Form 10-K
March 30, 2011

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2010

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 1-11916

WIRELESS TELECOM GROUP, INC.

(Exact name of registrant as specified in its charter)

New Jersey

(State or other jurisdiction of
incorporation or organization)

22-2582295

(I.R.S. Employer
Identification No.)

25 Eastmans Road,
Parsippany, New Jersey

(Address of principal executive offices)

07054

(Zip Code)

(973) 386-9696

(Registrant's Telephone Number, Including Area Code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class

Name of each exchange
on which registered

Common Stock, par value \$.01 per share

NYSE Amex

Securities registered pursuant to Section 12(g) of the Act:

none

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

(Title of Class)

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes ☐ No ☒

Note Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Exchange Act from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes

☒ No ☐

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes ☐ No ☐

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. x

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (check one):

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☐ Smaller reporting company ☒
Do not check if a smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes ☐ No ☒

The aggregate market value of the registrant's Common Stock, \$.01 par value, held by non-affiliates and computed by reference to the closing price as reported by NYSE Amex on June 30, 2010: \$13,786,227

Number of shares of Wireless Telecom Group, Inc. Common Stock, \$.01 par value, outstanding as of March 28, 2011: 24,965,286

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's Proxy Statement for the 2011 Annual Meeting of Stockholders are incorporated by reference into Part III of this Annual Report on Form 10-K. Such Proxy Statement will be filed within 120 days of the end of the fiscal year covered by this Annual report on Form 10-K.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

PART I

Item 1. Business

Wireless Telecom Group, Inc., a New Jersey corporation (the "Company"), designs and manufactures radio frequency (RF) and microwave-based products for wireless and advanced communications industries and currently markets its products and services worldwide under the Boonton, Microlab and Noisecom brands. Its complementary suite of high performance instruments and components includes peak power meters, signal analyzers, power splitters, combiners, diplexers, noise modules and precision noise generators. The Company serves both commercial and government markets with workflow-oriented, built-for-purpose solutions in cellular/mobile, WiFi, WiMAX, private mobile radio, satellite, cable, radar, avionics, medical, and computing applications. The consolidated financial statements include the accounts of Wireless Telecom Group, Inc. and its wholly-owned subsidiaries Boonton Electronics Corporation, Microlab/FXR, Willtek Communications GmbH (through May 7, 2010), WTG Foreign Sales Corporation and NC Mahwah, Inc. The corporate website address is www.wtcom.com.

As has been disclosed by the Company in its filings in prior periods, in light of on-going market challenges facing the Company's foreign subsidiary, Willtek Communications GmbH ("Willtek"), including significant technology research and development expenses required to remain competitive, management has been evaluating several strategic alternatives and opportunities.

In November 2009, the Company's board of directors made a decision to conclude efforts to seek strategic alternatives regarding Willtek so that the Company could focus on growing its domestic based businesses. The board of directors authorized management to begin negotiations with interested parties to sell substantially all of the assets of Willtek or cease incurring costs related to its development. On April 9, 2010, the Company entered into an asset purchase agreement to sell substantially all the operating assets and certain liabilities of Willtek to certain subsidiaries of Aeroflex Incorporated. On May 7, 2010, the Company successfully completed this sale.

As a result of the aforementioned sale of Willtek, the Company's consolidated balance sheet at December 31, 2009 presents the accounts of Willtek as assets and liabilities held for sale. Willtek's operating activities through the May 7, 2010 sale date and for all of fiscal year 2009 are included in the Company's consolidated statement of operations as discontinued operations. As a result, the succeeding information, including management's discussion and analysis, pertains primarily to the Company's continuing operations.

Market

Since the Company's incorporation in the State of New Jersey in 1985, it has been primarily engaged in supplying noise source products and electronic testing and measurement instruments and passive components to various customers. Approximately 74% of the Company's sales in fiscal 2010 were derived from commercial applications. The remaining sales (approximately 26%) were comprised of sales made to the United States Government (particularly the armed forces) and prime defense contractors.

Products

Noise components and instruments (noise source products) are primarily used as a method of testing to determine if sophisticated communications systems are capable of receiving the information being transmitted. A typical application for the Company's noise source products are as a reference standard in test instruments which measure unwanted noise and interference in devices and components utilized in a variety of communications equipment.

This is accomplished by comparing a noise source with known characteristics to the unwanted noise found in the communications system being tested. By generating a random noise signal, in combination with a live transmission signal, a noise generator simulates real world signals and allows the manufacturer to determine if its product is performing to specifications. Noise source testing is often more cost-efficient, faster and more accurate than alternative conventional methods using signal generators.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

Coupled with other electronic devices, noise generators are also an effective means of jamming, blocking and disturbing enemy radar and other communications, as well as insulating and protecting friendly communications. In the jamming mode, the Company's noise source products block out or disrupt unwanted radar and radio transmissions generally without being detected.

The Company's noise source products are used in radar systems as part of built-in test equipment to continuously monitor the radar receiver and in satellite communications where the use of back-up receivers are becoming more common as the demand for communication availability and reliability is increasing. Testing by the Company's noise source products assures that the back-up receiver is always functional and ready should the communication using the first receiver fail. The Company's noise source products can test satellite communication receivers for video, telephone and data communications.

The Company also offers a line of broadband test equipment serving the Cable Television and Cable Modem industries. Test instruments from the broadband product line are measurement solutions for CATV equipment, Data-Over-Cable (DOCSIS) and Digital TV.

The Company's noise source products range from relatively simple items with no control mechanisms or auxiliary components to complex, automated components containing computerized or microprocessor based controls.

The Company, through its Boonton subsidiary, designs and produces electronic testing and measuring instruments including power meters, passive intermodulation test equipment for cellular transmission signals, voltmeters, capacitance meters, audio and modulation meters and accessory products. These products measure the power of RF and microwave systems used by the military and commercial sectors. Further, the Company's products are also used to test terrestrial and satellite communications, radar, telemetry and personal communication products. Recent models are microprocessor controlled and are often used in computerized automatic testing systems. Certain power meter products are designed for measuring signals based on wideband modulation formats, allowing a variety of measurements to be made, including maximum power, peak power, average power and minimum power.

The Company, through its Microlab/FXR subsidiary, designs and manufactures high-power, passive microwave components for the wireless infrastructure market and for other commercial, aerospace and military markets. The Company's products are used in microwave systems, UMTS, PCS and cellular communications base stations, television transmitters, avionic systems and medical electronics. These types of products serve the needs of the in-building distributed antenna systems market, which facilitates seamless wireless coverage throughout the interiors of buildings and building complexes.

The Company's products consist of several models with varying degrees of capabilities which can be customized to meet particular customer requirements. They may be incorporated directly into the electronic equipment concerned or may be stand alone components or devices that are connected to, or used in conjunction with, such equipment operating from an external site, in the factory or in the field. Prices of products range from approximately \$100 to \$100,000 per unit, with most sales occurring between \$2,000 and \$35,000 per unit.

The Company's products have extended useful lives and the Company provides recalibration services for its instrument products to ensure their accuracy, for a fee, to its domestic and international customers, and also calibrates test equipment manufactured by others. Such services accounted for approximately 6% of fiscal 2010 sales.

Marketing and Sales

As of March 28, 2011, the Company's in-house marketing and sales force consisted of twenty individuals. The Company promotes the sale of its products to customers and manufacturers' representatives through its web-site, product literature, publication of articles, presentations at technical conferences, direct mailings, trade advertisements and trade show exhibitions.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

The Company's products are sold globally through its in-house sales people and by over one hundred manufacturers' representatives and distributors (the Company's channel partners). Generally, our channel partners do not stock inventories of the Company's products. Channel partners accounted for 82% and 83% of the Company's sales for the years ended December 31, 2010 and 2009, respectively. For the year ended December 31, 2010 and 2009, no one channel partner accounted for more than 10% of total sales. The Company does not believe that the loss of any single channel partner would have a material adverse affect on its business.

The Company's relationship with its channel partners is usually governed by written contracts that either run for one-year renewable periods terminable by either party on 60 days prior notice or have indefinite lives terminable by either party on 60 days prior notice. The contracts generally provide for territorial and product representation. The Company continually reviews and assesses the performance of its channel partners and makes changes from time to time based on such assessments.

