QUAKER CHEMICAL CORPORATION

(Exact name of Registrant as specified in its charter)

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Pennsylvania
(State or other jurisdiction of
incorporation or organization)

23-0993790
(I.R.S. Employer
Identification No.)

One Quaker Park, 901 E. Hector Street,

Conshohocken, Pennsylvania
(Address of principal executive offices)

19428 2380
(Zip Code)

Registrant's telephone number, including area code: 610-832-4000

Not Applicable

Former name, former address and former fiscal year, if changed since last report.

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer (Do not check if smaller reporting company) Smaller reporting Company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

Number of Shares of Common Stock

Outstanding on March 31, 2010

Quaker Chemical Corporation

Notes to Condensed Consolidated Financial Statements

(Dollars in thousands, except per share amounts)

(Unaudited)

Note 1 Condensed Financial Information

The condensed consolidated financial statements included herein are unaudited and have been prepared in accordance with generally accepted accounting principles in the United States for interim financial reporting and the United States Securities and Exchange Commission regulations. Certain information and footnote disclosures normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, the financial statements reflect all adjustments (consisting only of normal recurring adjustments, except as discussed below) which are necessary for a fair statement of the financial position, results of operations and cash flows for the interim periods. Certain reclassifications of prior years data have been made to improve comparability. The results for the three months ended March 31, 2010 are not necessarily indicative of the results to be expected for the full year. These financial statements should be read in conjunction with the Company's Annual Report filed on Form 10-K for the year ended December 31, 2009.

Effective January 1, 2010, the Venezuelan economy was considered to be hyperinflationary under generally accepted accounting principles in the United States, since it has experienced a rate of general inflation in excess of 100% over the latest three-year period, based upon the blended Consumer Price Index and National Consumer Price Index. Accordingly, all gains and losses resulting from the remeasurement of the Company's Venezuelan 50% equity affiliate (Kelko Quaker Chemical, S.A.) are required to be recorded directly in the statement of operations. On January 8, 2010, the Venezuelan government announced the devaluation of the Bolivar Fuerte and the establishment of a two-tiered exchange structure. As a result of the devaluation, the Company recorded a charge of approximately \$0.03 per diluted share, in the first quarter of 2010.

The Company has been and will recognize certain accelerated and other costs in accordance with the retirement of the Company's former CEO. The Company expects to incur a final charge of \$1,265 later in 2010 related to the former CEO's supplemental retirement income plan.

As part of the Company's chemical management services, certain third-party product sales to customers are managed by the Company. Where the Company acts as principal, revenue is recognized on a gross reporting basis at the selling price negotiated with customers. Where the Company acts as agent, such revenue is recorded using net reporting as service revenues, at the amount of the administrative fee earned by the Company for ordering the goods. Third-party products transferred under arrangements resulting in net reporting totaled \$12,559 and \$4,831 for the three months ended March 31, 2010 and 2009, respectively.

Note 2 Recently Issued Accounting Standards

The FASB updated its guidance regarding a vendor's multiple-deliverable arrangements in October 2009. The updated guidance establishes a selling price hierarchy to be followed in determining the selling price for each deliverable in multiple-deliverable arrangements, eliminates the residual method of allocation and requires that arrangement consideration be allocated at the inception of the arrangement using the relative selling price method and requires enhanced disclosure regarding multiple-deliverable arrangements. The guidance is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning after June 15, 2010. The Company is currently assessing the impact of this guidance on its financial statements.

Note 3 Restructuring and Related Activities

In the first quarter of 2009, Quaker's management implemented a restructuring program totaling \$2,289. The Company completed the initiatives under this program during 2009.

Note 4 Income Taxes and Uncertain Income Tax Positions

The Company's low first quarter effective tax rate of 24% reflects the expiration of applicable statutes of limitations for uncertain tax positions of approximately \$0.11 per diluted share. The tax benefit recorded in the first quarter of 2009 reflects no tax provided on the gain related to the Company's disposition of land in Europe due to the utilization of net operating losses not previously benefited.

Table of Contents

Quaker Chemical Corporation

Notes to Condensed Consolidated Financial Statements - Continued

(Dollars in thousands, except per share amounts)

(Unaudited)

The FASB's guidance regarding accounting for uncertainty in income taxes prescribes the recognition threshold and measurement attributes for financial statement recognition and measurement of tax positions taken or expected to be taken on a tax return. The guidance further requires the determination of whether the benefits of tax positions will be more likely than not sustained upon audit based upon the technical merits of the tax position. For tax positions that are determined to be more likely than not sustained upon audit, a company recognizes the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement in the financial statements. For tax positions that are not determined to be more likely than not sustained upon audit, a company does not recognize any portion of the benefit in the financial statements. Additionally, the guidance provides for derecognition, classification, penalties and interest, accounting in interim periods, disclosure and transition.

At December 31, 2009, the Company's cumulative liability for gross unrecognized tax benefits was \$10,686. As of March 31, 2010, the Company's cumulative liability for gross unrecognized tax benefits was \$9,978.

The Company continues to recognize interest and penalties associated with uncertain tax positions as a component of taxes on income in its Consolidated Statement of Income. The Company had accrued \$1,850 for cumulative interest and \$911 for cumulative penalties at December 31, 2009. The Company has recognized (\$104) for interest and \$118 for penalties on its Consolidated Statement of Income for the three-month period ended March 31, 2010 and at that date, the Company had accrued \$1,649 for cumulative interest and \$992 for cumulative penalties.

During the quarter ended March 31, 2010, the Company derecognized several uncertain tax positions due to expiration of the applicable statutes of limitations for certain tax years. As a result, the Company recognized a \$923 decrease in its cumulative liability for gross unrecognized tax benefits. The Company estimates that during the year ended December 31, 2010 it will reduce its cumulative liability for gross unrecognized tax benefits by approximately \$1,800 to \$1,900 due to the expiration of the statute of limitations with regard to certain tax positions. This estimated reduction in the cumulative liability for unrecognized tax benefits does not consider any increase in liability for unrecognized tax benefits with regard to existing tax positions or any increase in cumulative liability for unrecognized tax benefits with regard to new tax positions for the year ended December 31, 2010.

The Company and its subsidiaries are subject to U.S. Federal income tax, as well as the income tax of various state and foreign tax jurisdictions. Tax years that remain subject to examination by major tax jurisdictions include the Netherlands and United Kingdom from 2004, Italy, Brazil, China and Spain from 2005, United States from 2006, France from 2008, and various domestic state tax jurisdictions from 1993.

