees when customers terminate their services prior to the expiration date of their service contract. These other revenues are recognized when the fees are fixed and determinable, no obligations remain related to the earned fees and collection of the related receivable is reasonably assured.

Advertising expense

Advertising costs are expensed as incurred. Advertising expense for the years ended December 31, 2005, 2004 and 2003 amounted to \$22,000, \$6,000, and \$170,000, respectively.

Research and development

Research and development expenses consist of salaries, related personnel expenses and consultant fees related to the design, testing, and enhancement of the Company's products and services. The Company's research and development expenses were \$23.9 million, \$23.4 million, and \$15.6 million for the years ended December 31, 2005, 2004 and 2003, respectively. These expenses relate to the development of products and services and are charged to expense as incurred.

Income taxes

The Company uses the asset and liability method to account for income taxes. Under this method, deferred taxes are determined based on differences between the financial statement and tax basis of assets and liabilities, and are measured at the enacted tax rates that will be in effect when those differences are expected to reverse. A valuation allowance is established when it is more likely than not that some or all of the deferred tax assets will not be realized.

Business segments

The Company uses the management approach of SFAS No. 131, Disclosures About Segments of an Enterprise and Related Information, to identify its reportable business segments. The management approach designates the internal organization used by management for making operating decisions and assessing performance as the basis for identifying a company's reportable segments.

Stock-based compensation

The Company has chosen to account for stock-based compensation using the intrinsic value method prescribed in APB Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Accordingly, compensation expense from stock options is measured as the excess, if any, of the fair market value of the Company's stock price at the date of grant as determined by the board of directors over the amount an employee must pay to acquire the stock.

The following table illustrates the effect on stock-based compensation, net income and earnings per share as if the Company had applied the fair value recognition provisions of SFAS No. 123, Accounting for Stock-Based

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Compensation, and SFAS No. 148 Accounting for Stock Based Compensation, Transition and Disclosure, to stock-based employee compensation (amounts in thousands, except per share data):

	Year Ended December 31,		
	2005	2004	2003
Stock-based compensation:			
As reported	\$ 525	\$ 740	\$ 62
Additional stock-based compensation expense determined under the fair value method, net of tax	4,480	6,865	5,387
Pro forma	\$ 5,005	\$ 7,605	\$ 5,449
Net income (loss):			
As reported	\$ 26,541	\$ 16,723	\$ 46,594
Additional stock-based compensation expense determined under the fair value method, net of tax	(4,480)	(6,865)	(5,387)
Pro forma	\$ 22,061	\$ 9,858	\$ 41,207
Net income (loss) per share basic:			
As reported	\$ 0.76	\$ 0.47	\$ 1.41
Per share effect of additional stock-based compensation expense determined under the fair value method, net of tax	(0.13)	(0.19)	(0.16)
Pro forma	\$ 0.63	\$ 0.28	\$ 1.25
Net income (loss) per share diluted:			
As reported	\$ 0.75	\$ 0.47	\$ 1.38
Per share effect of additional stock-based compensation expense determined under the fair value method, net of tax	(0.13)	(0.20)	(0.16)
Pro forma	\$ 0.62	\$ 0.27	\$ 1.22

Net income (loss) per share

The Company computes net income (loss) per share in accordance with SFAS No. 128, Earnings per Share, and Staff Accounting Bulletin No. 98 (SAB 98). Under the provisions of SFAS No. 128 and SAB 98, basic net income (loss) per share is computed by dividing the net income (loss) available to common stockholders for the period by the weighted average number of shares of common stock outstanding during the period. Diluted net income per share reflects the effects of potentially dilutive securities, which consist of stock options, restricted stock and warrants. The calculation of diluted net income (loss) per share excludes potential common shares if the effect is anti-dilutive.

Comprehensive income

The Company accounts for comprehensive income in accordance with SFAS No. 130, Reporting Comprehensive Income which establishes standards for reporting comprehensive income and its components in financial statements. Comprehensive income, as defined, includes all changes in stockholders' equity during a period from non-owner sources. Any unrealized gains and losses on the Company's available-for-sale securities are included in the calculation of other comprehensive income. To date, the Company has not had any transactions that are required to

be reported in comprehensive income other than net income (loss).

F-14

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

New accounting standards

In December 2004, the FASB revised SFAS No. 123 (SFAS 123R), Share-Based Payment, which requires companies to expense the estimated fair value of employee stock options and similar awards. The Company will adopt the provisions of SFAS 123R effective January 1, 2006 using the modified prospective application. Under modified prospective application, SFAS 123R, which provides certain changes to the method for valuing stock-based compensation among other changes, will apply to new awards and to unvested awards that are outstanding on the effective date. Compensation expense for outstanding awards for which the requisite service had not been rendered as of the effective date will be recognized over the remaining service period. While the Company expects that SFAS 123R will increase its stock-based compensation expense, the Company has not completed its evaluation of SFAS 123R and has not fully quantified its effect.

In May 2005, the FASB issued SFAS No. 154 Accounting Changes and Error Corrections. SFAS No. 154 replaces APB Opinion No. 20, Accounting Changes, and FASB Statement No. 3, Reporting Accounting Changes in Interim Financial Statements, and changes the requirements for the accounting for and reporting of a change in accounting principle. SFAS No. 154 applies to all voluntary changes in accounting principle and to changes required by an accounting pronouncement in the instance that the pronouncement does not include specific transition provisions. APB Opinion No. 20 previously required that most voluntary changes in accounting principle be recognized by including in net income of the period of the change the cumulative effect of changing to the new accounting principle. SFAS No. 154 requires retrospective application to prior periods financial statements of changes in accounting principle, unless it is impracticable to determine either the period-specific effects or the cumulative effect of the change. SFAS No. 154 defines *retrospective application* as the application of a different accounting principle to prior accounting periods as if that principle had always been used or as the adjustment of previously issued financial statements to reflect a change in the reporting entity. SFAS No. 154 also redefines *restatement* as the revising of previously issued financial statements to reflect the correction of an error. SFAS No. 154 carries forward without change the guidance contained in APB Opinion No. 20 for reporting the correction of an error in previously issued financial statements and a change in accounting estimate. SFAS No. 154 also carries forward the guidance in APB Opinion No. 20 requiring justification of a change in accounting principle on the basis of preferability. SFAS No. 154 is effective in fiscal years beginning after December 31, 2005. The Company does not expect the adoption of SFAS No. 154 to have a material effect on its consolidated financial statements.