The Company believes that educating its existing and potential customers as to the advantages and applications of its products is a vital factor in its continued success as is its commitment to rapid product introductions and timely revisions to existing products. Management believes that its products offer state-of-the-art performance combined with outstanding customer and technical support. The Company has always placed great emphasis on designing its products to be user-friendly.

Customers

The Company currently sells the majority of its products to various commercial users in the communications industry. Other sales are made to large defense contractors, which incorporate the Company's products into their products for sale to the U.S. and foreign governments, multi-national concerns and Fortune 500 companies. In fiscal 2010, approximately 74% of sales were derived from commercial applications. The remaining sales were comprised of United States government and military applications.

For fiscal 2010, no one customer accounted for more than 10% of total sales. The Company's largest customers vary from year to year. Accordingly, while the complete loss of any large customer or substantial reduction of sales to such customers could have a material adverse affect on the Company, the Company has experienced shifts in sales patterns with such large companies in the past without any material adverse affect. There can be no assurance, however, that the Company will not experience future shifts in sales patterns not having a material adverse affect on its business.

Regional sales from continuing operations for fiscal 2010 were made to customers in the Americas (\$17,027,598 or 69% of total sales), Europe, Middle East and Africa or EMEA (\$4,932,729 or 20% of total sales) and Asia Pacific or APAC (\$2,603,899 or 11% of total sales).

Research and Development

The Company currently maintains an engineering staff (seventeen individuals as of March 28, 2011) whose duties include the improvement of existing products, modification of products to meet customer needs and the engineering, research and development of new products and applications. Expenses for research and development involve engineering for improvements and development of new products for commercial markets. Such expenditures for continuing operations include the cost of engineering services and engineering support personnel and were approximately \$2,175,000 and \$2,066,000 for the years ended December 31, 2010 and 2009, respectively.

Competition

The Company competes against many companies, which utilize similar technology to that of the Company, some of which are larger and have substantially greater resources and expertise in financial, technical and marketing areas than the Company. Some of these companies are Agilent Technologies, Rhode and Schwarz, Anritsu, Kathrein, Aeroflex and Micronetics. The Company competes by having a niche in several product areas where it capitalizes on its expertise in manufacturing products with unique specifications.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

The Company designs its products with special attention to making them user-friendly, and constantly re-evaluates its products for the purpose of enhancing and improving them. The Company believes that these efforts, along with its willingness to adapt its products to the particular needs of its customers and its intensive efforts in customer and technical support are factors that add to the competitiveness of its products.

Backlog

The Company's backlog of firm orders shippable in the next twelve months was approximately \$2,400,000 at December 31, 2010, compared to approximately \$2,500,000 at December 31, 2009. It is anticipated that the majority of the backlog orders will be filled during the current year. The stated backlog is not necessarily indicative of Company sales for any future period nor is a backlog any assurance that the Company will realize a profit from the orders.

Inventory, Supplies and Manufacturing

The Company purchases components, devices and subassemblies from a wide variety of sources. The Company's inventory policy stresses maintaining substantial raw materials in order to lessen its dependency on third party suppliers and to improve its capacity to facilitate production. However, shortages or delays of supplies may, in the future, have a material adverse impact on the Company's operations. No third-party supplier accounted for more than 10% of the Company's total inventory purchases for fiscal 2010.

The Company is not party to any formal written contract regarding the deliveries of its supplies and components. It generally purchases such items pursuant to written purchase orders of both the individual and blanket variety. Blanket purchase orders usually cover the purchase of a larger amount of items at fixed prices for delivery and payment on specific dates.

The Company primarily produces its products by final and some intermediate assembly, calibration and testing. Testing of products is generally accomplished at the end of the manufacturing process and is performed in-house as are all quality control processes. The Company utilizes modern equipment for the design, engineering, manufacture, assembly and testing of its products.

Warranty and Service

The Company typically provides one-year warranties on its instrument products covering both parts and labor. The Company, at its option, repairs or replaces products that are defective during the warranty period if the proper preventive maintenance procedures have been followed by its customers. Repairs that are necessitated by misuse of such products or are required outside the warranty period are not covered by the Company's warranty.

In cases of defective products, the customer typically returns them to a Company facility. The Company's service personnel replace or repair the defective items and ship them back to the customer. Generally, all servicing is done at the Company's plants, and the Company charges its customers a fee for those service items that are not covered by warranty. The Company's Noisecom and Microlab/FXR divisions typically don't offer their customers any formal written service contracts. However, the Company's Boonton division does offer its customers' formal written service contracts for a fee.

Historically, warranty expense within the Company has been minimal. In 2009, there was a onetime increase of \$240,000 in warranty costs due to potential rework of a specific product shipped in 2008. This product is no longer being produced at original specifications and this amount represents the maximum potential warranty related to these shipments.

Product Liability Coverage

The testing of electronic communications equipment and the accurate transmission of information entail a risk of product liability by customers and others. Claims may be asserted against the Company by end-users of any of the Company's products.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

The Company maintains product liability insurance coverage and no claims have been asserted for product liability due to a defective or malfunctioning device. However, it is possible that the Company may be subject to such claims in the future and corresponding litigation should one or more of its products fail to perform or meet certain minimum specifications.

Intellectual Property

Proprietary information and know-how are important to the Company's commercial success. The trademark "Boonton" was registered in the United States Patent and Trademark Office. There can be no assurance that others will not either develop independently the same or similar information or obtain and use proprietary information of the Company. Certain key employees have signed confidentiality and non-competition agreements regarding the Company's proprietary information.

The Company believes that its products do not infringe the proprietary rights of third parties. There can be no assurance, however, that third parties will not assert infringement claims in the future.

Environmental Protection

The New Jersey Department of Environmental Protection (the "NJDEP") had conducted an investigation in 1982 concerning disposal at a facility in New Jersey previously leased by the Company's Boonton operations. Involved were certain materials formerly used by Boonton's manufacturing operations at that site and the possible effect of such disposal on the aquifer underlying the property. The disposal practices and the use of the materials in question were discontinued in 1978. The Company has cooperated with the NJDEP investigation and has been diligently pursuing the matter in an attempt to resolve it in accordance with applicable NJDEP operating procedures. The above referenced activities were conducted by Boonton prior to the acquisition of that entity in 2000.

The Company and the NJDEP previously agreed upon a plan to correct ground water contamination at the site, located in the township of Parsippany-Troy Hills, pursuant to which wells have been installed by the Company. The plan contemplates that the wells will be operated and that soil and water samples will be taken and analyzed until such time, which the Company is unable to predict, that contamination levels are satisfactory to the NJDEP. Recently, the Company has hired a new environmental consultant to evaluate the results of the current remediation plan that has been in effect since 1982. The Company is diligently pursuing efforts to satisfy the requirements of the original plan and receive a new determination from the NJDEP.

Expenditures incurred by the Company during the year ended December 31, 2010 in connection with the site amounted to approximately \$50,000. While management anticipates that the expenditures in connection with this site will not be substantial in future years, the Company could be subject to significant future liabilities and may incur significant future expenditures if further contamination from Boonton's testing is identified and the NJDEP requires additional remediation.

Employees

As of March 28, 2011, the Company had 101 full-time employees, including its officers, 52 of whom are engaged in manufacturing and repair services, 10 in administration and financial control, 17 in engineering and research and development, and 20 in marketing and sales.

The Company considers its relationship with its employees to be satisfactory.

The design and manufacture of the Company's products require substantial technical capabilities in many disparate disciplines, from mechanics and computer science to electronics and mathematics. While the Company believes that the capability and experience of its technical employees compares favorably with other similar manufacturers, there can be no assurance that it can retain existing employees or attract and hire the highly capable technical employees it may need in the future on terms deemed favorable to the Company.

Item 1A. Risk Factors

Ongoing recessionary economic conditions have adversely affected and may further adversely affect our business, results of operations, and financial condition.

General recessionary economic conditions have negatively impacted our business in the past and could further impact our business in the future if economic recovery is slow to occur. In addition to the potentially negative impact on our revenues, unstable economic conditions could also have a number of additional effects on our business, including insolvency of key suppliers or manufacturers resulting in product delays, inability of customers to obtain credit to finance purchases of our products, customer insolvencies, increased product returns, increased pricing pressures, restructuring expenses and associated diversion of management's attention, excess inventory and increased difficulty in our accurately forecasting product demand and planning future business activities. If the economy or markets into which we sell our products are slow to recover, our business, financial condition and results of operations could be materially and adversely affected.

