UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2018

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from ____ to ____

Commission File Number 1-12273

ROPER TECHNOLOGIES, INC.
(Exact name of Registrant as specified in its charter)

Delaware 51-0263969
(State or other jurisdiction of incorporation or organization) (I.R.S. Employer Identification No.)

6901 Professional Parkway East, Suite 200
Sarasota, Florida 34240
(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code: (941) 556-2601

SECURITIES REGISTERED PURSUANT TO SECTION 12(b) OF THE ACT:

Title of Each Class	Name of Each Exchange On Which Registered
Common Stock, \$0.01 Par Value	New York Stock Exchange

SECURITIES REGISTERED PURSUANT TO SECTION 12(g) OF THE ACT: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.
☒ Yes ☐ No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934. ☐ Yes ☒ No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. ☒ Yes ☐ No
Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T

Edgar Filing: ROPER TECHNOLOGIES INC - Form 10-K

(§223.405) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). ☐ Yes ☐ No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company (as defined in Rule 12b-2 of the Exchange Act). ☐ Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☐ Emerging growth company

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark if the registrant is a shell company (as defined in Rule 12-b2 of the Act). Yes ☐ No ☐

Based on the closing sale price on the New York Stock Exchange on June 29, 2018, the aggregate market value of the voting and non-voting common stock held by non-affiliates of the registrant was: \$27,931,518,465.

Number of shares of registrant's Common Stock outstanding as of February 15, 2019: 103,607,782.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Proxy Statement to be furnished to Stockholders in connection with its Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K.

Information About Forward-Looking Statements

This Annual Report on Form 10-K (“Annual Report”) includes and incorporates by reference “forward-looking statements” within the meaning of the federal securities laws. In addition, we, or our executive officers on our behalf, may from time to time make forward-looking statements in reports and other documents we file with the U.S. Securities and Exchange Commission (“SEC”) or in connection with oral statements made to the press, potential investors or others. All statements that are not historical facts are “forward-looking statements.” Forward-looking statements may be indicated by words or phrases such as “anticipate,” “estimate,” “plans,” “expects,” “projects,” “should,” “will,” “believes” or “intends” and similar words and phrases. These statements reflect management’s current beliefs and are not guarantees of future performance. They involve risks and uncertainties that could cause actual results to differ materially from those expressed or implied in any forward-looking statement.

Examples of forward-looking statements in this report include but are not limited to statements regarding operating results, the success of our operating plans, our expectations regarding our ability to generate cash and reduce debt and associated interest expense, profit and cash flow expectations, the prospects for newly acquired businesses to be integrated and contribute to future growth and our expectations regarding growth through acquisitions. Important assumptions relating to the forward-looking statements include, among others, demand for our products, the cost, timing and success of product upgrades and new product introductions, raw material costs, expected pricing levels, expected outcomes of pending litigation, competitive conditions and general economic conditions. These assumptions could prove inaccurate. Although we believe that the estimates and projections reflected in the forward-looking statements are reasonable, our expectations may prove to be incorrect. Important factors that could cause actual results to differ materially from estimates or projections contained in the forward-looking statements include, but are not limited to:

- general economic conditions;
- difficulty making acquisitions and successfully integrating acquired businesses;
- any unforeseen liabilities associated with future acquisitions;
- limitations on our business imposed by our indebtedness;
- unfavorable changes in foreign exchange rates;
- failure to effectively mitigate cybersecurity threats;
- difficulties associated with exports;
- risks and costs associated with our international sales and operations;
- rising interest rates;
- product liability and insurance risks;
- increased warranty exposure;
- future competition;
- the cyclical nature of some of our markets;
- reduction of business with large customers;
- risks associated with government contracts;
- changes in the supply of, or price for, raw materials, parts and components;
- environmental compliance costs and liabilities;
- risks and costs associated with asbestos-related litigation;
- potential write-offs of our goodwill and other intangible assets;
- our ability to successfully develop new products;
- failure to protect our intellectual property;
- the effect of, or change in, government regulations (including tax);
- economic disruption caused by terrorist attacks, health crises or other unforeseen events; and
- the factors discussed in Item 1A to this Annual Report under the heading “Risk Factors.”

We believe these forward-looking statements are reasonable. However, you should not place undue reliance on any forward-looking statements, which are based on current expectations. Further, forward-looking statements speak only as of the date they are made, and we undertake no obligation to publicly update any of them in light of new information or future events.

PART I

ITEM 1. BUSINESS

All currency amounts are in millions unless specified

Our Business

Roper Technologies, Inc. (“Roper,” the “Company,” “we,” “our” or “us”) is a diversified technology company. We operate businesses that design and develop software (both license and software-as-a-service) and engineered products and solutions for a variety of niche end markets.

We pursue consistent and sustainable growth in earnings and cash flow by emphasizing continuous improvement in the operating performance of our existing businesses and by acquiring other businesses that offer high value-added software, services, engineered products and solutions that we believe are capable of achieving growth and maintaining high margins. We compete in many niche markets and believe we are the market leader or a competitive alternative to the market leader in most of these markets.

We were incorporated on December 17, 1981 under the laws of the State of Delaware.

Market Share, Market Expansion, and Product Development

Leadership with Engineered Content for Niche Markets - We maintain a leading position in many of our markets. We believe our market positions are attributable to the technical sophistication of our products and software, the applications expertise used to create our advanced products and systems, and our distribution and service capabilities. Our operating units grow their businesses through new product development and development of new applications and services to satisfy customer needs. In addition, our operating units grow our customer base by expanding our access to customers and entering adjacent markets.

Diversified End Markets and Geographic Reach - We have a global presence, with sales to customers outside the U.S. totaling \$1.5 billion in 2018. Information regarding our international operations is set forth in Note 13 of the Notes to Consolidated Financial Statements included in this Annual Report.

Research and Development - We conduct applied research and development to improve the quality and performance of our products and to develop new technologies and products. Our research and development spending was \$317 in 2018 as compared to \$281 and \$195 in 2017 and 2016, respectively.

Our Business Segments

Our operations are reported in four segments based upon common customers, markets, sales channels, technologies and common cost opportunities. The segments are: RF Technology, Medical & Scientific Imaging, Industrial Technology and Energy Systems & Controls. Financial information about our business segments is presented in Note 13 of the Notes to Consolidated Financial Statements included in this Annual Report.

RF Technology

Our RF Technology segment provides radio frequency identification (“RFID”) communication technology and software solutions. This segment had net revenues of \$2.17 billion for the year ended December 31, 2018, representing 41.8% of our total net revenues.

Comprehensive Application Management Software - We provide 1) enterprise software and information solutions for government contractors, professional services firms and other project-based businesses, 2) comprehensive management software solutions for law and other professional services firms, including business development, calendar/docket matter management, time and billing and case management, and 3) financial and compliance management software and solutions to large complex companies in asset-intensive industries.

Software-as-a-Service - We maintain electronic marketplaces that connect 1) available capacity of trucking units with the available loads of freight to be moved from location to location throughout North America, 2) food suppliers, distributors and vendors, primarily in the perishable food sector and 3) construction industry professionals.

Card Systems/Integrated Security Solutions - We provide software, card systems and integrated security solutions primarily to education and health care markets. We also provide an integrated nutrition management solution used by food service customers.

Toll and Traffic Systems - We manufacture and sell toll tags and monitoring systems as well as provide transaction and violation processing services for toll and traffic systems to both governmental and private sector entities. In addition, we provide intelligent traffic systems that assist customers in improving traffic flow and infrastructure utilization.

RFID Card Readers - We design, develop and manufacture RFID card readers that support most smart cards worldwide. The readers are used in numerous applications and OEM solutions including secure printing and single sign-on across several vertical markets including healthcare, manufacturing and government.

Metering and Remote Monitoring - We manufacture and sell meter reading, data logging and pressure control products for use primarily in water and gas applications. We also provide network monitoring, leakage reduction and pressure control services in water and gas distribution networks.

Medical and Scientific Imaging

Our Medical & Scientific Imaging segment offers products and software in medical applications, and high performance digital imaging products. For 2018, this segment had net revenues of \$1.52 billion, representing 29.3% of our total net revenues.

Medical Products and Software - We provide diagnostic and laboratory software solutions to healthcare providers and services and technologies to support the diverse and complex needs of alternate site health care providers who deliver services outside of an acute care hospital setting. We provide a cloud-based financial analytics and performance software platform to healthcare providers. We also manufacture and sell patient positioning devices and related software for use in radiation oncology and 3-D measurement technology in computer-assisted surgery, and we supply diagnostic and therapeutic disposable products used in ultrasound imaging for minimally invasive medical procedures. We design and manufacture a non-invasive instrument for portable ultrasound bladder volume measurement and a video laryngoscope designed to enable rapid intubation in difficult situations.

Digital Imaging Products and Software - We manufacture and sell extremely sensitive, high-performance electron filters, charged couple device ("CCD") and complementary metal oxide semiconductor ("CMOS") cameras, detectors and related software for a variety of scientific and industrial uses, which require high resolution and/or high speed digital video, including electron microscopy and spectroscopy applications. We sell these products for use within academic, government research, semiconductor, security and other end-user markets such as biological and material science. They are frequently incorporated into products by original equipment manufacturers ("OEMs").

Industrial Technology

Our Industrial Technology segment produces primarily water meter and meter reading technology, fluid handling pumps, and materials analysis solutions. For 2018, this segment had net revenues of \$900, representing 17.3% of our total net revenues.

Water Meter and Automatic Meter Reading Products and Systems - We manufacture and distribute water meter products serving the residential, commercial and industrial water management markets, and several lines of automatic meter reading products and systems serving these markets.

Fluid Handling Pumps - We manufacture and sell a wide variety of pumps. These pumps vary significantly in complexity and in pumping method employed, which allows for the movement and application of a diverse range of low and high viscosity liquids, high solids content slurries and chemicals. Our pumps are used in end markets such as

oil and gas, agricultural, water and wastewater, chemical and general industrial.

Materials Analysis Equipment and Consumables - We manufacture and sell equipment and supply consumables necessary to prepare material samples for testing and analysis. These products are used mostly within the material science, steel, automotive, electronics, mining and research end-user markets.

The Industrial Technology segment companies' revenues reflect a combination of standard products and specially engineered, application-specific products. Standard products are typically shipped within two weeks of receipt of order. Application-specific products typically ship within 6 to 12 weeks following receipt of order. However, larger project orders and blanket purchase orders for certain OEMs may extend shipment for longer periods.

Energy Systems & Controls

Our Energy Systems & Controls segment principally produces control systems, testing equipment, valves and sensors. For 2018, this segment had net revenues of \$600, representing 11.6% of our total net revenues.

Control Systems - We manufacture control systems and provide related engineering and commissioning services for turbomachinery applications, primarily in energy markets.

Fluid Properties Testing Equipment - We manufacture and sell test equipment to determine physical and elemental properties, such as sulfur and nitrogen content, flash point, viscosity, freeze point and distillation range of liquids and gases primarily for the petroleum industry.

Sensors, Controls and Valves - We manufacture sensors and control equipment including pressure sensors, temperature sensors, measurement instruments and control software for global rubber, plastics and process industries. We also manufacture and distribute valves, sensors, switches and control products used on engines, compressors, turbines and other powered equipment for the oil and gas, pipeline, power generation, marine engine and general industrial markets. Many of these products are designed for use in hazardous environments.

Non-destructive Inspection and Measurement Instrumentation - We manufacture non-destructive inspection and measurement solutions including measurement probes, robotics, vibration sensors, switches and transmitters. These solutions are applied principally in nuclear energy markets. Many of these products are designed for use in hazardous environments.

The Energy Systems & Controls segment companies' revenues reflect a combination of standard products and large engineered projects. Standard products generally ship within two weeks of receipt of order, and large engineered projects may have lead times of several months. As such, backlog may fluctuate depending upon the timing of large project awards.

Materials and Suppliers

We believe most materials and supplies we use are readily available from numerous sources and suppliers throughout the world. However, some components and sub-assemblies are currently available from a limited number of suppliers. Some high-performance components for digital imaging products can be in short supply and/or suppliers have occasional difficulty manufacturing such components to our specifications. We regularly investigate and identify alternative sources where possible, and we believe these conditions equally affect our competitors. Supply shortages have not had a material adverse effect on our revenues although delays in shipments have occurred following such supply interruptions.

Backlog

Our backlog includes only firm unfilled orders expected to be recognized as revenue within twelve months. Backlog was \$1.69 billion at December 31, 2018, and \$1.67 billion at December 31, 2017.

Distribution and Sales

Distribution and sales occur through direct sales offices, manufacturers' representatives and distributors. In addition, our Medical & Scientific Imaging segment also sells through value added resellers ("VARs") and OEMs.

Environmental Matters and Other Governmental Regulation

Our operations and properties are subject to laws and regulations relating to environmental protection, including those governing air emissions, water discharges, waste management and workplace safety. We use, generate and dispose of hazardous substances and waste in our operations and could be subject to material liabilities relating to the investigation and clean-up of contaminated properties and related claims. We are required to conform our operations and properties to these laws and adapt to regulatory requirements in all countries as these requirements change. In connection with our acquisitions, we may assume significant environmental liabilities, some of which we may not be aware of, or may not be quantifiable, at the time of acquisition. In addition, new laws and regulations, the discovery of previously unknown contamination or the imposition of new requirements could increase our costs or subject us to new or increased liabilities.

Customers

No customer accounted for 10% or more of net revenues for 2018 for any of our segments or for our company as a whole.

Competition

Generally, our products and solutions face significant competition, usually from a limited number of competitors. We believe that we are a leader in most of our markets, and no single company competes with us over a significant number of product lines. Competitors might be large or small in size, often depending on the size of the niche market we serve. We compete primarily on product quality, performance, innovation, technology, price, applications expertise, system and service flexibility, distribution channel access and customer service capabilities.

Patents and Trademarks

In addition to trade secrets, unpatented know-how, and other intellectual property rights, we own or license the rights under a number of patents, trademarks and copyrights relating to certain of our products and businesses. We also employ various methods, including confidentiality and non-disclosure agreements with individuals and companies we do business with, employees, distributors, representatives and customers to protect our trade secrets and know-how. We believe none of our operating units are substantially dependent on any single patent, trademark, copyright, or other item of intellectual property or group of patents, trademarks or copyrights.

Employees

As of December 31, 2018, we had 15,611 employees, with 10,294 located in the United States. We have 195 employees who are subject to collective bargaining agreements. We have not experienced any work stoppages and consider our relations with our employees to be good.

Available Information

All reports we file electronically with the SEC, including our annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and our annual proxy statements, as well as any amendments to those reports, are accessible at no cost on our website at www.ropertech.com as soon as reasonably practicable after we electronically file such material with, or furnish it to, the SEC. These filings are also accessible on the SEC's website at www.sec.gov. Our Corporate Governance Guidelines; the charters of our Audit Committee, Compensation Committee, and Nominating and Governance Committee; and our Business Code of Ethics and Standards of Conduct are also available on our website. Any amendment to the Business Code of Ethics and Standards of Conduct and any waiver applicable to our directors, executive officers or senior financial officers will be posted on our website within the time period required by the SEC and the New York Stock Exchange (the "NYSE"). The information posted on our website is not incorporated into this Annual Report.

We have included the Chief Executive Officer and the Chief Financial Officer certifications regarding our public disclosure required by Section 302 of the Sarbanes-Oxley Act of 2002 as Exhibits 31.1 and 31.2 of this report. Additionally, we filed with the NYSE the Chief Executive Officer certification regarding our compliance with the NYSE's Corporate Governance Listing Standards (the "Listing Standards") pursuant to Section 303A.12(a) of the Listing Standards. We filed the certification with the NYSE on June 12, 2018 and our Chief Executive Officer indicated that he was not aware of any violations of the Listing Standards by us.

ITEM 1A. RISK FACTORS

Risks Relating to Our Business

Our indebtedness may affect our business and may restrict our operating flexibility.

As of December 31, 2018, we had \$4.9 billion in total consolidated indebtedness. In addition, we had \$1.6 billion undrawn availability under our senior unsecured credit facility. Subject to restrictions contained in our credit facility, we may incur additional indebtedness in the future, including indebtedness incurred to finance acquisitions.

Our level of indebtedness and the debt servicing costs associated with that indebtedness could have important effects on our operations and business strategy. For example, our indebtedness could:

- limit our ability to borrow additional funds;
- limit our ability to complete future acquisitions;
- limit our ability to pay dividends;
- limit our ability to make capital expenditures;
- place us at a competitive disadvantage relative to our competitors, some of which have lower debt service obligations and greater financial resources; and
- increase our vulnerability to general adverse economic and industry conditions.

Our ability to make scheduled principal payments of, to pay interest on, or to refinance our indebtedness and to satisfy our other debt obligations will depend upon our future operating performance, which may be affected by factors beyond our control. In addition, there can be no assurance that future borrowings or equity financing will be available to us on favorable terms for the payment or refinancing of our indebtedness. If we are unable to service our indebtedness, our business, financial condition and results of operations would be materially adversely affected.

Our credit facility contains covenants requiring us to achieve certain financial and operating results and maintain compliance with specified financial ratios. Our ability to meet the financial covenants or requirements in our credit facility may be affected by events beyond our control, and we may not be able to satisfy such covenants and requirements. A breach of these covenants or our inability to comply with the financial ratios, tests or other restrictions contained in our facility could result in an event of default under this facility. Upon the occurrence of an event of default under our credit facility, and the expiration of any grace periods, the lenders could elect to declare all amounts outstanding under the facility, together with accrued interest, to be immediately due and payable. If this were to occur, our assets may not be sufficient to fully repay the amounts due under this facility or our other indebtedness.

Unfavorable changes in foreign exchange rates may harm our business.

Several of our operating companies have transactions and balances denominated in currencies other than the U.S. dollar. Most of these transactions and balances are denominated in euros, Canadian dollars, British pounds or Danish kroner. Sales by our operating companies whose functional currency is not the U.S. dollar represented 17% of our total net revenues for both the years ended December 31, 2018 and 2017. Unfavorable changes in exchange rates between the U.S. dollar and those currencies could significantly reduce our reported revenues and earnings.

