

MICROVISION INC
Form 10-K
March 13, 2008

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 for the fiscal year ended December 31, 2007

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 0-21221

[Microvision, Inc.](#)

(Exact name of Registrant as Specified in its Charter)

Delaware

(State or Other Jurisdiction of Incorporation or Organization)

91-1600822

(I.R.S. Employer Identification Number)

6222 185th Ave NE
Redmond, Washington 98052

(Address of Principal Executive Offices including Zip Code)

(425) 936-6847

(Registrant's Telephone Number, Including Area Code)

Edgar Filing: MICROVISION INC - Form 10-K

Securities registered pursuant to Section 12(b) of the Exchange Act:

<u>Title of each class</u>	<u>Name of each exchange on which registered</u>
Common Stock, \$.001 par value	NASDAQ Global Market

Securities registered pursuant to Section 12(g) of the Exchange Act:

None

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Act. Yes

No x

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes

No x

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes

x No o

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer x Non-accelerated filer .. Smaller reporting company ..
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes

o No x

The aggregate market value of the common stock held by non-affiliates of the registrant as of June 30, 2007 was approximately \$229.7 million (based on the closing price for the registrant's Common Stock on the NASDAQ Global Market of \$5.00 per share).

The number of shares of the registrant's Common Stock outstanding as of February 29, 2008 was 56,730,000.

Documents Incorporated by Reference

Portions of the registrant's definitive Proxy Statement to be filed with the Commission pursuant to Regulation 14A in connection with the registrant's Annual Meeting of Shareholders to be held on June 25, 2008 are incorporated herein by reference into Part III of this report.

PART I

Preliminary Note Regarding Forward-Looking Statements

This report contains forward-looking statements, within the meaning of Section 27A of the Securities Act of 1933, as amended (the "Securities Act") and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and is subject to the safe harbor created by those sections. Such statements may include, but are not limited to, projections of revenues, income or loss, capital expenditures, plans for product development and cooperative arrangements, future operations, financing needs or plans of Microvision, as well as assumptions relating to the foregoing. The words "anticipate," "believe," "estimate," "expect," "goal," "may," "plan," "project," "will," and similar expressions identify forward- looking statements. Factors that could cause actual results to differ materially from those projected in our forward-looking statements include the following: our ability to obtain financing; market acceptance of our technologies and products; our financial and technical resources relative to those of our competitors; our ability to keep up with rapid technological change; government regulation of our technologies; our ability to enforce our intellectual property rights and protect our proprietary technologies; the ability to obtain additional contract awards and to develop partnership opportunities; the timing of commercial product launches; the ability to achieve key technical milestones in key products; and other risk factors identified below in Item 1A.

ITEM 1. BUSINESS

Overview

We are developing miniature display and imaging engines based upon our integrated photonics module technology platform. Our technology platform combines two dimensional Micro-Electrical Mechanical system ("MEMS") light scanning technologies, lasers, optics, electronics, and our system controls expertise into compact display or imaging solutions that we anticipate will lead to new applications and high-volume products in the consumer and automotive markets. Historically, we have entered into development agreements with commercial and U.S. government customers to develop advanced prototype and demonstration units based on our light scanning technologies.

In 2006, we announced our strategy to develop and supply a proprietary display engine called PicoP™. The PicoP display engine enables an ultra- miniature video projector capable of producing color rich, high resolution, large images, but is small and low power enough to be embedded directly into mobile devices, such as cell phones. PicoP-based miniature display engines are being marketed to potential original equipment manufacturer (OEM) customers who would embed them into a variety of consumer and automotive products. The primary objective for consumer applications is to provide mobile device users with a large screen viewing experience produced by a small embedded projector. Mobile devices may include cell phones, portable media players (PMPs), PDAs, gaming consoles, laptop computers, digital cameras, and other consumer electronics products. These potential products would allow users to watch movies, play videos, and display images and other data onto a variety of surfaces. The PicoP display engine, with some modification, could be embedded into a vehicle to create a heads up display (HUD) that could project point-by- point navigation, critical operational, safety and other information important to the vehicle operator. The PicoP display engine could also be modified to be embedded into a pair of glasses to provide the mobile user with a see-through or occluded personal display to view movies, play games or access other content.

The development and procurement of intellectual property rights relating to our technologies is a key aspect of our business strategy. Since our inception in 1993, we have acquired under license agreements exclusive rights to various technologies. We also generate intellectual property as a result of our ongoing performance on development contracts and our internal research and development activities.

Technology

Our bi-directional MEMS scanning mirror is the key component of our integrated technology platform and is one of our core competencies. Our MEMS design is a silicon device at the center of which is a tiny mirror. This mirror is connected to small flexures which allow it to oscillate. The 2D MEMS scanner oscillates vertically and horizontally to capture (imaging) or reproduce (display) an image pixel-by-pixel. 2D MEMS scanners are used in our PicoP display engine that powers Pico Projector Displays, Vehicle Displays and Wearable Displays. A 1D MEMS scanner used in our ROV Bar Code Scanner, oscillates along one axis only and is used to capture a bar code image.

Our PicoP display engine technology platform includes electronics, laser light sources, a MEMS Scanner, and optics combined using Microvision's proprietary system control expertise, gained through years of internal research and development. Our unique display and imaging engines use a single beam of laser light and a single small scanning mirror to create a brilliant, full color, high contrast, uniform display over the entire field of view, from a small and thin package.

We believe that our proprietary light scanning technology offers significant advantages over traditional display and imaging systems. Depending on the specific product application, these advantages may include:

- Small and thin package size
- Higher brightness and contrast
- Higher resolution
- Reduced power requirements
- Reduced heat generation
- Simpler optical design that does not require a focusing lens
- Lower price at volume

Business Strategy

Our business strategy is to promote our technology in the form of integrated and embedded components to leading OEMs for widespread use in display and imaging product applications, as well as leverage our technology expertise into our own end-user products such as our ROV Bar Code Scanner. Presently we are focused on the following steps to implement our business strategy:

Target leading OEMs to integrate our PicoP display engines into their products. We have also partnered with original design manufacturers and tier one suppliers to produce advanced prototypes and demonstration units to be used to market to their OEM customers directly by us or by our partners.

Expand and solidify the supply chain architecture to support high volume manufacturing of the PicoP display engine, its subsystems and its components.

Continue to promote awareness of our technology platform to all members of the value chain. We are continually in contact with OEMs, original design manufacturers and mobile content providers to understand the features our PicoP display engines must have in order to provide desired benefits to all members of the value chain. We have and will continue to integrate this information into the design and development of our technology platform.

Continue rapid advancement of our technology platform and roadmap.

Product and Marketing Focus:

Pico Projector Displays

We are working with partners to develop small projector displays as stand alone systems or embedded into mobile products. The display industry is calling this new class of projectors "pico projectors". We believe our PicoP display engine can meet the cost, size and power requirements to be embedded into portable hand-held devices including mobile phones or function as a stand alone accessory device that connects to a mobile video source such as a video iPod®, cell phone or laptop computer. We plan to enter into agreements with OEMs that will result in production and distribution of the PicoP-based products.

In January 2008, at the Consumer Electronics Show in Las Vegas, we demonstrated for the first time an advanced prototype of our accessory projector based on the PicoP display engine. The PDA sized prototype, named SHOW™, is battery operated, completely self contained, and can project a full color, WVGA (848 X 480 pixels), DVD quality image. SHOW connects directly to laptop computers, mobile phones, PMPs, digital cameras, and other mobile devices with video out capability to project large, high-resolution images and video onto any surface. A number of SHOW prototypes will be provided to select OEM and carrier partners for customer feedback and applications development in the first half of 2008.

During 2007, we entered into agreements with several global high volume manufacturers, including Motorola Inc., to develop advanced prototypes using our PicoP display engine for embedded and accessory mobile projection applications.

Vehicle Displays

We believe an automotive head-up display (HUD) improves driver safety by reducing the distraction of looking away from the road to read information such as GPS mapping images, audio controls and other automobile instrumentation. We are working with Tier 1 suppliers to develop a HUD based on our PicoP display engine. We have produced prototypes that demonstrate our PicoP's ability to project a high-resolution readable image during day or night onto the windshield of an automobile to provide the driver with a variety of information related to the car's operation. We believe that an automotive HUD based on the PicoP display engine offers three distinct advantages over competing head-up displays:

- Size - Our prototype display is less than half the size of current competitive offerings. This smaller form factor can accommodate a wider variety of vehicle configurations.
- Contrast Ratio - Our prototype has a contrast ratio an order of magnitude higher than current competitive offerings. The high contrast ratio allows the driver to see the display clearly in any ambient lighting conditions.
- Installation Cost - Our prototype can be electronically customized to match the unique curvature of a particular automobile's windshield, thereby reducing installation time and cost. The current competitive offerings must be manually adjusted to match the curvature of a windshield.

We are currently working with Tier 1 automotive suppliers to market a PicoP enabled HUD to their OEM customers. We expect that a Tier I supplier would integrate our PicoP display engine subsystem into their HUD product package for sale to automobile manufacturers. During 2007, we entered into additional agreements with Tier 1 suppliers to develop prototype HUDs to demonstrate our PicoP display engine to their automotive OEM customers.

Wearable Displays

We believe the PicoP display engine can be modified and integrated with a light-weight optical design to create a full color near-eye wearable display platform. This wearable display platform could be in the form of ruggedized helmet mounted display systems or lightweight fashionable eyewear displays. Wearable displays could be used to provide personal viewing of information that originates from a mobile device and arrives at the display through a wired or wireless connection. We believe that wearable displays based on the PicoP display engine could provide the following advantages over competing wearable display technologies:

Edgar Filing: MICROVISION INC - Form 10-K

- See-through performance - See-through eyewear displays enable the wearer to interact with the real world and their personal mobile services at the same time. Unlike competing wearable displays, a see-through display does not obstruct the wearer's vision or reduce their awareness of what is happening around them.
- Daylight readability - The high-brightness capability of color eyewear based on the PicoP enables images to be clearly visible in brightly lit ambient environments, including direct sunlight. Current LCD-based head worn displays are difficult to see in bright light environments.
- Fashion and ergonomics - We are developing thin and lightweight optics that can be integrated with the PicoP display engines so that our OEM partners can design wearable displays that match conventional eyewear frames in size and weight and provide significantly improved ergonomics compared to competing wearable displays.

We are working with the US Army and US Air Force to further develop the optical design and integration of the PicoP display engine for military applications such as helmet mounted displays and full color see-through eyewear. We plan to work with OEMs and system integrators to incorporate the PicoP display engine into integrated solutions for potential military and commercial customers.

Bar Code Scanners

We currently market our line of hand held bar code scanners and bar code scanner enabled enterprise solutions. In October 2007, we introduced the ROV Scanner product line, which replaced our FLIC Scanner product line.

The ROV Scanner incorporates our proprietary MEMS technology and is designed to accommodate mobile workers who need simple and affordable data collection solutions on the mobile platforms of their choosing. Like its predecessor, the ROV Scanner has lower power consumption and total operating cost than competing laser bar code scanners. ROV Scanners are manufactured for us by a contract manufacturer located in Malaysia. We distribute ROV Scanners directly to end users through value added resellers, original equipment manufacturers and phone and internet orders.

Go-To-Market Strategy

Certain potential applications using the PicoP display engines, such as an automotive HUD or pico projector for mobile phones, could require integration of our technology with other related technologies. In markets requiring high volume production of the PicoP display engine components or subsystems that are to be integrated with other components, we may provide designs for components, subsystems and systems to OEMs under licensing agreements.

We expect that some customers will require unique designs for their products. We expect that such relationships will generally involve a period of co-development during which engineering, manufacturing and marketing professionals from potential customers and OEMs would work with our technical staff to modify the PicoP display engine for their targeted market and application. We may charge fees to our customers or OEMs to fund the costs of the engineering effort incurred on such development projects. The nature of the relationships with such customers or OEMs may vary from partner to partner depending on the proposed specifications for the PicoP display engine, the product to be developed, and the customers' or OEMs' design, manufacturing and distribution capabilities. We believe that by limiting our own direct manufacturing investment for products, we will reduce our capital requirements and risks inherent in taking the PicoP display engine to the consumer market.

Human Factors, Ergonomics and Safety

As part of our research and development activities, we conduct ongoing research on safety factors that must be addressed by products incorporating our technology, including such issues as the maximum permissible laser exposure limits established by International Electrotechnical Commission ("IEC") and others. Independent experts have concluded that laser exposure to the eye resulting from use of the light scanning displays under normal operating conditions would be below the calculated maximum permissible exposure level set by IEC.

In addition, Microvision works with and commissions outside independent experts in the field of laser safety to assist in meeting safety specifications as requested by our customers.

Competitive Conditions

The information display industry is highly competitive. Our potential display products will compete with established manufacturers of mature display technologies such as miniaturized cathode ray tube and flat panel display devices, as well as companies developing new display technologies. Our competitors include companies such as Texas Instruments Incorporated, 3M, Light Blue Optics Ltd., and Explay in the pico projection display segment and Siemens VDO and Nippon Seiki in the vehicle displays segment, most of which have much greater financial, technical and other resources than we do. Many of our competitors are developing alternative miniature display technologies. Our competitors may succeed in developing information display technologies and products that could render our technology or our proposed products commercially infeasible or technologically obsolete.

The information display industry has been characterized by rapid and significant technological advances. Our technology and potential products may not remain competitive with such advances, and we may not have sufficient funds to invest in new technologies, products or processes. Although we believe our technology platform and proposed display products could deliver images of a substantially better quality and resolution from a smaller form factor device than those of commercially available miniaturized liquid crystal displays and cathode ray tube based display products, manufacturers of liquid crystal displays and cathode ray tubes may develop further improvements of screen display technology that could reduce or eliminate the anticipated advantages of our proposed products.

We compete with other companies in the display industry and other technologies for government funding. In general, our government customers plan to integrate our technology into larger systems. Ongoing contracts are awarded based on our past performance on government contracts, the customer's progress in integrating our technology into the customer's overall program objectives, and the status of the customer's overall program.

The image capture industry is also highly competitive. Our current and planned bar code products will compete with existing laser and wand-type scanners produced by established bar code companies. Our current products compete on the basis of price and performance. Motorola Inc. acquired Symbol Technologies, a dominant player in the bar code industry, in January 2007 and sells products that directly compete with our current and planned bar code products.

Intellectual Property and Proprietary Rights

Since our inception in 1993, we have acquired under license agreements exclusive rights to various technologies, including, among others, rights related to the ability to superimpose images on the user's field of view and with a retinal display, and rights related to the design and fabrication of micro miniature devices using semiconductor fabrication techniques. In some cases, the licensors have retained limited, non-commercial rights with respect to the technology, including the right to use the technology for non-commercial research and for instructional purposes. Some licensors have the right to consent to our sublicensing arrangements and to the prosecution and settlement by us of our of infringement disputes.

We also generate intellectual property as a result of our ongoing performance on development contracts and our internal research and development activities. The inventions covered by our patent applications generally relate to component miniaturization, specific implementation of various system components and design elements to facilitate mass production. We consider protection of these key enabling technologies and components to be a fundamental aspect of our strategy to penetrate diverse markets with unique products. As such, we intend to continue to develop our portfolio of proprietary and patented technologies at the system, component and process levels.

Our ability to compete effectively in the display and image capture market will depend, in part, on our ability and the ability of the licensors to maintain the proprietary nature of these technologies.

We also rely on unpatented proprietary technology. To protect our rights in these areas, we require all employees and, where appropriate, contractors, consultants, advisors and collaborators, to enter into confidentiality and non- compete agreements. There can be no assurance, however, that these agreements will provide meaningful protection for our trade secrets, know-how or other proprietary information in the event of any unauthorized use, misappropriation or disclosure of such trade secrets, know-how or other proprietary information.

We have registered the marks "MicroHud" and the "tri- curve" logo with the United States Patent and Trademark Office. We have filed for registration of various other marks including "PicoP" and "ROV" with the United States Patent and Trademark Office.

Additional Information

We perform research and development to design and develop our technology platform and modifications to the PicoP display engine that will be required for specific applications. Research and development expense for the fiscal years ended December 31, 2007, 2006 and 2005 was \$14.9 million, \$10.7 million, and \$6.6 million, respectively. Substantially all of our revenue has been generated from development contracts to develop the light scanning technology to meet customer specifications. Our customers have included both the United States government and commercial enterprises. In 2007, 61% of revenue was derived from performance on development contracts with the United States government, 25% from performance on development contracts with commercial customers and the remainder from sales of ROV, Flic and Nomad units. One commercial customer, Visteon, accounted for approximately 15% of total revenue during 2007. In 2006, 51% of revenue was derived from performance on development contracts with the United States government, 24% from performance on development contracts with commercial customers and the remainder from sales of Flic and Nomad units. One commercial customer, Ethicon Endo-Surgery Inc., accounted for approximately 11% of total revenue during 2006. In 2005, 35% of revenue was derived from performance on development contracts with the United States government, 42% from performance on development contracts with commercial customers and the remainder from sales of Nomad and Flic units. In 2005, Ethicon Endo-Surgery Inc. accounted for 33% of total revenue. Our contracts with the United States government can be terminated for convenience by the United States government at any time. See Management's Discussion and Analysis of Financial Condition and Results of Operations.

We had a backlog of \$4.1 million at December 31, 2007 compared to a backlog of \$7.1 million at December 31, 2006. The backlog at December 31, 2007, is composed of \$3.8 million in development contracts entered into through December 31, 2007 and \$245,000 in orders for ROV and Flic. Microvision plans to complete all of the backlog contracts by the end of 2008.

Employees

As of February 29, 2008, we had 152 employees.

Further Information

Microvision was founded in 1993 as a Washington corporation and reincorporated in 2003 under the laws of the State of Delaware. Our principal office is located at 6222 185th Avenue NE, Redmond WA 98052 and our telephone number is 425-936-6847.

Our Internet address is www.microvision.com. We make available free of charge our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934 as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. Investors can access this material by visiting our website, clicking on "Investors" and then on "SEC Filings."

ITEM 1A. RISK FACTORS

Risk Factors Relating to the Microvision Business

We have a history of operating losses and expect to incur significant losses in the future.

We have had substantial losses since our inception. We cannot assure you that we will ever become or remain profitable.

- As of December 31, 2007, we had an accumulated deficit of \$259.4 million.
- We incurred consolidated net losses of \$187.4 million from inception through 2004, \$28.2 million in 2005, \$24.0 million in 2006, and \$19.8 million in 2007.

The likelihood of our success must be considered in light of the expenses, difficulties and delays frequently encountered by companies formed to develop and market new technologies. In particular, our operations to date have focused primarily on research and development of our technology platform and development of demonstration units. We are unable to accurately estimate future revenues and operating expenses based upon historical performance.

We cannot be certain that we will succeed in obtaining additional development contracts or that we will be able to obtain substantial customer orders for our products. In light of these factors, we expect to continue to incur substantial losses and negative cash flow at least through 2008 and likely thereafter. We cannot be certain that we will achieve positive cash flow at any time in the future.

We will require additional capital to fund our operations and to implement our business plan. If we do not obtain additional capital, we may be required to curtail our operations substantially. Raising additional capital may dilute the value of current shareholders' shares.

