FLEXTRONICS INTERNATIONAL LTD.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
September 30, 2001
(Unaudited)

Note A - BASIS OF PRESENTATION

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the instructions to Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements, and should be read in conjunction with the Company's audited consolidated financial statements as of and for the fiscal year ended March 31, 2001 contained in the Company's annual report on Form 10-K. In the opinion of management, all adjustments (consisting only of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended September 30, 2001 are not necessarily indicative of the results that may be expected for the year ending March 31, 2002.

Note B - INVENTORIES

	\$1,420,254	\$1,787,055
	=====	=====

Note C - UNUSUAL CHARGES

Fiscal 2002

The Company recognized unusual pre-tax charges of approximately \$516.1 million during the second quarter of fiscal 2002, of which \$500.3 million related to closures of several manufacturing facilities and \$15.8 million primarily for the impairment of investments in certain technology companies. As further discussed below, \$439.4 million of the charges relating to facility closures have been classified as a component of Cost of Sales.

Unusual charges recorded in the second quarter of fiscal 2002 by segments are as follows: Americas, \$224.4 million; Asia, \$70.7 million; Western Europe, \$170.1 million; and Central Europe, \$50.9 million.

The components of the unusual charges recorded in the second quarter of fiscal 2002 are as follows (in thousands):

Facility closure costs:		
Severance	\$ 123,961	cash
Long-lived asset impairment	163,724	non-cash
Exit costs	212,660	cash/non-cash

Total facility closure costs	500,345	
Other unusual charges	15,750	cash/non-cash

Total Unusual Charges	516,095	

Income tax benefit	(117,115)	

Net Unusual Charges	\$ 398,980	
	=====	

In connection with the September 2001 quarter facility closures, the Company developed formal plans to exit certain activities and involuntarily terminate employees. Management's plan to exit an activity included the identification of duplicate manufacturing and administrative facilities for closure or consolidation into other facilities. Management currently anticipates that the facility closures and activities to which all of these charges relate will be substantially completed within one year of the commitment dates of the

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

respective exit plans, except for certain long-term contractual obligations.

Of the total pre-tax facility closure costs recorded in the second quarter, \$124.0 million relates to employee termination costs, of which \$93.4 million has been classified as a component of Cost of Sales. As a result of the various exit plans, the Company identified 11,168 employees to be involuntarily terminated related to the various facility closures. As of September 30, 2001, 1,195 employees have been terminated, and another 9,973 employees have been notified that they are to be terminated upon completion of the various facility closures and consolidations. During the September 2001 quarter, the Company paid employee termination costs of approximately \$19.4 million related to the fiscal 2002 restructuring activities. The remaining \$104.6 million of employee termination costs is classified as accrued liabilities as of September 30, 2001 and is expected to be paid out within one year of the commitment dates of the respective exit plans.

The unusual pre-tax charges recorded in the second quarter included \$163.7 million for the write-down of property, plant and equipment associated with various manufacturing and administrative facility closures from their carrying value of \$232.6 million. This amount has been classified as a component of Cost of Sales during the September 2001 quarter. Certain assets will be held for use and remain in service until their anticipated disposal dates pursuant to the exit plans. Since the asset will remain in service from the date of the decision to dispose of these assets to the anticipated disposal date, the assets are being depreciated over this expected period. For the assets that are being held for use, an impairment loss is recognized if the carrying amounts of these assets exceed the fair value of the assets. Certain other assets will be held for disposal as these assets are no longer required in operations. Assets held for disposal are no longer being depreciated. For the assets that are being held for disposal, an impairment loss is recognized if the carrying amounts of these assets exceed the fair value less cost to sell. The impaired long-lived assets consisted primarily of machinery and equipment of \$105.7 million and building and improvements of \$58.0 million.

The unusual pre-tax charges, also included approximately \$212.7 million for other exit costs. Approximately \$182.3 million of this amount has been classified as a component of Cost of Sales. The other exit costs recorded, primarily related to items such as building and equipment lease termination costs, warranty costs, current asset impairments and payments to suppliers and vendors to terminate agreements and were incurred directly as a result of the various exit plans. The Company paid approximately \$2.2 million of other exit costs during the second quarter and \$111.5 million of non-cash charges were utilized during the same period. The remaining \$99.0 million is classified as accrued liabilities as of September 30, 2001 and is expected to be substantially paid out within one year from the commitment dates of the respective exit plans, except for certain long-term contractual obligations.

Fiscal 2001

The Company recognized unusual pre-tax charges of approximately \$973.3 million during fiscal year 2001. Of this amount, \$493.1 million was recorded in the first quarter and was comprised of approximately \$286.5 million related to the issuance of an equity instrument to Motorola, Inc. ("Motorola") combined with approximately \$206.6 million of expenses resulting from The DII Group, Inc. and Palo Alto Products International Pte. Ltd. mergers and related facility closures. In the second quarter, unusual pre-tax charges amounted to approximately \$48.4 million associated with the mergers with Chatham Technologies, Inc. and Lightning Metal Specialties (and related entities) and related facility closures. In the third quarter, the Company recognized unusual pre-tax charges of approximately \$46.3 million, primarily related to the merger with JIT Holdings Ltd. and related facility closures. During the fourth quarter, the Company recognized unusual pre-tax charges, amounting to \$376.1 million

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

related to closures of several manufacturing facilities and \$9.5 million of other unusual charges, specifically for the impairment of investments in certain technology companies.

On May 30, 2000, the Company entered into a strategic alliance for product manufacturing with Motorola. In connection with this strategic alliance,

Motorola paid \$100.0 million for an equity instrument that entitled it to acquire 22.0 million Flextronics ordinary shares at any time through December 31, 2005, upon meeting targeted purchase levels or making additional payments to the Company. The issuance of this equity instrument resulted in a one-time non-cash charge equal to the excess of the fair value of the equity instrument issued over the \$100.0 million proceeds received. As a result, the one-time non-cash charge amounted to approximately \$286.5 million offset by a corresponding credit to additional paid-in capital in the first quarter of fiscal 2001. In June 2001, the Company entered into an agreement with Motorola under which it repurchased this equity instrument for \$112.0 million.

Unusual charges excluding the Motorola equity instrument by segments are as follows: Americas, \$553.1 million; Asia, \$86.5 million; Western Europe, \$32.9 million; and Central Europe, \$14.3 million. Unusual charges related to the Motorola equity instrument is not specific to a particular segment, and as such, has not been allocated to a particular geographic segment.

The components of the unusual charges recorded in fiscal 2001 are as follows (in thousands):

	FIRST QUARTER CHARGES	SECOND QUARTER CHARGES	THIRD QUARTER CHARGES	FOURTH QUARTER CHARGES
	-----	-----	-----	-----
Facility closure costs:				
Severance	\$ 62,487	\$ 5,677	\$ 3,606	\$ 60,703

	=====	=====	=====	=====

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

In connection with the fiscal 2001 facility closures, the Company developed formal plans to exit certain activities and involuntarily terminate employees. Management's plan to exit an activity included the identification of duplicate manufacturing and administrative facilities for closure or consolidation into other facilities. Management currently anticipates that the facility closures and activities to which all of these charges relate will be substantially completed within one year of the commitment dates of the respective exit plans, except for certain long-term contractual obligations. As discussed below, \$510.5 million of the charges relating to facility closures have been classified as a component of Cost of Sales during the fiscal year ended March 31, 2001.

Of the total pre-tax facility closure costs recorded in fiscal 2001, \$132.5 million relates to employee termination costs, of which \$68.1 million has been classified as a component of Cost of Sales. As a result of the various exit plans, the Company identified 11,269 employees to be involuntarily terminated related to the various mergers and facility closures. As of September 30, 2001, 9,091 employees have been terminated, and another 2,178 employees have been notified that they are to be terminated upon completion of the various facility closures and consolidations. During the first and second quarters of fiscal 2002, the Company paid employee termination costs of approximately \$28.3 million and \$11.3 million, respectively. The remaining \$32.1 million of employee termination costs is classified as accrued liabilities as of September 30, 2001 and is expected to be paid out within one year of the commitment dates of the respective exit plans.

The unusual pre-tax charges recorded in fiscal 2001 included \$232.5 million for the write-down of long-lived assets to fair value. This amount has been classified as a component of Cost of Sales during fiscal 2001. Included in

the long-lived asset impairment are charges of \$229.1 million, which related to property, plant and equipment associated with the various manufacturing and administrative facility closures which were written down to their fair value of \$192.0 million as of March 31, 2000. Certain assets will be held for use and remain in service until their anticipated disposal dates pursuant to the exit plans. Since the assets will remain in service from the date of the decision to dispose of these assets to the anticipated disposal date, the assets are being depreciated over this expected period. For the assets that are being held for use, an impairment loss is recognized if the carrying amount of these assets exceed the fair value of the assets. Certain other assets will be held for disposal, as these assets are no longer required in operations. Assets held for disposal are no longer being depreciated. For the assets that are being held for disposal, an impairment loss is recognized if the carrying amount of these assets exceed the fair value less cost to sell. The impaired long-lived assets consisted primarily of machinery and equipment of \$153.0 million and building and improvements of \$76.1 million. The long-lived asset impairment also included the write-off of the remaining goodwill and other intangibles related to certain closed facilities of \$3.4 million.