We face intense competition, which could result in lower revenues, higher research and development expenditures and adversely affect our results of operations.

We operate in industries characterized by aggressive competition, rapid technological change, evolving technology standards and short product life cycles. Many of our competitors utilize similar technologies to ours and have substantially greater resources and expertise in financial, technical and marketing areas than we have. Our competitors may introduce products that are competitively priced, have increased performance or functionality or incorporate technological advances that we have not yet developed or implemented.

To remain competitive, we must continue to develop, market and sell new and enhanced products at competitive prices, which will require significant research and development expenditures. If we do not develop new and enhanced products or if we are not able to invest adequately in our research and development activities, our business, financial condition and results of operations could be negatively impacted.

Unless we keep pace with changing technologies, we could lose existing customers and fail to win new customers.

Our future success will depend upon our ability to develop and introduce a variety of new products and services and enhancements to these new products and services in order to address the changing needs of the marketplace. We may not be able to accurately predict which technologies customers will support. If we do not introduce new products, services and enhancements in a timely manner, if we fail to choose correctly among technical alternatives or if we fail to offer innovative products and services at competitive prices, customers may forego purchases of our products and services and purchase those of our competitors.

If our products do not perform as promised, we could experience increased costs, lower margins and harm to our reputation.

The failure of our products to perform as promised could result in increased costs, lower margins and harm to our reputation. This could result in contract terminations and have a material adverse effect on our business and financial results.

The testing of electronic communications equipment and the accurate transmission of information entail a risk of product liability by customers and third parties.

Claims may be asserted against us by end-users of any of our products for liability due to a defective or malfunctioning device made by us, and we may be subject to corresponding litigation should one or more of our products fail to perform or meet certain minimum requirements. Such a claim and corresponding litigation could result in substantial costs, diversion of resources and management attention, termination of customer contracts and harm to our reputation.

If we fail to adequately manage our resources, it could have a severe negative impact on our financial results or stock price.

We could be subject to fluctuations in technology spending by existing and potential customers. Accordingly, we will have to actively manage expenses in a rapidly changing economic environment. This could require reducing costs during economic downturns and selectively growing in periods of economic expansion. If we do not properly manage our resources in response to these conditions, our results of operations could be negatively impacted.

Our customers and we are subject to various governmental regulations, compliance with which may cause us to incur significant expenses, and if we fail to maintain satisfactory compliance with certain regulations, we may be forced to recall products and cease their distribution, and we could be subject to civil or criminal penalties.

Our businesses are subject to various significant international, federal, state and local regulations, including but not limited to health and safety, packaging, product content, labor and import/export regulations. These regulations are complex, change frequently and have tended to become more stringent over time. We may be required to incur significant expenses to comply with these regulations or to remedy violations of these regulations. Any failure by us to comply with applicable government regulations could also result in cessation of our operations or portions of our operations, product recalls or impositions of fines and restrictions on our ability to carry on or expand our operations.

We are subject to laws and regulations governing government contracts, and failure to address these laws and regulations or comply with government contracts could harm our business by leading to a reduction in revenue associated with these customers.

We have agreements relating to the sale of our products to government entities and, as a result, we are subject to various statutes and regulations that apply to companies doing business with the U.S. government. The laws governing government contracts differ from the laws governing private contracts. For example, many government contracts contain pricing terms and conditions that are not applicable to private contracts. We are also subject to investigation for compliance with the regulations governing government contracts. A failure to comply with these regulations might result in suspension of these contracts, or administrative penalties.

Shortages or delay of supplies of component parts may adversely affect our operating results until alternate sources can be developed.

Our operations are dependent on the ability of suppliers to deliver quality components, devices and subassemblies in time to meet critical manufacturing and distribution schedules. If we experience any constrained supply of any such component parts, such constraints, if persistent, may adversely affect operating results until alternate sourcing can be developed. There may be an increased risk of supplier constraints in periods where we are increasing production volume to meet customer demands. Volatility in the prices of these component parts, an inability to secure enough components at reasonable prices to build new products in a timely manner in the quantities and configurations demanded or, conversely, a temporary oversupply of these parts, could adversely affect our future operating results.

We could be subject to significant costs related to environmental contamination from past operations, and environmental contamination caused by ongoing operations could subject us to substantial liabilities in the future.

The New Jersey Department of Environmental Protection, or the NJDEP, had conducted an investigation in 1982 concerning disposal at a facility in New Jersey previously leased by our Boonton operations. Involved were certain materials formerly used by Boonton's manufacturing operations at that site and the possible effect of such disposal on the aquifer underlying the property. The disposal practices and the use of the materials in question were discontinued in 1978, prior to our acquisition of Boonton Electronics Corporation in 2000. In 1982, the Company and the NJDEP agreed on a plan to correct ground water contamination at the site. The plan consists of the installation of several monitoring wells in order to take periodic soil and water samples until such time, which we are unable to predict, that contamination levels are satisfactory to the NJDEP. While we anticipate that the expenditures in connection with the site will not be substantial in future years, we could be subject to significant

future liabilities and may incur significant future expenditures in connection with the former Boonton site. The determination of the existence and cost of any additional contamination caused by us could involve costly and time-consuming negotiations and litigation. While we are not aware of any material liabilities associated with any potential contamination at this former site, subsurface contamination may exist, and we may be exposed to material liability as a result of the existence of that contamination under various international, federal, state and local laws governing the environment.

The loss of key personnel could adversely affect our ability to remain competitive.

We believe that the continued service of our executive officers will be important to our future growth and competitiveness. However, other than our severance agreement we entered into with Mr. Genova, Chief Executive Officer, we currently do not have any employment agreements with any of our executive senior management. Although we have a severance agreement with Mr. Genova, we cannot assure you that Mr. Genova or any of our other executive officers will remain employed by us. Moreover, the design and manufacture of our products require substantial technical capabilities in many disparate disciplines, from engineering, mechanics and computer science to electronics and mathematics. We believe that the continued employment of key members of our technical and sales staffs will be important to us but, as with our executive officers, we cannot assure you that they will remain employed by us.

Third parties could claim that we are infringing on their intellectual property rights which could result in substantial costs, diversion of significant managerial resources and significant harm to our reputation.

The industries in which our company operates are characterized by the existence of a large number of patents and frequent litigation based on allegations of patent infringement. From time to time, third parties may assert patent, copyright, trademark and other intellectual property rights to technologies in various jurisdictions that are important to our business.

Misappropriation of our intellectual property could harm our reputation, affect our competitive position and cost money.

We believe that our intellectual property, including its methodologies, is critical to our success and competitive position. We rely on a combination of U.S. and foreign patent, copyright, trademark and trade secret laws, as well as confidentiality agreements to establish and protect our proprietary rights. If we are unable to protect our intellectual property against unauthorized use by third parties, our reputation among existing and potential customers could be damaged and our competitive position adversely affected.

Attempts may be made to copy aspects of our products or to obtain and use information that we regard as proprietary. Accordingly, we may not be able to prevent misappropriation of our technology or deter others from developing similar technology. Our strategies to deter misappropriation could be undermined if:

the proprietary nature or protection of our methodologies is not recognized in the United States or foreign countries;

third parties misappropriate our proprietary methodologies and such misappropriation is not detected; and

competitors create applications similar to ours but which do not technically infringe on our legally protected rights.

If these risks materialize, we could be required to spend significant amounts to defend our rights and divert critical managerial resources. In addition, our proprietary methodologies may decline in value or our rights to them may become unenforceable. If any of the foregoing were to occur, our business could be materially adversely affected.

The success of our strategic plan to grow sales and develop relationships in Europe and Asia may be limited by risks related to conducting business in European and Asian markets.

Part of our strategy is to increase sales and build additional relationships in European and Asian markets. Risks inherent in marketing, selling and developing relationships in European and Asian markets include those associated with:

economic conditions in European and Asian markets, including the impact of recessions in European and Asian economies and fluctuations in the relative values of the U.S. dollar, the Euro and Asian currencies;

taxes and fees imposed by European and Asian governments that may increase the cost of products and services;

greater difficulty in accounts receivable collection and longer collection periods;

seasonal reductions in business activities in some parts of the world;

laws and regulations imposed by individual countries and by the European Union, particularly with respect to intellectual property, license requirements and environmental requirements; and

political and economic instability, terrorism and war.