We export a significant portion of our products. Difficulties associated with the export of our products could harm our business.

Sales to customers outside the U.S. by our businesses located in the U.S. account for a significant portion of our net revenues. These sales accounted for 11% of our net revenues for both the years ended December 31, 2018 and 2017. We are subject to risks that could limit our ability to export our products or otherwise reduce the demand for these products in our foreign markets. Such risks include, without limitation, the following:

- unfavorable changes in or noncompliance with U.S. and other jurisdictions' export requirements;
- restrictions on the export of technology and related products;
- unfavorable changes in or noncompliance with U.S. and other jurisdictions' export policies to certain countries;
- unfavorable changes in the import policies of our foreign markets; and
- a general economic downturn in our foreign markets.

The occurrence of any of these events could reduce the foreign demand for our products or could limit our ability to export our products and, therefore, could have a material negative effect on our future sales and earnings.

Economic, political and other risks associated with our international operations could adversely affect our business.

As of and for the year ended December 31, 2018, 20% of our net revenues and 17% of our long-lived assets, excluding goodwill and intangibles, were attributable to operations outside the U.S. We expect our international operations to contribute materially to our business for the foreseeable future. Our international operations are subject to varying degrees of risk inherent in doing business outside the U.S. including, without limitation, the following:

- adverse changes in a specific country's or region's political or economic conditions, particularly in emerging markets;
- oil price volatility;
- trade protection measures, tariffs, and import or export requirements;
- subsidies or increased access to capital for firms that are currently, or may emerge as, competitors in countries in which we have operations;
- partial or total expropriation;
- potentially negative consequences from changes in tax laws;
- difficulty in staffing and managing widespread operations;
- differing labor regulations;
- differing protection of intellectual property;
- differing and unexpected changes in regulatory requirements; and
- potentially negative consequences from the United Kingdom's exit from the European Union.

Our growth strategy includes acquisitions. We may not be able to identify suitable acquisition candidates, complete acquisitions or integrate acquisitions successfully.

Our future growth is likely to depend to some degree on our ability to acquire and successfully integrate new businesses. We intend to seek additional acquisition opportunities, both to expand into new markets and to enhance our position in existing markets. There are no assurances, however, that we will be able to successfully identify suitable candidates, negotiate appropriate terms, obtain financing on acceptable terms, complete proposed acquisitions, successfully integrate acquired businesses or expand into new markets. Once acquired, operations may not achieve anticipated levels of revenues or profitability.

Acquisitions involve risks, including difficulties in the integration of the operations, technologies, services and products of the acquired companies and the diversion of management's attention from other business concerns.

Although our management will endeavor to evaluate the risks inherent in any particular transaction, there are no assurances that we will properly ascertain all such risks. In addition, prior acquisitions have resulted, and future acquisitions could result, in the incurrence of substantial additional indebtedness and other expenses. Future acquisitions may also result in potentially dilutive issuances of equity securities. Difficulties encountered with acquisitions may have a material adverse effect on our business, financial condition and results of operations.

Our technology is important to our success and our failure to protect this technology could put us at a competitive disadvantage.

Many of our products rely on proprietary technology; therefore we believe that the development and protection of intellectual property rights through patents, copyrights, trade secrets, trademarks, confidentiality agreements and other contractual provisions are important to the future success of our business. Despite our efforts to protect proprietary rights, unauthorized parties or competitors may copy or otherwise obtain and use our products or technology. Actions to enforce these rights may result in substantial costs and diversion of resources, and we make no assurances that any such actions will be successful.

Product liability, insurance risks and increased insurance costs could harm our operating results.

Our business exposes us to product liability risks in the design, manufacture and distribution of our products. In addition, certain of our products are used in hazardous environments. We currently have product liability insurance; however, we may not be able to maintain our insurance at a reasonable cost or in sufficient amounts to adequately protect us against losses. We also maintain other insurance policies, including directors' and officers' liability insurance. We believe we have adequately accrued estimated losses, principally related to deductible amounts under our insurance policies, with respect to all product liability and other claims, based upon our past experience and available facts. However, a successful product liability or other claim or series of claims brought against us could have a material adverse effect on our business, financial condition and results of operations. In addition, a significant increase in our insurance costs could have an adverse impact on our operating results.

Our operating results could be adversely affected by a reduction of business with our large customers.

In some of our businesses, we derive a significant amount of revenue from large customers. The loss or reduction of any significant contracts with any of these customers could reduce our revenues and cash flows. Additionally, many of our customers are government entities. In many situations, government entities can unilaterally terminate or modify our existing contracts without cause and without penalty to the government agency.

We face intense competition. If we do not compete effectively, our business may suffer.

We face intense competition from numerous competitors. Our products compete primarily on the basis of product quality, performance, innovation, technology, price, applications expertise, system and service flexibility, distribution channel access and established customer service capabilities. We may not be able to compete effectively on all of these fronts or with all of our competitors. In addition, new competitors may emerge, and product lines may be threatened by new technologies or market trends that reduce the value of these product lines. To remain competitive, we must develop new products, respond to new technologies and enhance our existing products in a timely manner. We anticipate that we may have to adjust prices to stay competitive.

We rely on information and technology for many of our business operations which could fail and cause disruption to our business operations.

Our business operations are dependent upon information technology networks and systems to securely transmit, process and store electronic information and to communicate among our locations around the world and with clients and vendors. A shutdown of, or inability to access, one or more of our facilities, a power outage or a failure of one or more of our information technology, telecommunications or other systems could significantly impair our ability to perform such functions on a timely basis. Computer viruses, cyber-attacks, other external hazards and human error could result in the misappropriation of assets or sensitive information, corruption of data or operational disruption. If sustained or repeated, such a business interruption, system failure, service denial or data loss and damage could result

in a deterioration of our ability to perform necessary business functions.

A breach in the security of our software could harm our reputation, result in a loss of current and potential customers, and subject us to material claims, which could materially harm our operating results and financial condition.

If our security measures are breached, an unauthorized party may obtain access to our data or our users' or customers' data. In addition, cyber-attacks and similar acts could lead to interruptions and delays in customer processing or a loss or breach of customers' data. Because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and often are not recognized until launched against a target, we may be unable to anticipate these techniques or to implement adequate preventative measures. The risk that these types of events could seriously harm our business is likely to increase as we expand the number of web-based products and services we offer, and operate in more countries.

Regulatory authorities around the world have adopted and are considering further adoption of legislative and regulatory proposals concerning data protection. In addition, the interpretation and application of consumer and data protection laws in the United

States, Europe and elsewhere are often uncertain and in flux. It is possible that these laws may be interpreted and applied in a manner that is inconsistent with our data practices. If so, in addition to the possibility of fines, this could result in an order requiring that we change our data practices, which could have an adverse effect on our business and results of operations.

Any security breaches for which we are, or are perceived to be, responsible, in whole or in part, could subject us to legal claims or legal proceedings, including regulatory investigations, which could harm our reputation and result in significant litigation costs and damage awards or settlement amounts. Any imposition of liability, particularly liability that is not covered by insurance or is in excess of insurance coverage, could materially harm our operating results and financial condition. Security breaches also could cause us to lose current and potential customers, which could have an adverse effect on our business. Moreover, we might be required to expend significant financial and other resources to protect further against security breaches or to rectify problems caused by any security breach.

Changes in the supply of, or price for, raw materials, parts and components used in our products could affect our business.

The availability and prices of raw materials, parts and components are subject to curtailment or change due to, among other things, suppliers' allocations to other purchasers, interruptions in production by suppliers, changes in exchange rates and prevailing price levels. Some high-performance components for digital imaging products may be in short supply and/or suppliers may have occasional difficulty manufacturing these components to meet our specifications. In addition, some of our products are provided by sole source suppliers. Any change in the supply of, or price for, these parts and components, as well as any increases in commodity prices, particularly copper, could affect our business, financial condition and results of operations.

Environmental compliance costs and liabilities could increase our expenses and adversely affect our financial condition.

Our operations and properties are subject to laws and regulations relating to environmental protection, including air emissions, water discharges, waste management and workplace safety. These laws and regulations can result in the imposition of substantial fines and sanctions for violations and could, in certain instances, require the installation of pollution control equipment or operational changes to limit pollution emissions and/or decrease the likelihood of accidental hazardous substance releases. We must conform our operations and properties to these laws and adapt to regulatory requirements in the countries in which we operate as these requirements change.

We use and generate hazardous substances and wastes in some of our operations and, as a result, could be subject to potentially material liabilities relating to the investigation and clean-up of contaminated properties and to claims alleging personal injury. We have experienced, and expect to continue to experience, costs relating to compliance with environmental laws and regulations. In connection with our acquisitions, we may assume significant environmental liabilities, some of which we may not be aware of at the time of acquisition. In addition, new laws and regulations, stricter enforcement of existing laws and regulations, the discovery of previously unknown contamination or the imposition of new clean-up requirements could require us to incur costs or become the basis for new or increased liabilities that could have a material adverse effect on our business, financial condition and results of operations.

Some of the industries in which we operate are cyclical, and, accordingly, our business is subject to changes in the economy.

Some of the business areas in which we operate are subject to specific industry and general economic cycles. Certain businesses are subject to industry cycles, including but not limited to, the industrial and energy markets. Accordingly, a downturn in these or other markets in which we participate could materially adversely affect us. If demand changes and we fail to respond accordingly, our results of operations could be materially adversely affected. The business

cycles of our different operations may occur contemporaneously. Consequently, the effect of an economic downturn may have a magnified negative effect on our business.

Our goodwill and intangible assets are a significant amount of our total assets, and any write-off of our intangible assets would negatively affect our results of operations.

Our total assets reflect substantial intangible assets, primarily goodwill. At December 31, 2018, goodwill totaled \$9.3 billion compared to \$7.7 billion of stockholders' equity, and represented 61% of our total assets of \$15.2 billion. The goodwill results from our acquisitions, representing the excess purchase price over the fair value of the net identifiable assets acquired. We assess at least annually whether there has been an impairment in the value of our goodwill and indefinite economic life intangible assets. If future operating performance at one or more of our business units were to fall significantly below current levels, if competing or alternative technologies emerge, if interest rates rise or if business valuations decline, we could incur a non-cash charge to operating income. Any determination requiring the write-off of a significant portion of goodwill or unamortized intangible assets would negatively affect our results of operations, the effect of which could be material.

We depend on our ability to develop new products, and any failure to develop or market new products could adversely affect our business.

The future success of our business will depend, in part, on our ability to design and manufacture new competitive products and to enhance existing products so that we maintain our margin profile. This product development may require substantial internal investment. There can be no assurance that unforeseen problems will not occur with respect to the development, performance or market acceptance of new technologies or products or that we will otherwise be able to successfully develop and market new products. Failure of our products to gain market acceptance or our failure to successfully develop and market new products could reduce our margins, which would have an adverse effect on our business, financial condition and results of operations.

Any business disruptions due to political instability, armed hostilities, incidents of terrorism or natural disasters could adversely impact our financial performance.

If terrorist activity, armed conflict, political instability or natural disasters occur in the U.S. or other locations, such events may negatively impact our operations, cause general economic conditions to deteriorate or cause demand for our products to decline. A prolonged economic slowdown or recession could reduce the demand for our products, and therefore, negatively affect our future sales and profits. Any of these events could have a significant impact on our business, financial condition or results of operations.

Recent significant changes to our executive leadership team and any future loss of members of such team, and the resulting management transitions, could harm our operating results.

We have recently experienced significant changes to our executive leadership team. Leadership transitions and changes can be inherently difficult to manage and may cause uncertainty or disruption to our business or may increase the likelihood of turnover in key leadership positions. If we cannot effectively manage leadership transitions and changes, it could make it more difficult to successfully operate our business.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None

ITEM 2. PROPERTIES

Our corporate offices, consisting of 29,000 square feet of leased space, are located at 6901 Professional Parkway East, Sarasota, Florida. We have 154 principal locations around the world to support our operations, of which 46 are manufacturing, assembly and testing facilities, and the remaining 108 locations provide sales, programming, service and administrative support functions. We consider our facilities to be in good operating condition and adequate for their present use and believe we have sufficient capacity to meet our anticipated operating requirements.

The following table summarizes the size, location and usage of our principal properties as of December 31, 2018 (amounts in thousands of square feet).

PART II

ITEM MARKET FOR REGISTRANT'S COMMON EQUITY RELATED STOCKHOLDER MATTERS AND 5. ISSUER PURCHASES OF EQUITY SECURITIES

Our common stock trades on the NYSE under the symbol "ROP". Based on information available to us and our transfer agent, we believe that as of February 15, 2019 there were 145 record holders of our common stock.

Dividends – We have declared a cash dividend in each quarter since our February 1992 initial public offering and we have annually increased our dividend rate since our initial public offering. In November 2018, our Board of Directors increased the quarterly dividend paid January 23, 2019 to \$0.4625 per share from \$0.4125 per share, an increase of 12%. This is the twenty-sixth consecutive year in which Roper has increased its dividend. The timing, declaration and payment of future dividends will be at the sole discretion of our Board of Directors and will depend upon our profitability, financial condition, capital needs, future prospects and other factors deemed relevant by our Board of Directors.

Recent Sales of Unregistered Securities - In 2018, there were no sales of unregistered securities.

Performance Graph - This performance graph shall not be deemed "filed" for purposes of Section 18 of the Securities Exchange Act of 1934, as amended (the "Exchange Act") or otherwise subject to the liabilities under that Section and shall not be deemed to be incorporated by reference into any of our filings under the Securities Act of 1933, as amended, or under the Exchange Act.

The following graph compares, for the five year period ended December 31, 2018, the cumulative total stockholder return for our common stock, the Standard and Poor's 500 Stock Index (the "S&P 500") and the Standard and Poor's 500 Industrials Index (the "S&P 500 Industrials"). Measurement points are the last trading day of each of our fiscal years ended December 31, 2013, 2014, 2015, 2016, 2017 and 2018. The graph assumes that \$100 was invested on December 31, 2013 in our common stock, the S&P 500 and the S&P 500 Industrials and assumes reinvestment of any dividends. The stock price performance on the following graph is not necessarily indicative of future stock price performance.

	12/31/2013	12/31/2014	12/31/2015	12/31/2016	12/31/2017	12/31/2018
Roper Technologies, Inc.	\$ 100.00	\$ 113.39	\$ 138.48	\$ 134.49	\$ 191.49	\$ 198.22

Per share data:					
Basic earnings per share	\$9.15	\$9.51	\$6.50	\$6.92	\$6.47
Diluted earnings per share	\$9.05	\$9.39	\$6.43	\$6.85	\$6.40
Dividends declared per share					
	\$1.7000	\$1.4625	\$1.2500	\$1.0500	\$0.8500
Balance sheet data:					
Cash and cash equivalents	\$364.4	\$671.3	\$757.2	\$778.5	\$610.4
Working capital ⁽⁷⁾	(200.4)	(140.4)	(25.0)	126.2	284.9
Total assets ⁽⁹⁾	15,249.5	14,316.4	14,324.9	10,168.4	8,400.2
Current portion of long-term debt ⁽⁸⁾	1.5	800.9	401.0	6.8	11.1
Long-term debt, net of current portion ⁽⁹⁾	4,940.2	4,354.6	5,808.6	3,264.4	2,190.3
Stockholders’ equity	7,738.5	6,863.6	5,788.9	5,298.9	4,755.4

Includes results from the acquisitions of Quote Software from January 2, 2018, PlanSwift Software from March 28,

⁽¹⁾ 2018, Smartbid from May 8, 2018, PowerPlan, Inc. from June 4, 2018, ConceptShare from June 7, 2018, BillBlast from July 10, 2018 and Avitru from December 31, 2018.

⁽²⁾ Includes results from the acquisitions of Phase Technology from June 21, 2017, Handshake Software, Inc. from August 4, 2017, Workbook Software A/S from September 15, 2017 and Onvia, Inc. from November 17, 2017. Includes results from the acquisitions of CliniSys Group Ltd. from January 7, 2016, PCI Medical Inc. from March

⁽³⁾ 17, 2016, GeneInsight Inc. from April 1, 2016, iSqFt Holdings Inc. (d/b/a ConstructConnect) from October 31, 2016, UNIconnect LC from November 10, 2016 and Deltek, Inc. from December 28, 2016.

Includes results from the acquisitions of Strata Decision Technologies LLC from January 21, 2015, SoftWriters Inc. from February 9, 2015, Data Innovations LLC from March 4, 2015, On Center Software LLC from July 20, ⁽⁴⁾ 2015, RF IDEas Inc. from September 1, 2015, Atlantic Health Partners LLC from September 4, 2015, Aderant Holdings Inc. from October 21, 2015, Atlas Database Software Corp. from October 26, 2015, Black Diamond Advanced Technologies through March 20, 2015 and Abel Pumps through October 2, 2015.

⁽⁵⁾ Includes results from the acquisitions of Foodlink Holdings Inc. from July 2, 2014, Innovative Product Achievements LLC from August 5, 2014, Strategic Healthcare Programs Holdings LLC from August 14, 2014. The Tax Cuts and Jobs Act of 2017 (“the Tax Act”) was signed into U.S. law on December 22, 2017, which was

⁽⁶⁾ prior to the end of the Company’s 2017 reporting period and resulted in a one-time net income tax benefit of \$215.4.

⁽⁷⁾ Net working capital equals current assets, excluding cash, less total current liabilities, excluding debt.

⁽⁸⁾ At December 31, 2017, there were \$799 of senior notes, net of debt issuance costs, due October 1, 2018, and at December 31, 2016, there were \$399 of senior notes, net of debt issuance costs, due November 15, 2017, thus requiring classification as short-term debt, included in working capital.