On November 3, 2005, the FASB issued FSP No. FAS 115-1 which addresses the determination as to when an investment is considered impaired, whether that impairment is other than temporary, and the measurement of an impairment loss. This FSP also includes accounting considerations subsequent to the recognition of an other-than-temporary impairment and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The guidance in this FSP amends FASB Statements No. 115, *Accounting for Certain Investments in Debt and Equity Securities*. FSP No. 115-1 is effective in fiscal years beginning after December 15, 2005. The Company does not expect the adoption of FSP No. 115-1 to have a material effect on its consolidated financial statements.

Reclassifications

Certain prior year reported amounts have been reclassified to conform with the 2005 presentation. Accounts payable and Accrued expenses and other liabilities related to the acquisition of property and equipment have been excluded from the statement of cash flows balances at December 31, 2005, 2004 and 2003. In addition, the related amount in property and equipment purchased during those years has been excluded as well, with the activity being disclosed in the supplemental disclosure of non-cash activity. In the period the liability was paid the amount has been reflected as a cash outflow under purchase of property and equipment. The effect of this

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

reclassification was a reduction of \$509,000 to previously reported cash used to purchase property and equipment during 2004 and an additional \$354,000 to previously reported cash used to purchase property and equipment during 2003.

3. ACQUISITIONS**Magnet Communications, Inc.**

On November 25, 2003, the Company completed its acquisition of all of the outstanding shares of capital stock of Magnet in a forward triangular merger pursuant to the Agreement and Plan of Merger dated October 23, 2003 among the Company, Mureau Acquisitions LLC, a wholly owned subsidiary of the Company, and Magnet. Magnet was a privately held company based in Atlanta, Georgia that provided online business banking and business banking solutions to large and mid-size financial institutions. The acquisition of Magnet allows the Company to offer online business banking products to large financial institutions that are available as either a licensed software implementation or hosted in the Company's data centers. The Company paid \$33.5 million and issued 1,448,335 million shares of its common stock with a fair value of approximately \$28.5 million determined at the public announcement date to acquire all of the outstanding shares of Magnet. Additionally, the Company paid approximately \$1.9 million in transaction costs.

The acquisition has been accounted for using the purchase method of accounting. The purchase price was allocated to the estimated fair value of the assets acquired and liabilities assumed. The estimated fair value of the tangible assets acquired and liabilities assumed approximated the historical cost basis. Based on the final purchase price allocation during the year ended December 31, 2004, the allocation to goodwill increased \$294,000 to \$34.3 million as described in Note 9. The purchase price allocation to identifiable intangible assets was \$12.1 million and these assets are amortized on a straight-line basis over a range of estimated useful lives of one to eight years.

The identifiable intangible asset amount is comprised of the following items along with their respective amortization periods (in thousands):

Description	Amount	Amortization Period
Customer relationships	\$ 6,300	8 years
Acquired technology	3,800	3 years
Acquired backlog	1,800	4.5 years
Trade name	200	1 year
	\$ 12,100	

In accordance with the purchase method of accounting, the results of Magnet have been included in the consolidated financial statements since the acquisition date, November 25, 2003. The following selected unaudited pro forma information is provided to present a summary of the operating results of Magnet as if the acquisition had occurred at the beginning of the period (in thousands, except per share data):

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	For the year ended December 31, 2003
Revenue	\$ 170,069
Income from operations	\$ 10,396
Net income	\$ 40,017
Basic net income per share	\$ 1.16
Diluted net income per share	\$ 1.14
Weighted average shares used in computing basic net income per share	34,439
Weighted average shares used in computing diluted net income per share	35,148

Condensed balance sheet information of Magnet as of the acquisition date was as follows:

	Magnet As of Acquisition Date, November 25, 2003
Condensed Balance Sheets:	
Tangible assets	\$ 12,085
Goodwill and other assets	61,979
 Total assets acquired	 74,064
 Total liabilities	 (10,172)
 Fair value of net assets acquired	 \$ 63,892

4. CASH, CASH EQUIVALENTS AND INVESTMENTS

As of December 31, 2005 and 2004, cash and cash equivalents, short-term investments and long-term investments consist of the following:

	December 31,	
	2005	2004
Cash and cash equivalents:		
Cash and money market funds	\$ 38,858	\$ 63,220
Investments, original maturities less than 90 days	11,876	1,462
	\$ 50,734	\$ 64,682

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Short-Term December 31,		Long-Term December 31,	
	2005	2004	2005	2004
Held-to-maturity investments:				
Commercial paper	\$ 11,990	\$ 999	\$	\$
Certificate of deposit	677			
U.S. government agency securities	25,663	19,918	4,891	16,714
Corporate debt securities	15,244	1,638	3,411	1,071
	53,574	22,555	8,302	17,785
Available-for-sale investments:				
Auction rate debt securities	3,505	4,551		
Auction rate preferred securities	8,342	7,681		
	11,847	12,232		
Other:				
Warrants in privately-held company			500	
Total investments	\$ 65,421	\$ 34,787	\$ 8,802	\$ 17,785

Investments held as available-for-sale include auction rate debt and preferred securities of corporate issuers. As of December 31, 2005, the auction rate debt securities have stated maturities through 2037. The auction rate preferred securities have no stated maturity dates. Each of these securities have interest rates that reset periodically at established intervals, either every 7, 28, 35 or 364 days. At each auction reset, the Company has the option to hold its position, bid for a new interest rate or sell. The Company has classified all auction rate securities with an established interest reset period of less than one year as short-term investments. At December 31, 2005 and 2004, the fair values of the available-for-sale securities approximate cost.

