NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying condensed consolidated financial statements include the accounts of CSB Bancorp, Inc. and its wholly-owned subsidiaries, The Commercial and Savings Bank (the Bank) and CSB Investment Services, LLC (together referred to as the Company or CSB). All significant intercompany transactions and balances have been eliminated in consolidation.

The condensed consolidated financial statements have been prepared without audit. In the opinion of management, all adjustments (which include normal recurring adjustments) necessary to present fairly the Company s financial position at September 30, 2013, and the results of operations and changes in cash flows for the periods presented have been made.

Certain information and footnote disclosures typically included in financial statements prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP) have been omitted. The Annual Report for CSB for the year ended December 31, 2012, contains Consolidated Financial Statements and related footnote disclosures, which should be read in conjunction with the accompanying Consolidated Financial Statements. The results of operations for the period ended September 30, 2013 are not necessarily indicative of the operating results for the full year or any future interim period.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2013-02, *Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. This Update requires that companies present either in a single note or parenthetically on the face of the financial statements, the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source and the income statement line items affected by the reclassification. The new requirements will take effect for public companies in fiscal years, and interim periods within those years, beginning after December 15, 2012. The Company adopted this ASU on January 1, 2013. The effect of adopting this ASU increased our disclosure surrounding reclassification items out of accumulated other comprehensive income.

In July 2013, the FASB issued ASU 2013-10, *Derivatives and Hedging (Topic 815): Inclusion of the Fed Funds Effective Swap Rate (or Overnight Index Swap Rate) as a Benchmark Interest Rate for Hedge Accounting Purposes*. The amendments in this Update permit the Fed Funds Effective Swap Rate (OIS) to be used as a U.S. benchmark interest rate for hedge accounting purposes under Topic 815, in addition to UST and LIBOR. The amendments also remove the restriction on using different benchmark rates for similar hedges. The amendments are effective prospectively for qualifying new or redesignated hedging relationships entered into on or after July 17, 2013. This ASU did not have a significant impact on the Company s financial statements.

In July 2013, the FASB issued ASU 2013-11, *Income Taxes (Topic 740): Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists*. This Update applies to all entities that have unrecognized tax benefits when a net operating loss carryforward, a similar tax loss, or a tax credit carryforward exists at the reporting date. An unrecognized tax benefit, or a portion of an

unrecognized tax benefit, should be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward, a similar tax loss, or a tax credit carryforward, except as follows. To the extent a net operating loss carryforward, a similar tax loss, or a tax credit carryforward is not available at the reporting date under the tax law of the applicable jurisdiction to settle any additional income taxes that would result from the disallowance of a tax position or the tax law of the applicable jurisdiction does not require the entity to use, and the entity does not intend to use, the deferred tax asset for such purpose, the unrecognized tax benefit should be presented in the financial statements as a liability and should not be combined with deferred tax assets. The assessment of whether a deferred tax asset is available is based on the unrecognized tax benefit and deferred tax asset that exist at the reporting date and should be made presuming disallowance of the tax position at the reporting date. The amendments in this Update are effective for fiscal years, and interim periods within those years, beginning after December 15, 2013. For nonpublic entities, the amendments are effective for fiscal years, and interim periods within those years, beginning after December 15, 2014.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

Early adoption is permitted. The amendments should be applied prospectively to all unrecognized tax benefits that exist at the effective date. Retrospective application is permitted. This ASU is not expected to have a significant impact on the Company's financial statements.

There were sixty-eight (68) securities in an unrealized loss position at September 30, 2013, three (3) of which were in a continuous loss position for twelve months or more. At least quarterly, the Company conducts a comprehensive security-level impairment assessment. The assessments are based on the nature of the securities, the extent and duration of the securities in an unrealized loss position, the extent and duration of the loss and management's intent to sell or if it is more likely than not that management will be required to sell a security before recovery of its amortized cost basis, which may be maturity. Management believes the Company will fully recover the cost of these securities. It does not intend to sell these securities and likely will not be required to sell them before the anticipated recovery of the remaining amortized cost basis, which may be maturity. As a result, management concluded that these securities were not other-than-temporarily impaired at September 30, 2013.

