FORM 10-K

(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-28167

Alaska Communications Systems Group, Inc.

(Exact name of registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

600 Telephone Avenue

Anchorage, Alaska

(Address of principal executive offices)

Registrant's telephone number, including area code: **(907) 297-3000**

52-2126573

(I.R.S. Employer Identification No.)

99503-6091

(Zip Code)

Securities registered pursuant to Section 12(b) of the Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, Par Value \$.01 per Share	The Nasdaq Stock Market LLC

Securities registered pursuant to Section 12(g) of the Act: **None**

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes [] No [X]

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes [] No [X]

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes [X] No []

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files).

Yes [X] No []

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.
[X]

Edgar Filing: ALASKA COMMUNICATIONS SYSTEMS GROUP INC - Form 10-K

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See definitions of “large accelerated filer,” “accelerated filer,” “smaller reporting company” and “emerging growth company” in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the shares of all classes of voting stock of the registrant held by non-affiliates of the registrant on June 29, 2018 was approximately \$89 million computed upon the basis of the closing sales price of the Common Stock on that date. For purposes of this computation, shares held by directors (and shares held by any entities in which they serve as officers) and officers of the registrant have been excluded. Such exclusion is not intended, nor shall it be deemed, to be an admission that such persons are affiliates of the registrant.

As of March 1, 2019, there were outstanding 53,267,831 shares of Common Stock, \$.01 par value, of the registrant.

Documents Incorporated by Reference

Information required by Part II (Item 5) and Part III (Items 10, 11, 12, 13 and 14) is incorporated by reference to portions of the registrant’s definitive proxy statement for its 2019 Annual Meeting of Stockholders, which will be filed with the Securities and Exchange Commission within 120 days of December 31, 2018.

Cautionary Statement Regarding Forward Looking Statements and Analysts' Reports

This Form 10-K and future filings by Alaska Communications Systems Group, Inc. and its consolidated subsidiaries (“we”, “our”, “us”, the “Company” and “Alaska Communications”) on Forms 10-K, 10-Q and 8-K and the documents incorporated therein by reference include forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. We intend forward-looking statements to be covered by the safe harbor provisions for forward-looking statements. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including statements about anticipated future operating and financial performance, financial position and liquidity, growth opportunities and growth rates, pricing plans, acquisition and divestiture opportunities, business prospects, strategic alternatives, business strategies, regulatory and competitive outlook, investment and expenditure plans, financing needs and availability and other similar forecasts and statements of expectation and statements of assumptions underlying any of the foregoing. Words such as “anticipates”, “believes”, “could”, “estimates”, “expects”, “intend”, “may”, “plans”, “projects”, “seeks”, “should” and variations of these words and similar expressions are intended to identify the forward-looking statements. Forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. Forward-looking statements by us are based on estimates, projections, beliefs and assumptions of management and are not guarantees of future performance. Forward-looking statements may be contained in this Form 10-K under “Item 1A, Risk Factors” and “Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations” and elsewhere. Actual future performance, outcomes, and results may differ materially from those expressed in forward-looking statements made by us as a result of a number of important factors. Examples of these factors include:

- governmental and public policy changes and investigations, including on-going changes in our revenues, or obligations for current and prior periods related to these programs, resulting from regulatory actions affecting inter-carrier compensation, and on-going support for federal and state programs such as Carrier of Last Resort obligations and the rural health care universal service support mechanism such as ascertainment of the “urban rate” and “rural rate” used to determine federal support payments for services we provide to the majority of our rural health care customers for current and prior periods, as well as our ability to comply with the regulatory requirements to contribute to the Universal Service Fund and receive support payments from that fund
- our size, because we are a smaller sized competitor in the markets we serve and we compete against large competitors with substantially greater resources
- our ability to continue to develop attractive, integrated products and services to evolving industry standards, and meet the pressure from competition to offer these services at lower prices
- unforeseen challenges when entering new markets
- our business and operations could be negatively affected as a result of the actions of activist stockholders, which could cause us to incur significant expense, hinder execution of our business strategy and impact our stock price
- the Alaskan economy, which has been impacted by continued low crude oil prices which are creating a significant impact on both the level of spending by the State of Alaska and the level of investment in resource development projects by natural resource exploration and development companies in Alaska. That reduced spending may impact the economy in the markets we serve and impact our future financial performance
- our ability to meet the terms of our financing agreements and to draw down additional funds under the facility to meet our liquidity needs

the ability to attract, recruit, retain and develop the workforce necessary for implementing our business plan
disruptions or failures in the physical infrastructure or operating systems that support our businesses and customers,
or cyber-attacks or security breaches of the physical infrastructure, operating systems or devices that our customers
use to access our products and services

Table of Contents

our ability to keep pace with rapid technological developments and changing standards in the telecommunications industry, including on-going capital expenditures needed to upgrade our network to industry competitive speeds, particularly in light of expected 5G deployments by mobile wireless carriers

- unanticipated damage to one or more of our undersea fiber optic cables resulting from construction or digging mishaps, fishing boats or other reasons
- structural declines for voice and other legacy services within the telecommunications industry
- a maintenance or other failure of our network or data centers
- a failure of information technology systems
- a third-party claim that the Company is infringing upon their intellectual property, resulting in litigation or licensing expenses, or the loss of our ability to sell or support certain products
- unanticipated costs required to fund our post-retirement benefit plans, or contingent liabilities associated with our participation in a multi-employer pension plan
- the success or failure of any future acquisitions or other major transactions
- geologic or other natural disturbances relevant to the location of our operations

the cost and availability of future financing, at the terms, and subject to the conditions necessary, to support our business and pursue growth opportunities; our debt could also have negative consequences for our business; for example, it could increase our vulnerability to general adverse economic and industry conditions, or limit our flexibility in planning for, or reacting to, changes in our business and the telecommunications industry; in addition, our ability to borrow funds in the future will depend in part on the satisfaction of the covenants in our credit facilities; if we are unable to satisfy the financial covenants contained in those agreements, or are unable to generate cash sufficient to make required debt payments, the lenders and other parties to those arrangements could accelerate the maturity of some or all of our outstanding indebtedness

- our success in providing broadband solutions to the North Slope and western Alaska

our ability to maintain our cost structure as a focused broadband and managed information technology (“IT”) services company. Maintaining our cost structure is key to generating cash flow from operating activities. If we fail to effectively manage our costs, our financial condition will be impacted

- our ability to repurchase shares of our Common Stock under our repurchase program
- the success of the Company’s expansion into managed IT services, including the execution of those services for customers
- our internal control over financial reporting may not be effective, which could cause our financial reporting to be unreliable
- the matters described under “Item 1A, Risk Factors”

In light of these risks, uncertainties and assumptions, you should not place undue reliance on any forward-looking statements. Additional risks that we may currently deem immaterial or that are not currently known to us could also cause the forward-looking events discussed in this Form 10-K or our other reports not to occur as described. Except as otherwise required by applicable securities laws, we undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, changed circumstances or any other reason after the date of this Form 10-K.

Investors should also be aware that while we do, at various times, communicate with securities analysts, it is against our policy to disclose to them any material non-public information or other confidential information. Accordingly, investors should not assume that we agree with any statement or report issued by an analyst irrespective of the content of the statement or report. To the extent that reports issued by securities analysts contain any projections, forecasts or opinions, such reports are not our responsibility.

Table of Contents

Basis of Presentation

The Company is a smaller reporting company as defined in the Securities Act and Securities Exchange Act, as amended. Accordingly, it has utilized certain accommodations provided for scaled disclosures in its Annual Report on Form 10-K and proxy statement. Accommodations utilized include (i) a two-year presentation of the audited financial statements and related notes, and management's discussion and analysis of financial condition and results of operations; (ii) reduced disclosures of certain executive compensation and stock performance information; and (iii) not disclosing selected financial data, contractual obligations and quantitative and qualitative disclosures about market risk.

PART I

Item 1. Business

OVERVIEW

We are a fiber broadband and managed IT services provider, offering technology and service enabled customer solutions to business and wholesale customers in and out of Alaska. We also provide telecommunication services to consumers in the most populated communities throughout the state. Our facilities based communications network extends through the economically significant portions of Alaska and connects to the contiguous states via our two diverse undersea fiber optic cable systems. Our network is among the most expansive in Alaska and forms the foundation of service to our customers. We operate in a largely two-player terrestrial wireline market and we estimate our market share to be less than 25% statewide. However, we sponsored a third-party market study in the fourth quarter of 2018 which suggests that our market share in "near net", that is, within one mile of our fiber footprint, may be closer to 40%. This is consistent with our hypothesis that from a revenue performance perspective, relative to our largest competitor we are gaining market share in the markets we are serving.

Our parent company, Alaska Communications Systems Group, Inc., was incorporated in 1998 under the laws of the state of Delaware. Our principal executive offices are located at 600 Telephone Avenue, Anchorage, Alaska 99503-6091. Our telephone number is (907) 297-3000 and our investor internet address is www.alsk.com. Our customer internet address is www.AlaskaCommunications.com.

Markets, Services and Products

We operate our business under a single reportable segment. We manage our revenues based on the sale of services and products to the three customer categories listed below.

Business and Wholesale (broadband, voice and managed IT services)

Consumer (broadband and voice services)

Regulatory (access services, high cost support and carrier termination)

The brand pillars supporting our products and services are reliability, customer service, trustworthiness and local presence. These are represented by the promise we make to our customers: “You can always expect to get the service as promised to you by an Alaska Communications’ representative. If you are not satisfied, we will work with you to provide a solution that meets your satisfaction.”

See “Item 7, Management’s Discussion and Analysis of Financial Condition and Results of Operations,” for a description of our products and services and a summary of service and product revenues generated by each of the above three customer categories.

Table of Contents

Network and Technology

There are two extensive facilities based wireline telecommunications networks in Alaska. We operate one of these networks and General Communication, Inc. (“GCI”) operates the other. We provide high-capacity Ethernet-based services as well as switched and dedicated voice and broadband services. In addition, we offer other value added services such as network hosting, managed IT services and long distance services. We continuously upgrade our network to provide higher levels of performance, higher bandwidth speeds, increased levels of security and additional value added services to our customers. Our networks are monitored for performance around the clock in redundant monitoring centers to provide a high level of reliability and performance. Our fiber network is made up of more than 130,000 terrestrial and submarine fiber miles and serves as the backbone of our network. It is extensive within Alaska’s urban areas and connects our largest markets, including Anchorage, Fairbanks and Juneau with each other and the contiguous states. We have recently added Fixed Wireless towers and technology to reach even more customers. Both offer us the opportunity to provide our customers with a high level of network reliability and speed for voice and broadband applications. We also own and operate one of the most expansive Internet Protocol (“IP”) networks in Alaska using multi-protocol label switching (“MPLS”) and Metro Ethernet technology, along with Software-Defined Networking (“SD-WAN”) capabilities. Our MPLS network provides customers with Quality of Service capabilities and prioritization of data based on data-type over our Metro Ethernet service, which we market to health care, businesses and government customers. Coupled with SD-WAN technology our customers receive highly reliable and highly affordable service. Metro Ethernet offers our customers scalable, high-speed broadband and customized IT products and services, as well as Internet connectivity. We are one of the few Metro Ethernet Forum certified carriers in the nation, providing the highest degree of assurance to our customers regarding the quality of our network and services.

We also own and operate two undersea fiber optic cable systems that connect our Alaskan network to our facilities in Oregon and Washington. These facilities provide the most survivable service to and from Alaska, with key monitoring and disaster recovery capabilities for our customers. We also have usage rights on a third undersea fiber network connected to the lower-48.

Our network in Oregon and Washington includes terrestrial transport components linking our landing stations to a Network Operations Control Center in Hillsboro, Oregon and collocation facilities in Portland, Oregon and Seattle, Washington. In addition, AKORN[®], one of our undersea fiber optic cable systems, connects our Alaska network from Homer, Alaska to our facilities in Florence, Oregon along a diverse path within Alaska, the Pacific Northwest and undersea in the Pacific Ocean. Northstar, our other undersea fiber optic system, has cable landing facilities in Whittier, Juneau, and Valdez, Alaska, and Nedonna Beach, Oregon. Our subsea capacity including the AKORN[®] and Northstar systems provides a total of 7,800 route miles, or about 26,000 fiber miles, of submarine fiber. Together, these fiber optic cables provide extensive bandwidth as well as survivability protection designed to serve our own, as well as our most demanding customers’ critical communications requirements. In 2017, we upgraded the AKORN system to be able to support 100GB circuits for customers and in 2019 we will perform a similar upgrade to the NorthStar system. Through our landing stations in Oregon, we also provide an at-the-ready landing point for other large fiber optic cables, and their operators, connecting the U.S. to networks in Asia and other parts of the world.

In April 2015, we entered into an agreement to purchase a terrestrial fiber network on the North Slope of Alaska. This network allows us to provide broadband solutions to the oil and gas sector in a market that previously had no competition, and continue to advance our sales of managed IT services.

In 2017, we began the development of a satellite earth station network and acquired C-band transponder space on Eutelsat's E115WB satellite. In the fourth quarter of 2017, we began providing Internet backhaul connectivity to our first customer and, in 2018, we continued to provide service to customers in areas of Alaska we were previously not able to support with our terrestrial network.

Another Alaska carrier, Quintillion, has invested in a submarine network with landing stations in several northwest Alaska communities, including a terrestrial route from the North Slope to Fairbanks. The submarine network became operational in late 2017. We have acquired capacity on this system and began delivering service to customers in this area, including a buildout of terrestrial fiber optic cable, in Utqiagvik (formerly Barrow) to serve this new market. We are currently serving customers in Utqiagvik, Nome and Kotzebue.

Competition

Management estimates the Alaska wireline telecom and IT services market to be approximately \$1.65 billion. This market is comprised of the IT services market of approximately \$840 million, the broadband market of approximately \$700 million and the voice market of approximately \$110 million. Management estimates that over 85% of this market opportunity is from the business and wholesale customer segment. We sponsored a third-party market study in the fourth quarter of 2018 that suggests approximately \$250 million of the telecom opportunity is "near net," that is, within one mile of our fiber infrastructure.

Table of Contents

We expect to experience continued growth in managed IT services over time by providing these services to our broadband customers as well as creating new customer relationships. We believe the competition for managed IT services is fragmented.

We face strong competition in our markets from larger competitors with substantial resources. For traditional voice and broadband services, we compete with GCI and AT&T on a statewide basis, and smaller providers such as Matanuska Telephone Association, Inc. on a more localized basis.

As the largest facilities based operator in Alaska, GCI is the dominant statewide provider of broadband, voice, wireless and video services. In the markets where we compete with GCI (broadband and voice), GCI has approximately 50% to 60% of market share across the consumer and business segments. GCI continues to expand its voice and data network, often taking advantage of subsidized government programs which create a monopoly for services in certain markets. AT&T's primary focus is to be the provider of voice and broadband services to its nation-wide customers. AT&T tends to use its existing broadband network to serve these customers or it leases capacity from GCI or Alaska Communications to augment its existing network.

Overall competitive dynamics are significant, and our operating performance is impacted accordingly. For more information associated with the risks of our competitive environment see "Item 1A, Risk Factors."

Marketing

Our marketing strategy relies on our understanding the Alaskan market, while increasingly using digital technologies to focus our marketing messages. We tailor our products and services based on understanding our customers' needs, location, and type of service they desire. For business customers, we bundle our products and provide value added managed IT services using our local service delivery model and highly reliable network. For consumer customers, we focus on offering one flat rate price and no data usage caps for internet services, differentiating ourselves from GCI who charges for excess data usage or throttles bandwidth.

Sales and Distribution Channels

Our sales strategy combines primarily direct distribution channels to retain current customers and drive sales growth. Our focus in 2019 is to continue leveraging our direct sales channels' focus on serving Business and Wholesale customers, our web and contact center channels for consumer customers, and expand our penetration of the military housing market for continued sustained performance. We are also continuing our efforts to improve customer service

and move more consumer transactions to the web.

Customer Base

We generate our revenue through a diverse statewide customer base and there is no reliance on a single customer or small group of customers. Business and wholesale customers are our primary focus and they comprised 62% of our total revenue in 2018. Revenue from our rural health care customers, including the portion funded through the universal service support mechanism, is a component of business and wholesale revenue, and represented approximately 8% of our consolidated revenue in 2018. Regulatory revenue represented 22% of the Company's consolidated revenue in 2018.

Seasonality

We believe our revenue is impacted by seasonal factors. This is due to Alaska's northern latitude and the resulting wide swing in available daylight and weather conditions between summer and winter months. These conditions, unique to Alaska, affect business, tourism and telecom use patterns in the state. Our spending patterns are also impacted by seasonality as we incur more capital spending and operating spending during the summer and early fall periods of the year, reflecting the heightened economic activity from the summer months and our own construction activities during this time period.

Employees

As of December 31, 2018, we employed 584 regular full-time employees, 8 regular part-time employees and 4 temporary employees. Approximately 53% of our employees are represented by the International Brotherhood of Electrical Workers, Local 1547 ("IBEW"). Our Master Collective Bargaining Agreement ("CBA") with the IBEW, which is effective through December 31, 2023, governs the terms and conditions of employment for all IBEW represented employees working for us in the state of Alaska. Management considers employee relations to be generally good.

Table of Contents

Regulation

While a substantial amount of our revenue is derived from non-regulated or non-common carrier services, we continue to generate revenue from services that are regulated. Given the breadth of the regulatory framework, the following summary of the regulatory environment in which our business operates does not describe all present and proposed federal, state and local legislation and regulations affecting the telecommunications industry in Alaska.

Overview

Some of the telecommunications services we provide are subject to extensive federal, state and local regulation. These regulations govern, in part, our rates and the way we conduct our business, including the requirement to offer telecommunications services pursuant to nondiscriminatory rates, terms, and conditions, the obligation to comply with E-911 rules, the Communications Assistance for Law Enforcement Act (“CALEA”), the obligation to safeguard the confidentiality of customer proprietary network information (“CPNI”), as well as our obligation to maintain specialized records and file reports with the Federal Communications Commission (“FCC”) and state regulators. These requirements are subject to frequent change. Compliance is costly, and limits our ability to respond to some of the demands of our increasingly competitive service markets.

We generate revenue from these regulated services through regulated charges to our retail and wholesale customers, access and other charges to other carriers, and federal and state universal service support mechanisms for telecommunications and broadband services. These revenues are recorded throughout our customer categories.

At the federal level, the FCC generally exercises jurisdiction over the interstate and international telecommunications services that regulated common carriers provide and their related communications facilities.

The Regulatory Commission of Alaska (“RCA”) generally exercises jurisdiction over intrastate telecommunications services that originate and terminate at points in Alaska.

In this section, “Regulation”, we refer to our local exchange carrier (“LEC”) subsidiaries individually as follows:

ACS of Anchorage, LLC (“ACSA”);
ACS of Alaska, LLC (“ACSAK”);

ACS of Fairbanks, LLC (“ACSF”); and
ACS of the Northland, LLC (“ACSN”).

Federal Regulation

We must comply with the Communications Act of 1934, as amended (the “Communications Act”) and regulations promulgated thereunder, which together require, among other things, that we offer regulated interstate telecommunications services upon request at just, reasonable and non-discriminatory rates and terms. The Communications Act also requires us to offer competing carriers interconnection and non-discriminatory access to certain facilities and services designated as essential for local competition, and permits the FCC to deregulate us as markets become more competitive. Under the Communications Act we are eligible for support revenues to help defray the cost of providing services in rural, high cost areas, and to low-income consumers, schools and libraries, and rural health care providers. In recent years, the FCC has modified these support mechanisms to incentivize wider availability of affordable broadband Internet access services, and promote additional deployment of equipment, facilities, and systems necessary to support such services. In ongoing administrative rulemaking proceedings, the FCC is continuing to propose changes in the size and scope of these mechanisms, and it is difficult to predict the impact such changes may have on our business.

Rate Regulation

Our LEC subsidiaries are regulated common carriers offering local voice and a limited set of telecommunications data services. In providing these regulated services, these subsidiaries are subject to competitive market forces, as well as rate-of-return regulations for intrastate services that originate and terminate in Alaska and price-cap rate regulation for interstate services regulated by the FCC. Because they face competition, our LEC subsidiaries may not be able to charge their maximum permitted rates under price-cap regulation or realize their authorized intrastate rate of return even where they are rate-of-return regulated. A broader range of data and information services are offered by our unregulated affiliates or as unregulated services by our regulated companies.

Table of Contents

In establishing their costs of regulated telecommunications services, our LEC subsidiaries determine their aggregate costs and place them within an FCC-prescribed Uniform System of Accounts, then allocate those costs between regulated and non-regulated services, then separate the regulated portion of these costs between the state and federal jurisdictions, and finally among specific inter- and intra-state services. This process is governed primarily by the FCC and the RCA rules and regulations. In August 2014, the FCC opened a proceeding to consider whether to modify or eliminate its cost accounting rules. On February 23, 2017, the FCC adopted an Order streamlining its regulatory accounting rules and harmonizing them with generally accepted accounting practices.

In addition, for more than two decades, the FCC has been considering whether to modify or eliminate the current jurisdictional separations process, and it has asked the Federal-State Joint Board on Jurisdictional Separations for recommendations for doing so. For most of that time, the jurisdictional separations rules have remained frozen. In December 2018, the FCC extended the current freeze for six additional years, through December 31, 2024, and directed that Joint Board in the short term to consider amending the jurisdictional separations rules to recognize that the rates of price cap carriers, like Alaska Communications, are no longer subject to them. Nevertheless, these questions remain pending with the FCC. The FCC's decision, when it comes, could indirectly increase or reduce earnings of carriers subject to jurisdictional separations rules by affecting the way costs are divided between regulated and unregulated services, and the way regulated costs are divided between the federal and state jurisdictions. In addition, these changes could affect the ways in which the FCC and RCA evaluate the reasonableness of our regulated rates for telecommunications services.

Regulation of Broadband Internet Access Services

In March 2015, the FCC reclassified mass market broadband Internet access services as a “telecommunications service,” subject to common carrier pricing and other regulations under Title II of the Communications Act, which had historically applied only to traditional telephone service. The FCC thus departed from its long history of treating broadband Internet access services as “information services,” which are subject to far less intrusive federal oversight, though the FCC declared its intention not to require broadband Internet access service providers to file federal “tariffs” or otherwise obtain advance FCC review or approval of the rates, terms, and conditions under which they offer broadband Internet access service. In June 2016, the FCC's decision was upheld on appeal by a panel of the United States Court of Appeals for the District of Columbia Circuit.

On December 14, 2017, the FCC reversed these actions and restored its classification of broadband Internet access service as an “information service” subject to “light touch” federal regulation. The FCC also repealed the broad “Internet Conduct” standard, which had created significant regulatory uncertainty among service providers. By taking these actions, the FCC also restored the jurisdiction of the Federal Trade Commission over consumer protection issues arising in connection with broadband Internet access services. The FCC's new rules require Internet Service Providers to disclose information about their practices to consumers, entrepreneurs, and the Commission, including any blocking, throttling, paid prioritization, or affiliated prioritization, but no longer prohibit such practices. The FCC found that disclosure of these operational practices, coupled with market forces and antitrust and consumer protection laws, would achieve the goals of Title II regulation, at lower cost.

The new rules took effect, in part, on April 23, 2018, while the changes that amend information collection requirements took effect following the required Office of Management and Budget approval on June 11, 2018. While it remains difficult to assess the full extent of the impact of these changes on our business, the more narrowly tailored regulatory framework has the potential to improve the performance of our broadband Internet access services (by, among other things, permitting us to better manage network congestion), reduce our regulatory compliance costs, and facilitate new investment.

Table of Contents

Interconnection with Local Telephone Companies and Access to Other Facilities

The Communications Act imposes a number of requirements on LECs. Generally, a LEC must: not prohibit or unreasonably restrict the resale of its services; provide for telephone number portability so customers may keep the same telephone number if they switch service providers; provide access to their poles, ducts, conduits and rights-of-way on a reasonable, non-discriminatory basis; and, when a call originates on its network, compensate other telephone companies for terminating or transporting the call (see the “Interstate Access” discussion below).

All of our LEC subsidiaries are considered incumbent LECs (“ILECs”) and have additional obligations under the Communications Act: to negotiate in good faith with any carrier requesting interconnection; to provide interconnection for the transmission and routing of telecommunications at any technically feasible point in our ILEC network on just, reasonable and non-discriminatory rates, terms and conditions; to provide access to unbundled network elements (“UNEs”), such as local loops at non-discriminatory, cost-based rates to competing carriers that would be “impaired” without them; to offer retail local telephone services to resellers at discounted wholesale rates; to provide notice of changes in information needed for another carrier to transmit and route services using its facilities; and to provide, at rates, terms and conditions that are just, reasonable, and non-discriminatory, physical collocation, which allows a competitive LEC (“CLEC”) to install and maintain its network termination equipment in an ILEC’s central office, or to obtain functionally equivalent forms of interconnection.

Our ACSN ILEC subsidiary is classified as a rural telephone company under the statute and therefore falls within a federal statutory exemption from the requirements imposed on most ILECs to provide UNEs to a CLEC. The RCA may terminate the exemption if it determines that interconnection is technically feasible, not unduly economically burdensome and consistent with universal service. Although the RCA has not terminated ACSN’s UNE exemption, the RCA granted GCI, subject to certain conditions, approval to provide local exchange telephone service in the Glacier State study area and Sitka exchange of ACSN on its own facilities. Other than the City of Sitka, all other exchanges in the Sitka study area remain unserved by any CLEC at this time.

On December 28, 2006, the FCC conditionally and partially granted ACSA forbearance from the obligation to lease UNEs to our competitors. This forbearance was limited to five wire centers within the Anchorage service area. Even where relief was granted, however, the FCC has required ACSA to lease loops and sub-loops at commercially negotiated rates, or if there is no commercial agreement, at the rates for these UNEs in Fairbanks. As a result of this decision, on March 15, 2007, our LECs entered into a five-year global interconnection and resale agreement with GCI governing the provision of UNEs and other services. The successor to that agreement remains in effect.

On December 28, 2015, the FCC issued an order granting “forbearance” from certain ILEC obligations under the Communications Act and the FCC’s rules. As of that date, the FCC has relieved our ILEC subsidiaries of “dialing parity” and “equal access” obligations that, formerly, required us to ensure that customers were able to route their calls to other telecommunications service providers without having to dial additional digits, and to allow each of our ILEC

telephone service customers to choose among any available providers of stand-alone interstate long-distance service, which the customer could then reach simply by dialing “1.” We must continue to offer those capabilities to any customer that has presubscribed to a stand-alone interstate long-distance provider prior to December 28, 2015, but are not required to make long-distance presubscription available to new customers. In May 2017, the FCC rejected a Petition for Reconsideration that had sought to reinstate these obligations in “rural areas of Alaska.”

In the same 2015 order, the FCC granted our ILEC affiliates forbearance in two additional areas: (i) the FCC granted limited forbearance from our ILEC affiliates’ obligation to offer competitive access to newly-deployed entrance conduit running from the property line to a commercial building in “greenfield” situations where no service provider has an established presence; and (ii) our ILECs are no longer required to offer competitors unbundled access to a 64-kilobit-per-second voice channel in areas where we have replaced last mile copper loop connections to our customers with fiber optic cables.

On June 26, 2017, we filed a Petition with the FCC requesting that GCI be treated as the sole ILEC in our ACSA study area, and that ACSA be treated as a nondominant carrier and relieved of its ILEC obligations under the Communications Act. That Petition remains pending at the FCC.

Interstate Access Charges

The FCC regulates the prices that ILECs charge for the use of their local telephone facilities in originating or terminating interstate calls.

Table of Contents

Special Access Pricing Flexibility and Business Data Services

Rates for interstate telecommunications services offered by our ILEC subsidiaries are determined using price cap regulation, under which the rates vary from year to year based on mathematical formulae, and not based on changes to our costs, including both inter-carrier rates and retail end user rates. Since 2010, ACSA, ACSF, and ACSAK have had the right under the FCC's Phase I and Phase II pricing flexibility rules to offer flexible pricing arrangements such as volume and term discounts free from FCC rate structure and price-cap rules for qualifying services, including dedicated transport and special access services in the Anchorage, Juneau and Fairbanks areas.

On April 20, 2017, the FCC adopted an Order updating its regulations governing "business data services," which are those circuit-switched or packet-switched services that offer our dedicated point-to-point transmission of data at certain guaranteed speeds and service levels using high-capacity connections, including special access services. The FCC left in place the Phase I and Phase II pricing flexibility it granted to us in 2010, and granted further price deregulation of all business data services with transmission speeds above 45 Megabits per second. For legacy circuit-switched business data services with speeds at or below that level (DS-3 or below), the FCC adopted a new competitive market test, finding that price regulation is no longer required in counties (or county-equivalents, such as Alaskan boroughs) where (a) 50 percent of the buildings in a county are within a half-mile of a location served by a competitive provider; or (b) 75 percent of the census blocks in a county have a cable provider present. We are permitted to remove business data services in competitive areas from our tariffs over the next three years, following which time we will be required to do so. In areas that do not meet this competitive market test, the FCC adjusted its "price cap" rules governing rates for certain legacy services that will continue to be regulated, but also permitted us to offer those services with volume and term discounts, as well as under contract tariffs, which is the equivalent of the former Phase I pricing flexibility. We are still evaluating the impact of the FCC's order but, in general, we expect this FCC Order to support the Company's ability to be market competitive for its business data services.

On August 28, 2018, the United States Court of Appeals for the Eighth Circuit vacated portions of the FCC's decision that ended prior regulation and tariffing of prices of legacy circuit-switched transport services offered by price cap carriers, like Alaska Communications, finding that the FCC had not provided sufficient advance notice of that aspect of its decision. On October 24, 2018, in order to provide the necessary notice in light of the Eighth Circuit's decision, the FCC issued a detailed proposal to re-adopt that relief. The comment cycle was delayed by the recent shutdown of the FCC as a result of a lapse in federal appropriations, and the matter remains pending.

Transformation Order

Under a 2011 FCC order (the "Transformation Order"), our ILEC interstate and intrastate switched access rates and reciprocal compensation rates ("ICC rates") are capped and declining toward zero, in pursuit of the FCC's goal that carriers will recover their costs from their end-users and, in some cases, universal service support mechanisms.