In addition, European and Asian intellectual property laws are different than and may not protect our proprietary rights to the same extent as do U.S. intellectual property laws, and we will have to ensure that our intellectual property is adequately protected in foreign jurisdictions and in the United States. If we do not adequately protect our intellectual property rights, competitors could use our proprietary technologies in non-protected jurisdictions and put us at a competitive disadvantage.

Environmental and other disasters, such as flooding, large earthquakes, volcanic eruptions or nuclear or other disasters, or a combination thereof, such as recently experienced in Japan, may negatively impact our business.

Although we manufacture our products in New Jersey, we both source and ship our products globally. Environmental and other disasters may cause disruption to our supply chain or impede our ability to ship product to certain regions of the world. The recent earthquakes and tsunami in the Pacific Rim have not significantly impacted our business as of the date of this report. However, there can be no assurance that similar environmental and/or other such disasters will not have an adverse impact on our business in the future.

The concentration of ownership of our outstanding common stock with the former Willtek shareholders following the Willtek acquisition, as well as certain provisions of the shareholders' agreement we entered into with the former Willtek shareholders at the closing of the Willtek acquisition, enables the former Willtek shareholders to significantly influence the outcome of all matters, transactions and corporate actions that require approval of our shareholders.

The former Willtek shareholders, together, beneficially own approximately 26% of the outstanding shares of our common stock as of March 28, 2011. Under the terms of the shareholders' agreement we entered into with the former Willtek shareholders at the closing of the Willtek acquisition, designees of Investcorp occupy two of seven seats on our board of directors. Additionally, at each annual meeting, Investcorp is entitled to designate to our nominating committee up to two candidates for nomination for election to our seven-member board of directors, for so long as Investcorp's beneficial ownership levels exceed certain percentage thresholds.

The post-acquisition concentration of ownership of our outstanding common stock with the former Willtek shareholders, combined with Investcorp's right to designate director candidates for nomination and the former Willtek shareholders' voting obligations in the election of directors under the terms of the shareholders' agreement, enables the former Willtek shareholders to significantly influence the outcome of all matters, transactions and corporate actions that require approval of our shareholders, including the election and removal of directors and mergers or other business combination transactions, and could have the effect of delaying or preventing a change-in-control of the Company or otherwise discourage a potential acquirer from attempting to obtain control of the Company. This, in turn, could have an adverse effect on the market price of our common stock or prevent our shareholders from realizing a premium over the market price for their shares of common stock.

The inability to maintain adequate levels of liquidity may have an adverse affect on the working capital of the Company.

The Company believes that its financial resources from working capital provided by operations are adequate to meet its current needs. However, should current global economic conditions continue to deteriorate, additional working capital financing may be required which may be difficult to obtain due to restrictive credit markets.

The Company is subject to compliance with the policies & procedures of the NYSE Amex with respect to continued listing on the stock exchange.

In considering whether a security warrants continued trading and/or listing on the NYSE Amex Exchange, many factors are taken into account, such as the degree of investor interest in the company, its prospects for growth, the reputation of its management, the degree of commercial acceptance of its products, and whether its securities have suitable characteristics for auction market trading. Thus, any developments which substantially reduce the size of a company, the nature and scope of its operations, the value or amount of its securities available for the market, or the number of holders of its securities, may occasion a review of continued listing by the Exchange. Moreover, events such as the sale, destruction, loss or abandonment of a substantial portion of its business, the inability to continue its business, steps towards liquidation, or repurchase or redemption of its securities, may also give rise to such a review.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The Company's foreign facility in Ismaning, Germany was assumed by the buyer of the Willtek assets upon closing of the transaction and is no longer an obligation of the Company.

In September 2002, the Company relocated its corporate headquarters and noise generation operations to the 45,700 square foot facility occupied by Boonton in Hanover Township, Parsippany, New Jersey. The term of this lease agreement is for ten years ending September 30, 2011 and can be renewed at the tenant's option for one five-year period at fair market value to be determined at term expiration.

The Company also owns a 44,000 square foot facility located in Mahwah, New Jersey. In November 2000, the Company entered into a lease agreement with an unrelated third party for the entire facility. The triple net lease runs through August 1, 2013 and the tenant has an exclusive option to purchase the property at a predetermined purchase price of approximately \$3,500,000 up through August 1, 2012 during the lease term.

Item 3. Legal Proceedings

Reference is made to the discussion in Item 1 above regarding an investigation by the NJDEP concerning certain discontinued practices of the Company and their effect on the soil and ground water at a certain facility formerly occupied by the Company. No administrative or judicial proceedings have been commenced in connection with such investigation. The owner of the Parsippany-Troy Hills facility has previously notified the Company, that if the investigation proves to interfere with the sale of the property, it may seek to hold the Company liable for any resulting damages. Since May 1983, the owner has been on notice of this problem and has failed to institute any legal proceedings with respect thereto. While this does not bar the owner from instituting a suit, it is the opinion of the Company's legal counsel that it is unlikely that the owner would prevail on any claim. The above referenced activity was conducted by Boonton prior to the acquisition of that entity in 2000. There are no other material legal proceedings known to the Company.

Item 4. Removed and Reserved

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

The Common Stock of the Company has traded on the American Stock Exchange under the name Wireless Telecom Group, Inc. (Symbol: WTT) since September 12, 1994. The following table sets forth the high and low sales prices of the Company's Common Stock for the periods indicated as reported on the New York Stock Exchange Amex (formerly the American Stock Exchange).

2010 Fiscal Year	High	Low
1st Quarter	\$ 1.04	\$ 0.70
2nd Quarter	1.14	0.72
3rd Quarter	0.85	0.60
4th Quarter	0.88	0.67
2009 Fiscal Year		
1st Quarter	\$ 0.51	\$ 0.13
2nd Quarter	0.60	0.29
3rd Quarter	0.90	0.50
4th Quarter	0.80	0.53

On March 28, 2011, the closing price of the common stock of the Company as reported was \$1.08. On March 28, 2011, the Company had 476 stockholders of record. These stockholders of record do not include non-registered stockholders whose shares are held in nominee or street name.

The Company did not declare quarterly dividends for the past four years.

Plan category	Number of securities to be issued upon exercise of outstanding options, warrants, and rights	Weighted-average exercise price of outstanding options, warrants and rights	Number of securities remaining available for future issuance under equity compensation plan (excluding securities reflected in the previous columns)
Equity compensation plans approved by security holders	2,513,667	\$ 1.68	1,654,250
Equity compensation plans not approved by security holders			
Total	2,513,667	\$ 1.68	1,654,250

Item 6. Selected Financial Data

Not applicable.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Introduction

Wireless Telecom Group, Inc., and its operating subsidiaries, (collectively, the Company), develop, manufacture and market a wide variety of electronic noise sources, electronic testing and measuring instruments including power meters, voltmeters and modulation meters and high-power passive microwave components for wireless products. The Company's products have historically been primarily used to test the performance and capability of cellular/PCS and satellite communication systems and to measure the power of RF and microwave systems. Other applications include radio, radar, wireless local area network (WLAN) and digital television.

As was disclosed earlier in this report, as a result of the sale of Willtek, the Company has reflected its foreign activities as assets and liabilities held for sale and discontinued operations in its 2010 and 2009 consolidated financial statements.

The financial information presented herein includes: (i) Consolidated Balance Sheets as of December 31, 2010 and 2009 (ii) Consolidated Statements of Operations for the years ended December 31, 2010 and 2009 (iii) Consolidated Statement of Changes in Shareholders' Equity for the years ended December 31, 2010 and 2009 (iv) Consolidated Statements of Cash Flows for the years ended December 31, 2010 and 2009.

Forward-Looking Statements

The statements contained in this Annual Report on Form 10-K that are not historical facts, including, without limitation, the statements under Management's Discussion and Analysis of Financial Condition and Results of Operations, are forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. Such forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as believes, expects, intends, plans, may, will, should, anticipates or continues or the negative variations thereon or comparable terminology, or by discussions of strategy that involve risks and uncertainties. These statements are based on the Company's current expectations of future events and are subject to a number of risks and uncertainties that may cause the Company's actual results to differ materially from those described in the forward-looking statements. These risks and uncertainties include, continued ability to maintain positive cash flow from results of operations, continued evaluation of goodwill for impairment and the Company's development and production of competitive technologies in our market sector, among others. Should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary materially from those anticipated, estimated or projected. These risks and uncertainties are disclosed from time to time in the Company's filings with the Securities and Exchange Commission, the Company's press releases and in oral statements made by or with the approval of authorized personnel. The Company assumes no obligation to update any forward-looking statements as a result of new information or future events or developments.