Warrants with an estimated fair value of \$500,000 were recorded in long-term investments in conjunction with our strategic alliance agreement with CashEdge. The warrants contain a cash-less exercise feature and are therefore considered a derivative financial instrument for accounting purposes. The Company evaluates the fair value of the warrants at the end of each reporting period and records changes in the fair value to net income.

At December 31, 2005 and 2004, long-term held-to-maturity securities mature between one and two years from the date of the financial statements. The amortized cost and fair value of held-to-maturity securities consist of the following:

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

	Amortized Cost	Unrealized Losses	Unrealized Gains	Estimated Fair Value
December 31, 2005:				
Commercial paper	\$ 11,990	\$ (3)	\$	\$ 11,987
Certificates of deposit	677			677
U.S. government agency securities	30,554	(192)		30,362
Corporate debt securities	18,655	(39)	1	18,617
	\$ 61,876	\$ (234)	\$ 1	\$ 61,643
December 31, 2004:				
Commercial paper	\$ 999	\$ (1)	\$	\$ 998
U.S. government agency securities	36,632	(119)		36,513
Corporate debt securities	2,709	(2)		2,707
	\$ 40,340	\$ (122)	\$	\$ 40,218

There were no realized gains or losses on investments for the years ended December 31, 2005, 2004 and 2003. There were no restrictions on cash and cash equivalents or investments as of December 31, 2005 and 2004.

5. PROPERTY AND EQUIPMENT

Property and equipment is comprised of the following (in thousands):

	December 31,	
	2005	2004
Leasehold improvements	\$ 7,761	\$ 6,925
Equipment	49,179	40,609
Software	31,085	25,061
Furniture and fixtures	4,983	4,983
Construction in process	6,306	3,484
	99,314	81,062
Less: accumulated depreciation and amortization	(69,705)	(58,244)
	\$ 29,609	\$ 22,818

Assets acquired under capitalized lease obligations are included in property and equipment and totaled \$1.5 million with related and accumulated amortization of \$52,000 at December 31, 2005. The Company had no assets under capital lease obligations in 2004.

6. GOODWILL AND INTANGIBLE ASSETS

Goodwill and other purchased intangible assets are included in the identifiable assets of the segment to which they have been assigned. Impairment tests are performed at least annually and more often as circumstances require. Any goodwill impairment, as well as the amortization of other purchased intangible assets, is charged against the respective segment's operating margin. The annual impairment test was performed as of October 1, 2005, with no indication of impairment. In performing the goodwill impairment tests, the

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Company uses a discounted cash flow approach corroborated by comparative market multiples, where appropriate to determine the fair value of reporting units.

Accounting Change The Company's year-end closing and reporting process has been truncated in order to meet current, as well as future accelerated periodic filing requirements, resulting in significant constraints in the Company's resources during the first fiscal quarter. Accordingly, in the fourth quarter of 2005, the Company changed the designated date of the annual goodwill impairment test from December 31 to October 1, in order to perform the test at a point in the reporting cycle other than during year-end closing and reporting process such that additional resources are available.

No more than 12 months have elapsed between test dates and the change in the test date is not intended to avoid, accelerate or delay an impairment charge. Therefore, the Company believes that the accounting change described above is to an alternative principle that is preferable under the circumstances.

None of the Company's goodwill balances are deductible for income tax purposes. The change in the balance of goodwill during the year ended December 31, 2005 and 2004 is set forth below (in thousands):

	Internet Banking	Business Banking	Lending	Total
Balance, December 31, 2003	\$ 70,110	\$ 33,996	\$ 31,982	\$ 136,088
Add: Final purchase price allocation		294		294
Balance, December 31, 2004	70,110	34,290	31,982	136,382
No activity				
Balance, December 31, 2005	\$ 70,110	\$ 34,290	\$ 31,982	\$ 136,382

As of December 31, 2005 and 2004, all other intangible assets were subject to amortization. A summary of the other intangible assets as of December 31, 2005 and 2004 is set forth below (in thousands):

	Cost	Accumulated Amortization	Carrying Amount	Weighted Average Life
December 31, 2005:				
Customer relationships	\$ 33,330	\$ (26,310)	\$ 7,020	6 years

Total intangible assets	\$ 48,170	\$ (30,997)	\$ 17,173	

F-20

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Amortization expense for all intangible assets was \$7.8 million, \$8.3 million and \$5.9 million for the years ended December 31, 2005, 2004, and 2003, respectively. Estimated intangible asset amortization expense remaining for the next five years ending December 31 is as follows (in thousands):

2006	3,722
2007	2,321
2008	954
2009	788
2010	788

7. REVOLVING LINE OF CREDIT

In January 2005, the Company amended its agreement for a \$20 million revolving credit commitment (the Revolver) with a bank that expired on October 31, 2005. In October 2005, the Company renewed and amended its agreement with a bank for the Revolver that expires on October 31, 2007. The Company increased the facility from \$20 million to \$30 million and made certain other amendments. Based on the amended terms of the Revolver, the interest rate is equal to either (i) the bank's prime rate; or (ii) LIBOR plus 1.75%. The Company may draw down against the Revolver by either electing the bank's prime rate or LIBOR for 1-month, 2-month, 3-month, or 6-month LIBOR terms. The Revolver is collateralized by all assets of the Company. There were no balances outstanding on the Revolver at December 31, 2005 or 2004.

The Revolver includes covenants that require the Company to (i) maintain a tangible net worth of not less than \$110.0 million at all times, (ii) maintain positive quarterly income before taxes of not less than \$4,000,000, and (iii) maintain a ratio of current assets to current liabilities of greater than 1.50 to 1.0. The Company was in compliance with the covenants at December 31, 2005 and 2004.

8. COMMITMENTS AND CONTINGENCIES

The Company accounts for contingent liabilities, including pending and threatened litigation and tax contingencies (Note 9), in accordance with SFAS No. 5, Accounting for Contingencies, and records a liability when the outcome is deemed probable and the amount is reasonably estimable.

