or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934

For the transition period from _____ to _____

Commission file number: 1-11884

ROYAL CARIBBEAN CRUISES LTD.
(Exact name of registrant as specified in its charter)

Republic of Liberia

(State or other jurisdiction of
incorporation or organization)

98-0081645
(I.R.S. Employer Identification No.)

1050 Caribbean Way, Miami, Florida 33132
(Address of principal executive offices) (zip code)
(305) 539-6000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class _____ Name of each exchange on which
registered

Common Stock, par value \$.01 per share _____ New York Stock Exchange

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities
Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the
Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was
required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if
any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T
 (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required
to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained
herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer,
or a smaller reporting company (See the definitions of "large accelerated filer," "accelerated filer" and "smaller
reporting company" in Rule 12b-2 of the Exchange Act).

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a

smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No
The aggregate market value of the registrant's common stock at June 30, 2014 (based upon the closing sale price of the common stock on the New York Stock Exchange on June 30, 2014) held by those persons deemed by the registrant to be non-affiliates was approximately \$9.9 billion. Shares of the registrant's common stock held by each executive officer and director and by each entity or person that, to the registrant's knowledge, owned 10% or more of the registrant's outstanding common stock as of June 30, 2014 have been excluded from this number in that these persons may be deemed affiliates of the registrant. This determination of possible affiliate status is not necessarily a conclusive determination for other purposes.

There were 219,620,652 shares of common stock outstanding as of February 12, 2015.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's Definitive Proxy Statement relating to its 2015 Annual Meeting of Shareholders are incorporated by reference in Part III, Items 10-14 of this Annual Report on Form 10-K as indicated herein.

PART I

As used in this Annual Report on Form 10-K, the terms “Royal Caribbean,” the “Company,” “we,” “our” and “us” refer to Royal Caribbean Cruises Ltd. and, depending on the context, Royal Caribbean Cruises Ltd.’s consolidated subsidiaries and/or affiliates. The terms “Royal Caribbean International,” “Celebrity Cruises,” “Pullmantur,” “Azamara Club Cruises,” “CDF Croisières de France,” and “TUI Cruises” refer to our cruise brands. However, because TUI Cruises is an unconsolidated investment, our operating results and other disclosures herein do not include TUI Cruises unless otherwise specified. In accordance with cruise vacation industry practice, the term “berths” is determined based on double occupancy per cabin even though many cabins can accommodate three or more passengers.

This Annual Report on Form 10-K also includes trademarks, trade names and service marks of other companies. Use or display by us of other parties’ trademarks, trade names or service marks is not intended to and does not imply a relationship with, or endorsement or sponsorship of us by, these other parties other than as described herein.

Item 1. Business.

General

We are the world’s second largest cruise company. We own Royal Caribbean International, Celebrity Cruises, Pullmantur, Azamara Club Cruises, CDF Croisières de France and a 50% joint venture interest in TUI Cruises. Together, these six brands operate a combined 43 ships in the cruise vacation industry with an aggregate capacity of approximately 105,750 berths as of December 31, 2014.

Our ships operate on a selection of worldwide itineraries that call on approximately 480 destinations on all seven continents. In addition to our headquarters in Miami, Florida, we have offices and a network of international representatives around the world which primarily focus on our global guest sourcing.

We compete principally on the basis of exceptional service provided by our crew, innovation and quality of ships, variety of itineraries, choice of destinations and price. We believe that our commitment to build state-of-the-art ships and to invest in the maintenance and upgrade of our fleet to, among other things, incorporate our latest signature innovations, allows us to continue to attract new and loyal repeat guests.

We believe cruising continues to be a popular vacation choice due to its inherent value, extensive itineraries and variety of shipboard and shoreside activities. In addition, we believe that our products appeal to a large consumer base and are not dependent on a single market or demographic.

Royal Caribbean was founded in 1968 as a partnership. Its corporate structure evolved over the years and the current parent corporation, Royal Caribbean Cruises Ltd., was incorporated on July 23, 1985 in the Republic of Liberia under the Business Corporation Act of Liberia.

Our Brands

Our global brands include Royal Caribbean International, Celebrity Cruises, and Azamara Club Cruises. These brands are complemented by our Pullmantur brand, which has been tailored to serve the cruise markets in Spain, Portugal and Latin America; our CDF Croisières de France brand, which provides us with a tailored product targeted at the French market; and our 50% joint venture, TUI Cruises, which is specifically tailored for the German market.

The operating results of all of our brands are included in our consolidated results of operations, except for TUI Cruises, which is accounted for under the equity method of accounting. See Note 1. General and Note 6. Other Assets to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further details.

We believe our global brands possess the versatility to enter multiple cruise market segments within the cruise vacation industry. Although each of our brands has its own marketing style as well as ships and crews of various sizes, the nature of the products sold and services delivered by our brands share a common base (i.e., the sale and provision of cruise vacations). Our brands also have similar itineraries as well as similar cost and revenue components. In

1

Table of Contents

addition, our brands source passengers from similar markets around the world and operate in similar economic environments with a significant degree of commercial overlap. As a result, we strategically manage our brands as a single business with the ultimate objective of maximizing long-term shareholder value.

Royal Caribbean International

We currently operate 22 ships with an aggregate capacity of approximately 64,150 berths under our Royal Caribbean International brand, offering cruise itineraries that range from two to 18 nights. In October 2014, Royal Caribbean International took delivery of the 4,150 berth Quantum of the Seas, its first newbuild since 2010 and the first of a new generation of cruise ships. In addition, we currently have four ships on order for our Royal Caribbean International brand with an aggregate capacity of approximately 19,200 berths. These include our second Quantum-class ship, which is scheduled to enter service in the second quarter of 2015, our third Oasis-class ship and third Quantum-class ship, each of which is scheduled to enter service in the second quarter of 2016 and our fourth Oasis-class ship, which is scheduled to enter service in the second quarter of 2018. Additionally, we announced that we will redeploy Majesty of the Seas from Royal Caribbean International to Pullmantur in 2016. Royal Caribbean International offers a variety of itineraries to destinations worldwide, including Alaska, Asia, Australia, Bahamas, Bermuda, Canada, the Caribbean, Europe, the Panama Canal, South America and New Zealand.

Royal Caribbean International is positioned at the upper end of the contemporary segment of the cruise vacation industry, generally characterized by cruises that are seven nights or shorter and feature a casual ambiance as well as a variety of activities and entertainment venues. We believe that the quality of the Royal Caribbean International brand also enables it to attract guests from the premium segment, which is generally characterized by cruises that are seven to 14 nights and appeal to the more experienced guest who is usually more affluent. This allows Royal Caribbean International to achieve market coverage that is among the broadest of any of the major cruise brands in the cruise vacation industry. Royal Caribbean International's strategy is to attract an array of vacationing guests by providing a wide variety of itineraries and cruise lengths with multiple innovative options for onboard dining, entertainment and other onboard activities. We believe that the variety and quality of Royal Caribbean International's product offerings represent excellent value to consumers, especially to couples and families traveling with children. Because of the brand's extensive and innovative product offerings, we believe Royal Caribbean International is well positioned to attract new consumers to the cruise vacation industry and to continue to bring loyal repeat guests back for their next vacation.

Royal Caribbean International has a ship upgrade program designed to incorporate certain of the most popular features of our newer ships across the fleet. From 2011 to 2014, a total of 14 ships have been upgraded under this program. An additional four ships are currently undergoing or scheduled for upgrades in 2015.

Celebrity Cruises

We currently operate 11 ships with an aggregate capacity of approximately 24,900 berths under our Celebrity Cruises brand, offering cruise itineraries that range from two to 23 nights. In February 2015, we entered into construction agreements with STX France to build two new ships of a new generation of Celebrity Cruises ships. These 2,900-berth ships, being developed under the name "Project Edge", are expected to enter service in the second half of 2018 and the first half of 2020, respectively. In September 2014, we sold Celebrity Century to a subsidiary of Skysea Holding International Ltd. ("Skysea Holding"). As part of the sale agreement, we agreed to charter the ship from the buyer until April 2015 to fulfill existing passenger commitments. As discussed further below, we acquired a 35% equity stake in Skysea Holding in November 2014. Celebrity Cruises offers a variety of itineraries to popular destinations, including Alaska, Asia, Australia, Bermuda, Canada, the Caribbean, Europe, Hawaii, New Zealand, the Panama Canal and South America.

Celebrity Cruises is positioned within the premium segment of the cruise vacation industry. Celebrity Cruises' strategy is to target experienced cruisers and quality and service oriented new cruisers by delivering a destination-rich experience onboard upscale ships that offer, among other things, luxurious accommodations, a high staff-to-guest ratio, fine dining, personalized service and extensive spa facilities. In 2013, the brand completed a ship upgrade

Table of Contents

program in order to incorporate well-received concepts from its Solstice-class ships.

Azamara Club Cruises

We currently operate two ships with an aggregate capacity of approximately 1,400 berths under our Azamara Club Cruises brand, offering cruise itineraries that range from four to 20 nights. Azamara Club Cruises is designed to serve the up-market segment of the North American, United Kingdom and Australian markets. The up-market segment incorporates elements of the premium segment and the luxury segment which is generally characterized by smaller ships, high standards of accommodation and service, higher prices and exotic itineraries.

Azamara Club Cruises' strategy is to deliver distinctive destination experiences through unique itineraries with more overnights and longer stays as well as comprehensive tours allowing guests to experience the destination in more depth. Azamara Club Cruises' focus is to attract experienced travelers who are looking for more comprehensive destination experiences, and who seek a more intimate onboard experience and a high level of service. In furtherance of this strategy, Azamara Club Cruises includes as part of the base price of the cruise certain complimentary onboard services, amenities and activities which are not normally included in the base price of most other cruise lines. Azamara Club Cruises sails in Asia, Northern and Western Europe, the Mediterranean, South and Central America, the less-traveled islands of the Caribbean and North America.

Pullmantur

We currently operate three ships with an aggregate capacity of approximately 6,200 berths under our Pullmantur brand, offering cruise itineraries that range from two to 17 nights throughout South America, the Caribbean and Europe. Additionally, we announced that Majesty of the Seas will be redeployed from Royal Caribbean International to Pullmantur in 2016. Pullmantur serves the contemporary segment of the Spanish, Portuguese and Latin American cruise markets. Pullmantur's strategy is to attract cruise guests from these target markets by providing a variety of cruising options and onboard activities directed at couples and families traveling with children. Over the last few years, Pullmantur has systematically increased its focus on Latin America and has expanded its presence in that market.

In order to facilitate Pullmantur's ability to focus on its core cruise business, on March 31, 2014, Pullmantur sold the majority of its interest in its non-core businesses. These non-core businesses included Pullmantur's land-based tour operations, travel agency and 49% interest in its air business. In connection with the sale agreement, we retained a 19% interest in each of the non-core businesses as well as 100% ownership of the aircraft which are being dry leased to Pullmantur Air. See Note 1. General and Note 6. Other Assets to our consolidated financial statements under Item 8. Financial Statements and Supplementary Data for further details.

CDF Croisières de France

We currently operate two ships with an aggregate capacity of approximately 2,800 berths under our CDF Croisières de France brand. CDF Croisières de France offers seasonal itineraries to the Mediterranean, Europe and Caribbean. During the winter season, Zenith is deployed to the Pullmantur brand for sailings in South America. CDF Croisières de France is designed to serve the contemporary segment of the French cruise market by providing a brand tailored for French cruise guests.

TUI Cruises

TUI Cruises is a joint venture owned 50% by us and 50% by TUI AG, a German tourism and shipping company, and is designed to serve the contemporary and premium segments of the German cruise market by offering a product

tailored for German guests. All onboard activities, services, shore excursions and menu offerings are designed to suit the preferences of this target market. TUI Cruises operates three ships, Mein Schiff 1, Mein Schiff 2 and Mein Schiff 3, with an aggregate capacity of approximately 6,300 berths. In addition, TUI Cruises currently has three newbuild ships on order at the Finnish Meyer Turku yard with an aggregate capacity of approximately 7,500 berths: Mein Schiff 4, scheduled for delivery in the second quarter of 2015, Mein Schiff 5, scheduled for delivery in the third quarter of

3

Table of Contents

2016 and Mein Schiff 6, scheduled for delivery in the second quarter of 2017.