The transition unfolded over a six-year period beginning July 1, 2012. As a result:

all terminating switched end-office rates and reciprocal compensation rates were reduced to zero on July 1, 2017; and for a terminating ILEC that owns the tandem switch, terminating switched end-office rates and terminating switched transport rates were reduced to \$0.0007 for all traffic within the tandem serving area on July 1, 2017, and to zero on July 1, 2018.

The Transformation Order provides for a certain amount of compensation for lost revenue through two optional programs: (i) an access recovery charge on subscribers and (ii) a temporary access replacement support mechanism with broadband build-out obligations. However, the FCC does not intend the results of the changes necessarily to be revenue-neutral to any ILEC and various caps, limitations, market forces and, ultimately, phase-outs apply to both of these programs. Furthermore, we did not meet the required criteria for imposing an access recovery charge, and received no revenue from that source. As a result, the Company's ILEC affiliates have experienced an overall decline in access charge revenues over the course of the transition. In a July 2016 Order, the FCC found that ILECs are non-dominant in the market for switched access services nationwide, but declined to provide any significant relief from existing levels of federal regulation as a result of that finding.

Table of Contents

Federal Universal Service Support

The Communications Act requires the FCC to establish a universal service program to ensure that affordable, quality telecommunications services are available to all Americans. The Company has received universal support in several forms: (i) high cost support received by its ILEC subsidiaries for its wireline voice and broadband Internet access service business under the Connect America Fund; (ii) support for services that the Company provides to schools and libraries, provided through the federal schools and libraries universal service support mechanism (“E-Rate”); (iii) support from the federal Rural Health Care support mechanism, which supports communications services that enable telehealth and telemedicine services provided by eligible rural health care providers; and (iv) low income support under the FCC’s Lifeline program, which subsidizes telephone and broadband Internet access services for low-income consumers. These programs are administered under the direction of the FCC by the Universal Service Administrative Company (“USAC”).

Historically, the level of high cost support received by the Company’s LEC subsidiaries was based on the costs those subsidiaries incurred in providing telecommunications services, although a portion of the support was frozen at the time our LEC subsidiaries converted to federal price cap regulation and, for ACSA, based on the results of a cost model. The 2011 Transformation Order made a number of changes, including replacing legacy high cost support mechanisms with the Connect America Fund (“CAF”) mechanism discussed below.

Rural Health Care Universal Service Support Program

The FCC’s Rural Health Care Universal Service Support Mechanism provides funding to help make broadband telecommunications and Internet access services provided by the Company and other service providers affordable for eligible rural health care providers. It is comprised of two parts. The Telecommunications Program covers the difference between the “urban rate” for telecommunications services that rural healthcare providers use to deliver healthcare at rural locations, and the “rural rate” that they would otherwise be required to pay. The Healthcare Connect Fund covers 65 percent of the cost of a wider variety of broadband telecommunications, networking, and Internet access services and certain associated equipment. Through June 30, 2017, the budget for the entire Rural Health Care Universal Service Support Mechanism was set at \$400 million annually, including administrative expenses, a significant portion of which is used to assist eligible rural health care providers in Alaska.

Beginning with Funding Year 2016 (July 1, 2016 – June 30, 2017), demand for support under the program exceeded the \$400 million budget. The budget constraints prompted USAC to engage in substantially more rigorous review of requests for rural health care support, raising compliance costs and delaying issuance of support payments. The rising uncertainty and unpredictability in the Rural Health Care program caused a negative impact on revenue for the Company in 2017, and may have a negative impact on future revenue and demand for our services from rural healthcare providers.

For Funding Year 2017, which began July 1, 2017, demand for support from the Rural Health Care support mechanism again exceeded the \$400 million cap. As a result, USAC had announced that successful non-consortium applicants would receive approximately 84.4% of the support for which they would otherwise be eligible. On June 25, 2018, the FCC issued an Order retroactively increasing that cap to \$571 million for Funding Year 2017. The increase permitted full funding of all Funding Year 2017 requests that USAC or the FCC determined were otherwise in compliance with the governing rules. In the near term, we expect that the increase to reduce or eliminate the need for reductions in support payments as a result of FCC-imposed budget constraints, but it has not reduced the rigor with which USAC is now reviewing funding requests for rural health care support. We continue to advocate for the FCC to adopt further increases in the budget for this program.

Separately, USAC determined that it was unable to approve the vast majority of our rural healthcare customers' Funding Year 2017 funding requests until the FCC approved "rural rates" for use in computing support amounts to be committed under the Telecommunications Program. On March 22, 2018, we filed a Petition with the FCC asking the FCC to direct USAC to issue funding commitments to our customers based on rates we proposed in the Petition. On July 18, 2018, we announced that the FCC had approved those rates for use in determining rural health care support levels for our rural health care customers for Funding Year 2017. USAC has now completed the initial administrative processes associated with our rural health care provider customers' requests for support, and we have received the associated support payments for services delivered to our rural health care customers during Funding Year 2017. In a few cases, USAC denied funding based on other concerns, and appeals of those funding denials are now pending.

Table of Contents

The FCC's June 25, 2018 Order also directed that the rural health care funding cap be indexed for inflation, so that, for Funding Year 2018, which began July 1, 2018, the cap is now \$581 million. In addition, beginning with Funding Year 2018, any unused funds from one Funding Year may be carried forward for use in subsequent Funding Years. We again requested that the FCC approve rural rates for the services we provide to our rural healthcare customers that are seeking subsidies from the Rural Health Care support mechanism for Funding Year 2018, and the FCC approved those rates in November 2018. We have begun receiving funding commitments and payments for Funding Year 2018 receivables, reducing our carrying costs below Funding Year 2017 levels.

We are also working to reduce the level of regulatory and business uncertainty associated with our rural healthcare business in two additional ways. First, in November 2018, we requested FCC approval for rural rates for Funding Year 2019, which will begin July 1, 2019, in order to shorten the USAC funding request approval process and bring greater certainty to the competitive bidding process for rural healthcare provider services that began in January 2019. Second, we continue to advocate for the FCC expeditiously to adopt rules to reform and modernize the Rural Health Care Telecommunications Program, on which the majority of healthcare providers in Alaska rely, in the proceeding that began in December 2017. In December 2018, FCC Chairman Pai committed in a letter to Alaska Senator Dan Sullivan to move forward with an order adopting new rules for the Rural Health Care Program in 2019, with a target of doing so in the first half of the year. If the FCC meets that timeline, it is possible that new rules would be in place to govern the bidding and funding commitment process for Funding Year 2020, which will begin July 1, 2020.

At this time, it is impossible to predict the outcome of that rulemaking process or the impact the new rules may have. We are continuing to evaluate the impact of the funding cap constraints, ongoing uncertainty and unpredictability in the Rural Health Care Universal Service Support Mechanism, and the potential impact of future rule changes on our rural health care customers and revenues in light of these developments.

Connect America Fund

CAF Phase I

The FCC implemented the Connect America Fund in two primary phases. CAF Phase I froze our LECs' high cost support, beginning in 2012, at the 2011 level, and requires us to use that support to provide broadband fixed services in high cost areas served by our price-cap LEC subsidiaries. In addition, in 2012 and 2013, the FCC made two rounds of additional CAF Phase I Incremental Support available to certain price-cap carriers serving the highest-cost wire centers, conditioned on the carriers deploying additional broadband service to unserved locations (or, in the case of Round 2 support, locations that are served by broadband, but that do not receive actual speeds of at least 3 Mbps/768 kbps) over the three-year period following the award of support. We completed our obligations associated with both CAF Phase I frozen support and Round 1 and Round 2 incremental support within the required three-year period.

CAF Phase II

CAF Phase II supplanted the CAF Phase I frozen support mechanism and requires recipients to provide broadband service to unserved locations throughout the designated coverage area by the end of a specified build-out period, as well as to meet interim milestone build-out obligations.

On October 31, 2016, the FCC released its order adopting CAF Phase II (“CAF II”) for price cap carriers in Alaska. Alaska Communications is the only price cap carrier in Alaska and, under the CAF II order, we will receive approximately \$19.7 million annually (the same amount we received as CAF I high cost frozen support) for the ten-year period starting January 1, 2016 and continuing through December 31, 2025. To receive this support, we committed to provide voice and broadband Internet access service to approximately 31,500 locations in census blocks that are unserved or only partially served by any unsubsidized competitor. These will include approximately 26,000 locations that did not previously have access to broadband Internet access service.

Table of Contents

On December 28, 2017, Alaska Communications filed a notice with the FCC proposing to serve 4,762 unique geocoded locations (encompassing 6,056 unserved customer locations because some are in multi-unit buildings) in partially-served census blocks to partially fulfill this requirement. On March 27, 2018, GCI filed a challenge at the FCC, asserting that it serves 3,099 of these locations, and we filed a response, disputing that assertion. On September 28, 2018, the FCC granted our request with respect to 1,713 unique geocoded locations, which will assist us in meeting our CAF Phase II deployment obligation.

In addition, on June 21, 2018, we filed a supplemental notice with the FCC proposing to serve an additional 3,253 unique geocoded locations (encompassing 4,691 unserved customer locations) in partially-served census blocks, again to partially fulfill our CAF Phase II deployment obligation. On September 4, 2018, GCI filed a challenge at the FCC, asserting that it serves 2,604 of those 3,253 locations. The FCC has not yet ruled on this challenge. As with the initial list, if the FCC ultimately determines that we are not able to satisfy our CAF Phase II deployment obligation by serving some or all of those locations, it may be more difficult and costly to meet our CAF Phase II deployment requirements at other locations.

On April 26, 2018, the FCC released an Order denying our request to modify the conditions on our use of CAF Phase II high cost support. The CAF locations may include up to 2,714 unserved locations in census blocks deemed “low-cost” by the FCC, so long as we certify that the capital expenditure to serve each such location was at least \$5,000.00. The FCC denied our request to reduce that minimum capital expenditure requirement to \$2,577.79. As a result of this denial, we may find it more difficult to identify eligible service locations to meet our CAF Phase II deployment requirement.

We are continuing to work toward meeting our CAF Phase II obligations in a capital-efficient manner, including the potential to deliver broadband Internet access services meeting CAF Phase II requirements using a fixed wireless platform.

Lifeline

Revenue generated from our lifeline customers represented less than 1% of our total revenue for each of the twelve-month periods ended December 31, 2018 and 2017. The FCC’s Lifeline support mechanism today subsidizes the cost of voice services for low-income consumers, as well as broadband in CAF II locations. The Lifeline mechanism provides a higher level of support for low-income consumers living on Tribal Lands, including the entire state of Alaska. Under reforms adopted in the FCC’s January 2012 Lifeline Order, we are required to recertify each of our Lifeline customers annually to verify continued eligibility for Lifeline service. In part as a result of those efforts, our Lifeline enrollment decreased, and we will face continuing compliance obligations with respect to Lifeline customers served by our LEC subsidiaries. There are a number of matters under consideration that could increase the Company’s regulatory compliance obligations and customer administrative responsibilities, and impact revenue received from regulatory funding sources.

Lifeline Reform

On April 27, 2016, the FCC released the text of new rules making stand-alone broadband service, as well as bundled voice and data service packages, eligible for Lifeline support, in addition to traditional voice service. After receiving approval from the Office of Management and Budget, the rules making Lifeline a supported service took effect on December 2, 2016. The Company's ILECs have obtained forbearance from the FCC obligation to provide Lifeline broadband in those locations not funded by CAF Phase II.

In the same order, the FCC established a process for creating a national Lifeline eligibility verifier to ensure that all Lifeline subscribers meet the program's eligibility requirements, which is becoming operational in stages over the next several years. The national Lifeline eligibility verifier launched in Alaska in February 2019. While it is too soon to assess the impact of this change, the availability of this service could potentially reduce our costs of compliance with Lifeline eligibility certification and recertification rules.

Table of Contents

Satellite Services

On February 16, 2018, the FCC granted our application for a license to operate a network of C-band satellite earth stations to be used to serve our customers that cannot be reached by terrestrial middle mile facilities. Under that license, we are authorized to use up to 72 MHz of C-band spectrum on Eutelsat's satellite, E115WB, for a term of 15 years. In June 2018, the FCC granted our application to expand that network to include new customer sites, and we have since requested authority to double the amount of spectrum we are authorized to use, up to 144 MHz, and serve additional sites. We expect this arrangement to provide us with greater predictability and stability in the availability and cost of long-haul transport connectivity to our customers that must be served by satellite.

Our C-band satellite earth stations use the 3.7 - 4.2 GHz band to receive downlink transmissions from geostationary satellites. On April 19, 2018, the Wireless Telecommunications, International, and Public Safety Bureaus of the FCC announced an immediate, temporary freeze on the filing of new or modification applications for fixed-satellite service earth station licenses, receive-only earth station registrations, and fixed microwave licenses in the 3.7 - 4.2 GHz portion of the C-band spectrum, in order to preserve the current landscape of authorized operations in that band while the Commission continues to examine opportunities to permit expanded terrestrial use of that band for mobile broadband and additional fixed services. On July 13, 2018, the FCC issued a Notice of Proposed Rulemaking seeking comment on options for expanding terrestrial use of the 3.7 - 4.2 GHz band for "5G" services. In response, we have filed comments and reply comments advocating for continued access to this spectrum for satellite downlink operations in Alaska. We are unable to predict the outcome of this proceeding. If the FCC adopts rules that limit our ability to register additional satellite earth stations in this band, or expands terrestrial transmissions in the 3.7 - 4.2 GHz band, it may become more difficult or costly for us to use this band, or necessitate relocation of our services to alternative spectrum bands.

In October 2018, the FCC also opened a proceeding to examine possible new terrestrial uses of the 6 GHz band, including the 5.925-6.425 GHz spectrum used for C-band satellite uplink transmissions originating from terrestrial earth stations to geostationary satellites in orbit. Because C-band earth stations are transmitting in that band, not receiving, we expect any increase in terrestrial use of the 6 GHz band to have a less severe impact on our satellite C-band network than would use of the 3.7-4.2 GHz receive band. Nevertheless, we are unable at this time to predict the outcome of these proceedings, or to assess any potential future impact on our C-band satellite services.

Other Federal Regulations

In August 2015, the FCC adopted new rules to govern aspects of the ongoing transition from legacy copper transmission facilities to new IP-based networks. In general, those rules impose an additional 180-day advance disclosure requirement when incumbent local exchange carriers, such as the Company, plan to retire copper transmission lines connecting to our customers' premises or replace them, in whole or in part, with fiber optic cable.

In November 2017, the FCC narrowed the scope of the copper retirement rules, simplified the notice process, shortened the required notice period from 180 days to 90 days, and adopted an expedited 15-day notice period applicable where the affected copper facilities are no longer being used to provide service. In comparison to the 2015 rules, we expect these revisions to make it easier for us to comply with the regulatory processes associated with network upgrades from copper to fiber facilities, but we have found it necessary to request waivers of the FCC's 90-day notice period when necessary to conform to the timing of pole-removal activities announced by electric power utilities that own the poles on which our copper facilities are located. In its November 2017 Order, the FCC also streamlined its rules governing the discontinuance of legacy low-speed voice and data services of less than 1.544 Mbps, which will also facilitate the transition to modern network technologies and services.

In August 2015, with respect to residential, fixed, facilities-based voice services that do not receive electrical power through the telephone line (such as fiber-to-the-home services), the FCC adopted rules requiring us to offer our customers the option to purchase equipment providing eight hours of standby backup power. Effective as of February 13, 2019, the FCC's rules require us to offer these customers the option to purchase equipment that provides 24 hours of standby backup power.

Table of Contents

State Regulation

Telecommunication companies are required to obtain certificates of public convenience and necessity from the RCA prior to operating as a public utility in Alaska. In addition, RCA approval is required if an entity acquires a controlling interest in any of our certificated subsidiaries, acquires a controlling interest in another intrastate utility or discontinues an intrastate service. The RCA also regulates rates, terms and conditions for local, intrastate access and intrastate long distance services, supervises the administration of the Alaska Universal Service Fund (“AUSF”) and decides on Eligible Telecommunications Carrier (“ETC”) status for purposes of qualifying for federal USF. The Communications Act specifies that resale and UNE rates are to be negotiated among the parties subject to the approval or arbitration of the RCA. Our ILECs have entered into interconnection agreements with a number of entities.

The FCC’s March 2015 order reclassifying broadband Internet access service as a telecommunications service also sought to limit the authority of state regulators over the service by finding that it is jurisdictionally interstate in nature. The FCC prohibited state regulators from imposing new state universal service contribution obligations on broadband Internet access services, and announced its intent to preempt any attempts by state regulators to impose entry certification restrictions, rate regulation, or tariff filing requirements in connection with broadband Internet access service.

Alaska Universal Service Fund

The AUSF complements the federal Universal Service Fund, but is focused on obligations to meet intrastate service obligations. The RCA has opened an “information docket” to evaluate and scope a comprehensive AUSF reform rulemaking that might include consideration of the Fund’s continued need. The RCA also opened a rulemaking to review the regulations specific to AUSF shortfalls. A final decision in that matter was issued in late December, 2017. These rules were transmitted to the Lt. Governor for signature and became effective April, 2018. They eliminate the hierarchy of shortfall payments except for Lifeline and administrative operating expenses.

In January, 2018, the RCA opened a rulemaking to repeal the AUSF effective July 31, 2019, and sought comments and reply comments. The Alaska Telephone Association and its members filed a plan to cap the fund and distributions. AT&T, GCI, and Alaska Communications also filed comments and reply comments. A hearing was scheduled in April. A final order was issued by the RCA on October 24, 2018 with changes to the distribution to be effective January 1, 2019.

Prior to changes to the AUSF distribution, AUSF supported a portion of certain higher cost carriers’ switching costs, the costs of Lifeline service (which supports rates of low-income customers), the Carrier of Last Resort (“COLR”),

Carrier Common Line (“CCL”) support program and other costs associated with regulated service. These funding mechanisms have been eliminated and replaced with a new funding mechanism called Essential Network Support (“ENS”). In addition, the AUSF surcharge has been capped at 10%.

In response to the FCC’s order eliminating Lifeline qualifying programs approved by state regulatory commissions, the Alaskan telecommunications industry has proposed a waiver of the state qualifying programs to align the state and federal qualifying programs. The RCA granted that waiver prior to December 2, 2016 when the new rules went into effect. In August 2017, the RCA opened a docket, R-17-002, on Lifeline to align the programs with the federal rules and revise the certification and verification procedures to reflect revised federal procedures. Lifeline service providers have been operating under an RCA order that aligns some issues and companies made tariff filings to align their procedures. This rulemaking is somewhat ministerial in nature but may become moot depending on the outcomes of the AUSF docket R-18-001. Comments were submitted in September 2017. The regulation docket has a final decision deadline of August 25, 2019.

Other State Regulatory Matters

The RCA opened three dockets on July 27, 2016 to investigate the continued need for COLR funding in competitive areas. Two of the dockets investigating the continued need for COLR funding affect the Fairbanks and Juneau markets. On May 24, 2017, the RCA issued an order approving the 2016 COLR filing for ACSF but denying the 2016 COLR filing for ACSAK and terminating its COLR status and related support. ACSAK petitioned for reconsideration which was denied, and on July 14, 2017 ACSAK filed a notice of appeal in the Anchorage Superior Court. ACSAK filed its appellant brief on March 1, 2018 simultaneously with MTA. Due to requests for extensions for extraordinary and compelling reasons, the RCA appellee brief was due on June 19, 2018 and ACSAK has an extension for its reply brief due on August 10, 2018. Oral arguments were originally scheduled for November 8, 2018 but were recently rescheduled for January 10, 2019.

Table of Contents

The RCA denied ACSAK's request for 2017 COLR filing and reinstatement of COLR status. The Company filed for 2017 COLR funding for ACSN and ACSF. The RCA suspended these filings on July 31, 2017. Adjudication of these matters was dismissed when the RCA opened the docket to repeal AUSF. AUSF COLR support for these two markets will continue subject to the RCA's final decision. ACSF, ACSN, and ACSAK filed for 2018 COLR funding on June 18, 2018 and received notification of approval from the RCA on July 27, 2018.

Website Access to Reports

Our investor relations website Internet address is www.alsk.com. The information on our website is not incorporated by reference in this annual report on Form 10-K. We make available, free of charge, on our investor relations website, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934. These reports are available as soon as reasonably practicable after we electronically file such material with, or furnish it to, the Securities and Exchange Commission ("SEC").

Code of Ethics

We post our code of business conduct and ethics entitled "Code of Ethics", on our investor website at www.alsk.com. Our code of business conduct and ethics complies with Item 406 of SEC Regulation S-K and the rules of Nasdaq. We intend to disclose any changes to the code that affect the provisions required by Item 406 of Regulation S-K and any waivers of the code of ethics for our executive officers, senior financial officers or directors, on that website.

Additional Business Information

See "Item 1A, Risk Factors," "Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations," and Note 3 "*Joint Venture*" and Note 18 "*Business Segments*" in the Notes to Consolidated Financial Statements for additional information, which is incorporated herein by reference.

Item 1A. Risk Factors

We face a variety of risks that may affect our business, financial condition and results of operations, some of which are beyond our control. The risks described below are not the only ones we face and should be considered in addition

to the other cautionary statements and risks described elsewhere and the other information contained in this report and in our other filings with the SEC, including our subsequent reports on Forms 10-Q and 8-K. Additional risks and uncertainties not known to us or that we currently deem immaterial may also affect our business. If any of these known or unknown risks or uncertainties actually occurs, our business, financial condition and results of operations could be seriously harmed.

Risks Relating to Our Industry

Competition

The telecommunications industry in Alaska is competitive and creates pressure on our pricing and customer retention efforts.

Strong competitors make it more difficult for us to attract and retain customers, which could result in lower revenue, cash flow from operating activities and Adjusted Free Cash Flow.

Our principal facilities-based competitor for voice and broadband services is GCI, who is also the dominant cable television provider in Alaska. In the business and wholesale market, GCI holds a dominant position through its extensive fiber optic, microwave and satellite based middle mile network as well as its undersea fiber cable network, where it owns and operates two of the four existing undersea fiber optic cables connecting Alaska to the contiguous states. In the consumer market, GCI bundles its cable video services with voice, broadband and mobile wireless services. We do not offer video service and mobile wireless, and thus, are unable to offer competing bundles.

Table of Contents

GCI continues to expand its statewide reach, including through its Terra Southwest project which is funded with federal subsidies, consisting of grants from the USDA Rural Utilities Service and federal low-interest loans. This subsidy gives GCI a substantial competitive advantage in the markets served by Terra Southwest, and GCI receives substantial additional funding for services offered over this facility from the federal E-Rate and Rural Health Care universal service support mechanisms. GCI has indicated it intends to replicate this government subsidized model in other markets in Alaska, which will create monopoly-type conditions in these markets which are subject to minimal regulatory oversight.

With a long history of operating in Alaska, AT&T has a terrestrial long-haul network in Alaska where the focus is on serving certain national customers. AT&T's primary focus in Alaska is providing wireless services.

As we compete more extensively in the managed IT services business, we are likely to face new competition, both local and national. An example of this new competition is World Wide Technologies, a large equipment value add reseller. More recently we have seen a smaller Rural Local Exchange Carrier (RLEC), Matanuska Telephone Association (MTA), that operates predominantly in the Wasilla and Palmer communities north of Anchorage, acquire a data center and IT services provider called AlasConnect. With this acquisition, we now see MTA as a competitor for managed IT services particularly in our Anchorage and Fairbanks markets. There are many smaller firms that compete for IT business in Alaska. We believe that competition for managed IT services is fragmented in Alaska with no clear or dominant provider.

Our Cost Structure

We may not be able to maintain our cost structure which would create risk to our ability to generate bottom-line growth.

As a smaller, focused broadband and managed IT services company, maintaining a lower cost structure is key to generating cash flow from operating activities. If we fail to maintain this cost structure, our financial condition will be impacted.

Technological Advancements and Changes in Telecommunications Standards

If we do not adapt to rapid technological advancements and changes in telecommunications standards, our ability to compete could be strained, and as a result, we would lose customers.

Our success will likely depend on our ability to adapt and fund the rapid technological changes in our industry. Our failure to adopt a new technology or our choice of one technology over another may have an adverse effect on our ability to compete or meet the demands of our customers. Technological changes could, among other things, reduce the barriers to entry facing our competitors providing local service in our service areas. The pace of technology change and our ability to deploy new technologies may be constrained by insufficient capital and/or the need to generate sufficient cash to make interest payments on our debt.

New products and services may arise out of technological developments and our inability to keep pace with these developments may reduce the attractiveness of our services. Some of our competitors may have greater resources to respond to changing technology than we do. If we fail to adapt successfully to technological changes or fail to obtain access to new technologies, we could lose customers and be unable to attract new customers and/or sell new services to our existing customers. We may be unable to successfully deliver new products and services, and we may not generate anticipated revenues from such products or services.

To be competitive we need to maintain an on-going investment program to continuously upgrade our access network. We define the access network as the connection from the end user location – either a home or a business – to the first aggregation point in the network. The connection can be copper or fiber and the aggregation point is typically a central office or remote serving node. The access network determines the speeds we are able to deliver to our end customer. We may not be able to maintain the level of investment needed for long term competitiveness in offering broadband speeds to all segments of our market.

As we seek to grow as the leading Cloud Enabler for businesses in Alaska, we will have to partner with various IT technology and cloud services providers. Technology trends and developments in this area can be far more disruptive and tend to change in shorter cycles compared to telecommunications technologies. Our ability to invest in the training, certifications, and skills required to develop these partnerships will be important in determining our success in this area of managed IT services.

Table of Contents

Our limited access to middle mile infrastructure limits our ability to compete in certain geographic and customer segments in Alaska.

We define middle mile as the connection between the first aggregation point into a local community and the interconnection point to the internet or switch which connects the community to the outside world. These are typically high capacity connections and can span hundreds of miles in the case of Alaska. It is unlikely that we will have the capital needed for middle mile investments, and GCI controls significant elements of the middle mile network in Alaska, and through its government funded programs is creating monopoly conditions in certain areas of the state. This limits our ability to compete in certain markets.

Risks Relating to Our Debt

Our debt could adversely affect our financial health, financing options and liquidity position. Due to uncertainty in the capital markets, we may be unable to retire or refinance our long-term debt when it becomes due, or if we are able to refinance it, we may not be able to do so with attractive interest rates or terms.

2019 Senior Credit Facility

On January 15, 2019, we entered into an amended and restated credit facility consisting of an Initial Term A Facility in the amount of \$180 million, a Revolving Facility in an amount not to exceed \$20 million and a Delayed-Draw Term A Facility in an amount not to exceed \$25 million (together the “2019 Senior Credit Facility”). The 2019 Senior Credit Facility also provides for Incremental Term A Loans up to an aggregate principal amount of the greater of \$60 million and trailing twelve month EBITDA, as defined. On January 15, 2019, proceeds from the Initial Term A Facility of \$180 million were used to repay in full the outstanding principal balance of the Term A-1 Facility and Term A-2 Facility under the Company’s 2017 Senior Credit Facility totaling \$171.8 million, plus accrued and unpaid interest, pay fees and expenses associated with the Agreement and for general corporate purposes. The 2017 Senior Credit Facility was terminated on January 15, 2019.

Principal payments on the Initial Term A Facility, Delayed-Draw A Facility and any amounts outstanding under the Incremental Term A Loans are due commencing in the third quarter of 2019 as follows: the third quarter of 2019 through the second quarter of 2020 – 0.625% per quarter; the third quarter of 2020 through the second quarter of 2022 – 1.25% per quarter; the third quarter of 2022 through the second quarter of 2023 – 1.875% per quarter; and the third quarter of 2023 through the fourth quarter of 2023 – 2.5% per quarter. The remaining outstanding principal balance, including any amounts outstanding under the Revolving Facility, is due on January 15, 2024.

The obligations under the 2019 Senior Credit Facility are secured by substantially all of the personal property and real property of the Company, subject to certain agreed exceptions.

The 2019 Senior Credit Facility contains customary representations, warranties and covenants, including covenants limiting the incurrence of debt, the payment of dividends and repurchase of the Company's common stock.

The 2019 Senior Credit Facility provides for events of default customary for credit facilities of this type, including non-payment defaults on other debt, misrepresentation, breach of covenants, representations and warranties, change of control, and insolvency and bankruptcy.

Our debt also exposes us to adverse changes in interest rates. As a component of our cash flow hedging strategy and as required under the terms of the 2019 Senior Credit Facility, we hold a pay-fixed, receive-floating interest rate swap in the notional amount of \$90.0 million at 6.49425%, inclusive of a 5.0% LIBOR spread, through June 2019, and will obtain another hedging instrument to be effective subsequent to that date.

See the "First Amended and Restated Credit Agreement, dated as of January 15, 2019, by and among Alaska Communications, as the borrower, the Company and certain of its direct and indirect subsidiaries, as guarantors, ING Capital LLC, as administrative agent, and the lenders party thereto," filed as Exhibit 10.1 to the Current Report on Form 8-K filed on January 22, 2019 and Note 21 "*Subsequent Events*" in the Notes to Consolidated Financial Statements, which are incorporated herein by reference, for additional information.

Table of Contents

Continuing global, national, and state fiscal insecurity, as well as uncertainty regarding our future performance adds refinancing risk to the Company.

We are also subject to credit risk related to our counterparties on the swaps and to interest rate fluctuations on interest generated by our debt in excess of the notional term loans referenced above.

Risks Related to our Business

Rural Health Care Universal Service Support Program

We may not receive some of the subsidies for Rural Health Care for which our customers have applied and amounts previously received may be challenged by the FCC.

In response to the demand for support under the Rural Health Care Universal Service Support Program exceeding the available budget for Funding Year 2016 (July 1, 2016 – June 30, 2017) and Funding Year 2017 (July 1, 2017 – June 30, 2018), the FCC raised the annual program funding cap from \$400 million to \$571 million. The revised cap was initially applied to Funding Year 2017 to fully fund eligible funding requests for that year. The FCC also provided annual adjustments to the cap to reflect inflation and established a process to carry forward unused funds from past funding years, effective with Funding Year 2018.