Note 5 Fair Value Measurements

The FASB's guidance regarding fair value measurements establishes a common definition for fair value to be applied to guidance requiring use of fair value, establishes a framework for measuring fair value, and expands disclosure about such fair value measurements. The guidance does not require any new fair value measurements, but rather applies to all other accounting guidance that requires or permits fair value measurements.

The guidance utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as quoted prices (unadjusted) in active markets for identical assets or liabilities.

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

The Company values its interest rate swaps, company-owned life insurance policies and various deferred compensation assets and liabilities at fair value. The Company's assets and liabilities subject to fair value measurement are as follows (in thousands):

Total	\$ 3,376	\$ 1,032	\$ 2,344	\$

The fair values of Company-owned life insurance (COLI) and COLI deferred compensation assets are based on quotes for like instruments with similar credit ratings and terms. The fair values of Other deferred compensation assets and liabilities are based on quoted prices in active markets, with the exception of the fixed general account, which is based on quotes for like instruments with similar credit ratings and terms. The fair values of interest rate derivatives are based on quoted market prices from various banks for similar instruments. Upon review of the underlying assets upon which the deferred compensation liabilities are based, the Company reclassified the fixed general account from Level 1 to Level 2 as of December 31, 2009.

Note 6 Hedging Activities

The Company is exposed to the impact of changes in interest rates, foreign currency fluctuations, changes in commodity prices and credit risk. The Company does not use derivative instruments to mitigate the risks associated with foreign currency fluctuations, changes in commodity prices or credit risk. Quaker uses interest rate swaps to mitigate the impact of changes in interest rates. The swaps convert a portion of the Company's variable interest rate debt to fixed interest rate debt and are designated as cash flow hedges and reported on the balance sheet at fair value. The effective portions of the hedges are reported in Other Comprehensive Income (OCI) until reclassified to earnings during the same period the hedged item affects earnings. The Company has no derivatives designated as fair value hedges and only has derivatives designated as hedging instruments under the FASB's guidance. The notional amount of the Company's interest rate swaps was \$40,000 as of March 31, 2010 and December 31, 2009.

Information about the Company's interest rate derivatives is as follows (in thousands of dollars):

Balance Sheet Location	Fair Value	
	March 31, 2010	December 31, 2009
Derivatives designated as cash flow hedges:		
Interest rate swaps	\$ 753	\$ 1,006

	Other Income	\$	\$

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements - Continued****(Dollars in thousands, except per share amounts)****(Unaudited)****Note 7 Stock-Based Compensation**

The Company recognized approximately \$727 of share-based compensation expense for the three months ended March 31, 2010. The compensation expense was comprised of \$95 related to stock options, \$292 related to nonvested stock awards, \$11 related to the Company's Employee Stock Purchase Plan, \$297 related to the Company's non elective 401(k) matching contribution in stock, and \$32 related to the Company's Director Stock Ownership Plan. The Company also recognized \$321 of excess tax benefits related to stock option exercises in the first quarter of 2010.

Based on historical experience, the Company has assumed a forfeiture rate of 13% on the nonvested stock. The Company will record additional expense if the actual forfeiture rate is lower than estimated, and will record a recovery of prior expense if the actual forfeiture is higher than estimated.

The Company has a long-term incentive program (LTIP) for key employees which provides for the granting of options to purchase stock at prices not less than market value on the date of the grant. Most options become exercisable between one and three years after the date of the grant for a period of time determined by the Company not to exceed seven years from the date of grant for options issued in 1999 or later. Common stock awards issued under the LTIP program are subject only to time vesting over a three to five-year period. In addition, as part of the Company's Global Annual Incentive Plan (GAIP), nonvested shares may be issued to key employees, which generally vest over a two to five-year period.

Stock option activity under all plans is as follows:

	Number of Shares	Weighted Average Exercise Price per Share	Weighted Average Remaining Contractual Term (years)
Balance at December 31, 2009	526,508	\$ 16.66	
Options granted	110,939	18.82	
Options exercised	(5,871)	13.25	
Options expired	(4,800)	20.18	
Balance at March 31, 2010	626,776	\$ 17.05	4.0
Exercisable at March 31, 2010	387,795	\$ 19.32	2.6

As of March 31, 2010, the total intrinsic value of options outstanding was approximately \$6,164, and the total intrinsic value of exercisable options was \$2,933. Intrinsic value is calculated as the difference between the current market price of the underlying security and the strike price of a related option.

A summary of the Company's outstanding stock options at March 31, 2010 is as follows:

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Range of Exercise Prices	Number Outstanding at 3/31/2010	Weighted Average Contractual Life	Weighted Average Exercise Price	Number Exercisable at 3/31/2010	Weighted Average Exercise Price
\$5.33 - \$7.98	162,919	5.9	\$ 6.93	52,262	\$ 6.93
\$7.99 - \$18.62					
\$18.63 - \$21.28	313,344	4.0	19.33	185,020	19.63
\$21.29 - \$23.94	131,513	2.1	22.82	131,513	22.82
\$23.95 - \$26.60	19,000	1.0	26.05	19,000	26.05
	626,776	4.0	17.05	387,795	19.32

As of March 31, 2010, unrecognized compensation expense related to options granted during 2008 was \$60, for options granted during 2009 was \$216 and for options granted in 2010 was \$647.

During the first quarter of 2010, the Company granted 110,939 stock options under the Company's LTIP plan that are subject only to time vesting over a three-year period. The options were valued using the Black-Scholes model with the following assumptions: dividend yield of 5.1%, expected volatility of 53.72%, a risk free interest rate of 2.85%, an expected term of six years, and a forfeiture rate of 3% over the remaining life of the options. Approximately \$38 of expense was recorded on these options during the first quarter of 2010. The fair value of these awards is amortized on a straight-line basis over the vesting period of the awards.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements - Continued****(Dollars in thousands, except per share amounts)****(Unaudited)**

Under the Company's LTIP plan, 158,207 shares of nonvested stock were outstanding at December 31, 2009. In the first quarter of 2010, 41,204 shares of nonvested stock were granted at a weighted average grant date fair value of \$18.82. As of March 31, 2010, no shares were forfeited, 16,600 shares vested and 182,811 were outstanding. The fair value of the nonvested stock is based on the trading price of the Company's common stock on the date of grant. The Company adjusts the grant date fair value for expected forfeitures based on historical experience for similar awards. As of March 31, 2010, unrecognized compensation expense related to these awards was \$1,341, to be recognized over a weighted average remaining period of 2.22 years.