The unusual pre-tax charges recorded in fiscal 2001 also included approximately \$209.9 million for other exit costs, which have been classified as a component of Cost of Sales. Other exit costs include contractual obligations totaling \$85.4 million, which were incurred directly as a result of the various exit plans. These contractual obligations consisted of facility lease terminations amounting to \$26.5 million, equipment lease terminations amounting to \$31.4 million and payments to suppliers and other third parties to terminate

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

contractual agreements amounting to \$27.5 million. The Company expects to make payments associated with its contractual obligations with respect to facility and equipment leases through the end of fiscal 2006 and with respect to the other contractual obligations with suppliers and other third parties through fiscal 2002. Other exit costs also include charges of \$77.0 million relating to asset impairments resulting from customer contracts that were breached when they were terminated by us as a result of various facility closures. These asset impairments were determined based on the difference between the carrying amount and the realizable value of the impaired inventory and accounts receivable. The Company disposed of the impaired assets, primarily through scrapping and write-offs, by the end of fiscal 2001. Also included in other exit costs were charges amounting to \$16.1 million for the incremental costs for warranty work incurred by us for products sold prior to the commitment dates of the various exit plans. Other exit costs also include \$11.6 million of facility refurbishment and abandonment costs related to certain building repair work necessary to prepared the exited facilities for sale or return the facilities to the landlord. The remaining \$19.8 million of other exit costs recorded were primarily associated with incremental amounts of legal and environmental costs, incurred directly as a result of the various exit plans and facility closures. During the first and second quarters of fiscal 2002, the Company paid other exit costs of approximately \$17.2 million and \$33.2 million, respectively. Additionally, approximately \$3.9 million of other exit costs were non-cash charges utilized during the first quarter of fiscal 2002. The remaining \$41.0 million of other exit costs is classified as accrued liabilities as of September 30, 2001 and is expected to be paid out within one year of the commitment dates of the respective exit plans.

The direct transaction costs recorded in fiscal 2001 included approximately \$64.3 million of costs primarily related to investment banking and financial advisory fees as well as legal and accounting costs associated with the merger transactions. Other direct transaction costs which totaled approximately \$38.1 million were mainly comprised of accelerated debt prepayment expense, accelerated executive stock compensation and benefit-related expenses. Approximately \$28.2 million of the direct transaction costs were non-cash charges utilized during fiscal 2001. During the first and second quarters of fiscal 2002, the Company paid approximately \$1.3 million and \$0.3 million of direct transaction costs. There is a remaining balance of \$1.7 million which is classified in accrued liabilities as of September 30, 2001 and is expected to be substantially paid out in the subsequent quarters.

The following table summarizes the balance of the facility closure costs as of March 31, 2001 and the type and amount of closure costs provisioned for and utilized during the first and second quarters of fiscal 2002.

	SEVERANCE	LONG-LIVED ASSET IMPAIRMENT	OTHER EXIT COSTS	TOTAL

Note D - EARNINGS PER SHARE

Basic earnings per share is computed using the weighted average number of ordinary shares outstanding during the applicable periods.

Diluted earnings per share is computed using the weighted average number of ordinary shares and dilutive ordinary share equivalents outstanding during the applicable periods. Ordinary share equivalents include ordinary shares issuable upon the exercise of stock options and other equity instruments, and are computed using the treasury stock method.

Earnings per share data were computed as follows (in thousands, except per share amounts):

	Three months ended September 30, 2001	September 30, 2000	Six months September 30, 2001
	-----	-----	-----
Basic earnings (loss) per share:			
Net income (loss)	\$ (329,805)	\$ 49,927	\$ (241,477)
	-----	-----	-----
Shares used in computation:			
Weighted-average ordinary shares outstanding	481,381	436,376	480,208
	=====	=====	=====
Basic earnings (loss) per share	\$ (0.69)	\$ 0.11	\$ (0.50)
	=====	=====	=====
Diluted earnings (loss) per share:			
Net income (loss)	\$ (329,805)	\$ 49,927	\$ (241,477)
	-----	-----	-----
Shares used in computation:			
Weighted-average ordinary shares outstanding	481,381	436,376	480,208
Shares applicable to exercise of dilutive options(1), (2)	--	44,425	--
	-----	-----	-----
Shares applicable to diluted earnings	481,381	480,801	480,208
	=====	=====	=====
Diluted earnings (loss) per share	\$ (0.69)	\$ 0.10	\$ (0.50)
	=====	=====	=====

(1) Stock options of the Company calculated based on the treasury stock method using average market price for the period, if dilutive. Options to purchase 1,527,666 shares outstanding during the three months ended September 30, 2000 were excluded from the computation of diluted earnings per share because the exercise price of these options were greater than the average market price of the Company's ordinary shares during the period.

(2) The ordinary share equivalents from stock options and other equity instruments were anti-dilutive for the six months ended September 30, 2000 and the three and six months ended September 30, 2001, and

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

therefore not assumed to be converted for diluted earnings per share computation.

Note E - COMPREHENSIVE INCOME

The following table summarizes the components of comprehensive income (in thousands):

	Three months ended September 30, 2001	September 30, 2000	S Septemb 2000
	-----	-----	-----
Net income (loss)	\$ (329,805)	\$ 49,927	\$ (241
Other comprehensive income (loss):			
Foreign currency translation adjustments, net of tax ..	17,348	(40,274)	(6
Unrealized holding gain (loss) on investments and derivatives, net of tax	(3,030)	13,262	5
	-----	-----	-----
Comprehensive income (loss)	\$ (315,487)	\$ 22,915	\$ (242
	=====	=====	=====

Note F - SEGMENT REPORTING

Information about segments was as follows (in thousands):

	Three months ended September 30, 2001	September 30, 2000	Six months September 30, 2001

	\$2,035,303	\$1,828,441
	=====	=====

For purposes of the preceding tables, "Asia" includes China, India, Malaysia, Singapore, Thailand and Taiwan, "Americas" includes Brazil, Mexico and the

United States, "Western Europe" includes Denmark, Finland, France, Germany, Netherlands, Norway, Poland, Spain, Sweden, Switzerland and the United Kingdom, and "Central Europe" includes Austria, the Czech Republic, Hungary, Ireland, Israel, Italy and Scotland.

Geographic revenue transfers are based on selling prices to unaffiliated companies, less discounts.

Note G -- SHAREHOLDERS' EQUITY

In connection with the Company's strategic alliance with Motorola in May 2000, Motorola paid \$100.0 million for an equity instrument that entitled it to acquire 22.0 million Flextronics ordinary shares at any time through December 31, 2005 upon meeting targeted purchase levels or making additional payments to the Company. The issuance of this equity instrument resulted in a one-time non-cash charge equal to the excess of the fair value of the equity instrument issued over the \$100.0 million proceeds received. As a result, the one-time non-cash charge amounted to approximately \$286.5 million offset by a corresponding credit to additional paid-in capital in the first quarter of fiscal 2001.

In June 2001, the Company entered into an agreement with Motorola under which it repurchased this equity instrument for \$112.0 million. The fair value of the equity instrument on the date it was repurchased exceeded the amount paid to repurchase the equity instrument. Accordingly, the Company accounted for the repurchase of the equity instrument as a reduction to shareholders' equity in the accompanying condensed consolidated financial statements.

Note H -- PURCHASE OF ASSETS

In April 2001, the Company entered into a definitive agreement with Ericsson Telecom AB ("Ericsson") with respect to its management of the operations of Ericsson's mobile telephone operations. Operations under this arrangement commenced in the first quarter of fiscal 2002. Under this agreement, the Company is to provide a substantial portion of Ericsson's mobile phone requirements. The Company assumed responsibility for product assembly, new product prototyping, supply chain management and logistics management in which we process customer orders from Ericsson and configure and ship products to Ericsson's customers. In connection with this relationship, the Company employed the existing workforce for certain operations, and purchased from Ericsson certain inventory, equipment and other assets, and assumed certain accounts payable and accrued expenses at their net book value of approximately \$353.2 million.

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

In July 2001, the Company acquired Alcatel's manufacturing facility and related assets located in Laval, France. All of Alcatel's GSM handset production will be consolidated from Illkirch, France, to the Company's facility in Laval. The acquisition was accounted for as a purchase of assets. In connection with this acquisition, the Company entered into a long-term supply agreement with Alcatel to provide printed circuit board assembly, final systems assembly and various engineering support services. The Company purchased from Alcatel certain inventory, equipment and other assets, and assumed certain accounts payable and accrued expenses at their net book value.

Note I - NEW ACCOUNTING STANDARDS

In July 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 141 and No. 142, "Business Combinations" and "Goodwill and Other Intangible Assets". SFAS No. 141 requires all business combinations initiated after June 30, 2001 to be accounted for using the purchase method. Under SFAS No. 142, goodwill is no longer subject to amortization over its estimated useful life. Rather, goodwill is subject to at least an annual assessment for impairment, applying a fair-value based test. Additionally, an acquired intangible asset should be separately recognized if the benefit of the intangible asset is obtained through contractual or other legal rights, or if the intangible asset can be sold, transferred, licensed, rented or exchanged, regardless of the acquirer's intent to do so. Other intangible assets will continue to be valued and amortized over their estimated useful lives; in-process research and development will continue to be written off immediately.

The Company adopted SFAS 142 in the first quarter of fiscal 2002 and will no longer amortize goodwill, thereby eliminating annual goodwill amortization of approximately \$124.2 million, based on anticipated amortization for fiscal 2002. At September 30, 2001, unamortized

goodwill approximated \$1.1 billion. The Company will evaluate goodwill at least on an annual basis and whenever events and changes in circumstances suggest that the carrying amount may not be recoverable from its estimated future cash flow. The Company has completed the first step of the transitional goodwill impairment test and has determined that no potential impairment exists. As a result, the Company has recognized no transitional impairment loss in fiscal 2002 in connection with the adoption of SFAS 142.