The increased demand also prompted USAC, which administers the program, to engage in substantially more rigorous reviews of rural health care support, raising compliance costs and delaying issuance of support payments. In connection with that review, the Company has received certain inquiries and requests for information from USAC and from the FCC Enforcement Bureau.

This rising uncertainty and unpredictability in the Rural Health Care program negatively impacted the Company's revenue in 2017 and 2018, and may have a negative impact on future revenue and demand for our services from rural healthcare providers.

Also, we may be subject to further investigation for the Company's compliance with FCC and USAC rules, regulations, and practices for prior periods. Such investigations of other companies have resulted in refunding certain previously awarded funds, as well as fines and penalties.

Access and High Cost Support Revenue

Revenues from access charges will continue to decline and revenue from various regulated support mechanisms is subject to rule changes at the FCC and the RCA.

We received approximately 2.0% and 2.2% of our operating revenues for the years ended December 31, 2018 and 2017, respectively, from access charges. The amount of revenue that we receive from these access charges is calculated in accordance with requirements set by the FCC and the RCA. Any change in these requirements may reduce our revenues and earnings. Access charges have consistently decreased in past years and we expect this trend to continue due to declines in voice usage and migration to VoIP services which do not generate access revenue for us.

Interstate switched access has been on a phase-out schedule for several years, and according to the schedule set forth by the FCC, it reached its final phase in July 2017 and was reduced to zero on July 1, 2018. Interstate switched access was a relatively small component of all access revenue, and modest declines are anticipated at this time for other components of interstate access revenue. Traditional intrastate access revenues have already been reduced, replaced in part by COLR support. Effective January 1, 2019, the RCA eliminated COLR support and adopted a new ENS mechanism that distributes a lower level of support.

Furthermore, the FCC has actively reviewed new mechanisms for inter-carrier compensation that will eliminate certain access charges entirely. Elimination of access charges would have a material adverse effect on our revenue and earnings. Similarly, the RCA has adopted regulations modifying intrastate access charges that may reduce our revenue.

As a result of the CAF II order issued by the FCC in 2016, we currently expect our high cost support revenue to be relatively unchanged for the next seven years. Substantial changes are expected to be enacted by the FCC regarding our future high cost loop support funding and obligations thereunder. It is difficult to predict the future growth in this source of revenue as well as the future obligations that we will be required to accept that are tied to this funding.

Table of Contents

Regulations

New governmental regulations may impose obligations on us to upgrade our existing technology or adopt new technology that may require additional capital and we may not be able to comply in a timely manner with these new regulations.

Some of our markets are regulated and we cannot predict the extent to which the government will impose new unfunded mandates on us. Such mandates have included those related to emergency location, emergency “E-911” calling, law enforcement assistance and local number portability. Each of these government mandates has imposed new requirements for capital that we could not have predicted with any precision. Along with these obligations, the FCC has imposed deadlines for compliance with these mandates. We may not be able to provide services that comply with these or other regulatory mandates. Further, we cannot predict whether other mandates from the FCC or other regulatory authorities will occur in the future or the demands they may place on our capital expenditures. For more information on our regulatory environment and the risks it presents to us, see “Item 1, Business – Regulation”.

There is a risk that FCC Orders will materially impact our revenue.

The 2011 Transformation Order established a new framework for high cost universal service support that replaced existing support mechanisms that provide support to carriers, like us, that serve high-cost areas with new CAF support mechanisms and service obligations that are focused on broadband Internet access services. We recognized \$19.7 million in federal high cost universal service payment revenues to support our wireline operations in high cost areas in each of the twelve months ended December 31, 2018 and 2017. The FCC released its CAF Phase II order on October 31, 2016.

In addition, the FCC has imposed strict new compliance requirements governing enrollment of low-income subscribers in the FCC’s Lifeline program, which provides carriers like us with USF support to reduce the cost of wireline and wireless services to low-income consumers. For the twelve months ended December 31, 2018, we recognized wireline lifeline revenue of \$0.3 million. Over the same period the number of wireline lifeline customers we served decreased from 934 to 827. We expect the amount of Lifeline USF support we receive in connection with our wireline customers to continue to decrease, because we expect that it will be more difficult for low-income consumers to qualify for Lifeline, and to remain enrolled in Lifeline, than it was under the former rules.

Economic Conditions

The successful operation and growth of our businesses depends on economic conditions in Alaska which may deteriorate due to reductions in crude oil prices and other factors.

The vast majority of our customers and operations are located in Alaska. Due to our geographical concentration, the successful operation and growth of our businesses depends on economic conditions in Alaska. The Alaska economy, in turn, depends upon many factors, including:

- the strength of the natural resources industries, particularly oil production and prices of crude oil;
- the strength of the Alaska tourism industry;
- the level of government and military spending; and
- the continued growth of service industries.

The population of Alaska, which declined marginally in 2018, is approximately 740,000 with Anchorage, Fairbanks and Juneau serving as the primary population and economic centers in the state.

It is estimated that one-third of Alaska's economy is dependent on federal spending, one-third on natural resources, in particular the production of crude oil, and the remaining one-third on drivers such as tourism, mining, timber, seafood, international air cargo and miscellaneous support services.

Table of Contents

Alaska's economy is dependent on investment by oil companies, and state tax revenues correlate with the price of oil as the State assesses a tax based on the retail price of oil that transits the pipeline from the North Slope. The price of crude oil dropped substantially during 2014 through 2016, and increased marginally in 2017 and 2018. The decline in the price of crude oil has impacted the state in two ways:

1. Resource based companies reduced their level of spending in the state, and in particular the North Slope, through reducing their operating costs.
The State of Alaska budget represents approximately 15% of the states total economy. The state's budget deficit has been reduced from \$3.7 billion in 2015 to \$0.7 billion in 2019 (as enacted) primarily through spending reductions
2. and utilization of interest earned on the state's permanent fund. Reduced spending by the state has had a dampening effect on overall economic activity in the state.

Economists anticipate that slowly increasing oil prices and growing industry optimism bode well for continued new development and increased activity on the North Slope in 2019, supporting an increase in the volume of oil moving through the pipeline and the generation of revenue for the state government.

Economists believe the Alaskan economy entered a moderate recession beginning in the second half of 2015, which they currently expect to end during 2019. Employment levels in the state declined approximately 0.3% in 2018 (compared with a 1.3% decline in 2017) driven by declines in the oil and gas industry, construction, and Federal and state government, offset by increases in health care and local government. The negative effects of the recession have been mitigated by diversity in the Alaskan economy, including growth in the health care and tourism industries. However, economists believe that, without a long-term solution to the state budget deficit, a full economic recovery may remain elusive.

Our terrestrial fiber network on the North Slope of Alaska (described below) which allows us to provide broadband solutions to the oil and gas sector may be negatively impacted by declining crude oil prices in the near term. Additionally, overall macro impacts from a sustained lower price of crude oil, if maintained over time, will ultimately impact our growth in the future.

North Slope Fiber Optic Network

Our project to provide broadband solutions to the North Slope and western Alaska may not prove to be as successful as currently anticipated.

During the second quarter of 2015, we acquired a fiber optic network on the North Slope of Alaska and initiated a project to operate and expand the network. This network enables commercially-available, high-speed connectivity where only high-cost microwave and satellite communications were previously available. The success of this project is dependent, in part, on the utilization of the network by other telecom carriers.

Our partner in this project has invested in a submarine network with landing stations in several northwest Alaska communities, including a terrestrial route from the North Slope to Fairbanks. The network became operational in late 2017 and we began delivering service to customers in 2018 through capacity we acquired on the system. Delays in acquiring customers and providing those customers with service could negatively impact our investment in the joint venture and our financial results.

Erosion of Access Lines

We provide services to many customers over access lines, and if we continue to lose access lines, our revenues, earnings and cash flow from operating activities may decrease.

Our business generates revenue by delivering voice and data services over access lines. We have experienced net access line loss over the past few years and the rate of loss has been accelerating. During the years ended December 31, 2018 and 2017 our business access line erosion was 2,317 and 2,278, respectively, while over the same period our consumer access line erosion was 3,478 and 4,156 respectively. We expect to continue to experience net access line loss in our markets, affecting our revenues, earnings and cash flow from operating activities.

Network / E-911 Failure

A failure of our network could cause significant delays or interruptions of service, which could cause us to lose customers.

To be successful, we will need to continue to provide our customers reliable service over our network. Our network and infrastructure are constantly at risk of physical damage as a result of human, natural or other factors. These factors may include pandemics, acts of terrorism, sabotage, natural disasters, power surges or outages, software defects, contractor or vendor failures, labor disputes and other disruptions that may be beyond our control. Should we experience a prolonged system failure or a significant service interruption, our customers may choose a different provider and our reputation may be damaged. Further, we may not have adequate insurance coverage, which would result in unexpected expense. Notably, similar to other undersea fiber optic cable operators, we do not carry insurance that would cover the cost of repair of our undersea cables and, thus, we would bear the full cost of any necessary repairs.

Table of Contents

A failure of enhanced emergency calling services associated with our network may harm our business.

We provide E-911 service to our customers where such service is available. We also contract from time to time with municipalities to upgrade their dispatch capabilities such that those facilities become capable of receiving our transmission of a 911 caller's location information and telephone number. If the emergency call center is unable to process such information, the caller is provided only basic 911 services. In these instances, the emergency caller may be required to verbally advise the operator of such caller's location at the time of the call. Any inability of the dispatchers to automatically recognize the caller's location or telephone number, whether or not it occurs as a result of our network operations, may cause us to incur liability or cause our reputation or financial results to suffer.

Actions of Activist Stockholders

Actions of activist stockholders against us could be disruptive and costly and the possibility that activist stockholders may wage proxy contests or seek representation on, or control of, our Board could cause uncertainty about the strategic direction of our business, and an activist campaign that results in a change in control of our Board could trigger change in control provisions or payments under certain of our material contracts and agreements.

Stockholders may from time to time engage in proxy solicitations, advance stockholder proposals or board nominations or otherwise attempt to effect changes, assert influence or acquire some level of control over us.

On February 9, 2018, TAR Holdings LLC, an entity for which Karen Singer serves as the sole member, purported to notify the Company that it intends to nominate three candidates for election to our Board at our 2018 Annual Meeting of Stockholders. According to the Schedule 13D filed with the SEC by Ms. Singer and TAR Holdings LLC (the "Singer 13D Group"), Ms. Singer and TAR Holdings LLC beneficially own in the aggregate approximately 5.0% of our outstanding common stock. On May 9, 2018, pursuant to a Cooperation Agreement between the Company and the Singer 13D Group, the Company increased the size of its Board of Directors from six to eight and appointed two of the Singer 13D Group's intended candidates to those two seats. Both individuals were subsequently elected to the Board of Directors by the Company's shareholders.

On December 31, 2018, Aegis Financial Corporation, for which Scott L. Barbee serves as the president and sole shareholder, purported to notify the Company that it may engage in communications with one or more shareholders, officers or directors of the Company, including discussions regarding the Company's strategic direction, corporate governance, named executive officer compensation, and Board of Directors representation, among other things.

While our Board and management team strive to maintain constructive, ongoing communications with all of the Company's stockholders, including the Singer 13D Group and Aegis Financial Corporation, and welcomes their views and opinions with the goal of enhancing value for all stockholders, an activist campaign such as the one threatened by the Singer 13D Group that seeks to replace more than a majority of the members of our Board and, thereby seek control of the Company's Board, could have an adverse effect on us because:

Responding to actions by activist stockholders can disrupt our operations, are costly and time-consuming, and divert the attention of our Board and senior management team from the pursuit of business strategies, which could adversely affect our results of operations and financial condition;

Perceived uncertainties as to our future direction as a result of changes to the composition of our Board may lead to the perception of a change in the direction of the business, instability or lack of continuity which may be exploited by our competitors, cause concern to our current or potential clients, may result in the loss of potential business opportunities and make it more difficult to attract and retain qualified personnel and business partners;

Table of Contents

These types of actions could cause significant fluctuations in our stock price based on temporary or speculative market perceptions or other factors that do not necessarily reflect the underlying fundamentals and prospects of our business; and

If individuals are elected to our Board with a specific agenda, it may adversely affect our ability to effectively implement our business strategy and create additional value for our stockholders.

Employees

We depend on the availability of personnel with the requisite level of technical expertise in the telecommunications industry.

Our ability to develop and maintain our networks and execute our business plan is dependent on the availability of technical engineering, IT, service delivery and monitoring, product development, sales, management, finance and other key personnel within our geographic location.

Labor costs and the terms of our principal collective bargaining agreement can negatively impact our ability to remain competitive, which could cause our financial performance to suffer.

Labor costs are a significant component of our expenses and, as of December 31, 2018, approximately 53% of our workforce is represented by the IBEW. The CBA between the Company and the IBEW, which is effective through December 31, 2023, governs the terms and conditions of employment for all IBEW represented employees working for the Company in the state of Alaska and has significant economic impacts on the Company as it relates to wage and benefit costs and work rules that affect our ability to provide superior service to our customers. We believe our labor costs are higher than our competitors who employ a non-unionized workforce because we are required by the CBA to contribute to the IBEW Health and Welfare Trust and the Alaska Electrical Pension Fund (“AEPF”) for benefit programs, including defined benefit pension plans and health benefit plans, that are not reflective of the competitive marketplace. Furthermore, work rules under the existing agreement limit our ability to efficiently manage our workforce and make the incremental cost of work performed outside normal work hours high. In addition, we may make strategic and operational decisions that require the consent of the IBEW. While we believe our relationship with the IBEW is constructive, and although the IBEW generally has provided necessary consents, the IBEW may not provide consent when we need it, it may require additional wages, benefits or other consideration be paid in return for its consent, or it may call for a work stoppage against the Company. The Company considered relations with the IBEW to be stable in 2018; however, any deterioration in the relationship with the IBEW would have a negative impact on the Company’s operations.

The expansion of represented employees outside of Alaska could affect our cost structure and the success of any strategic expansion opportunities.

Vendors

We rely on a limited number of key suppliers and vendors for timely supply of equipment and services for our network infrastructure and customer support services. If these suppliers or vendors experience problems or favor our competitors, we could fail to obtain the equipment and services we require to operate our business successfully.

We depend on a limited number of suppliers and vendors for equipment and services for our network and certain customer services. If suppliers of our equipment or providers of services on which we rely experience financial difficulties, service or billing interruptions, patent litigation or other problems, subscriber growth and our operating results could suffer.

Suppliers that use proprietary technology, effectively lock us into one or a few suppliers for key network components. Other suppliers require us to maintain exclusive relationships under a contract. As a result, we have become reliant upon a limited number of suppliers of network equipment. In the event it becomes necessary to seek alternative suppliers and vendors, we may be unable to obtain satisfactory replacement suppliers or vendors on economically attractive terms on a timely basis, or at all, which could increase costs and may cause disruption in service.

Table of Contents

Networks, Monitoring Centers and Data Hosting Facilities

Maintaining the Company's networks, around the clock monitoring centers and data hosting facilities requires significant capital expenditures, and our inability or failure to maintain and upgrade our networks and data centers would have a material impact on our market share and ability to generate revenue.

The Company currently operates an extensive network that includes monitoring and hosting facilities. To provide contractual levels of service to our customers and remain competitive, we must expend significant amounts of capital. In many cases, we must rely on outside vendors whose performance and costs may not be sufficiently within our control.

Information Technology Systems

A failure of back-office IT systems could adversely affect the Company's results of operations and financial condition.

The efficient operation of the Company's business depends on back-office IT systems. The Company relies on back-office IT systems, including certain systems provided by third party vendors, to effectively manage customer billing, business data, communications, supply chain, order entry and fulfillment and other business processes. Some of these systems are no longer supported under maintenance agreements from the underlying vendor. A failure of the Company's IT systems, or the IT systems provided by third party vendors, to perform as anticipated could disrupt the Company's business and result in a failure to collect accounts receivable, transaction errors, processing inefficiencies, and the loss of sales and customers, causing the Company's reputation and results of operations to suffer. In addition, IT systems may be vulnerable to damage or interruption from circumstances beyond the Company's control, including fire, natural disasters, systems failures, security breaches and viruses. Any such damage or interruption could have a material adverse effect on our business, operating results, margins and financial condition.

Undersea Fiber Optic Cable Systems

If failures occur in our undersea fiber optic cable systems, our ability to immediately restore our service may be limited.

Our undersea fiber optic cable systems carry a large portion of our traffic to and from the contiguous lower 48 states. If a failure occurs and we are not able to secure alternative facilities, some of the communications services we offer to our customers could be interrupted, which could have a material adverse effect on our business, financial position, results of operations or liquidity.

Managed IT Services

Our expansion into managed IT services may not be achieved as planned which could impact our ability to grow revenue.

We are expanding our business to provide more managed IT services along with our traditional telecom services. The delivery of professional services is not without risk, and it is possible that we may fail to execute on one or more managed IT service projects exposing the company to legal claims and reputational risk.

Intellectual Property

Third parties may claim that the Company is infringing upon their intellectual property, and the Company could suffer significant litigation or licensing expenses or be prevented from selling products.

Although the Company does not believe that any of its products or services infringe upon the valid intellectual property rights of third parties, the Company may be unaware of intellectual property rights of others that may cover some of its technology, products or services. Any litigation growing out of third party patents or other intellectual property claims could be costly and time consuming and could divert the Company's management and key personnel from its business operations. The complexity of the technology involved and the uncertainty of intellectual property litigation increase these risks. Resolution of claims of intellectual property infringement might also require the Company to enter into costly license agreements. Likewise, the Company may not be able to obtain license agreements on acceptable terms. The Company also may be subject to significant damages or injunctions against development and sale of certain of its products. Further, the Company often relies on licenses of third party intellectual property for its businesses. The Company cannot ensure these licenses will be available in the future on favorable terms or at all. If any of these risks materialize, it could have a material adverse effect on our business, operating results, margins and financial condition.

Table of Contents

Security Breaches

A failure in or breach of our operational or security systems or infrastructure, or those of third parties, could disrupt our businesses, result in the disclosure of confidential information or damage our reputation. Any such failure also could have a significant adverse effect on our cash flows, financial condition, and results of operations.

Our operations rely on the secure processing, storage and transmission of confidential and other information in our computer systems and networks. Although we take protective measures and endeavor to modify them as circumstances warrant, the security of our computer systems, software and networks may be vulnerable to breaches, unauthorized access, misuse, computer viruses or other malicious code and other events that could have a security impact. Additionally, breaches of security may occur through intentional or unintentional acts by those having authorized or unauthorized access to confidential or other information. If one or more such events occur, this potentially could jeopardize our information or our customers' information processed and stored in, and transmitted through, our computer systems and networks. We may be required to expend significant additional resources to modify our protective measures or to investigate and remediate vulnerabilities or other exposures arising from operational and security risks, and we may be subject to litigation and financial losses that are either not insured against or not fully covered through any insurance maintained by us.

With regard to the physical infrastructure that supports our operations, we have taken measures to implement backup systems and other safeguards, but our ability to conduct business may be adversely affected by any disruption to that infrastructure. Such disruptions could involve electrical, communications, internet, transportation or other services used by us or third parties with whom we conduct business. The costs associated with such disruptions, including any loss of business, could have a significant adverse effect on our results of operations or financial condition.

Any of these operational and security risks could lead to significant and negative consequences, including reputational harm as well as loss of customers and business opportunities, which in turn could have a significant adverse effect on our businesses, financial condition and results of operations.

Cyber-attacks may damage our networks or breach customer and other proprietary data, leading to service disruption, harm to reputation, loss of customers, and litigation over privacy violations.

All industries that rely on technology in customer interactions are increasingly at risk for cyber-attacks. A cyber-attack could be levied against our network, causing disruption of operations and service, requiring implementation of greater network security measures, and resulting in lost revenue due to lost service. A cyber-attack could also be targeted to infiltrate customer proprietary and other data, breaching customer privacy, resulting in misuse of customer information and other data, and possibly leading to litigation over privacy breaches and causing harm to the

Company's reputation. In the event of a cyber-attack, Company insiders could utilize their knowledge of such an attack in trading the Company's publicly traded shares. We rely on a variety of procedures to guard against cyber-attacks, and to take appropriate actions in the event of a cyber-attack, but the frequency of threats from these attacks is growing globally and the risk to us is also growing.

Pension Plans

We may incur substantial and unexpected liabilities arising out of our pension plans.

Our pension plans could result in substantial liabilities on our balance sheet. These plans and activities have and will generate substantial cash requirements for us and these requirements may increase beyond our expectations in future years based on changing market conditions. The difference between projected plan obligations and assets, or the funded status of the plans, is a significant factor in determining the net periodic benefit costs of our pension plans and the ongoing funding requirements of those plans. Changes in interest rates, mortality rates, health care costs, early retirement rates, investment returns and the market value of plan assets can affect the funded status of our defined benefit pension and cause volatility in the net periodic benefit cost and future funding requirements of the plans. In the future, we may be required to make additional contributions to our defined benefit plan. Plan liabilities may impair our liquidity, have an unfavorable impact on our ability to obtain financing and place us at a competitive disadvantage compared to some of our competitors who do not have such liabilities and cash requirements.

Table of Contents

Our most significant pension plan is the AEPF in which we participate on behalf of substantially all of our employees. The AEPF is a multi-employer pension plan to which we make fixed, per employee, contributions through our collective bargaining agreement with the IBEW, which covers our IBEW represented workforce, and a special agreement, which covers most of our non-represented workforce. Because our contribution requirements are fixed, we cannot easily adjust our annual plan contributions to address our own financial circumstances. Currently, this plan is not fully funded, which means we may be subject to increased contribution obligations, penalties, and ultimately, we could incur a contingent withdrawal liability should we choose to withdraw from the AEPF for economic reasons. Our contingent withdrawal liability is an amount based on our pro-rata share among AEPF participants of the value of the funding shortfall. This contingent liability becomes due and payable by us if we terminate our participation in the AEPF. Moreover, if another participant in the AEPF goes bankrupt, we would become liable for a pro-rata share of the bankrupt participant's vested, but unpaid, liability for accrued benefits for that participant's employees. This could result in a substantial unexpected contribution requirement and making such a contribution could have a material adverse effect on our cash position and other financial results. These sources of potential liability are difficult to predict.

Given the complexity of pension-related matters we may not, in every instance, be in full compliance with applicable requirements.

Key Members of Senior Management

We depend on key members of our senior management team; our performance could be adversely impacted if they depart and we cannot find suitable replacements.

Our success depends largely on the skills, experience and performance of key members of our senior management team as well as our ability to attract and retain other highly qualified management and technical personnel. There is competition for qualified personnel in our industry and we may not be able to attract and retain the personnel necessary for the development of our business. Our remote location also presents a challenge to us in attracting new talent. If we lose one or more of our key employees, our ability to successfully implement our business plan could be materially adversely affected. We do not maintain any "key person" insurance on any of our personnel.

Future Acquisitions

Future acquisitions could result in operating and financial difficulties.

Our future growth may depend, in part, on acquisitions. To the extent that we grow through acquisitions, we will face the operational and financial risks that commonly accompany that strategy. We would also face operational risks, such as failing to assimilate the operations and personnel of the acquired businesses, disrupting their ongoing businesses, increasing the complexity of our business, and impairing management resources and management's relationships with employees and customers as a result of changes in their ownership and management. Further, the evaluation and negotiation of potential acquisitions, as well as the integration of an acquired business, may divert management time and other resources. Some acquisitions may not be successful and their performance may result in the impairment of their carrying value.

Volatility Risks Related to our Common Stock

Continued volatility in the price of our common stock could negatively affect us and our stockholders.

The trading price of our common stock has been impacted by factors, many of which are beyond our control, including actual or anticipated variations in quarterly financial results, changes in financial expectations by securities analysts and announcements by our current and future competitors of significant acquisitions, strategic partnerships, joint ventures or capital commitments. In addition, our financial results in the future may be below the expectations of securities analysts and investors. Broad market and industry factors could also negatively affect the price of our common stock regardless of our operating performance. Future volatility in our stock price could materially adversely affect the trading market and prices for our common stock as well as our ability to issue additional securities or to secure additional financing.

Table of Contents

Location Specific Risk

We operate in remote areas subject to geologic instability and other natural events which could negatively impact our operations.

Many of our operations are located in areas that are prone to earthquakes, fires, and other natural disturbances. Many of these areas have limited emergency response assets and may be difficult to reach in an emergency situation. Should an event occur, it could be weeks or longer before remediation efforts could be implemented, if they could be implemented at all. The scope and risk of such an event occurring is difficult to gauge.

Internal Control Over Financial Reporting

Our internal control over financial reporting may not be effective, which could cause our financial reporting to be unreliable.

Because of its inherent limitations, and irrespective of the existence of material weaknesses, our internal control over financial reporting may not prevent or detect all misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that such controls may become inadequate because of changes in conditions, or the degree of compliance with policies and procedures may deteriorate. Any of these circumstances could cause our financial reporting to be unreliable.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Our principal properties do not lend themselves to simple description by character and location. The components of our gross investment in property, plant and equipment consisted of the following as of December 31, 2018 and 2017:

(in thousands)	2018	2017
Land, buildings and support assets	\$ 197,381	\$ 195,063
Central office switching and transmission	387,008	380,954
Outside plant, cable and wire facilities	750,492	739,547
Other	17,126	12,016
Construction work in progress	38,615	30,349
	\$ 1,390,622	\$ 1,357,929

Our property, plant and equipment are used in our communications networks.

Land, buildings and support assets consist of land, land improvements, central office and certain administrative office buildings as well as general purpose computers, office equipment, vehicles and other general support equipment. Central office switching and transmission and wireless switching and transmission consist primarily of switches, routers and transmission electronics for our regulated and wireless entities, respectively. Outside plant and cable and wire facilities include primarily conduit and cable. We own substantially all of our telecommunications equipment required for our business. However, we lease certain facilities and equipment under various capital and operating lease arrangements when the leasing arrangements are more favorable to us than purchasing the assets.

We own and lease office facilities and related equipment for our headquarters, central office buildings and operations in locations throughout Alaska and Oregon. Our principal executive and administrative offices are located in Anchorage, Alaska. We believe we have appropriate easements, rights-of-way and other arrangements for the accommodation of our pole lines, underground conduits, aerial, underground and undersea cables, and wires. However, these properties do not lend themselves to simple description by character and location.

Table of Contents

In addition to land and structures, our property consists of equipment necessary for the provision of communication services. This includes central and IP office equipment, customer premises equipment and connections, towers, pole lines, remote terminals, aerial, underground and undersea cable and fiber optic and copper wire facilities, vehicles, furniture and fixtures, computers and other equipment. We also own certain other communications equipment held as inventory for sale or lease. Substantially all of our communications equipment and other network equipment are located in buildings that we own or on land within our local service coverage area.

We have insurance to cover certain losses incurred in the ordinary course of business, including excess general liability, property coverage including business interruption, director and officers and excess employment practices liability, excess auto, crime, fiduciary, workers' compensation and non-owned aircraft insurance in amounts and with deductibles that are typical of similar operators in our industry and with reputable insurance providers. Central office equipment, buildings, furniture and fixtures and certain operating and other equipment are insured under a blanket property insurance program. This program provides substantial limits of coverage against "all risks" of loss including fire, windstorm, flood, earthquake and other perils not specifically excluded by the terms of the policies. As is typical in the communications industry, we are self-insured for damage or loss to certain of our transmission facilities, including our buried, undersea and above ground transmission lines. We self-insure with respect to employee health insurance, primary general liability, primary auto liability and primary employment practices liability subject to stop-loss insurance with insurance carriers that caps our liability at specified limits. We believe our insurance coverage is adequate; however, if we become subject to substantial uninsured liabilities due to damage or loss to such facilities, our financial position, results of operations or liquidity may be adversely affected.

Substantially all of our assets (including those of our subsidiaries) have been pledged as collateral for our 2019 Senior Credit Facility.

Item 3. Legal Proceedings

We are involved in various claims, legal actions, personnel matters and regulatory proceedings arising in the ordinary course of business, including various legal proceedings involving regulatory matters described under "Item 1, Business-Regulation". We have recorded a liability for estimated litigation costs of \$1.2 million as of December 31, 2018, against certain current claims and legal actions. We believe that the disposition of these matters will not have a material adverse effect on the Company's consolidated financial position, comprehensive income or cash flows. It is the Company's policy to expense costs associated with loss contingencies, including any related legal fees, as they are incurred.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for Registrant’s Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Our common stock is traded on the Nasdaq Global Select Market under the symbol ‘ALSK’. The following table presents, for the periods indicated, the high and low sales prices of our common stock as reported by Nasdaq.

2018 Quarters	High	Low	2017 Quarters	High	Low
4 th	\$1.86	\$1.37	4 th	\$2.91	\$2.04
3 rd	\$2.04	\$1.56	3 rd	\$2.48	\$2.02
2 nd	\$1.82	\$1.39	2 nd	\$2.61	\$1.76
1 st	\$2.71	\$1.77	1 st	\$1.96	\$1.60

Table of Contents

As of March 1, 2019, there were 53.3 million shares of our common stock issued and outstanding and approximately 344 record holders of our common stock. Because brokers and other institutions hold many of our shares of existing common stock on behalf of stockholders, we are unable to estimate the total number of stockholders represented by these record holders.

Dividends

In the fourth quarter of 2012, our Board of Directors suspended the quarterly dividend paid to shareholders. The dividend suspension was required in connection with the amendment to our 2010 Senior Credit Facility as part of the sale of our wireless business in the first quarter of 2015. Under the terms of our 2017 Senior Credit Facility, payment of cash dividends on our common stock was not permitted until such time that the Company's Net Total Leverage Ratio (as defined in the 2017 Senior Credit Facility) was not more than 2.75 to 1.00 and certain other liquidity measures were met. The Company had not met all required liquidity measures through December 31, 2018. The 2017 Senior Credit Facility was terminated on January 15, 2019. Calculation and reporting of covenants under the 2017 Senior Credit Facility was not required as of December 31, 2018.