Loan Origination/Risk Management

The Company has certain lending policies and procedures in place that are designed to maximize loan income within an acceptable level of risk. Management reviews and approves these policies and procedures on a regular basis. A reporting system supplements the review process by providing management with frequent reports related to loan production, loan quality, concentrations of credit, loan delinquencies and non-performing and potential problem loans. Diversification in the loan portfolio is a means of managing risk associated with fluctuations in economic conditions.

Commercial loans are underwritten after evaluating and understanding the borrower's ability to operate profitably and prudently expand its business. Underwriting standards are designed to promote relationship banking rather than transactional banking. The Company's management examines current and occasionally projected cash flows to determine the ability of the borrower to repay their obligations as agreed. Commercial loans are primarily made based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

Commercial real estate loans are subject to underwriting standards and processes similar to commercial loans, in addition to those of real estate loans. These loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts and the

repayment of these loans is largely dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be adversely affected by conditions in the real estate markets or in the general economy. The properties securing the Company's commercial real estate portfolio are diverse in terms of type. This diversity helps reduce the Company's exposure to adverse economic events that affect any single industry. Management monitors and evaluates commercial real estate loans based on collateral, geography and risk grade criteria. In addition, management tracks the level of owner-occupied commercial real estate loans versus non-owner occupied loans. At September 30, 2013 and December 31, 2012, approximately 80% and 81%, respectively of the outstanding principal balance of the Company's commercial real estate loans were secured by owner-occupied properties.

With respect to loans to developers and builders that are secured by non-owner occupied properties, the Company generally requires the borrower to have had an existing relationship with the Company and have a proven record of success. Construction and land development loans are underwritten utilizing independent appraisal reviews, sensitivity analysis of absorption and lease rates and financial analysis of the developers and property owners. Construction and land development loans are generally based upon estimates of costs and value associated with the completed project. These estimates may be inaccurate.

NOTE 3 LOANS (CONTINUED)

Construction and land development loans often involve the disbursement of substantial funds with repayment substantially dependent on the success of the ultimate project. Sources of repayment for these types of loans may be pre-committed permanent loans from approved long-term lenders, sales of developed property or an interim loan commitment from the Company until permanent financing is obtained. These loans are closely monitored by on-site inspections and are considered to have higher risk than other real estate loans due to their ultimate repayment being sensitive to interest rate changes, governmental regulation of real property, general economic conditions and the availability of long-term financing.

The Company originates consumer loans utilizing a judgmental underwriting process. To monitor and manage consumer loan risk, policies and procedures are developed and modified, as needed, jointly by line and staff personnel. This activity, coupled with relatively small loan amounts that are spread across many individual borrowers, minimizes risk.

The Company maintains an independent loan review department that reviews and validates the credit risk program on a periodic basis. Results of these reviews are presented to management. The loan review process complements and reinforces the risk identification and assessment decisions made by lenders and credit personnel, as well as the Company's policies and procedures.

Loans serviced for others approximated \$59.0 million and \$60.2 million at September 30, 2013 and December 31, 2012, respectively.

Concentrations of Credit

Nearly all of the Company's lending activity occurs within the state of Ohio, including the four (4) counties of Holmes, Stark, Tuscarawas and Wayne, as well as other markets. The majority of the Company's loan portfolio consists of commercial and industrial and commercial real estate loans. As of September 30, 2013 and December 31, 2012, there were no concentrations of loans related to any single industry.

NOTE 3 LOANS (CONTINUED)**Allowance for Loan Losses**

The following table details activity in the allowance for loan losses by portfolio segment for the three and nine month periods ended September 30, 2013 and 2012. Allocation of a portion of the allowance to one category of loans does not preclude its availability to absorb losses in other categories. The increase in the provision for possible loan losses related to commercial loans was affected by a qualitative adjustment for loans rated special mention, as well as changes in volume and credit quality of loans in this category. The provision for possible loan losses related to residential real estate increased during third quarter 2013 as a result of a increase in non performing loans within this category.