Goodwill information for each reportable segment is as follows (in thousands):

	As of April 1, 2001 -----	Goodwill Acquired -----	As of September 30, 2001 -----
Segments:			
Asia	\$ 186,515	\$ 6,165	\$ 192,680
Americas	300,041	115,857	415,898

Central Europe	123,862	14,442	138,304
	-----	-----	-----
	\$ 957,291	\$ 151,161	\$1,108,452
	=====	=====	=====

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

During the first six months of fiscal 2002, \$151.2 million of goodwill resulted from several immaterial business acquisitions and contingent purchase price adjustments for historical acquisitions.

Net income and earnings per share for the three and six months ended September 30, 2000 adjusted to exclude goodwill amortization expenses, net of tax, are as follows (in thousands):

	Three months ended September 30, 2000	Six months ended September 30, 2000
	-----	-----
Net income (loss) as reported	\$ 49,927	\$ (320,635)
	-----	-----
Add back: Goodwill amortization expense	10,248	18,088
	-----	-----
Adjusted net income (loss)	\$ 60,175	\$ (302,547)
	=====	=====

The pro forma effects of the adoption on net income and earnings per share of the Company during the three and six months ended September 30, 2000 are as follows:

	Three months ended September 30, 2000	Six months ended September 30, 2000
	-----	-----
Basic earnings (loss) per share:		
As reported	\$ 0.11	\$ (0.75)
	-----	-----
Add back: Goodwill amortization expense	0.03	0.05
	-----	-----
Pro forma	\$ 0.14	\$ (0.70)
	=====	=====
Diluted earnings (loss) per share:		
As reported	\$ 0.10	\$ (0.75)
	-----	-----
Add back: Goodwill amortization expense	0.03	0.05
	-----	-----
Pro forma	\$ 0.13	\$ (0.70)
	=====	=====

All of the Company's acquired intangible assets are subject to amortization. Intangible assets are comprised of contractual agreements, patents and trademarks, developed technologies and other acquired intangible assets including work forces, favorable leases and customer lists. Contractual agreements are being amortized over periods up to five years. Purchased developed technologies are being amortized on a straight-line basis over periods of up to seven years. Other acquired intangible assets relate to assembled work forces, favorable leases and customer lists, and are amortized on a straight-line basis over three to ten years. No significant residual value is estimated for the intangible assets. During the first six months of fiscal 2002, there were immaterial additions to intangible assets, primarily related to

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

acquired developed technologies. Intangible assets amortization expense for the first and second quarters of fiscal 2002 was approximately \$2.3 million and \$3.8 million, respectively. The components of intangible assets are as follows (in thousands):

	September 30, 2001			March 31, 2000	
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount	Accumulated Amortization
Intangibles:					
Contractual Agreements ...	\$ 17,300	\$ (4,256)	\$ 13,044	\$ 17,304	\$ (1,714)
Patents and Trademarks ...	1,100	(576)	524	7,625	(5,514)
Developed Technologies ..	13,725	(5,976)	7,749	1,275	(850)
All Other	17,279	(10,456)	6,823	17,629	(9,662)
	-----	-----	-----	-----	-----
Total	\$ 49,404	\$ (21,264)	\$ 28,140	\$ 43,833	\$ (17,740)
	=====	=====	=====	=====	=====

The corresponding amortization expenses of the intangible assets listed above were as follows for the three and six months ended September 30, 2001 and 2000 (in thousands):

	Three months ended		Six months ended	
	September 30, 2001	September 30, 2000	September 30, 2001	September 30, 2000
Intangible Assets:

2005	2,392
2006	863
Thereafter	1,938

Total Amortization Expense	\$28,140

=====

* Represents remaining six month period ended March 31, 2002.

On April 1, 2001, the Company adopted SFAS No. 133, "Accounting for Derivative Instruments and Hedging Activities", as amended by SFAS No. 137 and No. 138. All derivative instruments are required to be recorded on the balance sheet at fair value. If the derivative is designated as a cash flow hedge, the effective portion of changes in the fair value of the derivative is recorded in Other Comprehensive Income ("OCI") and is recognized in the income statement when the hedged item affects earnings. Ineffective portions of changes in the fair value of cash flow hedges are immediately recognized in earnings. If the derivative is designated as a fair value hedge, the changes in the fair value of the derivative and of the hedged item attributable to the hedged risk are recognized in earnings in the current period. For derivative instruments not designated as hedging instruments under SFAS 133, changes in fair values are recognized in earnings in the current period. Such instruments are typically forward contracts used to hedge foreign currency balance sheet exposures.

The Company is exposed to foreign currency exchange rate risk inherent in forecasted sales, cost of sales and assets and liabilities denominated in non-functional currencies. The Company has established currency risk management programs to protect against reductions in value and volatility of future cash flows caused by changes in foreign currency exchange rates. The Company enters into short-term foreign currency forward contracts and borrowings to hedge only those currency exposures associated with certain assets and liabilities, mainly accounts receivable and accounts payable, and cash flows denominated in non-functional currencies.

At September 30, 2001, the fair value of the equity derivative instruments resulted in the recording of an asset of approximately \$8.1 million with the corresponding credit to OCI. All of this amount is expected to be recognized in earnings over the next twelve months.

Note J - SUBSEQUENT EVENTS

In October 2001, the Company announced a manufacturing agreement with Xerox Corporation ("Xerox"). The Company is to acquire Xerox's manufacturing facilities and related assets in Toronto, Canada; Resende, Brazil; Aguascalientes, Mexico; and Penang, Malaysia. The agreement includes payment to Xerox currently estimated to be approximately \$220.0 million for the purchase of certain inventory, equipment and other assets, and the assumption of certain liabilities at their net book value. In connection with the acquisition, the Company entered into a five-year contract for the manufacture of certain Xerox office equipment and components. The acquisition will be accounted for as a purchase of assets.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This report on Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. The words "expects," "anticipates," "believes," "intends," "plans" and similar expressions identify forward-looking statements. In addition, any statements which refer to expectations, projections or other characterizations of future events or circumstances are forward-looking statements. We undertake no obligation to

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

publicly disclose any revisions to these forward-looking statements to reflect events or circumstances occurring subsequent to filing this Form 10-Q with the Securities and Exchange Commission. These forward-looking statements are subject to risks and uncertainties, including, without limitation, those discussed in "Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Certain Factors Affecting Operating Results." Accordingly, our future results may differ materially from historical results or from those discussed or implied by these forward-looking statements.

ACQUISITIONS

We have actively pursued mergers and other business acquisitions to expand our global reach, manufacturing capacity and service offerings and to diversify and strengthen customer relationships. Since the beginning of fiscal 2001, we have completed over 20 acquisitions of businesses and manufacturing facilities, including: JIT Holdings Ltd, Chatham Technologies, Inc., Lightning Metal Specialties and related entities, Palo Alto Products International Pte. Ltd. and The DII Group, Inc.

These acquisitions were accounted for as pooling of interests and our condensed consolidated financial statements have been restated to reflect the combined operations of the merged companies for all periods presented. We have completed since fiscal 2001 other immaterial pooling of interests transactions, prior period statements had not been restated.

We have also made a number of business acquisitions of other companies since fiscal 2001, which were accounted for using the purchase method. Accordingly our consolidated financial statements include the operating results of each business from the date of acquisition. Pro forma results of operations have not been presented because the effects of these acquisitions were not material on either an individual or an aggregate basis.

RECENT STRATEGIC TRANSACTIONS

In April 2001, the Company entered into a definitive agreement with Ericsson Telecom AB ("Ericsson") with respect to its management of the operations of Ericsson's mobile telephone operations. Operations under this arrangement commenced in the first quarter of fiscal 2002. Under this agreement, the Company is to provide a substantial portion of Ericsson's mobile phone requirements. The Company assumed responsibility for product assembly, new product prototyping, supply chain management and logistics management in which we process customer orders from Ericsson and configure and ship products to Ericsson's customers. In connection with this relationship, the Company employed the existing workforce for certain operations, and purchased from Ericsson certain inventory, equipment and other assets, and assumed certain accounts payable and accrued expenses at their net book value of approximately \$353.2 million.

In July 2001, the Company acquired Alcatel's manufacturing facility and related assets located in Laval, France. All of Alcatel's GSM handset production will be consolidated from Illkirch, France, to the Company's facility in Laval. The acquisition was accounted for as a purchase of assets. In connection with this acquisition, the Company entered into a long-term supply agreement with Alcatel to provide printed circuit board assembly, final systems assembly and various engineering support services. The Company purchased from Alcatel certain inventory, equipment and other assets, and assumed certain accounts payable and accrued expenses at their net book value.

RESULTS OF OPERATIONS

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

The following table sets forth, for the periods indicated, certain statement of operations data expressed as a percentage of net sales.