Under the Company's GAIP plan, 69,675 shares were outstanding at December 31, 2009. Through March 31, 2010, no shares were granted, 4,375 shares vested, 750 shares were forfeited and 64,550 shares were outstanding. As of March 31, 2010, unrecognized compensation expense related to these awards was \$332, to be recognized over a weighted average remaining period of 2.0 years.

Employee Stock Purchase Plan

In 2000, the Board adopted an Employee Stock Purchase Plan (ESPP) whereby employees may purchase Company stock through a payroll deduction plan. Purchases are made from the plan and credited to each participant's account at the end of each month, the Investment Date. The purchase price of the stock is 85% of the fair market value on the Investment Date. The plan is compensatory and the 15% discount is expensed on the Investment Date. All employees, including officers, are eligible to participate in this plan. A participant may withdraw all uninvested payment balances credited to a participant's account at any time by giving written notice to the Committee. An employee whose stock ownership of the Company exceeds five percent of the outstanding common stock is not eligible to participate in this plan.

2003 Director Stock Ownership Plan

In March 2003, the Company's Board of Directors approved a stock ownership plan for each member of the Company's Board to encourage the Directors to increase their investment in the Company. The Plan was effective on the date it was approved and remains in effect for a term of ten years or until it is earlier terminated by the Board. The maximum number of shares of Common Stock which may be issued under the Plan is 75,000, subject to certain conditions that the Compensation/Management Development Committee (the Committee) may elect to adjust the number of shares. As of December 31, 2009, the Committee has not made any elections to adjust the shares under this plan. Each Director is eligible to receive an annual retainer for services rendered as a member of the Board of Directors. Currently, each Director who owns less than 7,500 shares of Company Common Stock is required to receive 75% of the annual retainer in Common Stock and 25% of the annual retainer in cash. Each Director who owns 7,500 or more shares of Company Common Stock receives 25% of the annual retainer in Common Stock and 75% of the annual retainer in cash with the option to receive Common Stock in lieu of the cash portion of the retainer. Currently, the annual retainer is \$32. The number of shares issued in payment of the fees is calculated based on an amount equal to the average of the closing prices per share of Common Stock as reported on the composite tape of the New York Stock Exchange for the two trading days immediately preceding the retainer payment date. The retainer payment date is June 1. The Company recorded \$32 for each of the three months ended March 31, 2010 and 2009.

Note 8 Earnings Per Share

The Company applies FASB's guidance regarding the calculation of earnings per share using the two-class method. The Company includes nonvested stock awards with rights to non-forfeitable dividends as part of its basic weighted average share calculation.

The following table summarizes earnings per share (EPS) calculations:

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

	Three Months Ended March 31,	
	2010	2009
Basic Earnings per Common Share		
Net income attributable to Quaker Chemical Corporation	\$ 9,419	\$ 2
Less: income allocated to participating securities	(202)	(21)
Net income (loss) available to common shareholders	\$ 9,217	\$ (19)
Basic weighted average common shares outstanding	10,879,225	10,745,286
Basic earnings per common share	\$ 0.85	\$ 0.00
Diluted Earnings per Common Share		
Net income attributable to Quaker Chemical Corporation	\$ 9,419	\$ 2
Less: income allocated to participating securities	(201)	(21)
Net income (loss) available to common shareholders	\$ 9,218	\$ (19)
Basic weighted average common shares outstanding	10,879,225	10,745,286
Effect of dilutive securities, common shares outstanding	118,513	
Diluted weighted average common shares outstanding	10,997,738	10,745,286
Diluted earnings per common share	\$ 0.84	\$ 0.00

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements - Continued****(Dollars in thousands, except per share amounts)****(Unaudited)**

The following number of stock options are not included in the diluted earnings per share since in each case the exercise price is greater than the market price and the effect would have been anti-dilutive: 142,413 and 529,608 for the three months ended March 31, 2010 and 2009, respectively.

Note 9 Business Segments

The Company organizes its segments by type of product sold. The Company's reportable segments are as follows:

- (1) Metalworking process chemicals – industrial process fluids for various heavy industrial and manufacturing applications.
- (2) Coatings – temporary and permanent coatings for metal and concrete products and chemical milling maskants.
- (3) Other chemical products – other various chemical products.

Segment data includes direct segment costs as well as general operating costs.

The table below presents information about the reported segments:

	Three Months Ended March 31,	
	2010	2009
Metalworking Process Chemicals		
Net Sales	\$ 121,205	\$ 90,799
Operating Income	25,519	9,639
Coatings		
Net Sales	6,764	7,300
Operating Income	1,408	1,526
Other Chemical Products		
Net Sales	351	408
Operating Income	(57)	(64)
Total		
Net Sales	128,320	98,507
Operating Income	26,870	11,101
Restructuring and related charges		(2,289)
Non-operating expenses	(12,945)	(8,827)
Amortization	(254)	(257)
Interest expense	(1,311)	(1,242)
Interest income	184	153
Other income, net	763	1,454
Consolidated income before taxes and equity in net loss of associated companies	\$ 13,307	\$ 93

Operating income comprises revenue less related costs and expenses. Non-operating items primarily consist of general corporate expenses identified as not being a cost of operation, interest expense, interest income, and license fees from non-consolidated affiliates.

Note 10 Equity, Noncontrolling Interest and Comprehensive Income (Loss)

The following table presents the changes in equity, noncontrolling interest and comprehensive income (loss) for the three months ended March 31, 2010 and 2009:

	Common stock	Capital in excess of par value	Retained earnings	Accumulated other comprehensive loss	Noncontrolling Interest	Comprehensive Income (Loss)	Total
Balance at December 31, 2009	\$ 11,086	\$ 27,527	\$ 123,140	\$ (10,439)	\$ 4,981		\$ 156,295
Net income			9,419		618	\$ 10,037	
Currency translation adjustments				(3,998)	151	(3,847)	
Defined benefit retirement plans				269		269	
Current period changes in fair value of derivatives				105		105	
Unrealized gain on available-for-sale securities				5		5	
Comprehensive income						6,569	6,569
Comprehensive loss attributable to noncontrolling interest						(769)	
Comprehensive income attributable to Quaker Chemical Corporation						\$ 5,800	
Dividends (\$0.23 per share)			(2,565)				(2,565)
Share issuance and equity-based compensation plans	66	796					862
Excess tax benefit from stock option exercises		1,954					1,954
Balance at March 31, 2010	\$ 11,152	\$ 30,277	\$ 129,994	\$ (14,058)	\$ 5,750		\$ 163,115
Balance at December 31, 2008	\$ 10,833	\$ 25,238	\$ 117,089	\$ (27,237)	\$ 3,952		\$ 129,875
Net income			2		200	\$ 202	
Currency translation adjustments				(2,599)	(64)	(2,663)	
Defined benefit retirement plans				289		289	
Current period changes in fair value of derivatives				68		68	
Unrealized loss on available-for-sale securities				(11)		(11)	
Comprehensive loss						(2,115)	(2,115)
Comprehensive loss attributable to noncontrolling interest						(136)	