Other

In November 2014, we formed a strategic partnership with Ctrip.com International Ltd. ("Ctrip"), a Chinese travel service provider, to operate a new cruise brand known as SkySea Cruises. SkySea Cruises will offer a custom-tailored product for Chinese cruise guests operating the ship purchased from Celebrity Cruises. The new cruise line will begin service in the second quarter of 2015. We and Ctrip each own 35% of the new company, Skysea Holding, with the balance being owned by Skysea Holding management and a private equity fund.

Industry

Cruising is considered a well-established vacation sector in the North American market, a growing sector over the long-term in the European market and a developing but promising sector in several other emerging markets. Industry data indicates that market penetration rates are still low and that a significant portion of cruise guests carried are first-time cruisers. We believe this presents an opportunity for long-term growth and a potential for increased profitability.

The following table details market penetration rates for North America and Europe computed based on the number of annual cruise guests as a percentage of the total population:

Year	North America(1)	Europe(2)
2010	3.1%	1.1%
2011	3.4%	1.1%
2012	3.3%	1.2%
2013	3.4%	1.2%
2014	3.5%	1.3%

Source: Our estimates are based on a combination of data obtained from publicly available sources including the (1)International Monetary Fund and Cruise Lines International Association ("CLIA"). Rates are based on cruise guests carried for at least two consecutive nights. Includes the United States of America and Canada.

(2) Source: Our estimates are based on a combination of data obtained from publicly available sources including the International Monetary Fund and CLIA Europe, formerly European Cruise Council.

We estimate that the global cruise fleet was served by approximately 457,000 berths on approximately 283 ships at the end of 2014. There are approximately 33 ships with an estimated 98,650 berths that are expected to be placed in service in the global cruise market between 2015 and 2019, although it is also possible that ships could be ordered or taken out of service during these periods. We estimate that the global cruise industry carried 22.0 million cruise guests in 2014 compared to 21.3 million cruise guests carried in 2013 and 20.9 million cruise guests carried in 2012.

Table of Contents

The following table details the growth in global weighted average berths and the global, North American and European cruise guests over the past five years:

Year	Weighted-Average Supply of Berths Marketed Globally(1)	Royal Caribbean Cruises Ltd. Total Berths	Global Cruise Guests(1)	North American Cruise Guests(2)	European Cruise Guests (3)
2010	391,000	92,300	18,800,000	10,781,000	5,540,000
2011	412,000	92,650	20,227,000	11,625,000	5,894,000
2012	425,000	98,650	20,898,000	11,640,000	6,139,000
2013	432,000	98,750	21,300,000	11,816,000	6,399,000
2014	448,000	105,750	22,006,063	12,260,238	6,535,365

Source: Our estimates of the number of global cruise guests and the weighted-average supply of berths marketed globally are based on a combination of data that we obtain from various publicly available cruise industry trade information sources including Seatrade Insider, Cruise Industry News and CLIA. In addition, our estimates incorporate our own statistical analysis utilizing the same publicly available cruise industry data as a base.

(1) Source: CLIA based on cruise guests carried for at least two consecutive nights (see number 1 above). Includes the United States of America and Canada.

(2) Source: CLIA Europe, formerly European Cruise Council, (see number 2 above).

North America

The majority of cruise guests are sourced from North America, which represented approximately 55.7% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 3.3% from 2010 to 2014.

Europe

Cruise guests sourced from Europe represented approximately 29.7% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 4.2% from 2010 to 2014.

Asia/Pacific

In addition to expected industry growth in North America and Europe, we expect the Asia/Pacific region to demonstrate an even higher growth rate in the near term, although it will continue to represent a relatively small sector compared to North America and Europe. Based on industry data, cruise guests sourced from the Asia/Pacific region represented approximately 8.5% of global cruise guests in 2014. The compound annual growth rate in cruise guests sourced from this market was approximately 16.4% from 2010 to 2014.

Competition

We compete with a number of cruise lines. Our principal competitors are Carnival Corporation & plc, which owns, among others, Aida Cruises, Carnival Cruise Line, Costa Cruises, Cunard Line, Holland America Line, Iberocruceros, P&O Cruises and Princess Cruises; Disney Cruise Line; MSC Cruises; Norwegian Cruise Line Holdings Ltd, which owns Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises. Cruise lines compete with other vacation alternatives such as land-based resort hotels and sightseeing destinations for consumers' leisure time. Demand for such activities is influenced by political and general economic conditions. Companies within the vacation market

are dependent on consumer discretionary spending.

5

Table of Contents

Operating Strategies

Our principal operating strategies are to:

• protect the health, safety and security of our guests and employees and protect the environment in which our vessels and organization operate,

• strengthen and support our human capital in order to better serve our global guest base and grow our business,

• further strengthen our consumer engagement in order to enhance our revenues,

• increase the awareness and market penetration of our brands globally,

• focus on cost efficiency, manage our operating expenditures and ensure adequate cash and liquidity, with the overall goal of maximizing our return on invested capital and long-term shareholder value,

• strategically invest in our fleet through the upgrade and maintenance of existing ships and the transfer of key innovations across each brand, while prudently expanding our fleet with new state-of-the-art cruise ships,

• capitalize on the portability and flexibility of our ships by deploying them into those markets and itineraries that provide opportunities to optimize returns, while continuing our focus on existing key markets,

• further enhance our technological capabilities to service customer preferences and expectations in an innovative manner, while supporting our strategic focus on profitability, and

• maintain strong relationships with travel agencies, which continue to be the principal industry distribution channel, while enhancing our consumer outreach programs.

Safety, Environment and Health policies

We are committed to protecting the safety, environment and health of our guests, employees and others working on our behalf. We are also committed to protecting the marine environment and communities in which we operate. As part of this commitment, our Safety, Environment and Health Department oversees our maritime safety, global security, environmental stewardship and medical/public health activities. Our dedication to these areas is guided by a Maritime Advisory Board of experts and overseen by the Safety, Environment and Health Committee of our Board of Directors. We publicly share our safety, environment and health performance along with our social and governance performance through our annual Stewardship Report (calendar years 2008 through 2012) and through its successor, our Sustainability Report, each of which can be accessed on our brand websites. Our most recent report, covering the 2013 year, adopted the Global Reporting Initiative format widely used around the world to help companies better identify and report on the environmental and social aspects that are most significant to the organization and its stakeholders. Our brand websites also provide information about our environmental performance goals and our voluntary reporting of onboard security incidents. The foregoing information contained on our websites is not a part of any of these reports and is not incorporated by reference herein or in any other report or document we file with the Securities and Exchange Commission.

Table of Contents

Human capital

We believe that our employees, both shipboard and shoreside, are a critical success factor for our business. We strive to identify, hire, develop, motivate and retain the best employees, who provide our guests with extraordinary vacations. Attracting, engaging, and retaining key employees has been and will remain critical to our success.

We focus on providing our employees with a competitive compensation structure and development and other personal and professional growth opportunities in order to strengthen and support our human capital. We also select, develop and have strategies to retain high performing leaders to advance the enterprise now and in the future. To that end, we pay special attention to identifying high performing potential leaders and developing deep bench strength so these leaders can assume leadership roles throughout the organization. We strive to maintain a work environment that reinforces collaboration, motivation and innovation, and believe that maintaining our strong employee-focused culture is beneficial to the growth and expansion of our business.

Consumer engagement

We place a strong focus on identifying the needs of our guests and creating product features that our customers value. We are focused on targeting high-value guests by better understanding consumer data and insights and creating communication strategies that best resonate with our target audiences.

We interact with customers across all touch points and seek to identify underlying needs for which guests are willing to pay a premium. We rely on various programs prior to, during and after a cruise vacation aimed at increasing our ticket prices, onboard revenues and occupancy. We have strategically invested in a number of projects onboard our ships, including the implementation of new onboard revenue initiatives that we believe drive profitability and improve the guest experience.

Global awareness and market penetration

We increase brand awareness and market penetration of our cruise brands in various ways, including through the use of communication strategies and marketing campaigns designed to emphasize the unique qualities of each brand and to broaden the awareness of the brand, especially among the brand's target customer groups. Our marketing strategies include the use of traditional media, social media, brand websites and travel agencies. Our brands engage past and potential guests by collaborating with travel partners and through call centers, international offices and international representatives. In addition, Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises target repeat guests with exclusive benefits offered through their respective loyalty programs.

We also increase brand awareness across all of our brands through travel agencies, which generate the majority of our bookings. We are committed to this very important distribution channel by continuing to focus the travel agents on the unique qualities of each of our brands.

We sell and market our global brands, Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises, to guests outside of the United States and Canada through our offices in the United Kingdom, France, Germany, Norway, Italy, Spain, Singapore, China, Brazil, Australia and Mexico. We believe that having a local presence in these markets provides us with the ability to react more quickly to local market conditions and better understand our consumer base in each market. We further extend our geographic reach with a network of 38 independent international representatives located throughout the world covering 115 countries. Historically, our focus has been to primarily source guests for our global brands from North America. We also continue to expand our focus on selling and marketing our cruise brands to guests in countries outside of North America by tailoring itineraries and onboard product offerings to the cultural characteristics and preferences of our international guests. In addition, we explore

opportunities that may arise to acquire or develop brands tailored to specific markets.

7

Table of Contents

Passenger ticket revenues generated by sales originating in countries outside of the United States were approximately 47% of total passenger ticket revenues in 2014 and 48% and 49% in 2013 and 2012, respectively. International guests have grown from approximately 1.8 million in 2010 to approximately 2.2 million in 2014.

Cost efficiency, operating expenditures and adequate cash and liquidity

We continue our commitment to identify and implement cost containment initiatives. Our most recent initiatives relate to realizing economies of scale and improving service delivery to our travel partners and guests by restructuring and consolidating our global sales, marketing, general and administrative structure. We also continue our initiatives to reduce energy consumption and, by extension, fuel costs. These include the design of more fuel-efficient ships as well as the implementation of more efficient hardware, including propulsion and cooling systems incorporating energy efficiencies.

We are focused on maintaining a strong liquidity position, reducing our debt and improving our credit metrics. In addition, we continue to pursue our long-term objective of returning our credit ratings to investment grade. We believe these strategies enhance our ability to achieve our overall goal of maximizing our return on invested capital and long-term shareholder value.

Fleet upgrade, maintenance and expansion

We place a strong focus on product innovation, which we seek to achieve by introducing new concepts on our new ships and continuously making improvements to our fleet. Several of these innovations have become signature elements of our brands, such as the “Royal Promenade” (a boulevard with shopping, dining and entertainment venues) for the Royal Caribbean International brand and enhanced design features found on our Solstice-class ships for the Celebrity Cruises brand.

Our upgrade and maintenance programs enable us to incorporate many of our latest signature innovations throughout the brand fleet and allow us to benefit from economies of scale by leveraging our suppliers. Ensuring consistency across our fleet provides us with the flexibility to redeploy our ships among our brand portfolio.

We are committed to building state-of-the-art ships and our brands, excluding our 50% joint venture TUI Cruises, currently have effective agreements for the construction of four new ships. These consist of two Quantum-class ships, which are scheduled to enter service in the second quarters of 2015 and 2016 and two Oasis-class ships, which are scheduled to enter service in the second quarters of 2016 and 2018, respectively. We also reached conditional agreements with STX France to build two ships of a new generation for Celebrity Cruises, which are scheduled to enter service in the second half of 2018 and the first half of 2020. The addition of these six ships is expected to increase our passenger capacity by approximately 25,000 berths by December 31, 2020, or approximately 25.1%, as compared to our capacity as of December 31, 2014.