Based on our current operating plan, we believe we have sufficient cash to fund operations through at least March 2009. We will require additional cash to fund our operating plan past that time. We plan to obtain additional cash through the issuance of equity or debt securities. We will require additional capital in the future to fund our operations, including to:

- Further develop the technology platform and PicoP display engine,
- Develop and protect our intellectual property rights, and
- Fund long-term marketing and business development opportunities.

Our capital requirements will depend on many factors, including, but not limited to, the rate at which we can, directly or through arrangements with original equipment manufacturers, introduce products incorporating the PicoP display engine and image capture technologies and the market acceptance and competitive position of such products. If revenues are less than we anticipate, if the level and mix of revenues vary from anticipated amounts and allocations or if expenses exceed the amounts budgeted, we may require additional capital earlier than expected to further the development of our technologies, for expenses associated with product development, and to respond to competitive pressures or to meet unanticipated development difficulties. In addition, our operating plan provides for the development of strategic relationships with systems and equipment manufacturers that may require additional investments by us.

Additional capital may not be available to us, or if available, on terms acceptable to us or on a timely basis. Raising additional capital may involve issuing securities with rights and preferences that are senior to our common stock and may dilute the value of current shareholders' shares. If adequate funds are not available to satisfy long-term capital requirements, we may be required to limit our operations substantially. This limitation of operations may include reductions in staff and operating costs as well as reductions in capital expenditures and investment in research and development.

We cannot be certain that our technology platform or products incorporating our PicoP display engine will achieve market acceptance. If products incorporating the PicoP display engine do not achieve market acceptance, our revenues may not grow.

Our success will depend in part on customer acceptance of the PicoP display engine. The PicoP display engine may not be accepted by manufacturers who use display technologies in their products, by systems integrators who incorporate our products into their products or by end users of these products. To be accepted, the PicoP display engine must meet the expectations of our potential customers in the defense, industrial, medical and consumer markets. If our technology fails to achieve market acceptance, we may not be able to continue to develop our technology platform.

It may become more difficult to sell our stock in the public market.

Our common stock is listed for quotation on The NASDAQ Global Market. To keep our listing on this market, we must meet NASDAQ's listing maintenance standards. If we are unable to continue to meet NASDAQ's listing maintenance standards, our common stock could be delisted from The NASDAQ Global Market. If our common stock were delisted, we likely would seek to list the common stock on the NASDAQ Capital Market, the American Stock Exchange or on a regional stock exchange. Listing on such other market or exchange could reduce the liquidity for our common stock. If our common stock were not listed on the Capital Market or an exchange, trading of our common stock would be conducted in the over-the-counter market on an electronic bulletin board established for unlisted securities or directly through market makers in our common stock. If our common stock were to trade in the over-the-counter market, an investor would find it more difficult to dispose of, or to obtain accurate quotations for the price of, the common stock. A delisting from The NASDAQ Global Market and failure to obtain listing on such other market or exchange would subject our securities to so-called penny stock rules that impose additional sales practice and market-making requirements on broker-dealers who sell or make a market in such securities. Consequently, removal from The NASDAQ Global Market and failure to obtain listing on another market or exchange could affect the ability or willingness of broker-dealers to sell or make a market in our common stock and the ability of purchasers of our common stock to sell their securities in the secondary market. In addition, when the market price of our common stock is less than \$5.00 per share, we become subject to penny stock rules even if our common stock is still listed on The NASDAQ Global Market. While the penny stock rules should not affect the quotation of our common stock on The NASDAQ Global Market, these rules may further limit the market liquidity of our common stock and the ability of investors to sell our common stock in the secondary market. At some point during all four quarters of 2006 and 2007, the market price of our stock traded below \$5.00 per share. On February 29, 2008, the closing price of our stock was \$2.52.

Our lack of the financial and technical resources relative to our competitors may limit our revenues, potential profits, overall market share or value.

Our current products and potential future products will compete with established manufacturers of existing products and companies developing new technologies. Many of our competitors have substantially greater financial, technical and other resources than we have. Because of their greater resources, our competitors may develop products or technologies that are superior to our own. The introduction of superior competing products or technologies could result in reduced revenues, lower margins or loss of market share, any of which could reduce the value of our business.

We may not be able to keep up with rapid technological change and our financial results may suffer.

The information display industry has been characterized by rapidly changing technology, accelerated product obsolescence and continuously evolving industry standards. Our success will depend upon our ability to further develop our technology platform and to cost effectively introduce new products and features in a timely manner to meet evolving customer requirements and compete with competitors' product advances.

We may not succeed in these efforts because of:

- delays in product development,
- lack of market acceptance for our products, or
- lack of funds to invest in product development and marketing.

The occurrence of any of the above factors could result in decreased revenues, market share and value.

We could face lawsuits related to our use of the PicoP display engine or other technologies. Defending these suits would be costly and time consuming. An adverse outcome in any such matter could limit our ability to commercialize our technology and products, reduce our revenues and increase our operating expenses.

We are aware of several patents held by third parties that relate to certain aspects of light scanning displays and image capture products. These patents could be used as a basis to challenge the validity, limit the scope or limit our ability to obtain additional or broader patent rights of our patents or patents we have licensed. A successful challenge to the validity of our patents or patents we have licensed could limit our ability to commercialize our technology and the PicoP display engine and, consequently, materially reduce our revenues. Moreover, we cannot be certain that patent holders or other third parties will not claim infringement by us with respect to current and future technology. Because U.S. patent applications are held and examined in secrecy, it is also possible that presently pending U.S. applications will eventually be issued with claims that will be infringed by our products or our technology. The defense and prosecution of a patent suit would be costly and time consuming, even if the outcome were ultimately favorable to us. An adverse outcome in the defense of a patent suit could subject us to significant cost, to require others and us to cease selling products that incorporate the PicoP display engine, to cease licensing our technology or to require disputed rights to be licensed from third parties. Such licenses, if available, would increase our operating expenses. Moreover, if claims of infringement are asserted against our future co-development partners or customers, those partners or customers may seek indemnification from us for damages or expenses they incur.

Our planned future products are dependent on advances in technology by other companies.

We rely on and will continue to rely on technologies, such as light sources, MEMS and optical components that are developed and produced by other companies. The commercial success of certain of our planned future products will depend in part on advances in these and other technologies by other companies. We may, from time to time, contract with and support companies developing key technologies in order to accelerate the development of them for our specific uses. There are no guarantees that such activities will result in useful technologies or components for us.

Our products may be subject to future health and safety regulations that could increase our development and production costs.

Products incorporating the PicoP display engine could become subject to new health and safety regulations that would reduce our ability to commercialize the PicoP display engine. Compliance with any such new regulations would likely increase our cost to develop and produce products using the PicoP display engine and adversely affect our financial results.

If we cannot manufacture products at competitive prices, our financial results will be adversely affected.

To date, we have produced limited quantities of our ROV and Flic products for commercial sale and demonstration units for research, development and demonstration purposes. The cost per unit for these units currently exceeds the level at which we could expect to profitably sell these products. If we cannot lower our cost of production, we may face increased demands on our financial resources, possibly requiring additional equity and/or debt financing to sustain our business operations.

Our dependence on sales to distributors increases the risks of managing our supply chain and may result in excess inventory or inventory shortages.

Currently, the majority of our distributor relationships for the ROV Scanner and its accessories involve the distributor taking inventory positions and reselling to multiple customers. With these distributor relationships, we do not recognize revenue until the distributors sell the product through to their end user customers. Our distributor relationships do reduce our ability to forecast sales and increases risks to our business. Since our distributors act as intermediaries between us and the end user customers, we must rely on our distributors to accurately report inventory levels and production forecasts. This requires us to manage a more complex supply chain and monitor the financial condition and credit worthiness of our distributors and the end user customers. Our failure to manage one or more of these risks could result in excess inventory or shortages that could adversely impact our operating results and financial condition.

We do not have long-term commitments from our ROV customers, and plan purchases based upon our estimates of customer demand, which may require us to contract for the manufacture of our products based on inaccurate estimates.

Our ROV sales are made on the basis of purchase orders rather than long-term commitments. Our customers may cancel or defer purchases at any time. This requires us to forecast demand based upon assumptions that may not be correct. If our customers or we overestimate demand, we may create inventory that we may not be able to sell or use, resulting in excess inventory, which could become obsolete or negatively affect our operating results. Conversely, if our customers or we underestimate demand, or if sufficient manufacturing capacity is not available, we may lose revenue opportunities, damage customer relationships, and we may not achieve expected revenues.

Our future growth will suffer if we do not achieve sufficient market acceptance of our products to compete effectively.

Our success depends, in part, on our ability to gain acceptance of our current and future products by a large number of customers. Achieving market based acceptance for our products will require marketing efforts and the expenditure of financial and other resources to create product awareness and demand by potential customers. We may be unable to offer products consistently or at all that compete effectively with products of others on the basis of price or performance. Failure to achieve broad acceptance of our products by potential customers and to effectively compete would have a material adverse effect on our operating results.

Because we plan to continue using foreign contract manufacturers, our operating results could be harmed by economic, political, regulatory and other factors in foreign countries.

We currently use a contract manufacturer in Asia to manufacture our ROV product, and we plan to use foreign manufacturers to manufacture future products, where appropriate. These international operations are subject to inherent risks, which may adversely affect us, including:

- political and economic instability;
- high levels of inflation, historically the case in a number of countries in Asia;
- burdens and costs of compliance with a variety of foreign laws;
- foreign taxes;
- changes in tariff rates or other trade and monetary policies; and
- changes or volatility in currency exchange rates.

If we have to qualify a new contract manufacturer or foundry for our products, we may experience delays that result in lost revenues and damaged customer relationships.

We rely on single suppliers to manufacture our ROV Scanner product and our MEMS chips in wafer form. The lead time required to establish a relationship with a new contract manufacturer or foundry is long, and it takes time to adapt

a product's design to a particular manufacturer's processes. Accordingly, there is no readily available alternative source of supply for these products and components in high volumes. This could cause significant delays in shipping products if we have to change our source of supply and manufacture quickly, which may result in lost revenues and damaged customer relationships.

If we experience delays or failures in developing commercially viable products, we may have lower revenues.

We have developed demonstration units incorporating the PicoP display engine. However, we must undertake additional research, development and testing before we are able to develop additional products for commercial sale. Product development delays by us or our potential product development partners, or the inability to enter into relationships with these partners, may delay or prevent us from introducing products for commercial sale. We intend to rely on third party developments or to contract with other companies to continue development of green laser devices we will need for our products.

Our success will depend, in part, on our ability to secure significant third party manufacturing resources.

We are developing our capability to manufacture products in commercial quantities. Our success depends, in part, on our ability to provide our components and future products in commercial quantities at competitive prices. Accordingly, we will be required to obtain access, through business partners or contract manufacturers, to manufacturing capacity and processes for the commercial production of our expected future products. We cannot be certain that we will successfully obtain access to sufficient manufacturing resources. Future manufacturing limitations of our suppliers could result in a limitation on the number of products incorporating our technology that we are able to produce.

If our licensors and we are unable to obtain effective intellectual property protection for our products and technology, we may be unable to compete with other companies.

Intellectual property protection for our products is important and uncertain. If we do not obtain effective intellectual property protection for our products, processes and technology, we may be subject to increased competition. Our commercial success will depend in part on our ability and the ability of the University of Washington and our other licensors to maintain the proprietary nature of the PicoP display and other key technologies by securing valid and enforceable patents and effectively maintaining unpatented technology as trade secrets. We try to protect our proprietary technology by seeking to obtain United States and foreign patents in our name, or licenses to third-party patents, related to proprietary technology, inventions, and improvements that may be important to the development of our business. However, our patent position and the patent position of the University of Washington and other licensors involve complex legal and factual questions. The standards that the United States Patent and Trademark Office and its foreign counterparts use to grant patents are not always applied predictably or uniformly and can change. Additionally, the scope of patents are subject to interpretation by courts and their validity can be subject to challenges and defenses, including challenges and defenses based on the existence of prior art. Consequently, we cannot be certain as to the extent to which we will be able to obtain patents for our new products and technology or the extent to which the patents that we already own or license from others protect our products and technology. Reduction in scope of protection or invalidation of our licensed or owned patents, or our inability to obtain new patents, may enable other companies to develop products that compete with ours on the basis of the same or similar technology.

We also rely on the law of trade secrets to protect unpatented know-how and technology to maintain our competitive position. We try to protect this know-how and technology by limiting access to the trade secrets to those of our employees, contractors and partners with a need to know such information and by entering into confidentiality agreements with parties that have access to it, such as our employees, consultants and business partners. Any of these parties could breach the agreements and disclose our trade secrets or confidential information, or our competitors might learn of the information in some other way. If any trade secret not protected by a patent were to be disclosed to or independently developed by a competitor, our competitive position could be materially harmed.

We could be exposed to significant product liability claims that could be time-consuming and costly, divert management attention and adversely affect our ability to obtain and maintain insurance coverage.

We may be subject to product liability claims if any of our product applications are alleged to be defective or cause harmful effects. For example, because some of our PicoP displays are designed to scan a low power beam of colored light into the user's eye, the testing, manufacture, marketing and sale of these products involve an inherent risk that product liability claims will be asserted against us. Product liability claims or other claims related to our products, regardless of their outcome, could require us to spend significant time and money in litigation, divert management time and attention, require us to pay significant damages, harm our reputation or hinder acceptance of our products. Any successful product liability claim may prevent us from obtaining adequate product liability insurance in the future on commercially desirable or reasonable terms. An inability to obtain sufficient insurance coverage at an acceptable cost or otherwise to protect against potential product liability claims could prevent or inhibit the commercialization of our products.

We rely heavily on a limited number of development contracts with the U.S. government, which are subject to immediate termination by the government for convenience at any time, and the termination of one or more of these contracts could have a material adverse impact on our operations.

During the full years 2007 and 2006, 61% and 51%, respectively, of our revenue was derived from performance on a limited number of development contracts with the U.S. government. Therefore, any significant disruption or deterioration of our relationship with the U.S. government would significantly reduce our revenues. Our government programs must compete with programs managed by other contractors for limited amounts and uncertain levels of funding. The total amount and levels of funding are susceptible to significant fluctuations on a year-to-year basis. Our competitors continuously engage in efforts to expand their business relationships with the government and are likely to continue these efforts in the future. Our contracts with the government are subject to immediate termination by the government for convenience at any time. The government may choose to use contractors with competing display technologies or it may decide to discontinue any of our programs altogether. In addition, those development contracts that we do obtain require ongoing compliance with applicable government regulations. Termination of our development contracts, a shift in government spending to other programs in which we are not involved, a reduction in government spending generally, or our failure to meet applicable government regulations could have severe consequences for our results of operations.

Our development agreements have long sales cycles, which make it difficult to plan our expenses and forecast our revenues.

Our development agreements have lengthy sales cycles that involve numerous steps including determination of a product application, exploring the technical feasibility of a proposed product, evaluating the costs of manufacturing a product and manufacturing or contracting out the manufacturing of the product. Our long sales cycle, which can last several years, makes it difficult to predict the quarter in which contract signing and revenue recognition will occur. Delays in entering into development agreements could cause significant variability in our revenues and operating results for any particular quarterly period.

Our development contracts may not lead to products that will be profitable.

Our development contracts, including without limitation those discussed in this document are exploratory in nature and are intended to develop new types of products for new applications. These efforts may prove unsuccessful and these relationships may not result in the development of products that will be profitable.

Our revenues are highly sensitive to developments in the defense industry.

Our revenues to date have been derived principally from product development research relating to defense applications of our technology. We believe that development programs and sales of potential products in this market will represent a significant portion of our future revenues. Developments that adversely affect the defense sector, including delays in government funding and a general economic downturn, could cause our revenues to decline substantially.

If we lose our rights under our third party technology licenses, our operations will be adversely affected.

Our business depends in part on technology rights licensed from third parties. We could lose our exclusivity or other rights to use the technology under our licenses if we fail to comply with the terms and performance requirements of the licenses. In addition, certain licensors may terminate a license upon our breach and have the right to consent to sublicense arrangements. If we were to lose our rights under any of these licenses, or if we were unable to obtain required consents to future sublicenses, we would lose a competitive advantage in the market, and may even lose the ability to commercialize our products completely. Either of these results could substantially decrease our revenues.

We are dependent on third parties in order to develop, manufacture, sell and market our products.

Our strategy for commercializing our technology and products incorporating the PicoP display engine includes entering into cooperative development, manufacturing, sales and marketing arrangements with corporate partners, original equipment manufacturers and other third parties. We cannot be certain that we will be able to negotiate arrangements on acceptable terms, if at all, or that these arrangements will be successful in yielding commercially viable products. If we cannot establish these arrangements, we would require additional capital to undertake such activities on our own and would require extensive manufacturing, sales and marketing expertise that we do not currently possess and that may be difficult to obtain. In addition, we could encounter significant delays in introducing the PicoP display engine or find that the development, manufacture or sale of products incorporating the PicoP display engine would not be feasible. To the extent that we enter into cooperative development, sales and marketing or other joint venture arrangements, our revenues will depend upon the performance of third parties. We cannot be certain that any such arrangements will be successful.

Loss of any of our key personnel could have a negative effect on the operation of our business.

Our success depends on our executive officers and other key personnel and on the ability to attract and retain qualified new personnel. Achievement of our business objectives will require substantial additional expertise in the areas of sales and marketing, research and product development and manufacturing. Competition for qualified personnel in these fields is intense, and the inability to attract and retain additional highly skilled personnel, or the loss of key personnel, could reduce our revenues and adversely affect our business.

We are dependent on a small number of customers for our revenue. Our quarterly performance may vary substantially and this variance, as well as general market conditions, may cause our stock price to fluctuate greatly and potentially expose us to litigation.

Our revenues to date have been generated primarily from a limited number of development contracts with U.S. government entities and commercial partners. Our quarterly operating results may vary significantly based on:

- reductions or delays in funding of development programs involving new information display technologies by the U.S. government or our current or prospective commercial partners;
- changes in evaluations and recommendations by any securities analysts following our stock or our industry generally;
- announcements by other companies in our industry;
- changes in business or regulatory conditions;
- announcements or implementation by our competitors of technological innovations or new products;
- the status of particular development programs and the timing of performance under specific development agreements;
- economic and stock market conditions; or
- other factors unrelated to our company or industry.

In one or more future quarters, our results of operations may fall below the expectations of securities analysts and investors and the trading price of our common stock may decline as a consequence. In addition, following periods of volatility in the market price of a company's securities, shareholders often have instituted securities class action litigation against that company. If we become involved in a class action suit, it could divert the attention of management, and, if adversely determined, could require us to pay substantial damages.

If we fail to manage expansion effectively, our revenue and expenses could be adversely affected.

Our ability to successfully offer products and implement our business plan in a rapidly evolving market requires an effective planning and management process. The growth in business and relationships with customers and other third parties has placed, and will continue to place, a significant strain on our management systems and resources. We will need to continue to improve our financial and managerial controls, reporting systems and procedures and will need to continue to train and manage our work force.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

We currently lease approximately 67,000 square feet of combined use office, laboratory and manufacturing space at our headquarters facility in Redmond, Washington. The 90 month lease expires in 2013.

ITEM 3. LEGAL PROCEEDINGS

We are subject to various claims and pending or threatened lawsuits in the normal course of business. We are not currently party to any legal proceedings that we believe would have a material adverse effect on the Company's financial position, results of operations or cash flows.