NOTE 3 LOANS (CONTINUED)**Troubled Debt Restructurings**

All troubled debt restructurings (TDR s) are individually evaluated for impairment and a related allowance is recorded, as needed. Loans whose terms have been modified as TDR s totaled \$8.2 million as of September 30, 2013, and \$8.7 million as of December 31, 2012, with \$823 thousand and \$718 thousand of specific reserves allocated to those loans, respectively. At September 30, 2013, \$7.5 million of the loans classified as TDR s were performing in accordance with their modified terms. Of the remaining \$736 thousand, all were in nonaccrual of interest status.

None of the loans that were restructured in 2011 or 2012 have subsequently defaulted in the three or nine month periods ended September 30, 2013 and 2012. Loan modifications that are considered TDR s completed during the three and nine month periods ended September 30, 2013 and 2012 were as follows:

	For the Three Months Ended September 30, 2013		
	Number of loans restructured	Pre- Modification Recorded Investment	Post- Modification Recorded Investment
<i>(Dollars in thousands)</i>			
Commercial	1	\$ 7	\$ 7

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes commercial loans individually by classifying the loans as to credit risk. This analysis includes commercial loans with an outstanding balance greater than \$275 thousand and is performed on an annual basis.

The Company uses the following definitions for risk ratings:

Pass. Loans classified as pass (Acceptable, Low Acceptable or Pass Watch) may exhibit a wide array of characteristics but at minimum represent an acceptable risk to the Bank. Borrowers in this rating may have leveraged but acceptable balance sheet positions, satisfactory asset quality, and stable to favorable sales and earnings trends, acceptable liquidity and adequate cash flow. Loans are considered fully collectible and require an average amount of administration. While generally adhering to credit policy, these loans may exhibit occasional exceptions that do not result in undue risk to the Bank. Borrowers are generally capable of absorbing setbacks, financial and otherwise, without the threat of failure.

Special Mention. Loans classified as special mention have material weaknesses that deserve management's close attention. If left uncorrected, these weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Loans that do not meet the criteria for special mention, substandard or doubtful classification, when analyzed individually as part of the above described process are considered to be pass rated loans. As of September 30, 2013 and December 31, 2012, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows:

NOTE 4 FAIR VALUE MEASUREMENTS

The Company provides disclosures about assets and liabilities carried at fair value. The framework provides a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and lowest priority to unobservable inputs. The three broad levels of the fair value hierarchy are described below:

- Level I: Inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets that the Company has the ability to access.
- Level II: Inputs to the valuation methodology include quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in inactive markets; inputs other than quoted prices that are observable for the asset or liability; and inputs that are derived principally from or corroborated by observable market data by corroborated or other means. If the asset or liability has a specified (contractual) term, the Level II input must be observable for substantially the full term of the asset or liability.
- Level III: Inputs to the valuation methodology are unobservable and significant to the fair value measurement.

NOTE 4 FAIR VALUE MEASUREMENTS (CONTINUED)

The following table presents the assets reported on the consolidated statements of financial condition at their fair value as of September 30, 2013 and December 31, 2012, by level within the fair value hierarchy. No liabilities are carried at fair value. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. Equity securities and U.S. Treasury Notes are valued at the closing price reported on the active market on which the individual securities are traded. Obligations of U.S. government agencies, mortgage-backed securities, asset-backed securities, obligations of states and political subdivisions and corporate bonds are valued at observable market data for similar assets.

The following table presents the assets measured on a nonrecurring basis on the Consolidated Balance Sheets at their fair value as of September 30, 2013 and December 31, 2012, by level within the fair value hierarchy. Impaired loans and other real estate are written down to fair value through the establishment of specific reserves. Techniques used to value the collateral that secure the impaired loans include: quoted market prices for identical assets classified as Level I inputs; and observable inputs, employed by certified appraisers, for similar assets classified as Level II inputs. In cases where valuation techniques included inputs that are unobservable and are based on estimates and assumptions developed by management based on the best information available under each circumstance, the asset valuation is classified as Level III inputs.

The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates discounted cash flow and repayment assumptions based on management's best judgment. As a result, these rights are measured at fair value on a nonrecurring basis and are classified within Level III of the fair value hierarchy.

