Stranded Cost Ratemaking Changes (0.05) (0.05)

Other (0.03) (0.07)

Total \$ (1.06) \$ .83

During the third quarter, Energy Atlantic, LLC (EA), the Company's wholly-owned subsidiary, was released from any further obligation pertaining to its Wholesale Power Sales Agreement (the Agreement) with Engage Energy America, LLC (Engage), which expired on February 28, 2002.

On September 30, 2002, the final escrow disbursements were made to EA and Engage, pursuant to their agreement regarding the final audit of all contract activity conducted by Engage. As a result of the completion of business with Engage, EA recognized \$4.8 million of additional standard offer service (SOS) revenue during the third quarter, with an after-tax impact of \$2.9 million, or \$1.84 per share. In addition, EA reversed \$321,000 of expenses previously accrued for possible regulatory assessments under the Agreement with Engage, which has terminated, resulting in an earnings per share impact of \$.12 per share.

The reduction in Energy Atlantic's fourth quarter net income is largely attributable to the loss of the standard offer service (SOS) within Central Maine Power's (CMP's) service area that became effective March 1, 2002. Other reductions in earnings were in many cases due to incremental expenditures as described in the following:

The reduction in earnings in the legal, regulatory, and customer service area was attributable to increased costs associated with initial compliance with the Sarbanes-Oxley Act of 2002; preparation for an alternative rate plan filing with the Maine Public Utilities Commission scheduled for filing in the first quarter of 2003; additional regulatory assessments; and the undertaking of system and information system benchmarking audits enabling increased asset management, decreases in overall capital expenditures and improved prioritization of capital expenditures resulting in enhanced business processes.

The Voluntary Early Retirement Program (VERP) produced a reduction in earnings for the year, however, the program achieved a reduction in employee census of approximately 7% beginning with associated savings beginning

in January, 2003.

The reduction in earnings associated with Maine Public Service Company's formation of a holding company are costs associated with migration to a holding company format, which will facilitate the firm's growth strategy.