We have sued our former CEO and President Richard Rutkowski and his spouse to collect \$1,733,000 in outstanding loans from the Company that were due in January 2007 and remain unpaid. Counterclaims were filed by Mr. Rutkowski and his spouse, seeking to recover damages in an amount in excess of \$15,000,000. We believe these claims are without merit and intend to defend them vigorously. However, an adverse outcome could have a material adverse affect on our financial condition.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

There were no matters submitted to a vote of shareholders during the fourth quarter of the year ending December 31, 2007.

ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT

Executive officers are appointed by our Board of Directors and hold office until their successors are elected and duly qualified. Mr. Tokman also serves as a director of Microvision. The following persons serve as executive officers of Microvision:

Alexander Tokman, age 46, has served as President, Chief Executive Officer and a director of Microvision since January 2006. Mr. Tokman served as Microvision's President and Chief Operating Officer from July 2005 to January 2006. From April 1995 to July 2005, Mr. Tokman served in various cross-functional and cross-business leadership positions at GE Healthcare, a subsidiary of General Electric most recently as a General Manager of its Global Molecular Imaging and Radiopharmacy unit from May 2003 to June 2005. From November 1989 to March 1995 Mr.

Tokman served as technical programs lead and a head of I&RD at Tracor Applied Sciences a subsidiary of then Tracor, Inc. Mr. Tokman has both a M.S. and B.S. in Electrical Engineering from the University of Massachusetts, Dartmouth. He also is a certified Six Sigma & DFSS Black Belt and Master Black Belt.

Ian D. Brown, age 45, has served as Vice President, Sales and Marketing of Microvision since February 2006. Prior to joining Microvision, from March 1994 to February 2006, Mr. Brown served in various Sales and Marketing positions with General Electric Healthcare, Americas. Most recently, from April 2004 to February 2006, Mr. Brown served as the Sales and Marketing Manager--Nuclear Medicine. From April 1989 to March 1994 Mr. Brown served as Technical Author--Nuclear Medicine Operator Documentation with IGE Medical Systems, Radlett, UK. Mr. Brown holds Ordinary & Higher National Certificates in Medical Physics & Physiological Measurements from Paddington College, London, Post Graduate Diploma in Management studies, University of Hertfordshire. He also holds a Six Sigma Black Belt.

Sid Madhavan, age 41, joined Microvision in April 2006 as Vice President of Research and Product Development. Madhavan, who worked for GE Healthcare from 1998 to 2006 where he most recently served as an Engineering Subsystem Manager for a \$2.1 billion Molecular Imaging and Computer Tomography business, is a certified Six Sigma Black Belt and brings over fifteen years of engineering product development and management experience. Sid Madhavan received his B.S. degree in Electronics and Communications from Madurai Kamaraj University in India and his M.S. in Electrical Engineering from Texas A&M.

Thomas M. Walker, age 43, joined Microvision in May 2002 and serves as Vice President, General Counsel and Secretary. Prior to joining Microvision, Mr. Walker served as Senior Vice President, General Counsel and Secretary of Advanced Radio Telecom Corp., a publicly held technology and services company where he managed domestic and international legal affairs from April 1996 to April 2002. Prior to that, Mr. Walker advised publicly and privately held businesses while practicing in the Los Angeles offices of the law firms of Pillsbury Winthrop and Buchalter, Nemer Fields and Younger. Mr. Walker holds a B.A. from Claremont McKenna College and a J.D. from the University of Oregon.

Jeff T. Wilson, age 47, has served as Chief Financial Officer since April 2006, Principal Financial Officer since January 2006 and Principal Accounting Officer of Microvision since August 1999. Mr. Wilson served as Vice President, Accounting of Microvision from April 2002 to April 2006 and as Director of Accounting of Microvision from August 1999 to March 2002. Prior to joining Microvision, from 1991 to 1999, Mr. Wilson served in various accounting positions for Siemens Medical Systems, Inc., a developer and manufacturer of medical imaging equipment. Prior to 1991, Mr. Wilson served as a manager with the accounting firm Price Waterhouse (currently PricewaterhouseCoopers LLP). Mr. Wilson is a Certified Public Accountant. Mr. Wilson holds a B.S. in Accounting from Oklahoma State University.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on The NASDAQ Global Market under the symbol "MVIS." As of February 29, 2008, there were approximately 374 holders of record of 56,730,000 shares of common stock outstanding. We have never declared or paid cash dividends on our common stock. We currently anticipate that we will retain all future earnings to fund the operations of our business and do not anticipate paying dividends on the common stock in the foreseeable future.

Our common stock began trading publicly on August 27, 1996. The quarterly high and low sales prices of the Company's common stock for each full quarterly period in the last two fiscal years and the year to date as reported by The NASDAQ Global Market are as follows:

Edgar Filing: MICROVISION INC - Form 10-K

Quarter Ended	Common Stock	
	HIGH	LOW
2006		
March 31, 2006	\$ 4.25	\$ 2.41
June 30, 2006	4.19	1.88
September 30, 2006	2.00	1.16
December 31, 2006	3.52	1.35
2007		
March 31, 2007	\$ 4.08	\$ 2.98
June 30, 2007	5.90	3.62
September 30, 2007	6.08	4.40
December 31, 2007	4.75	3.83
2008		
January 1, 2008 to February 29, 2008	\$ 4.65	\$ 1.95

ITEM 6. SELECTED FINANCIAL DATA

A summary of selected financial data as of and for the five years ended December 31, 2007 is set forth below. It should be read in conjunction with our consolidated financial statements and related notes appearing elsewhere in this Form 10-K.

	Years Ended		
	2007	2006	2005
<i>(in thousands, except per share amounts)</i>			
Statement of Operations Data:			
Revenue	\$ 10,484	\$ 7,043	\$ 14,740
Net loss available for common shareholders	(19,787)	(27,257)	(30,280)
Basic and diluted net loss per share	(0.40)	(0.81)	(1.33)
Weighted average shares outstanding basic and diluted	49,963	33,572	22,490
Balance Sheet Data:			
Cash and cash equivalents	\$ 13,399	\$ 14,552	\$ 6,860
Investments available-for-sale	22,411	--	--
Working capital	30,043	19,160	(4,720)
Total assets	45,298	35,325	23,360
Long-term liabilities	2,201	2,616	4,410
Mandatorily redeemable preferred stock	--	--	4,160
Total shareholders' equity (deficit)	33,061	21,864	(3,500)

Statement of Operations and Balance Sheet data for 2003 includes financial information for our previously consolidated subsidiary Lumera. Lumera was deconsolidated in July 2004.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

We are developing miniature display and imaging engines based upon our technology platform. Our technology platform utilizes our expertise in two dimensional Micro-Electrical Mechanical systems ("MEMS"), lasers, optics and

electronics to create a high quality video or still image from a small form factor device with lower power needs than conventional display technologies.

In 2006, we announced our strategy to develop and supply a proprietary display engine called PicoP to potential OEM customers who will embed them into a variety of consumer and automotive products. The primary objective for consumer applications is to provide users of mobile devices with a large screen viewing experience produced by a small embedded projector. Mobile devices may include cell phones, PDA's, gaming consoles and other consumer electronics products. These potential products would allow users to watch movies, play videos, display images, and other data onto a variety of surfaces. The PicoP with some modification could be embedded into the dashboard of an automobile or an airplane to create a heads up display (HUD) that could project point-by-point navigation, critical operational, safety and other information important to the driver or pilot. The PicoP could be further modified to be embedded into a pair of glasses to provide the mobile user with a see-through or occluded personal display to view movies, play games or access other content.

We have incurred substantial losses since inception and expect to incur a substantial loss during the fiscal year ended December 31, 2008.

Key Accounting Policies and Estimates

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent liabilities. On an on-going basis, we evaluate our estimates, including those related to revenue recognition, contract losses, bad debts, investments and contingencies and litigation. We base our estimates on historical experience, terms of existing contracts, our evaluation of trends in the display and image capture industries, information provided by our current and prospective customers and strategic partners, information available from other outside sources, and on various other assumptions we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

We believe the following key accounting policies require more significant judgments and estimates used in the preparation of its consolidated financial statements:

Revenue Recognition

. We recognize contract revenue as work progresses on long-term, cost plus fixed fee and fixed price contracts using the percentage-of-completion method, which relies on estimates of total expected contract revenue and costs. We use this revenue recognition methodology because we can make reliable estimates of the revenue and costs. Recognized revenues are subject to revisions as the contract progresses to completion and actual revenue and cost become certain. Revisions in revenue estimates are reflected in the period in which the facts that give rise to the revision become known. Revisions in these estimates could significantly impact recognized revenue in any one reporting period. If the U.S. Government cancels a contract, we would receive payment for work performed and costs committed to prior to the cancellation.

Our product sales generally include acceptance provisions. We recognize revenue for product shipments upon acceptance of the product by the customer or expiration of the contractual acceptance period.

Losses on Uncompleted Contracts

. We establish an allowance for estimated losses if a contract has an estimated cost to complete that is in excess of the remaining contract value. The entire estimated loss is recorded in the period in which the loss is first determined. We determine the estimated cost to complete a contract through a detailed review of the work to be completed, the resources available to complete the work and the technical difficulty of the remaining work. If the revised estimated cost to complete the contract is higher than the total contract revenue, the entire contract loss is recognized. The

Edgar Filing: MICROVISION INC - Form 10-K

actual cost to complete a contract can vary significantly from the estimated cost, due to a variety of factors including availability of technical staff, availability of materials and technical difficulties that arise during a project. Most of our development contracts are cost plus fixed fee type contracts. Under these types of contracts, we are not required to spend more than the contract value to complete the contracted work.

Allowance for uncollectible receivables

. We maintain allowances for uncollectible receivables, including accounts receivable, cost and estimated earnings in excess of billings on uncompleted contracts and receivables from related parties. We review several factors in determining the allowances including the customer's and related party's past payment history and financial condition. If the financial condition of our customers or the related parties with whom we have receivables were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances could be required.

Inventory.

We value inventory at the lower of cost or market with cost determined on a weighted average cost basis. We review several factors in determining the market value of our inventory including evaluating the replacement cost of the raw materials and the net realizable value of the finished goods. If we do not achieve our targeted sales prices, if market conditions for our components or products were to decline or if we do not achieve our sales forecast, additional reductions in the carrying value of the inventory would be required.

Employee Share-Based Compensation.

We issue share-based compensation to employees in the form of options exercisable into our common stock. We account for employee share-based compensation under the guidance provided by Financial Accounting Standards Board ("FASB") issued FASB Statement No. 123(R), *Share-Based Payment*. We use the Black-Scholes option pricing model to estimate the value of these instruments. We use this model because it results in reasonable estimated fair values for our standard options, is widely accepted and provides comparability across a wide range of similar companies. To use the Black-Scholes options pricing model we must evaluate a range of variables and determine estimates of future option lives, stock volatility and interest rates. In addition, once estimated fair values are developed, we must estimate prevesting forfeiture rates. Changes in these estimates could result in a materially different valuation of the stock-based compensation. Other models for valuing stock-based compensation exist and the use of an alternative model could result in a materially different valuation of the compensation expense.

The key accounting policies described above are not intended to be a comprehensive list of all of our accounting policies. In many cases, the accounting treatment of a particular transaction is specifically dictated by generally accepted accounting principles, with no need for us to apply judgment or make estimates. There are also areas in which our judgment in selecting any available alternative would not produce a materially different result to our consolidated financial statements. Additional information about our accounting policies, and other disclosures required by generally accepted accounting principles, are set forth in the notes to our consolidated financial statements.

Inflation has not had a material impact on our revenues, or income from continuing operations over the three most recent fiscal years.

Results of Operations

YEAR ENDED DECEMBER 31, 2007 COMPARED TO YEAR ENDED DECEMBER 31, 2006

Contract Revenue.

(in thousands)	2007	% of contract revenue	2006	% of contract revenue	\$ ch
Government revenue	\$ 6,430	71.4	\$ 3,586	68.0	\$ 2
Commercial revenue	2,580	28.6	1,689	32.0	
	-----		-----		-----
Total contract revenue	\$ 9,010		\$ 5,275		\$ 3
	=====		=====		=====

We earn contract revenue from performance on development contracts with the United States government and commercial customers.

Our contract revenue in a particular period is dependent upon when we enter into a contract, the value of the contracts we have entered into, and the availability of technical resources to perform work on the contracts. Contract revenue was higher during 2007 than in 2006, due to higher beginning government contract backlog and an increased level of activity on commercial contracts compared to the prior year.

In May 2007, we announced that we had entered into a \$3.2 million contract with the U.S. Air Force to provide a lightweight, see-through, full-color eyewear display prototype to the government. The contract, which continues a development activity with the Air Force, specifies the development, design, verification, testing, and delivery of a lightweight, see-through full-color wearable display for evaluation by several DOD project offices.

As long as most of our revenue is earned from performance on development contracts, we believe there may be a high degree of variability in revenue from one period to another.

Our backlog of development contracts at December 31, 2007 was \$3.8 million compared to \$6.8 million at December 31, 2006. The backlog is composed of development contracts entered through December 31, 2007. We plan to complete the entire contract backlog during 2008.

Product Revenue.

(in thousands)	2007	% of product revenue	2006	% of product revenue	\$ ch
Rov revenue	\$ 90	6.1	\$ --	0.0	\$
Flic revenue	1,303	88.4	1,589	89.9	
Nomad revenue	81	5.5	179	10.1	
Total product revenue	\$ 1,474		\$ 1,768		\$

We have earned product revenue from sales of ROV, Flic and Nomad.

In May 2007, we announced the launch of ROV, our new bar code scanner product. The ROV is based on our proprietary MEMS technology. ROV is being manufactured by our contract manufacturing partner in Malaysia. We had planned to begin commercial shipments of ROV during the third quarter of 2007. During our Beta evaluation, we determined that ROV did not meet our quality standards. We delayed the launch of ROV production until we could correct the deficiencies. Commercial shipments of ROV began during the fourth quarter of 2007.

The decrease in Flic revenue in 2007 compared to 2006 was the result of the timing of the release of ROV. We believe that many of our customers were waiting for the availability of ROV before placing orders for our bar code scanning products.

The decrease in Nomad revenue was the result of our decision in June 2006 to no longer promote the Nomad product. The Nomad had not gained the commercial acceptance we had planned when it was introduced.

Our quarterly revenue may vary substantially due to the timing of product orders from customers, production constraints and raw material availability.

Edgar Filing: MICROVISION INC - Form 10-K

The backlog of product orders at December 31, 2007 was approximately \$245,000, compared to \$353,000 at December 31, 2006, all of which is scheduled for delivery during 2008.

Cost of Contract Revenue.

(in thousands)	2007	% of contract revenue	2006	% of contract revenue	\$ ch
	-----	-----	-----	-----	-----
Cost of contract revenue	\$ 4,916	54.6	\$ 3,398	64.4	\$ 1

Cost of contract revenue includes both the direct and allocated indirect costs of performing on development contracts. Direct costs include labor, materials and other costs incurred directly in performing on a contract. Indirect costs include labor and other costs associated with operating our research and development department and building our technical capabilities and capacity. Cost of contract revenue is determined both by the level of direct costs incurred on development contracts and by the level of indirect costs incurred in operating and building our technical capabilities and capacity. Both the direct and indirect costs can fluctuate substantially from period to period.

The cost of contract revenue as a percentage of revenue was lower in 2007 than in 2006 as a result of negotiating better terms on contracts entered into in late 2006 and early 2007. We target a gross margin for each contract of at least 40%; however, the gross margin can vary based on the technical challenges encountered in completing the contract.

The cost of revenue as a percentage of revenue can fluctuate significantly from period to period, depending on the contract cost mix and the levels of direct and indirect costs incurred. However, over longer periods of time we expect modest fluctuations in the cost of contract revenue, as a percentage of contract revenue.

Cost of Product Revenue.

(in thousands)	2007	% of product revenue	2006	% of product revenue	\$ ch
	-----	-----	-----	-----	-----
Cost of product revenue	\$ 1,690	114.7	\$ 4,768	269.7	\$ (3

Cost of product revenue includes both the direct and allocated indirect costs of manufacturing ROVs and Flics sold to customers. Direct costs include labor, materials and other costs incurred directly in the manufacture of ROV and Flic. Indirect costs include labor and other costs associated with operating our manufacturing capabilities and capacity.

Our overhead, which includes the costs of procuring, inspecting and storing material, facility and depreciation costs, is allocated to inventory, cost of product revenue, cost of contract revenue, and research and development expense based on the proportion of direct material purchased for the respective activity. During 2007 and 2006, we expensed approximately \$289,000 and \$1,224,000, respectively, of manufacturing overhead associated with production capacity in excess of production requirements.

The decline in cost of product revenue as a percentage of product revenue for 2007 compared to 2006 is attributable to the following factors:

- The decision in June 2006 to no longer support the Nomad product line. During 2006, we recorded expenses of \$1.2 million associated with the Nomad product line that were not repeated in 2007.

Edgar Filing: MICROVISION INC - Form 10-K

- Reduced direct cost and overhead on the Flic product line resulting in a savings of approximately 108% for the year ended December 31, 2007 compared to the same period in 2006.
- The absence of losses associated with noncancelable purchase contracts. In 2006, we recorded a loss of \$310,000 to cost of product revenue as a result of commitments to purchase materials for the Flic scanner that were in excess of our estimated future proceeds from the sale of the Flic scanners.

We expect that the cost of product revenue on an absolute dollar basis will increase in the future as expected sales of commercial products increase. The cost of product revenue as a percentage of product revenue can fluctuate significantly from period to period, depending on the product mix, the level of overhead expense and the volume of direct materials purchased.

Research and Development Expense.

(in thousands)	2007	2006	\$ change	% change
Research and development	\$ 14,944	\$ 10,715	\$ 4,229	39.5

Research and development expense consists of:

- Compensation related costs of employees and contractors engaged in internal research and product development activities,
- Laboratory operations, outsourced development and processing work, and
- Other operating expenses.

Our research and development department works on both contract revenue projects and internally funded development projects. We allocate the research and development department overhead to cost of contract revenue and research and development expense based on the proportion of direct labor cost incurred in cost of contract revenue and research and development, respectively.

We have increased spending in research and development as part of our strategy to accelerate the time to market for products based on the PicoP. The increase in cost is primarily attributable to increases in payroll costs and contracted services.

We believe that a substantial level of continuing research and development expense will be required to develop additional commercial products using the light scanning technology. Accordingly, we anticipate our level of research and development spending will continue to be substantial.

Sales, Marketing, General and Administrative Expense.

(in thousands)	2007	2006	\$ change	% change
Sales, marketing, general and administrative	\$ 15,779	\$ 17,362	\$ (1,583)	(9.1)

Sales, marketing, general and administrative expense includes compensation and support costs for marketing, sales, management and administrative staff, and for other general and administrative costs, including legal and accounting services, consultants and other operating expenses.

In early 2006, we announced our plan to reduce spending in sales, marketing, general and administrative expenses. We continue to aggressively manage these costs as part of our strategy of accelerating the development of products based on the PicoP while controlling the cash burn. The decrease in sales, marketing, general and administrative expense in 2007 compared to 2006 is the result of the cost reduction efforts.

Interest Income and Expense.

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Interest income	\$ 1,358	\$ 719	\$ 639	88.9

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Interest expense	\$ 513	\$ 5,753	\$ (5,240)	(91.1)

The increase in interest income in 2007 from 2006 results from higher average cash and investment securities balances.