Total assets and Long-term debt, net of current portion as of December 31, 2014 have been adjusted by \$12.7 due
(9) to the retrospective adoption of an accounting standard update which requires that our senior notes be shown net of debt issuance costs.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

All currency amounts are in millions unless specified

You should read the following discussion in conjunction with "Selected Financial Data" and our Consolidated Financial Statements and related notes included in this Annual Report.

Overview

We are a diversified technology company. We operate businesses that design and develop software (both license and software-as-a-service) and engineered products and solutions for a variety of niche end markets.

We pursue consistent and sustainable growth in earnings and cash flow by emphasizing continuous improvement in the operating performance of our existing businesses and by acquiring other carefully selected businesses. Our acquisitions have represented both new strategic platforms and additions to existing businesses.

Application of Critical Accounting Policies

Our Consolidated Financial Statements are prepared in conformity with generally accepted accounting principles in the United States ("GAAP"). A discussion of our significant accounting policies can also be found in the notes to our Consolidated Financial Statements for the year ended December 31, 2018 included in this Annual Report.

GAAP offers acceptable alternative methods for accounting for certain issues affecting our financial results, such as determining inventory cost, depreciating long-lived assets and recognizing revenue. We have not changed the application of acceptable accounting methods or the significant estimates affecting the application of these principles in the last three years in a manner that had a material effect on our consolidated financial statements.

The preparation of financial statements in accordance with GAAP requires the use of estimates, assumptions, judgments and interpretations that can affect the reported amounts of assets, liabilities, revenues and expenses, the disclosure of contingent assets and liabilities and other supplemental disclosures.

The development of accounting estimates is the responsibility of our management. Our management discusses those areas that require significant judgments with the Audit Committee of our Board of Directors. The Audit Committee has reviewed all financial disclosures in our annual filings with the SEC. Although we believe the positions we have taken with regard to uncertainties are reasonable, others might reach different conclusions and our positions can change over time as more information becomes available. If an accounting estimate changes, its effects are accounted for prospectively or through a cumulative catch up adjustment.

Our most significant accounting uncertainties are encountered in the areas of accounts receivable collectibility, inventory valuation, future warranty obligations, revenue recognition, income taxes and goodwill and indefinite-lived impairment analyses. These issues affect each of our business segments and are evaluated using a combination of historical experience, current conditions and relatively short-term forecasting.

Accounts receivable collectibility is based on the economic circumstances of customers and credits given to customers after shipment of products, including in certain cases credits for returned products. Accounts receivable are regularly reviewed to determine customers who have not paid within agreed upon terms, whether these amounts are consistent with past experiences, what historical experience has been with amounts deemed uncollectible and the impact that economic conditions might have on collection efforts in general and with specific customers. The returns and other

sales credit allowance is an estimate of customer returns, exchanges, discounts or other forms of anticipated concessions and is treated as a reduction in revenue. The returns and other sales credits histories are analyzed to determine likely future rates for such credits. At December 31, 2018, our allowance for doubtful accounts receivable was \$17.3 and our allowance for sales returns and sales credits was \$5.8, for a total of \$23.1, or 3.2% of total gross accounts receivable, as compared to a total of \$12.7, or 1.9% of total gross accounts receivable, at December 31, 2017. This percentage is influenced by the risk profile of the underlying receivables, and the timing of write-offs of accounts deemed uncollectible.

We regularly compare inventory quantities on hand against anticipated future usage, which we determine as a function of historical usage or forecasts related to specific items in order to evaluate obsolescence and excessive quantities. When we use historical usage, this information is also qualitatively compared to business trends to evaluate the reasonableness of using historical information as an estimate of future usage. At December 31, 2018, inventory reserves for excess and obsolete inventory were

\$30.3, or 13.7% of gross inventory cost, as compared to \$38.1, or 15.7% of gross inventory cost, at December 31, 2017. The inventory reserve as a percent of gross inventory cost will continue to fluctuate based upon specific identification of reserves needed based upon changes in our business as well as the physical disposal of obsolete inventory.

Most of our product-based revenues are covered by warranty provisions that generally provide for the repair or replacement of qualifying defective items for a specified period after the time of sale, typically 12 to 24 months. Future warranty obligations are evaluated using, among other factors, historical cost experience, product evolution and customer feedback. Our expense for warranty obligations was less than 1% of net revenues for each of the years ended December 31, 2018, 2017 and 2016.

Revenues from our project-based businesses, including toll and traffic systems, control systems and installations of large software application projects, are generally recognized over time using the input method, primarily utilizing the ratio of costs incurred to total estimated costs, as the measure of performance. The Company recognized revenues of \$245.9, \$249.3 and \$241.3 for the years ended December 31, 2018, 2017 and 2016, respectively, using this method. At December 31, 2018, \$241.6 of revenue related to unfinished percentage-of-completion contracts had yet to be recognized.

Income taxes can be affected by estimates of whether and within which jurisdictions future earnings will occur and if, how and when cash is repatriated to the U.S., combined with other aspects of an overall income tax strategy. Additionally, taxing jurisdictions could retroactively disagree with our tax treatment of certain items, and some historical transactions have income tax effects going forward. Accounting rules require these future effects to be evaluated using current laws, rules and regulations, each of which can change at any time and in an unpredictable manner. During 2018, our effective income tax rate was 21.2%, as compared to the 2017 rate of 6.1%. The increase was due primarily to the recognition of a \$215.4 net income tax benefit related to the Tax Act in 2017, partially offset by the reduction in the U.S. federal corporate income tax rate from 35% to 21%. We expect the effective tax rate for 2019 to be between 21% and 23%.

We account for goodwill in a purchase business combination as the excess purchase price over the fair value of the net identifiable assets acquired. Goodwill, which is not amortized, is tested for impairment on an annual basis in conjunction with our annual forecast process during the fourth quarter (or an interim basis if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value).

When testing goodwill for impairment, we have the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the estimated fair value of a reporting unit is less than its carrying amount. If we elect to perform a qualitative assessment and determine that an impairment is more likely than not, we are then required to perform the quantitative impairment test; otherwise, no further analysis is required. Under the qualitative assessment, we consider various qualitative factors, including macroeconomic conditions, relevant industry and market trends, cost factors, overall financial performance, other entity-specific events and events affecting the reporting unit that could indicate a potential change in the fair value of our reporting unit or the composition of its carrying values. We also consider the specific future outlook for the reporting unit.

We also may elect not to perform the qualitative assessment and, instead, proceed directly to the quantitative impairment test. The quantitative assessment utilizes both an income approach (discounted cash flows) and a market approach (consisting of a comparable company earnings multiples methodology) to estimate the fair value of a reporting unit. To determine the reasonableness of the estimated fair values, we review the assumptions to ensure that neither the income approach nor the market approach provides significantly different valuations. If the estimated fair

value exceeds the carrying value, no further work is required and no impairment loss is recognized. If the carrying value exceeds the estimated fair value, a non-cash impairment loss is recognized in the amount of that excess.

Key assumptions used in the income and market approaches are updated when the analysis is performed for each reporting unit. Various assumptions are utilized including forecasted operating results, strategic plans, economic projections, anticipated future cash flows, the weighted-average cost of capital, comparable transactions, market data and earnings multiples. While we use reasonable and timely information to prepare our cash flow and discount rate assumptions, actual future cash flows or market conditions could differ significantly and could result in future non-cash impairment charges related to recorded goodwill balances.

Recently acquired reporting units generally represent a higher inherent risk of impairment, which typically decreases as the businesses are integrated into our enterprise. Negative industry or economic trends, disruptions to our business, actual results significantly below projections, unexpected significant changes or planned changes in the use of the assets, divestitures and market capitalization declines may have a negative effect on the fair value of our reporting units.

Roper has 33 reporting units with individual goodwill amounts ranging from zero to \$2.4 billion. In 2018, the Company performed its annual impairment test in the fourth quarter for all reporting units. The Company conducted its analysis qualitatively and

assessed whether it was more likely than not that the respective fair value of these reporting units was less than the carrying amount. The Company determined that impairment of goodwill was not likely in 30 of its reporting units and thus was not required to perform a quantitative assessment for these reporting units. For the remaining three reporting units, the Company performed its quantitative assessment and concluded that the fair value of each of these three reporting units was substantially in excess of its carrying value, with no impairment indicated as of October 1, 2018.

Trade names that are determined to have an indefinite useful economic life are not amortized, but separately tested for impairment during the fourth quarter of the fiscal year or on an interim basis if an event occurs that indicates the fair value is more likely than not below the carrying value. We first qualitatively assess whether the existence of events or circumstances leads to a determination that it is more likely than not that the estimated fair value of the indefinite-lived trade name is less than its carrying amount. If necessary, we conduct a quantitative assessment using the relief-from-royalty method, which we believe to be an acceptable methodology due to its common use by valuation specialists in determining the fair value of intangible assets. This methodology assumes that, in lieu of ownership, a third-party would be willing to pay a royalty in order to exploit the related benefits of these assets. The fair value of each trade name is determined by applying a royalty rate to a projection of net revenues discounted using a risk-adjusted rate of capital. Each royalty rate is determined based on the profitability of the trade name to which it relates and observed market royalty rates. Revenue growth rates are determined after considering current and future economic conditions, recent sales trends, discussions with customers, planned timing of new product launches or other variables. Trade names resulting from recent acquisitions generally represent the highest risk of impairment, which typically decreases as the businesses are integrated into our enterprise and positioned for future sales growth.

The Company performed a quantitative analysis over the fair values of four of its trade names and concluded that the fair value exceeded its carrying value, with no impairment indicated as of October 1, 2018. Of those trade names subjected to our quantitative analysis, one, associated with our lab software business, had a fair value that approximated its carrying value, which was \$100.4 as of October 1, 2018. Holding other assumptions constant, for the specific trade name associated with our lab software business, a 50 basis point increase in the discount rate would result in a \$6.8 impairment and a 100 basis point decrease in the terminal growth rate would result in an \$11.7 impairment.

The assessment of fair value for impairment purposes requires significant judgments to be made by management. Although our forecasts are based on assumptions that are considered reasonable by management and consistent with the plans and estimates management uses to operate the underlying businesses, there is significant judgment in determining the expected results attributable to the businesses and/or reporting units. Changes in estimates or the application of alternative assumptions could produce significantly different results. No impairment resulted from the annual reviews performed in 2018.

The most significant identifiable intangible assets with definite useful economic lives recognized from our acquisitions are customer relationships. The fair value for customer relationships is determined as of the acquisition date using the excess earnings method. Under this methodology the fair value is determined based on the estimated future after-tax cash flows arising from the acquired customer relationships over their estimated lives after considering customer attrition and contributory asset charges. When testing customer relationship intangible assets for potential impairment, management considers historical customer attrition rates and projected revenues and profitability related to customers that existed at acquisition. In evaluating the amortizable life for customer relationship intangible assets, management considers historical customer attrition patterns.

We evaluate whether there has been an impairment of identifiable intangible assets with definite useful economic lives, or of the remaining life of such assets, when certain indicators of impairment are present. In the event that facts and circumstances indicate that the cost or remaining period of amortization of any asset may be impaired, an evaluation of recoverability would be performed. If an evaluation is required, the estimated future gross, undiscounted

cash flows associated with the asset would be compared to the asset's carrying amount to determine if a write-down to fair value or a revision in the remaining amortization period is required.

Results of Operations

All currency amounts are in millions unless specified, percentages are net of revenues

Percentages may not sum due to rounding.

The following table sets forth selected information for the years indicated.

	Years ended December 31,

(3) Includes results from the acquisition of Phase Technology from June 21, 2017.

Year Ended December 31, 2018 Compared to Year Ended December 31, 2017

Net revenues for the year ended December 31, 2018 were \$5.19 billion as compared to \$4.61 billion for the year ended December 31, 2017, an increase of 12.7%. The increase was the result of organic growth of 9.4%, a net effect from acquisitions and divestitures of 2.9%, and foreign exchange benefit of 0.4%.

In our RF Technology segment, net revenues for the year ended December 31, 2018 increased by \$306.3 or 16% over the year ended December 31, 2017. Organic revenues increased by 9% and acquisitions accounted for 7% of our growth. The growth in organic revenues was due primarily to broad-based strength across our software businesses and the non-recurrence of purchase accounting adjustments to acquired deferred revenues in the year ended December 31, 2017 associated with our 2016 Deltek and ConstructConnect acquisitions. Gross margin was 63.9% for the year ended December 31, 2018 as compared to 61.1% for the year ended December 31, 2017, due primarily to an increased percentage of revenues from our software businesses, which have higher gross margins, including the net reduction of purchase accounting adjustments. Selling, general and administrative (“SG&A”) expenses as a percentage of revenues in the year ended December 31, 2018 increased to 35.6%, as compared to 35.3% in the year ended December 31, 2017, due primarily to an increased percentage of revenues from our software businesses, which have a higher SG&A structure, including amortization of acquired intangibles. The resulting operating margin was 28.3% in the year ended December 31, 2018 as compared to 25.7% in the year ended December 31, 2017.

Our Medical & Scientific Imaging segment reported a \$112.0 or 8% increase in net revenues for the year ended December 31, 2018 over the year ended December 31, 2017, all of which was attributable to organic growth. The growth in organic revenues was due primarily to broad-based growth in our imaging and medical products businesses. Gross margin decreased to 71.4% for the year ended December 31, 2018 from 72.0% for the year ended December 31, 2017, due primarily to growth in our lower margin imaging businesses. SG&A expenses as a percentage of net revenues decreased to 37.2% in the year ended December 31, 2018, as compared to 37.5% in the year ended December 31, 2017, due primarily to operating leverage on higher revenues at our imaging businesses. The resulting operating margin was 34.2% in the year ended December 31, 2018 as compared to 34.5% in the year ended December 31, 2017.

Net revenues for our Industrial Technology segment increased by \$116.3 or 15% for the year ended December 31, 2018 from the year ended December 31, 2017. Organic revenues increased 14% and the foreign exchange benefit was 1%. The growth in organic revenues was broad-based, due primarily to our fluid handling and water meter technology. Gross margin increased to 50.9% in the year ended December 31, 2018, as compared to 50.6% in the year ended December 31, 2017, and SG&A expenses as a percentage of net revenues decreased to 19.3% in the year ended December 31, 2018, as compared to 20.6% in the year ended December 31, 2017, both of which were due primarily to operating leverage on higher sales volume. The resulting operating margin was 31.6% in the year ended December 31, 2018 as compared to 30.0% in the year ended December 31, 2017.

In our Energy Systems & Controls segment, net revenues for the year ended December 31, 2018 increased by \$49.1 or 9% from the year ended December 31, 2017. Organic sales increased by 7% and the foreign exchange benefit was 1%. The growth in organic revenues was due to broad-based growth in our businesses serving energy and industrial end markets. Gross margin increased to 58.2% in the year ended December 31, 2018 as compared to 57.4% in the year ended December 31, 2017 and SG&A expenses as a percentage of net revenues decreased to 28.0% in the year ended December 31, 2018, as compared to 30.0% in the year ended December 31, 2017, both of which were due to operating leverage on higher sales volume. As a result, operating margin was 30.1% in the year ended December 31, 2018 as compared to 27.4% in the year ended December 31, 2017.

Corporate expenses increased by \$61.7 to \$203.5, or 3.9% of revenues, in 2018 as compared to \$141.8, or 3.1% of revenues, in 2017. The increase was due primarily to (i) \$35.0 of accelerated vesting associated with the passing of

our former executive chairman, (ii) increased equity compensation as a result of increases in our common stock price and (iii) acquisition-related expenses.

Interest expense, net, increased \$1.5, or 0.8%, for the year ended December 31, 2018 as compared to the year ended December 31, 2017. The increase was due to higher weighted average interest rates, partially offset by lower weighted average debt balances.

Loss on debt extinguishment of \$15.9 for the for the year ended December 31, 2018, incurred in connection with the redemption of the 2019 Notes (as defined below), was composed of the early redemption premium and remaining unamortized deferred financing costs.

Other income, net, of \$0.0 for the year ended December 31, 2018 was composed primarily of royalty income, offset entirely by various other immaterial expenses. Other income, net of \$5.1 for the year ended December 31, 2017 was composed primarily of a \$9.4 gain on sale of a product line in our Energy Systems & Controls segment, offset in part by a \$1.8 charge on a minority investment and foreign exchange losses at our non-U.S. based companies.

During 2018, our effective income tax rate was 21.2% as compared to our 2017 rate of 6.1%. The increase was due primarily to the recognition of a \$215.4 net income tax benefit related to the Tax Act in 2017, partially offset by the reduction in the U.S. federal corporate income tax rate from 35% to 21%.

Order backlog is equal to our remaining performance obligations expected to be recognized within the next 12 months as discussed in Note 1 of the Notes to Consolidated Financial Statements.

	2018	2017	change
RF Technology	\$1,005.9	\$991.4	1.5 %
Medical & Scientific Imaging	468.0	467.8	—
Industrial Technology	119.2	110.9	7.5
Energy Systems & Controls	99.7	102.3	(2.5)
Total	\$1,692.8	\$1,672.4	1.2 %

Year Ended December 31, 2017 Compared to Year Ended December 31, 2016

Net revenues for the year ended December 31, 2017 were \$4.61 billion as compared to \$3.79 billion for the year ended December 31, 2016, an increase of 21.6%. The increase was the result of contributions from acquisitions of 16.3%, organic growth of 5.3% and no impact from foreign exchange.

In our RF Technology segment, net revenues for the year ended December 31, 2017 increased by \$651.9 or 54% over the year ended December 31, 2016. Acquisitions accounted for 51% and organic revenues increased by 3%. The increase in organic revenues was due primarily to growth in our software businesses. Gross margin was 61.1% for the year ended December 31, 2017 as compared to 56.7% for the year ended December 31, 2016, due primarily to an increased percentage of revenues from our software businesses, which have a higher gross margin. Selling, general and administrative expenses as a percentage of revenues in the year ended December 31, 2017 increased to 35.3%, as compared to 25.9% in the year ended December 31, 2016, due primarily to an increased percentage of revenues from our software businesses, which have a higher SG&A structure, including amortization of acquired intangibles. The resulting operating margin was 25.7% in 2017 as compared to 30.8% in 2016.