TUI Cruises, our 50% joint venture, currently has effective agreements for the construction of three new ships. These ships are scheduled to enter service in the second quarter of 2015, third quarter of 2016 and second quarter of 2017, with an expected total capacity of 7,500 berths.

We continuously evaluate opportunities to order new ships, purchase existing ships or sell ships in our current fleet.

Markets and itineraries

In an effort to penetrate untapped markets, diversify our consumer base and respond to changing economic and geopolitical market conditions, we continue to seek opportunities to optimally deploy ships to new and stronger

markets and itineraries throughout the world. The portability of our ships allows us to readily deploy our ships to meet demand within our existing cruise markets. We make deployment decisions generally 12 to 18 months in advance, with the goal of optimizing the overall profitability of our portfolio. Additionally, the infrastructure investments we

Table of Contents

have made to create a flexible global sourcing model has made our brands relevant in a number of markets around the world, which allows us to be opportunistic and source the highest yielding guests for our itineraries.

Our ships offer a wide selection of itineraries that call on approximately 480 destinations in 113 countries, spanning all seven continents. We are focused on obtaining the best possible long-term shareholder returns by operating in established markets while growing our presence in developing markets. New capacity allows us to expand into new markets and itineraries. Our brands have expanded their mix of itineraries while strengthening our ability to further penetrate the Asian, Australian, Caribbean, and Latin American markets. Additionally, in order to capitalize on the summer season in the Southern Hemisphere and mitigate the impact of the winter weather in the Northern Hemisphere, our brands have focused on deployment in Australia and Latin America during that period.

In an effort to secure desirable berthing facilities for our ships, and to provide new or enhanced cruise destinations for our guests, we actively assist or invest in the development or enhancement of certain port facilities and infrastructure, including mixed-use commercial properties, located in strategic ports of call. Generally, we collaborate with local, private or governmental entities by providing management and/or financial assistance and often enter into long-term port usage arrangements. Our participation in these efforts is generally accomplished via investments with the relevant government authority and/or various other strategic partnerships established to develop and/or operate the port facilities, by providing direct development and management expertise or in certain limited circumstances, by providing direct or indirect financial support. In exchange for our involvement, we generally secure preferential berthing rights for our ships.

Technological capabilities

The need to develop and use innovative technology is increasingly important. Technology is a pervasive part of virtually every business process we use to support our strategic focus and provide a quality experience to our customers before, during and after their cruise. Moreover, as the use of our various websites and social media platforms continue to increase along with the use of technology onboard our ships by both our guests and crew, we continually need to upgrade our systems, infrastructure and technologies to facilitate this growth. As a result, we have launched several new initiatives, which include among other improvements, revamped websites, new vacation packaging capabilities, support of mobile apps and modern high speed bandwidth capabilities onboard our three largest vessels. We also provided a host of new and innovative guest engaging technologies on our newest ship, the Quantum of the Seas.

To support our strategic focus on improving revenue yields, we began to implement new capabilities to improve our revenue management systems and decision support processes. As part of this effort, we have introduced new price optimization tools and continue to further leverage the pricing and promotion management capabilities in our reservations system.

Travel agency support and direct business

Travel agencies continue to be the primary source of ticket sales for our ships. We believe in the value of this distribution channel and invest heavily in maintaining strong relationships with our travel partners. To accomplish this goal, we seek to ensure that our commission rates and incentive structures remain competitive with the marketplace. We provide brand dedicated sales representatives who serve as advisors to our travel partners. We also provide trained customer service representatives, call centers and online training tools.

To support our sales initiatives, we have established a Consumer Outreach department which allows consumers 24-hour access to our vacation planners, group vacation planners and customer service agents in our call centers. In addition, we maintain and invest in our websites, including mobile applications and mobile websites, which allow

guests to directly plan, book and customize their cruise, as well as encourage guests to book their next cruise vacations onboard our ships.

9

Table of Contents

Guest Services

We offer to handle virtually all travel aspects related to guest reservations and transportation, including arranging guest pre- and post-hotel stay arrangements and air transportation.

Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises offer rewards to their guests through their loyalty programs, Crown & Anchor Society, Captain's Club and Le Club Voyage, respectively, to encourage repeat business. Crown & Anchor Society has approximately 8.4 million members worldwide. Captain's Club and Le Club Voyage have 2.9 million members combined worldwide. Members earn increasing membership status by accumulating cruise points or credits, depending on the brand, which may be redeemed on future sailings. Members are awarded points or credits in proportion to the number of cruise days and stateroom category. The loyalty programs provide certain tiers of membership benefits which can be redeemed by guests after accumulating the number of cruise points or credits specified for each tier. In addition, upon achieving a certain level of cruise points or credits, members benefit from reciprocal membership benefits across all of our loyalty programs. Examples of the rewards available under our loyalty programs include, but are not limited to, priority ship embarkation, priority waitlist for shore excursions, complimentary laundry service, complimentary internet, booklets with onboard discount offers, upgraded bathroom amenities, private seating on the pool deck, ship tours and, in the case of our most loyal guests who have achieved the highest levels of cruise points or credits, complimentary cruise days. We regularly work to enhance each of our loyalty programs by adding new features and amenities in order to reward our repeat guests.

Operations

Cruise Ships and Itineraries

As of December 31, 2014, our brands, including our 50% joint venture TUI Cruises, operate 43 ships with a selection of worldwide itineraries ranging from two to 23 nights that call on approximately 480 destinations.

Table of Contents

The following table presents summary information concerning the ships we will operate in 2015 under these six cruise brands and their geographic areas of operation based on current 2015 itineraries (subject to change).

Ship	Year Ship Built	Year Ship Entered Service ⁽¹⁾	Approximate Berths	Primary Areas of Operation
Royal Caribbean International				
Anthem of the Seas	2015	2015	4,150	Europe, Eastern/Western/Southern Caribbean, Bahamas
Quantum of the Seas	2014	2014	4,150	Bahamas, Eastern/Southern Caribbean, Asia
Allure of the Seas	2010	2010	5,400	Eastern/Western Caribbean, Europe
Oasis of the Seas	2009	2009	5,450	Eastern/Western Caribbean
Independence of the Seas	2008	2008	3,600	Eastern/Western Caribbean

Total			112,450	

(1) The year a ship entered service refers to the year in which the ship commenced cruise revenue operations for the brand.

Celebrity Century was built in 1995. In September 2014, Celebrity Century was sold to Skysea Holdings International Ltd. As part of the sale agreement, we agreed to charter the Celebrity Century from the buyer through April 2015 in order to fulfill existing passenger commitments. After the end of the charter period, the ship will be operated by the brand SkySea Cruises.

Does not include Pullmantur's Ocean Dream as it was delivered to an unrelated third-party in April 2012 as part of a six-year bareboat charter agreement. The charter agreement provides a renewal option exercisable by the unrelated third-party for an additional four years.

(4) Zenith was redeployed from Pullmantur to CDF Croisières de France in January 2014.

Table of Contents

Our brands, including our 50% joint venture, TUI Cruises, have seven ships on order. Two ships on order are being built in Germany by Meyer Werft GmbH, three are being built in Finland by Meyer Turku shipyard and two are being built in France by STX France. The expected dates that our ships on order will enter service and their approximate berths are as follows:

Ship	Expected to Enter Service	Approximate Berths
Royal Caribbean International—		
Quantum-class:		
Anthem of the Seas	2nd Quarter 2015	4,150
Ovation of the Seas	2nd Quarter 2016	4,150
Oasis-class:		
Oasis 3	2nd Quarter 2016	5,450
Oasis 4	2nd Quarter 2018	5,450
TUI Cruises (50% joint venture)—		
Mein Schiff 4	2nd Quarter 2015	2,500
Mein Schiff 5	3rd Quarter 2016	2,500
Mein Schiff 6	2nd Quarter 2017	2,500
Total Berths		26,700

In addition, we reached conditional agreements with STX France to build two ships of a new generation of Celebrity Cruises ships, known as "Project Edge." The agreements are subject to certain conditions to effectiveness expected to occur in the second quarter of 2015. The ships will each have a capacity of approximately 2,900 berths and are expected to enter service in the second half of 2018 and the first half of 2020, respectively.

Seasonality

Our revenues are seasonal based on the demand for cruises. Demand is strongest for cruises during the Northern Hemisphere's summer months and holidays. In order to mitigate the impact of the winter weather in the Northern Hemisphere and to capitalize on the summer season in the Southern Hemisphere, our brands have focused on deployment in Australia and Latin America during that period.

Passengers and Capacity

Selected statistical information is shown in the following table (see Description of Certain Line Items and Selected Operational and Financial Metrics under Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, for definitions):

	Year Ended December 31,					
	2014	2013	2012	2011	2010	
Passengers Carried	5,149,952	4,884,763	4,852,079	4,850,010	4,585,920	
Passenger Cruise Days	36,710,966	35,561,772	35,197,783	34,818,335	32,251,217	
Available Passenger Cruise Days (APCD)	34,773,915	33,974,852	33,705,584	33,235,508	30,911,073	
Occupancy	105.6	% 104.7	% 104.4	% 104.8	% 104.3	%

Cruise Pricing

Our cruise ticket prices include accommodations and a wide variety of activities and amenities, including meals and entertainment. Prices vary depending on many factors including the destination, cruise length, stateroom category selected and the time of year the cruise takes place. Although we grant credit terms in select markets mainly outside

Table of Contents

of the United States, our payment terms generally require an upfront deposit to confirm a reservation, with the balance due prior to the sailing. During the selling period of a cruise, we continually monitor and adjust our cruise ticket prices for available guest staterooms based on demand, with the objective of maximizing net yields. During 2014, we developed and implemented revenue management tools that enabled us to better understand and react to the current demand and pricing environment. Historically, we have opened cruises for sale at least one year in advance and often as much as two years in advance. Our air transportation program is available in major cities around the world and prices vary by gateway and destination. Generally, air tickets are sold to guests at prices close to cost.

Passenger ticket revenues accounted for approximately 73%, 72% and 73% of total revenues in 2014, 2013 and 2012, respectively.

Onboard Activities and Other Revenues

Our cruise brands offer modern fleets with a wide array of onboard services, amenities and activities which vary by brand and ship. While many onboard activities are included in the base price of a cruise, we realize additional revenues from, among other things, gaming, the sale of alcoholic and other beverages, internet and other telecommunication services, gift shop items, shore excursions, photography, spa/salon and fitness services, art auctions, catalogue gifts for guests and a wide variety of specialty restaurants and dining options. Many of these services are available for pre-booking on the internet prior to embarkation.

In conjunction with our cruise vacations, we offer pre- and post-cruise hotel packages to our Royal Caribbean International, Celebrity Cruises and Azamara Club Cruises guests. During 2014, we continued to expand the markets in which we sell our cruise vacation protection coverage, which provides guests with coverage for trip cancellation, medical protection and baggage protection. Onboard and other revenues accounted for approximately 27%, 28% and 27% of total revenues in 2014, 2013 and 2012, respectively.

Segment Reporting

We operate five wholly-owned cruise brands, Royal Caribbean International, Celebrity Cruises, Azamara Club Cruises, Pullmantur and CDF Croisières de France. In addition, we have a 50% investment in a joint venture with TUI AG which operates the brand TUI Cruises. We believe our global brands possess the versatility to enter multiple cruise market segments within the cruise vacation industry. Although each of our brands has its own marketing style as well as ships and crews of various sizes, the nature of the products sold and services delivered by our brands share a common base (i.e., the sale and provision of cruise vacations). Our brands also have similar itineraries as well as similar cost and revenue components. In addition, our brands source passengers from similar markets around the world and operate in similar economic environments with a significant degree of commercial overlap. As a result, our brands (including TUI Cruises) have been aggregated as a single reportable segment based on the similarity of their economic characteristics, types of consumers, regulatory environment, maintenance requirements, supporting systems and processes as well as products and services provided. Our Chairman and Chief Executive Officer has been identified as the chief operating decision-maker and all significant operating decisions including the allocation of resources are based upon the analyses of the Company as one segment. (For financial information see Item 8. Financial Statements and Supplementary Data.)