	THREE MONTHS ENDED		SIX MO
	SEPTEMBER 30, 2001	SEPTEMBER 30, 2000	SEPTEMBER 30, 2001
	-----	-----	-----
Net sales	100.0%	100.0%	100.0%
Cost of sales	93.6	91.9	93.1
Unusual charges	13.5	0.8	6.9
	-----	-----	-----
Gross margin (loss)	(7.1)	7.3	--

	-----	-----	-----
Net income (loss)	(10.2)%	1.6%	(3.8)%
	=====	=====	=====

Net Sales

We derive our net sales from the assembly of complex printed circuit boards, or PCBs, and complete systems and products, fabrication and assembly of plastic and metal enclosures, and fabrication of PCBs and backplanes. In addition, through our photonics division, we manufacture and assemble photonics components and integrate them into PCB assemblies and other systems. Throughout the production process, we offer design and technology services; logistics services, such as materials procurement, inventory management, vendor management, packaging, and distribution; and automation of key components of the supply chain through advanced information technologies. In addition, we have added other after-market services such as network installation.

Net sales for the second quarter of fiscal 2002 increased 5% to \$3.3

billion from \$3.1 billion for the second quarter of fiscal 2001. Net sales for the first six months of fiscal 2002 increased 10% to \$6.4 billion from \$5.8 billion for the same period in fiscal 2001. The increase in net sales was primarily the result of the incremental revenues associated with the purchase of several manufacturing facilities during the first six months of fiscal 2002, and to a lesser extent, the further expansion of sales to our existing customers as well as further expansion of sales to new customers worldwide. A continued decline in demand due to the economic downturn experienced by the electronics industry, which has been driven by a combination of weakening end-market demand (particularly in the telecommunications and networking sectors) and our customers' inventory imbalances has resulted in slowing the rate of growth in our net sales.

Our ten largest customers in the first six months of fiscal 2002 and

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

2001 accounted for approximately 64% and 58% of net sales, respectively, with Ericsson accounting for approximately 26% in the first six months of fiscal 2002. No other customer accounted for more than 10% of net sales. No customer accounted for more than 10% of net sales in the corresponding period of fiscal 2001. See "Certain Factors Affecting Operating Results - The Majority of our Sales Comes from a Small Number of Customers; If We Lose any of these Customers, our Sales Could Decline Significantly" and "Certain Factors Affecting Operating Results - We Depend on the Electronics Devices, Information Technologies Infrastructure, Communications Infrastructure and Computer and Office Automation Industries which Continually Produce Technologically Advanced Products with Short Life Cycles; Our Inability to Continually Manufacture such Products on a Cost-Effective Basis could Harm our Business".

Gross Profit

Gross profit varies from period to period and is affected by a number of factors, including product mix, component costs and availability, product life cycles, unit volumes, startup, expansion and consolidation of manufacturing facilities, capacity utilization, pricing, competition and new product introductions.

Gross profit for the second quarter of fiscal 2002 decreased by \$456.0 million from \$225.3 million in the second quarter of fiscal 2001, primarily attributable to unusual pre-tax charges amounting to \$439.4 million in the second quarter of fiscal 2002. The unusual charges were associated with the facility closure costs, as more fully described below in "Unusual Charges". Excluding the unusual charges, gross margin was 6.4% and 6.9% for the second quarter and six months ended September 2001, respectively, compared to 8.1% and 7.9% for the corresponding periods in fiscal 2001. Our gross margin was affected by several factors, primarily, (i) under absorbed fixed costs caused by the underutilization of capacity, resulting from the economic downturn experienced by the electronics industry; (ii) costs associated with the startup of new customers and new projects, which typically carry higher levels of underabsorbed manufacturing overhead costs until the projects reach higher volume production; (iii) higher costs associated with expanding our facilities; and to a lesser extent, (iv) changes in product mix to higher volume printed circuit board assembly projects and final systems assembly projects, which typically have a lower gross margin. See "Certain Factors Affecting Operating Results - If We Do Not Manage Effectively Changes in Our Operations, Our Business May be Harmed," and "- We may be Adversely Affected by Shortages of Required Electronic Components".

Increased mix of products that have relatively high material costs as a percentage of total unit costs has historically been a factor that has adversely affected our gross margins. Further, we may enter into supply arrangements in connection with strategic relationships and original equipment manufacturer ("OEM") divestitures. These arrangements, which are relatively larger in scale, could adversely affect our gross margins. We believe that these and other factors may adversely affect our gross margins, but we do not expect that this will have a material effect on our income from operations.

Unusual Charges

Fiscal 2002

We recognized unusual pre-tax charges of approximately \$516.1 million during the second quarter of fiscal 2002, of which \$500.3 million related to closures of several manufacturing facilities and \$15.8 million primarily for the impairment of investments in certain technology companies. As further discussed below, \$439.4 million of the charges relating to facility closures have been classified as a component of Cost of Sales.

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

Unusual charges recorded in the second quarter of fiscal 2002 by segments are as follows: Americas, \$224.4 million; Asia, \$70.7 million; Western Europe, \$170.1 million; and Central Europe, \$50.9 million.

The components of the unusual charges recorded in the second quarter of fiscal 2002 are as follows (in thousands):

Facility closure costs:		
Severance	\$ 123,961	cash
Long-lived asset impairment	163,724	non-cash
Exit costs	212,660	cash/non-cash

Total facility closure costs	500,345	
Other unusual charges	15,750	cash/non-cash

Total Unusual Charges	516,095	

Income tax benefit	(117,115)	

Net Unusual Charges	\$ 398,980	
	=====	

In connection with the September 2001 quarter facility closures, we developed formal plans to exit certain activities and involuntarily terminate employees. Management's plan to exit an activity included the identification of duplicate manufacturing and administrative facilities for closure or consolidation into other facilities. Management currently anticipates that the facility closures and activities to which all of these charges relate will be substantially completed within one year of the commitment dates of the respective exit plans, except for certain long-term contractual obligations.

Of the total pre-tax facility closure costs recorded in the second quarter, \$124.0 million relates to employee termination costs, of which \$93.4 million has been classified as a component of Cost of Sales. As a result of the various exit plans, we identified 11,168 employees to be involuntarily terminated related to the various facility closures. As of September 30, 2001, 1,195 employees have been terminated, and another 9,973 employees have been notified that they are to be terminated upon completion of the various facility closures and consolidations. During the September 2001 quarter, we paid employee termination costs of approximately \$19.4 million related to the fiscal 2002 restructuring activities. The remaining \$104.6 million of employee termination costs is classified as accrued liabilities as of September 30, 2001 and is expected to be paid out within one year of the commitment dates of the respective exit plans.

The unusual pre-tax charges recorded in the second quarter included \$163.7 million for the write-down of property, plant and equipment associated with various manufacturing and administrative facility closures from their carrying value of \$232.6 million. This amount has been classified as a component of Cost of Sales during the September 2001 quarter. Certain assets will be held for use and remain in service until their anticipated disposal dates pursuant to the exit plans. Since the asset will remain in service from the date of the decision to dispose of these assets to the anticipated disposal date, the assets are being depreciated over this expected period. For the assets that are being

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

held for use, an impairment loss is recognized if the carrying amounts of these assets exceed the fair value of the assets. Certain assets will be held for disposal as these assets are no longer required in operations. Assets held for disposal are no longer being depreciated. For the assets that are being held for disposal, an impairment loss is recognized if the carrying amounts of these assets exceed the fair value less cost to sell. The impaired long-lived assets consisted primarily of machinery and equipment of \$105.7 million and building and improvements of \$58.0 million.

The unusual pre-tax charges, also included approximately \$212.7 million for other exit costs. Approximately \$182.3 million of this amount has been classified as a component of Cost of Sales. The other exit costs recorded, primarily related to items such as building and equipment lease termination costs, warranty costs, current asset impairments and payments to suppliers and vendors to terminate agreements and were incurred directly as a result of the various exit plans. We paid approximately \$2.2 million of other exit costs during the second quarter and \$111.5 million of non-cash charges were utilized during the same period. The remaining \$99.0 million is classified as accrued liabilities as of September 30, 2001 and is expected to be substantially paid out

within one year from the commitment dates of the respective exit plans, except for certain long-term contractual obligations.

Fiscal 2001

We recognized unusual pre-tax charges of approximately \$973.3 million during fiscal year 2001. Of this amount, \$493.1 million was recorded in the first quarter and was comprised of approximately \$286.5 million related to the issuance of an equity instrument to Motorola, Inc. ("Motorola") combined with approximately \$206.6 million of expenses resulting from The DII Group, Inc. and Palo Alto Products International Pte. Ltd. mergers and related facility closures. In the second quarter, unusual pre-tax charges amounted to approximately \$48.4 million associated with the mergers with Chatham Technologies, Inc. and Lightning Metal Specialties (and related entities) and related facility closures. In the third quarter, we recognized unusual pre-tax charges of approximately \$46.3 million, primarily related to the merger with JIT Holdings Ltd. and related facility closures. During the fourth quarter, we recognized unusual pre-tax charges, amounting to \$376.1 million related to closures of several manufacturing facilities and \$9.5 million of other unusual charges, specifically for the impairment of investments in certain technology companies.

On May 30, 2000, we entered into a strategic alliance for product manufacturing with Motorola. In connection with this strategic alliance, Motorola paid \$100.0 million for an equity instrument that entitled it to acquire 22.0 million Flextronics ordinary shares at any time through December 31, 2005, upon meeting targeted purchase levels or making additional payments to us. The issuance of this equity instrument resulted in a one-time non-cash charge equal to the excess of the fair value of the equity instrument issued over the \$100.0 million proceeds received. As a result, the one-time non-cash charge amounted to approximately \$286.5 million offset by a corresponding credit to additional paid-in capital in the first quarter of fiscal 2001. In June 2001, we entered into an agreement with Motorola under which it repurchased this equity instrument for \$112.0 million.

