**Taking into account the effect of capital items. Refer salient features for further detail.*

Dec 2005

turnover

Dec 2005

operating profit

a pleasing performance

Attributable earnings for the first half of the financial year 2006 (the 'interim period') increased by 86% from R3,9 billion to R7,3 billion. Headline earnings per share increased by 67% to R11,58. In US dollar terms, attributable earnings per share of US\$1,81 represented a 76% increase.

IFRS 2, which refers to share-based payments, applied from 1 July 2005 resulted in attributable earnings diluting by R84 million and headline earnings per share reducing by 14 cents during the interim period. Previous years' comparative information has been restated accordingly.

higher international oil prices

Operating profit increased by R4,6 billion (71%) to R11,1 billion. Higher average international oil prices (dated Brent US\$59,21/b versus US\$42,77/b) boosted operating profit by about R2,9 billion, taking into account the negative effect of the Sasol Synfuels oil production hedge incurred in the previous reporting period of R0,7 billion. This benefit was enhanced by the positive impact of the weaker rand (average rate R6,52: US\$1,00 versus R6,21: US\$1,00), which increased operating profit by approximately R0,6 billion. The currency effects manifested themselves across all of Sasol's businesses. The benefit of higher international oil prices was, however, only realised in the energy and fuel-related businesses with adverse effects being experienced in the chemical businesses because of higher oil-derivative feedstock costs. Furthermore, margins were adversely affected in most of the chemical businesses by a reduction in international chemical commodity prices.

major capital projects advanced

Cash flow capital expenditure amounted to R6,1 billion. Major projects advanced included the fuel quality enhancement and polymer expansion project (Project Turbo) in South Africa, the Oryx gas to-liquids (GTL) venture in Qatar and the Arya Sasol polymers project in Iran.

gearing reduced

Gearing (net debt as a percentage of shareholders' equity) reduced from 42% at 31 December 2004 to 29%. Gearing is expected to return to within our targeted range of 30% to 50% by the end of the financial year 2006.

interim dividend increased

The interim dividend declared of R2,80 per share represents a 22% increase compared to the previous interim dividend declared.

sasol mining

The operating profit of Sasol Mining of R636 million was R103 million (19%) better than the previous comparable reporting period, mainly because of slightly higher sales volumes and selling prices.

sasol synfuels

Primarily because of higher oil prices and slightly higher production volumes, Sasol Synfuels achieved an increase in operating profit of 99% to R7 336 million. The increase in production volumes resulted from the shift of a planned shutdown from September 2005 to September 2006. Higher intake of natural gas from

Mozambique also contributed to improved plant stability. Regrettably, a number of short, unscheduled shutdowns occurred during the period under review. The causes are being addressed to avoid reoccurrence.

sasol liquid fuels business (LFB)

Higher refinery margins, improved sales volumes and some benefit from a weaker rand increased operating profit in our liquid fuels business by 47% to R1 125 million.

The expansion of the dual brand (Sasol and Exel) retail network advanced successfully and market share objectives were met.

The proposed merging of our liquid fuels business with Engen was considered at the Competition Tribunal during October 2005. The ruling announced by the Competition Tribunal on 23 February 2006, prohibiting the merger, is being studied and a response is being formulated together with Petronas of Malaysia. The Black Economic Empowerment (BEE) component of this merger advanced successfully with the announcement during the period under review of our broad-based Tshwarisano LFB Investments transaction. Likewise, the implications of the ruling on this transaction are being considered.

sasol gas

Primarily driven by higher selling prices and moderate sales volume increases, both to external customers and Sasol businesses, operating profit increased by 66% to R780 million including a capital profit of R199 million. On 1 July 2005 the South African Government, through its gas pipeline development company iGas, acquired a 25% stake in Republic of Mozambique Pipeline Investments Company (Pty) Limited (ROMPCO), which owns the natural gas pipeline between Mozambique and South Africa.

sasol synfuels international

This business hosts the growth ambitions of the group relating to GTL and coal-to-liquid (CTL) ventures. Its costs are associated with advancing the Qatar and Nigeria GTL projects and evaluating others in accordance with our strategic objective to build these global businesses. Costs rose to R256 million in this period as a direct consequence of increased activity in this respect. We expect our Oryx GTL plant to come into operation during the second quarter of 2006.

sasol olefins and surfactants (O&S)

The operating profit of Sasol O&S of R290 million is R426 million better than the operating loss achieved during the previous comparable reporting period, mainly because of non-recurring impairment costs incurred during the previous period and the reversal of impairment costs relating to the Octene train-3 project that were previously written off. Excluding these capital effects, the operating profit amounted to R169 million, which was R57 million (51%) higher than the first half of the previous financial year.