Employees

As of December 31, 2014, our brands, excluding our 50% joint venture, TUI Cruises, employed over 64,000 employees, including 58,000 shipboard employees as well as 5,700 full-time and 600 part-time employees in our shoreside operations. As of December 31, 2014, approximately 86% of our shipboard employees were covered by collective bargaining agreements.

Insurance

We maintain insurance on the hull and machinery of our ships, with insured values generally equal to the net

14

Table of Contents

book value of each ship. This coverage is maintained with financially sound insurance underwriters from the British, Scandinavian, French, United States and other reputable international insurance markets.

We maintain protection and indemnity liability insurance, which provides coverage for liabilities, costs and expenses for illness and injury to crew, guest injury, pollution and other third-party claims that arise out of, or are the result of, our cruise operations. Our vessels are insured through either the United Kingdom Mutual Steam Ship Assurance Association (Bermuda) Limited or the Steamship Mutual Underwriting Association (Bermuda) Limited. Our protection and indemnity liability insurance is done on a mutual basis and we are subject to additional premium calls in amounts based on claim records of all members of the mutual protection and indemnity association. We are also subject to additional premium calls based on investment shortfalls experienced by the insurer.

We maintain war risk insurance which covers damage due to acts of war, including invasion, insurrection, terrorism, rebellion, piracy and hijacking, on each ship, through a Norwegian war risk insurance organization. This coverage includes coverage for physical damage to the ship which is not covered under the hull policies as a result of war exclusion clauses in such hull policies. We also maintain protection and indemnity war risk coverage for risks that would be excluded by the rules of the indemnity insurance organizations, subject to certain limitations. Consistent with most marine war risk policies, under the terms of our war risk insurance coverage, underwriters can give seven days notice to us that the policy will be canceled and reinstated at higher premium rates.

Insurance coverage for shoreside property, shipboard inventory, general liability, off-vessel liability, directors & officers and network & privacy risks are maintained with insurance underwriters in the United States and the United Kingdom.

We do not carry business interruption insurance for our ships based on our evaluation of the risks involved and protective measures already in place, as compared to the cost of insurance.

All insurance coverage is subject to certain limitations, exclusions and deductible levels. In addition, in certain circumstances, we either self-insure or co-insure a portion of these risks. Premiums charged by insurance carriers, including carriers in the maritime insurance industry, increase or decrease from time to time and tend to be cyclical in nature. These cycles are impacted both by our own loss experience and by losses incurred in direct and reinsurance markets. We historically have been able to obtain insurance coverage in amounts and at premiums we have deemed to be commercially acceptable. No assurance can be given that affordable and secure insurance markets will be available to us in the future, particularly for war risk insurance.

International regulations, namely the European Union's Passenger Liability Regulations (effective December 31, 2012) and the Athens Convention 2002 Protocol (effective April 2014) require substantial increases to the level of compulsory insurance which must be maintained by passenger ship operators. Maintaining compliance with these regulations has not had a material impact on operating costs.

Trademarks

We own a number of registered trademarks related to the Royal Caribbean International, Celebrity Cruises, Azamara Club Cruises, Pullmantur and CDF Croisières de France cruise brands. The registered trademarks include the name "Royal Caribbean International" and its crown and anchor logo, the name "Celebrity Cruises" and its "X" logo, the name "Azamara Club Cruises" and its globe with an "A" logo, the names "Pullmantur Cruises" and "Pullmantur" and their logos, the name "CDF Croisières de France" and its logo, and the names of various cruise ships, as well as loyalty program names and other marketing programs. We believe our trademarks are widely recognized throughout the world and have considerable value.

Regulation

Our ships are regulated by various international, national, state and local laws, regulations and treaties in force in the jurisdictions in which they operate. In addition, our ships are registered in the Bahamas, Malta or in the case

15

Table of Contents

of Celebrity Xpedition, Ecuador. Each ship is subject to regulations issued by its country of registry, including regulations issued pursuant to international treaties governing the safety of our ships, guests and crew as well as environmental protection. Each country of registry conducts periodic inspections to verify compliance with these regulations as discussed more fully below. Ships operating out of United States ports are subject to inspection by the United States Coast Guard for compliance with international treaties and by the United States Public Health Service for sanitary and health conditions. Our ships are also subject to similar inspections pursuant to the laws and regulations of various other countries our ships visit.

We believe that we are in material compliance with all the regulations applicable to our ships and that we have all licenses necessary to conduct our business. Health, safety, security, environmental and financial responsibility issues are, and we believe will continue to be, an area of focus by the relevant government authorities in the United States and internationally. From time to time, various regulatory and legislative changes may be proposed that could impact our operations and subject us to increasing compliance costs in the future.

Safety and Security Regulations

Our ships are required to comply with international safety standards defined in the International Convention for Safety of Life at Sea (“SOLAS”), which among other things, establishes requirements for ship design, structural features, materials, construction, life saving equipment and safe management and operation of ships to ensure guest and crew safety. The SOLAS standards are revised from time to time and the most recent modifications were phased in through 2010. Compliance with these modified standards did not have a material effect on our operating costs. SOLAS incorporates the International Safety Management Code (“ISM Code”), which provides an international standard for the safe management and operation of ships and for pollution prevention. The ISM Code is mandatory for all vessels, including passenger vessel operators.

All of our operations and ships are regularly audited by various national authorities and maintain the required certificates of compliance with the ISM Code.

Our ships are subject to various security requirements, including the International Ship and Port Facility Security Code (“ISPS Code”), which is part of SOLAS, and the U.S. Maritime Transportation Security Act of 2002 (“MTSA”), which applies to ships that operate in U.S. ports. In order to satisfy these security requirements, we implement security measures, conduct vessel security assessments, and develop security plans. The security plans for all of our ships have been submitted to and approved by the respective countries of registry for our ships in compliance with the ISPS Code and the MTSA.

The Cruise Vessel Security and Safety Act of 2010, which applies to passenger vessels which embark or include port stops within the United States, requires the implementation of certain safety design features as well as the establishment of practices for the reporting of and dealing with allegations of crime. The cruise industry supported this legislation and we believe that our internal standards are generally as strict or stricter than the law requires. A few provisions of the law call for regulations which have not yet been finalized; however, based on proposed regulations issued by the U.S. Coast Guard in January 2015, we do not expect any material costs due to implementing these regulations.

Environmental Regulations

We are subject to various international and national laws and regulations relating to environmental protection. Under such laws and regulations, we are generally prohibited from discharging materials other than food waste into the waterways. We have made, and will continue to make, capital and other expenditures to comply with environmental laws and regulations. From time to time, environmental and other regulators consider more stringent regulations,

which may affect our operations and increase our compliance costs. We believe that the impact of ships on the global environment will continue to be an area of focus by the relevant authorities throughout the world and, accordingly, may subject us to increasing compliance costs in the future, including the items described below.

16

Table of Contents

Our ships are subject to the International Maritime Organization's ("IMO") regulations under the International Convention for the Prevention of Pollution from Ships (the "MARPOL Regulations"), which includes requirements designed to minimize pollution by oil, sewage, garbage and air emissions. We have obtained the relevant international compliance certificates relating to oil, sewage and air pollution prevention for all of our ships.

The MARPOL Regulations impose global limitations on the sulfur content of fuel used by ships operating worldwide. Permitted sulfur content was reduced from 4.5% to 3.5% on January 1, 2012. This reduction has not had a material effect on our fuel and operating costs.

The MARPOL Regulations also establish special Emission Control Areas ("ECAs") with stringent limitations on sulfur and nitrogen oxide emissions in these areas. As of February 2015, there are four established ECAs: the Baltic Sea, the North Sea/English Channel, certain waters surrounding the North American coast, and the waters surrounding Puerto Rico and the U.S. Virgin Islands.

Since January 1, 2015, ships operating in ECAs have been required to reduce their fuel sulfur content from 1.0% to 0.1%. We have been planning for this additional requirement for the last several years and continue to take steps to mitigate the potential impact on our fuel cost. Both of the ships delivered in 2014 (Quantum of the Seas and Mein Schiff 3) are equipped with advanced emissions purification ("AEP") systems covering all engines. In addition, all of our ships on order will be built with similar capabilities. As these new vessels are delivered, they will provide us with additional operational and deployment flexibility.

In addition, we have been actively developing and testing AEP systems on our existing fleet. We have now received exemptions for 19 of our ships which will apply while they are sailing in the North American and Caribbean ECAs. These exemptions delay the requirement to comply with the additional sulfur content reduction pending our continued development and deployment of AEP systems on these ships. We believe that the learning from our existing endeavors as well as our further efforts with regards to this technology will allow us to execute an effective AEP system retrofit strategy for our fleet.

As a result of these and other mitigating actions, we believe the cost of complying with the 2015 ECA sulfur emission requirement will not be significant to our results of operations in 2015 and the years following.

By January 1, 2020, the MARPOL regulations will require the worldwide limitations on sulfur content of fuel to be further reduced to 0.5%. If such a reduced limitation is implemented worldwide in 2020 and we have not been able to successfully mitigate the impact with evolving technical solutions, our fuel costs could increase significantly.

We have also taken a number of other steps to improve the overall fuel efficiency of our fleet, including our new ships on order, and, accordingly, reduce our fuel costs. We continue to work to improve the efficiency of our existing fleet, including improvements in operations and voyage planning as well as improvements to the propulsion, machinery, HVAC and lighting systems. The overall impact of these efforts has resulted in a 21% improvement in energy efficiency since 2005 and we believe that our energy consumption per guest is currently the lowest in the cruise industry.

In July 2011, new MARPOL Regulations introduced mandatory measures to reduce greenhouse gas emissions. These include the utilization of an energy efficiency design index (EEDI) for new ships as well as the establishment of an energy efficient management plan for all ships. The EEDI is a performance-based mechanism that requires a certain minimum energy efficiency in new ships. These regulations apply to new vessels commissioned after January 1, 2013. Compliance with these regulations has not had nor do we expect it to have a material effect on our operating costs. In June 2013, the European Commission proposed legislation which would require cruise ship operators using ports in the European Union to monitor and report on the vessels' annual carbon dioxide emissions starting in 2018. We expect that compliance with this regulation, if adopted, will not materially impact our results of operations.

Table of Contents

Labor Regulations

The International Labour Organization, an agency of the United Nations that develops worldwide employment standards, has adopted a new Consolidated Maritime Labour Convention (the “Convention”) which became effective in August 2013. The Convention reflects a broad range of standards and conditions governing all aspects of crew management for ships in international commerce, including additional requirements not previously in effect relating to the health, safety, repatriation, entitlements and status of crewmembers and crew recruitment practices. Each of our ships has received its certification of compliance with the requirements of the Convention. We have not incurred and do not expect to incur material costs related to implementation and ongoing compliance with the Convention.

Consumer Financial Responsibility Regulations

We are required to obtain certificates from the United States Federal Maritime Commission relating to our ability to satisfy liability in cases of non-performance of obligations to guests, as well as casualty and personal injury. As a condition to obtaining the required certificates, we arrange through our insurers for the provision of surety for three of our ship-operating companies. The required surety amount is currently \$22.0 million per operator. However, under amendments approved in February 2013, the required amount will increase to \$30.0 million per operator by April 2015 and will be subject to additional consumer price index based adjustments thereafter. We do not anticipate that compliance with the new rules will have a material effect on our costs.

We are also required by the United Kingdom, Norway, Finland, and the Baltics to establish our financial responsibility for any liability resulting from the non-performance of our obligations to guests from these jurisdictions. In the United Kingdom we are currently required by the Association of British Travel Agents to provide performance bonds totaling approximately £31.5 million. The Norwegian Travel Guarantee Fund requires us to maintain performance bonds in varying amounts during the course of the year to cover our financial responsibility in Norway, Finland and the Baltics. These amounts ranged from NOK 33 million to NOK 87 million during 2014. Certain other jurisdictions also require that we establish financial responsibility to our guests resulting from the non-performance of our obligations; however, the related amounts do not have a material effect on our costs.