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Comprehensive loss attributable to Quaker Chemical Corporation \$ (2,251)

Share issuance and equity-based compensation plans 164 257 421

Balance at March 31, 2009 \$ 10,997 \$ 25,495 \$ 117,091 \$ (29,490) \$ 4,088 \$ 128,181

During the first quarter of 2010, the Company recorded \$1,954 of excess tax benefits in capital in excess of par value on its Condensed Consolidated Balance Sheet, related to stock option exercises, which occurred over prior years. Previously, the Company's actual taxable income in affected jurisdictions was not sufficient to recognize these benefits, while the Company's full-year 2010 projection of taxable income is expected to be sufficient to recognize these benefits. As a result, the Company recognized \$321 of these benefits as a cash inflow from financing activities in its Condensed Consolidated Statement of Cash Flows which represents the Company's estimate of cash savings through March 31, 2010.

Note 11 Goodwill and Other Intangible Assets

The changes in carrying amount of goodwill for the three months ended March 31, 2010 are as follows. The Company has recorded no impairment charges in the past:

	Metalworking		
	Process		
	Chemicals	Coatings	Total
Balance as of December 31, 2009	\$ 38,434	\$ 8,081	\$ 46,515
Currency translation adjustments	(1,006)		(1,006)
Balance as of March 31, 2010	\$ 37,428	\$ 8,081	\$ 45,509

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements Continued**

(Dollars in thousands, except per share amounts)

(Unaudited)

Gross carrying amounts and accumulated amortization for definite-lived intangible assets as of March 31, 2010 and December 31, 2009 are as follows:

	Gross Carrying Amount		Accumulated Amortization	
	2010	2009	2010	2009
<u>Amortized intangible assets</u>				
Customer lists and rights to sell	\$ 8,255	\$ 8,373	\$ 4,497	\$ 4,428
Trademarks and patents	1,788	1,788	1,788	1,788
Formulations and product technology	3,278	3,278	2,514	2,450
Other	3,373	3,409	3,223	3,203
Total	\$ 16,694	\$ 16,848	\$ 12,022	\$ 11,869

The Company recorded \$254 and \$257 of amortization expense in the first three months of 2010 and 2009, respectively. Estimated annual aggregate amortization expense for the current year and subsequent five years is as follows:

For the year ended December 31, 2010	\$ 886
For the year ended December 31, 2011	\$ 818
For the year ended December 31, 2012	\$ 721
For the year ended December 31, 2013	\$ 540
For the year ended December 31, 2014	\$ 305
For the year ended December 31, 2015	\$ 305

The Company has one indefinite-lived intangible asset of \$600 for trademarks recorded in connection with the Company's 2002 acquisition of Epar.

Note 12 Pension and Other Postretirement Benefits

The components of net periodic benefit cost are as follows:

	Three Months Ended March 31,			
	Pension Benefits		Other Postretirement Benefits	
	2010	2009	2010	2009
Service cost	\$ 511	\$ 499	\$ 4	\$ 5
Interest cost and other	1,530	1,602	99	143
Expected return on plan assets	(1,384)	(1,183)		

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

Other amortization, net	402	427	13	25
Net periodic benefit cost	\$ 1,059	\$ 1,345	\$ 116	\$ 173

Employer Contributions:

The Company previously disclosed in its financial statements for the year ended December 31, 2009, that it expected to make minimum cash contributions of \$8,578 to its pension plans and \$802 to its other postretirement benefit plan in 2010. As of March 31, 2010, \$3,263 and \$203 of contributions have been made, respectively.

Note 13 Commitments and Contingencies

In April of 1992, the Company identified certain soil and groundwater contamination at AC Products, Inc. (ACP), a wholly owned subsidiary. In voluntary coordination with the Santa Ana California Regional Water Quality Board, ACP has been remediating the contamination, the principal contaminant of which is perchloroethylene (PERC). On or about December 18, 2004, the Orange County Water District (OCWD) filed a civil complaint in Superior Court, in Orange County, California against ACP and other parties potentially responsible for groundwater contamination. OCWD was seeking to recover compensatory and other damages related to the investigation and remediation of the contamination in the groundwater. Effective October 17, 2007, ACP and OCWD settled all claims related to this litigation. Pursuant to the settlement agreement with OCWD, ACP agreed to pay \$2,000 in two equal payments of \$1,000 (the first payment paid October 31, 2007 and the second payment paid on February 15, 2008). In addition to the \$2,000 payment, ACP agreed to operate the two existing groundwater treatment systems associated with its extraction wells P-2 and P-3 so as to hydraulically contain groundwater contamination emanating from ACP s site until such time as the concentrations of PERC are below the Federal maximum contaminant level for four consecutive quarterly sampling events. During the third quarter of 2007, the Company recognized a \$3,300 charge made up of \$2,000 for the settlement of the litigation, plus an increase in its reserve for its soil and water remediation program of \$1,300. As of March 31, 2010, the Company believes that the range of potential-known liabilities associated with ACP contamination including the water and soil remediation program, is approximately \$1,600 to \$2,700, for which the Company has sufficient reserves.

Table of Contents**Quaker Chemical Corporation****Notes to Condensed Consolidated Financial Statements Continued****(Dollars in thousands, except per share amounts)****(Unaudited)**

The low and high ends of the range are based on the length of operation of the two extraction wells as determined by groundwater modeling with planned higher maintenance costs in later years if a longer treatment period is required. Costs of operation include the operation and maintenance of the extraction wells, groundwater monitoring, one-time expenses to insure P-3 is hydraulically containing the PERC plume and program management. The duration of the well operation was estimated based on historical trends in concentrations in the monitoring wells within the proximity of the applicable extraction wells. Also factored into the model was the impact of water injected into the underground aquifer from a planned recharge basin adjacent to the ACP site as well as from an injection well to be installed and operated by OCWD as part of the groundwater treatment system for contaminants which are the subject of the aforementioned litigation. Based on the modeling, it is estimated that P-2 will operate for another two years and P-3 will operate for three years to up to six years. Operation and maintenance costs were based on historical expenditures and estimated inflation. As mentioned above, a significantly higher maintenance expense was factored into the range if the system operates for the longer period. Also included in the reserve are anticipated expenditures to operate an on-site soil vapor extraction system.

