FOR IMMEDIATE RELEASE

CRISTALERIAS DE CHILE ANNOUNCES
US\$210 MM INVESTMENT IN NEW GLASS PLANT TO DUPLICATE
GLASS PACKAGING PRODUCTICON

Santiago, Chile (June 23, 2004) -- Cristalerias de Chile S.A., a Chilean conglomerate and the largest producer of glass containers in Chile, today announced the following:

Over the next decade, Cristalerias de Chile will invest US\$210 MM in line with a development plan that will allow the Company to duplicate its glass packaging production capacity --going from 300,000 to 600,000 annual tons- and adequately satisfy its customers' growing demand.

The initiative was approved unanimously by the Company's Board, and contemplates its materialization in successive stages according to market demand.

The first stage considers construction of a new glass plant, equipped with four production lines and a furnace with capacity of 360 tpd, which will increase current production capacity by 35%. This stage implies an approximate US\$110 MM investment, that will be financed with a combination of internal resources and credits. Start-up of operations is scheduled for year 2006.

Following expansion stages imply adding seven production lines and two additional furnaces with production capacities over 400 tpd.

It is worth mentioning that in line with Cristalerias cle Chile's avant-garde technological policy; plant, production lines and furnaces will have the highest sophistication systems regarding production and quality control, that will allow an important productivity increase as well as efficiently satisfy customers' growing requirements.

The development plan is comprised by the Company's will to anticipate customers' growth and which has resulted in permanent expansion of its productive processes. In the 1992-2003 period the Company materialized an ambitious investment plan that implied investments of US\$150 MM, that resulted in increasing capacity from 75,000 to 300,000 annual tons and at the same time having the most modern plant in Latin America.

In addition to Cristalerias' operations in Chile, the Company invested in 1999 together with French multinational Saint Gobain Embalage in Rayen Cura. Located in Mendoza, Rayen Cura is one of the main companies of the Argentine glass packaging industry and in the 1999-2003 period increased its capacity from 40,000 to 145,000 annual tons.