In March 2005, we raised \$10 million before issuance costs of \$423,000 from the issuance of convertible notes ("March Notes") and warrants to purchase an aggregate of 462,000 shares of Microvision common stock. In December 2005, we raised \$10 million before issuance costs of \$134,000 from the issuance of convertible notes ("December Notes"), 838,000 shares of Microvision common stock and warrants to purchase an aggregate of 1,089,000 shares of Microvision common stock. The decrease in interest expense from the prior year relates to the lower outstanding balance of our March and December Notes in 2007 than in 2006.

Gain (Loss) on Derivative Instruments, Net.

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Gain (loss) on derivative instruments, net	\$ (483)	\$ 1,627	\$ (2,110)	(129.7)

In connection with the issuance of our March Notes and our December Notes (together, the "Notes"), we concluded that the note holders' right to convert all or a portion of the Notes into our common stock is an embedded derivative instrument as defined by FAS 133, *Accounting for Derivative Instruments and Hedging Activities*. We determine the value of the derivative features at each balance sheet date using the Black-Scholes option pricing model. Due to the retirement of our Notes in March 2007, the value of the derivative feature decreased to zero. The change in value of \$68,000 from December 31, 2007 to the date of retirement of the Notes was recorded as a non-operating gain and is included in "Gain (loss) on derivative instruments, net" in the consolidated statement of operations.

We issued warrants to purchase 2,302,000 shares of common stock in connection with the issuance of the Notes. The warrants met the definition of derivative instruments that must be accounted for as liabilities under the provisions of Emerging Issues Task Force Issue No. 00-19, *Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock*, because we cannot engage in certain corporate transactions affecting the common stock unless we make a cash payment to the holders of the warrants. We record changes in the fair values of the warrants in the statement of operations each period. We valued the warrants at December 31, 2007 using the Black-Scholes option pricing model with the following assumptions: expected volatility of 67%; expected dividend yield of 0%; risk free interest rates ranging from 3.05% to 3.07%; and contractual lives ranging from .6 years to 2.9 years. The change in value of the warrants of \$85,000 in 2007 was recorded as a non-operating loss and is included in "Gain (loss) on derivative instruments, net" in the consolidated statement of operations.

In January 2006, we sold 2.6 million shares of Lumera common stock for \$10.3 million. As a result of the reduction in ownership, we changed to the cost basis of accounting for our investment in Lumera in accordance with FAS 115. In connection with the change in accounting method, we recorded \$476,000 in "Other current assets" for the fair value of warrants previously received to purchase 170,500 shares of Lumera common stock. On the transaction date, the warrants were initially valued using the Black-Scholes option pricing model with the following assumptions: expected

volatility of 83%; expected dividend yield of 0%; risk free interest rate of 4.55%; and contractual life of 5.1 years. As of December 31, 2007, the warrants were valued using the Black-Scholes option pricing model with the following assumptions: expected volatility of 83%; expected dividend yield of 0%; risk free interest rate of 3.11%; and contractual life of 3.2 years. As of December 31, 2007, the fair value of the warrants decreased to \$130,000 and the change in value of \$465,000 in 2007 was recorded as a loss to "Gain (loss) on derivative instruments, net."

Equity in losses of Lumera and

Gain on sale of investment in Lumera.

Equity in losses of Lumera:

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Equity in losses of Lumera	\$ 0	\$ (290)	\$ 290	(100.0)

Gain on sale of securities of equity investment:

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Gain on sale of investment in Lumera	\$ 6,606	\$ 8,738	\$ (2,132)	(24.4)

In 2006, we sold 2.9 million shares of our Lumera common stock for \$12.2 million. We recorded a "Gain on sale of investment in Lumera" of approximately \$8.7 million. In January 2006, we recorded a charge of \$290,000 for our proportion of Lumera net loss for the period preceding change in accounting method.

During 2007, we sold 1,714,000 shares of Lumera common stock for gross proceeds of \$8.7 million and we recorded a gain of \$6.6 million. As of December 31, 2007, we owned 36,000 shares of Lumera common stock.

Income Taxes.

No provision for income taxes has been recorded because we have experienced net losses from inception through December 31, 2007. At December 31, 2007, we had net operating loss carry-forwards of approximately \$200.0 million for federal income tax reporting purposes. In addition, we have research and development tax credits of \$3.6 million. The net operating losses begin expiring in 2008 if not previously utilized. In certain circumstances, as specified in the Internal Revenue Code, a 50% or more ownership change by certain combinations of our shareholders during any three-year period would result in a limitation on our ability to utilize a portion of our net operating loss carry-forwards. We have determined that such a change of ownership occurred during 1995 and that the annual utilization of loss carry-forwards generated through the period of that change will be limited to approximately \$761,000. An additional change of ownership occurred in 1996 and the annual limitation for losses generated in 1996 is approximately \$1.6 million.

We adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. We did not have any unrecognized tax benefits which would require an adjustment to the January 1, 2007 beginning balance of retained earnings. We did not have any unrecognized tax benefits at January 1, 2007 and at December 31, 2007.

We recognize interest accrued and penalties related to unrecognized tax benefits in tax expense. During the years ended December 31, 2007 and 2006, we recognized no interest and penalties.

Inducement for Conversion of Preferred Stock

(in thousands)	2007	2006	\$ change	% change
	-----	-----	-----	-----
Inducement for conversion of preferred stock	\$ 0	\$ (3,076)	\$ 3,076	(100.0)

In May 2006, we entered into a Conversion Agreement with the holders of our Series A Convertible Preferred Stock to convert 5,000 shares of Preferred Stock. The details of the conversion are discussed under "Inducement for Conversion of Preferred Stock" presented below.

YEAR ENDED DECEMBER 31, 2006 COMPARED TO YEAR ENDED DECEMBER 31, 2005

Contract Revenue.

(in thousands)	2006	% of contract revenue	2005	% of contract revenue	\$ ch
	-----	-----	-----	-----	-----
Government revenue	\$ 3,586	68.0	\$ 5,209	45.7	\$ (1)
Commercial revenue	1,689	32.0	6,177	54.3	(4)
	-----		-----		-----
Total contract revenue	\$ 5,275		\$ 11,386		\$ (6)
	=====		=====		=====

During 2005, we earned \$4.9 million from work performed on a contract with Ethicon Endo-Surgery, Inc., a subsidiary of Johnson & Johnson, integrating our technology into certain medical devices compared to \$806,000 during 2006. We delivered the prototype devices as required and completed the work under the contract in 2006.

In September 2006, we entered into an 18 month \$5.95 million contract with General Dynamics C4 Systems to supply full-color, daylight readable, see-through helmet-mounted displays as part of the U.S. Army's Mounted Warrior HMD Improvement Program. General Dynamics holds prime contracts with the U.S. Army for other Warrior programs including Land Warrior, Air Warrior and Future Force Warrior Advanced Technology Demonstration. The contract specifies the development and delivery of ten full-color display units for evaluation.

In September 2006, we also entered into a 12 month agreement with Visteon, a global Tier 1 automotive supplier. Under the agreement, we worked with Visteon to design and produce a series of advanced automotive head-up display samples. Visteon, working in collaboration with us, is expected to use the samples to demonstrate the performance of our laser-based light scanning technology and to refine commercial product requirements of automotive head-up displays.

Our backlog of development contracts at December 31, 2006 was \$6.8 million compared to \$2.8 million at December 31, 2005.

Product Revenue.

(in thousands)	2006	% of product revenue	2005	% of product revenue	\$ ch
	-----	-----	-----	-----	-----
Flic revenue	\$ 1,589	89.9	\$ 1,569	46.7	\$
Nomad revenue	179	10.1	1,791	53.3	(1)
	-----		-----		-----
Total product revenue	\$ 1,768		\$ 3,360		\$ (1)

=====

=====

=====

During 2005, we sold 165 Nomad units totaling \$1.2 million to General Dynamics and there was no corresponding sale in 2006. The Nomad did not gain the commercial acceptance we had planned when it was introduced. In June 2006, we decided not to continue to promote the Nomad product.

The backlog of product orders at December 31, 2006 was approximately \$353,000, compared to \$579,000 at December 31, 2005.

Cost of Contract Revenue.

(in thousands)	2006	% of contract revenue	2005	% of contract revenue	\$ ch
	-----	-----	-----	-----	-----
Cost of contract revenue	\$ 3,398	64.4	\$ 6,456	56.7	\$ (3

Our research and development department works on both contract revenue projects and internally funded development projects. We allocate the research and development department overhead to cost of contract revenue and research and development expense based on the proportion of direct labor cost incurred in cost of contract revenue and research and development, respectively. As a result of the lower direct labor cost in cost of contract revenue in 2006, approximately \$1,329,000, less overhead was allocated to cost of contract revenue than in 2005.

Cost of Product Revenue.

(in thousands)	2006	% of product revenue	2005	% of product revenue	\$ ch
	-----	-----	-----	-----	-----
Cost of product revenue	\$ 4,768	269.7	\$ 8,636	257.0	\$ (3

Our overhead, which includes the costs of procuring, inspecting and storing material, facility and depreciation costs, is allocated to inventory, cost of product revenue, cost of contract revenue, and research and development expense based on the proportion of direct material purchased for the respective activity. During 2006, we expensed approximately \$1,224,000, or \$234,000 less than in 2005, of manufacturing overhead associated with production capacity in excess of production requirements.

Cost of product revenue for 2006 includes the write-off of a total of \$1,181,000 of inventory, compared to \$3,732,000 for 2005. The write-offs were due to changes in product design, our decision not to promote the Nomad product, and customer demand that caused components and accessories to become obsolete or slow-moving. We value our inventory at the lower of cost or market and reduce the value of our inventory to its estimated scrap value when we determine that we will probably not sell the inventory during the next 12 months. As a result of our decision not to promote the Nomad product we also recorded \$100,000 in depreciation expense to fully depreciate the fixed assets used in Nomad production.

We have periodically entered into noncancelable purchase contracts in order to ensure the availability of materials to support Flic production. We periodically assess the need to provide for impairment on these purchase contracts and record a loss on purchase commitments when required. In December 2006, we recorded a loss of \$310,000 to cost of product revenue as a result of commitments to purchase materials for the Flic scanner that are in excess of our estimated future proceeds from the sale of the Flic scanners.

Research and Development Expense.

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Research and development	\$ 10,715	\$ 6,587	\$ 4,128	62.7

During 2006, we directed more engineering labor to work on internally funded development projects than planned resulting in higher research and development expense. Total costs incurred by our research and development department for cost of contract revenue and research and development expense activities were higher during 2006 than 2005. Research and development expense was higher in 2006 than 2005 due to higher direct labor, subcontractor and material costs. The higher proportions of direct labor on internally funded projects relative to revenue projects in 2006 than in 2005 resulted in more indirect overhead cost absorption into research and development expense in 2006. In addition, 2006 included \$396,000 and \$324,000, respectively, for FAS 123R option expense and severance that did not occur in 2005.

Sales, Marketing, General and Administrative Expense.

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Sales, marketing, general and administrative	\$ 17,362	\$ 20,352	\$ (2,990)	(14.7)

During 2006, we made significant reductions in staff and marketing expenses related to the discontinuation of the Nomad product, reductions in corporate staff expenses, professional fees, and increased focus and efficiencies in operations. These reductions were offset in part in non-cash compensation cost arising from the adoption of FAS 123(R) of \$1.4 million and severance costs of \$518,000, which did not occur in 2005.

In January 2006, two senior officers with outstanding loans from the Company left the Company. Because the loans were not fully secured and collection was uncertain, we increased the allowance by \$1,031,000 in December 2005. In accordance with the terms, the loans were due in January 2007. Neither of the officers has repaid their loans. One of the officers pledged 50,000 shares of Lumera common stock as collateral for the loans. In May 2007, we foreclosed on the collateral and sold the shares for net proceeds of \$227,000. We are pursuing collection of the remaining outstanding balances. As a result of a review of the financial position of the former executives and the potential difficulty in collecting loans from former employees, the Company recorded additional allowances for doubtful accounts for the receivables from senior officers of \$542,000 during the year ended December 31, 2006. A third executive with outstanding loans from the Company left the Company in August 2007 and his loans will be due in August 2008.

Interest Income and Expense.

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Interest income	\$ 719	\$ 263	\$ 456	173.4

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Interest expense	\$ 5,753	\$ 3,253	\$ 2,500	76.9

The increase in interest income in 2006 from 2005 results from higher cash and cash equivalents investment balances, and higher interest rates earned on balances during 2006 than in 2005.

Edgar Filing: MICROVISION INC - Form 10-K

The increase in interest expense relates to the amortization of the discount recorded on the March 2005 and December 2005 convertible notes (together the "Notes") for the value attributed to the embedded derivative feature of the Notes and associated warrants. This was partially offset by the stated interest on the Notes being lower in 2006 than in 2005 due to a lower average balance resulting from payments on the Notes.

Gain (Loss) on Derivative Instruments, Net.

The following table shows the gain on derivative instruments, net:

(in thousands)	2006	2005	\$ change	% change
Gain (loss) on derivative instruments, net	\$ 1,627	\$ 5,975	\$ (4,348)	(72.8)

In connection with the issuance of our Notes, we concluded that the note holders' right to convert all or a portion of the Notes into our common stock is an embedded derivative instrument as defined by FAS 133, Accounting for Derivative Instruments and Hedging Activities. We determine the value of the derivative features at each balance sheet date using the Black-Scholes option pricing model. At December 31, 2006, we used the following assumptions: expected volatilities of 67%; expected dividend yields of 0%; risk free interest rate of 4.96%; and contractual lives of 2.5 months. The contractual lives are the same as the principal repayment dates when valuing the derivative features. Due to changes in our stock price and the short remaining lives, the aggregate fair value of the embedded derivative instruments decreased to \$68,000 at December 31, 2006. The change in value of \$1,300,000 for 2006 was recorded as a non-operating gain and is included in "Gain on derivative instruments, net" in the consolidated statement of operations.

We issued warrants to purchase 2,302,000 shares of common stock in connection with the issuance of the Notes. The warrants met the definition of derivative instruments that must be accounted for as liabilities under the provisions of Emerging Issues Task Force Issue No. 00-19, Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock, because we cannot engage in certain corporate transactions affecting the common stock unless we make a cash payment to the holders of the warrants. We record changes in the fair values of the warrants in the statement of operations each period. We valued the warrants at December 31, 2006 using the Black-Scholes option pricing model with the following assumptions: expected volatilities of 67%; expected dividend yields of 0%; risk free interest rates ranging from 4.72% to 4.90%; and contractual lives ranging from 1.6 years to 3.9 years. The change in value of the warrants of \$880,000 in 2006 was recorded as a non-operating gain and is included in "Gain on derivative instruments, net" in the consolidated statement of operations.

In January 2006, we sold 2.6 million shares of Lumera common stock, reduced our ownership, and changed to the cost basis of accounting for our investment in Lumera in accordance with FAS 115. Changes in the fair value of our warrant, exercisable at \$8.80, to purchase 170,500 shares of Lumera common stock beginning from the January 2006 sale are included in "Gain on derivative instruments, net" in the consolidated statement of operations each period. On the transaction date, the warrants were initially valued using the Black-Scholes option pricing model with the following assumptions: expected volatility of 83%; expected dividend yield of 0%; risk free interest rate of 4.55%; and contractual life of 5.1 years. As of December 31, 2006, the warrants were valued using the Black-Scholes option pricing model with the following assumptions: expected volatility of 83%; expected dividend yield of 0%; risk free interest rate of 4.7%; and contractual life of 4.2 years. As of December 31, 2006, the fair value of the warrants increased to \$595,000 and the change in value of \$119,000 was recorded as a gain to "Loss on derivative instruments, net."

In May 2006, we entered into an agreement with the holders of our Series A Convertible Preferred Stock to convert 5,000 shares of preferred stock to common stock. As consideration for the conversion, we issued a total of 1,353,000 shares of our common stock, of which 565,000 shares were issued as an inducement to convert ("Incentive Shares").

In connection with the conversion, we also agreed to register the Incentive Shares and to provide price protection on the Incentive Shares. We determined the price protection feature of the Incentive Shares included an embedded derivative feature as defined by FAS 133. The value of the derivative feature at conversion was estimated to be \$401,000 using the Black-Scholes option pricing model with the following assumptions: expected volatility of 65%; expected dividend yield of 0%; risk free interest rate of 4.9%; and contractual life of 0.3 years. We recorded the initial value of the embedded derivative feature as a non-operating expense included in "Inducement for conversion of preferred stock" in the consolidated statement of operations. In August 2006, we determined the final value and paid the liability of \$1,074,000. The changes in the estimated fair value of the derivative feature \$673,000 was included as a non-operating expense in "Gain on derivative instruments, net."

Loss on debt extinguishment

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Loss on debt extinguishment	\$ 0	\$ (3,313)	\$ 3,313	(100.0)

In July 2005, we entered into an agreement to amend the March Notes. In connection with the amendment, we issued three year warrants to purchase 750,000 shares of Microvision common stock with an initial exercise price of \$6.84 per share; reduced the conversion price on the March Notes to \$5.85 per share and the price at which we can mandatorily convert the Notes was reduced to \$10.24; and removed the note holders' right to exchange the Notes into Lumera common stock. We concluded that the amendment of the March Notes met the criteria of a debt extinguishment and recorded a charge of \$3,313,000 for the change in the fair value of the debt in July 2005.

Equity in losses of Lumera and Gain on sale of securities of equity investment in Lumera.

Equity in losses of Lumera:

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Equity in losses of Lumera	\$ (290)	\$ (3,242)	\$ 2,952	(91.1)

Gain on sale of securities of equity investment:

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Gain on sale of investment in Lumera	\$ 8,738	\$ 2,700	\$ 6,038	223.6

In January 2006, we sold 2.6 million shares of our Lumera common stock for \$10.3 million. We recorded a "Gain on sale of securities of equity investment" of approximately \$7.3 million. As a result of the reduction in ownership, we changed to the cost basis of accounting for our investment in Lumera in accordance with FAS 115. We recorded our proportionate share of Lumera losses, \$290,000, for the period preceding the sale in January 2006, compared to the full year in 2005.

Income Taxes.

At December 31, 2006, we had net operating loss carry-forwards of approximately \$198.0 million for federal income tax reporting purposes. In addition, we had research and development tax credits of \$2.9 million.

Inducement for Conversion of Preferred Stock.

(in thousands)	2006	2005	\$ change	% change
	-----	-----	-----	-----
Inducement for conversion of preferred stock	\$ (3,076)	\$ (1,184)	\$ (1,892)	159.8

In September 2004, we raised \$10.0 million before issuance costs of \$90,000 from the sale of 10,000 shares of convertible preferred stock and a warrant to purchase 362,000 shares of common stock. The preferred stock terms include a dividend of 3.5% per annum, payable quarterly in cash or registered common stock, at our election, subject to certain conditions.

The net cash proceeds of \$9,910,000 were allocated to the preferred stock and the warrant based on the relative fair values of the securities. The warrants were valued using the Black-Scholes option pricing model with the following assumptions: expected volatility, 75%; risk free interest rate, 3.4%, and contractual life five years. \$1.3 million of the proceeds were allocated to the warrant and was recorded as an increase to additional paid-in capital.