The Company believes, although there can be no assurance regarding the outcome of other unrelated environmental matters, that it has made adequate accruals for costs associated with other environmental problems of which it is aware. Approximately \$99 was accrued at March 31, 2010 and December 31, 2009, respectively, to provide for such anticipated future environmental assessments and remediation costs.

An inactive subsidiary of the Company that was acquired in 1978 sold certain products containing asbestos, primarily on an installed basis, and is among the defendants in numerous lawsuits alleging injury due to exposure to asbestos. The subsidiary discontinued operations in 1991 and has no remaining assets other than the proceeds from insurance settlements received. To date, the overwhelming majority of these claims have been disposed of without payment and there have been no adverse judgments against the subsidiary. Based on a continued analysis of the existing and anticipated future claims against this subsidiary, it is currently projected that the subsidiary's total liability over the next 50 years for these claims is approximately \$8,500 (excluding costs of defense). Although the Company has also been named as a defendant in certain of these cases, no claims have been actively pursued against the Company, and the Company has not contributed to the defense or settlement of any of these cases pursued against the subsidiary. These cases were handled by the subsidiary's primary and excess insurers who had agreed in 1997 to pay all defense costs and be responsible for all damages assessed against the subsidiary arising out of existing and future asbestos claims up to the aggregate limits of the policies. A significant portion of this primary insurance coverage was provided by an insurer that is now insolvent, and the other primary insurers have asserted that the aggregate limits of their policies have been exhausted. The subsidiary challenged the applicability of these limits to the claims being brought against the subsidiary. In response, two of the three carriers entered into separate settlement and release agreements with the subsidiary in late 2005 and in the first quarter of 2007 for \$15,000 and \$20,000, respectively. The payments under the latest settlement and release agreement were structured to be received over a four-year period with annual installments of \$5,000, the final installment which was received in the first quarter of 2010. The proceeds of both settlements are restricted and can only be used to pay claims and costs of defense associated with the subsidiary's asbestos litigation. During the third quarter of 2007, the subsidiary and the remaining primary insurance carrier entered into a Claim Handling and Funding Agreement, under which the carrier will pay 27% of defense and indemnity costs incurred by or on behalf of the subsidiary in connection with asbestos bodily injury claims for a minimum of five years beginning July 1, 2007. At the end of the term of the agreement, the subsidiary may choose to again pursue its claim against this insurer regarding the application of the policy limits. The Company also believes, that if the coverage issues under the primary policies with the remaining carrier are resolved adversely to the subsidiary and all settlement proceeds were used, the subsidiary may have limited additional coverage from a state guarantee fund established following the insolvency of one of the subsidiary's primary insurers. Nevertheless, liabilities in respect of claims may exceed the assets and coverage available to the subsidiary.

If the subsidiary's assets and insurance coverage were to be exhausted, claimants of the subsidiary may actively pursue claims against the Company because of the parent-subsidary relationship. Although asbestos litigation is particularly difficult to predict, especially with respect to claims that are currently not being actively pursued against the Company, the Company does not believe that such claims would have merit or that the Company would be held to have liability for any unsatisfied obligations of the subsidiary as a result of such claims. After evaluating the nature of the claims filed against the subsidiary and the small number of such claims that have resulted in any payment, the potential availability of additional insurance coverage at the subsidiary level, the additional availability of the Company's own insurance and the Company's strong defenses to claims that it should be held responsible for the subsidiary's obligations because of the parent-subsidary relationship, the Company

Edgar Filing: QUAKER CHEMICAL CORP - Form 10-Q

believes it is not probable that the Company will incur any material losses. All of the asbestos cases pursued against the Company challenging the parent-sub subsidiary relationship are in the early stages of litigation. The Company has been successful in the past having claims naming it dismissed during initial proceedings. Since the Company may be in this early stage of litigation for some time, it is not possible to estimate additional losses or range of loss, if any.

(Unaudited)

The Company is party to other litigation which management currently believes will not have a material adverse effect on the Company's results of operations, cash flows or financial condition.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Executive Summary

Quaker Chemical Corporation is a leading global provider of process chemicals, chemical specialties, services, and technical expertise to a wide range of industries including steel, automotive, mining, aerospace, tube and pipe, coatings and construction materials. Our products, technical solutions, and chemical management services enhance our customers' processes, improve their product quality, and lower their costs.

The revenue and earnings growth in the first quarter 2010 compared to the first quarter of 2009 was primarily due to a 35% increase in product volumes across the globe as the Company continued to recover from the economic downturn. The gross margin percentage improved due to cost reduction actions, a more favorable raw material cost environment and reduced automotive chemical management services (CMS) revenues reported on a gross basis. The Company's selling, general and administrative expenses increased \$7.0 million primarily due to higher incentive compensation, foreign exchange rate translation and higher selling costs on increased sales.

The first quarter 2010 results included a charge of \$0.03 per diluted share related to devaluation of Venezuelan Bolivar Fuerte, as well as a benefit of \$0.11 per diluted share related to the expiration of applicable statutes of limitations for uncertain tax positions. The first quarter 2009 results included a restructuring charge of \$0.14 per diluted share and a gain of \$0.11 per diluted share related to the disposition of land in Europe.

The net result was earnings per diluted share of \$0.84 for the first quarter of 2010, a considerable improvement over the breakeven results in the first quarter of 2009. The improvement was driven by high steel industry demand in China, Brazil, India and Russia while industrial demand in North America and Europe continues to gradually recover from depressed levels.

While the Company continues to add new business and will benefit from continued improvement in key steel and automotive markets, the Company anticipates somewhat lower product volumes for the second half compared to the first half of 2010. This is primarily due to credit-tightening actions in China, seasonal factors relating to timing of shipments to certain customers, the ending of inventory restocking in the Company's end use markets and the conclusion of tax incentives for automotive purchases in several countries. The combination of somewhat lower expected demand in the second half of 2010, the lag effects as the Company recovers its margins due to higher raw material costs and our continued investment in key growth initiatives will likely dampen earnings over the remaining quarters for 2010. However, the Company expects to deliver strong earnings over the rest of 2010 as the remaining quarters are still expected to equal or exceed the earnings we achieved in 2008 before the global economic crisis began. Longer-term, the Company expects to see good growth in our key markets as we are well positioned in the fastest growing economies as well as the expected above normal growth in the more mature markets as they recover over the coming years.