Our Medical & Scientific Imaging segment reported a \$47.5 or 3% increase in net revenues for the year ended December 31, 2017 over the year ended December 31, 2016, all of which was attributable to organic growth. The growth in organic revenues was due primarily to increased sales in our medical products businesses, led by NDI, and our alternate site healthcare businesses. Gross margin decreased to 72.0% for the year ended December 31, 2017 from 73.2% for the year ended December 31, 2016, due primarily to an unfavorable sales mix at both our software and medical products businesses. SG&A expenses as a percentage of net revenues decreased to 37.5% in the year ended December 31, 2017, as compared to 38.2% in the year ended December 31, 2016, due primarily to operating leverage on higher sales. The resulting operating margin was 34.5% in the year ended December 31, 2017 as compared to 35.0% in the year ended December 31, 2016.

Net revenues for our Industrial Technology segment increased by \$77.1 or 11% for the year ended December 31, 2017 from the year ended December 31, 2016, all of which was attributable to organic growth. The growth in organic revenues was broad-based, due primarily to our fluid handling, water meter technology and materials testing businesses. Gross margin was consistent at 50.6% for the years ended December 31, 2017 and 2016. SG&A expenses as a percentage of net revenues were 20.6% in the year ended December 31, 2017, as compared to 21.9% in the year ended December 31, 2016, due primarily to operating leverage on higher sales volume. The resulting operating margin was 30.0% in the year ended December 31, 2017 as compared to 28.7% in the year ended December 31, 2016.

In our Energy Systems & Controls segment, net revenues for the year ended December 31, 2017 increased by \$41.1 or 8% from the year ended December 31, 2016. Organic sales increased by 7% and the benefit from foreign exchange and acquisitions totaled 1%. The growth in organic revenues was due primarily to increased sales in pressure sensors and valves businesses serving energy markets as well as businesses serving industrial end markets. Gross margin increased to 57.4% in the year ended December 31, 2017 as compared to 57.1% in the year ended December 31, 2016 and SG&A expenses as a percentage of net revenues decreased to 30.0% in the year ended December 31, 2017, as compared to 31.7% in the year ended December 31, 2016, both of which were due to operating leverage on higher sales volume. As a result, operating margin was 27.4% in the year ended December 31, 2017 as compared to 25.4% in the year ended December 31, 2016.

Corporate expenses increased by \$14.3 to \$141.8, or 3.1% of revenues, in 2017 as compared to \$127.5, or 3.4% of revenues, in 2016. The dollar increase was due primarily to increased incentive compensation and professional services.

Interest expense increased \$69.0, or 61.9%, for the year ended December 31, 2017 as compared to the year ended December 31, 2016. The increase was due primarily to higher average debt balances to fund acquisitions at the end of 2016.

Other income, net, of \$5.1 for the year ended December 31, 2017 was composed primarily of a \$9.4 gain on sale of a product line in our Energy Systems & Controls segment, offset in part by a \$1.8 charge on a minority investment and foreign exchange losses at our non-U.S. based companies. Other expense of \$1.5 for the year ended December 31, 2016 was composed primarily of foreign exchange losses at our non-U.S. based companies, offset in part by royalty income.

During 2017, our effective income tax rate was 6.1% as compared to our 2016 rate of 30.0%. The decrease was due primarily to the recognition of a \$215.4 net income tax benefit related to the Tax Act as well as increased excess tax benefits related to equity compensation in 2017 as compared to 2016.

Order backlog is equal to our remaining performance obligations expected to be recognized within the next 12 months as discussed in Note 1 of the Notes to Consolidated Financial Statements.

	2017	2016	change

Financial Condition, Liquidity and Capital Resources

All currency amounts are in millions unless specified

Selected cash flows for the years ended December 31, 2018, 2017 and 2016 are as follows:

	2018	2017	2016
Cash provided by/(used in):			
Operating activities	\$1,430.1	\$1,234.5	\$963.8
Investing activities	(1,335.1)	(209.6)	(3,752.9)
Financing activities	(388.1)	(1,170.0)	2,805.3

Operating activities - The growth in cash provided by operating activities in 2018 and in 2017 was primarily due to increased earnings net of non-cash expenses. In addition, the growth in cash provided by operating activities in 2017 over 2016 was increased in part by income tax payments in the first quarter of 2016 related to the gain on the sale of the Abel Pumps business in the fourth quarter of 2015.

Investing activities - Cash used in investing activities during 2018 was primarily for business acquisitions, most notably PowerPlan, and to a much lesser extent capital expenditures. Cash used in investing activities during 2017 was primarily for business acquisitions and capital expenditures. Cash used in investing activities during 2016 was primarily for business acquisitions, most notably Deltek.

Financing activities - Cash provided by/(used in) financing activities in all periods presented was primarily debt repayments/borrowings as well as dividends paid to stockholders. Cash used in financing activities during 2018 was primarily from the pay-down of revolving debt borrowings of \$405, partially offset by the net issuance of senior notes of \$200 and dividends paid to shareholders. Cash used in financing activities during 2017 was primarily from the pay-down of revolving debt borrowings of \$660 and the repayment of \$400 of senior notes. Cash provided by financing activities during 2016 was primarily from the issuance of \$1.2 billion of senior notes and revolving debt borrowings for acquisitions.

Cash and cash equivalents decreased as a result of the effects of foreign currency exchange rate changes during the year ended December 31, 2018 by \$13.8 as compared to an increase during the year ended December 31, 2017 of \$59.2 and a decrease during the year ended December 31, 2016 of \$37.5. The decrease for the year ended December 31, 2018 was due primarily to the weakening

of functional currencies of our Canadian and certain European subsidiaries against the U.S. dollar, while the increase for the year ended December 31, 2017 was due primarily to the strengthening of functional currencies of our European subsidiaries against the U.S. dollar. The decrease for the year ended December 31, 2016 was due primarily to the weakening of functional currencies of our European subsidiaries against the U.S. dollar.

Net working capital (current assets, excluding cash, less total current liabilities, excluding debt) was a negative \$200 at December 31, 2018 compared to negative \$140 at December 31, 2017, due primarily to increased deferred revenue and accrued compensation, partially offset by increased accounts receivable. This deferred revenue increase is due to a higher percentage of revenue from software and subscription-based services.

Total debt excluding unamortized debt issuance costs was \$5.0 billion at December 31, 2018 (39.1% of total capital) compared to \$5.2 billion at December 31, 2017 (43.0% of total capital). Our decreased total debt at December 31, 2018 compared to December 31, 2017 was due primarily to the pay-down of revolving debt borrowings of \$405, the repayment at maturity of \$800 of outstanding 2.05% senior unsecured notes and the redemption of \$500 of outstanding 6.25% senior unsecured notes, partially offset by the issuance of \$700 of 3.65% senior unsecured notes and \$800 of 4.20% senior unsecured notes.

On September 23, 2016, we entered into a five-year unsecured credit facility (the “2016 Facility”) with JPMorgan Chase Bank, N.A., as administrative agent, and a syndicate of lenders, which replaced our previous unsecured credit facility, dated as of July 27, 2012, as amended as of October 28, 2015 (the “2012 Facility”). The 2016 Facility comprises a five year \$2.5 billion revolving credit facility, which includes availability of up to \$150 for letters of credit. We may also, subject to compliance with specified conditions, request term loans or additional revolving credit commitments in an aggregate amount not to exceed \$500.

The 2016 Facility contains various affirmative and negative covenants which, among other things, limit our ability to incur new debt, enter into certain mergers and acquisitions, sell assets and grant liens, make restricted payments (including the payment of dividends on our common stock) and capital expenditures, or change our line of business. We also are subject to financial covenants which require us to limit our consolidated total leverage ratio and to maintain a consolidated interest coverage ratio. The most restrictive covenant is the consolidated total leverage ratio which is limited to 3.5 to 1.

On December 2, 2016, we amended the 2016 Facility to allow the consolidated total leverage ratio be increased, no more than twice during the term of the 2016 Facility, to 4.0 to 1 for a consecutive four quarter fiscal period per increase (or, for any portion of such four quarter fiscal period in which the maximum would be 4.25 to 1 pursuant to the 2016 facility amendment, 4.25 to 1). In conjunction with the Deltek acquisition (see Note 2 of the Notes to Consolidated Financial Statements included in this Annual Report), we increased the maximum consolidated total leverage ratio covenant to 4.25 to 1 through June 30, 2017 and 4.00 to 1 through December 31, 2017.

At December 31, 2018, we had \$4.1 billion of senior unsecured notes and \$865 of outstanding revolver borrowings. In addition, we had \$3 of other debt in the form of capital leases and several smaller facilities that allow for borrowings or the issuance of letters of credit in foreign locations to support our non-U.S. businesses. We had \$79 of outstanding letters of credit at December 31, 2018, of which \$37 was covered by our lending group, thereby reducing our revolving credit capacity commensurately.

We may redeem some or all of our senior secured notes at any time or from time to time, at 100% of their principal amount, plus a make-whole premium based on a spread to U.S. Treasury securities.

We were in compliance with all debt covenants related to our credit facility throughout the years ended December 31, 2018 and 2017.

See Note 8 of the Notes to Consolidated Financial Statements included in this Annual Report for additional information regarding our credit facility and senior notes.

Cash and cash equivalents at our foreign subsidiaries at December 31, 2018 totaled \$339 as compared to \$592 at December 31, 2017, a decrease of 42.7%. The decrease was due primarily to the repatriation of \$472 during the year, partially offset by cash generated from foreign operations. The Company intends to distribute all historical unremitted earnings up to the amount of foreign cash and cash equivalents, as well as all future foreign earnings that can be repatriated without incremental U.S. federal tax cost. Any remaining outside basis differences relating to the Company's investments in foreign subsidiaries will be indefinitely reinvested. See Note 7 of the Notes to Consolidated Financial Statements included in this Annual Report for additional information regarding income taxes.

Capital expenditures of \$49.1, \$48.8 and \$37.3 were incurred during 2018, 2017 and 2016, respectively. Capitalized software expenditures of \$9.5, \$10.8 and \$2.8 were incurred during 2018, 2017 and 2016, respectively. Capital expenditures and capitalized

software expenditures were relatively consistent in 2018 as compared to 2017. The increase in 2017 as compared to 2016 was due primarily to our 2016 acquisitions. In the future, we expect the aggregate of capital expenditures and capitalized software expenditures as a percentage of annual net revenues to be between 1.0% and 1.5%.

Contractual Cash Obligations and Other Commercial Commitments and Contingencies

All currency amounts are in millions

The following tables quantify our contractual cash obligations and commercial commitments at December 31, 2018.

Contractual Cash Obligations ¹	Payments Due in Fiscal Year						
	Total	2019	2020	2021	2022	2023	Thereafter
Total debt	\$4,968.0	\$1.5	\$601.5	\$1,365.0	\$500.0	\$700.0	\$1,800.0
Senior note interest	876.0	144.9	144.2	126.4	111.0	89.8	259.7
Operating leases	304.2	60.1	53.1	44.9	35.2	28.0	82.9
Total	\$6,148.2	\$206.5	\$798.8	\$1,536.3	\$646.2	\$817.8	\$2,142.6

Other Commercial Commitments	Amounts Expiring in Fiscal Year						
	Total Amount Committed	2019	2020	2021	2022	2023	Thereafter
Standby letters of credit and bank guarantees	\$ 78.7	\$28.2	\$1.7	\$39.7	\$8.6	\$0.1	\$ 0.4

¹ We have excluded the liability for uncertain tax positions and certain other tax liabilities as we are not able to reasonably estimate the timing of the payments. See Note 7 of the Notes to Consolidated Financial Statements included in this Annual Report.

As of December 31, 2018, we had \$582.6 of outstanding surety bonds. Certain contracts, primarily those involving public sector customers, require us to provide a surety bond as a guarantee of its performance of contractual obligations.

We believe that internally generated cash flows and the remaining availability under our credit facility will be adequate to finance normal operating requirements. Although we maintain an active acquisition program, any future acquisitions will be dependent on numerous factors and it is not feasible to reasonably estimate if or when any such acquisitions will occur and what the impact will be on our activities, financial condition and results of operations. We may also explore alternatives to attract additional capital resources.

We anticipate that our businesses will generate positive cash flows from operating activities, and that these cash flows will permit the reduction of currently outstanding debt in accordance with the repayment schedule. However, the rate at which we can reduce our debt during 2019 (and reduce the associated interest expense) will be affected by, among other things, the financing and operating requirements of any new acquisitions and the financial performance of our existing companies. None of these factors can be predicted with certainty.

Off-Balance Sheet Arrangements

At December 31, 2018 and 2017, we did not have any relationships with unconsolidated entities or financial partnerships, such as entities often referred to as structured finance or special purpose entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Recently Issued Accounting Standards

See Note 1 of the Notes to Consolidated Financial Statements included in this Annual Report for information regarding the effect of new accounting pronouncements on our consolidated financial statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to interest rate risks on our outstanding revolving credit borrowings, and to foreign currency exchange risks on our transactions denominated in currencies other than the U.S. dollar. We are also exposed to equity market risks pertaining to the traded price of our common stock.

At December 31, 2018, we had \$4.1 billion of fixed rate borrowings with interest rates ranging from 2.8% to 4.2%. At December 31, 2018, the prevailing market rates for our long-term notes were between 0.1% and 0.7% higher than the fixed rates on our debt instruments. Our credit facility contains a \$2.5 billion variable-rate revolver with \$865 of outstanding borrowings at December 31, 2018.

Several of our businesses have transactions and balances denominated in currencies other than the U.S. dollar. Most of these transactions or balances are denominated in euros, Canadian dollars, British pounds or Danish kroner. Net revenues recognized by companies whose functional currency was not the U.S. dollar were 17% of our total revenues in 2018 and 68% of these revenues were recognized by companies with a European functional currency. If these currency exchange rates had been 10% different throughout 2018 compared to currency exchange rates actually experienced, the impact on our net earnings would have been approximately 1%.

The trading price of our common stock influences the valuation of stock award grants and the effects these grants have on our results of operations. The stock price also influences the computation of potentially dilutive common stock to determine diluted earnings per share. The stock price also affects our employees' perceptions of programs that involve our common stock. We believe the quantification of the effects of these changing prices on our future earnings and cash flows is not readily determinable.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Stockholders of Roper Technologies, Inc.:

Opinions on the Financial Statements and Internal Control over Financial Reporting

We have audited the accompanying consolidated balance sheets of Roper Technologies, Inc. and its subsidiaries (the “Company”) as of December 31, 2018 and 2017, and the related consolidated statements of earnings, of comprehensive income, of stockholders’ equity, and of cash flows for each of the three years in the period ended December 31, 2018, including the related notes and financial statement schedule listed in the accompanying index (collectively referred to as the “consolidated financial statements”). We also have audited the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America. Also in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework (2013) issued by the COSO.

Basis for Opinions

The Company's management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in Management's Report on Internal Control over Financial Reporting appearing under Item 9A. Our responsibility is to express opinions on the Company’s consolidated financial statements and on the Company's internal control over financial reporting based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud, and whether effective internal control over financial reporting was maintained in all material respects.

Our audits of the consolidated financial statements included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

As described in Management's Report on Internal Control over Financial Reporting, management has excluded acquisitions completed in 2018 from its assessment of internal control over financial reporting as of December 31, 2018 because they were acquired by the Company in a purchase business combination during 2018. We have also excluded acquisitions completed in 2018 from our audit of internal control over financial reporting. These acquisitions are wholly-owned subsidiaries whose aggregate assets and aggregate revenues excluded from management's assessment and our audit of internal control over financial reporting represent less than 1% and less than 2%, respectively, of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

Definition and Limitations of Internal Control over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial

statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ROPER TECHNOLOGIES, INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

Years ended December 31, 2018, 2017 and 2016

(Dollar and share amounts in millions unless specified, except per share data)

(1) Summary of Accounting Policies

Basis of Presentation - These financial statements present consolidated information for Roper Technologies, Inc. and its subsidiaries (“Roper,” the “Company,” “we,” “our” or “us”). All significant intercompany accounts and transactions have been eliminated.

Nature of the Business - Roper is a diversified technology company. The Company operates businesses that design and develop software (both license and software-as-a-service) and engineered products and solutions for a variety of niche end markets.

Recent Accounting Pronouncements - The Financial Accounting Standards Board (“FASB”) establishes changes to accounting principles under GAAP in the form of accounting standards updates (“ASUs”) to the FASB’s Accounting Standards Codification. The Company considers the applicability and impact of all ASUs. Any ASUs not listed below were assessed and determined to be either not applicable or are expected to have an immaterial impact on the Company’s results of operations, financial position or cash flows.

Recently Adopted Accounting Pronouncements

In May 2014, the FASB issued ASC 606, which created a single, comprehensive revenue recognition model for all contracts with customers. The Company adopted the FASB Accounting Standards Codification (“ASC”) Topic 606, Revenue from Contracts with Customers (“ASC 606”), as of January 1, 2018 using the modified retrospective transition method for all contracts not substantially completed as of the date of adoption.

We recorded a net increase to opening retained earnings of \$14.3 due to the cumulative impact of adopting ASC 606. The impact of adopting ASC 606 was not material to the Company’s results of operations for the year ended December 31, 2018.