Payment of cash dividends is also subject to certain liquidity and cash flow limitations under the 2019 Senior Credit Facility. See the "First Amended and Restated Credit Agreement, dated as of January 15, 2019, by and among Alaska Communications, as the borrower, the Company and certain of its direct and indirect subsidiaries, as guarantors, ING Capital LLC, as administrative agent, and the lenders party thereto," filed as Exhibit 10.1 to the Current Report on Form 8-K filed on January 22, 2019, which is incorporated herein by reference, for additional information.

The reinstatement of dividend payments in the future will depend on future competitive market and economic conditions and financial, business, regulatory and other factors, many of which are beyond our control.

Additional factors that may affect our future dividend policy include:

- our reliance on dividends, interest and other payments, advances and transfer of funds from our subsidiaries to meet our debt service and pay dividends, if any;
- reductions in the availability of cash due to changes in our operating earnings, working capital requirements and anticipated cash needs;
- the discretion of our Board of Directors; and
- restrictions under Delaware law.

Notably, nothing requires us to declare or pay dividends. Our stockholders have no contractual or other legal right to dividends.

See “Item 1A, Risk Factors—Volatility Risks Related to our Common Stock”.

Securities Authorized for Issuance under Equity Compensation Plans

The information set forth in this Report under “Item 12, Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters—Securities Authorized for Issuance under Equity Compensation Plans” is incorporated herein by reference.

Common Stock Performance Graph

The stock performance information required under this item is incorporated into this Form 10-K by reference to our Proxy Statement for our 2019 Annual Meeting of Stockholders.

Item 6. Selected Financial Data

As a smaller reporting company, the Company is not required to provide the information called for by this Item.

Table of Contents

Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations

The following discussion and analysis should be read in conjunction with the Consolidated Financial Statements and related notes and the other financial information included elsewhere in this Form 10-K.

OVERVIEW

We are a fiber broadband and managed IT services provider, offering technology and service enabled customer solutions to business and wholesale customers in and out of Alaska. We also provide telecommunication services offering value and exceptional convenience to consumers throughout the state. Our facilities based communications network extends throughout Alaska and connects to the contiguous states via our two diverse undersea fiber optic cable systems. Our network is among the most expansive in Alaska and forms the foundation of service to our customers. We operate in a largely two-player terrestrial wireline market and we estimate our market share to be less than 25% statewide. However, our revenue performance relative to our largest competitor suggests that we are gaining market share in the markets we are serving. A third-party market study we sponsored in the fourth quarter of 2018 suggests that we have a market share of close to 40% for “near net” opportunities, that is, within one mile of our fiber network.

The sections that follow provide information about important aspects of our operations and investments and include discussions of our results of operations, financial condition and sources and uses of cash. In addition, we have highlighted key trends and uncertainties to the extent practicable. The content and organization of the financial and non-financial data presented in these sections are consistent with information we use in evaluating our own performance and allocating our resources.

We operate in a geographically diverse state with unique characteristics. We monitor the state of the economy in general. In doing so, we compare Alaska economic activity with broader economic conditions. In general, we believe that the Alaska telecommunications market, as well as general economic activity in Alaska, is affected by certain economic factors, which include:

- investment activity in the oil and gas markets and the price of crude oil
- tourism levels
- governmental spending and activity of military personnel
- the price and price trends of bandwidth
- the growth in demand for bandwidth
- decline in demand for voice and other legacy services
- local customer preferences

unemployment levels
housing activity and development patterns

We have observed variances in the factors affecting the Alaska economy as compared to the U.S. as a whole. Some factors, particularly the price of oil and gas, have a greater direct impact on the Alaska economy compared to other macro-economic trends impacting the U.S. economy as a whole.

Historically, the Alaska economy has benefited from a stable employment base, including a growing tourism industry. However, economic indicators have been impacted by the substantial decline in the price of crude oil in 2015 through 2017. Crude oil prices recovered somewhat in 2018, but have not returned to pre-2015 levels. The Alaskan economy entered a moderate recession beginning in the second half of 2015, which economists currently expect to end during 2019. The population of Alaska grew marginally in 2016, remained steady in 2017 and declined slightly in 2018. Employment levels declined approximately 2.3%, 1.3% and 0.3% in 2016, 2017 and 2018, respectively. The decline in 2018 was driven by declines in retail, manufacturing, professional and business, offset by increases in health care, transportation and warehousing, utilities, leisure, hospitality and construction. Economists are currently expecting marginal employment growth in 2019. State revenue relies on tax revenue from the production of crude oil and investment in resource development projects by exploration companies in Alaska. The state's budget deficit has been reduced from \$3.7 billion in 2015 to \$0.7 billion in 2019 (as enacted) primarily through spending reductions and utilization of interest earned on the state's permanent fund. The prospect of continued lower tax revenue continues to impact the overall economy and may affect our future financial performance.

Management estimates the Alaska wireline telecom and IT services market to be approximately \$1.65 billion. This market is comprised of the IT services market of approximately \$840 million, the broadband market of approximately \$700 million and the voice market of approximately \$110 million. Management estimates that over 85% of this market opportunity is from the business and wholesale customer segment.

Table of Contents

Our objective is to continue generating sector leading revenue growth in the broadband market through investments in sales, service, marketing and product development while expanding our broadband network capabilities through higher efficiencies, automation, new technology and expanded service areas. We also intend to continue our growth in the managed IT services market by providing these services to our broadband customers, and leveraging our position as the premier Cloud Enabler for business in the state of Alaska. We also seek to continuously improve our customer service, and utilize the Net Promoter Score (“NPS”) framework to track the feedback of our customers for virtually all customer interactions. We believe that higher NPS scores will allow us to increasingly provide a differentiated service experience for our customers, which will support our growth. We are focused on expanding our margins, and we utilize the LEAN framework to eliminate waste and simplify how we do business.

On March 13, 2017, we announced that our Board of Directors authorized a stock repurchase program for the Company to repurchase up to \$10.0 million of its Common Stock through December 2019.

On January 15, 2019, the Company entered into the 2019 Senior Credit Facility, consisting of an Initial Term A Facility in the amount of \$180.0 million, a Revolving Facility in an amount not to exceed \$20.0 million and a Delayed-Draw Term A Facility in an amount not to exceed \$25.0 million. The 2019 Senior Credit Facility also provides for Incremental Term A Loans up to an aggregate principal amount of the greater of \$60.0 million and trailing twelve month EBITDA, as defined in the Agreement. On January 15, 2019, proceeds from the Initial Term A Facility of \$180.0 million were used to repay in full the outstanding principal balance of the Term A-1 Facility and Term A-2 Facility under the Company’s 2017 Senior Credit Facility of \$112.5 million and \$59.3 million, respectively, plus accrued and unpaid interest, pay fees and expenses associated with the Agreement and for general corporate purposes. The 2017 Senior Credit Facility was terminated on January 15, 2019. This refinancing transaction resulted in the extension of scheduled principal payments, a reduction in interest rates and resetting and widening key covenant thresholds.

Business Plan Core Principles

Our results of operations, financial position and sources and uses of cash in the current and future periods reflect our focus on being the most successful broadband solutions company in Alaska by delivering the best customer experience in the markets we choose to serve. To do this we will continue to:

Create a Workplace That Develops Our People and Celebrates Success. We believe an engaged workforce is critical to our success. We are deeply committed to the development of our people and creating opportunities for them.

Create a Consistent Customer Experience Every Time. We strive to deliver service as promised to our customers, and make it right if our customers are not satisfied with what we delivered. We track virtually every customer

interaction and we utilize the Net Promoter Score framework for assessing the satisfaction of our customers.

Develop Our Network Focusing on Efficient Delivery and Management. We are moving toward higher efficiencies and improved customer experience through automation, new technology and expanded geographic service areas. Our network architecture is a simpler mix of our fiber backbone, supported with fixed wireless (“FiWi”), WiFi and satellite.

Relentlessly Simplify and Transform How We Do Business. We believe we must reduce waste, which is defined as any activity that does not add value to its intended customer. Doing so improves the experience we deliver to our customers. We make investments in technology and process improvement, utilize the LEAN framework, and expect these efforts to meaningfully impact our financial performance in the long-term.

Offer Broadband and Managed IT Solutions that Create Market Differentiation. We are building on strength in designing and providing new products and solutions to our customers.

Table of Contents

We believe we can create value for our shareholders by:

Driving revenue growth through increasing business broadband and managed IT service revenues,
Generating Adjusted EBITDA and Adjusted Free Cash Flow growth through margin management, and
Careful allocation of capital, including selectively investing success based capital into opportunities that generate appropriate returns on investments.

2019 Operating Initiatives

Continue our focus on robust broadband growth as the foundation of our other initiatives.

Ignite success in the Consumer customer market, including the Mass Market group, through the expansion and enhancement of our products, services and the supporting infrastructure.

Continue to strengthen our Enterprise and Carrier customer group, which is the primary driver of our Business and Wholesale group, through increased focus on specific products and services.

Improve market penetration of our MIT products and services.

Build on our work in 2018 in the areas of network modernization through SD-WAN, Fixed Wireless Access, fiber fed Multi-Dwelling Units, Optical Transport Network modernization, and adding product capabilities that leverage our network.

Effectively manage operating expenses and capital spending to improve our margin profile over the long term.

Continue to meet our CAF II deployment obligations.

Successful implementation of an IT project targeted at replacing several of our legacy IT systems.

Continued emphasis on employee engagement and effective communication.

Evaluate strategic opportunities in and out of Alaska that address scale and geographic diversification and reduce the risk of investments made in our company.

Revenue Sources by Customer Group

We operate our business under a single reportable segment. We manage our revenues based on the sale of services and products to the three customer categories listed below. Revenue in the following management's discussion and analysis is presented by customer and product category, combining revenue accounted for under Revenue from Contracts with Customers ("ASC 606") and other guidance.

Business and Wholesale (broadband, voice and managed IT services)

Consumer (broadband and voice services)

Regulatory (access services, high cost support and carrier termination)

Business and Wholesale

Providing services to Business and Wholesale customers provides the majority of our revenues and is expected to continue being the primary driver of our growth over the next few years. Our business customers include large enterprises in the oil and gas, healthcare, education, Alaska Native Corporations, financial industries, Federal, state and local governments, and small and medium business. We were the first Alaska-based carrier to be Carrier Ethernet 2.0 Certified and are currently the only Alaska-based carrier certified for multipoint-to-multipoint services. This certification means that we meet international standards for the quality of our broadband services. We also offer IP based voice including the largest SIP implementations in the state of Alaska, and are the first Microsoft Express Route provider in the state. We believe our network differentiates us in the markets we serve, because we prefer not to compete on price; but on the quality, reliability, customer service and the overall value of our solutions. Accordingly, we have significant capacity to “sell into” the network we operate and do so at what we believe are attractive incremental gross margins.

Business services have experienced significant growth and we believe the incremental economics of business services are attractive. Given the demand from our customers for more bandwidth and services, we expect revenue growth from these customers to continue for the foreseeable future. We provide services such as voice and broadband, managed IT services including remote network monitoring and support, managed IT security and IT professional services, and long distance services primarily over our own terrestrial network. We are continuing our efforts to position the Company as the premier Cloud Enabler for business in the state of Alaska.

Table of Contents

Our wholesale customers are primarily in-state, national and international telecommunications carriers who rely on us to provide connectivity for broadband and other needs to access their customers over our Alaskan network. The wholesale market is characterized by larger transactions that can create variability in our operating performance. We have a dedicated sales team that sells into this customer segment, and we expect wholesale revenue to grow for the foreseeable future.

Consumer

We also provide broadband, voice and IT services to residential customers, including residential homes and multi-dwelling units. Given that our primary competitor has extensive quad play capabilities (video, voice, wireless and broadband) we target how and where we offer products and services to this customer group in order to maintain our returns. Our focus is to leverage the capabilities of our existing network and sell customers our highest available bandwidth. Our primary competitive advantage is that we offer reliable internet service without data caps, while our competitor, with certain exceptions, charges customers or throttles customers' speeds for exceeding given levels of data usage. We experienced consistent growth in consumer broadband revenues in 2018. More recently, we expanded product and service offerings to this customer group and have implemented fiber fed wifi and certain fixed wireless technology solutions for providing broadband, all of which have provided a basis for continued growth in this market in 2019.

Table of Contents**Regulatory**

Regulatory revenue is generated from three primary sources: (i) access charges, which include interstate and intrastate switched access and special access charges, and cellular access; (ii) surcharges billed to the end user (pass-through and non-pass-through); and (iii) federal and state support. We provide voice and broadband origination and termination services to interstate and intrastate carriers. While we are compensated for these services, these revenue streams have been in decline and we expect them to continue to decline, although at a relatively predictable rate. In addition, as regulators have reformed traditional access charges, they have simultaneously implemented new end user surcharges that contribute to our revenue. The following table summarizes our primary sources of regulatory revenue and their contribution to total revenue in 2018 (dollars in thousands).

Source	Description	2018 Revenue	As a % of Regulatory Revenue	As a % of Total Revenue
Access Charges				
	Interstate and intrastate switched access are services based primarily on originating and terminating access minutes from other carriers. Special access is primarily access to dedicated circuits sold to wholesale customers, substantially all of which is generated from interstate services. Cellular access is the transport of local network services between switches for cellular companies based on individually negotiated contracts. Access revenue has declined at an average of approximately 9% annually over the past three years.	\$4,548	9.0 %	2.0 %
Total Access Charges		\$4,548	9.0 %	2.0 %
Surcharges				
Pass-Through	We assess our customers for surcharges, typically on a monthly basis, as required by various state and federal regulatory agencies, and remit these surcharges to these agencies. These pass-through surcharges include Federal Universal Access and State Universal Access. These surcharges vary from year to year, and are primarily recognized as revenue, and the subsequent remittance to the state or federal agency as a cost of sale and service. The rates imposed by the regulators continue to increase. However, because the charges are only assessed on a portion of our services, and that portion continues to decline, we expect these revenue streams to decline over time as the revenue base declines.	\$7,874	15.6 %	3.4 %
Other		\$11,560	22.8 %	5.0 %

Other non-pass-through surcharges are collected from our customers as authorized by the regulatory body. The amount charged is based on the type of line: single line business, multi-line business, consumer or lifeline. The rates are established based on federal or state orders. These charges are recorded as revenue and do not have a direct associated cost. Rather, they represent a revenue recovery mechanism established by the FCC or the Regulatory Commission of Alaska.

Total Surcharges		\$19,434	38.4	%	8.4	%
Federal and State Support						
CAF II	In 2016, the FCC released the CAF Phase II order specific to Alaska Communications which transitioned from CAF Phase I frozen support to CAF Phase II. Funding under the new program generally requires the Company to provide broadband service to unserved locations throughout the designated coverage area by the end of a specified build-out period, and meet interim milestone build-out obligations. CAF II revenues are expected to be relatively stable through 2026.	\$19,694	39.0	%	8.5	%
COLR and CCL	The Company is designated by the State of Alaska as a COLR in five of the six study areas. In addition to COLR, the Company receives CCL support. We do not receive COLR or CCL funding for the ACS of Anchorage study area. As a COLR we are required to provide services essential for retail and carrier-to-carrier telecommunication throughout the applicable coverage area.	\$6,896	13.6	%	2.9	%
Total Federal and State Support		\$26,590	52.6	%	11.4	%
Total Regulatory Revenue		\$50,572			21.8	%
Total Revenue		\$232,468				

Table of Contents

Executive Summary

The following summary should be read in conjunction with “Non-GAAP Financial Measures” included in this Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Operating Revenues

Total revenue of \$232.5 million in 2018 increased 2.5% from \$226.9 million in 2017. Business and wholesale revenue increased \$5.5 million, or 3.9%, in 2018 driven by growth in wholesale broadband, managed IT and equipment sales, partially offset by a \$3.7 million decline in rural health care revenue. Consumer and regulatory revenue were relatively unchanged year over year. Total broadband revenue increased \$2.4 million, or 1.9%. In the fourth quarter of 2018, the FCC notified the Company that it had approved the Funding Year 2018 cost-based rural rates for its rural health care customers. As of December 31, 2018, USAC had issued funding commitment letters for the majority of the Company’s rural health care customer applications for Funding Year 2018.

Operating Income

Operating income of \$24.3 million in 2018 increased \$5.0 million, or 25.7%, from \$19.3 million in 2017 due to revenue growth and only marginally higher operating expenses. These items are discussed in more detail below.

Adjusted EBITDA

Adjusted EBITDA of \$60.2 million in 2018 increased \$2.9 million, or 4.9%, from \$57.3 million in 2017 due to the revenue growth partially offset by marginally higher operating expenses. See “Non-GAAP Financial Measures” for the definition of Adjusted EBITDA and a reconciliation of Adjusted EBITDA to Net Income (Loss). As discussed in “Non-GAAP Financial Measures,” the Company does not provide a reconciliation of guidance for Adjusted EBITDA to Net Income (Loss).

Operating Metrics

Business broadband average monthly revenue per user (“ARPU”) of \$331.27 in 2018 decreased from \$334.36 in 2017 due primarily to price compression in the rural health care program. Business broadband connections of 15,234 at December 31, 2018, decreased marginally from connections of 15,293 at December 31, 2017. We count connections on a unitary basis regardless of the size of the bandwidth. For example, a customer that has a 10MB connection is counted as one connection as is a customer with a 1MB connection. While we present metrics related to Business connections, we note that we manage Business and wholesale in terms of new Monthly Recurring Charges (“MRC”) sold. Achievement of sales performance in terms of MRC is the primary operating metric used by management to measure market performance. For competitive reasons, we do not disclose our sales or performance in MRC.

Total consumer broadband connections of 32,793 at December 31, 2018 declined from 33,904 at December 31, 2017. However, connections of 10 Mbps or higher increased to 22,248 at the end of 2018 compared to 21,816 at the end of 2017 reflecting our focus on offering higher speed connections. Consumer broadband ARPU of \$65.41 in 2018 increased from \$61.24 in 2017.

Table of Contents

The table below provides certain key operating metrics as of, or for, the periods indicated.

	2018	2017
Voice		
At December 31:		
Business access lines	69,382	71,699
Consumer access lines	25,784	29,262
For the year ended December 31:		
ARPU business	\$25.38	\$23.39
ARPU consumer	\$32.76	\$29.88

Broadband

At December 31:		
Business connections	15,234	15,293
Consumer connections	32,793	33,904
For the year ended December 31:		
ARPU business	\$331.27	\$334.36
ARPU consumer	\$65.41	\$61.24

Liquidity

We generated cash from operating activities of \$56.2 million in 2018 compared with \$30.4 million in 2017. This increase reflects improved operating performance, cash receipts from the rural health care program in 2018, cash receipts associated with deferred revenue lease arrangements and higher payments on accounts payable and other current liabilities in 2017.

In 2018 and 2017, we invested a total of \$40.2 million and \$32.6 million, respectively, in capital, including capitalized interest and net of the settlement of items accrued in previous periods.

Net debt, defined as total debt excluding debt issuance costs, less cash, cash equivalents and restricted cash held for settlement of the 6.25% Convertible Notes due 2018 (the "6.25% Notes"), at December 31, 2018 was \$161.2 million compared with \$177.2 million at December 31, 2017. The decrease reflects principal payments on the Company's 2017 Senior Credit Facility and an increase in the cash balance. The 6.25% Notes were repurchased on May 1, 2018.

As described above, on January 15, 2019, we entered into an amended and restated credit facility which provides for a reduction in interest rates, extension of principal payment terms, increased borrowing capacity and resetting and widening of key covenant thresholds.

Other Initiatives

During 2018 we successfully deployed our fixed wireless technology across multiple locations and customer markets, implemented service through the C-Band satellite platform, expanded broadband service to consumer customers in multi-dwelling units, opened markets in Nome and certain remote areas of northern Alaska and deployed software defined networking infrastructure.

We also met our service obligations under the CAF Phase II program through December 31, 2018 by providing the requisite broadband coverage to approximately 9,500 locations on a cumulative basis. Certain of these locations utilize fixed wireless technology.

Table of Contents**RESULTS OF OPERATIONS**

The following tables summarize our results of operations for the years ended December 31, 2018 and 2017. Revenue information reflects the organization of revenue streams described in “Revenue Sources by Customer Group” above, combining revenue accounted for under ASC 606 and other guidance. All amounts are discussed at the consolidated level after the elimination of affiliate revenue and expense.

(in thousands)	2018	2017

Year Ended December 31, 2018 Compared to the Year Ended December 31, 2017***Operating Revenue******Business and Wholesale***

Business and wholesale revenue of \$144.6 million increased \$5.5 million, or 3.9%, in 2018 from \$139.1 million in 2017. This increase reflects a \$2.3 million increase in wholesale broadband revenue reflecting higher rates offset by fewer customers, and a \$2.2 million increase in Managed IT services and equipment sales. Voice and other revenue increased \$1.7 million. Business voice connections decreased 2,317, or 3.2%, year over year and ARPU of \$25.38 increased from \$23.39 in 2017. Business broadband revenue declined \$0.6 million, or 1.0%, in 2018 due primarily to year-over-year price compression in the rural health care program, partially offset by a \$1.4 million cumulative adjustment recorded in the second quarter of 2018 for the effect of the rural health care program funding increase on revenue reported in the third and fourth quarters of 2017. The Company's rural health care revenue was \$17.5 million in 2018, including the \$1.4 million adjustment, compared with \$21.2 million in 2017. Business ARPU of \$331.27 in

2018 compares with \$334.36 in 2017 due to rural health care price compression. Business broadband connections decreased marginally year over year. While connections and ARPU serve as data points to support the analysis of period-over-period changes in revenue, they are not critical indicators utilized by the Company to manage the Business and Wholesale customer group.

Consumer

Consumer revenue of \$37.3 million increased \$0.2 million, or 0.5%, in 2018. Broadband revenue increased \$0.7 million due to an increase in ARPU to \$65.41 from \$61.24, offset by a decrease in connections. Voice and other revenue decreased \$0.5 million due to 3,478 fewer connections, partially offset by an increase in ARPU to \$32.76 from \$29.88 in 2017.

Regulatory

Regulatory revenue of \$50.6 million in 2018 was essentially unchanged from \$50.7 million in 2017.

Table of Contents

Operating Expenses

Cost of Services and Sales (excluding depreciation and amortization)

Cost of services and sales (excluding depreciation and amortization) of \$107.5 million increased \$2.9 million, or 2.8%, in 2018 from \$104.6 million in 2017. A \$5.5 million increase in network support costs associated with new customer contracts and a \$1.4 million increase in access charges were partially offset by a \$3.7 million decrease in labor costs.

Selling, General and Administrative

Selling, general and administrative expenses were \$66.6 million in 2018 and 2017. Results in 2018 and 2017 included charges of \$0.8 million and \$2.7 million, respectively, to the allowance for doubtful accounts associated with rural health care customers. This \$1.9 million decrease was offset by marginal year over year increases in outside services and labor costs.

Depreciation and Amortization

Depreciation and amortization expense of \$33.9 million decreased \$2.4 million, or 6.6%, in 2018 from \$36.3 million in 2017. This decrease was due primarily to certain assets reaching the end of their depreciable life.

Other Income and Expense

Interest expense of \$13.4 million in 2018 declined from \$14.9 million in 2017 due primarily to lower average borrowing levels. The \$7.5 million loss on extinguishment of debt in 2017 included \$5.2 million associated with settlement of the Tender Offer on the Company's 6.25% Notes in the second quarter and \$2.3 million associated with the settlement of the 2015 Senior Credit Facilities in the first quarter.

Income Taxes

Income tax expense in 2018 of \$2.0 million reflects a \$0.7 million benefit associated with the Tax Cuts and Jobs Act and a \$0.6 million credit associated with the effect of adjustments to the budget sequestration rate on the Alternative Minimum Tax. Excluding these two items, the income tax provision was \$3.3 million and the effective tax rate was 30.0%. Income tax expense of \$2.6 million in 2017 consisted of a Federal tax benefit of \$1.3 million at the statutory rate of 35.0% and a state tax benefit, net of the Federal benefit, of \$0.2 million, or 6.1%. The income tax provision also reflected expense \$3.9 million associated with the impact of enacted rate changes on existing net deferred tax assets. Excluding discrete items, the Company's effective tax rate was approximately 36% in 2017.

Net Loss Attributable to Noncontrolling Interest

The net loss attributable to the noncontrolling interest of our joint venture with Quintillion Holdings, LLC was \$92 thousand and \$129 thousand in 2018 and 2017, respectively.

Net Income (Loss) Attributable to Alaska Communications

Net income attributable to Alaska Communications of \$9.1 million in 2018 compares with a net loss of \$6.1 million in 2017. The year over year results reflect the revenue and expense items discussed above.

FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Cash Flows

We satisfied our cash requirements for operations, capital expenditures and scheduled debt service under our 2017 Senior Credit Facility in 2017 through internally generated funds, selected draws on our revolving credit facility (all which were repaid in 2018) and cash on hand. At December 31, 2018, we had \$13.4 million in cash and cash equivalents and a \$15.0 million undrawn revolving credit facility.

On January 15, 2019, we completed a refinancing transaction. See the discussion under "Liquidity and Capital Resources" below.

Table of Contents

A summary of significant sources and use of funds for the years ended December 31, 2018 and 2017 is as follows:

(in thousands)	2018	2017
Net cash provided by operating activities	\$56,195	\$30,406
Capital expenditures	\$(37,957)	\$(32,945)
Capitalized interest	\$(2,001)	\$(1,140)
Change in unsettled capital expenditures	\$(227)	\$1,500
Proceeds on sale of assets	\$1	\$40
Repayments of long-term debt	\$(31,030)	\$(176,466)
Proceeds from the issuance of long-term debt	\$14,000	\$183,000
Debt issuance costs	\$-	\$(5,559)
Cash paid for debt extinguishment	\$-	\$(5,522)
Interest paid ⁽¹⁾	\$14,254	\$14,504
Income taxes paid (refunded), net ⁽¹⁾	\$3	\$(946)

(1)Included in net cash provided by operating activities.

Cash Flows from Operating Activities

Cash provided by operating activities of \$56.2 million in 2018 compares with \$30.4 million in 2017. The year over year increase was primarily due to cash receipts from the rural health care program in 2018, improved operating performance and higher payments on accounts payable and other current liabilities in 2017.

Cash provided by operating activities of \$56.2 million in 2018 reflects net income excluding non-cash items (defined as cash provided by operating activities excluding changes in operating assets and liabilities) of \$46.3 million, cash receipts from the rural health care program of \$16.5 million (approximately \$10.0 million of which was recorded as revenue in 2017) and \$10.4 million of cash receipts associated with deferred revenue lease arrangements. These items were partially offset by a \$7.0 million net increase in accounts receivable and other assets and liabilities.

Cash provided by operating activities of \$30.4 million in 2017 reflects net income excluding non-cash items of \$36.7 million and a net \$6.3 million increase in other assets and liabilities. The increase in other assets and liabilities reflects a \$12.5 million increase in accounts receivable largely due to the timing of receipts from certain rural health care customers, partially offset by a net \$6.2 million decrease in other items.

Interest payments, net of cash interest income and including capitalized interest, were \$14.3 million and \$14.5 million in 2018 and 2017, respectively. Through an interest rate swap entered into on June 14, 2017, interest on approximately

50% of the term loan components of our 2017 Senior Credit Facility at December 31, 2017 was substantially fixed at an annual rate of 6.494% for the period December 2017 through June 2019.

Cash Flows from Investing Activities

Cash used by investing activities of \$40.2 million in 2018 consisted of expenditures on capital (capital expenditures including capitalized interest and net of the change in unsettled capital expenditures) totaling \$40.2 million. Of \$38.0 million incurred in 2018, \$19.9 million was success based versus maintenance.

Cash used by investing activities of \$32.5 million in 2017 consisted primarily of expenditures on capital totaling \$32.6 million. Of \$32.9 million incurred in 2017, \$22.6 million was success based versus maintenance.

Our networks require the timely maintenance of plant and infrastructure. Future capital requirements may change due to impacts of regulatory decisions that affect our ability to recover our investments, changes in technology, the effects of competition, changes in our business strategy, and our decision to pursue specific acquisition and investment opportunities. We intend to fund future capital expenditures with cash on hand, net cash generated from operations and selected borrowings.

Table of Contents

Cash Flows from Financing Activities

Cash used by financing activities was \$17.2 million in 2018. Repayments of long-term debt of \$31.0 million included scheduled principal payments on the term loan components of our 2017 Senior Credit Facility of \$6.6 million, repayment of draws totaling \$14.0 million on the revolving credit facility and repurchase of the 6.25% Notes of \$10.0 million. Proceeds from the issuance of long-term debt of \$14.0 million consisted of draws on the revolving credit facility.

Cash used by financing activities was \$4.8 million in 2017. Repayments of long-term debt of \$176.5 million included repayment of the outstanding principal of the 2015 Senior Credit Facilities of \$86.8 million, settlement of the tender offer on the Company's 6.25% Notes in the principal amount of \$84.0 million, a scheduled principal payment of \$1.7 million on the term loan components of our 2017 Senior Credit Facility and repayment of a \$3.0 million draw on the revolving credit facility. Proceeds from the issuance of long-term debt of \$183.0 million consisted of gross proceeds of \$180.0 million from the issuance of the 2017 Senior Credit Facility and a \$3.0 million draw on the revolving credit facility. Payment of debt issuance costs and discounts of \$5.6 million were associated with the issuance of the 2017 Senior Credit Facility. Cash paid for debt extinguishment of \$5.5 million was associated with settlement of the 2015 Senior Credit Facilities and the tender offer on the 6.25% Notes.

Liquidity and Capital Resources

Consistent with our history, our current and long-term liquidity could be impacted by a number of challenges, including, but not limited to: (i) potential future reductions in our revenues resulting from governmental and public policy changes, including regulatory actions affecting inter-carrier compensation, changes in revenue from Universal Service Funds, and the significant delay in the Rural Health Care Program funding receipts; (ii) servicing our debt and funding principal payments; (iii) the funding of other obligations, including our pension plans and lease commitments; (iv) competitive pressures in the markets we serve; (v) the capital intensive nature of our industry; (vi) our ability to respond to and fund the rapid technological changes inherent to our industry, including new products; and (vii) our ability to obtain adequate financing to support our business and pursue growth opportunities.