Unusual charges excluding the Motorola equity instrument by segments are as follows: Americas, \$553.1 million; Asia, \$86.5 million; Western Europe, \$32.9 million; and Central Europe, \$14.3 million. Unusual charges related to the

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

Motorola equity instrument is not specific to a particular segment, and as such, has not been allocated to a particular geographic segment.

The components of the unusual charges recorded in fiscal 2001 are as follows (in thousands):

	FIRST QUARTER CHARGES -----	SECOND QUARTER CHARGES -----	THIRD QUARTER CHARGES -----	FOURTH QUARTER CHARGES -----
Facility closure costs:				
Severance	\$ 62,487	\$ 5,677	\$ 3,606	\$ 60,703
Long-lived asset impairment	46,646	14,373	16,469	155,046
Exit costs	24,201	5,650	19,703	160,368
	-----	-----	-----	-----
Total facility closure costs	133,334	25,700	39,778	376,117
Direct transaction costs:				
Professional fees	50,851	7,247	6,250	--
Other costs	22,382	15,448	248	--
	-----	-----	-----	-----
Total direct transaction costs ..	73,233	22,695	6,498	--
	-----	-----	-----	-----
Motorola equity instrument	286,537	--	--	--
	-----	-----	-----	-----
Other unusual charges	--	--	--	9,450
	-----	-----	-----	-----
Total Unusual Charges	493,104	48,395	46,276	385,567
	-----	-----	-----	-----
Income tax benefit	(30,000)	(6,000)	(6,500)	(110,000)
	-----	-----	-----	-----
Net Unusual Charges	\$ 463,104	\$ 42,395	\$ 39,776	\$ 275,567
	=====	=====	=====	=====

In connection with the fiscal 2001 facility closures, we developed formal plans to exit certain activities and involuntarily terminate employees. Management's plan to exit an activity included the identification of duplicate manufacturing and administrative facilities for closure

or consolidation into other facilities. Management currently anticipates that the facility closures and activities to which all of these charges relate will be substantially completed within one year of the commitment dates of the respective exit plans, except for certain long-term contractual obligations. As discussed below, \$510.5 million of the charges relating to facility closures have been classified as a component of Cost of Sales during the fiscal year ended March 31, 2001.

Of the total pre-tax facility closure costs recorded in fiscal 2001 \$132.5 million relates to employee termination costs, of which \$68.1 million has been classified as a component of Cost of Sales. As a result of the various exit plans, we identified 11,269 employees to be involuntarily terminated related to the various mergers and facility closures. As of September 30, 2001, 9,091

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

employees have been terminated, and another 2,178 employees have been notified that they are to be terminated upon completion of the various facility closures and consolidations. During the first and second quarters of fiscal 2002, we paid employee termination costs of approximately \$28.3 million and \$11.3 million, respectively. The remaining \$32.1 million of employee termination costs is classified as accrued liabilities as of September 30, 2001 and is expected to be paid out within one year of the commitment dates of the respective exit plans.

The unusual pre-tax charges recorded in fiscal 2001 included \$232.5 million for the write-down of long-lived assets to fair value. This amount has been classified as a component of Cost of Sales during fiscal 2001. Included in the long-lived asset impairment are charges of \$229.1 million, which related to property, plant and equipment associated with the various manufacturing and administrative facility closures which were written down to their fair value of \$192.0 million as of March 31, 2000. Certain assets will be held for use and remain in service until their anticipated disposal dates pursuant to the exit plans. Since the assets will remain in service from the date of the decision to dispose of these assets to the anticipated disposal date, the assets are being depreciated over this expected period. For the assets that are being held for use, an impairment loss is recognized if the carrying amount of these assets exceed the fair value of the assets. Certain other assets will be held for disposal, as these assets are no longer required in operations. Assets held for disposal are no longer being depreciated. For the assets that are being held for disposal, an impairment loss is recognized if the carrying amount of these assets exceed the fair value less cost to sell. The impaired long-lived assets consisted primarily of machinery and equipment of \$153.0 million and building and improvements of \$76.1 million. The long-lived asset impairment also included the write-off of the remaining goodwill and other intangibles related to certain closed facilities of \$3.4 million.

The unusual pre-tax charges recorded in fiscal 2001, also included approximately \$209.9 million for other exit costs, which have been classified as a component of Cost of Sales. Other exit costs include contractual obligations totaling \$85.4 million, which were incurred directly as a result of the various exit plans. These contractual obligations consisted of facility lease terminations amounting to \$26.5 million, equipment lease terminations amounting to \$31.4 million and payments to suppliers and other third parties to terminate contractual agreements amounting to \$27.5 million. We expect to make payments associated with its contractual obligations with respect to facility and equipment leases through the end of fiscal 2006 and with respect to the other contractual obligations with suppliers and other third parties through fiscal 2002. Other exit costs also include charges of \$77.0 million relating to asset impairments resulting from customer contracts that were breached when they were terminated by us as a result of various facility closures. These asset impairments were determined based on the difference between the carrying amount and the realizable value of the impaired inventory and accounts receivable. We disposed of the impaired assets, primarily through scrapping and write-offs, by the end of fiscal 2001. Also included in other exit costs were charges amounting to \$16.1 million for the incremental costs for warranty work incurred by us for products sold prior to the commitment dates of the various exit plans. Other exit costs also include \$11.6 million of facility refurbishment and abandonment costs related to certain building repair work necessary to prepared the exited facilities for sale or return the facilities to the landlord. The remaining \$19.8 million of other exit costs recorded were primarily associated with incremental amounts of legal and environmental costs, incurred directly as a result of the various exit plans and facility closures. During the first and second quarters of fiscal 2002, we paid other exit costs of approximately \$17.2 million and \$33.2 million, respectively. Additionally, approximately \$3.9 million of other exit costs were non-cash charges utilized during the first quarter of fiscal 2002. The remaining \$41.0 million of other exit costs is classified as accrued liabilities as of September 30, 2001 and is expected to be

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

paid out within one year of the commitment dates of the respective exit plans.

The direct transaction costs recorded in fiscal 2001, included approximately \$64.3 million of costs primarily related to investment banking and financial advisory fees as well as legal and accounting costs associated with the merger transactions. Other direct transaction costs which totaled approximately \$38.1 million were mainly comprised of accelerated debt prepayment expense, accelerated executive stock compensation and benefit-related expenses. Approximately \$28.2 million of the direct transaction costs were non-cash charges utilized during fiscal 2001. During the first and second quarters of fiscal 2002, we paid approximately \$1.3 million and \$0.3 million of direct transaction costs. There is a remaining balance of \$1.7 million which is classified in accrued liabilities as of September 30, 2001 and is expected to be substantially paid out in the subsequent quarters.

The following table summarizes the balance of the facility closure costs as of March 31, 2001 and the type and amount of closure costs provisioned for and utilized during the first and second quarters of fiscal 2002.

	SEVERANCE	LONG-LIVED ASSET IMPAIRMENT	OTHER EXIT COSTS	TOTAL
	-----	-----	-----	-----
Balance at March 31, 2001	\$ 71,734	\$ --	\$ 95,343	\$ 167,077
Activities during the quarter:				
First quarter provision	--	--	--	--
Cash charges	(28,264)	--	(17,219)	(45,483)
Non-cash charges	--	--	(3,947)	(3,947)
	-----	-----	-----	-----
Balance at June 30, 2001	43,470	--	74,177	117,647
Activities during the quarter:				
Second quarter provision	123,961	163,724	212,660	500,345
Cash charges	(30,743)	--	(35,353)	(66,096)
Non-cash charges	--	(163,724)	(111,486)	(275,210)
	-----	-----	-----	-----
Balance at September 30, 2001 ..	\$ 136,688	\$ --	\$ 139,998	\$ 276,686
	=====	=====	=====	=====

We believe that the cost of goods sold savings achieved through lower depreciation and reduced employee expense will be offset by reduced revenues at the affected facilities.

Selling, General and Administrative Expenses

Selling, general and administrative expenses ("SG&A") for the second quarter of fiscal 2002 decreased slightly to \$105.5 million from \$107.9 million in the same quarter of fiscal 2001, and decreased as a percentage of net sales to 3.3% for the second quarter of fiscal 2002 compared to 3.5% for the same period of fiscal 2001. The dollar decrease in SG&A was directly attributable to the Company's restructuring activities and to a lesser extent a corporate-wide austerity program that focused on reducing discretionary spending. SG&A increased to \$214.3 million in the first six months of fiscal 2002 from \$202.8 million in the same period of fiscal 2001, but decreased as a percentage of net sales to 3.4% in the first six months of fiscal 2002 from 3.5% in the same period of fiscal 2001. The dollar increase in SG&A was primarily due to the

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

continued investment in infrastructure such as sales, marketing, supply-chain management, information systems and other related corporate and administrative expenses. The declining SG&A as a percentage of net sales reflects our continued focus on controlling our discretionary operating expenses, while expanding our net sales.

Goodwill and Intangibles Amortization

Goodwill and intangibles asset amortization for the second quarter of fiscal 2002 decreased to \$3.8 million from \$12.5 million for the same period of fiscal 2001. Goodwill and intangibles asset amortization decreased to \$6.1 million in the first six months of fiscal 2002 from \$21.9 million in the same period of fiscal 2001. The decreases in goodwill and intangibles assets amortization was a direct result of the adoption of Statement of Financial Accounting Standards (SFAS) 142, effectively discontinuing the amortization of goodwill. As of September 30, 2001, unamortized goodwill approximated \$1.1 billion. Such goodwill is no longer subject to amortization but instead is now subject to impairment testing on at least an annual basis, as discussed in Note I, "New Accounting Standards," of the Notes to Condensed Consolidated Financial Statements.