The cumulative impact of the adoption of ASC 606 to the consolidated balance sheet as of January 1, 2018 was as follows:

	As reported December 31, 2017	Impact of ASC 606 Adoption	Adjusted January 1, 2018
ASSETS:			
Unbilled receivables	\$ 143.6	\$ 2.8	\$ 146.4
Other current assets	73.5	(1.0)	72.5
Other assets	88.3	3.2	91.5
LIABILITIES:			
Deferred revenue	566.4	(13.5)	552.9
Deferred taxes	829.6	4.6	834.2
Other liabilities	239.2	(0.4)	238.8

STOCKHOLDERS' EQUITY:

Retained earnings	5,464.6	14.3	5,478.9
-------------------	---------	------	---------

Deferred Revenue & Unbilled Receivables

Certain of Roper's businesses sell perpetual and term licenses of their software to customers in conjunction with other products and services, primarily PCS and implementation services. In some cases, under the previous revenue guidance, vendor-specific objective evidence ("VSOE") was unavailable for perpetual and term licenses and associated implementation services, and revenue recognition was deferred until all elements were delivered, all services had been performed, or until fair value could be objectively determined. The revenues associated with these licenses and implementation was generally deferred over the contractual term of the PCS services. Under ASC 606, VSOE is no longer a requirement for a deliverable in a multiple-element software arrangement to be considered a separate performance obligation. The reduction in deferred revenues as well as the increase in unbilled receivables is due primarily to the acceleration of revenue recognition associated with certain perpetual and term licenses and associated implementation services as a result of the adoption of ASC 606.

Other Current Assets

The reduction in other current assets is due primarily to the recognition of previously deferred software licensing costs associated with the acceleration of revenue recognition associated with certain perpetual and term software licenses discussed above.

Other Assets

The increase in other assets is due primarily to the acceleration of revenue recognition for which we do not expect to bill customers within the next 12 months as well as deferred commissions previously expensed as incurred associated with our software sales. These deferred commissions are amortized on a straight-line basis over the period of contract performance or a longer period, generally the estimated life of the customer relationship, if renewals are expected and the renewal commission is not commensurate with the initial commission.

Income Taxes

The adoption of ASC 606 resulted in the acceleration of revenue recognition, which generated additional net deferred tax liabilities.

See the Company's accounting policies below for details.

In March 2016, the FASB issued an update on stock compensation. The ASU simplifies several aspects of the accounting for employee share-based payment awards, including the accounting for income taxes, forfeitures, and statutory tax withholding requirements, as well as classification in the statement of cash flows. This standard is effective for annual reporting periods beginning after December 15, 2016. The Company elected to early adopt this standard on a prospective basis in the quarter ended March 31, 2016. The impact of the early adoption resulted in the following:

The Company recorded tax benefits of \$15.3 within income tax expense for the year ended December 31, 2016 related to the excess tax benefit on share-based awards. Prior to adoption this amount would have been recorded as a reduction of additional paid-in capital. This change adds volatility to the Company's effective tax rate.

The Company no longer reclassifies the excess tax benefit from operating activities to financing activities in the statement of cash flows. The Company elected to apply this change in presentation prospectively and thus prior periods have not been adjusted.

The Company elected not to change its policy on accounting for forfeitures and continued to estimate the total number of awards for which the requisite service period will not be rendered.

The Company excluded the excess tax benefits from the assumed proceeds available to repurchase shares in the computation of its diluted earnings per share since adoption. This resulted in an increase in diluted weighted average common shares outstanding of 0.279 shares for the year ended December 31, 2016.

Recently Released Accounting Pronouncements

In August 2018, the FASB issued an update which clarifies the accounting for implementation costs in cloud computing arrangements. This update is effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2019. Early adoption is permitted. The Company is evaluating the impact of the update on its results of operations and financial condition.

In June 2016, the FASB issued an update which amends the measurement of credit losses on financial instruments by requiring entities to use a forward-looking approach based on expected losses rather than incurred losses to estimate credit losses on certain types of financial instruments, including trade receivables. This update is effective for public entities for fiscal years beginning after December 15, 2019, with early adoption permitted. The Company is evaluating the impact of the update on its results of operations and financial condition.

In February 2016, the FASB issued an update on lease accounting. This update, effective for annual reporting periods after December 15, 2018, including interim periods within those annual periods, provides amendments to current lease accounting. These amendments include the recognition of right-of-use lease assets and lease liabilities on the balance sheet and disclosing other key information about leasing arrangements. We are currently designing and implementing processes, policies, and controls to comply with the update on lease accounting. While we have not yet finalized our assessment, we currently believe the primary impact of adoption will be the recognition of a material right-of-use asset and an offsetting lease liability for our real estate leases. We will adopt this standard as of January 1, 2019 using the modified retrospective transition approach with a cumulative effect adjustment to the opening balance of retained earnings as of the date of adoption.

Cash and Cash Equivalents - Roper considers highly liquid financial instruments with remaining maturities at acquisition of three months or less to be cash equivalents. Roper had no cash equivalents at December 31, 2018 and December 31, 2017.

Contingencies - Management continually assesses the probability of any adverse judgments or outcomes to its potential contingencies. Disclosure of the contingency is made if there is at least a reasonable possibility that a loss or an additional loss may have been incurred. In the assessment of contingencies as of December 31, 2018, management concluded that there were no matters for which there was a reasonable possibility of a material loss.

Earnings per Share - Basic earnings per share were calculated using net earnings and the weighted-average number of shares of common stock outstanding during the respective year. Diluted earnings per share were calculated using net earnings and the weighted-average number of shares of common stock and potential common stock outstanding during the respective year. Potentially dilutive common stock consisted of stock options and the premium over the conversion price on Roper's senior subordinated convertible notes based upon the trading price of the Company's common stock. Effective January 1, 2016, Roper adopted the provisions of an accounting standards update on a prospective basis which increased the number of potentially dilutive stock options as there is no longer a tax benefit in the calculation of dilutive stock options. See the caption "Recent Accounting Pronouncements" elsewhere in this Note for additional information regarding the ASU. The effects of potential common stock were determined using the treasury stock method:

	Years ended December 31,		
	2018	2017	2016
Basic weighted-average shares outstanding	103.2	102.2	101.3
Effect of potential common stock:			
Common stock awards	1.2	1.3	1.1
Senior subordinated convertible notes	—	—	0.1
Diluted weighted-average shares outstanding	104.4	103.5	102.5

As of and for the years ended December 31, 2018, 2017 and 2016, there were 0.724, 0.478 and 1.144 outstanding stock options, respectively, that were not included in the determination of diluted earnings per share because doing so would have been antidilutive.

Estimates - The preparation of financial statements in conformity with generally accepted accounting principles in the United States ("GAAP") requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities. Actual results could differ from those estimates.

Foreign Currency Translation and Transactions - Assets and liabilities of subsidiaries whose functional currency is not the U.S. dollar were translated at the exchange rate in effect at the balance sheet date, and revenues and expenses were translated at average exchange rates for the period in which those entities were included in Roper's financial results. Translation adjustments are reflected as a component of other comprehensive income. Foreign currency transaction gains and losses are recorded in the consolidated statement of earnings as other income/(expense). Foreign currency transaction gains/(losses) were \$0.2, \$(1.4) and \$(2.9) for the years ended December 31, 2018, 2017 and 2016.

Goodwill and Other Intangibles - Roper accounts for goodwill in a purchase business combination as the excess of the cost over the estimated fair value of net assets acquired. Business combinations can also result in other intangible assets being recognized. Amortization of intangible assets, if applicable, occurs over their estimated useful lives. Goodwill, which is not amortized, is tested for impairment on an annual basis (or an interim basis if an event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying value). When testing goodwill for impairment, the Company has the option to first assess qualitative factors to determine whether the existence of events or circumstances leads to a determination that it is more likely than not that the estimated fair value of a reporting unit is less than its carrying amount. If the Company elects to perform a

qualitative assessment and determines that an impairment is more likely than not, then performance of the quantitative impairment test is required. The quantitative process utilizes both an income approach (discounted cash flows) and a market approach (consisting of a comparable public company earnings multiples methodology) to estimate the fair value of a reporting unit. To determine the reasonableness of the estimated fair values, the Company reviews the assumptions to ensure that neither the income approach nor the market approach provides significantly different valuations. If the estimated fair value exceeds the carrying value, no further work is required and no impairment loss is recognized. If the carrying value exceeds the estimated fair value, a non-cash impairment loss is recognized in the amount of that excess.

When performing the quantitative assessment, key assumptions used in the income and market methodologies are updated when the analysis is performed for each reporting unit. Various assumptions are utilized including forecasted operating results, strategic plans, economic projections, anticipated future cash flows, the weighted-average cost of capital, comparable transactions, market data and earnings multiples. The assumptions that have the most significant effect on the fair value calculations are the anticipated future cash flows, discount rates, and the earnings multiples. While the Company uses reasonable and timely information to prepare

its cash flow and discount rate assumptions, actual future cash flows or market conditions could differ significantly resulting in future impairment charges related to recorded goodwill balances.

Roper has 33 reporting units with individual goodwill amounts ranging from zero to \$2.4 billion. In 2018, the Company performed its annual impairment test in the fourth quarter for all reporting units. The Company conducted its analysis qualitatively and assessed whether it was more likely than not that the respective fair value of these reporting units was less than the carrying amount. The Company determined that impairment of goodwill was not likely in 30 of its reporting units and thus was not required to perform a quantitative analysis for these reporting units. For the remaining three reporting units, the Company performed its quantitative analysis and concluded that the fair value of each of these three reporting units was substantially in excess of its carrying value, with no impairment indicated as of October 1, 2018.

Recently acquired reporting units generally represent a higher inherent risk of impairment, which typically decreases as the businesses are integrated into the enterprise. Negative industry or economic trends, disruptions to its business, actual results significantly below expected results, unexpected significant changes or planned changes in the use of the assets, divestitures and market capitalization declines may have a negative effect on the fair value of Roper's reporting units.

The following events or circumstances, although not comprehensive, would be considered to determine whether interim testing of goodwill would be required:

- a significant adverse change in legal factors or in the business climate;
- an adverse action or assessment by a regulator;
- unanticipated competition;
- a loss of key personnel;
- a more-likely-than-not expectation that a reporting unit or a significant portion of a reporting unit will be sold or otherwise disposed of;
- the testing for recoverability under the Impairment or Disposal of Long-Lived Assets of a significant asset group within a reporting unit; and
- recognition of a goodwill impairment loss in the financial statements of a subsidiary that is a component of a reporting unit.

Business combinations can also result in other intangible assets being recognized. Amortization of intangible assets, if applicable, occurs over their estimated useful lives. Trade names that are determined to have an indefinite useful economic life are not amortized, but separately tested for impairment during the fourth quarter of the fiscal year or on an interim basis if an event occurs that indicates the fair value is more likely than not below the carrying value. Roper first qualitatively assesses whether the existence of events or circumstances leads to a determination that it is more likely than not that the estimated fair value of an indefinite-lived trade name is less than its carrying amount. If necessary, Roper conducts a quantitative review using the relief-from-royalty method. This methodology assumes that, in lieu of ownership, a third party would be willing to pay a royalty in order to exploit the related benefits of these assets. The fair value of each trade name is determined by applying a royalty rate to a projection of net revenues discounted using a risk adjusted rate of capital. Each royalty rate is determined based on the profitability of the trade name to which it relates and observed market royalty rates. Revenue growth rates are determined after considering current and future economic conditions, recent sales trends, discussions with customers, planned timing of new product launches or other variables. Trade names resulting from recent acquisitions generally represent the highest risk of impairment, which typically decreases as the businesses are integrated into Roper's enterprise. The Company performed a quantitative analysis over the fair values of four of its trade names and concluded that the fair value exceeded its carrying value, with no impairment indicated as of October 1, 2018.

The assessment of fair value for impairment purposes requires significant judgments to be made by management. Although forecasts are based on assumptions that are considered reasonable by management and consistent with the plans and estimates management uses to operate the underlying businesses, there is significant judgment in determining the expected results attributable to the reporting units. Changes in estimates or the application of alternative assumptions could produce significantly different results. No impairment resulted from the annual testing performed in 2018.

The most significant identifiable intangible assets with definite useful economic lives recognized from our acquisitions are customer relationships. The fair value for customer relationships is determined as of the acquisition date using the excess earnings method. Under this methodology the fair value is determined based on the estimated future after-tax cash flows arising from the acquired customer relationships over their estimated lives after considering customer attrition and contributory asset charges. When testing customer relationship intangible assets for potential impairment, management considers historical customer attrition rates and projected revenues and profitability related to customers that existed at acquisition. In evaluating the amortizable life for customer relationship intangible assets, management considers historical customer attrition patterns.

Roper evaluates whether there has been an impairment of identifiable intangible assets with definite useful economic lives, or of the remaining life of such assets, when certain indicators of impairment are present. In the event that facts and circumstances indicate that the cost or remaining period of amortization of any asset may be impaired, an evaluation of recoverability would be performed. If an evaluation is required, the estimated future gross, undiscounted cash flows associated with the asset would be compared to the asset's carrying amount to determine if a write-down to fair value or a revision in the remaining amortization period is required.

Impairment of Long-Lived Assets - The Company determines whether there has been an impairment of long-lived assets, excluding goodwill and identifiable intangible assets that are determined to have indefinite useful economic lives, when certain indicators of impairment are present. In the event that facts and circumstances indicate that the cost or life of any long-lived assets may be impaired, an evaluation of recoverability would be performed. If an evaluation is required, the estimated future gross, undiscounted cash flows associated with the asset would be compared to the asset's carrying amount to determine if a write-down to fair value or revision to remaining life is required. Future adverse changes in market conditions or poor operating results of underlying long-lived assets could result in losses or an inability to recover the carrying value of the long-lived assets that may not be reflected in the assets' current carrying value, thereby possibly requiring an impairment charge or acceleration of depreciation or amortization expense in the future.

Income Taxes - The Company recognizes in the consolidated financial statements only those tax positions determined to be "more likely than not" of being sustained upon examination based on the technical merits of the positions. Interest and penalties related to unrecognized tax benefits are classified as a component of income tax expense.

The Company records a valuation allowance to reduce its deferred tax assets if, based on the weight of available evidence, both positive and negative, for each respective tax jurisdiction, it is more likely than not that some portion or all of such deferred tax assets will not be realized. Available evidence which is considered in determining the amount of valuation allowance required includes, but is not limited to, the Company's estimate of future taxable income and any applicable tax-planning strategies.

Certain assets and liabilities have different bases for financial reporting and income tax purposes. Deferred income taxes have been provided for these differences at the enacted tax rates expected to be paid. See Note 7 for information regarding income taxes.

Interest Rate Risk - The Company manages interest rate risk by maintaining a combination of fixed-rate and variable-rate debt, which may include interest rate swaps to convert fixed-rate debt to variable-rate debt, or to convert variable-rate debt to fixed-rate debt. Interest rate swaps are recorded at fair value in the balance sheet as an asset or liability, and the changes in fair values of both the swap and the hedged item are recorded as interest expense in current earnings. There were no interest rate swaps outstanding at December 31, 2018 or December 31, 2017.

Inventories - Inventories are valued at the lower of cost and net realizable value. Cost is determined using the first-in, first-out method. The Company writes down its inventory for estimated obsolescence or excess inventory equal to the difference between the cost of inventory and the estimated net realizable value based upon assumptions about future demand and market conditions.

Other Comprehensive Income - Comprehensive income includes net earnings and all other non-owner sources of changes in a company's net assets.

Product Warranties - The Company sells certain of its products to customers with a product warranty that allows customers to return a defective product during a specified warranty period following the purchase in exchange for a replacement product, repair at no cost to the customer or the issuance of a credit to the customer. The Company

accrues its estimated exposure to warranty claims based upon current and historical product sales data, warranty costs incurred and any other related information known to the Company.

Property, Plant and Equipment and Depreciation and Amortization - Property, plant and equipment is stated at cost less accumulated depreciation and amortization. Depreciation and amortization are provided for using principally the straight-line method over the estimated useful lives of the assets as follows:

Buildings 20-30 years

Machinery 8-12 years

Other equipment 3-5 years

Research and Development - Research and development (“R&D”) costs include salaries and benefits, rents, supplies, and other costs related to products under development. Research and development costs are expensed in the period incurred and totaled \$316.8, \$281.1 and \$195.4 for the years ended December 31, 2018, 2017 and 2016, respectively.

Revenue Recognition - The Company adopted ASC 606 as of January 1, 2018 using the modified retrospective method for all contracts not substantially completed as of the date of adoption. The reported results for 2018 reflect the application of ASC 606 guidance, while the reported results for 2017 and 2016 were prepared under the guidance of ASC Topic 605, Revenue Recognition. The adoption of ASC 606 represents a change in accounting principle that is intended to more closely align revenue recognition with the transfer of control of the Company’s products and services to the customer. The amount of revenue recognized reflects the consideration which the Company expects to be entitled to receive in exchange for these products and/or services. To achieve this principle, the Company applies the following five steps:

- identify the contract with the customer;
- identify the performance obligations in the contract;
- determine the transaction price;
- allocate the transaction price to performance obligations in the contract; and
- recognize revenue when or as the Company satisfies a performance obligation.

Disaggregated Revenue - We disaggregate our revenues into two categories: (i) software and related services; and (ii) engineered products and related services. Software and related services revenues are primarily derived from our RF Technology and Medical & Scientific Imaging reportable segments. Engineered products and related services revenues are derived from all of our reportable segments and comprise substantially all of the revenues generated in our Energy Systems & Controls and Industrial Technology reportable segments. See details in the table below.

	Year ended December 31, 2018
Software and related services	\$ 2,165.9
Engineered products and related services	3,025.3
Net revenues	\$ 5,191.2

Software and related services

Software-as-a-Service (“SaaS”) - SaaS subscriptions and ongoing related support are generally accounted for as a single performance obligation and recognized ratably over the contractual term. In addition, SaaS arrangements may include implementation services which are accounted for as a separate performance obligation and recognized over time, using the input method. Payment is generally required within 30 days of the commencement of the SaaS subscription period, which is primarily offered to customers over a one-year timeframe.

Licensed Software - Performance obligations in our customer contracts may include:

- Perpetual or time-based (“term”) software licenses
- Post contract support (“PCS”)
- Implementation/installation services

Software licenses may be combined with implementation/installation services as a single performance obligation if the implementation/installation significantly modifies or customizes the functionality of the software license.

We recognize revenue over time or at a point in time depending on our evaluation of when the customer obtains control over the promised products or services. For software arrangements that include multiple performance obligations, we allocate revenue to each performance obligation based on estimates of the price that we would charge the customer for each promised product or service if it were sold on a standalone basis.