Regulations Regarding Protection of Disabled Persons

In June 2013, the U.S. Architectural and Transportation Barriers Compliance Board proposed guidelines for the construction and alteration of passenger vessels to ensure that the vessels are readily accessible to and usable by passengers with disabilities. Once finalized, these guidelines will be used by the U.S. Department of Transportation and U.S. Department of Justice to implement mandatory and enforceable standards for passenger vessels covered by the Americans with Disabilities Act. While we believe our vessels have been designed and outfitted to meet the needs of our guests with disabilities, we cannot at this time accurately predict whether we will be required to make material modifications or incur significant additional expenses given the preliminary status of the proposed guidelines.

Taxation of the Company

The following is a summary of our principal taxes, exemptions and special regimes. In addition to or instead of income taxation, virtually all jurisdictions where our ships call impose some tax or fee, or both, based on guest headcount, tonnage or some other measure.

Our consolidated operations are primarily foreign corporations engaged in the owning and operating of passenger cruise ships in international transportation.

United States Income Taxation

The following is a discussion of the application of the United States federal and state income tax laws to us and is based on the current provisions of the United States Internal Revenue Code, Treasury Department regulations,

Table of Contents

administrative rulings, court decisions and the relevant state tax laws, regulations, rulings and court decisions of the states where we have business operations. All of the foregoing is subject to change, and any such change could affect the accuracy of this discussion.

Application of Section 883 of the Internal Revenue Code

We and Celebrity Cruises, Inc. are engaged in a trade or business in the United States, and many of our ship-owning subsidiaries, depending upon the itineraries of their ships, receive income from sources within the United States. Additionally, our United Kingdom tonnage tax company, owned by us and Celebrity Cruises, Inc., is a ship-operating company classified as a partnership for United States federal income tax purposes that may earn United States source income. Under Section 883 of the Internal Revenue Code, certain foreign corporations are not subject to United States federal income or branch profits tax on United States source income derived from or incidental to the international operation of a ship or ships, including income from the leasing of such ships.

A foreign corporation will qualify for the benefits of Section 883 if, in relevant part: (1) the foreign country in which the foreign corporation is organized grants an equivalent exemption to corporations organized in the United States; and (2) the stock of the corporation (or the direct or indirect corporate parent thereof) is “primarily and regularly traded on an established securities market” in the United States or another qualifying country such as Norway. In the opinion of our United States tax counsel, Drinker Biddle & Reath LLP, based on the representations and assumptions set forth in that opinion, we, Celebrity Cruises Inc. and our ship-owning subsidiaries qualify for the benefits of Section 883 because we and each of those subsidiaries are incorporated in Liberia or Malta, which are qualifying countries, and our common stock is primarily and regularly traded on an established securities market in the United States or Norway (i.e., we are a “publicly traded” corporation). If, in the future, (1) Liberia or Malta no longer qualifies as an equivalent exemption jurisdiction, and we do not reincorporate in a jurisdiction that does qualify for the exemption, or (2) we fail to qualify as a publicly traded corporation, we and all of our ship-owning or operating subsidiaries that rely on Section 883 for tax exemption on qualifying income would be subject to United States federal income tax on their United States source shipping income and income from activities incidental thereto.

We believe that most of our income and the income of our ship-owning subsidiaries is derived from or incidental to the international operation of a ship or ships and, therefore, is exempt from taxation under Section 883. Additionally, income earned through a partnership will qualify as income derived from or incidental to the international operation of a ship or ships to the same extent as the income would so qualify if earned directly by the partners. Thus, we believe that United States source income derived from or incidental to the international operation of a ship or ships earned by the United Kingdom tonnage tax company will qualify for exemption under Section 883 to the same extent as if it were earned directly by the owners of the United Kingdom tonnage tax company.

Regulations under Section 883 list activities that are not considered by the Internal Revenue Service to be incidental to the international operation of ships including the sale of air and land transportation, shore excursions and pre- and post-cruise tours. Our income from these activities that is earned from sources within the United States will be subject to United States taxation.

Taxation in the Absence of an Exemption Under Section 883

If we, the operator of our vessels, Celebrity Cruises Inc., or our ship-owning subsidiaries were to fail to meet the requirements of Section 883 of the Internal Revenue Code, or if the provision was repealed, then, as explained below, such companies would be subject to United States income taxation on a portion of their income derived from or incidental to the international operation of our ships.

Because we and Celebrity Cruises Inc. conduct a trade or business in the United States, we and Celebrity Cruises Inc. would be taxable at regular corporate rates on our separate company taxable income (i.e., without regard to the income of our ship-owning subsidiaries) from United States sources. In addition, if any of our earnings and profits effectively connected with our United States trade or business were withdrawn, or were deemed to have been withdrawn, from our United States trade or business, those withdrawn amounts would be subject to a “branch profits” tax at the rate of 30%. We and Celebrity Cruises Inc. would also be potentially subject to tax on portions of certain

Table of Contents

interest paid by us at rates of up to 30%.

If Section 883 were not available to our ship-owning subsidiaries, each such subsidiary would be subject to a special 4% tax on its United States source gross transportation income, if any, each year because it does not have a fixed place of business in the United States and its income is derived from the leasing of a ship.

Other United States Taxation

We and Celebrity Cruises, Inc. earn United States source income from activities not considered incidental to international shipping. The tax on such income is not material to our results of operation for all years presented.

State Taxation

We, Celebrity Cruises Inc. and certain of our subsidiaries are subject to various United States state income taxes which are generally imposed on each state's portion of the United States source income subject to federal income taxes. Additionally, the state of Alaska subjects an allocated portion of the total income of companies doing business in Alaska and certain other affiliated companies to Alaska corporate state income taxes and also imposes a 33% tax on adjusted gross income from onboard gambling activities conducted in Alaska waters. This did not have a material impact to our results of operations for all years presented.

Maltese and Spanish Income Tax

Our Pullmantur ship owner-operator subsidiaries, which include the owner-operator of CDF Croisières de France's ship, qualify as licensed shipping organizations in Malta. No Maltese income tax is charged on the income derived from shipping activities of a licensed shipping organization. Instead, a licensed shipping organization is liable to pay a tonnage tax based on the net tonnage of the ship or ships registered under the relevant provisions of the Merchant Shipping Act. A company qualifies as a shipping organization if it engages in qualifying activities and it obtains a license from the Registrar-General to enable it to carry on such activities. Qualifying activities include, but are not limited to, the ownership, operation (under charter or otherwise), administration and management of a ship or ships registered as a Maltese ship in terms of the Merchant Shipping Act and the carrying on of all ancillary financial, security and commercial activities in connection therewith.

Our Maltese operations that do not qualify as licensed shipping organizations, which are not considered significant, remain subject to normal Maltese corporate income tax.

Pullmantur has sales and marketing functions. These activities are subject to Spanish taxation. The tax from these operations is not considered significant to our operations.

United Kingdom Income Tax

We operate fourteen ships under companies which have elected to be subject to the United Kingdom tonnage tax regime ("U.K. tonnage tax").

Companies subject to U.K. tonnage tax pay a corporate tax on a notional profit determined with reference to the net tonnage of qualifying vessels. Normal United Kingdom corporate income tax is not chargeable on the relevant shipping profits of a qualifying U.K. tonnage tax company. The requirements for a company to qualify for the U.K. tonnage tax regime include being subject to United Kingdom corporate income tax, operating qualifying ships, which are strategically and commercially managed in the United Kingdom, and fulfilling a seafarer training requirement. Failure to meet any of these requirements could cause us to lose the benefit of the tonnage tax regime which will have a material effect on our results of operations.

Relevant shipping profits include income from the operation of qualifying ships and from shipping related

Table of Contents

activities. Our United Kingdom income from non-shipping activities which do not qualify under the U.K. tonnage tax regime and which are not considered significant, remain subject to United Kingdom corporate income tax.

Brazilian Income Tax

Pullmantur and our U.K. tonnage tax company charters certain ships to Brazilian companies for operations in Brazil from November to May. Some of these charters are with unrelated third parties and others are with a Brazilian affiliate. The Brazilian affiliate's earnings are subject to Brazilian taxation which is not considered significant. The charter payments made to the U.K. tonnage tax company and to Pullmantur are exempt from Brazilian income tax under current Brazilian domestic law. Additionally, some remittances of revenue from sales of certain cruises in the Brazilian market benefit from an exemption from withholding taxes which is scheduled to expire at the end of 2015. If the exemption is not extended, this may result in increased taxation for our Brazilian operations.

Chinese Taxation

Our U.K. tonnage tax company operates ships in international transportation in China. The income earned from this operation is exempt from taxation in China under the U.K./China double tax treaty and other circulars addressing indirect taxes. Changes to or failure to qualify for the treaty or circular could cause us to lose the benefits provided which would have a material impact on our results of operations. Our Chinese income from non-shipping activities or from shipping activities not qualifying for treaty or circular protection and which are considered insignificant, remain subject to Chinese taxation.

Other Taxation

We and certain of our subsidiaries are subject to value-added and other indirect taxes most of which are reclaimable, zero-rated or exempt. Changes in the application or interpretation of applicable indirect tax laws or changes in tax legislation could have a material impact on our results of operations.

Website Access to Reports

We make available, free of charge, access to our Annual Reports, all quarterly and current reports and all amendments to those reports, as soon as reasonably practicable after such reports are electronically filed with or furnished to the Securities and Exchange Commission through our website at www.rclinvestor.com. The information contained on our website is not a part of any of these reports and is not incorporated by reference herein.

Table of Contents

Executive Officers of the Company

As of February 23, 2015, our executive officers are:

Name	Age	Position
Richard D. Fain	67	Chairman, Chief Executive Officer and Director
Adam M. Goldstein	55	President and Chief Operating Officer
Michael W. Bayley	56	President and Chief Executive Officer, Royal Caribbean International
Lisa Lutloff-Perlo	57	President and Chief Executive Officer, Celebrity Cruises
Lawrence Pimentel	63	President and Chief Executive Officer, Azamara Club Cruises
Jorge Vilches	41	President and Chief Executive Officer, Pullmantur
Jason T. Liberty	39	Chief Financial Officer
Harri U. Kulovaara	62	Executive Vice President, Maritime
Bradley H. Stein	59	Senior Vice President, General Counsel, Chief Compliance Officer
Henry L. Pujol	47	Senior Vice President, Chief Accounting Officer

Richard D. Fain has served as a director since 1979 and as our Chairman and Chief Executive Officer since 1988. Mr. Fain has been involved in the shipping industry for approximately 40 years.

Adam M. Goldstein has served as President and Chief Operating Officer since April 2014. Prior to this, he served as President of Royal Caribbean International since February 2005 and as its President and Chief Executive Officer since September 2007. Mr. Goldstein has been employed with Royal Caribbean since 1988 in a variety of positions, including Executive Vice President, Brand Operations of Royal Caribbean International, Senior Vice President, Total Guest Satisfaction and Senior Vice President, Marketing. Mr. Goldstein served as National Chair of the United States Travel Association (formerly, Travel Industry Association of America) in 2001. In November 2014, the Board of Directors of Cruise Lines International Association ("CLIA") elected Mr. Goldstein to serve a two-year term as Chairman of CLIA beginning January 1, 2015.

Michael W. Bayley has served as President and Chief Executive Officer of Royal Caribbean International since December 2014. Prior to this, he served as President and Chief Executive Officer of Celebrity Cruises since August 2012. Mr. Bayley has been employed by Royal Caribbean for over 30 years, having started as an Assistant Purser onboard one of the Company's ships. He has served in a number of roles including as Executive Vice President, Operations from February 2012 until August 2012. Other positions Mr. Bayley has held include Executive Vice President, International from May 2010 until February 2012; Senior Vice President, International from December 2007 to May 2010; Senior Vice President, Hotel Operations for Royal Caribbean International; and Chairman and Managing Director of Island Cruises.