Critical Accounting Policies

Estimates and assumptions

Management's discussion and analysis of the financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses for each period. The following represents a summary of the Company's critical accounting policies, defined as those policies that the Company believes are: (a) the most important to the portrayal of our financial condition and results of operations, and (b) that require management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effects of matters that are inherently uncertain. Estimates and assumptions are made by management to assess the overall likelihood that an accounting estimate or assumption may require adjustment. Management assumptions have been reasonably accurate in the past, and future estimates or assumptions are likely to be calculated on the same basis.

Stock-based compensation

The Company follows the provisions of Accounting Standards Codification (ASC) 718, *Share-Based Payment*. The fair value of options at the date of grant was estimated using the Black-Scholes option pricing model. For the performance-based options granted in 2010 and 2009, the Company took into consideration guidance under ASC 718 and SEC Staff Accounting Bulletin No. 107 (SAB 107) when reviewing and updating assumptions. The expected option life is derived from assumed exercise rates based upon historical exercise patterns and represents the period of time that options granted are expected to be outstanding. The expected volatility is based upon historical volatility of our shares using weekly price observations over an observation period that approximates the expected life of the options. The risk-free rate is based on the U.S. Treasury yield curve rate in effect at the time of grant for periods similar to the expected option life. The estimated forfeiture rate included in the option valuation was zero.

Revenue recognition

Revenue from product shipments, including shipping and handling fees, is recognized once delivery has occurred provided that persuasive evidence of an arrangement exists, the price is fixed or determinable, and collectability is reasonably assured. Delivery is considered to have occurred when title and risk of loss have transferred to the customer. Sales to international distributors are recognized in the same manner. If title does not pass until the product reaches the customer's delivery site, then revenue recognition is deferred until that time. There are no formal sales incentives offered to any of the Company's customers. Volume discounts may be offered from time to time to customers purchasing large quantities on a per transaction basis. There are no special post shipment obligations or acceptance provisions that exist with any sales arrangements.

Inventories

Raw material inventories are stated at the lower of cost (first-in, first-out method) or market. Finished goods and work-in-process are valued at average cost of production, which includes material, labor and manufacturing expenses.

Allowances for doubtful accounts

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. A key consideration in estimating the allowance for doubtful accounts has been, and will continue to be, our customer's payment history and aging of its accounts receivable balance.

Income taxes

The Company records deferred taxes in accordance with ASC 740, *Accounting for Income Taxes*. This ASC requires recognition of deferred tax assets and liabilities for temporary differences between tax basis of assets and liabilities and the amounts at which they are carried in the financial statements, based upon the enacted rates in effect for the year in which the differences are expected to reverse. The Company establishes a valuation allowance when necessary to reduce deferred tax assets to the amount expected to be realized. The Company periodically assesses the value of its deferred tax asset, a majority of which has been generated by the disposition of Willtek, and determines the necessity for a valuation allowance. The Company evaluates which portion, if any, will more likely than not be realized by offsetting future taxable income, taking into consideration any limitations that may exist on its use of its net operating loss carryforwards.

Uncertain Tax Position

Under ASC 740, the Company must recognize the tax benefit from an uncertain position only if it is more-likely-than-not the tax position will be sustained on examination by the taxing authority, based on the technical merits of the position. The tax benefits recognized in the financial statements attributable to such position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon the ultimate resolution of the position.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

The Company has analyzed its filing positions in all of the federal, state and foreign jurisdictions where it is required to file income tax returns. As of December 31, 2010 and 2009, the Company has identified its federal tax return, its state tax return in New Jersey and its foreign return in Germany as major tax jurisdictions, as defined, in which it is required to file income tax returns. Based on the evaluations noted above, the Company has concluded that there are no significant uncertain tax positions requiring recognition or disclosure in its consolidated financial statements.

Based on a review of tax positions for all open years and contingencies as set out in Company's notes to the consolidated financial statements, no reserves for uncertain income tax positions have been recorded pursuant to ASC 740 during the years ended December 31, 2010 and 2009, and the Company does not anticipate that it is reasonably possible that any material increase or decrease in its unrecognized tax benefits will occur within twelve months.

Valuation of goodwill

The Company reviews the goodwill of its subsidiary, Microlab, for impairment whenever events or changes in circumstances indicate that the carrying amount of these assets may not be recoverable, and also reviews Microlab's goodwill annually in accordance with ASC 350, Accounting for Business Combinations, Goodwill, and Other Intangible Assets. The process of evaluating the potential impairment of goodwill is ongoing, subjective and requires significant judgment and estimates regarding future cash flows and forecasts. Goodwill represents the excess of the cost of an acquisition over fair value of net assets acquired. Testing for the impairment of goodwill involves a two step process. The first step of the impairment test requires the comparing of a reporting unit's fair value to its carrying value. If the carrying value is less than the fair value, no impairment exists and the second step is not performed. If the carrying value is higher than the fair value, there is an indication that impairment may exist and the second step must be performed to compute the amount of the impairment. In the second step, the impairment is computed by estimating the fair values of all recognized and unrecognized assets and liabilities of the reporting unit and comparing the implied fair value of reporting unit goodwill with the carrying amount of that unit's goodwill. As noted above, goodwill is attributable to one of the Company's reporting units, Microlab.

Impairment of long-lived assets

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted cash flows resulting from the use of the assets and its eventual disposition. Measurement of an impairment loss for long-lived assets that management expects to hold for sale is based on the fair value of the assets. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell.

Results of Operations **Year Ended December 31, 2010 Compared to 2009**

Net sales for the year ended December 31, 2010 were \$24,564,226 as compared to \$22,828,328 for the year ended December 31, 2009, an increase of \$1,735,898 or 7.6%. This increase was primarily the result of strengthening demand for the Company's products and services throughout 2010. The Company believes key indicators, such as government spending on naval and air programs and commercial infrastructure development, point to a general improvement in economic conditions, positively impacting sales during the period.

The Company's gross profit on net sales for the year ended December 31, 2010 was \$11,555,479 or 47.0% as compared to \$10,628,932 or 46.6% as reported in the previous year. Gross profit dollars are slightly higher in 2010 compared to 2009 primarily due to relatively fixed costs being allocated to higher revenues and the continuing effort to closely manage labor and overhead costs. The Company's products consist of several models with varying degrees of capabilities which can be customized to meet particular customer requirements. They may be incorporated directly into the electronic equipment concerned or may be stand alone components or devices that are connected to, or used in conjunction with, such equipment from an external site, in the factory or in the field.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

Prices of products range from approximately \$100 to \$100,000 per unit, with most sales occurring between approximately \$2,000 and \$35,000 per unit. The Company can experience variations in gross profit based upon the mix of these products sold as well as variations due to revenue volume and economies of scale. The Company will continue to rigidly monitor costs associated with material acquisition, manufacturing and production.

Operating expenses for the year ended December 31, 2010 were \$10,749,956 or 43.8% of net sales as compared to \$11,552,881 or 50.6% of net sales for the year ended December 31, 2009. For the year ended December 31, 2010 as compared to the prior year, operating expenses decreased by \$802,925. Operating expenses are lower in 2010 due to a decrease in general and administrative expenses, offset by increased spending in both research and development and sales and marketing expenses. The decrease in general and administrative expense is attributable to lower administrative salaries, a decrease in non-cash stock option charges and lower professional fees in 2010, coupled with a specific onetime warranty accrual in the amount of \$240,000 recorded in 2009.

Interest income decreased by \$23,214 for the year ended December 31, 2010. This decrease was primarily due to the decline in interest rates in the Company's interest bearing investment account in 2010. Substantially all of the Company's cash is invested in money market funds.

Other income increased by \$58,556 for the year ended December 31, 2010. This increase was primarily due to the reduction of an accrual in 2010 of approximately \$100,000 relating to the potential exposure on environmental contamination at a site formerly leased by Boonton, partially offset by, foreign currency losses realized during the period. The Company has been testing the ground water at this site since 1982 in accordance with state regulations. Recently, the Company has hired a new environmental consultant to evaluate the results of the current remediation plan that has been in effect since 1982. The Company is diligently pursuing efforts to satisfy the requirements of the original plan and receive a new determination from the NJDEP. Management continues to be encouraged by recent test results which support improvements in ground water conditions over time. While management anticipates that the expenditures in connection with this site will not be substantial in future years, the Company could be subject to significant future liabilities and may incur significant future expenditures if any additional contamination is identified and the NJDEP requires additional remediation.