Payment for software licenses is generally required within 30 to 60 days of the transfer of control. Payment for PCS is generally required within 30 to 60 days of the commencement of the service period, which is primarily offered to customers over a one-year timeframe. Payment terms do not contain a significant financing component. Payment for implementation/installation services that are recognized over time are typically commensurate with milestones defined in the contract, or billable hours incurred.

Engineered products and related services

Revenue from product sales is recognized when control transfers to the customer, which is generally when the product is shipped.

Non-project-based installation and repair services are performed by certain of our businesses for which revenue is recognized upon completion.

Payment terms are generally 30 to 60 days from the transfer of control. Payment terms do not contain a significant financing component.

Preventative maintenance service revenues are recognized over time using the input method. If we determine our efforts or inputs are expended evenly throughout the performance period, we generally recognize revenue on a straight-line basis. Payment for preventative maintenance services are typically commensurate with milestones defined in the contract.

We offer customers return rights and other credits subject to certain restrictions. We estimate variable consideration generally based on historical experience to arrive at the transaction price, or the amount to which we ultimately expect to be entitled from the customer.

Revenues from our project-based businesses, including toll and traffic systems and control systems, are generally recognized over time using the input method, primarily utilizing the ratio of costs incurred to total estimated costs, as the measure of performance. For these projects, payment is typically commensurate with certain performance milestones defined in the contract. Retention and down payments are also customary in these contracts. Estimated losses on any projects are recognized as soon as such losses become probable and reasonably estimable. The impact on revenues due to changes in estimates was immaterial for the year ended December 31, 2018. The Company recognized revenues of \$245.9, \$249.3 and \$241.3 for the years ended December 31, 2018, 2017 and 2016, respectively, using this method.

Accounts receivable, net - Accounts receivable, net includes amounts billed and currently due from customers. The amounts due are stated at their net estimated realizable value. Accounts receivable are stated net of an allowance for doubtful accounts and sales allowances of \$23.1 and \$12.7 at December 31, 2018 and 2017, respectively. Outstanding accounts receivable balances are reviewed periodically, and allowances are provided at such time that management believes it is probable that an account receivable is uncollectible.

Unbilled receivables - Our unbilled receivables include unbilled amounts typically resulting from sales under project-based contracts when the input method of revenue recognition is utilized and revenue recognized exceeds the amount billed to the customer, and right to payment is not solely due to the passage of time. Amounts may not exceed their net realizable value.

Deferred revenues - We record deferred revenues when cash payments are received or due in advance of our performance. Our deferred revenues relate primarily to software and related services. In most cases, we recognize these deferred revenues ratably over time as the SaaS or PCS performance obligation is satisfied. The non-current portion of deferred revenue is included in "Other liabilities" in our consolidated balance sheets.

Our unbilled receivables and deferred revenues are reported in a net position on a contract-by-contract basis at the end of each reporting period. We classify these balances as current or non-current based on the timing of when we expect to recognize revenue.

Deferred commissions - Our incremental direct costs of obtaining a contract, which consist of sales commissions primarily for our software sales, are deferred and amortized on a straight-line basis over the period of contract performance or a longer period, depending on facts and circumstances. We classify deferred commissions as current or non-current based on the timing of when we expect to recognize the expense. The current and non-current portions of deferred commissions are included in "Other current assets" and "Other assets," respectively, in our consolidated balance sheets. At December 31, 2018 and January 1, 2018, we had \$28.0 and \$20.7 of deferred commissions, respectively. We recognized \$24.5 of expense related to deferred commissions in the year ended December 31, 2018.

Remaining performance obligations - Remaining performance obligations represents the transaction price of firm orders for which work has not been performed and excludes unexercised contract options. As of December 31, 2018, the aggregate amount of the transaction price allocated to remaining performance obligations was \$2,818.7. We expect to recognize revenue on approximately 60% of our remaining performance obligations over the next 12 months, with the remainder to be recognized thereafter.

Capitalized Software - The Company accounts for capitalized software under applicable accounting guidance which, among other provisions, requires capitalization of certain internal-use software costs once certain criteria are met. Overhead, general and

administrative and training costs are not capitalized. Capitalized software balances, net of accumulated amortization, were \$22.0 and \$14.0 at December 31, 2018 and 2017, respectively.

Stock-Based Compensation - The Company recognizes expense for the grant date fair value of its employee stock awards on a straight-line basis (or, in the case of performance-based awards, on a graded basis) over the employee's requisite service period (generally the vesting period of the award). The fair value of option awards is estimated using the Black-Scholes option valuation model.

(2) Business Acquisitions and Assets and Liabilities Held for Sale

Roper completed seven business acquisitions in the year ended December 31, 2018, with an aggregate purchase price of \$1,279.0, net of cash acquired. The results of operations of the acquired businesses are included in Roper's consolidated results of operations since the date of each acquisition. Supplemental pro forma information has not been provided as the acquisitions did not have a material impact on Roper's consolidated results of operations individually or in aggregate.

The results of the following acquisitions are reported in the RF Technology segment:

Roper completed three business acquisitions which provide software solutions that support the development of cost estimates in the construction industry: Quote Software, PlanSwift Software, and Smartbid.

Acquisition of PowerPlan - On June 4, 2018, Roper acquired 100% of the shares of PowerPlan, a provider of financial and compliance management software and solutions to large complex companies in asset-intensive industries, for a purchase price of \$1,111.4, net of cash acquired.

Acquisition of ConceptShare - On June 7, 2018, Roper acquired 100% of the shares of ConceptShare, a provider of cloud-based software for marketing agencies, marketing departments and other creative teams to streamline the review and approval of online work and content.

Acquisition of BillBlast - On July 10, 2018, Roper acquired 100% of the shares of BillBlast, a provider of software and ancillary services for the automation of invoicing and reporting for law firms.

Acquisition of Avitru - On December 31, 2018, Roper acquired 100% of the shares of Avitru, a provider of software that supports the design, development and/or delivery of construction specification solutions and related services.

The Company initially recorded \$717.5 in goodwill and \$711.3 of other identifiable intangibles in connection with the acquisitions; however, purchase price allocations are preliminary pending final tax-related adjustments. The majority of the goodwill is not expected to be deductible for tax purposes. The amortizable intangible assets include customer relationships of \$635.1 (19 year weighted average useful life) and technology of \$48.6 (7 year weighted average useful life).

Assets and Liabilities Held for Sale

During the second quarter of 2018, Roper and Thermo Fisher Scientific, Inc. ("Thermo Fisher") entered into a definitive agreement under which Thermo Fisher will acquire 100% of the shares of Gatan, Inc. ("Gatan"), a wholly-owned subsidiary of Roper, for approximately \$925.0 in cash. The transaction, which is expected to be completed in 2019, is subject to customary closing conditions, including regulatory approvals.

During the fourth quarter of 2018, Roper and Teledyne Technologies Incorporated (“Teledyne”) entered into a definitive agreement under which Teledyne will acquire Roper’s remaining scientific imaging businesses for \$225.0 in cash. These businesses include primarily Princeton Instruments, Photometrics and Lumenera, as well as other brands (collectively, the “Imaging” businesses).

At December 31, 2018, the assets and liabilities of Gatan and the Imaging businesses (collectively, the “Scientific Imaging” businesses) were reclassified as held for sale on Roper’s consolidated balance sheet. The Scientific Imaging businesses are reported in the Medical & Scientific Imaging segment.

The Company recognized a deferred tax liability of \$10.0 associated with the excess of book basis over tax basis in the shares of Gatan during the second quarter of 2018. The Company recognized a deferred tax asset of \$1.8 associated with the excess of tax basis over book basis in the shares of the Imaging businesses during the fourth quarter of 2018.

The Company closed on its sale of the Imaging businesses to Teledyne on February 5, 2019.

2017 Acquisitions – During the year ended December 31, 2017, Roper completed four business acquisitions, with an aggregate purchase price of \$152.0, net of cash acquired. The results of operations of the acquired businesses did not have a material impact on Roper’s consolidated results of operations.

Acquisition of Phase Technology - On June 21, 2017, Roper acquired the assets of Phase Technology, a business engaged in the design, manufacture, marketing and sales of test instruments. Phase Technology is reported in the Energy Systems & Controls segment.

The results of the following acquisitions are reported in the RF Technology segment:

Acquisition of Handshake Software, Inc. - On August 4, 2017, Roper acquired 100% of the shares of Handshake Software, Inc., a provider of search products, portals and services for legal professionals.

Acquisition of Workbook Software A/S - On September 15, 2017, Roper acquired 100% of the shares of Workbook Software A/S, a provider of software solutions for customer relationship management, project management and finance/accounting.

Acquisition of Onvia, Inc. - On November 17, 2017, Roper acquired 100% of the outstanding shares of Onvia, Inc. (“Onvia”) common stock for \$9.00 per share in an all-cash tender offer. Onvia provides enterprise, mid-market and small business customers with sales lead generation technologies into federal, state and local government markets.

The Company recorded \$82.7 in goodwill and \$85.0 of other identifiable intangibles in connection with the acquisitions. The amortizable intangible assets include primarily customer relationships of \$68.0 (15 year weighted average useful life) and technology of \$13.0 (6 year weighted average useful life).

Sale of Product Line - On May 15, 2017, Roper completed the sale of a product line in our Energy Systems & Controls segment for \$10.4. The pretax gain on the sale was \$9.4, which is reported in Other income/(expense), net in the consolidated statements of earnings.

2016 Acquisitions – During the year ended December 31, 2016, Roper completed six business combinations. Roper acquired the businesses to both expand and complement its existing technologies. The results of operations of the acquired companies have been included in Roper’s consolidated results since the date of each acquisition.

The largest of the 2016 acquisitions was Deltek Inc., a global provider of enterprise software and information solutions for government contractors, professional services firms and other project-based businesses. Roper acquired 100% of the shares of Project Diamond Holdings Corp. (the parent company of Deltek) on December 27, 2016, in a \$2,800.0 all-cash transaction. Deltek is reported in the RF Technology segment.

The Company expensed transaction costs of \$4.3 related to the Deltek acquisition as corporate general and administrative expenses, as incurred.

Roper’s results for the year ended December 31, 2016 included results from Deltek between December 28, 2016 and December 31, 2016. In that period, Deltek contributed \$7.9 in revenue and \$0.8 of earnings to Roper’s results. The following unaudited pro forma summary presents consolidated information as if the acquisition of Deltek had occurred on January 1, 2016:

Pro forma
Year
ended
December

	31, 2016
Net revenues	\$ 4,268.1
Net income	656.4
Earnings per share, basic	6.48
Earnings per share, diluted	6.41

Pro forma earnings were adjusted by \$47.4 for the year ended December 31, 2016 for non-recurring acquisition and other costs. Adjustments were also made for recurring changes in amortization, interest expense and taxes related to the acquisition.

During the year ended December 31, 2016, Roper completed five other acquisitions which were immaterial. The aggregate purchase price of these acquisitions totaled \$920.0 of cash. The Company recorded \$372.0 in other identifiable intangibles and \$642.0 in

goodwill in connection with these acquisitions. Supplemental pro forma information has not been provided as the acquisitions did not have a material impact on Roper's consolidated results of operations individually or in aggregate.

The results of the following acquisitions are reported in the Medical & Scientific Imaging segment:

Clinisys - On January 7, 2016, Roper acquired 100% of the shares of CliniSys Group Ltd. ("CliniSys"), a provider of clinical laboratory software headquartered in the United Kingdom.

PCI Medical - On March 17, 2016, Roper acquired the assets of PCI Medical Inc., a provider of medical probe and scope disinfection products.

GeneInsight - On April 1, 2016, the Company acquired 100% of the shares of GeneInsight Inc., a provider of software for managing the analysis, interpretation and reporting of genetic tests.

UNIConnect - On November 10, 2016, Roper acquired the assets of UNIConnect LC, a provider of process management software for molecular laboratories.

ConstructConnect - On October 31, 2016, Roper acquired 100% of the shares of iSqFt Holdings Inc. (d/b/a ConstructConnect), a provider of cloud-based data, collaboration, and workflow automation solutions to the commercial construction industry. ConstructConnect is reported in the RF Technology segment.

The Company expensed transaction costs of \$4.2 related to the acquisitions as corporate general and administrative expenses, as incurred.

(3) Inventories

The components of inventories at December 31 were as follows:

	2018	2017
Raw materials and supplies	\$120.3	\$133.0
Work in process	26.2	27.6
Finished products	74.6	82.4
Inventory reserves	(30.3)	(38.1)
	\$190.8	\$204.9

(4) Property, Plant and Equipment

The components of property, plant and equipment at December 31 were as follows:

	2018	2017
Land	\$2.2	\$2.5
Buildings	76.7	90.7
Machinery and other equipment	218.0	226.3
Computer equipment	79.4	77.5
Software	64.4	62.4
	440.7	459.4
Accumulated depreciation	(312.0)	(316.9)
	\$128.7	\$142.5

Depreciation and amortization expense related to property, plant and equipment was \$49.5, \$49.5 and \$37.3 for the years ended December 31, 2018, 2017 and 2016, respectively.

(5) Goodwill and Other Intangible Assets

The carrying value of goodwill by segment was as follows:

	RF Technology	Medical & Scientific Imaging	Industrial Technology	Energy Systems & Controls	Total
Balances at December 31, 2016	\$ 4,687.7	\$3,185.0	\$ 364.0	\$410.4	\$8,647.1
Goodwill acquired	63.5	—	—	19.2	82.7
Currency translation adjustments	19.3	17.6	13.5	8.4	58.8
Reclassifications and other	28.4	3.3	—	—	31.7
Balances at December 31, 2017	\$ 4,798.9	\$3,205.9	\$ 377.5	\$438.0	\$8,820.3
Goodwill acquired	717.5	—	—	—	717.5
Goodwill related to assets held for sale	—	(156.2)	—	—	(156.2)
Currency translation adjustments	(14.7)	(12.5)	(6.6)	(5.9)	(39.7)
Reclassifications and other	4.9	—	—	—	4.9
Balances at December 31, 2018	\$ 5,506.6	\$3,037.2	\$ 370.9	\$432.1	\$9,346.8

Reclassifications and other during the year ended December 31, 2018 were due primarily to tax adjustments for 2017 acquisitions. See Note 2 for information regarding acquisitions.

Other intangible assets were comprised of:

	Cost	Accum. amort.	Net book value
Assets subject to amortization:			
Customer related intangibles	\$3,355.2	\$(913.7)	\$2,441.5
Unpatented technology	544.1	(207.7)	336.4
Software	184.7	(84.8)	99.9
Patents and other protective rights	26.1	(22.7)	3.4
Trade names	6.6	(1.7)	4.9
Assets not subject to amortization:			
Trade names	587.7	—	587.7
In process research and development	1.4	—	1.4
Balances at December 31, 2017	\$4,705.8	\$(1,230.6)	\$3,475.2

Assets subject to amortization:			
Customer related intangibles	\$3,926.8	\$(1,083.6)	\$2,843.2
Unpatented technology	504.0	(199.5)	304.5
Software	172.0	(93.2)	78.8
Patents and other protective rights	9.7	(7.5)	2.2
Trade names	7.3	(2.8)	4.5
Assets not subject to amortization:			
Trade names	608.9	—	608.9
Balances at December 31, 2018	\$5,228.7	\$(1,386.6)	\$3,842.1

Amortization expense of other intangible assets was \$316.5, \$294.3, and \$201.4 during the years ended December 31, 2018, 2017 and 2016, respectively. Amortization expense is expected to be \$330 in 2019, \$316 in 2020, \$304 in 2021, \$300 in 2022 and \$269 in 2023.

(6) Accrued Liabilities

Accrued liabilities at December 31 were as follows:

	2018	2017
Interest	\$26.9	\$20.1
Customer deposits	22.3	29.2
Commissions	7.7	8.3
Warranty	9.3	10.6
Accrued dividend	48.5	42.9
Rebates	29.1	30.0
Billings in excess of revenues	13.9	23.3
Other	100.3	102.2
	\$258.0	\$266.6

(7) Income Taxes

Earnings before income taxes for the years ended December 31, 2018, 2017 and 2016 consisted of the following components:

	2018	2017	2016
United States	\$924.2	\$783.6	\$721.0
Other	274.2	251.1	219.6
	\$1,198.4	\$1,034.7	\$940.6

Components of income tax expense for the years ended December 31, 2018, 2017 and 2016 were as follows:

	2018	2017	2016
Current:			
Federal	\$155.4	\$316.0	\$239.2
State	56.2	29.8	21.8
Foreign	105.1	89.9	54.9
Deferred:			
Federal	(24.2)	(358.3)	(26.8)
State	(25.8)	(3.7)	0.2
Foreign	(12.7)	(10.8)	(7.3)
	\$254.0	\$62.9	\$282.0

Reconciliations between the statutory federal income tax rate and the effective income tax rate for the years ended December 31, 2018, 2017 and 2016 were as follows:

	2018	2017	2016
Federal statutory rate	21.0 %	35.0 %	35.0 %
Foreign rate differential	0.3	(2.6)	(3.2)
R&D tax credits	(0.9)	(0.8)	(0.7)
State taxes, net of federal benefit	2.4	1.9	1.9
Section 199 deduction	—	(1.3)	(1.5)
Stock-based compensation	(3.1)	(3.9)	(1.6)
Tax Cuts and Jobs Act of 2017 - enactment date and measurement period adjustments	(1.2)	(20.8)	—
Global intangible low taxed income (GILTI) inclusion	1.1	—	—
Foreign-derived intangible income (FDII) deduction	(1.2)	—	—
Tax on planned remittances of foreign earnings	1.3	—	—
Other, net	1.5	(1.4)	0.1
	21.2 %	6.1 %	30.0 %

The deferred income tax balance sheet accounts arise from temporary differences between the amount of assets and liabilities recognized for financial reporting and tax purposes.