During its normal course of business, the Company has made certain indemnities and guarantees under which it may be required to make payments in relation to certain transactions. Those indemnities include intellectual property indemnities to the Company's customers in connection with the licensing of its technology, indemnities for liabilities associated with the infringement of other parties' technology based upon the Company's technology, and indemnities to directors and officers of the Company to the maximum extent permitted under the laws of the State of Delaware. The duration of these indemnities and guarantees varies, and in certain cases, is indefinite. The majority of these indemnities and guarantees generally do not provide for any limitation on the maximum potential future payments that the Company could be obligated to make. The Company has not recorded any liability for these indemnities and guarantees in the accompanying balance sheets and, to date, no payments have ever been required under any of these indemnities and guarantees. The Company does, however, accrue for losses for any known contingent liability, including those that may arise from these indemnification provisions.

Leases and other commitments

The Company leases its facilities and certain equipment under non-cancelable capital and operating leases with various expiration dates through 2011. Certain of the facility leases have renewal options. Additionally, the

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

terms of the facility leases provide generally for rental payments on a graduated scale. The Company recognizes rent expense on a straight-line basis over the lease period. Rent expense under the facility leases was \$3.0 million, \$3.4 million, and \$2.9 million for the years ended December 31, 2005, 2004 and 2003, respectively.

Future minimum lease payments under all non-cancelable capital and operating leases for the next five years ending December 31 and thereafter are as follows (in thousands):

	Capital leases	Operating leases
2006	\$ 500	\$ 2,914
2007	500	2,639
2008	500	2,598
2009	500	2,753
2010	415	2,628
Thereafter		660
Total minimum lease payments	\$ 2,415	\$ 14,192
Less: Amounts representing estimated taxes, insurance and maintenance	(649)	
Net minimum lease payments	1,766	
Less: Amounts representing interest	(263)	
Present value of minimum lease payments	1,503	
Less: Current portion	(262)	
Long-Term Obligations	\$ 1,241	

At December 31, 2005 the Company had long-term contracts with minimum commitments with vendors that provide various services. These contracts include minimum annual commitments as follows (in thousands):

2006	\$ 27,183
2007	23,684
2008	22,439
2009	21,669
2010	11,582
Thereafter	2,737
Total vendor commitments	\$ 109,294

Payments made under these contracts amounted to \$31.0 million, \$819,000 and \$539,000 for the years ended December 31, 2005, 2004 and 2003, respectively.

Legal proceedings

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

FundsXpress Financial Network, Inc. Litigation

On March 5, 2003, FundsXpress and the Company agreed to a full and complete settlement of a lawsuit initiated against the Company in 2002. The lawsuit alleged, among other claims, misappropriation of trade secrets and copyright infringement, and named certain members of senior management as defendants in their individual capacities. The Board of Directors approved the settlement proposal and authorized management to

F-22

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

finalize the settlement. While continuing to vigorously dispute the validity of the FundsXpress claims and damages, the Board and management, based in part upon the advice of outside counsel, determined it was in the best interests of the Company to avoid the expense and uncertainties involved in all litigation and forego continued distractions of management. In connection with the settlement, the Company recorded an expense of \$6.9 million in the fourth quarter of 2002, net of probable insurance recoveries. At December 31, 2002, the settlement payable of \$10.0 million was included in accrued expenses and other liabilities and the insurance reimbursement receivable of \$3.1 million is included in prepaid and other current assets. The settlement was paid and insurance proceeds were collected during the year ended December 31, 2003.

Digital Insight Corporation Initial Public Offering Securities Litigation

On December 6, 2001, the Company and two of its former officers and one current director were named as defendants in a class-action lawsuit filed in the United States District Court for the Southern District of New York. The lawsuit is captioned *In Re Digital Insight Corp. Initial Public Offering Securities Litigation*, No. 01 CV 11231 and is consolidated with numerous other lawsuits similar to this lawsuit. The claims were also asserted against the managing underwriters of the Company's public offerings and are based on allegations that the underwriter defendants solicited and received from certain investors, in exchange for allocating Digital Insight shares to the investors in connection with the previous public offerings, additional, excessive and undisclosed commissions and undisclosed commitments to purchase additional Digital Insight shares in the aftermarket. Other actions have been filed in New York making similar allegations regarding the public offerings of more than 300 other companies. The plaintiffs are seeking unspecified damages. Along with these companies and the individual defendants, but not the underwriter defendants, the Company has entered into a settlement agreement with the plaintiffs to settle the claims. As part of the settlement, once the settlement documents become effective, the plaintiffs will dismiss with prejudice the settling companies and individual defendants. On August 2005, the court issued an order preliminarily approving the proposed settlement and scheduling a settlement fairness hearing in April 2006. In the opinion of management, after consultation with legal counsel and based on currently available information, the ultimate disposition of these matters is not expected to have a material adverse effect on the Company's business, financial condition or results of operations and no amounts have been accrued for this lawsuit.

Magnet Claims

Currently, approximately \$3.4 million of cash and 144,834 shares of the Company's common stock issuable in connection with its acquisition of Magnet are held in escrow. The Company has notified the prior stockholders of Magnet that it has various claims against them in connection with the acquisition, and the Company is seeking recovery of damages, including the amounts in escrow. In response, the prior stockholders initiated arbitration proceedings in Los Angeles, California seeking release of the escrowed amounts. No amounts have been recorded in the Company's financial statements at December 31, 2005 as the Company cannot determine the final outcome.

Other

In addition, the Company may be involved from time to time in litigation arising in the normal course of its business. Although it is currently not a party to such litigation that it believes would have a material adverse effect, individually or in the aggregate, on the Company's business, financial condition, or results of operations, it is possible that in the future the Company could become a party to such proceedings.