We are responding to these challenges by (i) driving top line growth in broadband service revenues with a focus on business and wholesale customers; (ii) managing our cost structure to deliver consistent Adjusted EBITDA and Adjusted Free Cash flow performance; and (iii) holding our base capital spending to approximately \$35 to \$40 million annually.

As of December 31, 2018, total long-term obligations outstanding, including current portion, were \$174.5 million, consisting of \$171.7 million in term loans under our 2017 Senior Credit Facility and \$2.8 million in capital lease and

other obligations. As of December 31, 2018, we had \$13.4 million in cash and access to the full amount of the \$15.0 million revolving credit facility under our 2017 Senior Credit Facility.

As described in more detail below, on January 15, 2019, we entered into an amended and restated credit facility which provides for a reduction in interest rates, extension of principal payment terms, increased borrowing capacity and resetting and widening of key covenant thresholds.

We believe that we will have sufficient cash on hand, cash provided by operations and available borrowing capacity under our 2019 Senior Credit Facility to service our debt, and fund our operations, capital expenditures and other obligations over the next twelve months. However, our ability to make such an assessment is dependent upon our future financial performance, which is subject to future economic conditions and to financial, business, regulatory, competitive entry and many other factors, many of which are beyond our control and could impact us during the time period of this assessment.

2017 Senior Credit Facility

As described below, proceeds from the 2019 Senior Credit Facility were utilized, in part, to repay the outstanding principal plus accrued and unpaid interest, associated with the 2017 Senior Credit Facility, which was terminated on January 15, 2019.

As required under the terms of the 2017 Senior Credit Facility, the Company was in compliance with all covenants as of September 30, 2018. Covenant compliance and reporting under the 2017 Senior Credit Facility was not required as of December 31, 2018, as it was terminated on January 15, 2019.

Table of Contents***2019 Senior Credit Facility***

On January 15, 2019, we entered into the 2019 Senior Credit Facility, consisting of an Initial Term A Facility in the amount of \$180 million, a Revolving Facility in an amount not to exceed \$20 million and a Delayed-Draw Term A Facility in an amount not to exceed \$25 million. The 2019 Senior Credit Facility also provides for Incremental Term A Loans up to an aggregate principal amount of the greater of \$60 million and trailing twelve month EBITDA, as defined. On January 15, 2019, proceeds from the Initial Term A Facility of \$180 million were used to repay in full the outstanding principal balance of the Term A-1 Facility and Term A-2 Facility under the Company's 2017 Senior Credit Facility totaling \$171.8 million, plus accrued and unpaid interest, pay fees and expenses associated with the Agreement and for general corporate purposes.

Principal payments on the Initial Term A Facility, Delayed-Draw A Facility and any amounts outstanding under the Incremental Term A Loans are due commencing in the third quarter of 2019 as follows: the third quarter of 2019 through the second quarter of 2020 – 0.625% per quarter; the third quarter of 2020 through the second quarter of 2022 – 1.25% per quarter; the third quarter of 2022 through the second quarter of 2023 – 1.875% per quarter; and the third quarter of 2023 through the fourth quarter of 2023 – 2.5% per quarter. The remaining outstanding principal balance, including any amounts outstanding under the Revolving Facility, is due on January 15, 2024.

The obligations under the 2019 Senior Credit Facility are secured by substantially all of the personal property and real property of the Company, subject to certain agreed exceptions. The 2019 Senior Credit Facility provides for events of default customary for credit facilities of this type, including non-payment defaults on other debt, misrepresentation, breach of covenants, representations and warranties, change of control, and insolvency and bankruptcy. The 2019 Senior Credit Facility contains customary representations, warranties and covenants, including covenants limiting the incurrence of debt, the payment of dividends and repurchase of the Company's common stock.

Financial covenants as defined in the Agreement are summarized below. Calculation and reporting of covenants is required effective March 31, 2019.

Maximum Net Total Leverage Ratio: The ratio of our (a) total debt, less unrestricted cash and cash equivalents held in pledged accounts, less cash drawn under the Delayed-Draw Term A Facility held for specified capital projects to (b) Consolidated EBITDA (as defined more specifically below) for the consecutive four fiscal quarters ending as of the calculation date. The maximum allowable net total leverage ratio is provided in the table below.

<u>Period</u>	<u>Ratio</u>
January 15, 2019 through March 30, 2020	3.50 to 1.00

March 31, 2020 through September 29, 2020	3.35 to 1.00
September 30, 2020 through June 29, 2021	3.25 to 1.00
June 30, 2021 through June 29, 2022	3.00 to 1.00
June 30, 2022 and thereafter	2.50 to 1.00

Fixed Charge Coverage Ratio: The ratio of our (a) Consolidated EBITDA for the applicable period (as defined below) to (b) (i) the sum of, for the same period, consolidated interest expense, capital expenditures (with certain exceptions), long term indebtedness (with certain exceptions) required to be paid, capital lease obligations required to be paid, restricted payments, cash payments for income taxes, (ii) minus, for the same period, specified capital expenditures. The applicable periods for purposes of calculating this ratio are the fiscal quarter ending March 31, 2019; the two consecutive fiscal quarters ending June 30, 2019; the three consecutive fiscal quarters ending September 30, 2019; and the four consecutive fiscal quarters ending December 31, 2019 and thereafter. The minimum fixed charge coverage ratio is 1.10 to 1.00.

The Company was in compliance with all covenants under the 2019 Senior Credit Facility on a pro-forma basis at January 15, 2019.

Table of Contents

Consolidated EBITDA, as defined in the 2019 Senior Credit Facility, means consolidated net income attributable to Alaska Communications, plus (to the extent deducted in calculating net income) the sum of:

cash and non-cash interest expense;
depreciation and amortization expense;
income taxes;
other non-cash charges and expenses, including equity-based compensation expense;
the write down or write off on any assets, other than accounts receivable;
subject to limitation, fees, premiums, penalty payments and out-of-pocket transaction costs incurred in connection with the 2019 refinancing transactions;
non-cash cost of goods sold associated with certain projects;
subject to limitation, unusual, non-recurring losses, charges and expenses;
one-time costs associated with permitted acquisitions;
cost savings from synergies in connection with permitted acquisitions or dispositions;
certain costs required to be expensed in connection permitted acquisitions; and
investment losses of
unconsolidated entities.

minus (to the extent included in calculating net income) the sum of:

unusual, non-recurring gains on permitted sales or dispositions of assets and casualty events;
cash and non-cash interest income;
other unusual nonrecurring items;
the write up of any asset;
patronage refunds or similar distributions from any lender;
deferred revenue associated with certain projects; and
investment income of unconsolidated entities.

Consolidated EBITDA as defined in the 2019 Senior Credit Facility is not a GAAP measure and is not consistent with Adjusted EBITDA presented elsewhere in Management's Discussion and Analysis of Financial Condition and Results of Operations.

The Initial Term A Facility, Revolving Facility, Delayed-Draw Facility and Incremental Term A Loans bear interest at LIBOR plus 4.5% per annum.

As required under the terms of the 2019 Senior Credit Facility and as a component of its cash flow hedging strategy, the Company has entered into an interest rate hedge sufficient to effectively fix or limit the interest rate on borrowings under the 2019 Senior Credit Facility of \$90.0 million through June 28, 2019 and will obtain another hedging

instrument to be effective subsequent to that date.

All terms are defined in the Agreement. See the “First Amended and Restated Credit Agreement, dated as of January 15, 2019, by and among Alaska Communications, as the borrower, the Company and certain of its direct and indirect subsidiaries, as guarantors, ING Capital LLC, as administrative agent, and the lenders party thereto,” filed as Exhibit 10.1 to the Current Report on Form 8-K filed on January 22, 2019 and Note 21 “*Subsequent Events*” in the Notes to Consolidated Financial Statements, which are incorporated herein by reference, for additional information.

Other Matters

In the second quarter of 2017, the Company’s Board of Directors authorized a program to repurchase up to \$10 million of the Company’s outstanding common stock. Repurchases can be conducted in the open market or through private transactions, including through purchases made in accordance with Rule 10b plans. The timing and amount of repurchases will be determined by the Company based on its evaluation of market conditions, its financial position, the trading price of its stock and other factors. The Company intends to use cash on hand to fund share repurchases subject to, among other things, federal and state securities, corporate and other laws and regulations, and the Company’s financing arrangements. Shares repurchased under this program will be accounted for as treasury stock.

The Federal Communications Act requires the FCC to establish a universal service program to ensure that affordable, quality telecommunications services are available to all Americans. We have received universal support in several forms, including support from the Federal Rural Health Care universal service support mechanism, which supports telemedicine and rural health care communications through increased connectivity. This program has been in existence since 1999 and is an important contributor in supporting health care programs in high cost areas of the United States, including Alaska.

Table of Contents

On April 10, 2017, USAC confirmed that demand for rural health care support had exceeded the program's \$400 million annual cap in Funding Year 2016, which began July 1, 2016 and ended on June 30, 2017. As a result, USAC announced that applicants that filed successful funding requests between September 1 and November 30, 2016 would receive 92.5 percent of the funding for which they were otherwise eligible. On June 30, 2017, the FCC issued an order to Alaskan health care providers impacted by the Rural Health Care Program pro-ration, allowing customers unable to fund the shortfall to remain in regulatory compliance with the program. We subsequently notified this subset of our customers that, subject to certain terms and conditions, we would suspend collection of the funding shortfall for Funding Year 2016. In the second quarter of 2017, we recorded a charge of \$1.1 million to fully reserve the effect of the funding shortfall for Funding Year 2016 on our rural health care customers.

On March 15, 2018, USAC announced that demand for rural health care support had exceeded the program's annual cap in Funding Year 2017 (which began July 1, 2017 and ended on June 30, 2018) and that successful applicants would receive 84.4% of the funding for which they would otherwise be eligible. The budget constraints announced in the first quarter prompted USAC, which administers the program, to engage in substantially more rigorous reviews of rural health care support, raising compliance costs and delaying issuance of support payments. In connection with that review, the Company received certain inquiries and requests for information from USAC and from the FCC Enforcement Bureau. In the first quarter of 2018, the Company's rural health care customers received notice from USAC regarding deficiencies in the rates stated in their applications. The rates were subsequently revised and, in July 2018, the FCC notified the Company that it had approved the Funding Year 2017 cost-based rural rates for certain of its customers and that amendment of those customer's applications was in process. In June 2018, the FCC announced an increase in the annual program funding cap to \$571 million from the prior cap of \$400 million effective for Funding Year 2017. This FCC order also provides for an annual adjustment to the funding cap to reflect inflation and the establishment of a process to carry forward unused funds from past funding years for use in future funding years. During the third quarter of 2018, substantially all customer applications for Funding Year 2017 were either approved or denied by USAC. Resolution of the applications for Funding Year 2017 did not have a material effect on revenue recognized through June 30, 2018. On November 15, 2018, the FCC notified the Company that it had approved the Funding Year 2018 (which began on July 1, 2018 and ends on June 30, 2019) cost-based rural rates for its customers. As of December 31, 2018, USAC had issued funding commitment letters for the majority of the Company's customers' applications for Funding Year 2018.

We recorded revenue from the rural health care program of \$17.5 million in the year ended December 31, 2018, which included \$1.4 million to record the effect of the funding increase on revenue reported in the third and fourth quarters of 2017, and reflects the negative effect of price compression.

Our accounts receivable balance for rural health care customers, net of amounts reserved, was \$8.1 million at December 31, 2018 and \$8.6 million at December 31, 2017. The Company received cash payments totaling \$16.5 million in the third and fourth quarters of 2018 associated with Funding Years 2017 and 2018. The recent approval of our 2018 rural health care rates and funding commitment letters on customers' applications reduces the uncertainty of the timing of cash payments from USAC for Funding Year 2018 and the potential adverse effect on our financial position and liquidity. However, as a business matter, we intend to continue factoring any remaining uncertainty into our future planning.

Due to the geographic remoteness and the limited availability of staff, telemedicine will be a key facilitator of more timely and advanced medical attention across the state of Alaska and the demand for technology-enabled health care delivery will remain strong. We currently believe that the rural health care market will continue to grow in future years, and will continue to be an important part of our business.

We believe that we will have sufficient cash on hand, cash provided by operations and availability under our 2019 Senior Credit Facility to service our debt and fund our operations, capital expenditures and other obligations over the next twelve months. However, our ability to make such an assessment is dependent upon our future financial performance, which is subject to future economic conditions and to financial, business, regulatory, competitive entry and many other factors, many of which are beyond our control and could impact us during the time period of this assessment. See Item 1A. Risk Factors in our Annual Report on Form 10-K for further information regarding these risks.

Table of Contents***NON-GAAP FINANCIAL MEASURES***

The Company provides certain non-GAAP financial information, including Adjusted EBITDA, Adjusted Free Cash Flow and Net Debt. Adjusted EBITDA eliminates the effects of period to period changes in costs that are not directly attributable to the underlying performance of the Company's business operations and is used by Management and the Company's Board of Directors to evaluate current operating financial performance, analyze and evaluate strategic and operational decisions and better evaluate comparability between periods. Adjusted Free Cash Flow is a non-GAAP liquidity measure used by Management and the Board of Directors to assess the Company's ability to generate cash and plan for future operating and capital actions. Adjusted EBITDA and Adjusted Free Cash Flow are common measures utilized by our peers (other telecommunications companies) and we believe they provide useful information to investors and analysts about the Company's operating results, financial condition and cash flows. Net Debt provides Management and the Board of Directors with a measure of the Company's current leverage position.

Adjusted EBITDA is defined as net income (loss) before interest expense and income, loss on extinguishment of debt, depreciation and amortization, other income and expense, gain or loss on asset purchases or disposals, provision for income taxes, stock-based compensation, and net loss attributable to noncontrolling interest.

Management considers Adjusted Free Cash Flow a non-GAAP liquidity measure and is defined as Adjusted EBITDA, less recurring operating cash requirements which include capital expenditures, less cash income taxes refunded or paid, cash interest paid, amortization of GCI capacity revenue and cash receipts and payments, deferred costs and amortized revenue and expense associated with certain prefunded special projects as defined in the 2019 Senior Credit Facility. Amortization of deferred revenue associated with our interconnection agreement with GCI is excluded from Adjusted Free Cash Flow because no cash was received by the Company in connection with this agreement. Amortization of all other deferred revenue, including that associated with other IRU capacity arrangements, is included in Adjusted Free Cash Flow because cash was received by the Company, typically at contract inception, and is being recognized as revenue over the term of the relevant agreement. Items associated with certain prefunded special projects as defined in the 2019 Senior Credit Facility are excluded from Adjusted Free Cash Flow primarily due to the magnitude and timing of the cash receipts relative to the subsequent recognition of revenue and expense.

Amortization of deferred revenue included in our operating revenues for the years ended December 31, 2018 and 2017 were as follows:

	2018	2017
GCI capacity revenue	\$2,071	\$2,072
Other deferred capacity revenue	2,027	1,440

Total deferred capacity revenue	4,098	3,512
Other deferred revenue	3,309	3,066
Total	\$7,407	\$6,578

The Company does not provide reconciliations of guidance for Adjusted EBITDA to Net Income, and Adjusted Free Cash Flow to Net Cash Provided by Operating Activities, in reliance on the unreasonable efforts exception provided under Item 10(e)(1)(i)(B) of Regulation S-K. The Company does not forecast certain items required to develop the comparable GAAP financial measures. These items are realized and unrealized gains and losses on effective and ineffective hedges, charges and benefits for uncollectible accounts, certain other non-cash expenses, unusual items typically excluded from Adjusted EBITDA and Adjusted Free Cash Flow, and changes in operating assets and liabilities (generally the most significant of these items, representing cash inflows of \$9.9 million and cash outflows of \$6.3 million in the years ended December 31, 2018 and 2017, respectively).

Adjusted EBITDA and Adjusted Free Cash Flow are not GAAP measures and should not be considered a substitute for Net Income, Net Cash Provided by Operating Activities, or Net Cash Provided or Used. Adjusted EBITDA as computed below is not consistent with the definition of Consolidated EBITDA referenced in our 2017 Senior Credit Facility and 2019 Senior Credit Facility, and other companies may not calculate Non-GAAP measures in the same manner we do.

Table of Contents

The following tables provide the computation of Adjusted EBITDA and reconciliation to Net Income (Loss), and the computation of Adjusted Free Cash Flow and reconciliation to Net Cash Provided by Operating Activities for the years ended December 31, 2018 and 2017:

Adjusted EBITDA

	2018	2017
Net income (loss)	\$8,988	\$(6,230)
Add (subtract):		
Interest expense	13,429	14,860
Loss on extinguishment of debt	-	7,527
Interest income	(156)	(34)
Depreciation and amortization	33,908	36,317
Other (income) expense, net	(23)	615
Loss on the disposal of assets, net	125	50
Income tax expense	2,041	2,584
Stock-based compensation	1,757	1,509
Net loss attributable to noncontrolling interest	92	129
Adjusted EBITDA	\$60,161	\$57,327

Table of Contents**Reconciliation of Net Cash Provided by Operating Activities to Adjusted Free Cash Flow and Computation of Adjusted Free Cash Flow**

	2018	2017
Net cash provided by operating activities	\$56,195	\$30,406
Adjustments to reconcile net cash provided by operating activities to adjusted free cash flow:		
Capital expenditures	(37,957)	(32,945)
Milestone payments received for special projects	1,850	-
Deferred cost of sales for special projects	(500)	-
Amortization of deferred capacity revenue	4,098	3,512
Amortization of GCI capacity revenue	(2,071)	(2,072)
Amortization of debt issuance costs and debt discount	(1,353)	(2,363)
Interest expense	13,429	14,860
Interest paid	(14,254)	(14,504)
Interest income	(156)	(34)
Income taxes receivable	729	8,052
Income taxes (paid) refunded, net	(3)	946
Charge for uncollectible accounts	(2,745)	(3,577)
Other (income) expense, net	(23)	615
Net loss attributable to noncontrolling interest	92	129
Other non-cash expense, net	(225)	(575)
Changes in operating assets and liabilities	(9,880)	6,302
Adjusted free cash flow	\$7,226	\$8,752
Adjusted EBITDA	\$60,161	\$57,327
Less:		
Capital expenditures	(37,957)	(32,945)
Amortization of GCI capacity revenue	(2,071)	(2,072)
Income taxes (paid) refunded, net	(3)	946
Interest paid	(14,254)	(14,504)
	5,876	8,752
Impact of special projects:		
Milestone payments received for special projects	1,850	-
Deferred cost of sales for special projects	(500)	-
Adjusted free cash flow	\$7,226	\$8,752

Table of Contents

OUTLOOK

Operating Results, Liquidity and Capital Resources

We expect to see continued strength in business and wholesale revenues, led by broadband revenue and managed IT services, focused on the larger enterprise and carrier customer segments. These revenue increases are driven by continued demand for broadband as businesses migrate their IT infrastructure to the cloud, deployment of small cell networks, expansion into managed IT services, investments by Federal agencies in long haul broadband infrastructure and continued progress in serving new school districts. We expect the rural health care segment to begin to stabilize in 2019 as a result of program funding increases announced by the FCC in 2018. However, the pricing methodology for funding year 2019 and beyond is uncertain. We expect to see solid performance from our carrier and federal customers as well as opportunities in markets enabled by the North Slope networks. Driven by our network investments in fiber fed wifi and fixed wireless, we expect to become more competitive serving small business and residential customers, while we focus on improving profitability by enhancing our online and self-serve capabilities. Growth in these areas is expected to be somewhat offset by continued pressure in the rural health care program.

Additionally, we are focused on continued implementation of the CAF II program and expect to meet our obligations for 2019 by providing broadband coverage to an additional 10%, or approximately 3,200, of our target locations by the end of the year.

We also expect continued attention by our Board of Directors on the evaluation of value creating strategic opportunities that address our scale and geographic concentration issues.

ADDITIONAL INFORMATION

Off-Balance Sheet Arrangements

We have no special purpose or limited purpose entities that provide off-balance sheet financing, liquidity or market or credit risk support and we do not engage in leasing, hedging, research and development services or other relationships that expose us to any material liabilities that are not reflected on our balance sheet or for which we are contractually obligated.

Critical Accounting Policies and Estimates

The preparation of our consolidated financial statements, in conformity with accounting principles generally accepted in the United States of America, requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period.

We have identified certain policies and estimates as critical to our business operations and the understanding of our past or present results of operations. We consider these policies and estimates critical because they had a material impact, or they have the potential to have a material impact, on our financial statements and they require significant judgments, assumptions or estimates.

Revenue Recognition Policies

At contract inception, the Company assesses the goods and services promised to the customer and identifies the performance obligation for each promise to transfer a good or service that is distinct.

The Company's broadband and voice revenue includes service, installation and equipment charges. The primary performance obligation in contracts for broadband and voice services is the provision of that service over time to the customer and revenue is recognized as that service is provided to the customer. The Company also charges certain of its broadband and voice service customers for equipment installed on the customers' premise, physical possession, control and ownership of which pass to the customer upon installation. Revenue is recognized for these obligations at the point of installation.

Managed IT revenues include the sale, configuration and installation of equipment and the subsequent provision of ongoing IT services. Revenue is recognized on the sale, configuration and installation of equipment when physical possession, control and ownership of the equipment has been passed to the customer.

The Company enters into contracts with its rural health care customers and is subject to various regulatory requirements associated with the provision of these services. Revenues associated with rural health care customers are recognized based on the amount the Company expects to collect as evidenced in its contract with the customer and the Company's and customer's agreement with the FCC as the relevant service is provided.

Table of Contents

Deferred revenue capacity liabilities are established for indefeasible rights of use on the Company's network provided to third parties and are typically accounted for as operating leases. A deferred revenue liability is established at fair value and amortized to revenue on a straight-line basis over the contractual life of the relevant contract.

Substantially all recurring non-usage sensitive service revenues are billed one month in advance and are deferred until the service has been provided to the customer. Non-recurring and usage sensitive revenues are billed in arrears and are recognized when the relevant service is provided. Equipment sales and installation are billed following customer acceptance. Payment terms for the contracts discussed above are typically thirty days.

Income Taxes

We use the asset-liability method of accounting for income taxes and account for income tax uncertainties using the "more-likely-than-not" threshold. Under the asset-liability method, deferred taxes reflect the temporary differences between the financial and tax bases of assets and liabilities using the enacted tax rates in effect in the years in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent management determines it is more-likely-than-not that the value of our deferred tax assets will not be fully realized.

Recently Issued Accounting Pronouncements

See Note 1 "*Description of Company and Summary of Significant Accounting Policies*" in the Notes to Consolidated Financial Statements for a description of recently adopted accounting pronouncements and recently issued pronouncements not yet adopted.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

As a smaller reporting company, the Company is not required to provide the information called for by this Item.

Item 8. Financial Statements and Supplementary Data

Consolidated financial statements of Alaska Communications Systems Group, Inc. and Subsidiaries are submitted as a separate section of this Form 10-K. See “Index to Consolidated Financial Statements”, which appears on page F-1 hereof.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

a. Evaluation of Disclosure Controls and Procedures.

As of the end of the period covered by this Annual Report on Form 10-K, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and our Principal Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Rule 13a-15(e) under the Securities Exchange Act of 1934.

Based on the evaluation, our Chief Executive Officer and our Principal Financial Officer believe that, as of the end of the period covered by this Annual Report on Form 10-K, our disclosure controls and procedures were effective at ensuring that the information required to be disclosed by us in the reports that we file or submit under the Exchange Act is (i) recorded, processed, summarized and reported within the time periods specified in the SEC’s rules and forms and (ii) accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosures.

Table of Contents

b. Management’s Annual Report on Internal Control over Financial Reporting.

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Internal control over financial reporting refers to a process designed by, or under the supervision of, our Chief Executive Officer and Principal Financial Officer and effected by our board of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that:

pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that our receipts and expenditures are being made only in accordance with authorizations of our management and members of our board of directors; and
provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Principal Financial Officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the criteria in the Internal Control – Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (“COSO 2013 Framework”).

Based on our evaluation using the Internal Control – Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2018.

Our independent registered public accounting firm has audited the effectiveness of the Company’s internal control over financial reporting as of December 31, 2018, and its report is included in “Item 8, Financial Statements and Supplementary Data” of the Annual Report on Form 10-K.

c. Changes in Internal Control over Financial Reporting.

Under the supervision and with the participation of our management, including our Chief Executive Officer and our Principal Financial Officer, we have evaluated any changes in our internal control over financial reporting that occurred during the fourth quarter of 2018 and have concluded that there were no changes to our internal control over financial reporting that materially affect, or are reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required by this item is incorporated into this Form 10-K by reference to our Proxy Statement for our 2019 Annual Meeting of Stockholders.

Item 11. Executive Compensation

Information on compensation of our directors and executive officers is incorporated into this Form 10-K by reference to our Proxy Statement for our 2019 Annual Meeting of Stockholders.

Table of Contents**Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters**

Information with respect to security ownership of certain beneficial owners and management is incorporated into this Form 10-K by reference to our Proxy Statement for our 2019 Annual Meeting of Stockholders.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of

Alaska Communications Systems Group, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Alaska Communications Systems Group, Inc. (the “Company”) as of December 31, 2018 and 2017, the related consolidated statements of comprehensive income (loss), stockholders’ equity, and cash flows for the years then ended, and the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as of December 31, 2018 and 2017, and the consolidated results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (“PCAOB”), the Company’s internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 8, 2019, expressed an unqualified opinion on the Company’s internal control over financial reporting.

Change in Accounting Principle

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for revenue from contracts with customers in 2018.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in

accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures to respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ Moss Adams LLP

Spokane, Washington

March 8, 2019

We have served as the Company's auditor since 2016.

Report of Independent Registered Public Accounting Firm

To the Shareholders and the Board of Directors of

Alaska Communications Systems Group, Inc.

Opinion on Internal Control over Financial Reporting

We have audited Alaska Communications Systems Group, Inc.'s (the "Company") internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO"). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by COSO.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) ("PCAOB"), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of comprehensive income (loss), stockholders' equity, and cash flows for the years then ended, and the related notes (collectively referred to as the "consolidated financial statements") and our report dated March 8, 2019, expressed an unqualified opinion on those consolidated financial statements (and included an explanatory paragraph relating to the Company's change in method of accounting for revenue from contracts with customers in 2018).

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was

maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

1. DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Alaska Communications Systems Group, Inc. (“we”, “our”, “us”, the “Company” and “Alaska Communications”), a Delaware corporation, through its operating subsidiaries, provides broadband telecommunication and managed information technology (“IT”) services to customers in the State of Alaska and beyond using its statewide and interstate telecommunications network.

The accompanying consolidated financial statements as of and for the years ended December 31, 2018 and 2017 represent the consolidated financial position, results of operations and cash flows of Alaska Communications and the following wholly-owned subsidiaries:

- Alaska Communications Systems Holdings, Inc. (“ACS Holdings”)
- ACS of Alaska, LLC (“ACSAK”)
- ACS of the Northland, LLC (“ACSN”)
- ACS of Fairbanks, LLC (“ACSF”)
- ACS of Anchorage, LLC (“ACSA”)
- ACS Wireless, Inc. (“ACSW”)
- ACS Long Distance, LLC
- Alaska Communications Internet, LLC (“ACSI”)
- ACS Messaging, Inc.
- ACS Cable Systems, LLC (“ACSC”)
- Crest Communications Corporation
- WCI Cable, Inc.
- WCI Hillsboro, LLC
- Alaska Northstar Communications, LLC
- WCI Lightpoint, LLC
- WorldNet Communications, Inc.
- Alaska Fiber Star, LLC
- TekMate, LLC

In addition to the wholly-owned subsidiaries, the Company has a fifty percent controlling interest in ACS-Quintillion JV, LLC (“AQ-JV”), a joint venture formed by its wholly-owned subsidiary ACSC and Quintillion Holdings, LLC (“QHL”) in connection with the North Slope fiber optic network. See Note 3 “*Joint Venture*” for additional information.

The Company is a smaller reporting company as defined in the Securities Act and Securities Exchange Act, as amended. Accordingly, it has utilized certain accommodations provided for scaled disclosures, including a two-year presentation of the statements of comprehensive income, stockholders’ equity and cash flows, and associated notes to the consolidated financial statements.

A summary of significant accounting policies followed by the Company is set forth below.

Basis of Presentation

The consolidated financial statements and notes include all accounts and subsidiaries of the Company in which it maintains a controlling financial interest. Intercompany accounts and transactions have been eliminated. The Company consolidates the financial results of the AQ-JV based on its determination that, for accounting purposes, it holds a controlling financial interest in the joint venture and is the primary beneficiary of this variable interest entity. The Company has accounted for and reported QHL's 50 percent ownership interest in the joint venture as a noncontrolling interest. See Note 3 "*Joint Venture*" for additional information. Certain reclassifications have been made to the prior years' financial statements to conform to the current year presentation.

Use of Estimates

The preparation of financial statements in conformity with Generally Accepted Accounting Principles in the United States ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Among the significant estimates affecting the financial statements are those related to the realizable value of accounts receivable and long-lived assets, the value of derivative instruments, revenue, deferred capacity revenue, legal contingencies, stock-based compensation and income taxes. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes is reasonable under the circumstances. Assumptions are adjusted as facts and circumstances dictate. Volatile capital markets, uncertainty regarding certain regulatory matters, and the continuation of low crude oil pricing have combined to increase the uncertainty in such estimates and assumptions. As future events and their effects cannot be determined with precision, actual results may differ significantly from those estimates. Changes in those estimates will be reflected in the financial statements of future periods.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Cash and Cash Equivalents

For purposes of the Consolidated Balance Sheets and Consolidated Statements of Cash Flows, the Company generally considers all highly liquid investments with a maturity at acquisition of three months or less to be cash equivalents.

Restricted Cash

Restricted cash of \$1,634 at December 31, 2018 consists of certificates of deposits totaling \$1,600 required under the terms of certain contracts to which the Company is a party and other restricted cash of \$34. When the restrictions are lifted, the Company will transfer these funds into its operating accounts.