Lisa Lutloff-Perlo has served as President and Chief Executive Officer of Celebrity Cruises since December 2014. Prior to this, she served as Executive Vice President, Operations for Royal Caribbean International since September 2012. Ms. Lutloff-Perlo has been employed with the Company since 1985 in a variety of positions within both Celebrity Cruises and Royal Caribbean International. She started at Royal Caribbean International as District Sales Manager for New England and from August 2008 to August 2012, she was responsible for Celebrity Cruises' entire hotel operation. In her role as Executive Vice President of Operations, Ms. Lutloff-Perlo was responsible for all of Royal Caribbean International's hotel, marine and port operations.

Lawrence Pimentel has served as President and Chief Executive Officer of Azamara Club Cruises since July 2009. From 2001 until January 2009, Mr. Pimentel was President, Chief Executive Officer, Director and co-owner of SeaDream Yacht Club, a privately held luxury cruise line located in Miami, Florida with two yacht-style ships that sailed primarily in the Caribbean and Mediterranean. From April 1991 to February 2001, Mr. Pimentel was President and Chief Executive Officer of Carnival Corp.'s Seabourn Cruise Line and from May 1998 to February 2001, he was President and Chief Executive Officer of Carnival Corp.'s Cunard Line.

Table of Contents

Jorge Vilches has served as President and Chief Executive Officer of Pullmantur since July 2014. Mr. Vilches has spent the past 10 years in the travel industry, holding various positions with LATAM Airlines Group S.A., one of the largest airline groups in the world whose shares are traded in Santiago. Most recently, from 2012 to May 2014, he served as Chief Executive Officer of LATAM's long haul business unit, the group's biggest division in terms of capacity and revenue, and, prior to that, as CEO of LAN Peru from 2007 to 2012.

Jason T. Liberty has been employed by the Company since 2005 and has served as Chief Financial Officer since May 2013. Mr. Liberty previously served as Senior Vice President, Strategy and Finance from September 2012 through May 2013, overseeing the Company's Corporate and Strategic Planning, Treasury, Investor Relations and Deployment functions. Prior to this, Mr. Liberty served, from 2010 through 2012, as Vice President of Corporate and Revenue Planning and, from 2008 to 2010, as Vice President of Corporate and Strategic Planning. Before joining Royal Caribbean, Mr. Liberty was a Senior Manager at the international public accounting firm of KPMG LLP.

Harri U. Kulovaara has served as Executive Vice President, Maritime since January 2005. Mr. Kulovaara is responsible for fleet design and newbuild operations. Mr. Kulovaara also chairs our Maritime Safety Advisory Board. Mr. Kulovaara has been employed with Royal Caribbean since 1995 in a variety of positions, including Senior Vice President, Marine Operations, and Senior Vice President, Quality Assurance. Mr. Kulovaara is a naval architect and engineer.

Bradley H. Stein has served as General Counsel of the Company since 2006. He has also served as Senior Vice President and Chief Compliance Officer of the Company since February 2009 and February 2011, respectively. Mr. Stein has been with Royal Caribbean since 1992. Before joining Royal Caribbean, Mr. Stein worked in private practice in New York and Miami.

Henry L. Pujol has served as Senior Vice President, Chief Accounting Officer of the Company since May 2013. Mr. Pujol originally joined Royal Caribbean in 2004 as Assistant Controller and was promoted to Corporate Controller in May 2007. Before joining Royal Caribbean, Mr. Pujol was a Senior Manager at the international public accounting firm of KPMG LLP.

Table of Contents

Item 1A. Risk Factors

The risk factors set forth below and elsewhere in this Annual Report on Form 10-K are important factors that could cause actual results to differ from expected or historical results. It is not possible to predict or identify all such risks. The risks described below are only those known risks relating to our operations and financial condition that we consider material. There may be additional risks that we consider not to be material, or which are not known, and any of these risks could have the effects set forth below. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations for a cautionary note regarding forward-looking statements.

Adverse worldwide economic, geopolitical or other conditions could reduce the demand for cruises and adversely impact our operating results, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets.

The demand for cruises is affected by international, national and local economic and geopolitical conditions. In recent years, we have been faced with very challenging global economic conditions, which have adversely affected vacationers' discretionary income and consumer confidence. This, in turn, resulted in cruise booking slowdowns, decreased cruise prices and lower onboard revenues for us and for others in the cruise industry as compared to more robust economic times. Although the cruise industry continued to recover in 2014, ongoing economic challenges continue in certain key markets, including Europe. In addition, we cannot predict with any certainty whether demand for cruises will continue to improve in countries that have experienced improved economic conditions or the strength of such improvement. Any significant deterioration of global, national or local economic conditions could result in a prolonged period of booking slowdowns, depressed cruise prices and reduced onboard revenues. Demand for our cruises is also influenced by geopolitical events. Unfavorable conditions, such as cross-border conflicts, civil unrest and governmental changes, especially in regions with popular ports of call, can undermine consumer demand and/or pricing for itineraries featuring these ports.

Continued unrest and economic instability could materially adversely impact our operating results, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets. See Critical Accounting Policies for more information.

We may not be able to obtain sufficient financing or capital for our needs or may not be able to do so on terms that are acceptable or consistent with our expectations.

To fund our capital expenditures and scheduled debt payments, we have historically relied on a combination of cash flows provided by operations, drawdowns under available credit facilities, the incurrence of additional indebtedness and the sale of equity or debt securities in private or public securities markets. We also condition the effectiveness of our ship orders on obtaining committed financing arrangements. Any circumstance or event which leads to a decrease in consumer cruise spending, such as worsening global economic conditions or significant incidents impacting the cruise industry, could negatively affect our operating cash flows. See "-Adverse worldwide economic, geopolitical or other conditions..." and "-Incidents or adverse publicity concerning the cruise vacation industry..." for more information. Although we believe we can access sufficient liquidity to fund our operations and obligations as expected, there can be no assurances to that effect. Our ability to access additional funding as and when needed, our ability to timely refinance and/or replace our outstanding debt securities and credit facilities on acceptable terms and our cost of funding will depend upon numerous factors including but not limited to the vibrancy of the financial markets, our financial performance and the performance of our industry in general.

Our inability to satisfy the covenants required by our credit facilities could adversely impact our liquidity.

Our debt agreements contain covenants, including covenants restricting our ability to take certain actions and financial covenants. In addition, our ability to make borrowings under our available credit facilities is subject to the absence of material adverse changes in our business. Our ability to maintain our credit facilities may also be impacted by changes in our ownership base. More specifically, we may be required to prepay a majority of our debt facilities if

Table of Contents

(i) any person or entity other than A. Wilhelmsen AS. and Cruise Associates and their respective affiliates (the “Applicable Group”) acquires ownership of more than 33% of our common stock and the Applicable Group owns less of our common stock than such person or (ii) subject to certain exceptions, during any 24-month period, a majority of the Board is no longer comprised of individuals who were members of the Board on the first day of such period. Certain of our outstanding debt securities also contain change of control provisions that would be triggered by the acquisition of greater than 50% of our common stock by a person other than a member of the Applicable Group coupled with a ratings downgrade.

Our failure to comply with the terms of our debt facilities could result in an event of default. Generally, if an event of default under any debt agreement occurs, then pursuant to cross default acceleration clauses, our outstanding debt and derivative contract payables could become due and/or terminated. In addition, in such events, our credit card processors could hold back payments to create a reserve. We cannot provide assurances that we would have sufficient liquidity to repay or the ability to refinance the borrowings under any of the credit facilities or settle other outstanding contracts if such amounts were accelerated upon an event of default.

Incidents or adverse publicity concerning the cruise vacation industry, unusual weather conditions and other natural disasters or disruptions could affect our reputation as well as impact our sales and results of operations.

The ownership and/or operation of cruise ships, airplanes, land tours, port facilities and shore excursions involves the risk of accidents, illnesses, mechanical failures, environmental incidents and other incidents which may bring into question safety, health, security and vacation satisfaction which could negatively impact our reputation. Incidents involving cruise ships, and, in particular the safety and security of guests and crew, media coverage thereof, as well as adverse media publicity concerning the cruise vacation industry have impacted and could in the future impact demand for our cruises and pricing in the industry. The considerable expansion in the use of social media and digital marketing over recent years has compounded the potential scope of the negative publicity that could be generated by those incidents. If any such incident occurs during a time of high seasonal demand, the effect could disproportionately impact our results of operations for the year. In addition, incidents involving cruise ships may result in additional costs to our business, increasing government or other regulatory oversight and, in the case of incidents involving our ships, potential litigation.

Our cruise ships and port facilities may also be adversely impacted by unusual weather patterns or natural disasters or disruptions, such as hurricanes and earthquakes. We are often forced to alter itineraries and occasionally to cancel a cruise or a series of cruises due to these or other factors, which could have an adverse effect on our sales and profitability. In addition, these and any other events which impact the travel industry more generally may negatively impact our ability to deliver guests or crew to our cruises and/or interrupt our ability to obtain services and goods from key vendors in our supply chain. Any of the foregoing could have an adverse impact on our results of operations and on industry performance.

The impact of disruptions in the global financial markets may affect the ability of our counterparties and others to perform their obligations to us.

The financial crisis of 2008, including failures of financial service and insurance companies and the related liquidity crisis, disrupted the capital and credit markets. A recurrence of these or similar disruptions could cause our counterparties and others to breach their obligations to us under our contracts with them. This could include failures of banks or other financial service companies to fund required borrowings under our loan agreements or to pay us amounts that may become due under our derivative contracts for hedging of fuel prices, interest rates and foreign currencies or other agreements. If any of the foregoing occurs it may have a negative impact on our cash flows, including our ability to meet our obligations, our results of operations and our financial condition.

An increase in capacity worldwide or excess capacity in a particular market could adversely impact our cruise sales and/or pricing.

Although our ships can be redeployed, cruise sales and/or pricing may be impacted both by the introduction of new ships into the marketplace and by deployment decisions of ourselves and our competitors. A total of 33 new ships

Table of Contents

with approximately 98,650 berths are on order for delivery through 2019 in the cruise industry. The further growth in capacity from these new ships and future orders, without an increase in the cruise industry's share of the vacation market, could depress cruise prices and impede our ability to achieve yield improvement.

In addition, to the extent that we or our competitors deploy ships to a particular itinerary and the resulting capacity in that region exceeds the demand, we may lower pricing and profitability may be lower than anticipated.

Any of the foregoing could have an adverse impact on our results of operations, cash flows and financial condition including potentially impairing the value of our ships, goodwill and other assets.

If we are unable to appropriately balance our cost management strategies with our goal of satisfying guest expectations, it may adversely impact our business success.

Our goals call for us to provide high quality products and deliver high quality services. There can be no assurances that we can successfully balance these goals with our cost management strategies.

We may lose business to competitors throughout the vacation market.

We operate in the vacation market and cruising is one of many alternatives for people choosing a vacation. We therefore risk losing business not only to other cruise lines, but also to other vacation operators, which provide other leisure options including hotels, resorts and package holidays and tours.

We face significant competition from other cruise lines on the basis of cruise pricing, travel agent preference and also in terms of the nature of ships and services we offer to guests. Our principal competitors within the cruise vacation industry include Carnival Corporation & plc, which owns, among others, Aida Cruises, Carnival Cruise Line, Costa Cruises, Cunard Line, Holland America Line, P&O Cruises and Princess Cruises; Disney Cruise Line; MSC Cruises; Norwegian Cruise Line Holdings Ltd which owns Norwegian Cruise Line, Oceania Cruises and Regent Seven Seas Cruises.

In the event that we do not compete effectively with other vacation alternatives and cruise companies, our results of operations and financial position could be adversely affected.

Fears of terrorist and pirate attacks, war, and other hostilities and the spread of contagious diseases could have a negative impact on our results of operations.

