FINANCIAL STATEMENTS OF THE UNITED TECHNOLOGIES CORPORATION

DEFINED CONTRIBUTION RETIREMENT PLAN

Report of Independent Registered Public Accounting Firm

To the Participants and Administrator of the

United Technologies Corporation

Defined Contribution Retirement Plan:

In our opinion, the accompanying statements of net assets available for benefits and the related statement of changes in net assets available for benefits present fairly, in all material respects, the net assets available for benefits of the United Technologies Corporation Defined Contribution Retirement Plan (the Plan) at December 31, 2007 and 2006, and the changes in net assets available for benefits for the year ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

As discussed in Note 2 to the financial statements, the Plan adopted FASB Staff Position Nos. AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Audit Guide and Defined Contribution Health and Welfare and Pension Plans* effective January 1, 2006.

UNITED TECHNOLOGIES CORPORATION
DEFINED CONTRIBUTION RETIREMENT PLAN

Notes to Financial Statements

NOTE 1 DESCRIPTION OF THE PLAN

General. The United Technologies Corporation Defined Contribution Retirement Plan (the Plan) is a defined contribution savings and money purchase plan administered by United Technologies Corporation (UTC, the Corporation, the Employer, or the Company). It is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA). Eligible employees of UTC and certain of its subsidiaries were able to participate after completing one year of service. The following is a brief description of the Plan. For more complete information, participants should refer to the prospectus and summary plan description as well as the Plan document which are available from UTC.

During 1998, all active Plan participants became participants of the UTC Employee Savings Plan II. As of December 31, 2003, the UTC Employee Savings Plan II merged into the United Technologies Corporation Employee Savings Plan. Previously accumulated participant balances will remain in the Plan. No additional contributions will be made to the Plan. Participants will continue to be able to direct or withdraw their remaining investment balances in accordance with Plan provisions.

Contributions and Vesting. No participant or employer contributions were made during the 2007 and 2006 Plan years. All participants are fully vested in the Plan. Participants direct investment of their account balances into the various investment options offered by the Plan through the United Technologies Corporation Employee Savings Plan Master Trust (Master Trust). Through the Master Trust, the Plan offers 20 mutual funds, seven commingled index funds, one stable value fund, and a company stock fund as investment options to participants. The Master Trust also includes a money market fund that is primarily used for transitioning or merging plans.

Participant Accounts. Each participant's account is credited with Plan earnings and losses based on their respective account balances. The benefit to which a participant is entitled is the benefit that can be provided from the participant's vested account.

Trustee and Recordkeeper. The Plan trustee holds all of the Plan's assets. State Street Bank and Trust (Trustee) is the Plan trustee. Fidelity Institutional Retirement Services Company (Fidelity) provides recordkeeping and sub-trustee services.

Voting Rights. Common Stock held in the UTC Common Stock Fund is voted by the Trustee at shareowner meetings of UTC in accordance with the confidential instructions of the participants whose accounts are invested in these funds. All shares of employer stock in the UTC Common Stock Fund for which the Trustee receives voting instructions from participants to whose accounts the shares are allocated are voted in accordance with those instructions. All employer stock in the UTC Common Stock Fund for which the Trustee does not receive timely voting instructions are voted by the Trustee in accordance with the timely instructions it receives with respect to a plurality of the shares in the UTC Common Stock Fund.

Payment of Benefits. Generally, upon termination, benefits may be left in the Plan or paid in a lump sum or other distribution option to a terminating participant. At the participant's election, the portion of a lump sum distribution attributable to an investment in the UTC Common Stock Fund may be paid in shares of UTC Common Stock instead of cash. There were no distributions in UTC Common Stock for the year ended December 31, 2007.

NOTE 2 SUMMARY OF ACCOUNTING PRINCIPLES

Basis of Accounting. The financial statements of the Plan are prepared under the accrual method of accounting.