For the year ended December 31, 2010, the Company realized a tax benefit of \$91,870. The tax benefit was primarily due to an increase in the Company's deferred tax asset, net of a valuation allowance, partially offset by an adjustment to the estimated 2009 carryback claim, due to the Company's finalizing of its 2009 federal tax return, and the provision for state income taxes. For the year ended December 31, 2009, the Company realized a tax benefit, net of a valuation allowance, of \$6,366,851, of which approximately \$1,900,000 was estimated to be realized in a carryback claim from taxes paid in prior years. The remaining tax benefit of approximately \$4,500,000 was estimated to be utilized to offset taxable income in future years. The effect of this tax benefit on earnings per share in 2009 was an increase of \$0.25 per share.

Net income from continuing operations was \$1,015,043 or \$0.04 per share on a diluted basis for the year ended December 31, 2010 as compared to net income from continuing operations of \$5,460,322 or \$0.21 per share on a diluted basis for the year ended December 31, 2009, a decrease of \$4,445,279. The decrease was primarily due to the analysis mentioned above.

Net loss from discontinued operations was \$1,742,853 or \$0.07 per share on a diluted basis for the year ended December 31, 2010 as compared to a net loss from discontinued operations of \$3,428,069 or \$0.13 per share on a diluted basis for the year ended December 31, 2009, a loss decrease of \$1,685,216. The 2010 loss was primarily due to an adjustment to the loss recognized on the sale of Willtek of \$430,565 and \$1,312,288 in operating losses in Willtek through the May 7, 2010 sale date. The 2009 loss was primarily due to the \$3,348,122 loss recognized in 2009 on the anticipated sale of Willtek.

Net loss was \$727,810 or \$0.03 per share on a diluted basis for the year ended December 31, 2010 as compared to net income of \$2,032,253 or \$0.08 per share on a diluted basis for the year ended December 31, 2009, a decrease of \$2,760,063. The decrease was primarily due to the analysis mentioned above.

Liquidity and Capital Resources

The Company's working capital has decreased by \$3,482,729 to \$22,671,245 at December 31, 2010, from \$26,153,974 at December 31, 2009. The decrease in working capital is primarily due to the sale of Willtek's net assets in 2010. At December 31, 2010, the Company had a current ratio of 8.2 to 1, and a ratio of debt to tangible net worth of .2 to 1. At December 31, 2009, the Company had a current ratio of 4.4 to 1, and a ratio of debt to tangible net worth of .4 to 1.

The Company had cash and cash equivalents of \$13,643,220 at December 31, 2010, compared to a balance of \$14,076,382 at December 31, 2009. The Company believes its current level of cash is sufficient enough to fund the current operating, investing and financing activities.

The Company expects to realize tax benefits in future periods due to the available net operating loss carryforwards resulting from the disposition of Willtek in 2010. Accordingly, future taxable income is expected to be offset by the utilization of operating loss carryforwards and as a result will increase the Company's liquidity as cash needed to pay Federal income taxes will be substantially reduced.

Operating activities, including discontinued operations, used \$1,160,482 in cash for the year ending December 31, 2010. For the year ended December 31, 2009, operating activities, including discontinued operations, provided \$3,108,709 in cash flows. For 2010, cash used for operations was primarily due to a decrease in accounts payable and accrued expenses, a decrease in income taxes payable, and increases in inventory and accounts receivable, partially offset by a decrease in prepaid expenses, income taxes recoverable and other current assets. For 2009, cash provided by operations was primarily due to decreases in accounts receivable and inventory, partially off-set by an increase in prepaid expenses, recoverability of taxes and other assets, and a decrease in accounts payable and accrued expenses.

The Company has historically been able to turn over its accounts receivable approximately every two months. This average collection period has been sufficient to provide the working capital and liquidity necessary to operate the Company.

Net cash provided by investing activities for 2010 amounted to \$2,415,715 compared to net cash provided by investing activities of \$4,731,285 for the year ending December 31, 2009. For 2010, the primary source of cash was proceeds relating to the disposition of Willtek, offset by capital expenditures. For 2009, the primary source of cash was proceeds from the sale of investment securities, off-set by capital expenditures.

Financing activities used \$1,538,533 in cash for the year ended December 31, 2010. The use of these funds was for the final payoff on the Company's bank loan and periodic payments made on its mortgage note payable. Financing activities used \$423,898 in cash for the year ended December 31, 2009. The use of these funds was for periodic payments made on the Company's bank and mortgage note payable.

In 2010, the Company satisfied the entire outstanding principal and interest due on its bank note payable through payment of \$1,475,149. Since this bank note was in principle a Euro denominated loan, the outstanding loan balance was subject to foreign currency fluctuations. The Company benefited from the weakening Euro at time of payment.

Table of Contractual Obligations

	Total	Less than 1 Year	Payments by Period	
			1-3 Years	4-5 Years
Mortgage	\$ 2,771,259	\$ 68,347	\$ 2,702,912	\$
Facility Leases	335,133	335,133		
Operating and Equipment leases	354,015	75,514	222,801	55,700
	<u>\$ 3,460,407</u>	<u>\$ 478,994</u>	<u>\$ 2,925,713</u>	<u>\$ 55,700</u>

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

In September 2009, the Company secured a line of credit with one of its financial institutions. The credit facility provides borrowing availability of up to 100% of the Company's money market account balance and 99% of the Company's short-term investment securities (U.S. Treasury bills) and, under the terms and conditions of the loan agreement, is fully secured by said money fund account and short-term investment holdings. Advances under the facility will bear interest at a variable rate equal to the London InterBank Offered Rate (LIBOR) in effect at time of borrowing. Additionally, under the terms and conditions of the loan agreement, there is no annual fee and any amount outstanding under the loan facility may be paid at any time in whole or in part without penalty. As of December 31, 2010, the Company had no borrowings outstanding under the facility and approximately \$6,000,000 of borrowing availability.

The Company believes that its financial resources from working capital provided by operations are adequate to meet its current needs. However, should current global economic conditions continue to deteriorate, additional working capital funding may be required which may be difficult to obtain due to restrictive credit markets.

Throughout its ownership of Willtek, the Company had been required to fund its foreign operations through cash loans and advances. Due to the dissolution of Willtek, this funding will no longer be required.

Off-Balance Sheet Arrangements

Other than contractual obligations incurred in the normal course of business, the Company does not have any off-balance sheet arrangements.

Inflation and Seasonality

The Company does not anticipate that inflation will significantly impact its business nor does it believe that its business is seasonal.

Recent Accounting Pronouncements Affecting the Company

In December 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (amendments to FASB ASC Topic 350, Intangibles, Goodwill and Other). The objective of this ASU is to address diversity in practice in the application of goodwill impairment testing by entities with reporting units with zero or negative carrying amounts, eliminating an entity's ability to assert that a reporting unit is not required to perform Step 2 because the carrying amount of the reporting unit is zero or negative despite the existence of qualitative factors that indicate the goodwill is more likely than not impaired. This ASU is effective for interim periods after January 1, 2011. The Company is in the process of evaluating the impact of adopting this ASU on its consolidated financial statements.

In April 2010, the FASB issued ASU 2010-17, Revenue Recognition Milestone Method (Topic 605). ASU 2010-17 provides guidance in applying the milestone method of revenue recognition to research and development arrangements. Under this guidance management may recognize revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets all the criteria within the guidance to be considered substantive. This ASU is effective on a prospective basis for research and development milestones achieved in fiscal years, beginning on or after June 15, 2010. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements as the Company has no material research and development arrangements which will be accounted for under the milestone method.

In January 2010, the FASB issued ASU 2010-06, Improving Disclosures about Fair Value Measurements. This update provides amendments to Subtopic 820-10 that requires new disclosure about recurring or nonrecurring fair-value measurements including significant transfers into or out of Level 1 and Level 2 fair-value classifications. It also requires information on purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair-value assets and liabilities. These disclosures are required for fiscal years beginning on or after December 15, 2009. The ASU also clarifies existing fair-value measurement disclosure guidance about the level of disaggregation, inputs and valuation techniques, which are required to be implemented in fiscal years and interim periods beginning on or after December 15, 2010. Since the requirements of this ASU only relate to disclosure, the adoption of the portion of this

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

guidance that became effective January 1, 2010 did not have a material impact on the Company's consolidated financial statements. Furthermore, we do not expect the portion of the guidance to become effective January 1, 2011 to have a material impact in the Company's consolidated financial statements.