For purposes of the above disclosures of estimated fair value, the following assumptions are used:

Cash and cash equivalents; Loans held for sale; Accrued interest receivable; Short-term borrowings, and Accrued interest payable

The fair value of the above instruments is considered to be carrying value. Classified as Level I in the fair value hierarchy.

Securities

The fair value of securities available-for-sale and securities held-to-maturity which are measured on a recurring basis are determined primarily by obtaining quoted prices on nationally recognized securities exchanges or matrix pricing, which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted prices for the specific securities but rather by relying on securities' relationship to other similar securities. Classified as Level I or Level II in the fair value hierarchy.

NOTE 5 FAIR VALUES OF FINANCIAL INSTRUMENTS (CONTINUED)

Net loans

The fair value for loans is estimated by discounting future cash flows using current market inputs at which loans with similar terms and qualities would be made to borrowers of similar credit quality. Where quoted market prices were available, primarily for certain residential mortgage loans, such market rates were utilized as estimates for fair value. Fair value of non-accrual loans is based on carrying value, classified as Level III.

Bank-owned life insurance

The carrying amount of bank-owned life insurance is based on the cash surrender value of the policies and is a reasonable estimate of fair value, classified as Level I.

Regulatory stock

Regulatory stock includes Federal Home Loan Bank Stock and Federal Reserve Bank Stock. It is not practicable to determine the fair value of regulatory equity securities due to restrictions placed on their transferability. Fair value is based on carrying value, classified as Level II.

Deposits

The fair value of certificates of deposit is based on the discounted value of contractual cash flows. The discount rates are estimated using market rates currently offered for similar instruments with similar remaining maturities, resulting in a Level III classification. Demand, savings, and money market deposit accounts are valued at the amount payable on demand as of quarter end, resulting in a Level I classification.

Other borrowings

The fair value of Federal Home Loan Bank advances are estimated using a discounted cash flow analysis based on the current borrowing rates for similar types of borrowings, resulting in a Level III classification.

The Company also has unrecognized financial instruments at September 30, 2013 and December 31, 2012. These financial instruments relate to commitments to extend credit and letters of credit. The aggregated contract amount of such financial instruments was approximately \$113.6 million at September 30, 2013 and \$107.4 million at December 31, 2012. Such amounts are also considered to be the estimated fair values.

The fair value estimates of financial instruments are made at a specific point in time based on relevant market information. These estimates do not reflect any premium or discount that could result from offering for sale at one time the entire holdings of a particular financial instrument over the value of anticipated future business and the value of assets and liabilities that are not considered financial instruments. Since no ready market exists for a significant portion of the financial instruments, fair value estimates are largely based on judgments after considering such factors as future expected credit losses, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and therefore, cannot be determined with precision. Changes in assumptions could significantly affect these estimates.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

ITEM 2 MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following management's discussion and analysis focuses on the consolidated financial condition of the Company at September 30, 2013 as compared to December 31, 2012, and the consolidated results of operations for the three and nine month periods ended September 30, 2013 compared to the same periods in 2012. The purpose of this discussion is to provide the reader with a more thorough understanding of the Consolidated Financial Statements. This discussion should be read in conjunction with the interim Consolidated Financial Statements and related footnotes contained in Part I, Item 1 of this Quarterly Report.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this Quarterly Report are not historical facts but rather are forward-looking statements that are subject to certain risks and uncertainties. When used herein, the terms anticipates, plans, expects, believes, similar expressions as they relate to the Company or its management are intended to identify forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. The Company's actual results, performance or achievements may materially differ from those expressed or implied in the forward-looking statements. Risks and uncertainties that could cause or contribute to such material differences include, but are not limited to, general economic conditions, interest rate environment, competitive conditions in the financial services industry, changes in law, governmental policies and regulations, and rapidly changing technology affecting financial services. Other factors not currently anticipated may also materially and adversely affect the Company's results of operations, cash flows and financial position. There can be no assurance that future results will meet expectations. While the Company believes that the forward-looking statements in this report are reasonable, the reader should not place undue reliance on any forward-looking statement.