Master Trust. The Plan's assets are kept in the Master Trust maintained by the Trustee. Under the Master Trust agreement, the assets of certain employee savings plans of UTC are combined. Participating plans purchase units of participation in the underlying investment funds based on their contribution to such funds and the unit value of the applicable investment fund at the end of the trading day in which a transaction occurs. The unit value of each fund is determined at the close of each day by dividing the sum of uninvested cash, accrued income and the current value of investments by the total number of outstanding units in such funds. Income from the funds' investments, other than the UTC Common Stock Fund, increases the participating plans' unit values. UTC Common Stock Fund dividends increase the Plan's units in that fund. Distributions to participants reduce the number of participation units held by the participating plans (see [Note 4](#)).

Table of Contents

Fully Benefit-Responsive Investment Contracts. As of December 31, 2006, the Plan adopted Financial Accounting Standards Board Staff Position Nos. FSP AAG INV-1 and SOP 94-4-1, Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined Contribution Health and Welfare and Pension Plans (the FSP). The FSP required investment contracts held by a defined contribution plan to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit-responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of a defined contribution plan. The Plan invests in investment contracts through the Master Trust. The statements of net assets available for benefits presents the fair value of the investment in the Master Trust as well as the adjustment of the investment in the Master Trust from fair value to contract value relating to these investment contracts. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Investment Valuation and Income Recognition. The Plan's investments in the Master Trust are generally stated at fair market value. Investment funds are stated at net asset value per unit or share as determined by the Trustee utilizing published market data, as applicable. The fair value of the stable value fund's investments, which are guaranteed investment contracts (GICs), was calculated by discounting the related cash flows based on current yields of similar instruments with comparable durations. Individual assets of the investment contracts were valued at representative quoted market prices. The fair value of the wrap contracts for the GICs was determined using the Market Price Replacement Cost approach, which incorporated the difference between current market rates for contract wrap fees and the wrap fees being charged; the difference was calculated as a dollar value. UTC, in collaboration with the insurance companies, calculated the fair value to be \$0 at December 31, 2007 and 2006. As fully benefit-responsive investment contracts, the stable value fund's investments are also stated at contract value (the amount available to pay benefits). Contract value includes contributions plus earnings, less Plan withdrawals and expenses. Participant loans are valued at cost, which approximates market value.

Purchases and sales of securities are recorded on a trade-date basis. Dividends are recorded on the ex-dividend date.

Plan Expenses. Plan administrative expenses, including Plan trustee and recordkeeper fees were paid directly by the Employer in 2007.

Payment of Benefits. Benefit payments to participants or beneficiaries are recorded upon distribution.

Use of Estimates. The preparation of the Plan's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of net assets available for benefits and changes therein during the reporting period and, when applicable, disclosures of contingent assets and liabilities at the dates of the financial statements. Actual results could differ from those estimates.

Risks and Uncertainties. Through the Master Trust the Plan provides for various investment options in any combination of stocks, bonds, mutual funds and other investment securities. Investment securities are exposed to various risks, such as interest rate, market and credit. Due to the level of risk associated with certain investment securities and the level of uncertainty related to changes in the value of investment securities, it is at least reasonably possible that changes in risks in the near term would materially affect participants' account balances and the amounts reported in the statements of net assets available for benefits and the statement of changes in net assets available for benefits.

NOTE 3 INVESTMENT CONTRACTS WITH INSURANCE COMPANIES

Through the Master Trust the Plan invests in a stable value fund that invests in GICs with insurance companies. Under these contracts, each insurance company guarantees repayment in full of the principal amount plus interest credited at a fixed rate for a specified period. Interest is credited to each contract based on an annual interest rate set each year by the individual insurance companies. The insurance companies provide assurances that future adjustments to the crediting rate cannot result in a crediting rate less than zero. This rate, which differs among contracts, takes into account any difference between prior year credited interest and the actual amount of investment earnings allocable to the contract in accordance with the established allocation procedures of the insurance company. The crediting rate is primarily based on the current yield-to-maturity of the covered investments, plus or minus amortization of the difference between the market value and contract value of the covered investments over the duration of the covered investments at the time of computation. There are no reserves against contract value for credit risk.