In October 2009, the FASB issued ASU 2009-14, Certain Revenue Arrangements that Include Software Elements. This update amends Accounting Standards Codification Subtopic 985-605, Software Revenue Recognition, to exclude from its scope tangible products that contain both software and non-software components that function together to deliver a product's essential functionality. The ASU is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements.

In October 2009, the FASB issued ASU 2009-13, Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements. A Consensus of the FASB Emerging Issues Task Force. This update provides application guidance on whether multiple deliverables exist, how the deliverables should be separated and how the consideration should be allocated to one or more units of accounting. This update establishes a selling price hierarchy for determining the selling price of a deliverable. The selling price used for each deliverable will be based on vendor-specific objective evidence, if available, third-party evidence if vendor-specific evidence is not available, or estimated selling price if neither vendor-specific nor third-party evidence is available. The Company will be required to apply this guidance prospectively for revenue arrangements entered into or materially modified after January 1, 2011; however, earlier application is permitted. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk ***Industry Risk***

The electronic test and measurement industry is cyclical which can cause significant fluctuations in sales, gross profit margins and profits, from year to year. It is difficult to predict the timing of the changing cycles in the electronic test and measurement industry.

Item 8. Financial Statements and Supplementary Data

The response to this item is submitted in a separate section of this report.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

Under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, as of the end of the period covered by this report, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Act of 1934. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be included in our Securities and Exchange Commission (SEC) reports is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, relating to Wireless Telecom Group, Inc. Based on this evaluation, our principal executive officer and principal financial officer concluded that, as of the period covered by this report, our disclosure controls and procedures are effective at these reasonable assurance levels.

(b) Management's Report on Internal Control over Financial Reporting

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed under the supervision of the Company's principal executive officer and principal financial officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with generally accepted accounting principles. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. All internal control systems, no matter how well designed, have inherent limitations. Therefore, even those systems determined to be effective can provide only reasonable assurances with respect to financial statement preparation and presentation. Additionally, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As of December 31, 2010, management assessed the effectiveness of the Company's internal control over financial reporting based on the criteria for effective internal control over financial reporting established in Internal Control - Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). Based on the assessment, management determined that the Company maintained effective internal control over financial reporting as of December 31, 2010, based on the COSO criteria.

This annual report does not include an attestation report of the Company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to attestation by the Company's independent registered public accounting firm pursuant to the Dodd-Frank Wall Street and Consumer Protection Act, which exempts non-accelerated filers from the auditor attestation requirement of Section 404 (b) of the Sarbanes-Oxley Act.

(c) Changes in Internal Controls over Financial Reporting

In connection with the evaluation required by paragraph (d) of Rule 13a-15 under the Exchange Act, there was no change identified in our internal control over financial reporting that occurred during the last fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors and Executive Officers of the Registrant

The information required under this item is set forth in the Company's Definitive Proxy Statement relating to the Company's 2011 annual meeting of shareholders and is incorporated herein by reference. Such Proxy Statement will be filed with the Commissions within 120 days of the Company's year-end.

Item 11. Executive Compensation

The information required under this item is set forth in the Company's Definitive Proxy Statement relating to the Company's 2011 annual meeting of shareholders and is incorporated herein by reference. Such Proxy Statement will be filed with the Commissions within 120 days of the Company's year-end.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The information required under this item is set forth in the Company's Definitive Proxy Statement relating to the Company's 2011 annual meeting of shareholders and is incorporated herein by reference. Such Proxy Statement will be filed with the Commissions within 120 days of the Company's year-end.

Item 13. Certain Relationships and Related Transactions, and Director Independence

The information required under this item is set forth in the Company's Definitive Proxy Statement relating to the Company's 2011 annual meeting of shareholders and is incorporated herein by reference. Such Proxy Statement will be filed with the Commissions within 120 days of the Company's year-end.

Item 14. Principal Accountant Fees and Services

The information required under this item is set forth in the Company's Definitive Proxy Statement relating to the Company's 2011 annual meeting of shareholders and is incorporated herein by reference. Such Proxy Statement will be filed with the Commissions within 120 days of the Company's year-end.

PART IV

Item 15. Exhibits and Financial Statement Schedules

- (a) (1) Report of Independent Registered Public Accounting Firm
Consolidated Balance Sheets as of December 31, 2010 and 2009
Consolidated Statements of Operations for the Two Years in the Period ended December 31, 2010

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders
Wireless Telecom Group, Inc.
Parsippany, NJ

We have audited the accompanying consolidated balance sheets of Wireless Telecom Group, Inc. and Subsidiaries as of December 31, 2010 and 2009, and the related consolidated statements of operations, changes in shareholders' equity, cash flows and the schedule listed in the accompanying index for the years then ended. These consolidated financial statements and schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements and the schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and the schedule are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting amounts and disclosures in the consolidated financial statements and the schedule, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements and the schedule. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Wireless Telecom Group, Inc. and Subsidiaries at December 31, 2010 and 2009 and the results of their operations and their cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the schedule presents fairly, in all material respects, the information set forth therein.

/s/PKF LLP

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Organization and Basis of Presentation:

Wireless Telecom Group, Inc. and Subsidiaries (the Company), develops and manufactures a wide variety of electronic noise sources, testing and measurement instruments and high-power, passive microwave components, which it sells to customers throughout the United States and worldwide through its foreign sales corporation and foreign distributors to commercial and government customers in the electronics industry. The consolidated financial statements include the accounts of Wireless Telecom Group, Inc. and its wholly-owned subsidiaries, Boonton Electronics Corporation, Microlab/FXR, Willtek Communications GmbH (through May 7, 2010), WTG Foreign Sales Corporation and NC Mahwah, Inc. All intercompany transactions are eliminated in consolidation.

Throughout 2009, Willtek Communications GmbH (Willtek) experienced a decline in revenues and, consequently, a decline in gross margins primarily due to an overall industry slowdown in worldwide cellular handset demand. In light of these, and other, current market challenges facing Willtek, including significant research and development expenses required to remain competitive, management evaluated several strategic alternatives and opportunities, such as, restructuring the existing business, finding a strategic partner, making additional investments in technology research and development or a sale of some or all of the Willtek assets.

In November 2009, the Company's board of directors made a decision to conclude efforts to seek strategic alternatives regarding the operations, assets and intellectual property relating to the Company's foreign subsidiary, Willtek, so that the Company could focus on growing its domestic based business divisions. The board of directors authorized management to begin negotiations with interested parties to sell substantially all of the assets of Willtek or cease incurring costs related to its development. On April 9, 2010, the Company entered into an asset purchase agreement to sell substantially all the operating assets and certain liabilities of Willtek and on May 7, 2010 successfully completed this sale.

As a result of the aforementioned sale of Willtek, the Company's consolidated balance sheet at December 31, 2009 presents the accounts of Willtek as assets and liabilities held for sale. Willtek's operating activities through the May 7, 2010 sale date, and for all of fiscal year 2009, are included in the Company's consolidated statement of operations as discontinued operations (see Note 2). As a result, the succeeding information presented in these notes to the financial statements pertains primarily to the Company's continuing operations.

Use of Estimates:

In preparing financial statements in accordance with accounting principles generally accepted in the United States of America (U.S. GAAP), management makes certain estimates and assumptions, where applicable, that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements, as well as the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Concentrations of Credit Risk and Fair Value:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and accounts receivable.

The Company maintains significant cash investments primarily with two financial institutions, which at times may exceed federally insured limits. The Company performs periodic evaluations of the relative credit rating of these institutions as part of its investment strategy.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

Concentrations of credit risk with respect to accounts receivable are limited due to the Company's large customer base. However, at December 31, 2010, primarily all of the Company's receivables do pertain to the telecommunications industry.

The carrying amounts of cash and cash equivalents, trade receivables, other current assets and accounts payable approximate fair value due to the short-term nature of these instruments. At December 31, 2010, the fair value (estimated based upon expected cash outflows discounted at current market rates) and carrying value of fixed rate mortgage amounted to \$2,860,698 and \$2,771,259, respectively. At December 31, 2009, the fair value and carrying value of fixed rate mortgage amounted to \$2,930,764 and \$2,834,645, respectively.