CMS Discussion

In 2003, the Company began to substantially increase the size and scope of its CMS contracts. The Company currently has more than 50 CMS contracts in North America, as well as additional CMS contracts in other areas of the world. Under its traditional CMS approach, the Company effectively acts as an agent, and the revenues and costs from these sales are reported on a net sales or pass-through basis. Under certain of its CMS contracts, the contracts are structured differently in that the Company's revenue received from the customer is a fee for products and services provided to the customer, which are indirectly related to the actual costs incurred. Under this alternative structure, profit is dependent on how well the Company controls product costs and achieves product conversions from other third-party suppliers to its own products. As a result, under this structure, the Company recognizes in reported revenue the gross revenue received from the CMS site customer, and in cost of goods sold the third-party product purchases, which substantially offset each other until the Company achieves significant product conversions, which may result in a decrease in reported gross margin as a percentage of sales.

In 2009, the Company had a mix of contracts with both the traditional product pass-through structure and fixed price contracts covering all services and products. As a result of the global economic downturn and its impact in the automotive sector, during 2009 and early 2010, the Company has experienced a shift in customer requirements and business circumstances where the majority of CMS contracts have reverted to the traditional product pass-through structure. However, the Company's offerings will continue to include both approaches to CMS.

Liquidity and Capital Resources

Quaker's cash and cash equivalents decreased to \$24.8 million at March 31, 2010 from \$25.1 million at December 31, 2009. The \$0.3 million decrease resulted primarily from \$4.8 million of cash used in operating activities, \$0.3 million of cash provided by investing activities and \$5.4 million of cash provided by financing activities.

Table of Contents

Net cash flows used in operating activities were \$4.8 million in the first quarter of 2010 compared to \$8.2 million of cash provided by operating activities in the first quarter of 2009. The Company's improvement in net income was more than offset by increased investments in working capital. During the first quarter of 2009, the Company experienced significantly lower business activity as a result of the global economic downturn, which, in turn, greatly reduced the Company's investment in working capital. As business volumes continued to increase throughout 2009 and in the first quarter of 2010, the Company's need for working capital investment correspondingly increased. The Company has also been building its safety stock levels of certain inventory in response to shortages and related to the startup of our Middletown, Ohio plant expansion. The timing of incentive compensation payments in the first quarter of 2010 was the most significant factor other than changing business activity affecting the accounts payable and other accrued liabilities comparisons. In 2008, the Company's results were below performance targets for incentive compensation, while in 2009 the Company exceeded performance targets. The Company's first quarter 2009 disposition of land in Europe also impacted the cash flow comparisons.

Net cash flows provided by investing activities were \$0.3 million in the first quarter of 2010 compared to \$0.8 million of cash used in investing activities in the first quarter of 2009. The change in cash flow was driven by the first quarter 2009 final \$1.0 million payment related to the 2005 acquisition of the remaining 40% interest in the Company's Brazilian joint venture, the first quarter 2009 proceeds from disposition of land in Europe and increased 2010 cash flow from the Company's construction fund related to the Company's expansion of its Middletown, Ohio manufacturing facility.

In the first quarter of 2007, an inactive subsidiary of the Company reached a settlement agreement and release with one of its insurance carriers for \$20.0 million. The proceeds of the settlement are restricted and can only be used to pay claims and costs of defense associated with this subsidiary's asbestos litigation. The payments were structured to be received over a four-year period with annual installments of \$5.0 million, the final installment which was received in the first quarter of 2010. During the third quarter of 2007, the same inactive subsidiary and one of its insurance carriers entered into a Claim Handling and Funding Agreement, under which the carrier will pay 27% of the defense and indemnity costs incurred by or on behalf of the subsidiary in connection with asbestos bodily injury claims for a minimum of five years beginning July 1, 2007.

Net cash flows provided by financing activities were \$5.4 million for the first quarter of 2010, compared to \$10.2 million of cash used in financing activities for the first quarter of 2009. The majority of the change was the result of net debt borrowings in 2010 compared to net debt repayments in 2009. In the first quarter of 2010, the Company borrowed primarily to fund working capital needs from increased business activity as well as the timing of payments of incentive compensation. In the first quarter of 2009, the cash flow generated from reduced working capital investments as a result of significantly curtailed business volumes enabled the debt repayments.

The Company's primary credit line is a \$125.0 million syndicated multicurrency credit agreement with Bank of America, N.A. (administrative agent) and certain other major financial institutions, which expires in 2012. At March 31, 2010 and December 31, 2009, the Company had approximately \$54.0 million and \$46.4 million outstanding, respectively. The Company's access to this credit is largely dependent on its consolidated leverage ratio covenant, which could not exceed 3.75 to 1 at March 31, 2010 and December 31, 2009. The Company's consolidated leverage ratio was below 2.0 to 1 at both March 31, 2010 and December 31, 2009. As discussed in a Current Report on Form 8-K filed on February 20, 2009, the Company amended its credit facility to provide covenant relief related to the 2008 and 2009 restructuring programs and the CEO transition costs and temporarily increased the maximum permitted leverage ratio through March 31, 2010. Going forward, the Company's consolidated leverage ratio cannot exceed 3.5 to 1. In February 2009, the Company also amended two Industrial Revenue Bonds totaling \$15.0 million to provide for the same changes in terms as the credit facility. The Company has entered into interest rate swaps with a combined notional value of \$40.0 million as of March 31, 2010, in order to fix a portion of its variable rate debt. Outstanding financial derivative instruments may expose the Company to credit loss in the event of nonperformance by the counterparties to the agreements. To manage credit risk, the Company limits its exposure to any single counterparty. However, the Company does not expect any of the counterparties to fail to meet their obligations.

At March 31, 2010, the Company's gross liability for uncertain tax positions, including accrued interest and penalties, was \$12.6 million. The Company cannot determine a reliable estimate of the timing of cash flows by period related to its uncertain tax position liability. However, should the entire liability be paid, the amount of the payment may be reduced by up to \$6.1 million as a result of offsetting benefits in other tax jurisdictions.

The Company's net debt-to-total-capital ratio remained strong at 24% as of March 31, 2010, compared to 31% as of March 31, 2009 and 20% as of December 31, 2009. The Company believes it is capable of supporting its operating requirements, including pension plan contributions, payments of dividends to shareholders, possible acquisitions and business opportunities, capital expenditures and possible resolution of contingencies, through internally generated funds supplemented with debt or equity as needed.

Operations

Comparison of First Quarter 2010 with First Quarter of 2009

Net sales for the first quarter were \$128.3 million, up 30% from \$98.5 million for the first quarter of 2009. The increase in net sales was a result of higher volumes across the globe as the Company continues to recover from the economic downturn. Product volumes increased 35%, partially offset by a 5% decline in selling price and mix. Foreign exchange rates increased revenues by approximately 7%, which was offset by lower automotive CMS revenue as a result of lower revenue reported on a gross basis. On a sequential quarterly basis product volumes increased by approximately 3%.