The Company does not undertake, and specifically disclaims any obligation, to publicly revise any forward-looking statements to reflect events or circumstances after the date of such statements or to reflect the occurrence of anticipated or unanticipated events, except as may be required by applicable law.

FINANCIAL CONDITION

Total assets were \$593.9 million at September 30, 2013, compared to \$586.9 million at December 31, 2012, representing an increase of \$7 million, or 1%. This growth was funded by a deposit increase of \$5.4 million, or 1%, during the nine month period ended September 30, 2013 to \$481 million. Cash and cash equivalents decreased \$18 million, or 27%, during the nine months ending September 30, 2013, as a result of funding a \$13 million increase in loans and a \$10 million increase in securities.

During the third quarter 2013, the Company reclassified \$39 million of U.S. Agency and U.S. Agency collateralized mortgage backed obligations from Available for Sale to Held to Maturity. The Company considers the Held to Maturity classification to be more appropriate in a rising interest rate environment as other comprehensive income is no longer negatively impacted by the decline in value on specific bonds as the Company has the ability and the intent to hold the longer-term Agency debt securities and the mortgage-backed securities to maturity. On the date of transfer, the \$1.9 million gross unrealized loss became a discount to the carrying value of the bonds while the net of tax

unrealized loss remained in shareholders' equity in other comprehensive income. The effect on interest income of the accretion of the discount on the bonds is basically offset by the amortization of the other comprehensive loss over the life of the bonds.

Net loans increased \$12 million, or 3%, during the nine months ended September 30, 2013. Commercial loans including commercial real estate loans increased \$19 million, or 8%, while construction and land development loans decreased \$8 million, or 36%, with several construction projects transferring to

permanent financing during the nine month period. Home equity lines increased \$1 million, or 3%, real estate mortgage loans increased \$1 million, or 2%, and consumer loans increased slightly over December 31, 2012. Consumers continued to refinance their mortgage loans for lower long-term rates. During 2012 and the first nine months of 2013 the Bank originated and retained some fifteen-year fixed-rate mortgage loans for its portfolio. Residential mortgage originations for the nine months ended September 30, 2013 were \$20 million as compared to \$26 million for the prior year nine month period. The Bank originates and sells fixed rate thirty year mortgages into the secondary market.

The allowance for loan losses as a percentage of total loans was 1.35% at September 30, 2013, an increase from 1.26% at December 31, 2012. Outstanding loan balances increased 4% to \$377 million at September 30, 2013. A provision of \$630 thousand, partially offset by net charge-offs of \$133 thousand, increased the allowance for loan losses for the nine months ended September 30, 2013.

<i>(Dollars in thousands)</i>	September 30, 2013	December 31, 2012	September 30, 2012
Non-performing loans	\$ 2,368	\$ 3,337	\$ 3,662
Other real estate		25	51
Allowance for loan losses	5,077	4,580	4,661
Total loans	377,434	364,580	352,748
Allowance: loans	1.35%	1.26%	1.32%
Allowance: non-performing loans	2.1 x	1.4 x	1.3 x

The ratio of gross loans to deposits was 78% at September 30, 2013, compared to 77% at December 31, 2012. The increase in this ratio is the result of loan volume increases outpacing increases in deposits during the nine months ended September 30, 2013.

The Company had a net unrealized gain of \$237 thousand within its available for sale portfolio, partially offset by a net unrealized loss of \$1.1 million within its held to maturity portfolio at September 30, 2013, compared to net unrealized gains of \$2.8 million at December 31, 2012. The Company has no exposure to government-sponsored enterprise preferred stocks, collateralized debt obligations or trust preferred securities. Management has considered industry analyst reports, sector credit reports and the volatility within the bond market in concluding that the gross unrealized losses of \$2 million within the available for sale and held to maturity portfolios as of September 30, 2013, were primarily the result of customary and expected fluctuations in the bond market and not necessarily the expected cash flows of the individual securities. As a result, all security impairments detailed above on September 30, 2013, are considered temporary and no impairment loss relating to these securities has been recognized.