Interest and Other Expense, Net

Interest and other expense, net was \$22.2 million for the second quarter of fiscal 2002 compared to \$22.4 million for the corresponding quarter of fiscal 2001. Interest and other expense, net was \$44.6 million in the first six months of fiscal 2002 compared to \$18.2 million for the corresponding period of fiscal 2001. The increase in interest and other expense, net in the first six months of fiscal 2002 was mainly due to lower gains recorded on the sale of marketable securities as compared to the \$22.4 million gain on sale of marketable securities we recorded in the first quarter of fiscal 2001.

Provision for Income Taxes

Our consolidated effective tax rate was a benefit of 24.8% and 29.1% for the second quarter and first six months of fiscal 2002, respectively, compared to a 14.5% provision and a benefit of 2.3% for the comparable periods of fiscal 2001. Excluding the unusual charges, the effective income tax rate was 10.0% in the second quarter and first six months of fiscal 2002. The consolidated effective tax rate for a particular period varies depending on the amount of earnings from different jurisdictions, operating loss carryforwards, income tax credits and changes in previously established valuation allowances for deferred tax assets based upon management's current analysis of the realizability of these deferred tax assets. See "Certain Factors Affecting Operating Results - We are Subject to the Risk of Increased Taxes".

Liquidity and Capital Resources

As of September 30, 2001, we had cash and cash equivalents totaling \$400.3 million, total bank and other debts totaling \$1.3 billion and had \$382.0 million

available for future borrowing under our credit facility subject to compliance with certain financial covenants.

Cash provided by operating activities was \$435.5 million and cash used in operating activities was \$279.8 million for the first six months of fiscal 2002 and fiscal 2001, respectively. Cash provided by operating activities in the first six months of fiscal 2002 was primarily due to significant reductions of inventory and increases in accounts payable. Cash used in operations for the first six months of fiscal 2001 was the result of significant increases in

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

inventory and accounts receivable, partially offset by an increase in accounts payable.

Accounts receivable, net of allowance for doubtful accounts was \$1.7 billion at September 30, 2001 and March 31, 2001, remaining relatively unchanged primarily because net sales was relatively unchanged as a result of the recent economic slowdown.

Inventories decreased 21% to \$1.4 billion at September 30, 2001 from \$1.8 billion at March 31, 2001. The decrease in inventories was primarily the result of the focused effort by the Company to reduce inventories that were built up for customers in March, in their anticipation of stronger demand which did not materialize.

Cash used in investing activities was \$665.0 million and \$614.5 million for the first six months of fiscal 2002 and fiscal 2001, respectively. Cash used in investing activities for the first six months of fiscal 2002 was primarily related to (i) net capital expenditures of \$232.6 million to purchase equipment and for continued expansion of manufacturing facilities, (ii) payment of \$385.6 million for purchases of manufacturing facilities and related assets from OEMs and (iii) payment of \$48.8 million for acquisitions of businesses and offset by \$11.0 million for sale of minority investments in the stocks of various technology companies. Cash used in investing activities for the first six months of fiscal 2001 consisted primarily of (i) net capital expenditures of \$406.3 million to purchase equipment and for continued expansion of manufacturing facilities, (ii) payment of \$163.5 million for purchases of manufacturing facilities and related assets from OEMs and (iii) payment of \$65.5 million for acquisitions of businesses and offset by proceeds of \$37.6 million for sale of minority equity investments of various technology companies.

Net cash used in financing activities was \$2.3 million for the first six months of fiscal 2002 and net cash provided by financing activities was \$763.4 million for the first six months of fiscal 2001. Cash used in financing activities for the first six months of fiscal 2002 primarily resulted from the payment of \$112.0 million for the repurchase of the equity instrument from Motorola, \$505.5 million of short-term credit facility and long-term debt repayments, offset by \$611.7 million of proceeds from long-term debt and bank borrowings. Cash provided by financing activities for the first six months of fiscal 2001 primarily resulted from \$1.1 billion of proceeds from long-term debt and bank borrowings, \$431.6 million of net proceeds from equity offerings, \$100.0 million of proceeds from the issuance of the equity instrument to Motorola, offset by \$883.8 million of short-term credit facility and long-term debt repayments.

We anticipate that our working capital requirements and capital expenditures will continue to increase in order to support the anticipated expansion of our operations. We also anticipate incurring significant capital expenditures and operating lease commitments in order to support our anticipated expansions of our industrial parks in China, Hungary, Mexico, Brazil and Poland. We intend to continue our acquisition strategy and it is possible that future acquisitions may be significant and may require the payment of cash. For example, we recently announced plans to acquire certain manufacturing facilities and related assets of Xerox Corporation, currently estimated to be approximately \$220.0 million. Future liquidity needs will also depend on fluctuations in levels of inventory, the timing of expenditures by us on new equipment, the extent to which we utilize operating leases for the new facilities and equipment, levels of shipments and changes in volumes of customer orders.

Historically, we have funded our operations from the proceeds of public offerings of equity securities and debt, cash and cash equivalents generated from operations, bank debt, sales of accounts receivable and capital equipment

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

lease financings. We believe that our existing cash balances, together with anticipated cash flows from operations, borrowings available under our credit facility and the net proceeds from our recent equity offerings will be sufficient to fund our operations through at least the next twelve months. We anticipate that we will continue to enter into debt and equity financings, sales of accounts receivable and lease transactions to fund our acquisitions and anticipated growth. Such financings and other transactions may not be available

on terms acceptable to us or at all. See "Certain Factors Affecting Operating Results - If We Do Not Manage Effectively the Expansion of Our Operations, Our Business May be Harmed".

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

There were no material changes during the three and six months ended September 30, 2001 to our exposure to market risk for changes in interest rates and foreign currency exchange rates.

CERTAIN FACTORS AFFECTING OPERATING RESULTS

IF WE DO NOT MANAGE EFFECTIVELY CHANGES IN OUR OPERATIONS, OUR BUSINESS MAY BE HARMED.

We have grown rapidly in recent periods. Our workforce has more than doubled in size over the last year as a result of internal growth and acquisitions. This growth is likely to strain considerably our management control systems and resources, including decision support, accounting management, information systems and facilities. If we do not continue to improve our financial and management controls, reporting systems and procedures to manage our employees effectively and to expand our facilities, our business could be harmed.

We plan to increase our manufacturing capacity in low-cost regions by expanding our facilities and adding new equipment. This expansion involves significant risks, including, but not limited to, the following:

- we may not be able to attract and retain the management personnel and skilled employees necessary to support expanded operations;
- we may not efficiently and effectively integrate new operations and information systems, expand our existing operations and manage geographically dispersed operations;
- we may incur cost overruns;
- we may encounter construction delays, equipment delays or shortages, labor shortages and disputes and production start-up problems that could harm our growth and our ability to meet customers' delivery schedules; and
- we may not be able to obtain funds for this expansion, and we may not be able to obtain loans or operating leases with attractive terms.

In addition, we expect to incur new fixed operating expenses associated with our expansion efforts that will increase our cost of sales, including substantial increases in depreciation expense and rental expense. If our revenues do not increase sufficiently to offset these expenses, our operating

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

results would be seriously harmed. Our expansion, both through internal growth and acquisitions, has contributed to our incurring significant unusual charges. As a result of acquisitions and rapid changes in our markets, we recorded unusual charges for merger related costs and related facility closure costs of approximately \$534.3 million, net of tax, for the fiscal year ended March 31, 2001 and approximately \$399.0 million, net of tax, for the second quarter ended September 30, 2001.

WE DEPEND ON THE HANDHELD ELECTRONICS DEVICES, INFORMATION TECHNOLOGIES INFRASTRUCTURE, COMMUNICATIONS INFRASTRUCTURE AND COMPUTER AND OFFICE AUTOMATION INDUSTRIES WHICH CONTINUALLY PRODUCE TECHNOLOGICALLY ADVANCED PRODUCTS WITH SHORT LIFE CYCLES; OUR INABILITY TO CONTINUALLY MANUFACTURE SUCH PRODUCTS ON A COST-EFFECTIVE BASIS COULD HARM OUR BUSINESS.

We depend on sales to customers in the handheld devices, information technologies infrastructure, communications infrastructure and computer and office automation industries. For the first six months of fiscal 2002, we derived approximately 31% of our revenues from customers in the handheld devices industry, which includes cell phones, pagers and personal digital assistants; approximately 22% of our revenues from providers of information technologies infrastructure, which includes servers, workstations, storage systems, mainframes, hubs and routers ; approximately 20% of our revenues from providers of communications infrastructure, which includes equipment for optical networks, cellular base stations, radio frequency devices, telephone exchange and access switches and broadband devices; approximately 10% of our revenue from customers in the computers and office automation industry, which includes copiers, scanners,

graphic cards, desktop and notebook computers and peripheral devices such as printers and projectors; and approximately 5% of our revenues from the consumer devices industry, including set-top boxes, home entertainment equipment, cameras and home appliances. The remaining 12% of our revenue was derived from customers in a variety of other industries, including the medical, automotive, industrial and instrumentation industries. Factors affecting these industries in general could seriously harm our customers and, as a result, us. These factors include:

- o Rapid changes in technology, which result in short product life cycles;
- o the inability of our customers to successfully market their products, and the failure of these products to gain widespread commercial acceptance; and
- o recessionary periods in our customers' markets.