Table of Contents

The gross margin percentage of 36.9% represents considerable improvement over the 29.1% reported in the first quarter of 2009. This margin expansion was primarily the result of higher volumes, cost reduction actions taken, a more favorable raw material cost environment and the reduced automotive CMS revenues reported on a gross basis. The increase in gross margin percentage from the fourth quarter of 2009 was due to reduced CMS revenues reported on a gross basis, partially offset by higher costs related to the start-up of the Middletown, Ohio plant expansion, as well as increasing raw material prices and mix.

Selling, general and administrative expenses increased \$7.0 million, or 26%, compared to the first quarter of 2009. Higher incentive compensation in the first quarter of 2010, compared to reductions of incentive compensation accruals in the first quarter of 2009 and foreign exchange rate increases, were the primary drivers of the increase, representing 82% of the increase. Higher commissions on improved sales and increased travel and other costs accounted for the remainder of the increase.

In response to the global economic downturn, the Company initiated restructuring programs and incurred charges of approximately \$2.3 million or approximately \$0.14 per diluted share, in the first quarter of 2009. The Company completed all restructuring initiatives in 2009.

The decrease in other income is primarily due to the first quarter 2009 gain related to the disposition of land in Europe. Equity in net loss of associated companies includes a charge of approximately \$0.03 per diluted share, related to the first quarter 2010 devaluation of the Venezuelan Bolivar Fuerte. The increase in net income attributable to noncontrolling interests is due to stronger financial performances from those affiliates as they continue to recover from the global economic downturn.

The Company's low first quarter 2010 effective tax rate of 24% reflects the expiration of applicable statutes of limitations for uncertain tax positions of approximately \$0.11 per diluted share. The tax benefit recorded in the first quarter of 2009 reflects no tax provided for the land sale gain due to the utilization of net operating losses not previously benefited. The Company has experienced and expects to experience further volatility in its quarterly effective tax rates due to the varying timing of tax audits and the expiration of applicable statutes of limitations as they relate to uncertain tax positions. The Company currently expects additional derecognition of uncertain tax positions of approximately \$0.11 per diluted share to occur later in 2010. However, the Company expects a higher effective tax rate for the full year 2010, compared to the first quarter 2010 rate. During the first quarter of 2010, the Company recorded \$2.0 million of excess tax benefits in capital in excess of par value on its Condensed Consolidated Balance Sheet, related to stock option exercises, which occurred over prior years. Previously, the Company's actual taxable income in affected jurisdictions was not sufficient to recognize these benefits, while the Company's full-year 2010 projection of taxable income is expected to be sufficient to recognize these benefits. As a result, the Company recognized \$0.3 million of these benefits as a cash inflow from financing activities in its Condensed Consolidated Statement of Cash Flows which represents the Company's estimate of cash savings through March 31, 2010. At the end of 2009, the Company had net U.S. deferred tax assets totaling \$16.3 million, excluding deferred tax assets relating to additional minimum pension liabilities. The Company records valuation allowances when necessary to reduce its deferred tax assets to the amount that is more likely than not to be realized. The Company considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for a valuation allowance. However, in the event the Company were to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be a non-cash charge to income in the period such determination was made, which could have a material adverse impact on the Company's financial statements. The global economic downturn has been negatively impacting profitability in certain taxing jurisdictions. The Company continues to closely monitor this situation as it relates to its net deferred tax assets and the assessment of valuation allowances. The Company is continuing to evaluate alternatives that could positively impact taxable income in these jurisdictions.

Segment Reviews - Comparison of the First Quarter 2010 with First Quarter 2009**Metalworking Process Chemicals**

Metalworking Process Chemicals consists of industrial process fluids for various heavy industrial and manufacturing applications and represented approximately 95% of the Company's net sales in the first quarter of 2010. Net sales were up \$30.4 million, or 33%, compared to the first quarter of 2009. Foreign currency translation positively impacted net sales by approximately 8%, driven by the E.U. Euro to U.S. Dollar, and Brazilian Real to U.S. Dollar exchange rates. The average U.S. Dollar to E.U. Euro exchange rate was 1.38 in the first quarter of 2010 compared to 1.31 in the first quarter of 2009, and the average U.S. Dollar to Brazilian Real exchange rate was 0.55 in the first quarter of 2010 compared to 0.43 in the first quarter of 2009. Net sales were positively impacted by increases of 4% in North America, 25% in Europe, 48% in Asia Pacific and 63% in South America, all on a constant currency basis. The increase in this segment's sales was primarily attributable to increased product volumes of 39% impacting all regions as the Company continues to recover from the global economic downturn. The product volume increases were partially offset by a reduction in automotive CMS revenue, which was due, in part, to the renegotiation of certain contracts now reported on a pass-through versus gross basis. Consistent with the significant volume increases, this segment's operating income increased \$15.9 million. This segment's operating income also benefited from savings from the Company's restructuring efforts as well as a more favorable raw material environment.

Table of Contents

Coatings

The Company's coatings segment, which represented approximately 5% of the Company's net sales in the first quarter of 2010, contains products that provide temporary and permanent coatings for metal and concrete products and chemical milling maskants. Net sales for this segment were down \$0.5 million, or 7%, for the first quarter of 2010 compared to the first quarter of 2009, primarily due to reduced volumes of chemical milling maskants sold to the aerospace industry as well as reduced coating sales to the construction industry. This segment's operating income was down \$0.1 million, consistent with the volume decline noted above.

Other Chemical Products

Other Chemical Products, which represented less than 1% of the Company's net sales in the first quarter of 2010, consists of sulfur removal products for industrial gas streams sold by the Company's Q2 Technologies joint venture. Net sales were down \$0.1 million as a result of the downturn in the oil and gas market. Operating income was a slight loss for the first quarter of 2010, reflective of the noted volume decline.

Factors That May Affect Our Future Results

(Cautionary Statements Under the Private Securities Litigation Reform Act of 1995)

Certain information included in this Report and other materials filed or to be filed by Quaker with the SEC (as well as information included in oral statements or other written statements made or to be made by us) contain or may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements can be identified by the fact that they do not relate strictly to historical or current facts. We have based these forward-looking statements on our current expectations about future events. These forward-looking statements include statements with respect to our beliefs, plans, objectives, goals, expectations, anticipations, intentions, financial condition, results of operations, future performance and business, including:

statements relating to our business strategy;

our current and future results and plans; and

statements that include the words may, could, should, would, believe, expect, anticipate, estimate, intend, plan or

Such statements include information relating to current and future business activities, operational matters, capital spending, and financing sources. From time to time, forward-looking statements are also included in Quaker's other periodic reports on Forms 10-K, 10-Q and 8-K, as well as in press releases and other materials released to, or statements made to, the public.