Oil-derivative feedstock costs reached record high levels although most of these increases were recovered through increased product pricing and continuing cost optimisation initiatives. The results of O&S were also negatively impacted by Hurricane Rita which caused our Lake Charles site to close down for almost a month. Towards the end of the reporting period, detergent-range alcohol prices started to come under pressure in anticipation of significant oleochemical-based capacity additions coming on stream in South East Asia.

sasol polymers

Higher oil-derivative feedstock costs from Sasol Synfuels could not be fully recovered through higher polymer selling prices resulting in significantly depressed margins. Sasol Polymers achieved an operating profit of R394 million, which was 31% lower than the comparable result of the previous period.

sasol solvents

After an extraordinary previous year characterised by unprecedented high selling prices and margins, market conditions in the solvents industry normalised. Operating profit of R516 million was R35 million (6%) lower than the comparable result of the previous reporting period.

other businesses

Sasol Nitro's performance improved because of higher ammonia prices and pleasing results from our explosives business. The fertiliser business experienced trading difficulties because of lower sales resulting from high maize inventories and reduced plantings because of late rains.

The operating profit of Sasol Wax was lower than in the previous period mainly because of currency effects and higher oil-derivative feedstock cost increases that were not recovered through selling prices.

basis of preparation and accounting policies

The condensed consolidated interim financial report for the six months ended 31 December 2005 has been prepared in compliance with the Listings Requirements of the JSE Limited, International Financial Reporting Standards (IFRS) (in particular International Accounting Standard 34 Interim Financial Reporting) and the South African Companies Act, 1973, as amended.

Except as otherwise disclosed, the accounting policies applied in the presentation of the interim financial report are consistent with those applied for the year ended 30 June 2005.

The following accounting standards were adopted by Sasol with effect from 1 July 2005:

IFRS2 Share-based payment (with retrospective application);

IFRS4 Insurance contracts;

IAS21 The effect of changes in foreign exchange rates;

IAS24 Related party disclosure;

IAS32 Financial instruments: disclosure and presentation; and

IAS39 Financial instruments: recognition and measurement.

The provisions of IFRS2 Share-based payment have been applied retrospectively and comparative information restated accordingly. IFRS2 requires that every business accounts for the effects of its share-based payment expenses on profit and its financial position, including the effects of share options granted to employees. The effect of the adoption of this standard is set out in the interim financial report. Basic earnings and diluted earnings per share were reduced by 11 cents for the six months ended 31 December 2004 and 22 cents for the year ended 30 June 2005.

The adoption of the remaining standards had no material effect on the financial results and financial position of the group.

Further details will be provided in the annual report for the year ending 30 June 2006.

related party transactions

The group, in the ordinary course of business, enters into various sale and purchase transactions on an arm's length basis at market rates with related parties.

disposal of businesses

On 1 July 2005, a 25% interest in Republic of Mozambique Pipeline Investments Company (Pty) Limited was sold to iGas (Pty) Limited in terms of the shareholders' agreement. A profit of R199 million was realised on this transaction.

The group is advancing the process of preparing its Olefins & Surfactants business for sale.

post-balance sheet date events

The 2006 budget presented by the Minister of Finance, South Africa, made reference to a task force being appointed to investigate a windfall tax which may affect Sasol. The company is still studying the proposals and will be engaging with government to obtain further information on the proposed investigation. Sasol will cooperate with the proposed task force and is confident that, once all of the pertinent facts have been scrutinised, an outcome will result in which the interests of all stakeholders would be addressed.

On 23 February 2006, the South African Competition Tribunal prohibited the merger between Sasol Oil (Pty) Limited and Engen Limited.

changes in contingent liabilities since 30 June 2005

The South African Competition authorities received a complaint against Sasol Oil (Pty) Limited in April 2003. The competition authorities found against Sasol that it was a dominant firm whose conduct met the test required in establishing prohibited price discrimination. The company filed a notice of appeal which was heard and upheld by the South African Competition Appeal Court.

independent review by the auditors

The condensed consolidated balance sheet at 31 December 2005 and the related condensed consolidated statements of income, changes in equity and cash flow for the six months then ended have been reviewed by our auditors, KPMG Inc. Their unmodified review report is available for inspection at the registered

office of Sasol Limited.

profit outlook

Assuming lower oil and commodity chemical prices and a stronger rand relative to the first half, earnings in the second half of the financial year are expected to be considerably lower than the first half year although pleasing growth in earnings for the full financial year is anticipated.

declaration of interim dividend number 53

The directors of Sasol Limited have declared an interim dividend of 280 cents per share (2004: 230 cents per share) for the six months to 31 December 2005. The dividend has been declared in the currency of the Republic of South Africa. The salient dates are:

Forward-looking statements: In this report we make certain statements that are not historical facts and relate to analyses and other information based on forecasts of future results not yet determinable, relating, amongst other things, to exchange rate fluctuations, volume growth, increases in market share, total shareholder return and cost reductions. These are forward-looking statements as defined in the United States Private Securities Litigation Reform Act of 1995. Words such as “believe”, “anticipate”, “intend”, “seek”, “will”, “plan”, “could”, “may”, “endeavour” and “project” and similar expressions are intended to identify such forward-looking statements, but are not the exclusive means of identifying such statements. Forward-looking statements involve inherent risks and uncertainties and, if one or more of these risks materialise, or should underlying assumptions prove incorrect, actual results may be very different from those anticipated. The factors that could cause our actual results to differ materially from such forward-looking statements are discussed more fully in our most recent annual report under the Securities Exchange Act of 1934 on Form 20-F filed on 26 October 2005 and in other filings with the United States Securities and Exchange Commission. Forward-looking statements apply only as of the date on which they are made, and Sasol does not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise.