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****9. INCOME TAXES**

The provision for income taxes is comprised of the following for the years ended December 31 (in thousands):

	2005	2004	2003
Current			
Federal	\$ 4,171	\$ 3,207	\$ 4,667
State	1,438	848	1,587
Total current provision	5,609	4,055	6,254
Deferred			
Federal	9,683	7,027	(29,044)
State	1,547	1,220	(5,638)
Total deferred provision	11,230	8,247	(34,682)
Income tax provision	\$ 16,839	\$ 12,302	\$ (28,428)

The reconciliation of the provision for income taxes to the expected income tax provision based on statutory rates for the years ended December 31, 2005, 2004 and 2003 is as follows (in thousands):

	2005	2004	2003
Provision Federal statutory rate of 35%	\$ 15,183	\$ 10,159	\$ 6,358
Increase (decrease) in income taxes resulting from:			
State taxes	1,898	1,577	(3,764)
Other	293	238	(270)
Research credits	(1,482)	(1,309)	(3,403)
Federal rate change			(970)
Valuation allowance			(27,434)
Reassessment of contingency reserve and deferred tax asset	947	1,637	1,055
Income tax provision	\$ 16,839	\$ 12,302	\$ (28,428)

The income tax provision excludes income tax deductions related to the issuance of common stock from stock options and employee stock purchase plan transactions for which no compensation expense was recorded for accounting purposes. For the years ended December 31, 2005, 2004 and 2003, the income tax benefit from these deductions resulted in an increase in additional paid-in capital of \$2.8 million, \$2.5 million and \$11.5 million, respectively. The income tax provision includes recognition of a contingent income tax liability of \$1.2 million, \$2.2 million and \$1.8 million, for the years ended December 31, 2005, 2004 and 2003, respectively, for differences between the as-filed basis and book basis of certain tax assets and liabilities. As of December 31, 2005 and 2004, the cumulative tax contingency reserve of \$5.2 million and \$4.0 million, respectively, is included in current liabilities on the accompanying consolidated balance sheets.

The income tax provision for the year ended December 31, 2004 includes a charge of \$1.2 million to adjust certain tax amounts recorded in 2003. This \$1.2 million charge resulted in a decrease to deferred tax assets of \$793,000, an increase in the tax contingency reserve of \$2.1 million, and a decrease in additional paid-in capital of \$1.7 million.

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The reversal of the prior year valuation allowance of \$37.7 million in the fourth quarter of 2003 resulted in a deferred tax benefit of \$31.3 million, a net increase in goodwill of \$1.1 million related to the acquisition of ViFi, IView and ATA and an increase in additional paid-in capital of \$7.5 million for income tax deductions related to stock options exercised prior to 2003. The initial purchase price allocation for Magnet resulted in deferred tax assets at December 31, 2003 of approximately \$20.6 million related primarily to acquired net operating loss carry-forwards and deferred tax liabilities of approximately \$4.7 million for acquired intangible assets based on the preliminary purchase price allocation. In 2004, the deferred tax asset attributable to the acquisition of Magnet was reduced by \$294,000 and goodwill was increased by this same amount in conjunction with the final purchase price allocation.

The components of the Company's deferred tax assets consist of temporary differences comprised of the following (in thousands):

	December 31,	
	2005	2004
Deferred tax assets:		
Net operating loss carryforwards	\$ 29,754	\$ 43,887
Research and other credit carryforwards	11,098	9,587
Stock compensation	124	504
Accruals, reserves and other	1,458	4,071
Deferred tax assets	\$ 42,434	\$ 58,049
Deferred tax liabilities:		
Amortization of acquired intangible assets	(4,037)	(7,384)
Property and equipment	(1,970)	(2,682)
Deferred tax liabilities	\$ (6,007)	\$ (10,066)

As of December 31, 2005, the Company had net operating loss carryforwards for federal and state income tax purposes of \$77.3 million and \$32.7 million, respectively. The net operating loss carryforwards expire if unused in years 2006 through 2023. Under the provisions of the Internal Revenue Code of 1986, as amended, certain substantial changes in ownership may limit the amount of net operating loss carryforwards that could be utilized annually in the future to offset taxable income. As of December 31, 2005, the Company had research and other credit carryforwards for federal and state income tax purposes of \$8.4 million and \$2.7 million, respectively, that will begin to expire in 2011 for federal income tax purposes. These credits do not expire for state income tax purposes, however.

10. COMMON STOCK WARRANTS

During the year ended December 31, 2003, the Company granted warrants to purchase 56,250 shares of common stock to a third party service provider in connection with an executive search at an exercise price of \$19.27 per share, the fair market value on the date of grant. The Company recorded an expense of \$345,000

Table of Contents

DIGITAL INSIGHT CORPORATION

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

based on the fair value of the warrants on date of grant using the Black-Scholes pricing model. The warrants were exercised in May 2005.

Warrants assumed in connection with the acquisition of ATA in 2000, to purchase 5,283 shares of common stock at an exercise price of \$25.95 per share, remain outstanding at December 31, 2005. These warrants expire in 2009.

11. STOCK-BASED COMPENSATION PLANS

Options under the Company's stock-based compensation plans may be granted for periods of up to ten years, with the exception of an incentive stock option (ISO) granted to an optionee who owns stock representing more than 10% of the voting power of all classes of stock of the parent or subsidiary, in which case the term of the option shall be five years, provided that (i) the exercise price of an ISO and nonqualified stock option (NSO) shall not be less than 100% and 85% of the estimated fair value of the shares on the date of grant, respectively, and (ii) the exercise price of an ISO and NSO granted to a 10% shareholder shall not be less than 110% of the estimated fair value of the shares on the date of grant. Options generally vest in monthly installments over four years following the date of grant, subject to the optionee's continuous service. However, for first time grants, and, beginning in 2004, follow-on grants, the initial vesting shall occur twelve months from the vesting start date, at which time 25% of the shares will be vested. The remaining shares vest monthly over the remaining three years.

Restricted stock grants

During the year ended December 31, 2005, the Company issued a total of 165,171 shares of restricted stock to certain of its employees. On the grant dates, the restricted stock had a total fair value of \$4.5 million. The restricted stock awards vest over four years. The Company is amortizing the fair value of the restricted stock awards over the vesting period. For the year ended December 31, 2005, \$371,000 was recorded as stock-based compensation expense related to these restricted stock grants.