Events such as terrorist and pirate attacks, war, and other hostilities, including the recent escalation of tensions in the Middle East and terrorism incidents in Europe, and the resulting political instability, travel restrictions, the spread of contagious diseases and concerns over safety, health and security aspects of traveling or the fear of any of the foregoing have had, and could have in the future, a significant adverse impact on demand and pricing in the travel and vacation industry. In view of our global operations, we have become susceptible to a wider range of adverse events.

Fluctuations in foreign currency exchange rates, fuel costs and interest rates could affect our financial results.

We are exposed to market risk attributable to changes in foreign currency exchange rates, fuel prices and changes in interest rates. High levels of volatility with respect to any of the foregoing could have a material impact on our financial results, net of the impact of our hedging activities and other natural offsets. See "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" for more information.

Environmental, labor, health and safety, financial responsibility and other maritime regulations could affect operations and increase operating costs.

The United States and various state and foreign government or regulatory agencies have enacted or are considering new environmental regulations or policies, such as requiring the use of low sulfur fuels, increasing fuel efficiency requirements, further restricting emissions, or other initiatives to limit greenhouse gas emissions that could increase our cost for fuel, limit the supply of compliant fuel, cause us to incur significant expenses to purchase and/or develop

Table of Contents

new equipment and adversely impact the cruise vacation industry. While we have taken and expect to continue to take a number of actions to mitigate the potential impact of certain of these regulations, there can be no assurances that these efforts will be successful. Some environmental groups have also lobbied for more stringent regulation of cruise ships and have generated negative publicity about the cruise vacation industry and its environmental impact. See Item 1. Business-Regulation-Environmental Regulations. An increase in fuel prices not only impacts our fuel costs, but also some of our other expenses, such as crew travel, freight and commodity prices.

In addition, we are subject to various international, national, state and local laws, regulations and treaties that govern, among other things, safety standards applicable to our ships, treatment of disabled persons, health and sanitary standards applicable to our guests, security standards on board our ships and at the ship/port interface areas, and financial responsibilities to our guests. These issues are, and we believe will continue to be, an area of focus by the relevant authorities throughout the world. This could result in the enactment of more stringent regulation of cruise ships that could subject us to increasing compliance costs in the future.

Conducting business globally may result in increased costs and other risks.

We operate our business globally. Operating internationally exposes us to a number of risks, including increased exposure to a wider range of regional and local economic conditions, volatile local political conditions, potential changes in duties and taxes, including changing and/or uncertain interpretations of existing tax laws and regulations, required compliance with additional laws and policies affecting cruising, vacation or maritime businesses or governing the operations of foreign-based companies, currency fluctuations, interest rate movements, difficulties in operating under local business environments, port quality and availability in certain regions, U.S. and global anti-bribery laws or regulations, imposition of trade barriers and restrictions on repatriation of earnings. We have recently expanded our presence in China and, accordingly, our exposure to the risks of doing business in the country. China's economy differs from the economies of other developed countries in many respects and, as the legal system in China continues to evolve, there may be greater uncertainty as to the interpretation and enforcement of applicable laws and regulations.

Operating globally also exposes us to numerous and sometimes conflicting legal, regulatory and tax requirements. In many parts of the world, including countries in which we operate, practices in the local business communities might not conform to international business standards. We must adhere to policies designed to promote legal and regulatory compliance as well as applicable laws and regulations. However, we might not be successful in ensuring that our employees, agents, representatives and other third parties with which we associate throughout the world properly adhere to them. Failure by us, our employees or any of these third parties to adhere to our policies or applicable laws or regulations could result in penalties, sanctions, damage to our reputation and related costs which in turn could negatively affect our results of operations and cash flows.

If we are unable to address these risks adequately, our financial position and results of operations could be adversely affected, including potentially impairing the value of our ships, goodwill and other assets.

Our attempts to expand our business into new markets may not be successful.

While our historical focus has been to serve the North American cruise market, we have expanded our focus to increase our international guest sourcing, including sourcing from the Asian, Latin American, and Australian markets. Expansion into new markets requires significant levels of investment. There can be no assurance that these markets will develop as anticipated or that we will have success in these markets, and if we do not, we may be unable to recover our investment, which could adversely impact our business, financial condition and results of operations, including potentially impairing the value of our goodwill.

Ship construction, repair or upgrade delays or mechanical faults may result in cancellation of cruises or unscheduled drydocks and repairs and thus adversely affect our results of operations.

We depend on shipyards to construct, repair and upgrade our cruise ships on a timely basis and in good working order. The sophisticated nature of building a ship involves risks. Delays in ship construction or upgrades or mechanical faults have in the past and may in the future result in delays or cancellation of cruises or necessitate unscheduled

Table of Contents

drydocks and repairs of ships. These events and any related adverse publicity could result in lost revenue, increased operating expenses, or both, and thus adversely affect our results of operations.

Shipyards and their subcontractors may experience financial difficulties or consolidation which could cause or result in delay, ship cancellations, our inability to procure new capacity in a timely fashion or increases in shipbuilding costs that could adversely affect our results of operations.

We rely on shipyards to construct, repair and upgrade our ships. Financial difficulties, liquidations or closures suffered by these shipyards and/or their subcontractors may impact the timely delivery or costs of new ships or the ability of shipyards to repair and upgrade our fleet in accordance with our needs or expectations. In addition, there are a limited number of shipyards with the capability and capacity to build our new ships and, accordingly, consolidation in the cruise shipyard industry could impact our ability to construct new ships when and as planned and/or could result in stronger bargaining power on the part of the shipyards and thus higher prices for our future ship orders. Delivery delays and canceled deliveries can adversely affect our results of operations, as can any constraints on our ability to build, repair and maintain our ships on a timely basis.

Our operating costs could increase due to market forces and economic or geo- political factors beyond our control. Our operating costs, including fuel, food, payroll, airfare, taxes, insurance and security costs are all subject to increases due to market forces and economic or political conditions or other factors beyond our control. Increases in these operating costs could adversely affect our profitability.

Unavailability of ports of call may adversely affect our results of operations.

We believe that port destinations are a major reason why guests choose to go on a particular cruise or on a cruise vacation. The availability of ports is affected by a number of factors, including existing capacity constraints, constraints related to the size of certain ships, security concerns, adverse weather conditions and natural disasters, financial limitations on port development, exclusivity arrangements that ports may have with our competitors, local governmental regulations and local community concerns about port development and other adverse impacts on their communities from additional tourists. In addition, rising fuel costs may adversely impact the destinations on certain of our itineraries. Any limitations on the availability or feasibility of our ports of call or on the availability of shore excursion and other service providers at such ports could adversely affect our results of operations.

Price increases for commercial airline service for our guests or major changes or reduction in commercial airline service and/or availability could adversely impact the demand for cruises and undermine our ability to provide reasonably priced vacation packages to our guests.

Many of our guests depend on scheduled commercial airline services to transport them to or from the ports where our cruises embark or disembark. Increases in the price of airfare would increase the overall price of the cruise vacation to our guests which may adversely impact demand for our cruises. In addition, changes in the availability of commercial airline services could adversely affect our guests' ability to obtain airfare as well as our ability to fly our guests to or from our cruise ships which could adversely affect our results of operations.

Our reliance on travel agencies to sell and market our cruises exposes us to certain risks which, if realized, could adversely impact our business.

Because we rely on travel agencies to generate the majority of bookings for our ships, we must ensure that our commission rates and incentive structures remain competitive. If we fail to offer competitive compensation packages, these agencies may be incentivized to sell cruises offered by our competitors to our detriment, which could adversely impact our operating results. In addition, the travel agent industry is sensitive to economic conditions that impact discretionary income. Significant disruptions, especially disruptions impacting those agencies that sell a high volume of our business, or contractions in the industry could reduce the number of travel agencies available for us to market and sell our cruises, which could have an adverse impact on our financial condition and results of operations.

Table of Contents

Disruptions in our shoreside operations or our information systems may adversely affect our results of operations. Our principal executive office and principal shoreside operations are located at the Port of Miami, Florida and we have shoreside offices throughout the world. Actual or threatened natural disasters (e.g., hurricanes, earthquakes, tornadoes, fires, floods) or similar events in these locations may have a material impact on our business continuity, reputation and results of operations. In addition, substantial or repeated information systems failures, computer viruses or cyber-attacks impacting our shoreside or shipboard operations could adversely impact our business. We do not generally carry business interruption insurance for our shoreside operations or our information systems. As such, any losses or damages incurred by us could have an adverse impact on our results of operations.

Failure to develop the value of our brands and differentiate our products could adversely affect our results of operations.

Our success depends on the strength and continued development of our cruise brands and on the effectiveness of our brand strategies. Failure to protect and differentiate our brands from competitors throughout the vacation market could adversely affect our results of operations.

The loss of key personnel, our inability to recruit or retain qualified personnel, or disruptions among our shipboard personnel due to strained employee relations could adversely affect our results of operations.

Our success depends, in large part, on the skills and contributions of key executives and other employees, and on our ability to recruit and retain high quality personnel in key markets. We must continue to sufficiently recruit, retain, train and motivate our employees to maintain our current business and support our projected global growth.

Furthermore, as of December 31, 2014, 86% of our shipboard employees were covered by collective bargaining agreements. A dispute under our collective bargaining agreements could result in a work stoppage of those employees covered by the agreements. A loss of key employees or disruptions among our personnel could adversely affect our results of operations.

Business activities that involve our co-investment with third parties may subject us to additional risks.

Partnerships, joint ventures, and other business structures involving our co-investment with third parties, such as our joint venture to operate TUI Cruises, our new partnership to operate SkySea Cruises, our investment in Grand Bahama Shipyard and our minority ownership investments in various port development and other projects, generally include some form of shared control over the operations of the business and create additional risks, including the possibility that other investors in such ventures could become bankrupt or otherwise lack the financial resources to meet their obligations, or could have or develop business interests, policies or objectives that are inconsistent with ours. In addition, actions by another investor may present additional risks of operational difficulties or reputational or legal concerns. These or other issues related to our co-investment with third parties could adversely impact our operations.

We rely on third-party providers of various services integral to the operations of our businesses. These third parties may act in ways that could harm our business.

In order to achieve cost and operational efficiencies, we outsource to third-party vendors certain services that are integral to the operations of our global businesses, such as our onboard concessionaires, certain of our call center operations and operation of a large part of our information technology systems. We are subject to the risk that certain decisions are subject to the control of our third-party service providers and that these decisions may adversely affect our activities. A failure to adequately monitor a third-party service provider's compliance with a service level agreement or regulatory or legal requirements could result in significant economic and reputational harm to us. There is also a risk the confidentiality, privacy and/or security of data held by third parties or communicated over third-party networks or platforms could become compromised.

Table of Contents

A failure to keep pace with developments in technology or technological obsolescence could impair our operations or competitive position.

Our business continues to demand the use of sophisticated technology and systems. These technologies and systems must be refined, updated, and/or replaced with more advanced systems in order to continue to meet our customers' demands and expectations. If we are unable to do so in a timely manner or within reasonable cost parameters or if we are unable to appropriately and timely train our employees to operate any of these new systems, our business could suffer. We also may not achieve the benefits that we anticipate from any new technology or system, and a failure to do so could result in higher than anticipated costs or could impair our operating results.

We may be exposed to risks and costs associated with cyber security, including protecting the integrity and security of our guests' and employees' personal information.

We are subject to various risks associated with the collection, handling, storage and transmission of sensitive information, including risks related to compliance with applicable laws and other contractual obligations, as well as the risk that our systems collecting such information could be compromised. In the course of doing business, we collect large volumes of internal and customer data, including personally identifiable information for various business purposes. If we fail to comply with the various applicable data collection and privacy laws, we could be exposed to fines, penalties, restrictions, litigation or other expenses, and our business could be adversely impacted.