Certain events could limit the ability of the Plan to transact at contract value with the issuer. Such events include the following: (i) certain amendments to the Plan documents that adversely impact the stable value fund; (ii) introduction of an investment option that competes with the stable value fund; (iii) certain Plan sponsor events (e.g. a significant divestiture) that cause a significant withdrawal from the Plan; (iv) the failure of the trust to qualify for exemption from federal income taxes; or, (v) material breach of contract provisions. UTC does not believe that the occurrence of any such event, which would limit the Plan's ability to transact at contract value with participants, is probable. Certain events

enable issuers to terminate their contracts with UTC and settle at an amount other than contract value. Under each contract, UTC has the option to address and cure any such event within a specified period of time. UTC does not believe that the occurrence of any such event is probable.

Table of Contents

The average yield of the GICs based on actual earnings was approximately 5.7% and 5.8% for the year ended December 31, 2007 and 2006, respectively. The average yield of the GICs based on interest rate credited to participants was approximately 6.35% and 6.0% for the year ended December 31, 2007 and 2006, respectively.

NOTE 4 INVESTMENT IN MASTER TRUST

UTC has entered into a Master Trust agreement with the Trustee. Under this agreement, certain savings plans of UTC combine their trust fund investments in the Master Trust.

Participating plans purchase units of participation in the investment funds based on their contribution to such funds along with income that the investment funds may earn, less distributions made to the plans participants. The Plan's interest in the net assets of the Master Trust was less than 1 percent at December 31, 2007 and 2006.

The following is a summary of the financial information and data for the Master Trust and the portion attributable to the Plan:

Plan interest in net appreciation and investment income of Master Trust	\$	1,374
Distributions to participants or beneficiaries	\$	(907)

Table of Contents

NOTE 5 RELATED-PARTY TRANSACTIONS

Fidelity and the Trustee manage certain Plan investment options. These transactions qualify as party-in-interest transactions.

The Master Trust holds common shares of UTC, the Plan sponsor, and these qualify as exempt party-in-interest transactions.

The Plan invests in the UTC Common Stock Fund (the Fund), which is comprised of a short-term investment fund component and shares of common stock of UTC. The unit values of the Fund are recorded and maintained by Fidelity. During the year ended December 31, 2007, the Plan purchased units of the Fund in the approximate amount of \$187,000, sold units of the Fund in the approximate amount of \$433,000, and had net appreciation on the Fund in the approximate amount of \$349,000. The total value of the Plan s interest in the Fund was approximately \$1,789,000 and \$1,687,000 at December 31, 2007 and 2006, respectively.

NOTE 6 PLAN TERMINATION

Although it has not expressed any intent to do so, UTC has the right under the Plan to terminate the Plan subject to the provisions of ERISA.

NOTE 7 RECONCILIATION OF FINANCIAL STATEMENTS TO FORM 5500

Fully benefit-responsive GICs are recorded on the Form 5500 at contract value while in the Plan s financial statements these investments are presented at fair value with an adjustment to contract value.

NOTE 8 TAX STATUS

The Internal Revenue Service has determined and informed UTC by letter dated April 28, 2003, that the Plan is designed in accordance with applicable sections of the Internal Revenue Code (IRC). The Plan has been amended since receiving the determination letter. However, the Plan administrator believes that the Plan is designed and currently being operated in compliance with the applicable requirements of the IRC.

NOTE 9 NEW ACCOUNTING PRONOUNCEMENT

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements, which is effective for fiscal years beginning after November 15, 2007 and for interim periods within those years. This statement defines fair value, establishes a framework for measuring fair value and expands the related disclosure requirements. The Plan has evaluated the new statement and has determined that it will not have a significant impact on the net assets available for benefits.