Deposits increased \$5 million, or 1%, from December 31, 2012 with non-interest bearing deposits increasing \$13.8 million and interest-bearing deposit accounts decreasing \$8.4 million. Total deposits as of September 30, 2013 are \$27 million above September 30, 2012 deposit balances. On a year over year comparison, increases were recognized in non-interest bearing demand deposits, interest bearing demand deposits and statement and passbook savings accounts

for the period ended September 30, 2013.

Short-term borrowings consisting of overnight repurchase agreements with retail customers increased \$2 million from December 31, 2012 and other borrowings decreased \$161 thousand as the Company used cash from interest-earning deposits in other banks to repay required maturities and monthly payments on advances from the FHLB.

Total shareholders' equity amounted to \$52.0 million, or 8.8% of total assets, at September 30, 2013, compared to \$52.5 million, or 8.9% of total assets, at December 31, 2012. The decrease in shareholders' equity during the nine months ending September 30, 2013 was due to other comprehensive income decreasing \$3 million and dividends declared of \$1.5 million, which were partially offset by net income of \$4 million. The Company and the Bank met all regulatory capital requirements at September 30, 2013.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

RESULTS OF OPERATIONS**Three months ended September 30, 2013 and 2012**

For the quarter ended September 30, 2013, the Company recorded net income of \$1.4 million or \$0.52 per share, as compared to net income of \$1.2 million, or \$0.45 per share for the quarter ended September 30, 2012. The \$176 thousand increase in net income for the quarter was a result of net interest income increasing \$251 thousand and noninterest income increasing \$117 thousand. These gains were partially offset by an increase in noninterest expense of \$106 thousand and an increase in the federal income tax provision of \$82 thousand. Return on average assets and return on average equity were 0.96% and 10.79%, respectively, for the three month period of 2013, compared to 0.86% and 9.41%, respectively for the same quarter in 2012.

Interest income for the quarter ended September 30, 2013, was \$5.2 million representing an \$88 thousand increase, or a 1.7% improvement, compared to the same period in 2012. This increase was primarily due to average loan volume increasing \$27 million for the quarter ended September 30, 2013 as compared to the third quarter 2012. Interest expense for the quarter ended September 30, 2013 was \$558 thousand, a decrease of \$163 thousand, or 23%, from the same period in 2012. The decrease in interest expense occurred primarily due to a decrease of 0.14% in interest rates paid on interest-bearing deposits which decreased from 0.6% in 2012 to 0.5% in 2013 and a rate decrease of .17% on all other borrowings which declined from 1.1% in 2012 to 0.9% for the quarter ended September 30, 2013.

The provision for loan losses for the quarter ended September 30, 2013 was \$210 thousand, compared to a \$206 thousand provision for the same quarter in 2012. The provision for loan losses is determined based on management's calculation of the adequacy of the allowance for loan losses, which includes provisions for classified loans as well as for the remainder of the portfolio based on historical data, including past charge-offs and current economic trends.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Noninterest income for the quarter ended September 30, 2013, was \$1.2 million, an increase of \$117 thousand, or 11%, compared to the same quarter in 2012. Service charges on deposit accounts increased \$8 thousand, or 2%, compared to the same quarter in 2012. Debit card interchange income increased \$3 thousand, or 2%, with greater customer usage. Fees from trust and brokerage services increased \$26 thousand to \$201 thousand for the third quarter 2013 as compared to the same quarter in 2012. The gain on the sale of mortgage loans to the secondary market decreased to \$67 thousand for the quarter ending September 30, 2013, from \$169 thousand in the quarter ended September 30, 2012. Mortgage originations decreased during the quarter as secondary market mortgage refinancings have declined with higher mortgage interest rates.

Noninterest expenses for the quarter ended September 30, 2013 increased \$106 thousand, or 3%, compared to the third quarter of 2012. Salaries and employee benefits increased \$43 thousand, or 2%. Occupancy and equipment expenses decreased \$7 thousand in 2013 over the third quarter of 2012. Other expenses increased \$30 thousand, or 7%, compared to the third quarter 2012.

Federal income tax expense increased \$82 thousand, or 15%, for the quarter ended September 30, 2013 as compared to the third quarter of 2012. The provision for income taxes was \$616 thousand (effective rate of 30%) for the quarter ended September 30, 2013, compared to \$534 thousand (effective rate of 30%) for the quarter ended September 30, 2012. The increase in the expense resulted from improved income.