During the year ended December 31, 2004, the Company issued a total of 34,000 shares of restricted stock to two of its officers. On the grant dates, the restricted stock had a total fair value of \$560,000. The restricted stock awards vest over two years for one officer and four years for the other officer. The Company is amortizing the fair value of the restricted stock awards over the vesting periods. For the year ended December 31, 2005 and 2004, \$154,000 and \$18,000, respectively, were recorded as stock-based compensation expense related to these restricted stock grants.

Non-Plan option grant

During the year ended December 31, 2003, the Company granted 675,000 options to purchase common stock to the new Chairman, President, and Chief Executive Officer. These shares are registered for issuance, but the grant was outside of the plans described below. These shares have an exercise price of \$19.27 per share, which equals the fair value on the date of grant, and vest in accordance with the provisions for first time grants set forth above.

1997 Stock Plan

In August 1997, the Company adopted the 1997 Stock Plan (the 1997 Plan). The 1997 Plan provides for the granting of stock options and common stock to employees and consultants of the Company. Options granted

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

under the 1997 Plan may be either ISOs or NSOs. ISOs may be granted only to Company employees (including officers and directors who are also employees). NSOs may be granted to Company employees and consultants. As of December 31, 2005, the Company has reserved 3,000,000 shares of common stock for issuance under the 1997 Plan. At December 31, 2005, there were 573,665 shares of common stock available for future grant under the 1997 Plan.

1999 Stock Plan

In June 1999, the Company adopted the 1999 Stock Incentive Plan (the 1999 Plan). At December 31, 2005, the Company has reserved 7,500,000 shares of common stock for issuance under the 1999 Plan. The 1999 Plan allows grants of ISOs, NSOs and restricted stock to employees, non-employee board members and consultants. At December 31, 2005, there were 1,498,735 shares of common stock available for future grant under the 1999 Plan. The 1999 Plan is subject to annual increases on March 1 of each year, equal to the lesser of 750,000 shares, 5% of the Company's shares outstanding on that date, or a lesser amount determined by the board of directors.

2001 Non-Employee Director Stock Option Plan

On May 3, 2001, the Company adopted the 2001 Non-Employee Director Stock Option Plan, which provides for the granting of stock options to outside directors who are not employees of the Company. The options granted under this plan are NSOs. At December 31, 2005, the Company has reserved 383,900 shares of common stock for issuance under this plan. The plan is subject to annual increases on March 1 of each year, equal to the lesser of 50,000 shares, 1/10 of one percent of the outstanding common shares on such date, or a lesser amount determined by the board of directors. As of December 31, 2005, there were 39,457 shares of common stock available for future grant under this Plan.

Option plans of acquired companies

In connection with the acquisitions of IView, ATA and ViFi, the Company assumed their stock option plans, including incentive and non-statutory stock options to purchase an aggregate of 472,884 shares of common stock with exercise prices ranging from \$0.19 to \$36.25 per share. Options granted under these plans are exercisable over a maximum term of ten years from the date of grant and generally vest over periods of up to four years. At December 31, 2005 there were 557,319 shares of common stock available for future grant. The Company does not intend to grant any additional options under these plans.

Summary of Stock Options

Stock option activity for the years ended December 31, 2005, 2004, and 2003 is as follows:

	2003		2004		2005	
	Options Outstanding	Exercise Price Per Share	Options Outstanding	Exercise Price Per Share	Options Outstanding	Exercise Price Per Share
Beginning of year	5,143,038	\$ 0.19-\$83.88	5,285,499	\$ 0.19-\$83.88	4,895,534	\$ 0.19-\$83.88
Granted	1,553,075	\$ 8.42-\$24.88	1,039,250	\$ 13.63-\$26.12	1,168,230	\$ 16.00-\$33.12
Cancelled	(541,483)	\$ 4.71-\$78.50	(581,822)	\$ 4.71-\$73.31	(624,372)	\$ 4.71-\$83.88
Exercised	(869,131)	\$ 0.19-\$20.46	(847,393)	\$ 0.19-\$19.73	(779,280)	\$ 0.19-\$29.75
End of year	5,285,499	\$ 0.19-\$83.88	4,895,534	\$ 0.19-\$83.88	4,660,112	\$ 0.19-\$83.88

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

All options granted during the years ended December 31, 2005, 2004, and 2003 were granted with exercise prices that were equal to the estimated fair value of the shares on the grant date. Options outstanding and exercisable by price range as of December 31, 2005 are as follows:

Range of Exercise Prices	Options Outstanding		Weighted-Average Exercise Price	Options Exercisable	
	Outstanding	Weighted-Average Remaining Contractual Life		Exercisable	Weighted-Average Exercise Price
\$ 0.00 \$ 8.50	39,695	4.5	\$5.63	36,994	\$5.43
\$ 8.51 \$17.00	2,359,028	7.9	\$14.74	1,004,400	\$13.98
\$17.01 \$25.50	1,523,328	7.4	\$20.69	980,081	\$20.82
\$25.51 \$34.00	257,001	8.6	\$28.33	57,747	\$29.97
\$34.01 \$42.50	369,703	4.4	\$38.03	369,703	\$38.03
\$42.51 \$51.00	13,500	4.1	\$45.04	13,500	\$45.04
\$51.01 \$59.50					
\$59.51 \$68.00	33,000	4.2	\$61.50	33,000	\$61.50
\$68.01 \$76.50	61,857	4.1	\$73.28	61,857	\$73.28
\$76.51 \$84.00	3,000	4.1	\$80.00	3,000	\$80.00
	4,660,112	7.4	\$20.44	2,560,282	\$22.59

Options exercisable at December 31, 2004 and 2003 were 2,813,498 and 2,630,142, respectively, at weighted average exercise prices of \$22.98 and \$22.36 per share, respectively.