Subsequent to the relative fair value allocation, the effective conversion price of the convertible preferred stock was less than the closing price of our common stock on the date of commitment to purchase the preferred stock, resulting in the recognition of a beneficial conversion feature in accordance with Emerging Issues Task Force No 00-27 "Application of Issue No. 98-5 to Certain Convertible Instruments." This beneficial conversion feature was measured as \$1.2 million, which represents the difference between the fair value of the common stock and the effective conversion price. This beneficial conversion feature was recorded to additional paid-in capital and will be recorded as a deemed dividend to preferred stockholders (accretion) using the effective interest method, over the stated life of the preferred stock, which is three years. During 2005, we recorded \$280,000 in dividends on the preferred stock and \$303,000 in accretion of the beneficial conversion feature of the preferred stock.

In May 2006, we entered into a Conversion Agreement with the holders of our Series A Convertible Preferred Stock to convert 5,000 shares of Preferred Stock. As consideration for the conversion, we issued a total of 1,353,066 shares of our common stock, \$.001 par value, of which 565,000 shares were issued as an inducement to convert ("Incentive Shares"). The value of the Incentive Shares of \$2.0 million together with unamortized discounts of \$0.6 million and fees of \$0.1 million were recorded as "Inducement for conversion of preferred stock" in the consolidated statement of operations.

In connection with the conversion, we were required to register the Incentive Shares. Under the conversion agreement, we agreed to pay the difference, only if positive, of \$3.62 minus the 45 day trailing volume weighted average price as of the 45th trading day after the effective date of the required registration statement with respect to any of the Incentive Shares that were sold by the holder during the 45 day period or that were held in an economically neutral position as of the end of the 45 day period. We determined that the price protection feature of the Incentive Shares included an embedded derivative feature as defined by Statement of Financial Accounting Standards No. 133, Accounting for Derivative Instruments and Hedging Activities ("FAS 133"). We estimated the initial value of the derivative feature at conversion to be \$401,000 using the Black-Scholes option pricing model with the following assumptions: expected volatility 65%, dividend yield of 0%, risk free interest rate 4.9% and contractual life 0.3 years and recorded it as a non-operating expense included in "Inducement for conversion of preferred stock" in the consolidated statement of operations.

The value of the derivative feature fluctuated with the value of our common stock and, to a lesser extent, with changes in valuation variables. In August 2006, the Company determined and recorded the final value and paid the liability of \$1,074,000. The change in estimated fair value of the derivative feature of \$673,000 was included as a non-operating expense in "Gain on Derivative instruments, net". In August 2005, the preferred stock holder agreed to convert 5,000 shares of our preferred stock into 734,000 shares of common stock. As an inducement to convert the preferred stock

we issued 124,000 shares of our common stock to the preferred stock holder and adjusted the exercise price from \$8.16 to \$6.84 per share for the existing warrants to purchase 362,000 shares of common stock issued in connection with the original sale of preferred stock. The total value of the 124,000 common shares issued of \$701,000, the change in the value of the warrants of \$62,000 and the amount of unamortized beneficial conversion feature on the preferred stock of \$421,000 was recorded as an inducement to convert the preferred stock and charged to common shareholders in 2005. The warrants were valued using the Black-Scholes option pricing model with the following assumption: expected volatility 65%, risk free interest rate 4.25% and contractual life 4.1 years.

Liquidity and Capital Resources

We have incurred significant losses since inception. We have funded operations to date primarily through the sale of common stock, convertible preferred stock, warrants, the issuance of convertible debt and, to a lesser extent, from development contract revenues and product sales. At December 31, 2007, we had \$35.8 million in cash, cash equivalents, and investment securities, available-for-sale. In June and July 2007, we received \$34,092,000 from the exercise of 12,855,000 publicly traded warrants after we exercised our right to call these warrants. In addition, during the year ended December 31, 2007, we sold approximately 1,714,000 shares of Lumera common stock for gross proceeds of \$8,717,000. Based on our current operating plan, we believe we have sufficient cash to fund operations through at least March 2009. We will require additional cash to fund our operating plan past that time. There can be no assurance that additional cash will be available or that, if available, it will be available on terms acceptable to us on a timely basis. If adequate funds are not available to satisfy either short-term or long-term capital requirements, we will be required to limit our operations substantially. This limitation of operations may include reductions in staff, operating costs and capital expenditures.

Cash used in operating activities totaled \$21.3 million during 2007, compared to \$27.1 million during 2006.

We had the following material gains and charges, and changes in assets and liabilities during the year ended December 31, 2007.

- *"Non cash interest expense, net"*

In connection with the issuance of our notes in March 2005 and December 2005, we allocated proceeds to the embedded derivative features and the warrants. The aggregate discount to the notes of \$7.9 million was amortized to non-cash interest expense using the imputed interest method over the life of the notes. In 2007, \$349,000 in discount associated with the notes was amortized. In March 2007, we made the final scheduled payments in connection with our convertible notes.

- *"Gain on sale of investment in Lumera"*

During 2007, we sold 1,714,000 shares of our Lumera common stock at prices between \$4.31 and \$6.01 per share for total proceeds of \$8,717,000. The aggregate carrying value of the shares sold in 2007 was \$2,111,000, resulting in a gain of \$6,606,000.

- *"Billings in excess of costs and estimated earnings on uncompleted contracts"*

In December 2007, we received \$500,000 from a customer for an advance payment in accordance with the terms of the development contract. The work was performed in January 2008.

- *"Inventory"*

Inventory decreased by \$282,000 to \$761,000 at December 31, 2007 from \$1,043,000 at December 31, 2006. As a result of the timing of our production schedule for ROV, we had a lower finished goods balance as of the end of the year compared to the prior year. We value inventory at the lower of cost or market with cost determined on a weighted average cost basis. The following table shows the composition of the inventory at December 31, 2007 and December 31, 2006, respectively:

December 31,

Edgar Filing: MICROVISION INC - Form 10-K

	2007	2006
Raw materials	\$ 122,000	\$ 146,000
Work in process	10,000	--
Finished goods	629,000	897,000
	-----	-----
	\$ 761,000	\$ 1,043,000
	=====	=====

Cash used in investing activities totaled \$14.2 million in 2007 compared to cash provided by investing activities of \$11.8 million in 2006. Cash used in investing activities in 2007 includes net purchases of \$22.3 million of investment securities with a portion of the proceeds from the call of our public warrants. In January 2006, we sold 2.6 million shares of our Lumera common stock for \$10.3 million. In 2006, we had no net purchases of investment securities. During 2007, we sold 1.7 million shares of Lumera common stock for \$8.7 million. In addition, we used cash of \$1.1 million for capital expenditures in 2007, compared to \$2.2 million during the same period in 2006. Capital expenditures include leasehold improvements to leased office space and computer hardware and software, laboratory equipment and furniture and fixtures to support operations. The decrease is due to the absence of expenditures for leasehold improvements to our new facility that we incurred in 2006.

Cash provided by financing activities totaled \$34.4 million in 2007, compared to \$23.0 million in 2006.

The following is a list of scheduled payments we made in connection with our March and December 2005 convertible notes during 2007 and 2006.

- During 2007:
 - ◆ cash payments of \$1.4 million in principal and \$28,000 in interest, and
 - ◆ issued 459,000 shares of its common stock in payment of \$1.4 million in principal and \$21,000 in interest.
- During 2006:
 - ◆ cash payments of \$9.6 million in principal and \$722,000 in interest, and
 - ◆ issued 1.4 million shares of our common stock in payment of \$1.7 million in principal and \$88,000 in interest.

The following is a list of securities issuances during 2007 and 2006.

- On June 21, 2007, we exercised our right to call our publicly traded warrants. Under the terms of the publicly traded warrants, the warrant holders had until July 6, 2007 to exercise their warrants or the warrants would expire. We received \$34,092,000 from the exercise of 12,855,000 publicly traded warrants after we exercised our right to call these warrants.
- In November 2006, we raised \$7.9 million before issuance costs of \$779,000 through an underwritten public offering of 3,318,000 shares of our common stock.
- In June and July 2006, we raised an aggregate of \$27.1 million before issuance cost of \$2.2 million through an underwritten public offering of 11.6 million shares of our common stock and warrants to purchase 12.4 million shares of our common stock. The warrants have an exercise price of \$2.65 per share, a five year term, and are not exercisable for one year from the date of issuance. The warrants are callable after one year from the date of issuance if the average closing bid price of our stock is over \$5.30 for any 20 consecutive trading days. In connection with the offering, the Company issued the underwriter a warrant to purchase 537,500 shares of Microvision common stock at an exercise price of \$2.76 per share. The Company also issued the underwriter a warrant to acquire 537,500 warrants, identical to those sold in the offering, at an exercise price of \$0.16 per warrant. Both warrants will be exercisable for a period of 4 years beginning on the first anniversary of the date of issuance.

We may also raise cash through future sales of our preferred or common stock, issuance of debt securities or other borrowings. Should expenses exceed the amounts budgeted, we may require additional cash earlier than expected to further the development of our technology, for expenses associated with product development, and to respond to competitive pressures or to meet unanticipated development difficulties. The operating plan also provides for the development of strategic relationships with systems and equipment manufacturers that may require additional investments. There can be no assurance that additional financing will be available to us or that, if available, it will be

available on acceptable terms on a timely basis. If adequate funds are not available to satisfy either short-term or long-term capital requirements or planned revenues are not generated, that we may be required to limit its operations substantially. This limitation of operations may include reductions in staff and discretionary costs, which may include non-contractual research costs. Our cash requirements will depend on many factors, including, but not limited to, the rate at which we can, directly or through arrangements with original equipment manufacturers, introduce products incorporating our technology and the market acceptance and competitive position of such products.

Future operating expenditures and capital requirements will depend on numerous factors, including the following:

- the progress of research and development programs,
- the progress in commercialization activities and arrangements,
- the cost of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights,
- competing technological and market developments, and
- our ability to establish cooperative development, joint venture and licensing arrangements.

In order to maintain our exclusive rights under our license agreement with the University of Washington, we are obligated to make royalty payments to the University of Washington with respect to the Virtual Retinal Display technology. If we are successful in establishing original equipment manufacturer co-development and joint venture arrangements, we expect our partners to fund certain non-recurring engineering costs for technology development and/or for product development. Nevertheless, we expect our cash requirements to remain high as we expand our activities and operations with the objective of commercializing the light scanning technology.

The following table lists our contractual obligations (in thousands):

	December 31,				
	2008	2009	2010	2011	2012
Contractual Obligations:					
Open purchase orders *	\$ 3,654	\$ 178	\$ --	\$ --	\$ --
Minimum payments under capital leases	55	49	40	8	--
Minimum payments under operating leases	896	852	881	905	9
Minimum payments under research, royalty and licensing agreements	215	215	175	350	3
Total	\$ 4,820	\$ 1,294	\$ 1,096	\$ 1,263	\$ 1,2

* Open purchase orders represent commitments to purchase inventory, materials, capital equipment and other goods used in the normal course of the Company's business.

+ License and royalty obligations continue through the lives of the underlying patents, which is currently through at least 2017.

New accounting pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157 Accounting for Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of FAS 157 on its financial statements.

In June 2007, the Emerging Issues Task Force (EITF) reached a final consensus on EITF Issue No. 07-3, Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities (EITF 07-3). EITF 07-3 requires nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities to be capitalized and recognized as an expense as the related goods are delivered or the related services are performed. EITF 07-3 is effective for financial statements issued for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of EITF 07-3 on its financial statements.

In June 2007, the Emerging Issues Task Force (EITF) reached a final consensus on EITF Issue No. 07-1, Accounting for Collaborative Arrangements (EITF 07-1). EITF 07-1 discusses how to determine whether an arrangement constitutes a collaborative arrangement, how costs incurred and revenue generated on sales to third parties should be reported by the participants, how an entity should characterize payments made between participants and what participants should disclose in the notes to the financial statements about a collaborative arrangement. EITF 07-1 is effective for financial statements issued for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of EITF07-1 on its financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Of our total cash equivalents and investment securities available-for-sale balance, 61% have variable interest rates and, as such, the fair values of the principal of these instruments are not affected by changes in market interest rates. The remaining 39% of our cash equivalents and investment securities available-for-sale balance are at fixed interest rates and, as such, the fair values of these instruments are affected by changes in market interest rates. Due to the generally short-term maturities of these investment securities, we believe that the market risk arising from our holdings of these financial instruments is not material.

Our investment policy restricts investments to ensure principal preservation and liquidity. The investment securities portfolio is comprised of short-term highly rated commercial paper, U.S. government agency notes and auction rate securities.

At December 31, 2007, \$8.8 million of our marketable securities portfolio was invested in AAA rated investments in auction-rate debt securities. Auction-rate securities are long-term variable rate bonds tied to short-term interest rates. After the initial issuance of the securities, the interest rate on the securities is reset periodically, at intervals established at the time of issuance (e.g., every seven, fourteen or twenty-eight days), based on market demand for a reset period. Auction-rate securities are bought and sold in the marketplace through a competitive bidding process often referred to as a "Dutch auction". If there is insufficient interest in the securities at the time of an auction, the auction may not be completed and the rates may be reset to predetermined "penalty" or "maximum" rates. Following such a failed auction, we would not be able to access our funds that are invested in the corresponding auction-rate securities until a future auction of these investments is successful or new buyers express interest in purchasing these securities in between reset dates.

At the time of our initial investment and through the date of this Report, all of our auction-rate securities in which we invest remain AAA rated. As of March 12, 2008, we successfully liquidated into cash equivalents, \$4.5 million of the \$8.8 million of auction-rate securities held at December 31, 2007. The \$4.5 million equaled our original purchase value. The remaining \$4.3 million of auction rate securities have been subject to failed auctions in 2008 as a result of the current negative liquidity conditions in the global credit markets. The failed auctions have rendered these securities temporarily illiquid through the normal auction process. The underlying assets of our remaining auction-rate securities are student loans and municipal bonds insured by AMBAC, and the Federal Family Education Loan Program. As of March 3, 2008, AMBAC was rated AAA by Moody's and Standard and Poor's and AA by Fitch Ratings. Although these insurers are highly rated, they are reported to be experiencing financial difficulty, which could negatively affect their ratings and thus the ratings of the auction-rate securities that we hold. If the underlying issuers are unable to successfully clear future auctions or if their credit rating deteriorates and the deterioration is

deemed to be other-than-temporary, we would be required to adjust the carrying value of the auction-rate securities through an impairment charge to earnings. Any of these events could affect our results of operations and our financial condition. In the event we need to access these funds, we could be required to sell these securities at an amount below our original purchase value. However, based on our ability to access our cash and cash equivalents and our other liquid investments, totaling \$31.5 million at December 31, 2007, we do not expect to be required to sell these securities at a loss.

The values of cash equivalents and investment securities, available-for-sale, by maturity date as of December 31, 2007, are as follows:

	<u>Amount</u>	<u>Percent</u>
Cash and cash equivalents	\$ 1,186,000	3.3 %
Less than one year	22,309,000	62.3
One to two years	3,515,000	9.8
Greater than five years	8,800,000	24.6
	<u>\$ 35,810,000</u>	<u>100.0 %</u>

All of the Company's development contract payments are made in U.S. dollars. However, in the future the Company may enter into additional development contracts in foreign currencies that may subject the Company to foreign exchange rate risk. The Company intends to enter into foreign currency hedges to offset the exposure to currency fluctuations when it can determine the timing and amounts of the foreign currency exposure.

Report of Independent Registered Public Accounting Firm

To the Board of Directors
and Shareholders of Microvision, Inc.:

In our opinion, the consolidated financial statements listed in the accompanying index present fairly, in all material respects, the financial position of Microvision, Inc. at December 31, 2007 and December 31, 2006, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2007 in conformity with accounting principles generally accepted in the United States of America. In addition, in our opinion, the financial statement schedule listed in the accompanying index presents fairly, in all material respects, the information set forth therein when read in conjunction with the related consolidated financial statements. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007 based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these financial statements and financial statement schedule, for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express opinions on these financial statements, on the financial statement schedule, and on the Company's internal control over financial reporting based on our integrated audits. We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As discussed in Note 13 to the financial statements, during the year ended December 31, 2006, the Company changed the manner in which it accounts for stock based compensation.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may

deteriorate.

The accompanying notes are an integral part of these financial statements.

1. The Company

Microvision is developing miniature display and imaging engines based upon its integrated photonics module technology platform. Microvision has entered into contracts with commercial and U.S. government customers to develop applications using our technology. Microvision has one commercially marketed product, ROV, a hand-held bar code scanner that incorporates the Company's proprietary MEMS technology.

Microvision has incurred significant losses since inception. Based on its current operating plan, the Company believes it has sufficient cash to fund operations through at least March 2009. The Company will require additional cash to fund its operating plan past that time. The Company plans to obtain additional cash through the issuance of equity or debt securities. There can be no assurance that such cash will be available to the Company, or if available, on terms acceptable to the Company on a timely basis.

The Company's operating plan calls for the addition of sales, marketing, technical and other staff and the purchase of additional laboratory and production equipment. The Company's future expenditures and capital requirements will depend on numerous factors, including the progress of its research and development program, the progress in commercialization activities and arrangements, the cost of filing, prosecuting, defending and enforcing any patent claims and other intellectual property rights, competing technological and market developments and the ability of the Company to establish cooperative development, joint venture and licensing arrangements. There can be no assurance that additional financing will be available to the Company or that, if available, it will be available on terms acceptable to the Company or on a timely basis. If adequate funds are not available to satisfy either short-term or long-term capital requirements or proceeds for the sales of Lumera common stock are less than anticipated, or planned revenues are not generated, the Company may be required to limit its operations substantially. This limitation of operations may include reduction in capital expenditures and reductions in staff and discretionary costs, which may include non-contractual research costs. The Company's capital requirements will depend on many factors, including, but not limited to, the rate at which the Company can, directly or through arrangements with original equipment manufacturers, introduce products incorporating the light scanning technology and the market acceptance and competitive position of such products.

2

. **Summary of significant accounting policies**

Use of estimates

The preparation of financial statements in conformity with generally accepted accounting principles of the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. The Company's management has identified the following areas where significant estimates and assumptions have been made in preparing the financial statements: revenue recognition, allowance for uncollectible receivables and management loans, inventory valuation and valuation of derivative financial instruments.

Principles of consolidation

The consolidated financial statements include Microvision and equity investments in which Microvision has the ability to exercise significant influence but does not have voting control.

At December 31, 2005, Microvision owned 28% of Lumera's common stock. In 2005 and 2006, the Company accounted for Lumera as an equity investment. In January 2006, Microvision sold 2,550,000 shares of its Lumera common stock. As a result of the reduction in ownership, Microvision changed to the cost basis of accounting for its investment in Lumera in accordance with FAS 115. Microvision also owns a warrant exercisable at \$8.80 to purchase 170,500 shares of Lumera common stock.

Cash, cash equivalents and investment securities, available-for-sale

The Company considers all investments that contractually mature within 90 days of the date of purchase to be cash equivalents.

The Company accounts for investment securities, available-for-sale in accordance with the provisions of Statement of Financial Accounting Standards No. 115, Accounting for Certain Investments in Debt and Equity Securities ("FAS 115"). FAS 115 addresses the accounting and reporting for investments in equity securities that have readily determinable fair values and for all investments in debt securities. The Company's investment securities, available-for sale are comprised of commercial paper, government and commercial debt securities and auction rate securities. The Company has classified its entire investment portfolio as available-for-sale. Available-for-sale securities are stated at fair value with unrealized gains and losses included in other comprehensive income (loss). Dividend and interest income are recognized when earned. Realized gains and losses are presented separately on the income statement. The cost of securities sold is based on the specific identification method.