Trade Accounts Receivable and Bad Debt Reserves

Trade accounts receivable are recorded at the invoiced amount and do not bear interest. Amounts collected on trade accounts receivable are included in net cash provided by operating activities in the Consolidated Statements of Cash Flows. The Company does not have any off-balance sheet credit exposure related to its customers. The Company evaluates its bad debt as a single portfolio since most of its subsidiaries primarily operate within Alaska and are subject to the same economic and risk conditions across industry segments and geographic locations. Bad debt reserves against uncollectible receivables are established and incurred during the period. These estimates are derived through an analysis of account aging profiles and a review of historical recovery experience. Receivables are charged off against the allowance when management confirms it is probable amounts will not be collected. Subsequent recoveries, if any, are credited to the allowance. The Company records bad debt expense as a component of "Selling, general and administrative expense" in the Consolidated Statements of Comprehensive Income (Loss). See Note 4 "Accounts Receivable" for additional information regarding accounts receivable associated with the Company's rural health care customers.

Materials and Supplies

Materials and supplies are carried in inventory at the lower of moving average cost or net realizable value. Cash flows related to the sale of inventory are included in operating activities in the Company's Consolidated Statements of Cash Flows.

Property, Plant and Equipment

Telephone property, plant and equipment are stated at historical cost of construction including certain capitalized overhead and interest charges. Renewals and betterments of telephone plant are capitalized, while repairs and renewals of minor items are charged to cost of services and sales (excluding depreciation and amortization) as incurred. The Company uses a group composite depreciation method in accordance with industry practice. Under this method, telephone plant, with the exception of land and capital leases, retired in the ordinary course of business, less salvage, is charged to accumulated depreciation with no gain or loss recognized. Non-telephone plant is stated at historical cost including certain capitalized overhead and interest charges, and when sold or retired, a gain or loss is recognized. Depreciation of property is provided on the straight-line method over estimated service lives ranging from 2 to 50 years.

The Company is the lessee of equipment and buildings under capital leases expiring in various years through 2033. The assets and liabilities under capital leases are initially recorded at the lower of the present value of the minimum lease payments or the fair value of the assets at the inception of the lease. The assets are amortized over the shorter of their related lease terms or the estimated productive lives. Amortization of assets under capital leases is included in depreciation and amortization expense.

The Company is also the lessee of various land, building and personal property under operating lease agreements for which expense is recognized on a monthly basis. Increases in rental rates are recorded as incurred which approximates the straight-line method.

The Company capitalizes interest charges associated with construction in progress based on a weighted average interest cost calculated on the Company's outstanding debt.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.
Notes to Consolidated Financial Statements
Years Ended December 31, 2018 and 2017
(In Thousands, Except Per Share Amounts)

Asset Retirement Obligations

The Company records liabilities for obligations related to the retirement and removal of long-lived assets, consisting primarily of batteries and operating leases. The Company records, as liabilities, the estimated fair value of asset retirement obligations on a discounted cash flow basis when incurred, which is typically at the time the asset is installed or acquired. The obligations are conditional on the occurrence of future events. Uncertainty about the timing or settlement of the obligation is factored into the measurement of the liability. Amounts recorded for the related assets are increased by the amount of these obligations. Over time, the liabilities increase due to the change in their present value, the potential changes in assumptions or inputs, and the initial capitalized assets decline as they are depreciated over the useful life of the related assets. The liabilities are extinguished when the asset is taken out of service.

Indefeasible Rights of Use

Indefeasible rights of use (“IRU”) consist of agreements between the Company and a third party whereby one party grants access to a portion of its fiber network to the other party, or receives access to a portion of the fiber network of the other party. The access may consist of individually specified fibers or a specified number of fibers on the network. IRU agreements under which individually specified fibers are provided are accounted for as leases. Certain of the Company’s IRU agreements consist of like kind exchanges for which the value of the access given up is determined to be equal to the value of the access received. Cash may or may not be exchanged depending on the terms of the agreement. For IRU agreements in which an equal amount of cash is received and paid and the transaction is determined to not have commercial substance, revenue and expense is not recognized in connection with the cash exchanged. For IRU agreements that are not like kind exchanges and for which the Company receives or pays cash, revenue and expense are recognized over the term of the agreement.

Variable Interest Entities

The Company’s ownership interest in AQ-JV, LLC is a variable interest entity as defined in Accounting Standards Codification (“ASC”) 810, “Consolidation.” The Company consolidates the financial results of this entity based on its determination that, for accounting purposes, it holds a controlling financial interest in, and is the primary beneficiary of, the entity. The Company has accounted for and reported the interest of this entity’s other owner as a noncontrolling

interest. See Note 3 “*Joint Venture*” for additional information.

Deferred Capacity Revenue

Deferred capacity liabilities are established for usage rights on the Company’s network provided to third parties. They are established at fair value and amortized to revenue on a straight-line basis over the contractual life of the relevant contract. These liabilities include a deferred capacity revenue liability for future services to be provided to General Communications, Inc. (“GCI”) which is amortized over the contract life of up to 30 years.

Long-lived Asset Impairment

Long-lived assets, such as property, plant, and equipment, and purchased intangible assets subject to amortization, are reviewed for impairment annually, or whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. If circumstances require a long-lived asset or asset group be tested for possible impairment, the Company will compare the undiscounted cash flows expected to be generated by that asset to its carrying amount. If the carrying amount of the long-lived asset is not recoverable on an undiscounted cash flow basis, impairment is recognized to the extent that the carrying amount exceeds its fair value. Fair value is determined through various valuation techniques including discounted cash flow models, quoted market values and third-party independent appraisals. Impairment is displayed under the caption “Operating expenses” in the Company’s Consolidated Statements of Comprehensive Income (Loss).

Debt Issuance Costs and Discounts

Debt issuance costs are capitalized and amortized to interest expense using the effective interest method over the term of the related instruments. Debt discounts are accreted to interest expense using the effective interest method. Debt issuance costs and debt discounts are presented as a direct deduction from the carrying amount of debt on the Company’s Consolidated Balance Sheet.

Preferred Stock

The Company has 5,000 shares of \$0.01 par value preferred stock authorized, none of which were issued or outstanding at December 31, 2018 and 2017.

On January 8, 2018, the Company's Board of Directors authorized 145,000 shares of Series A Junior Participating Preferred Stock, none of which were issued or outstanding at December 31, 2018.

Revenue Recognition

The Company accounts for revenue in accordance with ASC 606, "Revenue from Contracts with Customers" ("ASC 606") and other guidance. See Note 2 "*Revenue Recognition*" for a summary of the Company's revenue recognition policies and other disclosures required under ASC 606.

Concentrations of Risk

Cash is maintained with several financial institutions. Deposits held with banks may exceed the amount of insurance provided on such deposits and the Company enters into arrangements to collateralize these amounts with securities of the underlying financial institutions. Generally, these deposits may be redeemed upon demand. The Company has not experienced any losses on such deposits.

The Company also depends on a limited number of suppliers and vendors for equipment and services for its network. The Company's subscriber base and operating results could be adversely affected if these suppliers experience financial or credit difficulties, service interruptions, or other problems.

As of December 31, 2018, approximately 53% of the Company's employees are represented by the International Brotherhood of Electrical Workers, Local 1547 ("IBEW"). The Master Collective Bargaining Agreement ("CBA") between the Company and the IBEW, which was ratified on December 8, 2017 and is effective through December 31, 2023, governs the terms and conditions of employment for all IBEW represented employees working for the Company in the state of Alaska and has significant economic impacts on the Company as it relates to wage and benefit costs and work rules that affect our ability to provide superior service to our customers. The Company considered relations with the IBEW to be stable in 2018; however, any deterioration in the relationship with the IBEW would have a negative impact on the Company's operations.

The Company provides voice, broadband and managed IT services to its customers throughout Alaska. Accordingly, the Company's financial performance is directly influenced by the competitive environment in Alaska, and by economic factors specifically in Alaska. The most significant economic factor is the level of Alaskan oil production and the per barrel price of relevant crude oil. A significant majority of the state's unrestricted revenue comes from taxes assessed upon the production of this resource, and the price of crude oil impacts the level of investment by resource development companies. The drop in crude oil prices in recent years has resulted in the State of Alaska reducing its spending, which had a dampening impact on the overall state economy, including declining employment levels in 2016, 2017 and 2018. In 2018, oil prices recovered to their highest levels since 2014, which contributed to a lower decline in employment. Other important factors influencing the Alaskan economy include the level of tourism, government spending, and the movement of United States military personnel. Any further deterioration in these factors, particularly over a sustained period of time, would likely have a negative impact on the Company's performance.

As an entity that relies on the Federal Communications Commission ("FCC") and state regulatory agencies to provide stable funding sources to provide services in high cost areas, the Company is also impacted by any changes in regulations or future funding mechanisms that are being established by these regulatory agencies. In 2018, 8% of the Company's total revenues were derived from high cost support and 8% were derived from the rural health care universal service support mechanism.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

The Company considers the vulnerabilities of its network and IT systems to various cyber threats. While the Company has implemented several mitigating policies, technological safeguards and some insurance coverage, it is not possible to prevent every possible threat to its network and IT systems from deliberate cyber related attacks.

Advertising Costs

The Company expenses advertising costs as incurred. Advertising expense totaled \$3,074 and \$3,656 in 2018 and 2017, respectively and is included in “Selling, general and administrative expense” in the Company’s Consolidated Statements of Comprehensive Income (Loss).

Income Taxes

The Company utilizes the asset-liability method of accounting for income taxes. Under the asset-liability method, deferred taxes reflect the temporary differences between the financial and tax basis of assets and liabilities using the enacted tax rates in effect in the years in which the differences are expected to reverse. Deferred tax assets are reduced by a valuation allowance to the extent that management believes it is more-likely-than-not that such deferred tax assets will not be realized. The Company evaluates tax positions taken or expected to be taken in the course of preparing its financial statements to determine whether the tax positions are “more-likely-than-not” of being sustained by the applicable tax authority. The Company records interest and penalties for underpayment of income taxes as income tax expense.

Taxes Collected from Customers and Remitted to Government Authorities

The Company excludes taxes collected from customers and payable to government authorities from revenue. Taxes payable to government authorities are presented as a liability on the Consolidated Balance Sheets.

Regulatory Accounting and Regulation

Certain activities of the Company are subject to rate regulation by the FCC for interstate telecommunication service and the Regulatory Commission of Alaska (“RCA”) for intrastate and local exchange telecommunication service. The Company, as required by the FCC, accounts for such activity separately. Long distance services of the Company are subject to regulation as a non-dominant interexchange carrier by the FCC for interstate telecommunication services and the RCA for intrastate telecommunication services. Wireless, Internet and other non-common carrier services are not subject to rate regulation.

Derivative Financial Instruments

The Company does not enter into derivative contracts for speculative purposes. The Company recognizes all asset or liability derivatives at fair value. The accounting for changes in fair value is contingent on the intended use of the derivative and its designation as a hedge. Derivatives that are not hedges are adjusted to fair value through earnings. If a derivative is a hedge, depending on the nature of the hedge, changes in fair value either offset the change in fair value of the hedged assets, liabilities or firm commitments through earnings, or are recognized in “Other comprehensive income (loss)” until the hedged transaction is recognized in earnings. On the date a derivative contract is entered into, the Company designates the derivative as either a fair value or cash flow hedge. The Company formally assesses, both at the hedge's inception and on an on-going basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in the fair values or cash flows of hedged items. If the Company determines that a derivative is not highly effective as a hedge or that it has ceased to be highly effective, the Company discontinues hedge accounting prospectively. The change in a derivative's fair value related to the ineffective portion of a hedge is immediately recognized in earnings. Amounts recorded to accumulated other comprehensive loss from the date of the derivative's inception to the date of ineffectiveness are amortized to earnings over the remaining term of the hedged item. If the hedged item is settled prior to its originally scheduled date, any remaining accumulated comprehensive loss associated with the derivative instrument is reclassified to earnings. Termination of a derivative instrument prior to its scheduled settlement date may result in charges for termination fees.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Dividend Policy

The Company's dividend policy is set by the Company's Board of Directors and is subject to the terms of its credit facilities and the continued current and future performance and liquidity needs of the Company. Dividends on the Company's common stock are not cumulative to the extent they are declared. The Board has not authorized the payment of a dividend since 2012, and has not updated its dividend policy.

Share-based Payments

The Company accounts for forfeitures associated with share-based payments as they occur.

Restricted Stock Units ("RSUs")

The Company determines the fair value of RSUs based on the number of shares granted and the quoted closing market price of the Company's common stock on the date of grant, discounted for estimated dividend payments that do not accrue to the employee during the vesting period. Compensation expense is recognized over the vesting period and adjustments are charged or credited to expense. RSUs are granted under the Company's 2011 Incentive Award Plan.

Performance Share Units ("PSUs")

PSUs may include a combination of service, specified performance, and/or market based conditions which determine the number of awards and the associated vesting. The Company measures the fair value of each new PSU at the grant date. Adjustments each reporting period are based on changes to the expected achievement of the performance goals or if the PSUs otherwise vest, expire, or are determined by the Compensation Committee of the Company's Board of Directors to be unlikely to vest prior to expiration. Adjustments are charged or credited to expense. For PSUs that include a market condition, compensation expense associated with the market condition is recognized regardless of whether the market condition is satisfied provided that performance measure has been met and the requisite service

has been provided. Compensation expense is recorded over the requisite service period. PSUs are granted under the Company's 2011 Incentive Award Plan.

Employee Stock Purchase Plan ("ESPP")

The Company makes payroll deductions of from 1% to 15% of compensation from employees who elect to participate in the ESPP. A liability accretes during the 6-month offering period and at the end of the offering period (June 30 and December 31), the Company issues the shares from the 2012 Employee Stock Purchase Plan ("2012 ESPP"). Compensation expense is recorded based upon the estimated number of shares to be purchased multiplied by the discount rate per share.

Tax Treatment

Stock-based compensation is treated as a temporary difference for income tax purposes and increases deferred tax assets until the compensation is realized for income tax purposes. To the extent that realized tax benefits exceed the book based compensation, the excess tax benefit is credited to additional paid in capital.

Pension Benefits

Multi-employer Defined Benefit Plan

Pension benefits for substantially all of the Company's Alaska-based employees are provided through the Alaska Electrical Pension Fund ("AEPF"). The Company pays a contractual hourly amount based on employee classification or base compensation. The accumulated benefits and plan assets are not determined for, or allocated separately to, the individual employer.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Defined Benefit Plan

The ACS Retirement Plan, which is the Company's sole single-employer defined benefit plan and covers a limited number of employees previously employed by a predecessor to one of our subsidiaries, is frozen. The Company recognizes the under-funded status of this plan as a liability on its balance sheet and recognizes changes in the funded status in the year in which the changes occur. The ACS Retirement Plan's accumulated benefit obligation is the actuarial present value, as of the Company's December 31 measurement date, of all benefits attributed by the pension benefit formula. The amount of benefits to be paid depends on a number of future events incorporated into the pension benefit formula, including estimates of the average life of employees or survivors and average years of service rendered. It is measured based on assumptions concerning future interest rates and future employee compensation levels. Unrecognized prior service credits and costs and net actuarial gains and losses are recognized as a component of other comprehensive (loss) income, net of tax.

Defined Contribution Plan

The Company provides a 401(k) retirement savings plan covering substantially all of its employees. Discretionary company-matching contributions are determined by the Board of Directors.

Earnings per Share

The Company computes earnings per share based on the weighted number of shares of common stock and dilutive potential common share equivalents outstanding. This includes all issued and outstanding share-based payments.

Recently Adopted Accounting Pronouncements

Effective January 1, 2018, the Company adopted ASC 606 on a modified retrospective basis. ASC 606 requires that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that

reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Adoption of ASC 606 did not have a material effect on the Company's recognition of revenue, operating expenses and cash flows. Adoption resulted in the establishment of a contract asset of \$6,898, consisting of contract acquisition costs associated with sales commissions, and a resulting deferred income tax liability of \$1,960. Accumulated deficit was reduced \$4,938. See Note 2 "*Revenue Recognition*" for a summary of the Company's revenue recognition policies and other disclosures required under ASC 606.

Effective January 1, 2018, the Company adopted ASU No. 2017-07, "*Compensation – Retirement Benefits (Topic 715)*" ("ASU 2017-07"). The amendments in ASU 2017-07 require that an employer report the service cost component in the same line item or items as other compensation costs arising from services rendered by the pertinent employees. The other components of net benefit costs are required to be presented in the income statement separately from the service cost component and outside a subtotal of income from operations, if one is presented. ASU 2017-07 also requires that only the service cost component is eligible for capitalization when applicable. Pension benefits for substantially all of the Company's Alaska-based employees are provided through the Alaska Electrical Pension Fund, a multiemployer defined benefit plan. The Company pays a contractual hourly amount based on employee classification or base compensation. The components of net periodic pension costs are not specified in this amount. The Company's sole single-employer defined benefit plan, which covers a limited number of employees previously employed by a predecessor to one of our subsidiaries, is frozen, and the cost of this plan does not include a service component. Accordingly, total net periodic pension expense of \$225 in the year ended December 31, 2018 has been reported as a component of "Other income (expense), net" in the Statement of Comprehensive Income (Loss). ASU 2017-07 was adopted on a retrospective basis and net periodic pension expense of \$615 for the year ended December 31, 2017 was reclassified from "Selling, general and administrative" to "Other income (expense), net" in the Statement of Comprehensive Income (Loss). The Company utilized the practical expedient provided by ASU 2017-07 which permits the use of the amounts disclosed in the retirement plans note as the basis for applying the retrospective presentation requirements.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Effective January 1, 2018, the Company adopted ASU No. 2017-09, “*Compensation – Stock Compensation (Topic 718) Scope of Modification Accounting*” (“ASU 2017-09”). The amendments in ASU 2017-09 are intended to provide clarity, and reduce diversity in practice and the cost and complexity of applying the guidance in Topic 718. The primary provision of ASU 2017-09 is to provide guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting. An entity should account for the effects of a change as a modification unless all the following conditions are met: (i) the fair value of the modified award is the same as the fair value of the original award immediately before the original award is modified. If the modification does not affect any of the inputs to the valuation technique that the entity uses to value the award, the entity is not required to estimate the value immediately before and after the modification; (ii) the vesting conditions of the modified award are the same as the vesting conditions of the original award immediately before the original award is modified; and (iii) the classification of the modified award as an equity instrument or a liability instrument is the same as the classification of the original award immediately before the original award is modified. The provisions of ASU 2017-09 will be applied prospectively to awards modified on or after January 1, 2018. The effect of the adoption of ASU 2017-09 on the Company’s financial statements and related disclosures will be dependent on the frequency and types of changes made to its share-based payment awards. There were no applicable changes made during the year ended December 31, 2018.

Accounting Pronouncements Issued Not Yet Adopted

In February 2016, the Financial Accounting Standards Board (“FASB”) issued ASU No. 2016-02, “*Leases (Topic 842)*” (“ASU 2016-02”). The primary change in GAAP addressed by ASU 2016-02 is the requirement for a lessee to recognize on the balance sheet a liability to make lease payments (“lease liability”) and a right-of-use asset representing its right to use the underlying asset for the lease term. The accounting applied by a lessor is largely unchanged from that applied under previous GAAP. ASU 2016-02 also requires qualitative and quantitative disclosures to enable users of the financial statements to assess the amount, timing, and uncertainty of cash flows arising from leases. ASU 2016-02, including subsequent updates, is effective for fiscal years beginning after December 15, 2018, including interim periods within those years. The Company has identified its contracts and other arrangements subject to the guidance in ASU 2016-02 and is currently assessing the effect adoption will have on its consolidated financial statements, processes, systems and internal controls. Based on this assessment, the Company expects that adoption of ASU 2016-02 will have a material effect on its financial statements, related disclosures and internal controls. The Company is currently implementing new, and modifying existing, systems and processes in order to meet the accounting and disclosure requirements. The Company will adopt ASU 2016-02, including subsequent updates, effective January 1, 2019 on a modified retrospective basis, which will not require the recasting of the financial statements and related disclosures of periods presented prior to 2019.

In August 2017, the FASB issued ASU No. 2017-12, “*Derivatives and Hedging (Topic 815), Targeted Improvements to Accounting for Hedging Activities*” (“ASU 2017-12”). The amendments in ASU 2017-12 are intended to improve and simplify the accounting rules for hedge accounting, including providing a better portrayal of the economic results of an entity’s risk management activities in its financial statements and simplification of the application of hedge accounting guidance. The new guidance eliminates the requirement to separately measure and report hedge ineffectiveness and, for qualifying hedges, requires the entire change in the fair value of the hedging instrument to be presented in the same income statement line as the hedged item. ASU 2017-12 is effective for fiscal years beginning after December 15, 2018. The accounting and disclosure requirements are to be adopted on a prospective basis and a cumulative-effect adjustment is to be recorded for cash flow and net investment hedges existing at the date of adoption. The Company is evaluating ASU 2017-12 and, based on its current and anticipated hedging arrangements, does not expect that adoption will have a material effect on its financial statements and related disclosures.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

In August 2018, the FASB issued ASU No. 2018-13, “*Fair Value Measurement (Topic 820), Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*” (“ASU 2018-13”). The amendments in ASU 2018-13 are intended to improve the effectiveness of fair value measurement disclosures in the notes to the financial statements. The new guidance eliminates the requirement to disclose (i) the amount and reasons for transfers between Level 1 and Level 2 of the fair value hierarchy; (ii) the policy for timing of transfers between levels; and (iii) the valuation processes for Level 3 fair value measurements. The new guidance also requires the disclosure of (i) changes in unrealized gains and losses for the period included in other comprehensive income for recurring Level 3 fair value measurements held at the end of the reporting period; and (ii) the range and weighted average of significant unobservable inputs used to develop Level 3 fair value measurements. ASU 2018-13 is effective for fiscal years beginning after December 15, 2019 and early adoption is permitted. The Company is evaluating ASU 2018-13 and, based on its existing assets and liabilities measured at fair value, does not currently believe that adoption will have a material effect on its financial statements and related disclosures.

In August 2018, the FASB issued ASU No. 2018-14, “*Compensation – Retirement Benefits – Defined Benefit Plans – General (Subtopic 715-20), Disclosure Framework – Changes to the Disclosure Requirements for Defined Benefit Plans*” (“ASU 2018-14”). The amendments in ASU 2018-14 are intended to improve the effectiveness of disclosures in the notes to the financial statements about employer-sponsored defined benefit plans. The new guidance eliminates, among other items, the requirement to disclose the amounts in accumulated other comprehensive income expected to be recognized as components of net periodic benefit cost over the next fiscal year. Expanded disclosures required under ASU 2018-14 include an explanation of the reasons for significant gains and losses related to changes in the benefit obligation for the period. ASU 2018-14 is effective for fiscal years beginning after December 15, 2020 and early adoption is permitted. The Company is evaluating the effect ASU 2018-14 will have on its disclosures.

In August 2018, the FASB issued ASU No. 2018-15, “*Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40), Customer’s Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement That Is a Service Contract*” (“ASU 2018-15”). The amendments in ASU 2018-15 align the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with those incurred to develop or obtain internal-use software, including hosting arrangements that include an internal-use software license. ASU 2018-15 is effective for fiscal years beginning after December 15, 2019 and early adoption is permitted. The Company is evaluating the effect ASU 2018-15 will have on its financial statements and related disclosures.

In October 2018, the FASB issued ASU No 2018-16, “*Derivatives and Hedging (Topic 815), Inclusion of the Secured Overnight Financing Rate (SOFR) Overnight Index Swap (OIS) Rate as a Benchmark Interest Rate for Hedge Accounting Purposes*” (“ASU 2018-16”). Permitting use of the OIS rate based on SOFR as a U.S. benchmark interest rate for hedge accounting purposes will facilitate the London Interbank Offered Rate (“LIBOR”) to SOFR transition and

provide sufficient lead time for entities to prepare for changes to interest rate risk hedging strategies. ASU 2018-16 must be adopted concurrently with the amendments in ASU 2017-12, which is effective for fiscal years beginning after December 15, 2018. Adoption of ASU 2018-16 is not expected to have a material effect on the Company's financial statements and related disclosures.

2. REVENUE RECOGNITION

Revenue Recognition Policies

Revenue Accounted for in Accordance with ASC 606

The Company adopted the provisions of ASC 606 effective in the first quarter of 2018 on a modified retrospective basis. Refer to Note 1 "*Description of Company and Summary of Significant Accounting Policies*" for a summary of the effect of initial adoption on the Company's consolidated financial statements.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

The Company applied the provisions of ASC 606 to its contracts with customers that had not been completed as of January 1, 2018. Adoption of ASC 606 did not have a material effect on the Company's recognition of revenue. Adoption resulted in a net decrease in "Selling, general and administrative expenses" of \$1,154 in the year ended December 31, 2018, reflecting the net effect of the deferral of sales commissions incurred in 2018 offset by the amortization of deferred sales commissions incurred in prior years. The following tables provide the effect of adoption of ASC 606 on the Company's statement of comprehensive income for year ended December 31, 2018 and balance sheet at December 31, 2018.

	As Reported	Effect of Adoption of ASC 606	Excluding Adoption of ASC 606
Operating revenues	\$ 232,468	\$ -	\$ 232,468
Total operating expenses	208,189	1,154	209,343
Operating income	24,279	(1,154)	23,125
Income before income tax expense	11,029	(1,154)	9,875
Net income attributable to Alaska Communications	9,080	(826)	8,254
Net income per share attributable to Alaska Communications:			
Basic	\$ 0.17	\$ (0.01)	\$ 0.16
Diluted	\$ 0.17	\$ (0.02)	\$ 0.15

	As Reported	Effect of Adoption of ASC 606	Excluding Adoption of ASC 606
Deferred income taxes	\$ 498	\$ 1,533	\$ 2,031
Other assets	16,010	(8,052)	7,958
Total assets	455,185	(6,519)	448,666
Deferred income taxes	2,315	(755)	1,560
Total liabilities	285,435	(755)	284,680

Retained earnings	10,439	(5,764)	4,675
-------------------	--------	--------	---	-------

At contract inception, the Company assesses the goods and services promised to the customer and identifies the performance obligation for each promise to transfer a good or service that is distinct. The Company considers all obligations whether they are explicitly stated in the contract or are implied by customary business practices.

The Company's broadband and voice revenue includes service, installation and equipment charges. The primary performance obligation in contracts for broadband and voice services is the provision of that service over time to the customer and revenue is recognized as that service is provided to the customer. The Company also charges certain of its broadband and voice service customers for equipment installed on the customers' premise, physical possession, control and ownership of which pass to the customer upon installation. Revenue is recognized for these obligations at the point of installation. The contract price is allocated between the service, installation and equipment components based on their relative standalone selling prices. Installation and equipment revenue is not a significant component of broadband and voice revenue. Revenue associated the Company's Lifeline customer base (included in the Consumer voice and other category) is less certain and is therefore recognized on a cash basis as payments are received.

Managed IT revenues include the sale, configuration and installation of equipment and the subsequent provision of ongoing IT services. Revenue is recognized on the sale, configuration and installation of equipment when physical possession, control and ownership of the equipment has been passed to the customer. The customer is typically billed for equipment separately from the subsequent IT services. Revenue associated with ongoing IT services is recognized as that service is provided. The contract price is allocated to each of these performance obligations based on their relative standalone selling prices. Revenue and cost of sales is recognized on the resale of equipment and other products only when the Company has control of the product, inventory risk and the discretion to establish pricing prior to transfer to the customer. For the resale of products where the Company does not meet these criteria, revenue is recognized at the net of the selling price to the customer and the Company's cost.

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

The Company enters into contracts with its rural health care customers and is subject to various regulatory requirements associated with the provision of these services. Revenues associated with rural health care customers are recognized based on the amount the Company expects to collect as evidenced in its contract with the customer and the Company's and customer's agreement with the FCC as the relevant service is provided. Payment for the services is made, in part, by the customer. The Company also receives funding support for these services through the FCC's rural health care universal service support mechanism. Funding through the FCC represents the predominant portion of the total funding. The amount expected to be collected from the FCC is based on program funding levels and actual or recent historical approval levels of customer applications. In March 2018, the Universal Service Administrative Company ("USAC") announced that demand for rural health care support had exceeded the program's \$400 million annual cap in Funding Year 2017, which began on July 1, 2017 and ended on June 30, 2018, and that individual applicants that filed successful funding requests would receive approximately 84.4% of the funding for which they were otherwise eligible. In June 2018, the FCC announced that it was addressing the current funding shortfall in the rural health care program by raising the annual program funding cap to \$571 million from its prior cap of \$400 million. The revised cap was applied to Funding Year 2017 to fully fund eligible funding requests for that year. The FCC's order also adopted measures to address the increased demand for funding from the rural health care program by (i) providing for an annual adjustment to the annual funding cap to reflect inflation beginning with Funding Year 2018 (July 1, 2018 through June 30, 2019); and (ii) establishing a process to carry-forward unused funds from past funding years for use in future funding years. The FCC's funding increase from 84.4% of approved contracts to 100% of approved contracts resulted in a modification of the relevant contracts. The modification consisted of a change in pricing only, and did not result in the delivery of additional distinct goods or services. The Company's remaining performance obligations under the contract are not distinct from services delivered prior to modification. Accordingly, the modification was accounted for as a continuation of the original contract and a cumulative adjustment of \$2,082 was recorded to revenue in the second quarter of 2018 for the pricing change associated with services provided prior to the modification in the third and fourth quarters of 2017 and the first quarter of 2018. During the third quarter of 2018, the applications associated with Funding Year 2017 for essentially all of the Company's rural health care customers were approved or denied. Resolution of customer applications did not have a material effect on revenue recognized through June 30, 2018. In the fourth quarter of 2018, the FCC notified the Company that it had approved the Funding Year 2018 cost-based rural rates for its customers. As of December 31, 2018, USAC had issued funding commitment letters for the majority of the Company's customer applications for Funding Year 2018. Rural health care revenue recognized during the third and fourth quarters of 2018 assumes 100% funding of all approved applications. Rural health care revenues are a component of business broadband revenue.

Regulatory access revenue includes (i) special access, which is primarily access to dedicated circuits sold to wholesale customers, substantially all of which is generated from interstate services; and (ii) cellular access, which is the transport of tariffed local network services between switches for cellular companies based on individually negotiated contracts. Regulatory access revenue is recognized as the service is provided to the customer.