1999 Employee Stock Purchase Plan

On June 21, 1999, the Company adopted the 1999 Employee Stock Purchase Plan (the Purchase Plan), which provides for the issuance of a maximum of 1,500,000 shares of common stock. Eligible employees can have up to 15% of their earnings withheld, up to certain maximums, to be used to purchase shares of the Company's common stock on every May 1 and November 1 of each year. The price of the common stock purchased under the Purchase Plan is equal to 85% of the lower of the fair market value of the common stock on the offering date of each two-year offering period or the specified purchase date. During the years ended December 31, 2005, 2004 and 2003, 206,567, 250,497 and 180,023 shares were purchased for \$2.8 million, \$2.5 million, and \$1.6 million, respectively. At December 31, 2005, there were 802,856 shares of common stock available for future purchase.

This Purchase Plan is subject to annual increases on March 1 of each year, equal to the lesser of 300,000 shares, 2% of the Company's shares outstanding on that date, or a lesser amount determined by the board of directors.

Stock option modification

In September 2003, the Company modified the original terms of certain stock option grants to the former President, Chairman, CEO and current member of the Board of Directors in accordance with an employment

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

agreement through December 31, 2004. In connection with this modification, the Company measured and recorded \$784,000 of deferred stock compensation based on the difference between the fair market value of common stock on the date of the modification and the exercise price of the options benefited. The deferred compensation expense was amortized over the service period through December 31, 2004. Amortization expense of \$722,000 and \$62,000 was recognized in 2004 and 2003, respectively.

Fair value assumptions

As described in Note 2, the Company applies the provisions of APB 25 and related interpretations in accounting for employee stock-based compensation arrangements.

The Company calculated the fair value of each option grant on the date of grant using the Black-Scholes pricing model as specified in SFAS No. 123 using the following weighted-average assumptions:

	Year Ended December 31,		
	2005	2004	2003
Expected life (years)	3.5	3.5	5
Risk free interest rate	3.56%	2.85%	3.25%
Expected volatility	63%	63%	80%
Dividend yield			

The Black-Scholes pricing model was developed for use in estimating the fair value of traded options. The assumptions used in option valuation models are highly subjective. Because changes in the subjective input assumptions can materially affect the Company's estimate of fair value, existing valuation models, in management's opinion, do not provide a reliable single measure of the fair value of its employee stock options.

The weighted average estimated fair value of stock options granted during the years ended December 31, 2005, 2004 and 2003 were \$9.17, \$6.65 and \$18.55 per share, respectively.

12. EMPLOYEE BENEFITS

Effective September 1, 1998, the Company adopted a Defined Contribution Profit Sharing Plan (the Plan). The Plan includes a 401(k) salary deferral plan. Employees are eligible to participate in the Plan through salary deferrals upon meeting minimum eligibility requirements. The Plan allows the Company to make matching contributions to an employee's deferrals and provides for additional discretionary contributions by the Company. During 2005 and 2004, the Company matched 50% of employee contributions up to 2% of their salary resulting in an expense of \$366,000, \$328,000 and \$243,000 for the years ended December 31, 2005, 2004 and 2003, respectively. In 2006, the Company will continue to make matching contributions equal to 50% of employee contributions up to 2% of their salary.

13. RESTRUCTURING

In December 2005, the Company initiated restructuring activities involving the outsourcing of the call center associated with the lending division and realigning certain resources to enhance profitability in the lending division. As a result of these restructuring activities, the Company will reduce space utilized at one of its facilities, dispose of certain related assets and eliminate approximately 90 employee positions. The Company expects that the call center migration and the work force reduction will continue in phases until fully transitioned by March 31, 2006. In 2005, the Company recorded charges of \$245,000 for severance related payments and \$185,000 related to asset disposals and other related costs.

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

The costs related to the restructuring were as follows:

	Total Costs Expected to be Incurred	Costs Incurred for the Three Months Ended December 31, 2005	Cumulative Costs Incurred through December 31, 2005
One-time termination benefits	\$ 948	\$ 245	\$ 245
Contract termination costs	118		
Other associated costs	1,222	185	185
Total	\$ 2,288	\$ 430	\$ 430

The restructuring activity has resulted in the following accrual as of December 31, 2005:

	Total Restructuring Charges Accrued, Net	Payments as of December 31, 2005	Balance at December 31, 2005
One-time termination benefits	\$ 245	\$ (82)	\$ 163
Other associated costs	6	(6)	
Total	\$ 251	\$ (88)	\$ 163

As of December 31, 2005, total restructuring liabilities amounted to \$163,000 and are included in accrued compensation and related benefits in the 2005 accompanying consolidated balance sheet. We are likely to incur future restructuring charges throughout the first half of 2006.

In March 2002, the Company initiated restructuring activities to optimize its cost structure. These plans included restructuring its operations by geographically consolidating certain business functions including customer service, web services, and software development. As a result of this restructuring process, the Company reduced space utilized at three facilities, terminated 57 employees, and relocated or reassigned 18 employees. In 2002, the Company recorded a charge of \$850,000 for severance payments and \$1,230,000 for the facilities closures related to these restructuring activities.

A summary of the restructuring accrual is as follows (in thousands):

	Employee Related	Exit Costs	Deferred Stock-based Compensation	Total
Restructuring accrual, December 31, 2002	\$ 213	\$ 186	\$	\$ 399
Cash payments	(88)	(218)		(306)
Transfer to exit costs	(125)	125		
Restructuring accrual, December 31, 2003		93		93
Cash payments		(27)		(27)

Edgar Filing: DIGITAL INSIGHT CORP - Form 10-K

Restructuring accrual, December 31, 2004	\$	\$ 66	\$	\$ 66
Cash payments		(66)		(66)
Restructuring accrual, December 31, 2005	\$	\$	\$	\$

14. REPORTABLE SEGMENTS

The Company manages its business through three reportable segments: Internet banking, business banking and lending. General and administrative expenses, interest and other income, and the income tax provision

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

(benefit) are managed on a company wide basis and are excluded from the results of the business segments. General and administrative expenses are included in unallocated.