Inventory

Inventory consists of raw material; work in process and finished goods for the Company's ROV and Flic products. Inventory is recorded at the lower of cost or market with cost determined on the weighted-average method. Management periodically assesses the need to provide for obsolescence of inventory and adjusts the carrying value of inventory to its net realizable value when required. In addition, Microvision reduces the value of its inventory to its estimated scrap value when management determines that it is not probable that the inventory will be consumed through normal production during the next twelve months.

Restricted investments

As of December 31, 2007, restricted investments include \$1.1 million in irrevocable letters of credit as security on a lease agreement for the corporate headquarters building in Redmond, WA. The required letter of credit balance decreases over the term of the lease, which expires in 2013.

Property and equipment

Property and equipment is stated at cost and depreciated over the estimated useful lives of the assets (two to five years) using the straight-line method. Leasehold improvements are depreciated over the shorter of estimated useful lives or the lease term.

Revenue recognition

Revenue has primarily been generated from contracts for further development of the light scanning technology and to produce demonstration units for commercial enterprises and the United States government. Revenue on such contracts is recorded using the percentage-of-completion method measured on a cost incurred basis. The percentage of completion method is used because the Company can make reasonably dependable estimates of the contract cost. Changes in contract performance, contract conditions, and estimated profitability, including those arising from contract penalty provisions, and final contract settlements, may result in revisions to costs and revenues and are recognized in the period in which the revisions are determined. Profit incentives are included in revenue when realization is assured. If the U.S. Government cancels a contract, the Company would receive payment for work performed and costs committed to prior to the cancellation.

The Company recognizes losses, if any, as soon as identified. Losses occur when the estimated direct and indirect costs to complete the contract exceed unrecognized revenue. The Company evaluates the reserve for contract losses on a contract-by-contract basis.

Revenue from product shipments is recognized in accordance with Staff Accounting Bulletin No. 104 "Revenue Recognition." Revenue is recognized when there is sufficient evidence of an arrangement, the selling price is fixed or determinable and collection is reasonably assured. Revenue for product shipments is recognized upon acceptance of the product by the customer or expiration of the contractual acceptance period, after which there are no rights of return. Provisions are made for warranties at the time revenue is recorded. Warranty expense was not material for any periods presented.

Concentration of credit risk and sales to major customers

Financial instruments that potentially subject the Company to concentrations of credit risk are primarily cash equivalents, investments and accounts receivable. The Company typically does not require collateral from its customers. The Company has a cash investment policy that generally restricts investments to ensure preservation of principal and maintenance of liquidity. The investment securities portfolio is comprised of short-term highly rated commercial paper, U.S. government agency notes and auction rate securities.

At December 31, 2007, \$8.8 million of the Company's marketable securities portfolio was invested in AAA rated investments in auction-rate debt securities. Auction-rate securities are long-term variable rate bonds tied to short-term interest rates. After the initial issuance of the securities, the interest rate on the securities is reset periodically, at intervals established at the time of issuance (e.g., every seven, fourteen or twenty-eight days), based on market demand for a reset period. Auction-rate securities are bought and sold in the marketplace through a competitive bidding process often referred to as a "Dutch auction". If there is insufficient interest in the securities at the time of an auction, the auction may not be completed and the rates may be reset to predetermined "penalty" or "maximum" rates. Following such a failed auction, the company would not be able to access its funds that are invested in the corresponding auction-rate securities until a future auction of these investments is successful or new buyers express interest in purchasing these securities in between reset dates.

At the time of its initial investment and through the date of this Report, all of the Company's auction- rate securities in which it invests remain AAA rated. As of March 12, 2008, the Company successfully liquidated into cash equivalents, \$4.5 million of the \$8.8 million of auction-rate securities held at December 31, 2007. The \$4.5 million equaled the original purchase value. The remaining \$4.3 million of auction rate securities have been subject to failed auctions in 2008 as a result of the current negative liquidity conditions in the global credit markets. The failed auctions have rendered these securities temporarily illiquid through the normal auction process. The underlying assets of the Company's remaining auction-rate securities are student loans and municipal bonds insured by AMBAC, and the Federal Family Education Loan Program. As of March 3, 2008, AMBAC was rated AAA by Moody's and Standard and Poor's and AA by Fitch Ratings. Although these insurers are highly rated, they are reported to be experiencing financial difficulty, which could negatively affect their ratings and thus the ratings of the auction- rate securities that the Company holds. If the underlying issuers are unable to successfully clear future auctions or if their credit rating deteriorates and the deterioration is deemed to be other-than-temporary, the Company would be required to adjust the carrying value of the auction-rate securities through impairment charge to earnings. Any of these events could affect the Company's results of operations and financial condition. In the event the Company needs to access these funds, it could be required to sell these securities at an amount below its original purchase value. However, based on the Company's ability to access our cash and cash equivalents and its other liquid investments, totaling \$31.5 million at December 31, 2007 it does not expect to be required to sell these securities at a loss.

The United States government accounted for approximately 61%, 51%, and 35% of total revenue during 2007, 2006 and 2005, respectively. Visteon accounted for approximately 15% of total revenue during 2007 and Ethicon Endo-Surgery Inc. accounted for approximately 11% of total revenue during 2006. Contracts with three commercial

customers represented 22%, 17%, and 38% of total revenues during 2007, 2006, and 2005, respectively. The United States government accounted for approximately 28% and 45% of the accounts receivable balance at December 31, 2007 and 2006, respectively.

Income taxes

Deferred tax assets and liabilities are recorded for differences between the financial statement and tax bases of the assets and liabilities that will result in taxable or deductible amounts in the future, based on enacted tax laws and rates applicable to the periods in which the differences are expected to affect taxable income. Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is recorded for the amount of income tax payable for the period increased or decreased by the change in deferred tax assets and liabilities during the period.

Net loss per share

Basic net loss per share is calculated on the basis of the weighted- average number of common shares outstanding during the periods. Net loss per share assuming dilution is calculated on the basis of the weighted-average number of common shares outstanding and the dilutive effect of all potentially dilutive securities, including common stock equivalents and convertible securities. Net loss per share assuming dilution for 2007, 2006 and 2005 is equal to basic net loss per share because the effect of dilutive securities outstanding during the periods including options and warrants computed using the treasury stock method, is anti-dilutive.

As of December 31, 2007, 2006 and 2005, the Company excluded the following convertible securities from diluted net loss per share as the effect of including them would have been anti-dilutive. The shares shown represent the number of shares of common stock which would be issued upon conversion as of the years ended December 31, 2007, 2006 and 2005.

	December 31,		
	2007	2006	2005
Publicly traded warrants	--	12,362,000	9,400,000
Options and private warrants	9,518,000	10,906,000	9,400,000
Notes payable	--	620,000	3,100,000
Mandatorily redeemable convertible preferred stock	--	--	7,000,000
	9,518,000	23,888,000	13,300,000

Research and development

Research and development costs are expensed as incurred.

Fair value of financial instruments

The Company's financial instruments include cash and cash equivalents, accounts receivable, accounts payable, accrued liabilities and long-term debt. The carrying amount of long-term debt at December 31, 2007 and 2006 was not materially different from the fair value based on rates available for similar types of arrangements. The carrying value of cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate fair value due to the short maturities. The convertible notes are not publicly traded and it is not practicable for the Company to estimate the fair value of the convertible notes due to the absence of comparable publicly traded financial instruments. The convertible notes were retired in March 2007.

Long-lived assets

The Company evaluates the recoverability of its long-lived assets when an impairment is indicated based on expected undiscounted cash flows and recognizes impairment of the carrying value of long-lived assets, if any, based on the fair value of such assets.

Stock-based compensation

The Company has one employee incentive compensation plan and one board of director stock-based compensation plan. Both are more fully described in Note 13.

The Company accounts for stock-based employee compensation arrangements in accordance with the provisions of Statement of Financial Accounting Standards No. 123, as revised December 2004 ("FAS 123(R)"). The Company adopted FAS123(R) effective January 1, 2006. The Company accounts for equity instruments issued to non-employees in accordance with the provisions of FAS No. 123 and Emerging Issues Task Force Issue No. 96-18. The following table shows the amount of stock-based compensation expense included in the Statement of Operations:

	Year Ended December 31,		
	2007	2006	2005
Cost of contract revenue	\$ 138,000	\$ 80,000	\$ 80,000
Cost of product revenue	20,000	70,000	70,000
Research and development expense	365,000	246,000	246,000
Sales, marketing, general and administrative expense	1,274,000	1,429,000	429,000
	\$ 1,797,000	\$ 1,825,000	\$ 429,000

Reclassifications

Certain reclassifications have been made to prior year financial statements to conform to classifications used in the current year. These reclassifications had no impact on net loss, shareholders' equity or cash flows as previously reported.

New accounting pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued FASB Statement No. 157 Accounting for Fair Value Measurements (FAS 157). FAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP), and expands disclosures about fair value measurements. FAS 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of FAS 157 on its financial statements.

In June 2007, the Emerging Issues Task Force (EITF) reached a final consensus on EITF Issue No. 07-3, Accounting for Nonrefundable Advance Payments for Goods or Services to Be Used in Future Research and Development Activities (EITF 07-3). EITF 07-3 requires nonrefundable advance payments for goods or services that will be used or rendered for future research and development activities to be capitalized and recognized as an expense as the related goods are delivered or the related services are performed. EITF 07-3 is effective for financial statements issued for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of EITF 07-3 on its financial statements.

In June 2007, the Emerging Issues Task Force (EITF) reached a final consensus on EITF Issue No. 07-1, Accounting for Collaborative Arrangements (EITF 07-1). EITF 07-1 discusses how to determine whether an arrangement constitutes a collaborative arrangement, how costs incurred and revenue generated on sales to third parties should be reported by the participants, how an entity should characterize payments made between participants and what participants should disclose in the notes to the financial statements about a collaborative arrangement. EITF 07-1 is effective for financial statements issued for fiscal years beginning after December 15, 2007 and interim periods within those fiscal years. The Company is currently assessing the financial impact of EITF07-1 on its financial statements.

3. Long-term contracts

Cost and estimated earnings in excess of billings on uncompleted contracts comprises amounts of revenue recognized on contracts that the Company has not yet billed to customers because the amounts were not contractually billable at December 31, 2007 and 2006. The following table summarizes when the Company will be contractually able to bill the balance as of December 31, 2007 and 2006.

	Year Ended December 31,	
	2007	2006
Billable within 30 days	\$ 434,000	\$ 547,000
Billable between 31 and 90 days	--	--
Billable after 90 days	9,000	18,500
	\$ 443,000	\$ 565,500

The Company's current contracts with the U.S. government are primarily cost plus fixed fee type contracts. Under the terms of a cost plus fixed fee contract, the U.S. government reimburses the Company for negotiated actual direct and indirect cost incurred in performing the contracted services. The Company is under no obligation to spend more than the contract value to complete the contracted services. The period of performance is generally one year. Each of the Company's contracts with the United States government can be terminated for convenience by the government at any time. To date, the U.S. government has not terminated a contract with the Company.

In May 2007, the Company announced that it had entered into a \$3,181,000 contract with the U.S. Air Force to provide a lightweight, see-through, full-color eyewear display prototype to the government. The contract, which continues a development activity with the Air Force, specifies the development, design, verification, testing, and delivery of a lightweight, see-through full-color wearable display for evaluation by several DOD project offices.

In September 2006, the Company entered into a 12 month development agreement with Visteon, a major global Tier 1 automotive supplier, to develop a commercial scanned-beam head-up display (HUD) product for automotive applications. Under the agreement, Visteon and Microvision will design and produce a series of advanced HUD samples, including devices specifically designed to be compatible with automotive environmental requirements.

In September 2006, the Company entered into an 18 month, \$5,945,000 contract with General Dynamics C4 Systems to supply full-color, daylight readable, see-through helmet-mounted displays as part of the U.S. Army's Mounted Warrior HMD Improvement Program. General Dynamics holds prime contracts with the U.S. Army for other Warrior programs including Land Warrior, Air Warrior and Future Force Warrior Advanced Technology Demonstration. The contract specifies the development and delivery of ten full-color display units for evaluation.

In June 2005, the Company entered into a 12 month, \$4,359,000 contract with General Dynamics C4 Systems to continue the development of a helmet-mounted display for the Air Warrior Block 3 system. General Dynamics is

Edgar Filing: MICROVISION INC - Form 10-K

under contract with the U.S. Army's Product Manager -- Air Warrior in Huntsville, Ala., to develop and integrate the Air Warrior Block 3 system. The Microvision helmet-mounted display is being designed as a full-color, see-through, daylight and night-readable, high-resolution display.

The following table summarizes the costs incurred on the Company's revenue contracts:

	December 31, 2007	December 31, 2006
Costs and estimated earnings incurred on uncompleted contracts	\$ 9,357,000	\$ 4,340,500
Billings on uncompleted contracts	(9,884,000)	(3,975,000)
	\$ (527,000)	\$ 365,500
Included in accompanying balance sheets under the following captions:		
Costs and estimated earnings in excess of billings on uncompleted contracts	\$ 443,000	\$ 565,500
Billings in excess of costs and estimated earnings on uncompleted contracts	(970,000)	(200,000)
	\$ (527,000)	\$ 365,500

4. Investment securities, available-for-sale

The following table summarizes the composition of the Company's available-for-sale investment securities at December 31, 2007 and 2006:

	Year Ended December 31,	
	2007	2006
Lumera common stock	95,000	--
U.S. government debt securities	4,486,000	--
U.S. corporate debt securities	9,030,000	--
Auction rate securities	8,800,000	--
	\$ 22,411,000	\$ --

The available-for-sale investment securities at December 31, 2007 consisted of the following:

Type of security:	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Lumera common stock	\$ 43,000	\$ 52,000	\$ --	\$ 95,000
Corporate debt and equity securities	9,031,000	2,000	(5,000)	9,028,000
U.S. government and agency securities	4,486,000	3,000	(1,000)	4,488,000
Auction rate securities	8,800,000	--	--	8,800,000
	\$22,360,000	\$ 57,000	\$ (6,000)	\$ 22,411,000

Edgar Filing: MICROVISION INC - Form 10-K

Maturity date:		
Less than one year	\$10,045,000	\$ 10,096,000
Due in 1-3 years	3,515,000	3,515,000
Greater than five years	8,800,000	8,800,000
	-----	-----
	\$22,360,000	\$ 22,411,000
	=====	=====

5. Inventory

Inventory consists of the following:

	December 31, 2007	December 31, 2006
	-----	-----
Raw materials	\$ 122,000	\$ 146,000
Work in process	10,000	--
Finished goods	629,000	897,000
	-----	-----
	\$ 761,000	\$ 1,043,000
	=====	=====

The inventory at December 31, 2007 and 2006 consisted of raw materials, work in process and finished goods for ROV and Flic. Inventory is stated at the lower of cost or market, with cost determined on a weighted average basis. Management periodically assesses the need to provide for obsolescence of inventory and adjusts the carrying value of inventory to its net realizable value when required. In addition, Microvision reduces the value of its inventory to its estimated scrap value when management determines that it is not probable that the inventory will be consumed through the normal course of business during the next twelve months. In 2007, 2006 and 2005, Microvision recorded inventory write-downs of \$84,000, \$1,181,000 and \$3,732,000, respectively. The 2006 write-down of \$1,181,000 includes a \$210,000 write-down of Nomad inventory.

During the second quarter of 2006, the Company determined that it would no longer promote the Nomad product and recorded an expense of \$210,000 to reduce the value of Nomad inventory to zero. In addition, the Company recorded \$100,000 as additional accelerated depreciation expense related to fixed assets used in Nomad production. Both inventory and fixed asset balances related to Nomad production are zero.

6. Accrued liabilities

Accrued liabilities consist of the following:

	December 31,	
	2007	2006
	-----	-----
Bonuses	\$ 1,500,000	\$ 700,000
Payroll and payroll taxes	656,000	603,000
Compensated absences	458,000	382,000
Deferred rent credit	306,000	278,000
Adverse purchase commitments	--	310,000
Professional Fees	447,000	406,000
Other	787,000	1,019,000
	-----	-----
	\$ 4,154,000	\$ 3,698,000

7. Property and equipment, net

Property and equipment consists of the following:

	December 31,	
	2007	2006
Production equipment	\$ 2,815,000	\$ 2,350,000
Leasehold improvements	3,304,000	3,252,000
Computer hardware and software/lab equipment	6,879,000	6,625,000
Office furniture and equipment	1,490,000	1,444,000
	14,488,000	13,671,000
Less: Accumulated depreciation	(10,441,000)	(9,660,000)
	\$ 4,047,000	\$ 4,011,000

Depreciation expense was \$953,000, \$1,218,000 and \$1,602,000 in 2007, 2006 and 2005, respectively.

8. Receivables from related parties

In January 2006, two senior officers with outstanding loans from the Company left the Company. Because the lines of credit were not fully secured and collection was uncertain, the Company increased the allowance by \$1,031,000 in December 2005. In accordance with the terms, the loans were due in January 2007. Neither of the officers has repaid their loans. One of the officers pledged 50,000 shares of Lumera common stock as collateral for the loans. In May 2007, the Company foreclosed on the collateral and sold the shares for net proceeds of \$227,000. The Company is pursuing collection of the remaining outstanding balances. A third executive with outstanding loans from the Company left the Company in August 2007 and his loans will be due in August 2008. As a result of a review of the financial position of the former executives and the potential difficulty in collecting loans from former employees, the Company has recorded additional allowances for doubtful accounts for the receivables from senior officers of \$23,000 during 2007 and \$542,000 during 2006. As of December 31, 2007 and December 31, 2006, the total amount outstanding under the lines of credit was \$2,496,000 and \$2,723,000, respectively. As of December 31, 2007 and December 31, 2006, the allowance for receivables from related parties was \$2,496,000 and \$2,473,000, respectively.

The interest on the lines of credit is forgiven if the executive is an employee of the Company at December 31 of the respective year. Compensation expense of \$0, \$22,000 and \$156,000 was recognized in 2007, 2006 and 2005, respectively, for interest forgiven.

9. Accounting for Lumera

Investment Securities, Available-for-Sale

In January 2006, Microvision sold 2,550,000 shares of its Lumera common stock for \$10.3 million. Microvision recorded a "Gain on sale of securities of equity investment" of approximately \$7.3 million. As a result of the reduction in ownership below 20% and reduced influence over Lumera management, Microvision changed to the cost basis of accounting for its investment in Lumera in accordance with FAS 115.

Edgar Filing: MICROVISION INC - Form 10-K

In 2007, the Company sold 1,714,000 shares of Lumera common stock for \$8.7 million. The Company recorded a "Gain on sale of securities of equity investment" of approximately \$6.6 million.

As of December 31, 2007, Microvision owned 36,000 shares of Lumera common stock, recorded at fair market value. The shares of common stock are recorded as "Investment securities, available-for-sale".

As of December 31, 2006, Microvision owned 1,750,000 shares of Lumera common stock, recorded at fair market value. The shares were pledged as collateral for the Company's Notes. The shares of common stock were recorded as "Current restricted investments".