Any or all of the forward-looking statements in this Report and in any other public statements we make may turn out to be wrong. This can occur as a result of inaccurate assumptions or as a consequence of known or unknown risks and uncertainties. Many factors discussed in this Report will be important in determining our future performance. Consequently, actual results may differ materially from those that might be anticipated from our forward-looking statements.

We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise. However, any further disclosures made on related subjects in Quaker's subsequent reports on Forms 10-K, 10-Q and 8-K should be consulted. These forward-looking statements are subject to risks, uncertainties and assumptions about us and our operations that are subject to change based on various important factors, some of which are beyond our control. A major risk is that the Company's demand is largely derived from the demand for its customers' products, which subjects the Company to uncertainties related to downturns in a customer's business and unanticipated customer production planning shutdowns. Other major risks and uncertainties include, but are not limited to, significant increases in raw material costs, worldwide economic and political conditions, foreign currency fluctuations, and terrorist attacks such as those that occurred on September 11, 2001. Furthermore, the Company is subject to the same business cycles as those experienced by steel, automobile, aircraft, appliance, and durable goods manufacturers. These risks, uncertainties, and possible inaccurate assumptions relevant to our business could cause our actual results to differ materially from expected and historical results. Other factors beyond those discussed could also adversely affect us. Therefore, we caution you not to place undue reliance on our forward-looking statements. This discussion is provided as permitted by the Private Securities Litigation Reform Act of 1995.

Table of Contents**Item 3. Quantitative and Qualitative Disclosures About Market Risk.**

Quaker is exposed to the impact of changes of interest rates, foreign currency fluctuations, changes in commodity prices, and credit risk.

Interest Rate Risk. Quaker's exposure to market rate risk for changes in interest rates relates primarily to its short and long-term debt. Most of Quaker's debt is negotiated at market rates which can be either fixed or variable. Accordingly, if interest rates rise significantly, the cost of debt to Quaker will increase. This can have an adverse effect on Quaker, depending on the extent of Quaker's borrowings. As of March 31, 2010, Quaker had \$54.0 million in borrowings under its credit facilities, compared to \$46.4 million at December 31, 2009, at a weighted average borrowing rate of approximately 2.54% (LIBOR plus a spread). The Company uses derivative financial instruments primarily for purposes of hedging exposures to fluctuations in interest rates. The Company does not enter into derivative contracts for trading or speculative purposes. The Company has entered into interest rate swaps in order to fix a portion of its variable rate debt. The swaps had a combined notional value of \$40.0 million and a fair value of \$(2.0) million and \$(2.2) million at March 31, 2010 and December 31, 2009, respectively. As of the date of this Report, the Company is receiving a LIBOR rate and paying an average fixed rate of approximately 5% on its interest rate swaps. Five of the Company's swaps with a notional value of \$25.0 million mature in 2010, while the remaining three swaps with a notional value of \$15.0 million mature in 2012. The counterparties to the swaps are major financial institutions. Outstanding financial derivative instruments expose the Company to credit loss in the event of nonperformance by the counterparties to the agreements. To manage credit risk, the Company limits its exposure to any single counterparty. However, the Company does not expect any of the counterparties to fail to meet their obligations. Reference is made to the information included under in Note 6 of Notes to Condensed Consolidated Financial Statements.

Foreign Exchange Risk. A significant portion of Quaker's revenues and earnings is generated by its foreign operations. These foreign operations also hold a significant portion of Quaker's assets and liabilities. All such operations use the local currency as their functional currency. Accordingly, Quaker's financial results are affected by risks typical of global business such as currency fluctuations, particularly between the U.S. Dollar, the Brazilian Real, the Chinese Renminbi and the E.U. Euro. As exchange rates vary, Quaker's results can be materially affected.

The Company generally does not use financial instruments that expose it to significant risk involving foreign currency transactions; however, the size of non-U.S. activities has a significant impact on reported operating results and the attendant net assets. During the past three most recent fiscal years, sales by non-U.S. subsidiaries accounted for approximately 58% to 62% of consolidated net annual sales.

In addition, the Company often sources inventory among its worldwide operations. This practice can give rise to foreign exchange risk resulting from the varying cost of inventory to the receiving location as well as from the revaluation of intercompany balances. The Company mitigates this risk through local sourcing efforts.

Commodity Price Risk. Many of the raw materials used by Quaker are commodity chemicals, and, therefore, Quaker's earnings can be materially adversely affected by market changes in raw material prices. In certain cases, Quaker has entered into fixed-price purchase contracts having a term of up to one year. These contracts provide for protection to Quaker if the price for the contracted raw materials rises, however, in certain limited circumstances, Quaker will not realize the benefit if such prices decline.

Credit Risk. Quaker establishes allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. If the financial condition of Quaker's customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required. Downturns in the overall economic climate may also tend to exacerbate specific customer financial issues. A significant portion of Quaker's revenues is derived from sales to customers in the U.S. steel and automotive industries, including some of our larger customers, where a number of bankruptcies occurred during recent years and companies have experienced financial difficulties. When a bankruptcy occurs, Quaker must judge the amount of proceeds, if any, that may ultimately be received through the bankruptcy or liquidation process. In addition, as part of its terms of trade, Quaker may custom manufacture products for certain large customers and/or may ship product on a consignment basis. These practices may increase the Company's exposure should a bankruptcy occur, and may require write-down or disposal of certain inventory due to its estimated obsolescence or limited marketability. Customer returns of products or disputes may also result in similar issues related to the realizability of recorded accounts receivable or returned inventory.

Table of Contents

Item 4. Controls and Procedures.

Evaluation of disclosure controls and procedures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Securities Exchange Act of 1934 (the Exchange Act) is accumulated and communicated to the issuer's management, including its principal executive officer and principal financial officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based on their evaluation of such controls and procedures as of the end of the period covered by this Quarterly Report on Form 10-Q, the Company's principal executive officer and principal financial officer have concluded that the Company's disclosure controls and procedures (as defined in Exchange Act Rule 13a-15(e)), are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports it files under the Exchange Act, is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission.

Changes in internal controls. At the end of 2009, subsidiaries representing approximately 80% of consolidated revenue were operational on the Company's global ERP system. The Company is currently in the process of adding additional locations to its global ERP system in 2010. The Company is taking the necessary steps to monitor and maintain its internal control over financial reporting (as defined in Exchange Act Rule 13a-15(f)) during this period of change.