RESULTS OF OPERATIONS

Nine months ended September 30, 2013 and 2012

Net income for the nine months ended September 30, 2013, was \$4.0 million or \$1.47 per share, as compared to \$3.4 million or \$1.25 per share during the same period in 2012. Return on average assets and return on average equity were 0.93% and 10.18%, respectively, for the nine month period of 2013, compared to 0.82% and 8.95%, respectively for 2012.

Comparative net income increased as net interest income improved to \$14 million for the nine months ended September 30, 2013, an increase of \$825 thousand or 6% from the same period last year. Total noninterest income rose \$239 thousand or 8% to \$3.3 million. The provision for loan losses increased \$13 thousand or 2% during the same comparative period. These improvements were partially offset by higher noninterest expenses for the nine month period ending in 2013 as compared to 2012.

Interest income on loans increased \$540 thousand, or 4%, for the nine months ended September 30, 2013, as compared to the same period in 2012. This increase was primarily due to an average volume increase of \$36 million for the comparable nine month periods. Interest income on securities decreased \$217 thousand, or 9%, as the average volume of securities increased \$4 million for the comparable nine month periods. Interest income on fed funds sold and interest bearing deposits decreased \$45 thousand for the nine months ended September 30, 2013 as the average fed funds sold and due from banks interest bearing balances decreased \$27 million, compared to the same period in 2012.

Interest expense decreased \$547 thousand to \$1.7 million for the nine months ended September 30, 2013, compared to the nine months ended September 30, 2012. Interest expense on deposits decreased \$443 thousand, or 25%, from the same period as last year, while interest expense on short-term and other borrowings decreased \$104 thousand or 21%.

The decrease in interest expense has been caused by lower interest rates being paid across the board on interest-bearing deposit accounts and borrowings. Additionally, during the comparable nine month periods, the Company grew non-interest bearing deposits in 2013. Time deposits continue to renew at lower interest rates, and some depositors have moved monies to savings instruments anticipating higher rates than time deposits. Competition for deposits appears to be decreasing from a year ago with larger money center banks reducing the premium paid for term deposits. The net interest margin increased by 13 basis points for the nine month period ended September 30, 2013, to 3.50%, from 3.37% for the same period in 2012. This margin increase is primarily the result of decreased interest expense and the change in the asset mix from overnight funds to loans.

The provision for loan losses was \$630 thousand during the nine months of 2013, compared to \$617 thousand in the same nine month period of 2012. The provision for loan losses is determined based on management's calculation of the adequacy of the allowance for loan losses, which includes provisions for classified loans as well as for the remainder of the portfolio based on historical data including past charge-offs and current economic trends.

Non-interest income increased \$239 thousand, or 8%, during the nine months ended September 30, 2013, as compared to the same period in 2012. Debit card interchange income decreased \$24 thousand or 4% as a result of decreased servicer revenue during the first nine months of 2013. Service charges on deposits increased \$30 thousand from the same period in 2012 reflecting the increase in fees based on transaction activity.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Decreases were recognized in gains on mortgage loans sold in the secondary market on a year over year basis as refinancing activity decreased with rising mortgage rates.

Non-interest expenses increased \$224 thousand, or 2%, for the nine months ended September 30, 2013, compared to the same period in 2012. The Bank's FDIC deposit premium increased \$24 thousand to \$262 thousand for the nine months ended 2012 reflecting an increase in assets for the nine months ended September 30, 2013 as compared to 2012. Salaries and employee benefits increased \$210 thousand, or 4%, primarily the result of salary increases. Professional fees decreased \$156 thousand, or 25%, as certain employment search fees for Chief Operating Officer and commercial lending positions, as well as fees spent to review the Company's computer operating system in 2012 did not recur in 2013. Occupancy and equipment expense increased \$68 thousand, or 6%, reflecting the increase in depreciation and maintenance as compared to 2012.