The cost, net unrealized gain and estimated fair market value of the shares of Lumera common stock as of December 31, 2007, are shown below:

	Cost	Net Unrealized Gain	Estimated Fair Value
	-----	-----	-----
Lumera common stock	\$ 43,000	\$ 52,000	\$ 95,000
	=====	=====	=====

Warrant

In connection with the change in accounting from equity to cost basis in January 2006, the Company recorded \$476,000 in "Other current assets" for the fair value of a warrant previously received to purchase 170,500 shares of Lumera common stock at an exercise price of \$8.80 per share. On the transaction date, the warrant was valued using the Black-Scholes option pricing model with the following assumptions: expected volatility of 83%; expected dividend yield of 0%; risk free interest rate of 4.6%; and contractual life of 5.1 years.

At December 31, 2007, the warrant was revalued using the Black-Scholes option pricing model with the following assumptions; expected volatility of 83%; expected dividend yield of 0%; risk free interest rate of 3.1%; and contractual life of 3.2 years. The fair value of the warrant decreased to \$130,000 at December 31, 2007 from \$595,000 at December 31, 2006 and the change in value of \$465,000 was recorded as a non-operating loss and is included in "Gain (loss) on derivative instruments, net" in the consolidated statement of operations.

10. Long-term Notes

The following table summarizes the activity in 2007 and 2006 related to the issuance of convertible notes (in thousands):

	Notes	Warrants	Embedded derivative feature
	-----	-----	-----
Balances at December 31, 2005	9,343	3,452	1,368
Principal payments on notes	(11,567)		
Discount accretion for the year ended December 31, 2006	4,642		
Changes in market value for the year ended December 31, 2006		(880)	(1,300)
Balances at December 31, 2006	2,418	2,572	68
Principal payments on notes	(2,767)		
Discount accretion for the year ended December 31, 2007	349		
Changes in market value for the year ended December 31, 2007		85	(68)
	-----	-----	-----

Edgar Filing: MICROVISION INC - Form 10-K

Balances at December 31, 2007

\$ -- \$ 2,657 \$ -- \$
=====

In March 2007, the Company made the final scheduled payments in connection with its March and December convertible notes as follows:

- cash payments of \$1,400,000 in principal and \$28,000 in interest, and
- issued 459,000 shares of its common stock in payment of \$1,367,000 in principal and \$21,000 in interest.

March Notes

In March 2005, the Company raised \$10,000,000, before issuance costs of \$423,000, from the issuance of convertible March Notes ("March Notes") and warrants to purchase an aggregate of 462,000 shares of Microvision common stock. The March Notes were convertible on demand by the holders into Microvision common stock at a conversion price of \$6.84 per share of Microvision common stock. The initial conversion price was subject to adjustment in the event Microvision issued common stock or common stock equivalents at a price per share of common stock below the conversion price of the March Notes. Due to below market issuances of Company's common stock, the conversion price of the March Notes at December 31, 2006 was \$5.17 per share of common stock. In addition, upon the request of the Note holders, the Company was required to redeem the March Notes for cash upon a change of control or an event of default at a redemption price equal to 125% of the then outstanding balance of the March Notes. The Company had pledged 1,750,000 shares of its Lumera common stock as collateral for the March Notes and the December Notes described below.

The terms of the March Notes included interest at LIBOR plus 3.0% payable quarterly in cash or Microvision common stock, at the election of the Company, subject to certain conditions. If the Company chose to pay interest in Microvision common stock as opposed to cash, the price was based on 92% of the arithmetic average of the volume weighted average prices for the 10 trading days prior to the payment date. The March Notes were payable in six equal quarterly installments beginning in December 2005. The Company could, subject to certain conditions, elect to make the principal payments in common stock in lieu of cash. If the Company elected to pay principal in common stock, the Note holders could have elected to receive Microvision or Lumera common stock. Payment in stock would have been issued at a 10% discount to the arithmetic average of the volume weighted average prices for the 15 trading days prior to the payment date.

The Company concluded that the note holders' right to convert all or a portion of the March Notes into Microvision or Lumera common stock was an embedded derivative instrument as defined by FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("FAS 133"). Accordingly, \$2,955,000 of the cash proceeds were allocated to the embedded derivative instrument, which represented the fair value of the instrument on the date of issuance. The derivative instrument was valued using the higher of the Microvision or Lumera conversion feature.

The warrants issued with the March Notes vested on the date of grant, have an exercise price of \$6.84 per common share and expire in March 2010. The initial exercise price is subject to adjustment in the event Microvision issues common stock or common stock equivalents at a price per share of common stock below the exercise price of the warrant. Due to below market issuances of the Company's common stock the exercise price of the warrants issued with the March Notes was \$5.85 as of December 31, 2007. The warrants met the definition of a derivative instrument that must be accounted for as a liability under the provisions of Emerging Issues Task Force Issue No. 00-19, "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock," because the Company cannot engage in certain corporate transactions affecting the common stock unless it makes a cash payment to the holders of the warrants. Accordingly, \$1,651,000 of the cash proceeds were allocated to the warrants, which represents the fair value of the warrants on the date of issuance and the amount was recorded as a current liability. Subsequent changes in the fair value of the warrants will be recorded in the statement of operations each period.

In July 2005, the Company entered into an agreement to amend the March Notes. In connection with the amendment, the Company issued three year warrants to purchase 750,000 shares of Microvision common stock at an exercise price of \$6.84 per share. The conversion price of the amended March Notes and exercise price of the warrants are subject to anti-dilution adjustments, subject to conditions. In addition, the price at which the note holders can convert the March Notes to Microvision common stock was reduced to \$5.85 per share, and the price at which the Company can mandatorily convert the March Notes to Microvision common stock was reduced to \$10.24. The note holders may convert all or a portion of their March Notes.

The amended conversion feature continued to meet the definition of a derivative under FAS 133 and accordingly has been recorded at fair value and included within long-term liabilities. The carrying amount of the derivative is adjusted to fair value at each balance sheet date. The adjustments for the years ended December 31, 2007 and 2006 were \$7,000 and \$323,000, respectively. The adjustments were recorded in "Gain (loss) on derivative instrument instruments, net" in the statement of operations.

The combined liability for both the initial warrant and the additional warrant was valued at \$729,000 and \$883,000 at December 31, 2007 and 2006, respectively. The combined adjustments in value were \$154,000, \$390,000 and \$2,672,000 for the years ended December 31, 2007, 2006 and 2005, respectively. The warrants were valued using the Black-Scholes option pricing model with the following assumptions: expected volatilities of 67%, 67% and 58% to 65%; expected dividend yields of 0%; risk free interest rates ranging from 3.05% to 3.07%, 4.74% to 4.90% and 4.36% to 4.39%; and contractual lives ranging from 0.6 to 2.2 years, 1.6 to 3.2 years and 2.6 to 4.2 years at December 31, 2007, 2006 and 2005, respectively.

December Notes

In December 2005, the Company raised \$10,000,000, before issuance costs of \$134,000, from the issuance of notes ("December Notes"), 838,000 shares of common stock and warrants to purchase an aggregate of 1,089,000 shares of Microvision common stock. The December Notes were convertible on demand by the holders into Microvision common stock at a conversion price of \$3.94 per share. The note holders had the right to convert all or a portion of their December Notes. In addition, upon the request of the note holders, the Company was required to redeem the notes for cash upon a change of control or an event of default at a redemption price equal to 125% of the then outstanding balance of the December Notes. The Company had pledged 1,750,000 shares of its Lumera common stock as collateral for the December Notes and the notes issued as of March 2005 ("March Notes") described above. Those shares have been classified as a "Current restricted investments" on the Company's consolidated balance sheet.

The terms of the December Notes included interest at LIBOR plus 3.0%, provided that the interest rate should not be less than 6% or greater than 8% payable quarterly in cash or Microvision common stock if the stock price was greater than \$4.06 per share, at the election of the Company, subject to certain additional conditions. If the Company chose to pay interest in Microvision common stock as opposed to cash, the price was based on 90% of the arithmetic average of the volume weighted average prices for the 20 trading days prior to the payment date. The December Notes were payable in five equal quarterly installments beginning in March 2006. The Company could have elected to make the principal payments in common stock in lieu of cash if the stock price was greater than \$4.06 per share, subject to certain other conditions. If the Company elected to pay principal in stock, the stock would have been issued at a 10% discount to the arithmetic average of the volume weighted average prices for the 15 trading days prior to the payment date.

The Company concluded that the note holders' right to convert all or a portion of the December Notes into Microvision common stock was an embedded derivative instrument as defined by FASB Statement No. 133, "Accounting for Derivative Instruments and Hedging Activities" ("FAS 133"). Accordingly, \$1.1 million of the cash proceeds were allocated to the embedded derivative instrument, which represented the fair value of the instrument on the date of issuance. The changes in value for the years ended December 31, 2007 and 2006 of \$60,000 and \$978,000 were recorded as non-operating gains and included in "Gain (loss) on derivative features of note payable" in the

consolidated statement of operations.

The warrants issued with the December Notes vested on the date of grant, have an exercise price of \$3.94 per share of common stock share and expire in December 2010. The warrants met the definition of a derivative instrument that must be accounted for as a liability under the provisions of Emerging Issues Task Force Issue No. 00-19, "Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company's Own Stock," because the Company cannot engage in certain corporate transactions affecting the common stock unless it makes a cash payment to the holders of the warrants. Accordingly, \$2.2 million of the cash proceeds were allocated to the warrants, which represents the fair value of the warrants on the date of issuance and the amount was recorded as a current liability. Subsequent changes in the fair value of the warrants will be recorded in the statement of operations each period.

The liability for the warrants was valued at \$1,928,000 and \$1,689,000 at December 31, 2007 and 2006, respectively. The adjustments in value were \$239,000 and \$490,000 during the years ended December 31, 2007 and 2006, respectively. The warrants were valued using the Black-Scholes option pricing model with the following assumptions: expected volatilities of 67%; expected dividend yields of 0%; risk free interest rates of 3.07% and 4.72%; and contractual lives of 2.9 and 3.9 years at December 31, 2007 and 2006, respectively.

The Microvision common stock was valued at the closing price on the date of closing of \$3.60 per share. Aggregate proceeds of \$3.0 million were allocated to the common stock. The remaining gross proceeds of \$3.7 million were allocated to the notes.

11. Common stock

On June 21, 2007, the Company exercised its right to call its publicly traded warrants. The Company received \$34,092,000 from the exercise of 12,855,000 publicly traded warrants.

In November 2006, the Company raised \$7.9 million, before issuance costs of \$779,000, through an underwritten public offering of 3,318,000 shares of our common stock.

In June and July 2006, the Company raised an aggregate of \$27.1 million, before issuance costs of \$2.2 million, through an underwritten public offering of 11.6 million shares of our common stock and warrants to purchase 12.4 million shares of our common stock. The warrants have an exercise price of \$2.65 per share, a five year term, and are not exercisable for one year from the date of issuance. The warrants are callable after one year from the date of issuance if the average closing bid price of our stock is over \$5.30 for any 20 consecutive trading days. In connection with the offering, the Company issued the underwriter a warrant to purchase 537,500 shares of Microvision common stock at an exercise price of \$2.76 per share. The Company also issued the underwriter a warrant to acquire 537,500 warrants, identical to those sold in the offering, at an exercise price of \$0.16 per warrant. Both warrants will be exercisable for a period of 4 years beginning on the first anniversary of the date of issuance.

12. Warrants

On June 21, 2007, the Company exercised its right to call its publicly traded warrants. The Company received \$34,092,000 from the exercise of 12,855,000 publicly traded warrants.

In addition, 45,000 warrants expired unexercised.

The following summarizes activity with respect to Microvision common stock warrants during the three years ended December 31, 2007:

Warrants to purchase	Weighted- average
-------------------------	----------------------

Edgar Filing: MICROVISION INC - Form 10-K

	common Shares	exercise price
Outstanding at December 31, 2004	1,718,000	\$ 13.76
Granted:

Edgar Filing: MICROVISION INC - Form 10-K

\$6.50	507,000	0.18	6.50	507,000	6.50
\$34.00	200,000	2.61	34.00	200,000	34.00
	-----			-----	
\$2.76-\$34.00	4,064,000			4,064,000	
	=====			=====	

The fair value of the Microvision common stock warrants granted was estimated on the date of grant using the Black-Scholes option pricing model with the following weighted-average assumptions used for grants in 2007, 2006 and 2005, respectively: dividend yield of zero percent for all years; expected volatility of 47%, 65% and 70%; risk-free interest rates of 4.9%, 5.0%, and 4.2% and expected lives of 0.3, 5 and 4 years, respectively.

13. Share-Based Compensation

Stock Option Exchange

Subject to the terms of its tender offer filed in April 2006, on May 17, 2006, the Company exchanged 2.2 million existing options for 2.2 million new options affecting 105 employees. The new options have an exercise price of \$2.77. The new options vested 25% on the grant date and will vest 25% on each subsequent annual anniversary. The tender offer did not result in the acceleration of vesting of any options. The new options have the same expiration dates as the options exchanged. The Company also adjusted the exercise price of 386,000 options not subject to the tender offer to \$2.77 on the same date affecting 19 employees.

The tender offer was accounted for in accordance with FAS 123(R). The Company will recognize the \$496,000 incremental fair value of the modified options over the value of the options prior to modification, as determined on the modification date, as additional non-cash compensation. The incremental expense is recognized ratably over the vesting periods of the options, 25% on the grant date with the remaining 75% straight-line over the remaining vesting period. The incremental fair value of the modified options was estimated using the Black-Scholes option pricing model with the following assumptions.

	Pre- modification	Post- modification
	-----	-----
Weighted average:		
Exercise price	\$ 8.84	\$ 2.77
Volatility	73%	65%
Expected term (years)	6.9	4.2
Risk free rate	5.0%	5.0%
Pre-vest forfeiture rate	5.0%	5.0%

Share-based Compensation Prior to Adopting Statement of Financial Accounting Standards No. 123, as revised December 2004 ("FAS 123(R)") on January 1, 2006

Prior to January 1, 2006, the Company accounted for stock-based employee compensation arrangements in accordance with the provisions of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* ("APB 25") and related amendments and interpretations including the Financial Accounting Standards Board Interpretation No. 44, *Accounting for Certain Transactions Involving Stock Compensation* ("FIN 44"), and complied with the disclosure provisions of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* ("FAS 123"). The Company accounts for equity instruments issued to non-employees in accordance with the provisions of FAS 123 and Emerging Issues Task Force Issue No. 96-18, *Accounting for Equity Instruments That Are Issued to Other Than Employees for Acquiring, or in Conjunction with Selling, Goods or Services* ("EITF 96-18").

Edgar Filing: MICROVISION INC - Form 10-K

If compensation expense for employee and director options had been determined using the fair values at the grant dates consistent with the methodology prescribed under FAS 123 in 2005, the Company's consolidated net loss available to common shareholders and associated net loss per share would have increased to the pro forma amounts shown below (in thousands):

	Year Ended December 31, 2005

Net loss available for common shareholders, as reported	\$ (30,284)
Add: Stock-based employee compensation expense included in net loss available for common shareholders, as reported	94
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards	(1,931)

Net loss available for common shareholders, pro forma	\$ (32,121)
	=====
Net loss per share as reported	\$ (1.35)
	=====
Basic and diluted pro forma	\$ (1.43)
	=====

Adoption of FAS 123(R)

The Company adopted Statement of Financial Accounting Standards No. 123, as revised December 2004 ("FAS 123(R)") effective January 1, 2006. FAS 123(R) requires all employee share-based awards granted after the effective date to be valued at fair value, and to be expensed over the applicable vesting period. In addition, companies must begin recognizing compensation expense related to any awards that are not fully vested as of the adoption date. Compensation expense for such unvested employee awards will be measured based on the fair value of the awards as previously calculated and inter-period attribution method used in developing the pro forma disclosures in accordance with the provisions of FAS 123. The valuation of and accounting for share-based awards include a number of complex and subjective estimates. These estimates include, but are not limited to, the future volatility of our stock price, future employee stock option exercise behaviors and future employee terminations.

The Company adopted the Modified Prospective Application ("MPA") method to account for the transition from Accounting Principles Board Opinion No. 25 - Accounting for Stock Issued to Employees ("APB 25") and FAS 123 to FAS 123(R). As prescribed by MPA, the Company will not restate prior period financial statements. Under guidance contained in APB 25 and FAS 123, the Company had accounted for award forfeitures as they occur. Under FAS 123(R), the Company estimates the forfeiture rate on the grant date and adjusts the estimate through the vesting date. The Company has made a policy decision to change its share-based compensation expense attribution method for grants made on or after the adoption date to use the straight-line method. The accelerated expense attribution method under Financial Accounting Standards Board Interpretation No. 28 ("FIN 28") will continue to be applied for outstanding grants not vested as of the FAS 123(R) adoption date. Upon adopting FAS 123(R), the Company reversed \$85,000 of unamortized deferred compensation as of December 31, 2005 against additional paid in capital.

As a result of adopting FAS 123(R), the Company's net loss for each of the years ended December 31, 2007 and December 31, 2006 was \$1.8 million greater than had it continued to account for share-based employee compensation under APB 25. In addition, basic and diluted net loss per share was greater by \$0.04 per share.

The share-based employee compensation cost charged against loss was as shown below (in thousands):

Year Ended December 31,

	2007	2006	2005
Share-based employee compensation cost charged against loss	\$ 1,797	\$ 1,825	\$ 1,825

Description of Incentive Plans

The Company currently has two incentive plans ("Incentive Plans") that have been approved by shareholders. Both Incentive Plans are administered by the Board of Directors, or its designated committee ("Plan Administrator"), and provide for various awards as determined by the Plan Administrator.

In July 2006, the 1996 Stock Option Plan (the "1996 Plan") expired. In September 2006, Company shareholders approved the 2006 Microvision, Inc. Incentive Plan which amends, restates and renames the 1996 Plan ("2006 Incentive Plan"). All awards outstanding under the 1996 Plan remain outstanding under the 2006 Incentive Plan. The 2006 Incentive Plan retained the 8.0 million share authorization that was under the 1996 Plan and permits granting non-qualified stock options ("NSOs"), incentive stock options ("ISOs"), stock appreciation rights, restricted or unrestricted stock, deferred stock, other share-based awards, or cash awards to employees, officers and certain non-employees of the Company. Any award may be a performance-based award. Awards granted under the 2006 Incentive Plan have generally been to employees under non-qualified stock option agreements with the following provisions: exercise prices greater than or equal to the Company's closing stock price on the date of grant; vesting periods ranging from three years to four years; expiration 10 years from the date of grant; and optionees who terminate their service after vesting have a limited time to exercise their options (typically three to twelve months).

The Independent Director Stock Option Plan ("Director Option Plan") has 900,000 shares authorized and permits granting NSOs to independent directors of the Company. In June 2005, shareholders approved an amendment to the Director Option Plan, increasing the number of shares reserved for the plan by 400,000 to 900,000 shares. Under the Director Option Plan, upon initial election or appointment to the Board of Directors, Directors receive a fully vested option to purchase 15,000 shares of common stock and a second option to purchase 15,000 shares of common stock. Upon reelection to the Board, Directors receive a subsequent option to purchase 15,000 shares of common stock. The second initial option grant and any reelection grant vests the earlier of one year from date of grant or the day before the next regularly scheduled annual shareholder meeting. Grants awarded under the Director Option Plan generally, have the following terms: exercise price equal to the Company's closing stock price on the date of grant; expiration 10 years from the date of grant, and vested grants remain exercisable until their expiration dates if a director leaves the Board.