OUR CUSTOMERS MAY CANCEL THEIR ORDERS, CHANGE PRODUCTION QUANTITIES OR DELAY PRODUCTION.

EMS providers must provide increasingly rapid product turnaround for their customers. We generally do not obtain firm, long-term purchase commitments from our customers and we continue to experience reduced lead-times in customer orders. Customers may cancel their orders, change production quantities or delay production for a number of reasons. Many of our customers' industries are experiencing a significant decrease in demand for their products and services. The generally uncertain economic condition of several of the industries of our customers has resulted, and may continue to result, in some of our customers delaying the delivery of some of the products we manufacture for them, and placing purchase orders for lower volumes of products than previously anticipated. Cancellations, reductions or delays by a significant customer or by a group of customers would seriously harm our results of operations by reducing

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

the volumes of products manufactured by us for the customers and delivered in that period, as well as causing a delay in the repayment of our expenditures for inventory in preparation for customer orders and lower asset utilization resulting in lower gross margins.

In addition, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, component procurement commitments, personnel needs and other resource requirements, based on our estimates of customer requirements. The short-term nature of our customers' commitments and the possibility of rapid changes in demand for their products reduce our ability to estimate accurately future customer requirements. This makes it difficult to schedule production and maximize utilization of our manufacturing capacity. We often increase staffing, increase capacity and incur other expenses to meet the anticipated demand of our customers, which may cause reductions in our gross margins if customer orders are delayed or cancelled. Anticipated orders may not materialize, and delivery schedules may be deferred as a result of changes in demand for our customers' products. On occasion, customers may require rapid increases in production, which can stress our resources and reduce margins. Although we have increased our manufacturing capacity, and plan further increases, we may not have sufficient capacity at any given time to meet our customers' demands. In addition, because many of our costs and operating expenses are relatively fixed, a reduction in customer demand could harm our gross profit and operating income.

OUR OPERATING RESULTS VARY SIGNIFICANTLY.

We experience significant fluctuations in our results of operations. Some of the principal factors that contribute to these fluctuations are:

- o changes in demand for our services;
- o our effectiveness in managing manufacturing processes and costs in order to decrease manufacturing expenses;
- o the mix of the types of manufacturing services we provide, as high-volume and low-complexity manufacturing services typically have lower gross margins than more complex and lower volume services;
- o changes in the cost and availability of labor and components, which often occur in the electronics manufacturing industry and which affect our margins and our ability to meet delivery schedules;

- o the degree to which we are able to utilize our available manufacturing capacity;
- o our ability to manage the timing of our component purchases so that components are available when needed for production, while avoiding the risks of purchasing inventory in excess of immediate production needs; and
- o local conditions and events that may affect our production volumes, such as labor conditions, political instability and local holidays.

One of our significant end-markets is the consumer electronics market.

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

This market exhibits particular strength toward the end of the calendar year in connection with the holiday season. As a result, we have historically experienced stronger revenues in our third fiscal quarter as compared to our other fiscal quarters.

We are reconfiguring certain of our operations to further increase our concentration in low-cost locations. This shift of operations resulted in a restructuring charge of \$275.6 million, net of tax, in the fourth quarter of fiscal 2001 and \$399.0 million, net of tax, in the second quarter of fiscal 2002. At the end of the second quarter of fiscal 2002, \$276.7 million of these closure costs remained to be paid.

In addition, many of our customers are currently experiencing increased volatility in demand, and in many cases reduced demand, for their products. This increases the difficulty of anticipating the levels and timing of future revenues from these customers, and could lead them to defer delivery schedules for products or reduce their volumes of purchases. This would lead to a delay or reduction in our revenues from these customers. Any of these factors or a combination of these factors could seriously harm our business and result in fluctuations in our results of operations.

WE MAY ENCOUNTER DIFFICULTIES WITH ACQUISITIONS, WHICH COULD HARM OUR BUSINESS.

Since the beginning of fiscal 2001, we have completed over 20 acquisitions of businesses and manufacturing facilities, and we expect to continue to acquire additional businesses and facilities in the future. Any future acquisitions may require additional debt or equity financing, or the issuance of shares in the transaction. This could increase our leverage or be dilutive to our existing shareholders. We may not be able to identify and complete acquisitions in the future to the same extent as the past, or at all.

To integrate acquired businesses, we must implement our management information systems and operating systems and assimilate and manage the personnel of the acquired operations. The difficulties of this integration may be further complicated by geographic distances. The integration of acquired businesses may not be successful and could result in disruption to other parts of our business.

In addition, acquisitions involve a number of other risks and challenges, including:

- o diversion of management's attention;
- o potential loss of key employees and customers of the acquired companies;
- o lack of experience operating in the geographic market or industry sector of the acquired business;
- o an increase in our expenses and working capital requirements, which reduces our return on invested capital; and
- o exposure to unanticipated contingent liabilities of acquired companies.

Any of these and other factors could harm our ability to achieve anticipated levels of profitability at acquired operations or realize other anticipated benefits of an acquisition.

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

OUR STRATEGIC RELATIONSHIPS WITH ERICSSON AND OTHER MAJOR CUSTOMERS CREATE RISKS.

In April 2001, we entered into a definitive agreement with Ericsson with respect to our management of its mobile telephone operations. Our ability to achieve any of the anticipated benefits of this relationship is subject to a

number of risks, including our ability to meet Ericsson's volume, product quality, timeliness and price requirements, and to achieve anticipated cost reductions. If demand for Ericsson's mobile phone products declines, Ericsson may purchase a lower quantity of products from us than we anticipate. If Ericsson's requirements exceed the volume anticipated by us, we may not be able to meet these requirements on a timely basis. Our inability to meet Ericsson's volume, quality, timeliness and cost requirements, and to quickly resolve any issues with Ericsson, could seriously harm our results of operations. As a result of these and other risks, we may be unable to achieve anticipated levels of profitability under this arrangement, and it may not result in any material revenues or contribute positively to our net income per share. Due to our relationship with Ericsson, other OEMs may not wish to obtain logistics or operations management services from us.

We have entered into strategic relationships with other customers, and plan to continue to pursue such relationships. These relationships generally involve many, or all, of the risks involved in our new relationship with Ericsson. Similar to our other customer relationships, there are no volume purchase commitments under these relationships, and the revenues we actually achieve may not meet our expectations. In anticipation of future activities under these strategic relationships, we are incurring substantial expenses as we add personnel and manufacturing capacity and procure materials. Our operating results will be seriously harmed if sales do not develop to the extent and within the time frame we anticipate.

WE DEPEND ON THE CONTINUING TREND OF OUTSOURCING BY OEMS.

Future growth in our revenue depends on new outsourcing opportunities in which we assume additional manufacturing and supply chain management responsibilities from OEMs. To the extent that these opportunities are not available, either because OEMs decide to perform these functions internally or because they use other providers of these services, our future growth would be limited.

OUR ACQUISITION OF DIVESTED ASSETS AND FACILITIES FROM OEMS CAN RESULT IN UNFAVORABLE PRICING TERMS AND DIFFICULTIES IN INTEGRATING THE ACQUIRED ASSETS, WHICH MAY HARM OUR RESULTS OF OPERATIONS.

In the past, we have entered into arrangements to acquire manufacturing assets and facilities from OEMs, and then to use the assets and facilities to provide electronics manufacturing services to the OEM. For example, we recently agreed to acquire facilities in Canada, Brazil, Mexico and Malaysia from Xerox, and will be using these facilities to manufacture office copiers for Xerox. We intend to continue to pursue these transactions in the future. There is frequently competition among EMS companies for these transactions, and this competition may increase. These OEM divestiture transactions have contributed to a significant portion of our revenue growth, and if we fail to complete similar transactions in the future, our revenue growth could be harmed. As part of these arrangements, we typically enter into manufacturing services agreements with these OEMs. These agreements generally do not require any minimum volumes of

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

purchases by the OEM, and the actual volume of purchases may be less than anticipated. The arrangements entered into with divesting OEMs typically involve many risks, including the following:

- o to acquire the facility, we may need to pay a purchase price to the divesting OEMs that exceeds the value we may realize from the future business of the OEM;
- o the integration into our business of the acquired assets and facilities may be time-consuming and costly;
- o we, rather than the divesting OEM, bear the risk of excess capacity at the acquired facility;
- o we may not achieve anticipated cost reductions and efficiencies at the acquired facility;
- o if the OEM's requirements exceed the volume anticipated by us, we may be unable to meet the expectations of the OEM as to product quality, timeliness and cost reductions; and
- o if the volume of purchases by the OEM are less than anticipated, we may not be able to sufficiently reduce the expenses of operating the facility or use the facility to provide services to other OEMs, and as a result the transaction may adversely affect our gross margins and profitability.

If we do not successfully manage and integrate the acquired assets and achieve anticipated cost reductions, our revenues and gross margins may decline and our results of operations would be harmed.

THE MAJORITY OF OUR SALES COMES FROM A SMALL NUMBER OF CUSTOMERS; IF WE LOSE ANY OF THESE CUSTOMERS, OUR SALES COULD DECLINE SIGNIFICANTLY.