Components of the deferred tax assets and liabilities at December 31 were as follows:

	2018	2017
Deferred tax assets:		
Reserves and accrued expenses	\$156.5	\$121.5
Inventories	4.5	5.1
Net operating loss carryforwards	67.9	71.8
R&D credits	6.1	9.6
Valuation allowance	(26.4)	(25.7)
Outside basis difference on investments held for sale	2.7	—
Total deferred tax assets	\$211.3	\$182.3
Deferred tax liabilities:		
Reserves and accrued expenses	\$14.3	\$39.6
Amortizable intangible assets	1,043.0	935.9
Plant and equipment	6.6	5.7
Accrued tax on unremitted foreign earnings	16.3	—
Outside basis difference on investments held for sale	10.0	—
Total deferred tax liabilities	\$1,090.2	\$981.2

As of December 31, 2018, the Company had approximately \$19.7 of tax-effected U.S. federal net operating loss carryforwards. Some of these net operating loss carryforwards have an indefinite carryforward period, and those that do not will begin to expire in 2021 if not utilized. The majority of the U.S. federal net operating loss carryforwards are subject to limitation under the Internal Revenue Code of 1986, as amended (“IRC”) Section 382; however, the Company expects to utilize such losses in their entirety prior to expiration. The U.S. federal net operating loss carryforwards decreased from 2017 to 2018 primarily due to current year utilization. The Company has approximately \$32.2 of tax-effected state net operating loss carryforwards (without regard to federal benefit of state). Some of these net operating loss carryforwards have an indefinite carryforward period, and those that do not will begin to expire in 2019 if not utilized. The state net operating loss carryforwards are primarily related to Florida and New Jersey, but the Company has smaller net operating losses in various other states. The Company has approximately \$22.8 of tax-effected foreign net operating loss carryforwards. Some of these net operating loss carryforwards have an indefinite carryforward period, and those that do not will begin to expire in 2019 if not utilized. Additionally, the Company has \$8.0 of U.S. federal and state research and development tax credit carryforwards (without regard to federal benefit of state). Some of these research and development credit carryforwards have an indefinite carryforward

period, and those that do not will begin to expire in 2019 if not utilized.

As of December 31, 2018, the Company determined that a total valuation allowance of \$26.4 was necessary to reduce U.S. federal and state deferred tax assets by \$9.1 and foreign deferred tax assets by \$17.3, where it was more likely than not that all of such

deferred tax assets will not be realized. As of December 31, 2018, the Company believes it is more likely than not that the remaining net deferred tax assets will be realized based on the Company's estimates of future taxable income and any applicable tax-planning strategies within various tax jurisdictions.

The Company recognizes in the consolidated financial statements only those tax positions determined to be "more likely than not" of being sustained upon examination based on the technical merits of the positions. A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

	2018	2017	2016
Beginning balance	\$52.2	\$38.7	\$26.1
Additions for tax positions of prior periods	2.4	24.8	3.5
Additions for tax positions of the current period	6.9	4.2	9.0
Additions due to acquisitions	4.4	—	5.1
Reductions for tax positions of prior periods	(0.4)	(11.2)	(1.2)
Reductions attributable to settlements with taxing authorities	—	(1.5)	(0.6)
Reductions attributable to lapses of applicable statute of limitations	(1.9)	(2.8)	(3.2)
Ending balance	\$63.6	\$52.2	\$38.7

The total amount of unrecognized tax benefits that, if recognized, would impact the effective tax rate is \$62.0. Interest and penalties related to unrecognized tax benefits were \$1.7 in 2018 and are classified as a component of income tax expense. Accrued interest and penalties were \$6.9 at December 31, 2018 and \$5.1 at December 31, 2017. During the next twelve months, it is reasonably possible that the unrecognized tax benefits may decrease by a net \$2.3, mainly due to anticipated statute of limitations lapses in various jurisdictions.

The Company and its subsidiaries are subject to examinations for U.S. federal income tax as well as income tax in various state, city and foreign jurisdictions. The Company's federal income tax returns for 2015 through the current period remain open to examination and the relevant state, city and foreign statutes vary. The Company does not expect the assessment of any significant additional tax in excess of amounts reserved.

The Tax Act was signed into U.S. law on December 22, 2017. The Tax Act contains provisions which impact the Company's income taxes including a reduction in the U.S. federal corporate income tax rate from 35% to 21%, a one-time deemed mandatory repatriation tax imposed on all undistributed foreign earnings, and the introduction of a modified territorial taxation system.

The SEC released Staff Accounting Bulletin No. 118 ("SAB 118") on December 22, 2017 to provide guidance where the accounting under ASC 740, Income Taxes, is incomplete for certain income tax effects of the Tax Act upon issuance of financial statements for the reporting period in which the Tax Act was enacted. SAB 118 provides that if a company could determine a reasonable estimate, that estimate should be reported as a provisional amount and adjusted during a measurement period. If a company is unable to determine a reasonable estimate, no related provisional amounts would be recorded until a reasonable estimate can be determined, within the measurement period. The measurement period extends until all necessary information has been obtained, prepared, and analyzed, but no longer than 12-months from the date of enactment of the Tax Act.

As of December 22, 2018, the Company has completed the accounting for all income tax effects of the Tax Act. The total impact is a one-time benefit of \$229.5, of which \$215.4 benefit was recorded as a provisional amount in 2017 and \$14.1 benefit was recorded during the measurement period.

The reduction in the U.S. federal corporate income tax rate from 35% to 21% and certain immaterial changes in tax basis required a remeasurement of the Company's deferred taxes. The impact of this remeasurement was a one-time benefit of \$379.0, of which the entirety was recorded as a provisional amount in 2017 with no adjustment recorded

during the measurement period.

The one-time deemed mandatory repatriation tax on all undistributed foreign earnings resulted in a one-time charge of \$102.4, of which \$110.7 charge was recorded as a provisional amount in 2017 and \$8.3 benefit was recorded during the measurement period. The Company has elected to pay this liability over 8 years.

The introduction of a modified territorial taxation system resulted in a change to the Company's indefinite reinvestment assertion with respect to its unremitted foreign earnings, including those unremitted foreign earnings that were taxed in the U.S. as part of the one-time deemed mandatory repatriation tax. The Company now intends to distribute all historical unremitted foreign earnings up to the amount of excess foreign cash, as well as all future foreign earnings that can be repatriated without incremental U.S.

federal tax cost. Any remaining outside basis differences relating to the Company's investments in foreign subsidiaries are no longer expected to be material and will be indefinitely reinvested. As a result of this change in assertion, the Company recorded a one-time charge of \$22.8, of which \$28.7 charge was recorded as a provisional amount in 2017 and \$5.8 benefit was recorded during the measurement period. This charge represents the future U.S. state and foreign tax cost of repatriation. The Company also incurred a one-time charge of \$24.2 resulting from the write-off of indirect benefits associated with uncertain tax positions. The entirety of this charge was recorded as a provisional amount in 2017 with no adjustment recorded during the measurement period.

In January 2018, the FASB released guidance on accounting for taxes on the global intangible low-taxed income ("GILTI") provisions of the Tax Act. The guidance provides that a company can, subject to an accounting policy election, either record the tax impacts of GILTI inclusions as a period cost, or account for GILTI in deferred taxes. The Company has now finalized its election and will account for the tax impacts of GILTI inclusions as a period cost.

(8) Long-Term Debt

On September 23, 2016, Roper entered into a five-year \$2.5 billion unsecured credit facility (the "2016 Facility") with JPMorgan Chase Bank, N.A., as administrative agent, and a syndicate of lenders, which replaced its previous \$1.85 billion unsecured credit facility dated as of July 27, 2012, as amended as of October 28, 2015 (the "2012 Facility"). The 2016 Facility comprises a five year \$2.5 billion revolving credit facility, which includes availability of up to \$150 for letters of credit. Roper may also, subject to compliance with specified conditions, request term loans or additional revolving credit commitments in an aggregate amount not to exceed \$500. At December 31, 2018, there were \$865 of outstanding borrowings under the 2016 Facility.

The 2016 Facility contains affirmative and negative covenants which, among other things, limit Roper's ability to incur new debt, enter into certain mergers and acquisitions, sell assets and grant liens, make restricted payments (including the payment of dividends on our common stock) and capital expenditures, or change its line of business. Roper is also subject to financial covenants which require the Company to limit its consolidated total leverage ratio and to maintain a consolidated interest coverage ratio. The most restrictive covenant is the consolidated total leverage ratio which is limited to 3.5 to 1.

On December 2, 2016, Roper amended the 2016 Facility to allow the consolidated total leverage ratio be increased, no more than twice during the term of the 2016 Facility, to 4.0 to 1 for a consecutive four quarter fiscal period per increase (or, for any portion of such four quarter fiscal period in which the maximum would be 4.25 to 1 pursuant to the 2016 facility amendment, 4.25 to 1). In conjunction with the Deltek acquisition (see Note 2), the Company increased the maximum consolidated total leverage ratio covenant to 4.25 to 1 through June 30, 2017 and 4.00 to 1 through December 31, 2017.

The Company was in compliance with its debt covenants throughout the years ended December 31, 2018 and 2017.

On August 28, 2018, the Company completed a public offering of \$700 aggregate principal amount of 3.65% senior unsecured notes due September 15, 2023 and \$800 aggregate principal amount of 4.20% senior unsecured notes due September 15, 2028 (the "2018 Offering"). The notes bear interest at a fixed rate of 3.65% and 4.20% per year, respectively, payable semi-annually in arrears on March 15 and September 15 of each year, beginning March 15, 2019.

On December 19, 2016, the Company completed a public offering of \$500 aggregate principal amount of 2.80% senior unsecured notes due December 15, 2021 and \$700 aggregate principal amount of 3.80% senior unsecured notes due December 15, 2026. The notes bear interest at a fixed rate of 2.80% and 3.80% per year, respectively, payable semi-annually in arrears on June 15 and December 15 of each year, beginning June 15, 2017.

On December 7, 2015, the Company completed a public offering of \$600 aggregate principal amount of 3.00% senior unsecured notes due December 15, 2020 and \$300 aggregate principal amount of 3.85% senior unsecured notes due December 15, 2025. The notes bear interest at a fixed rate of 3.00% and 3.85% per year, respectively, payable semi-annually in arrears on June 15 and December 15 of each year, beginning June 15, 2016.

On June 6, 2013, the Company completed a public offering of \$800 aggregate principal amount of 2.05% senior unsecured notes due October 1, 2018. The notes bear interest at a fixed rate of 2.05% per year, payable semi-annually in arrears on April 1 and October 1 of each year, beginning October 1, 2013.

On November 21, 2012, the Company completed a public offering of \$500 aggregate principal amount of 3.125% senior unsecured notes due November 15, 2022. The notes bear interest at a fixed rate of 3.125% per year, payable semi-annually in arrears on May 15 and November 15 of each year, beginning May 15, 2013.

In September 2009, the Company completed a public offering of \$500 aggregate principal amount of 6.25% senior unsecured notes due September 1, 2019 (the “2019 Notes”). The 2019 Notes bear interest at a fixed rate of 6.25% per year, payable semi-annually in arrears on March 1 and September 1 of each year, beginning March 1, 2010.

On October 1, 2018, \$800 of 2.05% senior unsecured notes matured and were repaid using cash on hand and revolver borrowings from the 2016 Facility.

A portion of the net proceeds of the 2018 Offering were used to redeem all of the \$500 of outstanding 2019 Notes. The Company incurred a debt extinguishment charge in connection with the redemption of the 2019 Notes of \$15.9, which represents the make-whole premium and unamortized deferred financing costs.

Roper may redeem some or all of these notes at any time or from time to time, at 100% of their principal amount, plus a make-whole premium based on a spread to U.S. Treasury securities.

The Company’s senior notes are unsecured senior obligations of the Company and rank equally in right of payment with all of Roper’s existing and future unsecured and unsubordinated indebtedness. The notes are effectively subordinated to any of its existing and future secured indebtedness to the extent of the value of the collateral securing such indebtedness. The notes are not guaranteed by any of Roper’s subsidiaries and are effectively subordinated to all existing and future indebtedness and other liabilities of Roper’s subsidiaries.

Total debt at December 31 consisted of the following:

	2018	2017
2016 Facility	\$865.0	\$1,270.0
\$800 2.050% senior notes due 2018	—	800.0
\$500 6.250% senior notes due 2019	—	500.0
\$600 3.000% senior notes due 2020	600.0	600.0
\$500 2.800% senior notes due 2021	500.0	500.0
\$500 3.125% senior notes due 2022	500.0	500.0
\$700 3.650% senior notes due 2023	700.0	—
\$300 3.850% senior notes due 2025	300.0	300.0
\$700 3.800% senior notes due 2026	700.0	700.0
\$800 4.200% senior notes due 2028	800.0	—
Other	3.0	3.1
Less unamortized debt issuance costs	(26.3)	(17.6)
Total debt	4,941.7	5,155.5
Less current portion	1.5	800.9
Long-term debt	\$4,940.2	\$4,354.6

The 2016 Facility and Roper’s \$4.1 billion senior notes provide substantially all of Roper’s daily external financing requirements. The interest rate on the borrowings under the 2016 Facility is calculated based upon various recognized indices plus a margin as defined in the credit agreement. At December 31, 2018, Roper’s fixed debt consisted of \$4.1 billion of senior notes, \$3.0 of other debt in the form of capital leases, several smaller facilities that allow for borrowings or the issuance of letters of credit in foreign locations to support Roper’s non-U.S. businesses and \$78.7 of outstanding letters of credit at December 31, 2018.

Future maturities of total debt during each of the next five years ending December 31 and thereafter were as follows:

2019	\$1.5
2020	601.5
2021	1,365.0

2022	500.0
2023	700.0
Thereafter	1,800.0
Total	\$4,968.0

51

(9) Fair Value

Roper's debt at December 31, 2018 included \$4,100 of fixed-rate senior notes with the following fair values:

\$600 3.000% senior notes due 2020	599
\$500 2.800% senior notes due 2021	490
\$500 3.125% senior notes due 2022	488
\$700 3.650% senior notes due 2023	697
\$300 3.850% senior notes due 2025	295
\$700 3.800% senior notes due 2026	682
\$800 4.200% senior notes due 2028	793

The fair values of the senior notes are based on the trading prices of the notes, which the Company has determined to be Level 2 in the FASB fair value hierarchy. Most of Roper's other borrowings at December 31, 2018 were at various interest rates that adjust relatively frequently under its credit facility. The estimated fair value for these borrowings at December 31, 2018 approximated the carrying value of these borrowings.

(10) Retirement and Other Benefit Plans

Roper maintains four defined contribution retirement plans under the provisions of Section 401(k) of the IRC covering substantially all U.S. employees. Roper partially matches employee contributions. Costs related to all such plans were \$31.2, \$27.6 and \$23.7 for 2018, 2017 and 2016, respectively.

Roper also maintains various defined benefit retirement plans covering employees of non-U.S. and certain U.S. subsidiaries and a plan that supplements certain employees for the contribution ceiling applicable to the Section 401(k) plans. The costs and accumulated benefit obligations associated with each of these plans were not material.

(11) Stock-Based Compensation

The Roper Technologies, Inc. 2016 Incentive Plan ("2016 Plan") is a stock-based compensation plan used to grant incentive stock options, nonqualified stock options, restricted stock, stock appreciation rights or equivalent instruments to Roper's employees, officers and directors. At December 31, 2018, 6,019 shares were available to grant under the 2016 Plan.

Under the Roper Technologies, Inc., Employee Stock Purchase Plan ("ESPP"), all employees in the U.S. and Canada are eligible to designate up to 10% of eligible earnings to purchase Roper's common stock at a 5% discount to the average closing price of its common stock at the beginning and end of a quarterly offering period. Common stock sold to the employees may be either treasury stock, stock purchased on the open market, or newly issued shares.

Stock based compensation expense for the years ended December 31, 2018, 2017 and 2016 was as follows:

	2018	2017	2016
Stock based compensation	\$133.8	\$83.1	\$78.8
Tax benefit recognized in net earnings	28.1	29.1	27.6

In 2018, this expense included \$29.4 associated with accelerated vesting due to the passing of our former executive chairman.

Stock Options – Stock options are typically granted at prices not less than 100% of market value of the underlying stock at the date of grant. Stock options typically vest over a period of three to five years from the grant date and expire ten years after the grant date. The Company recorded \$23.2, \$18.3, and \$20.1 of compensation expense relating

to outstanding options during 2018, 2017 and 2016, respectively, as a component of general and administrative expenses, primarily at corporate.

The Company estimates the fair value of its option awards using the Black-Scholes option valuation model. The stock volatility for each grant is measured using the weighted-average of historical daily price changes of the Company's common stock over the most recent period equal to the expected life of the grant. The expected term of options granted is derived from historical data to estimate option exercises and employee forfeitures, and represents the period of time that options granted are expected to be outstanding. The risk-free rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in

effect at the time of grant. The weighted-average fair value of options granted in 2018, 2017 and 2016 were calculated using the following weighted-average assumptions:

	2018	2017	2016
Weighted-average fair value (\$)	57.75	40.87	34.57
Risk-free interest rate (%)	2.65	2.03	1.44
Average expected option life (years)	5.32	5.26	5.20
Expected volatility (%)	18.05	18.74	21.35
Expected dividend yield (%)	0.59	0.67	0.70

The following table summarizes the Company's activities with respect to its share-based compensation plans for the years ended December 31, 2018 and 2017:

	Number of shares	Weighted-average exercise price per share	Weighted-average contractual term	Aggregate intrinsic value
Outstanding at January 1, 2017	3.420	\$ 121.31		
Granted	0.609	210.56		
Exercised	(0.645)	95.14		
Canceled	(0.188)	170.75		
Outstanding at December 31, 2017	3.196	140.68	6.09	\$ 368.6
Granted	0.723	279.10		
Exercised	(0.650)	90.43		
Canceled	(0.064)	211.57		
Outstanding at December 31, 2018	3.205	180.69	6.58	\$ 284.0
Exercisable at December 31, 2018	1.627	\$ 129.39	4.71	\$ 223.1

The following table summarizes information for stock options outstanding at December 31, 2018:

Outstanding options				Exercisable options	
Exercise price	Number	Average exercise price	Average remaining life (years)	Number	Average exercise price
\$41.78 - \$60.80	0.121	\$48.49	0.8	0.121	\$48.49
\$60.80 - \$91.21	0.149	72.06	2.2	0.149	72.06
\$91.21 - \$121.61	0.359	107.23	3.5	0.359	107.23
\$121.61 - \$152.01	0.436	136.54	5.1	0.436	136.54
\$152.01 - \$182.41	0.783	169.01	6.8	0.498	167.63
\$182.41 - \$212.81	0.534	201.40	8.1	0.055	186.22
\$212.81 - \$243.22	0.097	230.02	8.5	0.008	227.94
\$243.22 - \$273.62	0.027	258.82	9.0	0.001	260.01
\$273.62 - \$304.02	0.699	279.24	9.2	—	—
\$41.78 - 304.02	3.205	\$180.69	6.6	1.627	\$129.39

At December 31, 2018, there was \$45.4 of total unrecognized compensation expense related to nonvested options granted under the Company's share-based compensation plans. That cost is expected to be recognized over a weighted-average period of 2.5 years. The total intrinsic value of options exercised in 2018, 2017 and 2016 was \$124.6, \$90.6 and \$38.9, respectively. Cash received from option exercises under all plans in 2018 and 2017 was \$58.8 and \$61.3, respectively.