Options Valuation Methodology and Assumptions

The Company uses the Black-Scholes option valuation model to determine the fair value of the options and uses the closing price of its common stock as the fair market value of its stock on that date.

The Company considers historical stock price volatilities, volatilities of similar companies and other factors in determining its estimates of future volatilities.

The Company follows the guidance provided by Staff Accounting Bulletin No. 107 ("SAB 107") for estimating "plain vanilla" option lives. For "non plain vanilla" options, the Company uses historical lives, including post-termination exercise behavior, publications, comparable company estimates, and other factors as the basis for estimating expected lives.

Risk free rates are based on the U.S. Treasury Yield Curve as published by the U.S. Treasury.

Edgar Filing: MICROVISION INC - Form 10-K

The following table summarizes the weighted-average valuation assumptions and weighted-average grant date fair value of options granted, excluding grants issued under the Company's tender offer which require an incremental valuation methodology and are disclosed above, during the periods shown below:

	Year Ended December 31		
	2007	2006	2005
Assumptions (weighted average)			
Volatility	68%	72%	
Expected term (in years)	6.2	6.1	
Risk-free rate	5.0%	5.0%	
Expected dividends	--	--	
Pre-vest forfeiture rate	5.0%	5.0%	
Grant date fair value of options granted	\$ 2.67	\$ 2.26	\$

Options Activity and Positions

The following table summarizes activity and positions with respect to options for the year ended December 31, 2006:

Options	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contract Term (years)
Outstanding as of December 31, 2004	5,118,000	\$ 11.72	
Granted	574,000	5.33	
Exercised	(5,000)	4.03	
Forfeited or expired	(367,000)	10.99	
Outstanding at December 31, 2005	5,320,000	11.09	
Granted *	4,280,000	2.99	
Exercised	(16,000)	2.77	
Forfeited or expired *	(3,873,000)	9.62	
Outstanding as of December 31, 2006	5,711,000	6.04	
Granted	1,617,000	4.08	
Exercised	(84,000)	2.78	
Forfeited or expired	(1,790,000)	9.05	
Outstanding as of December 31, 2007	5,454,000	\$ 4.52	
Vested and expected to vest as of December 31, 2007	5,060,000	\$ 4.59	
Exercisable as of December 31, 2007	2,290,000	\$ 5.72	

* Includes 2.2 million shares exchanged pursuant to stock option exchange disclosed above

The total intrinsic value of options exercised during the years ended December 31, 2007, 2006 and 2005 were \$163,000, \$5,000 and \$9,000, respectively.

As of December 31, 2007, the Company's unamortized share-based compensation was \$4.8 million. The Company plans to amortize this share-based compensation cost over the next 2.5 years.

During 2006, the Board of Directors approved the immediate vesting of options to purchase 45,000 shares that had been issued to three independent directors. The directors subsequently resigned from the Board of Directors. The Company determined that the accelerated vesting was a modification of an award with a service vesting condition. The total fair value of each modified option was measured as the value of the original grant plus the value of the modified grant on its modification date. On the modification date, the total value of the modified awards was estimated to be \$91,000, of which \$84,000 was previously amortized, and the remaining value of \$7,000 was immediately expensed as compensation cost.

In July 2005, the Company granted options to purchase an aggregate of 300,000 shares of common stock at an exercise price of \$5.32 to an executive officer. The exercise price of the options was less than the fair market value of the shares on the date of grant. According to guidance in Accounting Principles Bulletin No. 25 ("APB 25"), the Company recorded \$144,000 of deferred compensation and amortized \$59,000 to compensation expense related to these options in 2005. Upon adopting FAS 123(R) on January 1, 2006, the Company reversed the remaining unamortized deferred compensation of \$85,000 to additional paid-in capital.

14. Commitments and contingencies

Agreements with the University of Washington ("UW")

In October 1993, the Company entered into a Research Agreement and an exclusive license agreement ("License Agreement") with the UW. The License Agreement grants the Company the rights to certain intellectual property, including the technology being subsequently developed under the Microvision research agreement ("Research Agreement"), whereby the Company has an exclusive, royalty-bearing license to make, use and sell or sublicense the licensed technology. In consideration for the license, the Company agreed to pay a one-time nonrefundable license issue fee of \$5,134,000. Payments under the Research Agreement were credited to the license fee. In addition to the nonrefundable fee, which has been paid in full, the Company is required to pay certain ongoing royalties. Beginning in 2001, the Company is required to pay the UW a nonrefundable license maintenance fee of \$10,000 per quarter, to be credited against royalties due.

Litigation

The Company is subject to various claims and pending or threatened lawsuits in the normal course of business. The Company is not currently party to any legal proceedings that management believes would have a material adverse effect on the Company's financial position, results of operations or cash flows. The Company has sued its former CEO and President Richard Rutkowski and his spouse to collect \$1,733,000 in outstanding loans from the Company that were due in January 2007 and remain unpaid. Counterclaims were filed by Mr. Rutkowski and his spouse, seeking to recover damages in an amount in excess of \$15,000,000. The Company believes these claims are without merit and intends to defend them vigorously. However, an adverse outcome could have a material adverse affect on its financial condition.

Lease commitments

The Company leases its office space and certain equipment under noncancelable capital and operating leases with initial or remaining terms in excess of one year.

Edgar Filing: MICROVISION INC - Form 10-K

The Company entered into a 90 month facility lease that commenced in February 2006. The lease includes extension and rent escalation provisions over the 90 month term of the lease. Rent expense will be recognized on a straight-line basis over the lease term.

Future minimum rental commitments under capital and operating leases for years ending December 31 are as follows:

	Capital leases	Operating leases
	-----	-----
2008	\$ 55,000	\$ 896,000
2009	49,000	852,000
2010	40,000	881,000
2011	8,000	905,000
2012	--	935,000
Thereafter	--	564,000
	-----	-----
Total minimum lease payments	152,000	\$ 5,033,000
		=====
Less: Amount representing interest	(20,000)	

Present value of capital lease obligations	132,000	
Less: Current portion	(44,000)	

Long-term obligation at December 31, 2007	\$ 88,000	
	=====	

The capital leases are collateralized by the related assets financed and by security deposits held by the lessors under the lease agreements. The cost and accumulated depreciation of equipment under capital leases was \$1,017,000 and \$886,000, respectively, at December 31, 2007 and \$1,017,000 and \$837,000, respectively, at December 31, 2006.

Net rent expense was \$830,000, \$1,082,000, and \$1,435,000 for 2007, 2006 and 2005, respectively. Sub-lease income of \$0, \$125,000 and \$575,000 for 2007, 2006 and 2005 respectively, was included as a reduction in rent expense.

Long-term debt

During 2006, the Company entered into a loan agreement with the lessor of the Company's corporate headquarters in Redmond to finance \$536,000 in tenant improvements. The loan carries a fixed interest rate of 9% per annum, is repayable over the initial term of the lease, which expires in 2013, and is secured by a letter of credit. The balance of the loan was \$458,000 at December 31, 2007.

Adverse purchase commitments

The Company has periodically entered into noncancelable purchase contracts in order to ensure the availability of materials to support Flic production. Management periodically assesses the need to provide for impairment on these purchase contracts and records a loss on purchase commitments when required. In December 2006, the Company recorded a loss of \$310,000 to cost of product revenue as a result of commitments to purchase materials for the Flic scanner that are in excess of our estimated future proceeds from the sale of the Flic scanners.

15. Income taxes

A provision for income taxes has not been recorded for 2007, 2006 and 2005 due to the valuation allowances placed against the net operating losses and deferred tax assets arising during such periods. A valuation allowance has been recorded for all deferred tax assets because based on the Company's history of losses since inception, the available objective evidence creates sufficient uncertainty regarding the realizability of the deferred tax assets.

Edgar Filing: MICROVISION INC - Form 10-K

At December 31, 2007, Microvision has net operating loss carry forwards of approximately \$200.0 million, for federal income tax reporting purposes. In addition, Microvision has research and development tax credits of \$3.6 million. The net operating loss carry forwards and research and development credits available to offset future taxable income, if any, will expire in varying amounts from 2008 to 2027 if not previously utilized. In certain circumstances, as specified in the Internal Revenue Code, a 50% or more ownership change by certain combinations of the Company's stockholders during any three-year period would result in limitations on the Company's ability to utilize its net operating loss carry-forwards. The Company has determined that such a change occurred during 1995 and the annual utilization of loss carry-forwards generated through the period of that change will be limited to approximately \$761,000. An additional change occurred in 1996; and the limitation for losses generated in 1996 is approximately \$1,600,000.

Deferred tax assets are summarized as follows:

	December 31,	
	2007	2006
Deferred tax assets, current		
Reserves	\$ 2,460,000	\$ 2,408,000
Other	712,000	375,000
Total gross deferred tax assets, current	3,172,000	2,783,000
Deferred tax assets, noncurrent		
Net operating loss carryforwards	68,658,000	66,152,000
R&D credit carryforwards	3,601,000	2,894,000
Depreciation/amortization deferred	10,848,000	7,837,000
Other	2,581,000	1,870,000
Total gross deferred tax assets, noncurrent	85,688,000	78,753,000
Deferred tax liabilities, noncurrent		
Loss in equity subsidiary	--	(2,436,000)
Convertible debt	(1,209,000)	(2,535,000)
Total gross deferred tax liabilities, noncurrent	(1,209,000)	(4,971,000)
Net deferred taxes before valuation allowance	87,651,000	76,565,000
Less: Valuation allowance	(87,651,000)	(76,565,000)
Deferred tax assets	\$ --	\$ --

The valuation allowance and the research and development credit carry forwards account for substantially all of the difference between the Company's effective income tax rate and the Federal statutory tax rate of 34%.

Certain net operating losses arise from the deductibility for tax purposes of compensation under nonqualified stock options equal to the difference between the fair value of the stock on the date of exercise and the exercise price of the options. For financial reporting purposes, the tax effect of this deduction when recognized is accounted for as a credit to shareholders' equity.

The Company adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007. The Company did not have any unrecognized tax benefits which would require an adjustment to the January 1, 2007 beginning balance of retained earnings. The Company did not have any unrecognized tax benefits at

January 1, 2007 and at December 31, 2007.

The Company recognizes interest accrued and penalties related to unrecognized tax benefits in tax expense. During the years ended December 31, 2007 and 2006 the Company recognized no interest and penalties.

The Company files income tax returns in the U.S. federal jurisdiction and various states. The tax years 2004-2006 generally remain open to examination by major taxing jurisdictions to which the Company is subject.

16. Retirement savings plan

The Company has a retirement savings plan ("the Plan") that qualifies under Internal Revenue Code Section 401(k). The Plan covers all qualified employees. Contributions to the Plan by the Company are made at the discretion of the Board of Directors.

In February 2000, the Board of Directors approved a plan amendment to match 50% of employee contributions to the Plan up to 6% of the employee's per pay period compensation, starting on April 1, 2000. During 2007, 2006 and 2005, the Company contributed \$295,000, \$308,000 and \$321,000, respectively, to the Plan under the matching program.

17. Segment Information

The accounting policies used to derive reportable segment results are described in Note 2, "Summary of Significant Accounting Policies."

From inception in 2000 to July 2004, Lumera was a consolidated subsidiary and treated as a separate segment within Microvision. Subsequent to July 2004, Lumera became an equity method investment. Since July 2004, Microvision has operated as one segment.

At January 31, 2006 and December 31 2005, Lumera was a significant unconsolidated equity investment of Microvision. For the one month period ended January 31, 2006, Lumera revenue was \$168,000, gross profit was \$82,000, loss from operations was \$1,109,000 and net loss was \$1,040,000. For 2005, Lumera revenue was \$1,509,000, gross profit was \$587,000, loss from operations was \$11,108,000 and net loss was \$10,453,000.

18. Quarterly Financial Information (Unaudited)

The following table presents the Company's unaudited quarterly financial information for the years ending December 31, 2007 and 2006:

	Year Ended December 31, 2007			
	December 31,	September 30,	June 30,	March 31,
Revenue	\$ 2,988,000	\$ 2,599,000	\$ 2,662,000	\$ 2,235,000
Gross Margin	1,092,000	846,000	999,000	941,000
Net loss available for common shareholde	(6,022,000)	(4,718,000)	(2,155,000)	(6,892,000)
Net loss per share basic and diluted	(0.11)	(0.08)	(0.05)	(0.16)
	Year Ended December 31, 2006			
	December 31,	September 30,	June 30,	March 31,
Revenue	\$ 1,842,000	\$ 823,000	\$ 1,906,000	\$ 2,472,000
Gross Margin	(181,000)	(195,000)	(774,000)	27,000
Net loss available for common shareholde	(8,681,000)	(7,692,000)	(11,215,000)	331,000

Edgar Filing: MICROVISION INC - Form 10-K

Net loss per share basic and diluted	(0.21)	(0.20)	(0.38)	0.01
--------------------------------------	--------	--------	--------	------

During 2006, the Company recorded inventory write-offs and adverse purchase commitments of \$1,491,000, of which \$900,000 was during the quarter ended December 31, 2006.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have been no changes in or disagreements with accountants in accounting or financial disclosure matters during the Company's fiscal years ended December 31, 2007 and 2006.

ITEM 9A. CONTROLS AND PROCEDURES

(a) *Evaluation of disclosure controls and procedures.* Our Chief Executive Officer ("CEO") and the Chief Financial Officer ("CFO") evaluated our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended (the "Exchange Act"), prior to the filing of this Form 10-K. Based on that evaluation, our CEO and CFO concluded that, as of December 31, 2007, our disclosure controls and procedures were, in design and operation effective.

(b) *Management's Report on Internal Control Over Financial Reporting.* Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Our management conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on its evaluation under the framework in *Internal Control - Integrated Framework*, our management concluded that our internal control over financial reporting was effective as of December 31, 2007.

The effectiveness of our internal control over financial reporting as of December 31, 2007 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their attestation report, which is included in Item 8 of this Annual Report on Form 10-K under the heading "Report of Independent Registered Public Accounting Firm."

(c) *Changes in internal controls over financial reporting.* There have not been any changes in the Company's internal control over financial reporting during the quarter ended December 31, 2007 which have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE.

Information regarding executive officers is included in Part I of this Annual Report on Form 10-K in Item 4A. The information required by this Item and not provided in Item 4A will appear under the caption "Discussion of Proposals Recommended by the Board" in the Proxy Statement, which section is incorporated in this Item by reference. The Proxy Statement will be filed prior to the Company's annual shareholders' meeting scheduled to be held on June 25, 2008.

ITEM 11. EXECUTIVE COMPENSATION.

The information required by this Item will appear under the captions "Executive Compensation," "Compensation Committee Interlocks and Insider Participation" and "Director Compensation for 2007" in the Proxy Statement, which sections are incorporated in this Item by reference.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS.

Information as of December 31, 2007 regarding equity compensation plans approved and not approved by stockholders is summarized in the following table:

Plan Category	Equity Compensation Plans	
	Number of securities to be issued upon exercise of outstanding options, warrants and rights (a)	Weighted-average exercise price of outstanding options, warrants and rights (b)
Equity compensation plans approved by shareholders	5,453,000	\$ 4.5
Equity compensation plans not approved by shareholders	233,000	29.7
Total	5,686,000	\$ 5.5

In August 2000, the Company issued two non-plan warrants to purchase an aggregate of 200,000 shares of Microvision common stock to two consultants in connection with entering into certain consulting agreements with the Company. Subsequently, one of the consultants was elected to the Board of Directors by shareholders. The warrants were fully exercisable as of December 31, 2007. The warrants have an exercise price of \$34.00 per share and are exercisable prior to their expiration in August 2010. As of the date of grant, all but 25,000 of the underlying shares of

common stock issuable to each consultant upon exercise of the warrants were subject to lock-up restrictions that prevent the holder from transferring such shares. The number of shares subject to the lock-up restrictions is reduced by 25,000 for each consultant on each June 7 subsequent to the grant date. Rather than issue shares of common stock upon exercise of the warrants, the Company may elect to redeem the warrants if, in the opinion of the Board of Directors upon advice of counsel, it would be unlawful to issue the underlying securities. The warrants are transferable upon prior written approval of the Company. The Company cannot unreasonably withhold such approval with respect to transfers of warrants to purchase at least 10,000 shares that are not subject to the lock-up restrictions. If the Company terminates the consulting agreement due to the consultant's failure to provide consulting services during the first three years of the agreement, the consultant must return to the Company a pro-rata portion of the 75,000 warrants initially subject to the lock-up restrictions based on the number of calendar days remaining in the initial three year period. The number, class and price of securities for which the warrants may be exercised are subject to adjustment for certain changes in the Company's capital structure. The number of securities and exercise price per share will be proportionately adjusted if outstanding shares of the Company's common stock are divided into a greater number of shares or combined into a smaller number of shares, or a stock dividend is paid on the common stock. In the event of a change in the common stock from a merger, consolidation, reclassification, reorganization, partial or complete liquidation, or other change in the capital structure of the Company, the Company will, as a condition of the change in capital structure, make provision for the warrant holder to receive upon the exercise of the warrants the kind and amount of shares of stock, other securities or property to which the holder would have been entitled if, immediately prior to the change in capital structure, the warrant holder had held the number of shares of common stock obtainable upon the exercise of the warrants, and the exercise price will be proportionately adjusted.

In July 2005, Microvision issued a warrant to purchase 6,925 shares of common stock to a third party for services. The warrant is immediately exercisable, has an exercise price of \$5.32 per share, and expires in July 2010. The number and price of securities for which the warrant may be exercised are subject to adjustment for certain changes in the Company's capital structure. Where the outstanding shares of common stock are divided into a greater number of shares, combined into a smaller number of shares, or a stock dividend is paid on the common stock, the exercise price per share shall be proportionately adjusted by the ratio of common shares outstanding immediately before and after the transaction. In the event of a change in the common stock from a reorganization, reclassification, consolidation, or merger, the holder will be entitled to receive, upon the exercise of the warrants, the same amount and kind of securities, cash or property to which the holder would have been entitled if, immediately prior to the change in capital structure, the warrant holder had held the number of shares of common stock obtainable upon the exercise of the warrants.

In February 2007, Microvision issued a warrant to purchase 25,000 shares of common stock to a third party for services. The warrant is immediately exercisable, has an exercise price of \$3.42 per share, and expires in February 2012. The number and price of securities for which the warrant may be exercised are subject to adjustment for certain changes in the Company's capital structure. Where the outstanding shares of common stock are divided into a greater number of shares, combined into a smaller number of shares, or a stock dividend is paid on the common stock, the exercise price per share shall be proportionately adjusted by the ratio of common shares outstanding immediately before and after the transaction. In the event of a change in the common stock from a reorganization, reclassification, consolidation, or merger, the holder will be entitled to receive, upon the exercise of the warrants, the same amount and kind of securities, cash or property to which the holder would have been entitled if, immediately prior to the change in capital structure, the warrant holder had held the number of shares of common stock obtainable upon the exercise of the warrants.

The other information required by this Item will appear under the caption "Information About Microvision Common Stock Ownership" in the Proxy Statement, which section is incorporated in this Item by reference.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE.

The information required by this Item will appear under the captions "Certain Relationships and Related Transactions" and "Board Meetings and Committees" in the Proxy Statement, which sections are incorporated in this Item by reference.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES.

The information required by this Item will appear under the caption "Independent Registered Public Accounting Firm" in the Proxy Statement, which section is incorporated in this Item by reference.