Certain contracts with customers provide for customer payment in advance of or subsequent to the Company providing the associated goods or services. Such payments include customer funding of enhancements or additions to the Company's network and other related assets. As provided for under ASC 606, a financing component has not been applied if the time between payment by the customer and provision of the goods or services by the Company is one year or less. The Company has also not applied a financing component to certain contracts which include an advance customer payment associated with service to be provided over a period extending beyond one year. The advance payments provided for in these contracts is not material individually or in the aggregate.

F-18

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Substantially all recurring non-usage sensitive service revenues are billed one month in advance and are deferred until the service has been provided to the customer. Non-recurring and usage sensitive revenues are billed in arrears and are recognized when the relevant service is provided. Equipment sales and installation are billed following customer acceptance. Payment terms for the contracts discussed above are typically thirty days.

Revenue Accounted for in Accordance with Other Guidance

Deferred revenue capacity liabilities are established for IRUs on the Company's network provided to third parties and are typically accounted for as operating leases. A deferred revenue liability is established at fair value and amortized to revenue on a straight-line basis over the contractual life of the relevant contract. Exchanges of IRUs with other carriers are accounted for as operating leases if the arrangement has commercial substance.

The Company has also established deferred revenue liabilities for other agreements outside the scope of ASC 606, including business combinations and non-monetary transactions. Revenue associated with these agreements is recognized in accordance with the relevant accounting guidance.

Regulatory access revenue includes interstate and intrastate switched access, consisting of services based primarily on originating and terminating access minutes from other carriers. The Company assess its customers for surcharges, typically on a monthly basis, as required by various state and federal regulatory agencies, and remits these surcharges to these agencies. These pass-through surcharges include Federal Universal Access and State Universal Access. These surcharges vary from year to year, and are primarily recognized as revenue, and the subsequent remittance to the state or federal agency as a cost of sale and service. The charges are assessed on only a portion of the services provided. Other non-pass-through surcharges are collected from customers as authorized by the regulatory body. The amount charged is based on the type of line: single line business, multi-line business, consumer or lifeline. The rates are established based on federal or state orders. These charges are recorded as revenue and do not have a direct associated cost. Rather, they represent a revenue recovery mechanism established by the FCC or the Regulatory Commission of Alaska.

High-cost support revenue consists of interstate and intrastate universal support funds and similar revenue streams structured by federal and state regulatory agencies that allow the Company to recover its cost of providing universal service in Alaska. The FCC released the Connect America Fund ("CAF") Phase II order specific to Alaska

Communications which transitioned from CAF Phase I frozen support to CAF Phase II. Funding under the new program will generally require the Company to provide broadband service to unserved locations throughout the designated coverage area by the end of a specified build-out period, and meet interim milestone build-out obligations. In addition to federal high cost support, the Company is designated by the State of Alaska as a Carrier of Last Resort (“COLR”) in five of the six study areas. In addition to COLR, the Company receives Carrier Common Line (“CCL”) support. As a COLR the Company is required to provide services essential for retail and carrier-to-carrier telecommunication throughout the applicable coverage area. High-cost support revenue is recognized when cash is received.

The Company collects sales and other similar taxes from its customers on behalf of various governmental authorities, and remits these taxes to the appropriate authorities. The collection of such taxes is not recognized as revenue.

Disaggregation of Revenue

The following table provides the Company's revenue disaggregated on the basis of its primary markets, customers, products and services for the year ended December 31, 2018

	Accounted for Under ASC 606	Accounted for Under Other Guidance	Total Revenue
Business and Wholesale Revenue			
Business broadband	\$ 60,697	\$ -	\$ 60,697
Business voice and other	28,429	-	28,429
Managed IT services	5,742	-	5,742
Equipment sales and installations	5,127	-	5,127
Wholesale broadband	31,931	-	31,931
Wholesale voice and other	6,000	-	6,000
Operating leases and other deferred revenue	-	6,668	6,668
Total Business and Wholesale Revenue	137,926	6,668	144,594
Consumer Revenue			
Broadband	26,144	-	26,144
Voice and other	11,158	-	11,158
Total Consumer Revenue	37,302	-	37,302
Regulatory Revenue			
Access ⁽¹⁾	23,982	-	23,982
Access ⁽²⁾	-	6,896	6,896
High-cost support	-	19,694	19,694
Total Regulatory Revenue	23,982	26,590	50,572
Total Revenue	\$ 199,210	\$ 33,258	\$ 232,468

- (1)Includes customer ordered service and special access.
- (2)Includes carrier of last resort and carrier common line.

Business broadband revenue includes revenue associated with rural health care customers. Consumer voice and other revenue includes revenue associated with the FCC's Lifeline program.

Timing of Revenue Recognition

Revenue accounted for in accordance with ASC 606 consisted of the following for the year ended December 31, 2018:

Services transferred over time	\$ 170,101
Goods transferred at a point in time	5,127
Regulatory access revenue ⁽¹⁾	23,982
Total revenue	\$ 199,210

- (1)Includes customer ordered service and special access.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

Transaction Price Allocated to Remaining Performance Obligations

The aggregate amount of the transaction price allocated to the remaining performance obligations for contracts with customers that are unsatisfied, or partially unsatisfied, accounted for in accordance with ASC 606 was approximately \$103,372 at December 31, 2018. Revenue will be recognized as the Company satisfies the associated performance obligations. For equipment delivery, installation and configuration, and certain managed IT services, which comprise approximately \$1,131 of the total, the performance obligation is currently expected to be satisfied during the next twelve months. For business broadband, voice and other managed IT services, which comprise approximately \$102,241 of the total, the performance obligation will be satisfied as the service is provided over the terms of the contracts, which range from one to ten years. The Company's agreements with its consumer customers are typically on a month-to-month basis. Therefore, the Company's provision of future service to these customers is not reflected in the above discussion of future performance obligations.

Contract Assets and Liabilities

The Company incurs certain incremental costs to obtain contracts that it expects to recover. These costs consist primarily of sales commissions and other directly related incentive compensation payments (reported as contract additions in the table below) which are dependent upon, and paid upon, successfully entering into individual customer contracts. The resulting contract asset is amortized to expense over the relevant contract life consistent with recognition of the associated revenue. In the event a contract with a customer is cancelled or modified, the unamortized portion of the associated contract asset is written off or adjusted as required. Incremental costs of obtaining contracts for which the term is one year or less are expensed as incurred. The Company does not incur material contract fulfillment costs associated with its contracts with customers. The cost of the Company's network and related equipment, and enhancements to the network required under customer contracts, is accounted for in accordance with ASC 360, "Property, Plant and Equipment." As described above, customer premise equipment constitutes a separate performance obligation under the contract and is sold to the customer. Modems are sold to the customer upon installation and are accounted for in accordance with ASC 330, "Inventory."

Certain contracts allow customers to modify their contract. When a contract is modified, the Company evaluates the change in scope or price of the contract to determine if the modification should be treated as a separate contract, if there is a termination of the existing contract and creation of a new contract, or if the modification should be considered a change associated with the existing contract. When a customer adds a distinct service to an existing contract for the standalone selling price of that service, the new service is treated as a separate contract.

The table below provides a reconciliation of the contract assets associated with contracts with customers accounted for in accordance with ASC 606 for the year ended December 31, 2018. Contract modifications and cancellations did not have a material effect on contract assets in the year ended December 31, 2018. Contract assets are classified as “Other assets” on the consolidated balance sheet.

Balance at beginning of period	\$6,898
Contract additions	4,881
Amortization	(3,727)
Balance at end of period	\$8,052

The Company recorded a provision for uncollectible accounts receivable of \$2,745 in the year ended December 31, 2018 associated with its contracts with customers. See Note 4 “*Accounts Receivable*.”

The table below provides a reconciliation of the contract liabilities associated with contracts with customers accounted for in accordance with ASC 606 for the year ended December 31, 2018. Contract liabilities consist of deferred revenue and are included in “Accounts payable, accrued and other current liabilities” and “Other long-term liabilities, net of current portion.”

Balance at beginning of period	\$1,150
Contract additions	2,407
Revenue recognized	(791)
Balance at end of period	\$2,766

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)****3. JOINT VENTURE**

In 2015, the Company entered into a series of transactions including the acquisition of a fiber optic network on the North Slope arctic area of Alaska and the establishment of AQ-JV to own, operate and market part of that network. The network provides reliable fiber-optic connectivity where only high-cost microwave and high-latency satellite communications was previously available. Through AQ-JV, this network has been made available to other telecom carriers in the market.

The Company determined that the joint venture is a Variable Interest Entity as defined in ASC 810, "Consolidation." The Company consolidates the financial results of AQ-JV based on its determination that, the 50 percent voting interest of each party notwithstanding, for accounting purposes it holds a controlling financial interest in, and is the primary beneficiary of, the Joint Venture. This determination was based on (i) the Company's expected future utilization of certain assets of the Joint Venture in the operation of the Company's business; and (ii) the Company's engineering, design, installation, service and maintenance expertise in the telecom industry and its existing relationships and presence in the Alaska telecom market are expected to be significant factors in the successful operation of the joint venture. There was no gain or loss recognized by the Company on the initial consolidation of the joint venture. The Company has accounted for and reported QHL's 50 percent ownership interest in the AQ-JV as a noncontrolling interest.

The table below provides certain financial information about the joint venture included on the Company's consolidated balance sheet at December 31, 2018 and 2017. Cash may be utilized only to settle obligations of the joint venture. Because the joint venture is an LLC, and the Company has not guaranteed its operations, the joint venture's creditors do not have recourse to the general credit of the Company.

	2018	2017
Cash	\$270	\$190
Property, plant and equipment, net of accumulated depreciation of \$309 and \$211	\$1,832	\$1,930

The operating results and cash flows of the joint venture in the years 2018 and 2017 were not material to the Company's consolidated financial results.

4. ACCOUNTS RECEIVABLE

Accounts receivable, net, consists of the following at December 31, 2018 and 2017:

	2018	2017
Retail customers	\$21,732	\$22,227
Wholesale carriers	9,315	8,146
Other	4,361	4,891
	35,408	35,264
Less: allowance for doubtful accounts	(3,936)	(2,729)
Accounts receivable, net	\$31,472	\$32,535

The following table presents the activity in the allowance for doubtful accounts for the years ended December 31, 2018 and 2017.

	2018	2017
Balance at January 1	\$2,729	\$1,115
Provision for uncollectible accounts	2,745	3,577
Charged to other accounts	(921)	(358)
Deductions	(617)	(1,605)
Balance at December 31	\$3,936	\$2,729

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

In March 2018, USAC announced that demand for rural health care support had exceeded the program's \$400 million annual cap in Funding Year 2017 (which began on July 1, 2017 and ends on June 30, 2018) and that individual applicants that filed successful funding requests would receive approximately 84.4% of the funding for which they were otherwise eligible. In June 2018, the FCC announced that it had raised the annual funding cap for Funding Year 2017 to \$571 million to fully fund eligible funding requests for that year. During the third quarter of 2018, the applications associated with Funding Year 2017 for essentially all of the Company's rural health care customers were approved or denied. Resolution of customer applications did not have a material effect on revenue recognized through June 30, 2018. In the fourth quarter of 2018, the FCC notified the Company that it had approved the Funding Year 2018 (which began on July 1, 2018 and ends on June 30, 2019) cost-based rural rates for its customers. As of December 31, 2018, USAC had issued funding commitment letters for the majority of the Company's customer applications for Funding Year 2018. Accounts receivable, net, associated with rural health care customers was \$8,122 and \$8,580 at December 31, 2018 and 2017, respectively. Rural health care accounts are a component of the Retail Customers category in the above table. See Note 2 "Revenue Recognition" for additional information.

5. OTHER CURRENT ASSETS

Prepayments and other current assets consist of the following at December 31, 2018 and 2017:

	2018	2017
Income tax receivable ⁽¹⁾	\$5,087	\$-
Prepaid expense	3,878	3,007
Other	3,204	3,108
Total prepayments and other current assets	\$12,169	\$6,115

⁽¹⁾ See Note 15 "Income Taxes."

6. CURRENT LIABILITIES

Accounts payable, accrued and other current liabilities consist of the following at December 31, 2018 and 2017:

	2018	2017
Accounts payable - trade	\$14,627	\$17,739
Accrued payroll, benefits, and related liabilities	13,473	9,286
Deferred capacity and other revenue	6,095	4,817
Other	6,762	4,306
Total accounts payable, accrued and other current liabilities	\$40,957	\$36,148

Advance billings and customer deposits consist of the following at December 31, 2018 and 2017:

	2018	2017
Advance billings	\$3,992	\$4,181
Customer deposits	32	32
Total advance billings and customer deposits	\$4,024	\$4,213

7. FAIR VALUE MEASUREMENTS

The Company has developed valuation techniques based upon observable and unobservable inputs to calculate the fair value of non-current monetary assets and liabilities. Observable inputs reflect market data obtained from independent sources while unobservable inputs reflect internal market assumptions. These two types of inputs create the following fair value hierarchy:

Level 1- Quoted prices for identical instruments in active markets.

Level 2- Quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations whose inputs are observable or whose significant value drivers are observable.

Level 3- Significant inputs to the valuation model are unobservable.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

Financial assets and liabilities are classified within the fair value hierarchy in their entirety based on the lowest level of input that is significant to the fair value measurements. The Company's assessment of the significance of a particular input to the fair value measurements requires judgment and may affect the valuation of the assets and liabilities being measured, as well as their level within the fair value hierarchy.

The fair values of cash equivalents, restricted cash, other short-term monetary assets and liabilities and capital leases approximate carrying values due to their nature. The estimated fair value and carrying value of the Company's 6.25% Convertible Notes due 2018 (the "6.25% Notes") of \$10,026 at December 31, 2017 was estimated based on the quoted market prices for identical instruments on dates different from the trade date value (Level 2). The 6.25% Notes were repurchased on May 1, 2018. The carrying values of the Company's senior credit facilities and other long-term obligations of \$172,494 at December 31, 2018 approximate fair value primarily as a result of the stated interest rates of the 2017 Senior Credit Facility approximating current market rates (Level 2).

Fair Value Measurements on a Recurring Basis

The following table presents the Company's financial assets measured at fair value on a recurring basis as of December 31, 2018 and 2017 at each hierarchical level. There were no transfers into or out of Levels 1 and 2 during 2018.

	December 31, 2018			December 31, 2017				
	Total	Level 1	Level 2	Level 3	Total	Level 1	Level 2	Level 3
Assets:								
Other assets:								
Interest rate swaps	\$458	\$ -	\$458	\$ -	\$515	\$ -	\$515	\$ -

Derivative Financial Instruments

The Company currently uses interest rate swaps to manage variable interest rate risk. At low LIBOR rates, payments under the swaps increase the Company's cash interest expense, and at high LIBOR rates, they have the opposite effect.

The outstanding amount of the swaps as of a period end are reported on the balance sheet at fair value, represented by the estimated amount the Company would receive or pay to terminate the swaps. They are valued using models based on readily observable market parameters for all substantial terms of the contracts and are classified within Level 2 of the fair value hierarchy.

Changes in fair value of the Company's interest rate swaps are recorded to accumulated other comprehensive loss and are reclassified to interest expense when the hedged transaction is recognized in earnings. See Note 10 "*Long-Term Obligations*" and Note 12 "*Accumulated Other Comprehensive Loss*."

Under the terms of the 2017 Senior Credit Facility, the Company was required to enter into or obtain an interest rate hedge sufficient to effectively fix or limit the interest rate on borrowings under the agreement of a minimum of \$90,000 with a weighted average life of at least two years. In 2017, the Company entered into a pay-fixed, receive-floating interest rate swap in the notional amount of \$90,000, with an interest rate of 6.49425%, inclusive of a 5.0% LIBOR spread, and a maturity date of June 28, 2019. Changes in fair value of this interest rate swap are recorded to accumulated other comprehensive loss and reclassified to interest expense when the hedged transaction is recognized in earnings. See Note 10 "*Long-Term Obligations*", Note 12 "*Accumulated Other Comprehensive Loss*" and Note 21 "*Subsequent Events*."

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

The following table presents the notional amount, fair value and balance sheet classification of the Company's derivative financial instruments designated as cash flow hedges as of December 31, 2018 and 2017:

	Balance Sheet Location	Notional Amount	Fair Value
At December 31, 2018:			
Interest rate swaps	Other assets	\$ 90,000	\$ 458
At December 31, 2017:			
Interest rate swaps	Other assets	\$ 90,000	\$ 515

The following table presents gains and losses before income taxes on the Company's interest rate swaps designated as cash flow hedges for the years ending December 31, 2018 and 2017.

	2018	2017
Gain recognized in accumulated other comprehensive loss	\$ 387	\$ 471
Gain (loss) reclassified from accumulated other comprehensive loss	\$ 444	\$ (104)
Gain recognized in interest expense (ineffective portion and amount excluded from effectiveness testing)	\$-	\$-

The following table presents a reconciliation of the carrying value of the Company's interest rate swaps, which are included in "Other assets" at December 31, 201 and 2018:

	2018	2017
Asset (liability) at January 1	\$ 515	\$ (100)
Reclassified from other assets and other long-term liabilities to accumulated other comprehensive loss	387	471
Change in fair value (debited) credited to interest expense	(444)	144
Asset at December 31	\$ 458	\$ 515

Fair Value Measurements on a Non-Recurring Basis

Deferred Capacity Revenue

The Company entered into an agreement to provide wholesale services to another carrier on February 2, 2015. A national valuation firm was engaged to assist management in the determination of the fair value of the obligation which was determined to be \$41,287 at February 2, 2015. The obligation is amortized to revenue on a straight-line basis over the contract lives of 10 to 30 years. The total carrying value of the service obligation was \$33,184 and \$35,255 at December 31, 2018 and 2017, respectively, and is included in “Other long-term liabilities, net of current portion” and “Accounts payable, accrued and other current liabilities” on the Consolidated Balance Sheet.

Other Items

The Company entered into agreements in connection with the acquisition of the fiber optic network on the North Slope of Alaska and the establishment of the joint venture with QHL. These transactions included the exchange of certain assets and liabilities, all of which were established at fair value on the date of the transactions.

The fair value of the IRU assets and obligations were \$2,304 and \$4,153, respectively, at the measurement date of April 2, 2015. IRU assets are included in “Property, plant and equipment” and IRU obligations are included in “Accounts payable, accrued and other current liabilities” and “Other long-term obligations” on the Consolidated Balance Sheet. The carrying value of these items at December 31, 2018 and 2017 was as follows:

	2018	2017
IRU Assets	\$2,025	\$2,118
IRU Obligations	\$3,594	\$3,747

No impairment of long-lived assets was recognized during 2018 and 2017.

8. PROPERTY, PLANT AND EQUIPMENT

Property, plant and equipment consist of the following at December 31, 2018 and 2017:

	2018	2017	Useful Lives
Land, buildings and support assets*	\$197,381	\$195,063	5 - 42
Central office switching and transmission	387,008	380,954	5 - 12
Outside plant, cable and wire facilities	750,492	739,547	10 - 50
Other	17,126	12,016	2 - 5
Construction work in progress	38,615	30,349	
	1,390,622	1,357,929	
Less: accumulated depreciation and amortization	(1,017,442)	(991,816)	
Property, plant and equipment, net	\$373,180	\$366,113	

* Depreciation charges are not recorded for land.

Capitalized interest associated with construction in progress for the years ended December 31, 2018 and 2017 was \$2,001 and \$1,140, respectively. The capitalization rate used was based on a weighted average of the Company's long term debt outstanding, and for the years ended December 31, 2018 and 2017 was 7.29% and 6.71%, respectively.

The following is a summary of property, including leasehold improvements, held under capital leases included in the above property, plant and equipment at December 31, 2018 and 2017:

	2018	2017
Land, buildings and support assets	\$13,289	\$13,722
Outside plant, cable and wire facilities	-	1,078
Total	13,289	14,800
Less: accumulated depreciation and amortization	(7,471)	(7,052)
Property held under capital leases, net	\$5,818	\$7,748

Amortization of assets under capital leases included in depreciation expense for the years ended December 31, 2018 and 2017 was \$676 and \$846, respectively. Future minimum lease payments, including interest, under these leases for the next five years and thereafter are as follows:

2019	\$310
2020	318
2021	327
2022	336
2023	345
Thereafter	3,828
Gross payments	5,464
Interest	(2,696)
Net payments	\$2,768

The Company leases various land, buildings, right-of-ways and personal property under operating lease agreements. Rental expense under operating leases for the years ended December 31, 2018 and 2017 was \$8,173 and \$7,763, respectively.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

Future minimum payments under these leases, including month to month rentals which are probable of renewal, for the next five years and thereafter are as follows:

2019	\$7,856
2020	6,726
2021	6,450
2022	5,841
2023	4,493
Thereafter	20,833
Total payments	\$52,199

9. ASSET RETIREMENT OBLIGATIONS

The Company's asset retirement obligation is included in "Other long-term liabilities, net of current portion" on the Consolidated Balance Sheet and represents the estimated obligation related to the removal and disposal of certain property and equipment in both leased and owned properties.

The following table provides the changes in the asset retirement obligation:

	2018	2017
Balance at January 1	\$4,088	\$3,708
Asset retirement obligation	805	228
Accretion expense	214	196
Settlement of obligations	(83)	(44)
Balance at December 31	\$5,024	\$4,088

10. LONG-TERM OBLIGATIONS

On January 15, 2019, the Company entered into a new senior credit facility. See Note 21 “*Subsequent Events.*” Consummation of this agreement prior to issuance of the Company’s 2018 financial statements demonstrated the Company’s intent and ability to refinance a portion of its current obligation in accordance with ASC 470, “Debt.” Current maturities under the Company’s 2017 Senior Credit Facility totaling \$6,600 at December 31, 2018 were effectively replaced by principal payments totaling \$2,250 under the new senior credit facility. Accordingly, current portion of long-term obligations in the amount of \$4,350 was reclassified to long-term obligations at December 31, 2018. The Consolidated Balance Sheet and schedule of long-term obligations at December 31, 2018, and the schedule of maturities of long-term obligations reflect this reclassification only, and do not reflect all changes in debt maturities resulting from this transaction.

Long-term obligations consist of the following at December 31, 2018 and 2017:

	2018	2017
2017 senior secured credit facility due 2023	\$171,750	\$178,350
Debt discount	(2,024)	(2,668)
Debt issuance costs	(2,182)	(2,869)
6.25% convertible notes due 2018	-	10,044
Debt discount	-	(18)
Debt issuance costs	-	(4)
Capital leases and other long-term obligations	2,768	3,154
Total debt	170,312	185,989
Less current portion	(2,289)	(17,030)
Long-term obligations, net of current portion	\$168,023	\$168,959

As of December 31, 2018, the Company had no amounts outstanding under the \$15,000 revolving facility component of its 2017 Senior Credit Facility.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

The aggregate maturities of long-term obligations for each of the next five years and thereafter at December 31, 2018, are as follows:

2019	\$2,289
2020	13,252
2021	16,267
2022	86,483
2023	53,801
Thereafter	2,426
Total maturities	\$174,518

2017 Senior Credit Facility

On January 15, 2019, the Company utilized the proceeds from its new senior credit facility to repay in full the outstanding principal balance and accrued and unpaid interest on the 2017 Senior Credit Facility. See Note 21 “*Subsequent Events.*”

On March 13, 2017 (the “Closing Date”), the Company entered into a new senior credit facility consisting of a Term A-1 Facility of \$120,000, a Term A-2 Facility of \$60,000 and a revolving facility of \$15,000 (the “2017 Senior Credit Facility”). Upon the satisfaction of certain conditions, on March 28, 2017 (the “Funding Date”), the 2017 Senior Credit Facility was funded. Gross cash proceeds totaling \$176,828, net of discounts of \$3,172, and cash on hand of \$9,030 were utilized as follows: (i) repayment of the Company’s 2015 Senior Credit Facility due 2018 totaling \$88,135, including principal, accrued interest and fees; (ii) placement of \$94,000 in restricted cash to fund the purchase or repayment at maturity of its 6.25% Notes; (iii) fund fees associated with tender of the 6.25% Notes of \$197; and (iv) fund fees and other expenses associated with the transaction totaling \$3,526. Discounts, fees and expenses associated with the 2017 Senior Credit Facility, including amounts paid in 2016, totaling \$6,580 were deferred and charged to interest expense over the terms of the agreement.

The Term A-1 Facility in the principal amount of \$120,000 bore interest at LIBOR plus 5.0% per annum, with a LIBOR minimum of 1.0%. Quarterly principal payments were \$1,500 beginning in the fourth quarter of 2017 through the first quarter of 2020; \$2,250 in the second quarter of 2020 through the first quarter of 2021; and \$4,000 in the second quarter of 2021 through the fourth quarter of 2021. The remaining outstanding principal balance was due on

March 13, 2022.

The Term A-2 Facility in the principal amount of \$60,000 bore interest at LIBOR plus 7.0% per annum, with a LIBOR minimum of 1.0%. Quarterly principal payments were \$150 beginning in the fourth quarter of 2017 through the first quarter of 2021; and \$600 in the second quarter of 2021 through the fourth quarter of 2022. The remaining outstanding principal balance was due on March 13, 2023.

The Company may have, at its option, designated a portion of the borrowings under the Term A-1 Facility and Term A-2 Facility to bear interest at an Alternative Base Rate, which is defined as the highest of (i) the Prime Rate; (ii) the Federal Funds Effective Rate plus 0.50% per annum; and (iii) the Adjusted LIBOR Rate for an Interest Period of one month plus 1.0% per annum. If the LIBOR Rate is no longer available for such interest period, the Adjusted LIBOR Rate shall be calculated as the Administrative Agent shall select in its sole discretion. The Alternative Base Rate shall not be less than zero.

The revolving facility provided for borrowings in an aggregate amount outstanding at any one time not to exceed \$15,000, including a letter of credit subfacility and swingline subfacility with commitment limitations based on amounts drawn under the revolving facility (collectively the "Revolving Facility"). The Revolving Facility bore interest at LIBOR plus 5.0% per annum, with a LIBOR minimum of 1.0%.

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.

Notes to Consolidated Financial Statements

Years Ended December 31, 2018 and 2017

(In Thousands, Except Per Share Amounts)

The obligations under the 2017 Senior Credit Facility were secured by substantially all of the personal property and certain material real property owned by the Company and its wholly-owned subsidiaries, with certain exceptions. The 2017 Senior Credit Facility contained customary representations, warranties and covenants, including covenants limiting the incurrence of additional debt, declaring dividends, repurchase of the Company's common stock, making investments, dispositions, and entering into mergers and acquisitions. Financial covenants (i) imposed a maximum net total leverage to consolidated EBITDA ratio; and (ii) required a minimum consolidated EBITDA to fixed charge coverage ratio. The payment of dividends on the Company's common stock was not permitted until such time that the Company's net total leverage ratio, as defined in the 2017 Senior Credit Facility, was not more than 2.75 to 1.00, and certain other liquidity measures were met. Calculation and reporting to the lenders the actual net leverage ratio at December 31, 2018 was not required. The 2017 Senior Credit Facility provided for events of default customary for credit facilities of this type, including non-payment under the agreement, breach of warranty, breach of covenants, defaults on other debt, incurrence of liens on collateral, change of control and insolvency, all as defined in the agreement. Consequences of an event of default were defined in the agreement.

As required under the terms of the 2017 Senior Credit Facility, the Company entered into interest rate hedges sufficient to effectively fix or limit the interest rate on borrowings under the agreement of a minimum of \$90,000 with a weighted average life of at least two years. See Note 7 "*Fair Value Measurements*" for additional information.

6.25% Convertible Notes due 2018

On March 17, 2017, the Company issued a tender offer to purchase any and all of its outstanding 6.25% Notes for cash in an amount equal to one thousand twenty-five dollars per one thousand dollars principal amount (the "Tender Offer"). The Tender Offer was subsequently amended to one thousand thirty-seven dollars and fifty cents per one thousand dollars principal amount. Under the terms of the agreement, proceeds from the Company's 2017 Senior Credit Facility in the amount of \$94,000 were utilized to fund the Tender Offer and the repurchase of the remaining 6.25% Notes. The Tender Offer expired on April 14, 2017 and was settled on April 17, 2017. As of the expiration date, \$83,956 aggregate principal amount of the 6.25% Notes were validly tendered and not validly withdrawn pursuant to the Tender Offer, and were accepted for purchase by the Company at the amended price. The Company settled the Tender Offer on April 17, 2017. The cash settlement totaled \$90,231, including principal of \$83,956, accrued interest of \$2,420, the premium of \$3,148 and fees of \$707. Settlement was funded with restricted cash of \$83,956 and other cash on hand of \$6,275. The Company recorded a loss on the extinguishment of this debt of \$5,230 in 2017. Following settlement, 6.25% Notes in the aggregate principal amount of \$10,044 remained outstanding.

On May 1, 2018, the Company repurchased the outstanding balance of its 6.25% Notes. The cash settlement totaled \$10,358, including principal of \$10,044 and accrued interest of \$314. Settlement was funded utilizing restricted cash of \$10,044 and cash on hand of \$314. There was no gain or loss associated with the repurchase.

The following table provides selected data regarding the 6.25% Notes as of December 31, 2017:

	2017
Net carrying amount of the equity component	\$686
Principal amount of the convertible notes	\$10,044
Unamortized debt discount	\$18
Amortization period remaining (months)	4
Net carrying amount of the convertible notes	\$10,026

The following table details the interest components of the 6.25% Notes contained in the Company's Consolidated Statements of Comprehensive Income (Loss) for the years ended December 31, 2018 and 2017:

	2018	2017
Coupon interest expense	\$208	\$2,163
Amortization of the debt discount	18	2,253
Total included in interest expense	\$226	\$4,416

(In Thousands, Except Per Share Amounts)

Capital Leases and Other Long-term Obligations

The Company is a lessee under various capital leases and other financing agreements totaling \$2,768 and \$3,154 with a weighted average interest rate of 9.82% and 9.41% at December 31, 2018 and 2017, respectively, and have maturities through 2033.