The results of operations from these reportable segments were as follows for the years ended December 31, 2005, 2004 and 2003 (in thousands):

	Internet Banking	Business Banking (1)	Lending	Unallocated (2)	Total
Year ended December 31, 2005:					
Revenue	\$ 173,253	\$ 28,640	\$ 12,078	\$	\$ 213,971
Cost of revenue	69,931	11,158	8,739		89,828
Gross profit	103,322	17,482	3,339		124,143
Operating expenses	35,092	13,145	5,044	30,595	83,876
Income (loss) from operations	68,230	4,337	(1,705)	(30,595)	40,267
Year ended December 31, 2004:					
Revenue	\$ 151,873	\$ 22,942	\$ 14,076	\$	\$ 188,891
Cost of revenue	63,204	11,234	9,838		84,276
Gross profit	88,669	11,708	4,238		104,615
Operating expenses ⁽³⁾	34,153	10,362	4,201	27,712	76,428
Income (loss) from operations	54,516	1,346	37	(27,712)	28,187
Year ended December 31, 2003:					
Revenue	\$ 129,282	\$ 8,360	\$ 16,720	\$	\$ 154,362
Cost of revenue	58,537	4,241	9,791		72,569
Gross profit	70,745	4,119	6,929		81,793
Operating expenses ⁽³⁾	32,024	2,623	3,675	25,861	64,183
Income (loss) from operations	38,721	1,496	3,254	(25,861)	17,610

(1) Amounts for the year ended December 31, 2003 include the operating results of Magnet from the acquisition date of November 25, 2003 as follows: Revenue, \$1,256; Cost of revenue, \$571; Gross profit, \$685; Operating expenses, \$806; and Loss from operations, \$121.

(2) Unallocated amounts include intangible asset amortization, asset impairment and other charges and general and administrative expenses that are not included in the measure of segment profit or loss used internally to evaluate the segment operating results.

(3) Unallocated operating expenses include \$7,784, \$8,284 and \$5,868, respectively, of intangible asset amortization and \$22,811, \$19,428 and \$19,993, respectively, of general and administrative expenses for the years ended December 31, 2005, 2004 and 2003.

The Company assesses the performance of its assets in the aggregate and accordingly assets are not presented on a segment basis.

For the years ended December 31, 2005, 2004 and 2003, no customer comprised more than 10% of total revenues. The Company has no significant foreign operations.

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****15. EARNINGS PER SHARE**

The following table sets forth the computation of basic and diluted net income (loss) per share for the years indicated (in thousands, except per share data):

	Year Ended December 31,		
	2005	2004	2003
Net income	\$ 26,541	\$ 16,723	\$ 46,594
Denominator for basic calculation	34,698	35,364	32,991
Dilutive effect of options outstanding	919	496	709
Denominator for diluted calculation	35,617	35,860	33,700
Basic net income per share	\$ 0.76	\$ 0.47	\$ 1.41
Diluted net income per share	\$ 0.75	\$ 0.47	\$ 1.38

Common stock equivalents that are not included in the diluted net income per share calculation above because to do so would be anti-dilutive for the periods indicated are as follows (in thousands):

	Year Ended December 31,		
	2005	2004	2003
Warrants		56	19
Employee stock options	941	2,211	1,874
	941	2,267	1,893

Table of Contents**DIGITAL INSIGHT CORPORATION****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****16. QUARTERLY FINANCIAL INFORMATION (Unaudited)**

The following table presents summarized quarterly financial data as reported for the years ended December 31, 2005 and 2004 (in thousands, except per share data).

2005	Quarter Ended			
	Mar. 31	June 30	Sept. 30	Dec. 31
Revenues	\$ 51,747	\$ 52,324	\$ 53,241	\$ 56,659
Gross profit	\$ 29,408	\$ 30,127	\$ 31,096	\$ 33,512
Net income	\$ 5,723	\$ 6,395	\$ 6,818	\$ 7,605
Basic net income per share	\$ 0.16	\$ 0.18	\$ 0.20	\$ 0.22
Shares used in computing basic per share amounts	35,560	34,811	34,122	34,388
Diluted net income per share	\$ 0.16	\$ 0.18	\$ 0.19	\$ 0.21
Shares used in computing diluted per share amounts	35,990	35,765	35,465	35,901

2004	Quarter Ended			
	Mar. 31	June 30	Sept. 30	Dec. 31 (1)
Revenues	\$ 45,679	\$ 46,857	\$ 47,458	\$ 48,897
Gross profit	\$ 24,666	\$ 25,955	\$ 26,321	\$ 27,673
Net income	\$ 4,157	\$ 4,541	\$ 4,140	\$ 3,885
Basic net income per share	\$ 0.12	\$ 0.13	\$ 0.12	\$ 0.11
Shares used in computing basic per share amounts	35,031	35,203	35,433	35,784
Diluted net income per share	\$ 0.11	\$ 0.13	\$ 0.12	\$ 0.11
Shares used in computing diluted per share amounts	36,332	36,085	35,709	36,158

(1) In the quarter ended December 31, 2004, the Company recorded adjustments to increase stock-based compensation and decrease revenues and accrued expenses which decreased our net income by approximately \$444,000.

17. TREASURY STOCK

In October 2004, the Company announced that its Board of Directors had approved a share repurchase program for up to \$25.0 million of the Company's common stock for 12 months. As of March 31, 2005, the Company had repurchased 1,503,244 shares for an aggregate cost of \$25.0 million.

In April 2005, the Company announced another \$25.0 million stock repurchase program approved by the Board of Directors. As of June 30, 2005, the Company repurchased 1,038,100 shares of its common stock for an aggregate purchase price of \$25.0 million.

There are no restrictions on the Company's treasury stock. The repurchased common stock is classified as Treasury stock, at cost in the accompanying consolidated condensed balance sheets.

18. SUBSEQUENT EVENT

In February 2006, the Company announced that its Board of Directors had approved a new \$50 million stock repurchase program which expires in December 2006. As of March 8, 2006, the Company had repurchased 811,000 shares at an aggregate purchase price of \$26.7 million.
