NEWS RELEASE

Alico Inspectors Discover Early Canker Find

La Belle, FL., October 11, 2005 -- Alico, Inc. (NASDAQ:ALCO), one of the South's best-known agribusiness companies operating in Central and Southwest Florida, was recently informed by the Florida Department of Agriculture and Consumer Services that citrus canker was confirmed in Alico's 2 X 6 grove located in Hendry County, Florida.

John R. Alexander, Chairman and CEO of Alico, Inc. said, "This is the third canker find in our groves this year. The Company's in-house canker inspectors discovered the disease early and hopefully the early detection will minimize the loss." To date, the three canker finds have led to the destruction of approximately 940 acres of the Company's 11,147 producing citrus acres.

All of the trees in this grove are covered under the Federal Crop Insurance program. A net loss of approximately \$610 thousand, consisting of tree development costs and inventoried costs less tax benefits and expected insurance reimbursements will be recorded in the fourth quarter of fiscal 2005 as the canker existed at that time. Additionally, under the Florida Canker Eradication Program, citrus may not be replanted on the property until it has been determined that the property has been canker-free for two years. Accordingly, the Company is evaluating the property for its best future use. The 2 X 6 grove is not contiguous to other Company groves.

Citrus canker is a highly contagious bacterial disease of citrus that causes premature leaf and fruit drop. Citrus canker causes no threat to humans, animals or plant life other than citrus. In order to eradicate the disease, infected and exposed trees within 1,900 feet of the canker find must be removed and destroyed in accordance with Florida law.

About Alico

Alico, Inc., an agribusiness company operating in Central and Southwest Florida, owns approximately 136,500 acres of land located in Collier, Hendry, Lee and Polk Counties. The company is involved in various operations and activities including citrus fruit production, cattle ranching, sugarcane, sod production, and forestry. The Company also leases land for farming, cattle grazing, recreation and oil exploration, and is increasingly involved in exploring real estate development in and beyond its holdings.