Debt Issuance Costs

The Company incurred debt issuance costs totaling \$3,407 associated with its 2017 Senior Credit Facility which were deferred and amortized to interest expense over the terms of the agreements. Amortization of debt issuance costs were \$691 and \$2,057 in the years ended December 31, 2018 and 2017, respectively, including zero and \$974 classified as loss on extinguishment of debt in 2018 and 2017, respectively.

Debt Discounts

Accretion of debt discounts charged to interest expense or loss on extinguishment of debt in 2018 and 2017, totaled \$662 and \$2,763, respectively, including zero and \$1,482 classified as loss on extinguishment of debt in 2018 and 2017, respectively.

11. OTHER LONG-TERM LIABILITIES

Other long-term liabilities consist of the following at December 31, 2018 and 2017:

	2018	2017
Deferred GCI capacity revenue, net of current portion	\$31,113	\$33,184

Other deferred IRU capacity revenue, net of current portion	25,732	19,366
Other deferred revenue, net of current portion	2,113	1,391
Other	8,869	7,389
Total other long-term liabilities	\$67,827	\$61,330

Amortization of deferred revenue included in the Consolidated Statements of Comprehensive Income (Loss) was \$7,407 and \$6,578 in the years ended December 31, 2018 and 2017, respectively.

13. RETIREMENT PLANS*Multi-employer Defined Benefit Plan*

Pension benefits for substantially all of the Company's Alaska-based employees are provided through the AEPF. The Company pays the AEPF a contractual hourly amount based on employee classification or base compensation. As a multi-employer defined benefit plan, the accumulated benefits and plan assets are not determined for, or allocated separately to, the individual employer.

The following table provides additional information about the AEPF multi-employer pension plan.

Plan name	Alaska Electrical Pension Plan
Employer Identification Number	92-6005171
Pension plan number	001
Pension Protection Act zone status at the plan's year-end:	
December 31, 2018	Green
December 31, 2017	Green
Plan subject to funding improvement plan	No
Plan subject to rehabilitation plan	No
Employer subject to contribution surcharge	No
	Greater than 5% of Total Contributions to the Plan
Company contributions to the plan for the year ended:	
December 31, 2018	\$6,492 Yes
December 31, 2017	\$7,171 Yes

Name and expiration date of collective bargaining agreements requiring contributions to the plan:

Collective Bargaining Agreement Between Alaska Communications Systems and Local Union 1547 IBEW	December 31, 2023
Outside Agreement Alaska Electrical Construction between Local Union 1547 IBEW and Alaska Chapter National Electrical Contractors Association Inc.	June 30, 2022
Inside Agreement Alaska Electrical Construction between Local Union 1547 IBEW and Alaska Chapter National Electrical Contractors Association Inc.	October 31, 2019

The Company cannot accurately project any change in the plan status in future years given the uncertainty of economic conditions or the effect of actuarial valuations versus actual performance in the market. Minimum required future contributions to the AEPF are subject to the number of employees in each classification and/or base compensation of employees in future years.

Defined Contribution Plan

The Company provides a 401(k) retirement savings plan covering substantially all of its employees. The plan allows for discretionary contributions as determined by the Board of Directors, subject to Internal Revenue Code limitations. The Company made a \$209 and \$212 matching contribution in 2018 and 2017, respectively.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)***Defined Benefit Plan*

The Company has a separate defined benefit plan that covers certain employees previously employed by Century Telephone Enterprise, Inc. ("CenturyTel Plan"). This plan was transferred to the Company in connection with the acquisition of CenturyTel, Inc.'s Alaska properties, whereby assets and liabilities of the CenturyTel Plan were transferred to the ACS Retirement Plan ("Plan") on September 1, 1999. Accrued benefits under the Plan were determined in accordance with the provisions of the CenturyTel Plan and upon completion of the transfer, covered employees ceased to accrue benefits under the CenturyTel Plan. On November 1, 2000, the Plan was amended to conform early retirement reduction factors and various other terms to those provided by the AEPF. The Company uses the traditional unit credit method for the determination of pension cost for financial reporting and funding purposes and complies with the funding requirements under the Employee Retirement Income Security Act of 1974, as amended ("ERISA"). The Company uses a December 31 measurement date for the Plan. The Plan is not adequately funded under ERISA at December 31, 2018. The Company contributed \$192 to the Plan in 2018 and \$721 in 2017. The Company plans to contribute approximately \$117 to the Plan in 2019 and management is also estimating what additional contributions the Company may be required to make in subsequent years in the event the value of the Plan's assets remain volatile or decline.

The following is a calculation of the funded status of the ACS Retirement Plan using beginning and ending balances for 2018 and 2017 for the projected benefit obligation and the plan assets:

	2018	2017
Change in benefit obligation:		
Benefit obligation at beginning of year	\$ 15,798	\$ 15,782
Interest cost	566	620
Actuarial (gain) loss	(872)	384
Benefits paid	(993)	(988)
Benefit obligation at end of year	14,499	15,798
Change in plan assets:		
Fair value of plan assets at beginning of year	12,534	11,393
Actual (loss) return on plan assets	(863)	1,408
Employer contribution	192	721
Benefits paid	(992)	(988)
Fair value of plan assets at end of year	10,871	12,534

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.
Notes to Consolidated Financial Statements
Years Ended December 31, 2018 and 2017
(In Thousands, Except Per Share Amounts)

The assumptions used to account for the Plan as of December 31, 2018 and 2017 are as follows:

	2018	2017
Discount rate for benefit obligation	4.30%	3.70%
Discount rate for pension expense	3.70%	4.10%
Expected long-term rate of return on assets	6.53%	6.53%
Rate of compensation increase	0.00%	0.00%

The discount rate for December 31, 2018 and 2017 was calculated using a proprietary yield curve based on above median AA rated corporate bonds. The expected long-term rate-of-return on assets rate is the best estimate of future expected return for the asset pool, given the expected returns and allocation targets for the various classes of assets.

Based on risk and return history for capital markets along with asset allocation risk and return projections, the following asset allocation guidelines were developed for the Plan:

<u>Asset Category</u>	Minimum	Maximum
Equity securities	50%	80%
Fixed income	20%	50%
Cash equivalents	0%	5%

The Plan's asset allocations at December 31, 2018 and 2017 by asset category are as follows:

<u>Asset Category</u>	2018	2017
Equity securities*	64%	68%
Debt securities*	35%	31%
Other/Cash	1%	1%

*May include mutual funds comprised of both stocks and bonds.

The fundamental investment objective of the Plan is to generate a consistent total investment return sufficient to pay Plan benefits to retired employees while minimizing the long-term cost to the Company. The long-term (10 years and beyond) Plan asset growth objective is to achieve a rate of return that exceeds the actuarial interest assumption after fees and expenses.

Because of the Company's long-term investment objectives, the Plan administrator is directed to resist being reactive to short-term capital market developments and to maintain an asset mix that is continuously rebalanced to adhere to the plan investment mix guidelines. The Plan's investment goal is to protect the assets' long-term purchasing power. The Plan's assets are managed in a manner that emphasizes a higher exposure to equity markets versus other asset classes. It is expected that such a strategy will provide a higher probability of meeting the plan's actuarial rate of return assumption over time.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

The following table presents major categories of plan assets as of December 31, 2018, and inputs and valuation techniques used to measure the fair value of plan assets regarding the ACS Retirement Plan:

<u>Asset Category</u>	Total	Fair Value Measurement at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets Level 1	Significant Other Observable Inputs Level 2	Significant Unobservable Inputs Level 3
Money market/cash	\$ 101	\$ -	\$ 101	\$ -
Equity securities (Investment Funds)*				
International growth	1,629	1,629	-	-
U.S. small cap	1,238	1,238	-	-
U.S. medium cap	942	942	-	-
U.S. large cap	3,156	3,156	-	-
Debt securities (Investment Funds)*				
Certificate of deposits	2,745	2,489	256	-
Fixed income	1,060	-	1,060	-
Total fair value	\$ 10,871	\$ 9,454	\$ 1,417	\$ -

*May include mutual funds comprised of both stocks and bonds.

The benefits expected to be paid in each of the next five years and in the aggregate for the five fiscal years thereafter are as follows:

2019	\$ 1,068
2020	\$ 1,079
2021	\$ 1,084
2022	\$ 1,072
2023	\$ 1,061
2024-2028	\$ 5,064

Post-retirement Health Benefit Plan

The Company has a separate executive post-retirement health benefit plan. On December 31, 2018, the plan was underfunded by \$356 with plan assets of \$24. The net periodic post-retirement cost for 2018 and 2017 was \$22 and \$15, respectively.

14. EARNINGS PER SHARE

Earnings per share is based on the weighted average number of shares of common stock and dilutive potential common share equivalents outstanding. Basic earnings per share assumes no dilution and is computed by dividing net income or loss available to Alaska Communications by the weighted average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution of securities that could share in the earnings of the Company. The Company reported a net loss for the year ended December 31, 2017. Therefore, 3,022 potential common share equivalents were anti-dilutive and excluded from the calculation.

The Company's 6.25% Notes were convertible by the holder beginning February 1, 2018 at an initial conversion rate of 97.2668 shares of common stock per one thousand dollars principal amount of the 6.25% Notes. This is equivalent to an initial conversion price of approximately \$10.28 per share of common stock. Given that the Company's current share price was well below \$10.28, the Company did not anticipate that there would be a conversion of the 6.25% Notes into equity and determined that it had the intent and ability to settle the principal and interest payments on its 6.25% Notes in cash. The Company settled the Tender Offer to purchase its outstanding 6.25% Notes for cash on April 17, 2017. On May 1, 2018, the Company repurchased the outstanding balance of the 6.25% Notes. See Note 10 "Long-Term Obligations." Accordingly, 321 and 3,371 shares related to the 6.25% Notes were excluded from the calculation of diluted earnings per share for the years ended December 31, 2018 and 2017, respectively.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

The following table sets forth the computation of basic and diluted earnings per share for the years ended December 31, 2018 and 2017:

	2018	2017
Net income (loss) attributable to Alaska Communications	\$9,080	\$(6,101)
Tax-effected interest expense attributable to convertible notes	NA	NA
Net income (loss) attributable to Alaska Communications assuming dilution	\$9,080	\$(6,101)
Weighted average common shares outstanding:		
Basic shares	53,042	52,232
Effect of stock-based compensation	798	-
Effect of 6.25% convertible notes	NA	NA
Diluted shares	53,840	52,232
Income (loss) per share attributable to Alaska Communications:		
Basic	\$0.17	\$(0.12)
Diluted	\$0.17	\$(0.12)

15. INCOME TAXES

On December 22, 2017, H.R. 1, originally known as the Tax Cuts and Jobs Act, (“TCJA”) was enacted. The TCJA provides for sweeping changes in United States tax rates and tax provisions which affected the Company as of December 31, 2017 and for periods beginning after January 1, 2018. Effective for years beginning after December 31, 2017, the maximum corporate tax rate decreased to a flat rate of 21%. This decrease in the tax rate resulted in the remeasurement of existing deferred tax assets and liabilities as of the enactment date and resulted in a decrease to existing net deferred tax assets of \$3,851. In addition, the TCJA provides for existing Federal AMT tax credits to be refunded from 2018 through 2021. Accordingly, as of December 31, 2017, the Company reclassified AMT tax credits of \$8,913 from non-current deferred tax assets to non-current long-term tax receivables. The federal AMT credits were reduced by \$569 related to the applicable budget sequestration rate of 6.6%. The Company evaluated the TCJA and concluded that all information was available to complete the accounting for the effects of the tax reform in the fourth quarter of 2017. In the first quarter of 2018, the Company recorded an additional benefit of \$703 associated with the effects of the TCJA. In the fourth quarter of 2018, the Company reversed the federal AMT credit sequestration reduction of \$569 recorded in 2017 based on Internal Revenue Service guidance published in January 2019, resulting in a corresponding reduction in the provision for income taxes. As of December 31, 2018, the Company had reclassified \$5,087 of existing AMT tax credits from non-current tax receivable to current tax receivable.

F-36

Table of Contents

ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.
Notes to Consolidated Financial Statements
Years Ended December 31, 2018 and 2017
(In Thousands, Except Per Share Amounts)

Consolidated income (loss) before income tax was as follows:

	2018	2017
Income (loss) before income tax	\$11,029	\$(3,646)

The income tax provision for the years ended December 31, 2018 and 2017 was comprised of the following:

	2018	2017
Current:		
Federal income tax	\$(732)	\$(90)
State income tax	6	6
Total current benefit	(726)	(84)
Deferred:		
Federal, excluding operating loss carry forwards	(1,123)	2,772
State, excluding operating loss carry forwards	(31)	(169)
Change in valuation allowance	(42)	65
Tax benefit of operating loss carry forwards:		
Federal	2,771	-
State	1,192	-
Total deferred expense	2,767	2,668
Total income tax expense	\$2,041	\$2,584

The following table provides a reconciliation of income tax expense at the Federal statutory rate of 21% and 35% to the recorded income tax expense for the years ended December 31, 2018 and 2017, respectively:

	2018	2017
Computed federal income taxes at the statutory rate	\$2,335	\$(1,276)
Expense (benefit) in tax resulting from:		
State income taxes (net of Federal benefit)	824	(222)
Enacted rate change	(703)	3,851
Alternative minimum tax sequestration	(569)	-
Other	236	122
Stock-based compensation	(40)	44

Change in valuation allowance	(42)	65
Total income tax expense	\$2,041	\$2,584

Income tax expense was charged to the statement of comprehensive income (loss) and statement of stockholders' equity as follows:

	2018	2017
Statement of comprehensive income (loss):		
Income tax expense	\$2,041	\$2,584
Other comprehensive income (loss), tax effect	\$(110)	\$655

The Company accounts for income taxes under the asset-liability method. Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Valuation allowances are provided when it is "more likely than not" that the benefits of existing deferred tax assets will not be realized in a future period. As of December 31, 2018 and 2017, the Company had valuation allowances on certain state net operating loss carryforwards of \$162 and \$204, respectively. As of December 31, 2018 and 2017, the change in the valuation allowance was \$(42) and \$65, respectively. At December 31, 2018, it is more likely than not that the results of future operations will generate sufficient taxable income to realize existing deferred tax assets, other than the state net operating loss carryforwards noted above. Therefore, no additional valuation allowance is necessary.

Table of Contents**ALASKA COMMUNICATIONS SYSTEMS GROUP, INC.****Notes to Consolidated Financial Statements****Years Ended December 31, 2018 and 2017****(In Thousands, Except Per Share Amounts)**

Significant components of the Company's deferred tax assets and liabilities as of December 31, 2018 and 2017, respectively, are as follows:

	2018	2017
Deferred tax assets:		
Net operating loss carry forwards	\$16,742	\$19,805
Deferred GCI capacity revenue	9,428	10,016
Reserves and accruals	8,947	7,910
Intangibles and goodwill	944	1,033
Pension liability	1,031	927
Allowance for doubtful accounts	1,118	775
Total deferred tax assets	38,210	40,466
Valuation allowance	(162)	(204)
Deferred tax assets after valuation allowance	38,048	40,262
Deferred tax liabilities:		
Debt issuance costs	-	(5)
Property, plant and equipment	(37,320)	(37,287)
Fair value on interest rate swaps	(130)	(146)
Revenue contract assets	(2,407)	-
Other	(8)	(26)
Total deferred tax liabilities	(39,865)	(37,464)
Net deferred tax (liability) asset	\$(1,817)	\$2,798

As of December 31, 2018, the Company has available Federal and state alternative minimum tax credits of \$8,622 and \$1,089, respectively, of which \$5,087 are classified as current income tax receivable and the balance as non-current income tax receivable. As of December 31, 2018, the Company has available Federal and state net operating loss carry forwards of \$64,818 and \$42,512, respectively, which have various expiration dates beginning in 2031 through 2037.

The Company files consolidated income tax returns for Federal and state purposes in addition to separate tax returns of certain subsidiaries in multiple state jurisdictions. As of December 31, 2018, the Company is not under examination by any income tax jurisdiction. The Company is no longer subject to examination in the United States for years prior to 2015.

The Company accounts for income tax uncertainties using a threshold of “more-likely-than-not” in accordance with the provisions of ASC 740, “Income Taxes.” As of December 31, 2018, the Company has reviewed all of its tax filings and positions taken on its returns and has not identified any material current or future effect on its consolidated results of operations, cash flows or financial position. As such, the Company has not recorded any tax, penalties or interest on tax uncertainties. It is Company policy to record any interest on tax uncertainties as a component of income tax expense.

16. STOCK INCENTIVE PLANS

Under the Company’s stock incentive plan, Alaska Communications, through the Compensation and Personnel Committee of its Board of Directors, may grant stock options, restricted stock, stock-settled stock appreciation rights, performance share units and other awards to officers, employees, consultants, and non-employee directors. Upon the effective date of the Alaska Communications Systems Group, Inc. 2011 Incentive Award Plan, as amended and restated on June 30, 2014, (“2011 Incentive Award Plan”), the Alaska Communications Systems Group, Inc. 1999 Stock Incentive Plan and the ACS Group, Inc. 1999 Non-Employee Director Stock Compensation Plan, (together the “Prior Plans”) were retired. All future awards will be granted from the 2011 Incentive Award Plan. The Alaska Communications Systems Group, Inc. 2012 ESPP was approved by the Company’s shareholders in June 2012 and the ACS 1999 Employee Stock Purchase Plan (“1999 ESPP”) was retired on June 30, 2012. References to “stock incentive plans” include, as applicable, the 2011 Incentive Award Plan, the 2012 ESPP, the 1999 ESPP and the Prior Plans. On June 25, 2018, the Company increased the number of shares reserved for issuance under the 2011 Incentive Award Plan by 3,000 shares. An aggregate of 22,210 shares of the Company’s common stock have been authorized for issuance under its stock incentive plans. At December 31, 2018, a total of 2,370 shares remain available for future issuance under the Company’s equity compensation plans, including the 2011 Incentive Award Plan and 2012 Employee Stock Purchase Plan. Stock-based compensation expense reflects forfeitures of share-based awards when they occur.

2011 Incentive Award Plan

On June 10, 2011, Alaska Communications shareholders approved the 2011 Incentive Award Plan, which was amended and restated on June 30, 2014 and which terminates in 2021. Following termination, all shares granted under this plan, prior to termination, will continue to vest under the terms of the grant when awarded. All remaining unencumbered shares of common stock previously allocated to the Prior Plans were transferred to the 2011 Incentive Award Plan. In addition, to the extent that any outstanding awards under the Prior Plans are forfeited or expire or such awards are settled in cash, such shares will again be available for future grants under the 2011 Incentive Award Plan. The Company grants Restricted Stock Units and Performance Stock Units as the primary equity based incentive for executive and certain non union-represented employees.

Restricted Stock Units, Long-term Incentive Awards and Non-Employee Director Stock Compensation

RSUs issued prior to December 31, 2010 vested ratably over three, four or five years, RSUs issued in 2011 vested ratably over three years, RSUs granted in 2012 vested in one year or ratably over three years, RSU's granted in 2017 vest ratably over three years, and RSUs granted in 2018 vest ratably over three years or cliff vest in one year. Long-term incentive awards ("LTIP") were granted to executive management annually through 2010. The LTIP awards cliff vested in five years with accelerated vesting in three years if cumulative three-year profitability criteria were met. Since January 2008, the Company has maintained a policy which requires that non-employee directors receive a portion of their annual retainer in the form of Alaska Communications stock. This requirement may be suspended for specified periods. Non-employee director stock compensation vests when granted. The directors make an annual election on whether to have the stock issued or to have it deferred.

The following table summarizes the RSU, LTIP and non-employee director stock compensation activity for the year ended December 31, 2018:

Number of	Weighted Average Grant-Date Fair
--------------	---

	Shares	Value
Nonvested at December 31, 2017	1,223	\$ 2.00
Granted	695	\$ 1.72
Vested	(682)	\$ 1.91
Canceled or expired	(51)	\$ 1.85
Nonvested at December 31, 2018	1,185	\$ 1.88

Performance Based Units

The following table summarizes PSU activity for the year ended December 31, 2018:

	Number of Shares	Weighted Average Grant-Date Fair Value
Nonvested at December 31, 2017	1,331	\$ 1.47
Granted	1,243	\$ 0.55
Vested	(126)	\$ 1.77
Canceled or expired	(378)	\$ 1.73
Nonvested at December 31, 2018	2,070	\$ 0.85

The PSUs granted in 2018 will vest in three equal installments, or tranches, if certain stock price thresholds and service thresholds are achieved.

The Company measured the fair value of the 2018 PSUs using a Monte Carlo simulation model as more fully described below. Share-based compensation expense subject to a market condition is recognized regardless of whether the market condition is satisfied, provided that the requisite service has been provided.

The table below sets forth the average grant date fair value assumptions used in the Monte Carlo simulation model for the 2018 PSUs.

Valuation (grant) date	July 20, 2018	July 23, 2018
Number of units granted	1,118	125

Fair market value of the Company's Common Stock	\$1.68	\$1.67
Risk-free interest rate	2.66 %	2.70 %
Expected dividend yield	0 %	0 %
Expected volatility	37.08%	36.89%
Simulation period (in years)	3	3

Estimated fair value per award:

Vesting Tranche 1	\$0.37	\$0.35
Vesting Tranche 2	\$0.59	\$0.58
Vesting Tranche 3	\$0.71	\$0.70

Fair Market Value – based on the quoted closing price of the Company's common stock.

Risk-free interest rate – based on the rates for U.S. Treasury zero-coupon bonds with a maturity of 3 years, which is the longest performance period of the PSUs.

Dividend Yield – based on the fact that the Company has not paid cash dividends since 2012 and does not anticipate paying cash dividends in the foreseeable future.

Expected Volatility – based on the historical volatility of the Company's common stock over the three-year period preceding the grant date.

Performance Period – based on the period of time from the valuation date through the end of the performance period.

PSUs granted prior to 2017 vest ratably over three years beginning at the grant date, while PSUs granted in 2017 vest at the end of the 2.5-year performance period, subject to achievement of certain performance conditions, achievement of a market condition and approval of the Compensation and Personnel Committee of the Board of Directors. As of December 31, 2018, certain Company performance targets were deemed probable of achievement and the relevant stock compensation was expensed accordingly based on the authoritative accounting guidance on share-based payments.

Selected Information on Equity Instruments and Share-Based Compensation

Selected information on equity instruments and share-based compensation under the plan for the years ended December 31, 2018 and 2017 is as follows:

	Years Ended December 31, 2018 2017	
Total compensation cost for share-based payments	\$1,757	\$1,509
Weighted average grant-date fair value of equity instruments granted	\$0.97	\$1.73
Total fair value of shares vested during the period	\$1,534	\$2,455
Unamortized share-based payments	\$1,438	\$1,784
Weighted average period in years to be recognized as expense	1.06	1.61

Share-based compensation expense is classified as “Selling, general and administrative expense” in the Company’s Consolidated Statements of Comprehensive Income (Loss).

The Company purchases, from shares authorized under the 2011 Incentive Award Plan, sufficient vested shares to cover minimum employee payroll tax withholding requirements upon the vesting of restricted stock. The Company expects to repurchase approximately 100 shares in 2019. This amount is based upon an estimation of the number of shares of restricted stock awards expected to vest during 2019.

At December 31, 2018, 2,030 shares remain available for future issuance under the Company’s 2011 Incentive Award Plan.

Alaska Communications Systems Group, Inc. 2012 Employee Stock Purchase Plan

The Alaska Communications Systems Group, Inc. 2012 Employee Stock Purchase Plan was approved by the Company's shareholders in June 2012. The 2012 ESPP will terminate upon the earlier of (i) the last exercise date prior to the tenth anniversary of the adoption date, unless sooner terminated in accordance with the 2012 ESPP; or (ii) the date on which all purchase rights are exercised in connection with a change in ownership of the Company. A participant in the 2012 ESPP will be granted a purchase right to acquire shares of common stock at six-month intervals on an ongoing basis, subject to the continuing availability of shares under the 2012 ESPP. Each participant may authorize periodic payroll deductions in any multiple of 1% (up to a maximum of 15%) of eligible compensation to be applied to the acquisition of common stock at semiannual intervals. The 2012 ESPP imposes certain limitations upon a participant's rights to acquire common stock. No participant will have any shareholder rights with respect to the shares covered by their purchase rights until the shares are actually purchased on the participant's behalf. No adjustments will be made for dividends, distributions or other rights for which the record date is prior to the date of the actual purchase.

The Company reserved 1,500 shares of its common stock for issuance under the 2012 ESPP. The fair value of each purchase right under the 2012 ESPP is charged to compensation expense over the offering period to which the right pertains, and is reflected in total compensation cost for share-based payments in the above table. Shares purchased by employees and the associated compensation expense under the 2012 ESPP, which is reflected in the preceding table, were not material in the years ended December 31, 2018 and 2017.

At December 31, 2018, 340 shares remain available for future issuance under the Company's 2012 ESPP.

17.SUPPLEMENTAL CASH FLOW INFORMATION

The following table provides a reconciliation of cash and cash equivalents and restricted cash reported within the statement of financial position at December 31, 2018 and 2017 that sum to the total of these items reported in the statement of cash flows:

	2018	2017
Cash and cash equivalents	\$ 13,351	\$ 4,354
Restricted cash	1,634	11,814
Total cash, cash equivalents and restricted cash	\$ 14,985	\$ 16,168

The following table presents supplemental non-cash transaction information for the years ended December 31, 2018 and 2017:

	2018	2017
Supplemental Non-cash Transactions:		
Capital expenditures incurred but not paid at December 31	\$ 4,998	\$ 5,092
Property acquired under capital leases	\$ -	\$ 1,078
Additions to ARO asset	\$ 805	\$ 228

18.BUSINESS SEGMENTS

The Company operates its business under a single reportable segment. The Company's chief operating decision maker assesses the financial performance of the business as follows: (i) revenues are managed on the basis of specific customers and customer groups; (ii) costs are managed and assessed by function and generally support the organization across all customer groups or revenue streams; (iii) profitability is assessed at the consolidated level; and (iv) investment decisions and the assessment of existing assets are based on the support they provide to all revenue streams.

The following table presents service and product revenues from external customers for the years ended December 31, 2018 and 2017:

	2018	2017
Business and Wholesale Revenue		
Business broadband	\$60,934	\$61,559
Business voice and other	28,429	26,508
Managed IT services	5,742	4,293
Equipment sales and installations	5,127	4,412
Wholesale broadband	38,362	36,081
Wholesale voice and other	6,000	6,267
Total Business and Wholesale Revenue	144,594	139,120
Consumer Revenue		
Broadband	26,144	25,441
Voice and other	11,158	11,676
Total Consumer Revenue	37,302	37,117
Total Business, Wholesale, and Consumer Revenue	181,896	176,237
Regulatory Revenue		
Access	30,878	30,974
High cost support	19,694	19,694
Total Regulatory Revenue	50,572	50,668
Total Operating Revenue	\$232,468	\$226,905

The Company's revenues are derived entirely from external customers in the United States and its long-lived assets are held entirely in the United States.

19. COMMITMENTS AND CONTINGENCIES

The Company enters into purchase commitments with vendors in the ordinary course of business, including minimum purchase agreements. The Company also has long-term purchase contracts with vendors to support the on-going needs of its business. These purchase commitments and contracts have varying terms and in certain cases may require the Company to buy goods and services in the future at predetermined volumes and at fixed prices.

The Company is involved in various claims, legal actions and regulatory proceedings arising in the ordinary course of business. The Company establishes an accrual when a particular contingency is probable and estimable, and has recorded a litigation accrual totaling \$1,200 at December 31, 2018 against certain current claims and legal actions. The Company also faces contingencies that are reasonably possible to occur that cannot currently be estimated. The Company believes that the disposition of these matters will not have a material adverse effect on the Company's consolidated financial position, comprehensive income or cash flows. It is the Company's policy to expense costs associated with loss contingencies, including any related legal fees, as they are incurred.

21.SUBSEQUENT EVENTS

New Senior Credit Facility

On January 15, 2019, the Company entered into an amended and restated credit facility consisting of an Initial Term A Facility in the amount of \$180,000, a Revolving Facility in an amount not to exceed \$20,000 and a Delayed-Draw Term A Facility in an amount not to exceed \$25,000 (together the “2019 Senior Credit Facility” or “Agreement”). The Agreement also provides for Incremental Term A Loans up to an aggregate principal amount of the greater of \$60,000 and trailing twelve month EBITDA, as defined in the Agreement. On January 15, 2019, proceeds from the Initial Term A Facility of \$180,000 were used to repay in full the outstanding principal balance of the Term A-1 Facility and Term A-2 Facility under the Company’s 2017 Senior Credit Facility of \$112,500 and \$59,250, respectively, plus accrued and unpaid interest, pay fees and expenses associated with the Agreement and for general corporate purposes. The 2017 Senior Credit Facility was terminated on January 15, 2019.

Amounts outstanding under the Initial Term A Facility, Revolving Facility, Delayed-Draw Facility and Incremental Term A Loans bear interest at LIBOR plus 4.5% per annum. The Company may, at its discretion and subject to certain limitations as defined in the Agreement, select an alternate base rate at a margin that is 1.0% lower than the counterpart LIBOR margin.

Principal payments on the Initial Term A Facility, Delayed-Draw A Facility and any amounts outstanding under the Incremental Term A Loans are due commencing in the third quarter of 2019 as follows: the third quarter of 2019 through the second quarter of 2020 – 0.625% per quarter; the third quarter of 2020 through the second quarter of 2022 – 1.25% per quarter; the third quarter of 2022 through the second quarter of 2023 – 1.875% per quarter; and the third quarter of 2023 through the fourth quarter of 2023 – 2.5% per quarter. The remaining outstanding principal balance, including any amounts outstanding under the Revolving Facility, is due on January 15, 2024.

The obligations under the 2019 Senior Credit Facility are secured by substantially all of the personal property and real property of the Company, subject to certain agreed exceptions.

The 2019 Senior Credit Facility contains customary representations, warranties and covenants, including covenants limiting the incurrence of debt, the payment of dividends and repurchase of the Company's common stock.

The 2019 Senior Credit Facility provides for events of default customary for credit facilities of this type, including non-payment defaults on other debt, misrepresentation, breach of covenants, representations and warranties, change of control, and insolvency and bankruptcy.

F-44