Restricted Stock Grants - During 2018 and 2017, the Company granted 0.410 and 0.410 shares, respectively, of restricted stock to certain employee and director participants under its share-based compensation plans. Restricted stock grants generally vest over a period of 1 to 4 years. The Company recorded \$109.7, \$63.0 and \$57.8 of compensation expense related to outstanding shares of restricted stock held by employees and directors during 2018, 2017 and 2016, respectively. In 2018, this expense included \$29.4

associated with accelerated vesting due to the passing of our former executive chairman. A summary of the Company's nonvested shares activity for 2018 and 2017 is as follows:

	Number of shares	Weighted-average grant date fair value
Nonvested at December 31, 2016	0.953	\$ 164.62
Granted	0.410	205.88
Vested	(0.387)	155.95
Forfeited	(0.117)	173.53
Nonvested at December 31, 2017	0.859	\$ 187.01
Granted	0.410	278.29
Vested	(0.492)	204.24
Forfeited	(0.038)	191.51
Nonvested at December 31, 2018	0.739	\$ 225.93

At December 31, 2018, there was \$86.6 of total unrecognized compensation expense related to nonvested awards granted to both employees and directors under the Company's share-based compensation plans. That cost is expected to be recognized over a weighted-average period of 2.1 years. Unrecognized compensation expense related to nonvested shares of restricted stock grants is recorded as a reduction to additional paid-in capital in stockholder's equity at December 31, 2018.

Employee Stock Purchase Plan - During 2018, 2017 and 2016, participants of the ESPP purchased 0.020, 0.020 and 0.019 shares, respectively, of Roper's common stock for total consideration of \$5.4, \$4.2, and \$3.3, respectively. All of these shares were purchased from Roper's treasury shares.

(12) Contingencies

Roper, in the ordinary course of business, is the subject of, or a party to, various pending or threatened legal actions, including product liability and employment practices that, in general, are based upon claims of the kind that have been customary over the past several years and which the Company is vigorously defending. After analyzing the Company's contingent liabilities on a gross basis and, based upon past experience with resolution of its product liability and employment practices claims and the limits of the primary, excess, and umbrella liability insurance coverages that are available with respect to pending claims, management believes that adequate provision has been made to cover any potential liability not covered by insurance, and that the ultimate liability, if any, arising from these actions should not have a material adverse effect on Roper's consolidated financial position, results of operations or cash flows.

Roper or its subsidiaries have been named defendants along with numerous industrial companies in asbestos-related litigation claims in certain U.S. states. No significant resources have been required by Roper to respond to these cases and Roper believes it has valid defenses to such claims and, if required, intends to defend them vigorously. Given the state of these claims it is not possible to determine the potential liability, if any. In April 2018, a stockholder derivative complaint was filed in Sarasota County, Florida against the Company, nominally, and its directors and former chairman & chief executive officer ("CEO"), alleging the directors breached their fiduciary duties and were unjustly enriched by the compensation earned by the nonexecutive directors and the CEO in 2015 and 2016. A motion to dismiss the complaint is pending.

Roper's rent expense was \$61.7, \$58.6 and \$44.9 for 2018, 2017 and 2016, respectively. Roper's future minimum property lease commitments are as follows:

2019	\$53.2
2020	48.5

2021	42.2
2022	33.7
2023	27.4
Thereafter	82.8
Total	\$287.8

A summary of the Company's warranty accrual activity is presented below:

	2018	2017	2016
Balance, beginning of year	\$10.6	\$10.5	\$10.2
Additions charged to costs and expenses	10.6	10.8	15.9
Deductions	(10.3)	(11.2)	(15.5)
Warranty related to liabilities held for sale	(1.5)	—	—
Other	(0.1)	0.5	(0.1)
Balance, end of year	\$9.3	\$10.6	\$10.5

Other included warranty balances at acquired businesses at the dates of acquisition, the effects of foreign currency translation adjustments, reclassifications and other.

As of December 31, 2018, Roper had \$78.7 of letters of credit issued to guarantee its performance under certain services contracts or to support certain insurance programs and \$582.6 of outstanding surety bonds. Certain contracts, primarily those involving public sector customers, require Roper to provide a surety bond as a guarantee of its performance of contractual obligations.

(13) Segment and Geographic Area Information

Roper's operations are reported in four segments around common customers, markets, sales channels, technologies and common cost opportunities. The segments are: RF Technology, Medical & Scientific Imaging, Industrial Technology and Energy Systems & Controls. The RF Technology segment provides comprehensive application management software, software-as-a-service applications and products and systems that utilize RFID communication technology. The Medical & Scientific Imaging segment offers medical products and software and high performance digital imaging products and software. Products included within the Industrial Technology segment are water and fluid handling pumps, flow measurement and metering equipment, industrial valves and controls, materials analysis equipment and consumables and industrial leak testing. The Energy Systems & Controls segment's products include control systems, equipment and consumables for fluid properties testing, vibration sensors and other non-destructive inspection and measurement products and services. Roper's management structure and internal reporting are aligned consistently with these four segments.

Prior to the end of the first quarter of 2019, Roper's management expects to finalize the realignment of the Company's reportable segments. Roper's management believes the new reporting structure continues to provide a transparent view into the operations of the Company while more closely aligning the structure with management's view given the evolution the Company's portfolio has undergone in recent years. The Company expects to report the first quarter 2019 interim financial statements under the new segment structure with prior periods recasted to reflect the change.

There were no material transactions between Roper's business segments during 2018, 2017 and 2016. Sales between geographic areas are primarily of finished products and are accounted for at prices intended to represent third-party prices. Operating profit by business segment and by geographic area is defined as net revenues less operating costs and expenses. These costs and expenses do not include unallocated corporate administrative expenses. Items below income from operations on Roper's statement of earnings are not allocated to business segments.

Operating assets are those assets used primarily in the operations of each business segment or geographic area. Corporate assets are principally comprised of cash and cash equivalents, deferred tax assets, recoverable insurance claims, deferred compensation assets and property and equipment.

Selected financial information by business segment for 2018, 2017 and 2016 follows:

	RF Technology	Medical & Scientific Imaging	Industrial Technology	Energy Systems & Controls	Corporate	Total

Summarized data for Roper's U.S. and foreign operations (principally in Canada, Europe and Asia) for 2018, 2017 and 2016, based upon the country of origin of the Roper entity making the sale, was as follows:

	United States	Non-U.S.	Eliminations	Total
2018				
Sales to unaffiliated customers	\$4,176.2	\$1,015.0	\$ —	\$5,191.2
Sales between geographic areas	143.9	137.0	(280.9)) —
Net revenues	\$4,320.1	\$1,152.0	\$ (280.9)) \$5,191.2
Long-lived assets ¹	\$145.2	\$30.0	\$ —	\$175.2
2017				
Sales to unaffiliated customers	\$3,679.1	\$928.4	\$ —	\$4,607.5
Sales between geographic areas	133.2	187.7	(320.9)) —
Net revenues	\$3,812.3	\$1,116.1	\$ (320.9)) \$4,607.5
Long-lived assets	\$144.0	\$31.4	\$ —	\$175.4
2016				
Sales to unaffiliated customers	\$2,978.5	\$811.4	\$ —	\$3,789.9
Sales between geographic areas	137.3	109.4	(246.7)) —
Net revenues	\$3,115.8	\$920.8	\$ (246.7)) \$3,789.9
Long-lived assets	\$146.0	\$21.0	\$ —	\$167.0

¹ Excludes Long-lived assets of \$7.6 associated with the Scientific Imaging businesses classified as held for sale. See Note 2 of the Notes to Consolidated Financial Statements included in this Annual Report.

Export sales from the U.S. during the years ended December 31, 2018, 2017 and 2016 were \$578, \$513 and \$460, respectively. In the year ended December 31, 2018, these exports were shipped primarily to Asia (34%), Europe (27%), Canada (16%), Middle East (13%) and other (10%).

Sales to customers outside the U.S. accounted for a significant portion of Roper's revenues. Sales are attributed to geographic areas based upon the location where the product is ultimately shipped. Roper's net revenues for the years ended December 31, 2018, 2017 and 2016 are shown below by region, except for Canada, which is presented separately as it is the only country in which Roper has had greater than 4% of total revenues for any of the three years presented:

	RF Technology	Medical & Scientific Imaging	Industrial Technology	Energy Systems & Controls	Total
2018					
Canada	\$ 90.8	\$ 19.2	\$ 73.7	\$ 27.6	\$211.3

Asia	12.0	111.8	52.1	126.8	302.7
Middle East	50.6	10.1	3.0	37.5	101.2
Rest of the world	17.0	21.6	20.7	46.2	105.5
Total	\$ 204.0	\$ 393.6	\$ 225.5	\$ 351.9	\$1,175.0

(14) Concentration of Risk

Financial instruments which potentially subject the Company to credit risk consist primarily of cash, trade receivables and unbilled receivables.

The Company maintains cash with various major financial institutions around the world. The Company limits the amount of credit exposure with any one financial institution and believes that no significant concentration of credit risk exists with respect to cash balances.

Trade and unbilled receivables subject the Company to the potential for credit risk with customers. To reduce credit risk, the Company performs ongoing evaluations of its customers' financial condition.

(15) Contract Balances

Contract balances are set forth in the following table:

Balance Sheet Account	December 31, 2018	January 1, 2018	Change
Unbilled receivables - current	\$ 169.4	\$ 149.1	\$ 20.3
Contract liabilities - current ⁽¹⁾	(714.1)	(605.5)	(108.6)
Deferred revenue - non-current	(29.8)	(31.8)	2.0
Net contract assets/(liabilities)	\$(574.5)	\$(488.2)	\$(86.3)

⁽¹⁾ Consists of "Deferred revenue," billings in-excess of revenues ("BIE") and customer deposits. BIE and customer deposits are reported in "Other accrued liabilities" in our consolidated balance sheets.

The change in our net contract assets/(liabilities) from January 1, 2018 to December 31, 2018 was due primarily to the timing of payments and invoicing relating to SaaS and PCS renewals, partially offset by revenues recognized in the year ended December 31, 2018 of \$605.5, related to our contract liability balances at January 1, 2018. In addition, the impact of the 2018 business acquisitions increased net contract liabilities by \$35.8, partially offset by the classification of our scientific imaging businesses as held for sale, which decreased net contract liabilities by \$10.7.

In order to determine revenues recognized in the period from contract liabilities, we allocate revenue to the individual deferred revenue, BIE or customer deposit balance outstanding at the beginning of the year until the revenue exceeds that balance.

Impairment losses recognized on our accounts receivable and unbilled receivables were immaterial in the year ended December 31, 2018.

(16) Quarterly Financial Data (unaudited)

	First Quarter	Second Quarter	Third Quarter	Fourth Quarter
2018				
Net revenues	\$1,202.5	\$1,293.7	\$1,318.7	\$1,376.3
Gross profit	750.5	815.9	840.0	873.1
Income from operations	300.2	354.3	377.5	364.4
Net earnings	211.3	228.4	247.6	257.1
Earnings per share:				
Basic	\$2.05	\$2.21	\$2.39	2.49
Diluted	\$2.03	\$2.19	\$2.37	2.46
2017				
Net revenues	\$1,086.3	\$1,134.7	\$1,159.9	\$1,226.6
Gross profit	667.6	705.7	726.4	765.1
Income from operations	258.3	294.2	310.8	346.9
Net earnings	158.1	179.5	190.3	443.9
Earnings per share:				
Basic	\$1.55	\$1.76	\$1.86	\$4.33
Diluted	\$1.53	\$1.74	\$1.84	\$4.27

The sum of the four quarters may not agree with the total for the year due to rounding.

ROPER TECHNOLOGIES, INC. AND SUBSIDIARIES

Schedule II – Consolidated Valuation and Qualifying Accounts

Years ended December 31, 2018, 2017 and 2016

Balance at beginning of year (in millions)	Additions charged to costs and expenses	Deductions	Other	Balance at end of year
---	---	------------	-------	---------------------------------

Allowance for doubtful accounts and sales allowances

2018	\$ 12.7	\$ 11.9	\$ (7.3)	\$ 5.8	\$ 23.1
2017	14.5	4.3	(5.9)	(0.2)	12.7
2016	12.4	1.8	(2.8)	3.1	14.5

Reserve for inventory obsolescence

2018	\$ 38.1	\$ 6.7	\$ (4.5)	\$ (10.0)	\$ 30.3
2017	37.2	5.3	(6.3)	1.9	38.1
2016	34.0	10.1	(6.6)	(0.3)	37.2

Deductions from the allowance for doubtful accounts represented the net write-off of uncollectible accounts receivable. Deductions from the inventory obsolescence reserve represented the disposal of obsolete items.

Other included the allowance for doubtful accounts and reserve for inventory obsolescence of acquired businesses, the effects of foreign currency translation adjustments for those companies whose functional currency was not the U.S. dollar, reclassifications as held for sale and other.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

There have been no changes in accountants or disagreements with accountants on accounting and financial disclosures.

ITEM 9A. CONTROLS AND PROCEDURES

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate control over financial reporting, as such term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f). Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control-Integrated Framework (2013) issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on our evaluation under the framework in Internal Control-Integrated Framework, our management concluded that our internal control over financial reporting was effective as of December 31, 2018. Our internal control over financial reporting as of December 31, 2018 has been audited by PricewaterhouseCoopers LLP, an independent registered public accounting firm, as stated in their report which is included herein.

Our management excluded acquisitions completed during 2018 from its assessment of internal control over financial reporting as of December 31, 2018. These acquisitions are wholly-owned subsidiaries whose excluded aggregate assets represent less than 1%, and whose aggregate total revenues represent less than 2% of the related consolidated financial statement amounts as of and for the year ended December 31, 2018.

Evaluation of Disclosure Controls and Procedures

As required by SEC rules, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this report. This evaluation was carried out under the supervision and with the participation of our management, including our principal executive officer and principal financial officer. Based on this evaluation, we have concluded that our disclosure controls and procedures were effective as of December 31, 2018.

Disclosure controls and procedures are our controls and other procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act are accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting that occurred during the fourth quarter of 2018 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

There were no disclosures of any information required to be filed on Form 8-K during the fourth quarter of 2018 that were not filed.

PART III

Except as otherwise indicated, the following information required by the Instructions to Form 10-K is incorporated herein by reference from the sections of the Roper Proxy Statement for the annual meeting of shareholders (“2019 Proxy Statement”), as specified below:

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We incorporate the information required by this item by reference to our 2019 Proxy Statement.

ITEM 11. EXECUTIVE
COMPENSATION

We incorporate the information required by this item by reference to our 2019 Proxy Statement.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND
RELATED STOCKHOLDER MATTERS

(All share amounts are in millions)

Other than the information set forth below, we incorporate the information required by this item by reference to our 2019 Proxy Statement.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2018 regarding compensation plans (including individual compensation arrangements) under which our equity securities are authorized for issuance.

Plan Category	(a) Number of Securities to be Issued Upon Exercise of Outstanding Options, Warrants and Rights	(b) Weighted-Average Exercise Price of Outstanding Options, Warrants and Rights	(c) Number of Securities Remaining Available for Future Issuance Under Equity Compensation Plans (Excluding Securities Reflected in Column (a))
Equity Compensation Plans Approved by Shareholders ⁽¹⁾			
Stock options	3.205	\$ 180.69	
Restricted stock awards ⁽²⁾	0.739	—	
Subtotal	3.944		6.019
Equity Compensation Plans Not Approved by Shareholders	—	—	—
Total	3.944	\$ —	6.019

- (1) Consists of the Amended and Restated 2006 Incentive Plan (no additional equity awards may be granted under this plan) and the 2016 Incentive Plan.
- (2) The weighted-average exercise price is not applicable to restricted stock awards.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS AND DIRECTOR INDEPENDENCE

We incorporate the information required by this item by reference to our 2019 Proxy Statement.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

We incorporate the information required by this item by reference to our 2019 Proxy Statement.

PART IV

ITEM 15. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES

(a) The following documents are filed as a part of this Annual Report.

(1) Consolidated Financial Statements: The following consolidated financial statements are included in Part II, Item 8 of this report.

Consolidated Balance Sheets as of December 31, 2018 and 2017

Consolidated Statements of Earnings for the Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Comprehensive Income for the Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Stockholders' Equity for the Years ended December 31, 2018, 2017 and 2016

Consolidated Statements of Cash Flows for the Years ended December 31, 2018, 2017 and 2016

Notes to Consolidated Financial Statements

(2) Consolidated Valuation and Qualifying Accounts for the Years ended December 31, 2018, 2017 and 2016