The provision for income taxes was \$1.8 million (effective rate of 30%) for the nine months ended September 30, 2013, compared to \$1.5 million (effective rate of 31%) for the nine months ended September 30, 2012.

CAPITAL RESOURCES

The Board of Governors of the Federal Reserve System (the Federal Reserve) has established risk-based capital guidelines that must be observed by financial holding companies and banks. Failure to meet specified minimum capital requirements could result in regulatory actions by the Federal Reserve or Ohio Division of Financial Institutions that could have a material effect on the Company's financial condition or results of operations. Management believes there were no material changes to capital resources as presented in the Company's Annual Report on Form 10-K for the year ended December 31, 2012. As of September 30, 2013 the Company and the Bank met all capital adequacy requirements to which they were subject.

LIQUIDITY

<i>(Dollars in millions)</i>	September 30, 2013	December 31, 2012	Change
Cash and cash equivalents	\$ 49	\$ 67	\$ (18)
Unused lines of credit	44	41	3
Unpledged securities at fair market value	37	59	(22)
	\$ 130	\$ 167	\$ (37)
Net deposits and short-term liabilities	\$ 462	\$ 444	\$ 18
Liquidity ratio	28.2%	37.6%	
Minimum board approved liquidity ratio	20.0%	20.0%	

Liquidity refers to the Company's ability to generate sufficient cash to fund current loan demand, meet deposit withdrawals, pay operating expenses and meet other obligations. Liquidity is monitored by the Company's Asset Liability Committee. Other sources of liquidity include, but are not limited to, purchases of federal funds, advances from the FHLB, adjustments of interest rates to attract deposits and borrowing at the Federal Reserve discount window. Management believes that its sources of liquidity are adequate to meet cash flow obligations for the foreseeable future.

The liquidity ratio declined to 28.2% at September 30, 2013, from 37.6% at December 31, 2012 as a result of the third quarter transfer of bonds from available for sale to held to maturity. Approximately one-third of the bonds in the transfer were not pledged. These unpledged held to maturity bonds will become the first bonds pledged for future requirements and ultimately improve the current liquidity ratio.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements (as such term is defined in applicable Securities and Exchange Commission (the Commission) rules) that are reasonably likely to have a current or future material effect on our financial condition, results of operations, liquidity, capital expenditures or capital resources.

QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

ITEM 3 QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There have been no material changes in the quantitative and qualitative disclosures about market risks as of September 30, 2013, from the disclosures presented in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Management performs a quarterly analysis of the Company's interest rate risk over a twenty-four month horizon. The analysis includes two balance sheet models, one based on a static balance sheet and one on a dynamic balance sheet with projected growth in assets and liabilities. Although the limits set by the board under a static balance sheet assumption were minimally exceeded on December 31, 2012 due to the volume of liquidity held by the Bank, all positions are currently within the Company's board-approved policy.

The following table presents an analysis of the estimated sensitivity of the Company's annual net interest income to sudden and sustained 100 through 400 basis point changes, in 100 basis point changes, in market interest rates at September 30, 2013 and December 31, 2012. The net interest income reflected is for the first twelve months of the modeled twenty-four month period.

CONTROLS AND PROCEDURES

ITEM 4 CONTROLS AND PROCEDURES

With the participation of the Company's management, including its Chief Executive Officer and Chief Financial Officer, the Company has evaluated the effectiveness of its disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this Quarterly Report on Form 10-Q. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that:

- (a) information required to be disclosed by the Company in this Quarterly Report on Form 10-Q would be accumulated and communicated to the Company's management, including its Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure;
- (b) information required to be disclosed by the Company in this Quarterly Report on Form 10-Q would be recorded, processed, summarized and reported within the time periods specified in the Commission's rules and forms; and
- (c) the Company's disclosure controls and procedures are effective as of the end of the period covered by this Quarterly Report on Form 10-Q to ensure that material information relating to the Company and its consolidated subsidiary is made known to them, particularly during the period for which the Company's periodic reports, including this Quarterly Report on Form 10-Q, are being prepared.

CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes during the period covered by this Quarterly Report on Form 10-Q in the Company's internal control over financial reporting (as defined in Rule 13a-15(f) under the Exchange Act) that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