Sales to our ten largest customers have represented a significant percentage of our net sales in recent periods. Our ten largest customers in the first six months of fiscal 2002 and 2001 accounted for approximately 64% and 58%, respectively, with Ericsson accounting for approximately 26% in the first six months of fiscal 2002. No other customer accounted for more than 10% of net sales. No customer accounted for more than 10% of net sales in the corresponding period of fiscal 2001.

The identity of our principal customers have varied from year to year, and our principal customers may not continue to purchase services from us at current levels, if at all. Significant reductions in sales to any of these customers, or the loss of major customers, would seriously harm our business. If we are not able to timely replace expired, canceled or reduced contracts with new business, our revenues could be harmed.

OUR INDUSTRY IS EXTREMELY COMPETITIVE.

The EMS industry is extremely competitive and includes hundreds of companies, several of which have achieved substantial market share. Current and prospective customers also evaluate our capabilities against the merits of internal production. Some of our competitors have substantially greater market share and manufacturing, financial and marketing resources than us.

In recent years, many participants in the industry, including us, have substantially expanded their manufacturing capacity. If overall demand for

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

electronics manufacturing services should decrease, this increased capacity could result in substantial pricing pressures, which could seriously harm our operating results.

WE MAY BE ADVERSELY AFFECTED BY SHORTAGES OF REQUIRED ELECTRONIC COMPONENTS.

At various times, there have been shortages of some of the electronic components that we use, and suppliers of some components have lacked sufficient capacity to meet the demand for these components. In some cases, supply shortages and delays in deliveries of particular components have resulted in curtailed production, or delays in production, of assemblies using that component, which has contributed to an increase in our inventory levels. If we are unable to obtain sufficient components on a timely basis, we may experience manufacturing and shipping delays, which could harm our relationships with current or prospective customers and reduce our sales.

OUR CUSTOMERS MAY BE ADVERSELY AFFECTED BY RAPID TECHNOLOGICAL CHANGE.

Our customers compete in markets that are characterized by rapidly changing technology, evolving industry standards and continuous improvement in products and services. These conditions frequently result in short product life cycles. Our success will depend largely on the success achieved by our customers in developing and marketing their products. If technologies or standards supported by our customers' products become obsolete or fail to gain widespread commercial acceptance, our business could be adversely affected.

WE ARE SUBJECT TO THE RISK OF INCREASED INCOME TAXES.

We have structured our operations in a manner designed to maximize income in countries where:

- o tax incentives have been extended to encourage foreign investment; or
- o income tax rates are low.

We base our tax position upon the anticipated nature and conduct of our business and upon our understanding of the tax laws of the various countries in which we have assets or conduct activities. However, our tax position is subject to review and possible challenge by taxing authorities and to possible changes in law, which may have retroactive effect. We cannot determine in advance the extent to which some jurisdictions may require us to pay taxes or make payments in lieu of taxes.

Several countries in which we are located allow for tax holidays or provide other tax incentives to attract and retain business. We have obtained tax holidays or other incentives where available, primarily in China, Malaysia and Hungary. In these three countries, we generated an aggregate of approximately \$2.6 billion of our total revenues for the fiscal year ended March 31, 2001. Our taxes could increase if certain tax holidays or incentives are not renewed upon expiration, or tax rates applicable to us in such jurisdictions are otherwise increased. In addition, further acquisitions of businesses may cause our effective tax rate to increase.

WE CONDUCT OPERATIONS IN A NUMBER OF COUNTRIES AND ARE SUBJECT TO RISKS OF INTERNATIONAL OPERATIONS.

The geographical distances between the Americas, Asia and Europe create a number of logistical and communications challenges. These challenges include managing operations across multiple time zones, directing the manufacture and

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

delivery of products across distances, coordinating procurement of components and raw materials and their delivery to multiple locations, and coordinating the activities and decisions of the core management team, which is based in a number of different countries. Facilities in several different locations may be involved at different stages of the production of a single product, leading to additional logistical difficulties.

Because our manufacturing operations are located in a number of countries throughout East Asia, the Americas and Europe, we are subject to the risks of changes in economic and political conditions in those countries, including:

- o fluctuations in the value of local currencies;
- o labor unrest and difficulties in staffing;
- o longer payment cycles resulting from differences in local customer;
- o increases in duties and taxation levied on our products;
- o imposition of restrictions on currency conversion or the transfer of funds;
- o limitations on imports or exports of components or assembled products, or other travel restrictions;
- o expropriation of private enterprises; and
- o a potential reversal of current favorable policies encouraging foreign investment or foreign trade by our host countries.

The attractiveness of our services to our U.S. customers can be affected by changes in U.S. trade policies, such as "most favored nation" status and trade preferences for some Asian nations. In addition, some countries in which we operate, such as Brazil, the Czech Republic, Hungary, Mexico, Malaysia and Poland, have experienced periods of slow or negative growth, high inflation, significant currency devaluations or limited availability of foreign exchange. Furthermore, in countries such as China and Mexico, governmental authorities exercise significant influence over many aspects of the economy, and their actions could have a significant effect on us. Finally, we could be seriously harmed by inadequate infrastructure, including lack of adequate power and water supplies, transportation, raw materials and parts in countries in which we operate.

RECENT TERRORIST ACTIONS MAY AFFECT OUR ABILITY TO CORRECTLY TIME SHIPMENTS INTO AND OUT OF THE UNITED STATES.

Our ability to effectively manage our supply chain and deliver products on a timely basis to our customers may be adversely affected by the reduced flight schedules of many commercial airlines and delivery services, and increased security precautions instituted in response to the terrorist actions in New York City and Washington, D.C., on September 11, 2001. The changes in flight schedules and additional security measures may negatively affect our ability to accurately predict the delivery times of components and completed systems. For example, delays in delivery of a particular component could result in delays in production of assemblies using that component, and to delays in shipping those assemblies to customers who may require timely delivery into their distribution channels. Our inability to accurately predict these delivery times could negatively affect our relationships with those customers and seriously harm our business.

WE DEPEND ON OUR EXECUTIVE OFFICERS.

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

Our success depends to a large extent upon the continued services of our executive officers. Generally our employees are not bound by employment or non-competition agreements, and we cannot assure that we will retain our executive officers and other key employees. We could be seriously harmed by the loss of any our executive officers. In addition, in order to manage our growth, we will need to recruit and retain additional skilled management personnel and if we are not able to do so, our business and our ability to continue to grow could be harmed.

WE ARE SUBJECT TO ENVIRONMENTAL COMPLIANCE RISKS.

We are subject to various federal, state, local and foreign environmental laws and regulations, including those governing the use, storage, discharge and disposal of hazardous substances in the ordinary course of our manufacturing process. In addition, we are responsible for cleanup of contamination at some of our current and former manufacturing facilities and at some third party sites. If more stringent compliance or cleanup standards under environmental laws or regulations are imposed, or the results of future testing and analyses at our current or former operating facilities indicate that we are responsible for the release of hazardous substances, we may be subject to additional remediation liability. Further, additional environmental matters may arise in the future at sites where no problem is currently known or at sites that we may acquire in the future. Currently unexpected costs that we may incur with respect to environmental matters may result in additional loss contingencies, the quantification of which cannot be determined at this time.

THE MARKET PRICE OF OUR ORDINARY SHARES IS VOLATILE.

The stock market in recent years has experienced significant price and volume fluctuations that have affected the market prices of technology companies. These fluctuations have often been unrelated to or disproportionately impacted by the operating performance of these companies. The market for our ordinary shares may be subject to similar fluctuations. Factors such as fluctuations in our operating results, announcements of technological innovations

PART II - OTHER INFORMATION

ITEM 4. SUBMISSION OF MATTERS TO VOTE OF SECURITY HOLDERS

We held our Annual General Meeting of shareholders on September 21, 2001, at which the following matters were acted upon:

1a)	Re-election of Mr. Chuen Fah Alain Ahkong to the Board of Directors.	For:	407,392,581
		Against:	522,821
1b)	Re-election of Mr. Richard L. Sharp to the Board of Directors.	For:	407,499,389
		Against:	416,013
2)	Re-election of Mr. Goh Thiam Poh Tommie to the Board of Directors.	For:	407,419,439
		Against:	495,963
3)	Adoption of the Audited Accounts for the fiscal year ended March 31, 2001 together with the Reports of the Directors and	For:	407,086,724
		Against:	91,593
		Abstain:	737,085

Edgar Filing: FLEXTRONICS INTERNATIONAL LTD - Form 10-Q/A

Auditors thereon.

4)	Appointment of Arthur Andersen LLP as our independent auditors for the fiscal year ending March 31, 2002.	For: 406,351,752 Against: 936,591 Abstain: 627,059
5)	Approval of adoption of the Company's 2001 Equity Incentive Plan and approval of grant to the Board of Directors of authority to allot and issue or grant options in respect of ordinary shares to such plan.	For: 198,428,197 Against: 110,409,888 Abstain: 831,271 Non-votes: 98,246,046
6)	Approval of grant to the Board of Directors of authority to allot and issue or grant options in respect of ordinary shares.	For: 399,534,641 Against: 6,840,415 Abstain: 1,540,346
7)	Approval of grant to the Board of Directors of authority to allot and issue bonus share issuances.	For: 404,762,802 Against: 2,312,964 Abstain: 839,636

Neither abstentions nor broker non-votes are counted in tabulations of the votes cast on proposals presented to shareholders.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the Registrant has duly caused this Amendment No. 1 to its Report to be signed on its behalf by the undersigned thereunto duly authorized.

FLEXTRONICS INTERNATIONAL LTD.