In addition, even if we are fully compliant with legal standards and contractual requirements, we still may not be able to prevent security breaches involving sensitive data. Any breach, theft, loss, or fraudulent use of guest, employee or company data could adversely impact our reputation and brand and our ability to retain or attract new customers, and expose us to risks of data loss, business disruption, governmental investigation, litigation and other liability, any of which could adversely affect our business. Significant capital investments and other expenditures could be required to remedy the problem and prevent future breaches, including costs associated with additional security technologies, personnel, experts and credit monitoring services for those whose data has been breached. Additionally, the techniques and sophistication used to conduct cyber-attacks and breaches of information technology systems, as well as the sources and targets of these attacks, change frequently and are often not recognized until such attacks are launched or have been in place for a period of time. Our security measures cannot provide assurance that we will be successful in preventing such breaches.

A change in our tax status under the United States Internal Revenue Code, or other jurisdictions, may have adverse effects on our income.

We and a number of our subsidiaries are foreign corporations that derive income from a United States trade or business and/or from sources within the United States. Drinker Biddle & Reath LLP, our United States tax counsel, has delivered to us an opinion, based on certain representations and assumptions set forth in it, to the effect that this income, to the extent derived from or incidental to the international operation of a ship or ships, is exempt from United States federal income tax pursuant to Section 883 of the Internal Revenue Code. We believe that most of our income (including that of our subsidiaries) is derived from or incidental to the international operation of a ship or ships.

Our ability to rely on Section 883 could change in the future. Provisions of the Internal Revenue Code, including Section 883, are subject to legislative change at any time. Moreover, changes could occur in the future with respect to the identity, residence or holdings of our direct or indirect shareholders, trading volume or trading frequency of our shares, or relevant foreign tax laws of Liberia or Malta such that they no longer qualify as equivalent exemption jurisdictions, that could affect our eligibility for the Section 883 exemption. Accordingly, there can be no assurance that we will continue to be exempt from United States income tax on United States source shipping income in the future. If we were not entitled to the benefit of Section 883, we and our subsidiaries would be subject to United States taxation on a portion of the income derived from or incidental to the international operation of our ships, which would reduce our net income.

Additionally, portions of our business are operated by companies that are within tonnage tax regimes of the U.K. and Malta. Further, some of the operations of these companies are conducted in jurisdictions where we rely on tax

Table of Contents

treaties to provide exemption from taxation. To the extent the tonnage tax laws of these countries change or we do not continue to meet the applicable qualification requirements or if tax treaties are changed or revoked, we may be required to pay higher income tax in these jurisdictions, adversely impacting our results of operations.

As budgetary constraints continue to adversely impact the jurisdictions in which we operate, increases in income tax regulations or tax reform affecting our operations may be imposed.

We are not a United States corporation and our shareholders may be subject to the uncertainties of a foreign legal system in protecting their interests.

Our corporate affairs are governed by our Articles of Incorporation and By-Laws and by the Business Corporation Act of Liberia. The provisions of the Business Corporation Act of Liberia resemble provisions of the corporation laws of a number of states in the United States. However, while most states have a fairly well developed body of case law interpreting their respective corporate statutes, there are very few judicial cases in Liberia interpreting the Business Corporation Act of Liberia. As such, the rights and fiduciary responsibilities of directors under Liberian law are not as clearly established as the rights and fiduciary responsibilities of directors under statutes or judicial precedent in existence in certain United States jurisdictions. For example, the right of shareholders to bring a derivative action in Liberian courts may be more limited than in United States jurisdictions. There may also be practical difficulties for shareholders attempting to bring suit in Liberia and Liberian courts may or may not recognize and enforce foreign judgments. Thus, our public shareholders may have more difficulty in protecting their interests with respect to actions by management, directors or controlling shareholders than would shareholders of a corporation incorporated in a United States jurisdiction.

Litigation, enforcement actions, fines or penalties could adversely impact our financial condition or results of operations and/or damage our reputation.

Our business is subject to various United States and international laws and regulations that could lead to enforcement actions, fines, civil or criminal penalties or the assertion of litigation claims and damages. In addition, improper conduct by our employees, agents or joint venture partners could damage our reputation and/or lead to litigation or legal proceedings that could result in civil or criminal penalties, including substantial monetary fines. In certain circumstances it may not be economical to defend against such matters and/or a legal strategy may not ultimately result in us prevailing in a matter. Such events could lead to an adverse impact on our financial condition or results of operations.

Provisions of our Articles of Incorporation, By-Laws and Liberian law could inhibit others from acquiring us, prevent a change of control, and may prevent efforts by our shareholders to change our management.

Certain provisions of our Articles of Incorporation and By-Laws and Liberian law may inhibit third parties from effectuating a change of control of the Company without Board approval which could result in the entrenchment of current management. These include provisions in our Articles of Incorporation that prevent third parties, other than A. Wilhelmsen AS. and Cruise Associates, from acquiring beneficial ownership of more than 4.9% of our outstanding shares without the consent of our Board of Directors.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

Information about our cruise ships, including their size and primary areas of operation, may be found within the Operating Strategies - Fleet upgrade, maintenance and expansion section and the Operations - Cruise Ships and Itineraries section in Item 1. Business. Information regarding our cruise ships under construction, estimated expenditures and financing may be found within the Future Capital Commitments and Funding Needs and Sources sections of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Table of Contents

Our principal executive office and principal shoreside operations are located at the Port of Miami, Florida where we lease three office buildings totaling approximately 361,800 square feet from Miami-Dade County, Florida, under long-term leases with current terms expiring in 2021. These leases may be extended for an additional ten years under two five year options. We lease one office building in the United Kingdom totaling approximately 24,000 square feet used to conduct our operations in the United Kingdom. We also lease a number of international offices throughout Europe, Asia, Mexico, South America and Australia to administer our brand operations globally.

We lease an office building in Springfield, Oregon totaling approximately 163,000 square feet, which is used as a call center for reservations. In addition, we own one office building totaling approximately 95,000 square feet in Wichita, Kansas, which is used as a call center for reservations and customer service. We lease two buildings in Miramar, Florida totaling approximately 179,000 square feet. One building is used primarily as office space and the other building is used as a call center for reservations. We lease our logistics center in Weston, Florida totaling approximately 267,000 square feet.

We believe that our facilities are adequate for our current needs and that we are capable of obtaining additional facilities as necessary.

We also operate two private destinations which we utilize as a port-of-call on certain of our itineraries: (i) an island we own in the Bahamas which we call CocoCay; and (ii) Labadee, a secluded peninsula we lease on the north coast of Haiti.

Item 3. Legal Proceedings

A class action complaint was filed in June 2011 against Royal Caribbean Cruises Ltd. in the United States District Court for the Southern District of Florida on behalf of a purported class of stateroom attendants employed onboard Royal Caribbean International cruise vessels. The complaint alleged that the stateroom attendants were required to pay other crew members to help with their duties and that certain stateroom attendants were required to work back of house assignments without the ability to earn gratuities, in each case, in violation of the U.S. Seaman's Wage Act. In May 2012, the district court granted our motion to dismiss the complaint on the basis that the applicable collective bargaining agreement requires any such claims to be arbitrated. The United States Court of Appeals, 11th Circuit, affirmed the district court's dismissal and denied the plaintiffs' petition for re-hearing and re-hearing en banc. In October 2014, the United States Supreme Court denied the plaintiffs' request to review the order compelling arbitration. Subsequently, approximately 575 crew members submitted demands for arbitration. The demands make substantially the same allegations as in the federal court complaint and are similarly seeking damages, wage penalties and interest in an indeterminate amount. Unlike the federal court complaint, the demands for arbitration are being brought individually by each of the crew members and not on behalf of a purported class of stateroom attendants. At this time, we are unable to estimate the possible impact of this matter on us. However, we believe the underlying claims made against us are without merit, and we intend to vigorously defend ourselves against them.

We are routinely involved in other claims typical within the cruise vacation industry. The majority of these claims are covered by insurance. We believe the outcome of such claims, net of expected insurance recoveries, will not have a material adverse impact on our financial condition or results of operations and cash flows.

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Market Information

Our common stock is listed on the New York Stock Exchange ("NYSE") and the Oslo Stock Exchange ("OSE") under the symbol "RCL". The table below sets forth the high and low sales prices of our common stock as reported by the NYSE and the OSE for the two most recent years by quarter:

	NYSE Common Stock		OSE Common Stock ⁽¹⁾	
	High	Low	High	Low
2014				
Fourth Quarter	\$83.90	\$52.32	638.00	347.00
Third Quarter	\$69.31	\$53.66	439.60	332.00
Second Quarter	\$57.38	\$49.65	349.00	300.00
First Quarter	\$54.93	\$45.95	332.60	284.20
2013				
Fourth Quarter	\$47.66	\$35.97	292.60	216.10
Third Quarter	\$40.71	\$33.31	241.80	201.40
Second Quarter	\$38.62	\$31.35	224.90	178.00
First Quarter	\$38.56	\$31.72	213.50	184.10

(1) Denominated in Norwegian kroner, as listed in the price history database available at www.oslobors.no

Holders

As of February 12, 2015 there were 961 record holders of our common stock. Since certain of our shares are held by brokers and other institutions on behalf of shareholders, the foregoing number is not representative of the number of beneficial owners.

Dividends

In 2013, we declared cash dividends on our common stock of \$0.12 per share during the first and second quarters of 2013. We increased the dividend amount to \$0.25 per share for the dividends declared in the third and fourth quarters of 2013 and the first and second quarters of 2014. The dividend amount was increased to \$0.30 per share for the dividends declared in the third and fourth quarters of 2014.

Holders of our common stock have an equal right to share in our profits in the form of dividends when and if declared by our Board of Directors out of funds legally available. Holders of our common stock have no rights to any sinking fund.

There are no exchange control restrictions on remittances of dividends on our common stock since (1) we are and intend to maintain our status as a nonresident Liberian entity under the Liberia Revenue Code of 2000 as Amended and the regulations thereunder, and (2) our ship-owning subsidiaries are not now engaged, and are not in the future expected to engage, in any business in Liberia, including voyages exclusively within the territorial waters of the Republic of Liberia. Under current Liberian law, no Liberian taxes or withholding will be imposed on payments to holders of our securities other than to a holder that is a resident Liberian entity or a resident individual or an individual or entity subject to taxation in Liberia as a result of having a permanent establishment within the meaning of the Liberia Revenue Code of 2000 as Amended in Liberia.

The declaration of dividends shall at all times be subject to the final determination of our Board of Directors that a dividend is prudent at that time in consideration of the needs of the business.

Table of Contents

Stock Repurchases

The following table presents the total number of shares of our common stock that we repurchased during the quarter ended December 31, 2014:

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or programs
November 1, 2014-November 30, 2014 ⁽¹⁾	3,500,000	\$67.45	—	—
Total this quarter	3,500,000	\$67.45	—	—

(1) As previously announced on Form 8-K, in November 2014, we repurchased 3.5 million shares of our common stock directly from our largest shareholder, Awilhelmsen AS, in a private transaction. The closing of the share repurchase was subject to Awilhelmsen AS having completed a sale of an additional 3.5 million shares to a financial institution in a market transaction pursuant to Rule 144 of the Securities Act (the "Secondary Sale"). The price we paid in connection with the share repurchase was equal to the price paid by the financial institution to Awilhelmsen AS in connection with the Secondary Sale.

Performance Graph

The following graph compares the total return, assuming reinvestment of dividends, on an investment in the Company, based on performance of the Company's common stock, with the total return of the Standard & Poor's 500 Composite Stock Index and the Dow Jones United States Travel and Leisure Index for a five year period by measuring the changes in common stock prices from December 31, 2009 to December 31, 2014.

Table of Contents

	12/09	12/10	12/11	12/12	12/13	12/14
Royal Caribbean Cruises Ltd.	100.00	185.92	98.79	137.68	195.65	346.17
S&P 500	100.00	115.06	117.49	136.30	180.44	205.14
Dow Jones US Travel & Leisure	100.00	141.39	150.84	170.95	248.70	289.40

The stock performance graph assumes for comparison that the value of the Company's common stock and of each index was \$100 on December 31, 2009 and that all dividends were reinvested. Past performance is not necessarily an indicator of future results.