The Company records its financial assets and liabilities at fair value. The accounting standard for fair value (i) defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in an orderly transaction between market participants at the measurement date, (ii) establishes a framework for measuring fair value, (iii) establishes a hierarchy of fair value measurements based upon the observability of inputs used to value assets and liabilities, (iv) requires consideration of nonperformance risk, and (v) expands disclosures about the methods used to measure fair value.

The accounting standard establishes a three-level hierarchy of measurements based upon the reliability of observable and unobservable inputs used to arrive at fair value. Observable inputs are independent market data, while unobservable inputs reflect our assumptions about valuation. The three levels of the hierarchy are defined as follows:

Level 1: Observable inputs such as quoted prices in active markets for identical assets and liabilities;

Level 2: Inputs other than quoted prices but are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active; and model-derived valuations in which all significant inputs and significant value drivers are observable in active markets; and

Level 3: Valuations derived from valuation techniques in which one or more significant inputs or significant value drivers are unobservable.

At December 31, 2010, the Company did not have any financial assets or liabilities which are required to be measured at fair value on a recurring basis. At December 31, 2009, the net assets of Wiltek (see note 2) were recorded at their net realizable values based upon Level 2 hierarchy.

Cash and Cash Equivalents:

The Company considers all highly liquid investments purchased with an original maturity of three months or less to be cash equivalents. Cash and cash equivalents consist of operating and money market accounts.

The Company classifies investments as short-term investments if their original or remaining maturities are greater than three months and their remaining maturities are one year or less. As of December 31, 2010, substantially all of the Company's investments consisted of cash and cash equivalents.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

Accounts Receivable:

The Company accounts for uncollectible accounts under the allowance method. Potentially uncollectible accounts are provided for throughout the year and actual bad debts are written off to the allowance on a timely basis.

Inventories:

Raw material inventories are stated at the lower of cost (first-in, first-out method) or market. Finished goods and work-in-process are valued at average cost of production, which includes material, labor and manufacturing expenses. Inventory carrying value is net of inventory reserves of \$452,310 and \$810,904 for the years ended December 31, 2010 and 2009, respectively. In 2010, during the review of its inventory reserves, the Company identified and scrapped \$243,713 of obsolete inventory.

Inventories consist of:

	December 31,	
	2010	2009
Raw materials	\$ 4,632,195	\$ 4,393,992
Work-in-process	830,684	1,252,251
Finished goods	1,472,293	1,297,988
	<u>\$ 6,935,172</u>	<u>\$ 6,944,231</u>

Property, Plant and Equipment:

Property, plant and equipment are reflected at cost, less accumulated depreciation. Depreciation and amortization are provided on a straight-line basis over the following useful lives:

Building and improvements	39 years
Machinery and equipment	5-10 years
Furniture and fixtures	5-10 years
Transportation equipment	3-5 years

Leasehold improvements are amortized over the remaining term of the lease and reflect the estimated life of the improvements. Repairs and maintenance are charged to operations as incurred; renewals and betterments are capitalized.

Goodwill:

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

The Company reviews the goodwill of its subsidiary, Microlab, for impairment whenever events or changes in circumstances indicate that the carrying amount of this asset may not be recoverable, and also reviews Microlab's goodwill annually in accordance with Accounting Standards Codification (ASC) 350, Accounting for Business Combinations, Goodwill, and Other Intangible Assets. The process of evaluating the potential impairment of goodwill is ongoing, subjective and requires significant judgment and estimates regarding future cash flows and forecasts. Goodwill represents the excess of the cost of an acquisition over fair value of net assets acquired. Testing for the impairment of goodwill involves a two step process. The first step of the impairment test requires the comparing of a reporting unit's fair value to its carrying value. If the carrying value is less than the fair value, no impairment exists and the second step is not performed. If the carrying value is higher than the fair value, there is an indication that impairment may exist and the second step must be performed to compute the amount of the impairment.

F 10

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

In the second step, the impairment is computed by estimating the fair value of all recognized and unrecognized assets and liabilities of the reporting unit and comparing the implied fair value of reporting unit goodwill with the carrying amount of that unit's goodwill. As noted above, goodwill is attributable to one of the Company's reporting units, Microlab.

In the fourth quarters of 2010 and 2009, management performed their annual impairment test of goodwill which indicated that Microlab's fair value was significantly in excess of its carrying value, therefore, there was no impairment for either of the periods presented.

Impairment of long-lived assets:

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. Determination of recoverability is based on an estimate of undiscounted cash flows resulting from the use of the assets and its eventual disposition. Measurement of an impairment loss for long-lived assets that management expects to hold for sale is based on the fair value of the assets. Long-lived assets to be disposed of are reported at the lower of carrying amount or fair value less costs to sell.

Revenue Recognition:

Revenue from product shipments, including shipping and handling fees, is recognized once delivery has occurred provided that persuasive evidence of an arrangement exists, the price is fixed or determinable, and collectability is reasonably assured. Delivery is considered to have occurred when title and risk of loss have transferred to the customer. Sales to international distributors are recognized in the same manner. If title does not pass until the product reaches the customer's delivery site, then recognition of revenue is deferred until that time. There are no formal sales incentives offered to any of the Company's customers. Volume discounts may be offered from time to time to customers purchasing large quantities on a per transaction basis. There are no special post shipment obligations or acceptance provisions that exist with any sales arrangements.

Research and Development Costs:

Research and development costs are charged to operations when incurred. The amounts charged to continuing operations for the years ended December 31, 2010 and 2009 were \$2,174,798 and \$2,066,018, respectively.

Advertising Costs:

Advertising expenses are charged to operations during the year in which they are incurred and aggregated \$358,248 and \$357,063 for the years ended December 31, 2010 and 2009, respectively.

Comprehensive Income (Loss):

Prior to the disposition of Willtek (see Note 2), assets and liabilities of the Company's foreign subsidiaries were translated at period-end exchange rates, while income and expenses were translated at average rates for the period. Translation gains and losses were reported as a component of accumulated other comprehensive income (loss) on the statement of changes in shareholders equity in accordance with ASC 220, Comprehensive Income.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

During the fiscal year ended December 31, 2009, included in other comprehensive income (loss) was an adjustment for Willtek's employee benefit obligations due to the provisions of ASC 715, Compensation Retirement Benefits, as well as, foreign currency translation gains and losses. At December 31, 2009, in connection with the Company's intent and eventual sale of substantially all of the assets of its foreign subsidiary (see Note 2), amounts recorded in other comprehensive income (loss) were included in the determination of the loss of discontinued operations.

Components of other comprehensive income (loss) consist of the following:

	Foreign Currency Translation	Pension Liability Adjustments	Total Accumulated Other Comprehensive Income (loss)
Balance at December 31, 2008	\$ (262,128)	\$ 986,536	\$ 724,408
Amounts recognized for employee pension costs		(83,101)	(83,101)
Foreign currency translation	293,448		293,448
Balance at December 31, 2009	\$ 31,320	\$ 903,435	\$ 934,755
Amounts recognized for employee pension costs		(903,435)	(903,435)
Foreign currency translation	(31,320)		(31,320)
Balance at December 31, 2010	\$	\$	\$

Stock-Based Compensation:

The Company follows the provisions of ASC 718, Share-Based Payment. The fair value of options at the date of grant was estimated using the Black-Scholes option pricing model. For the performance-based options granted in 2010 and 2009, the Company took into consideration guidance under ASC 718 and SEC Staff Accounting Bulletin No. 107 (SAB 107) when reviewing and updating assumptions. The expected option life is derived from assumed exercise rates based upon historical exercise patterns and represents the period of time that options granted are expected to be outstanding. The expected volatility is based upon historical volatility of our shares using weekly price observations over an observation period that approximates the expected life of the options. The risk-free rate is based on the U.S. Treasury yield curve rate in effect at the time of grant for periods similar to the expected option life. The estimated forfeiture rate included in the option valuation was zero.

Income Taxes:

The Company records deferred taxes in accordance with ASC 740, Accounting for Income Taxes. This ASC requires recognition of deferred tax assets and liabilities for temporary differences between tax basis of assets and liabilities and the amounts at which they are carried in the financial statements, based upon the enacted rates in effect for the year in which the differences are expected to reverse. The Company establishes a valuation allowance when necessary to reduce deferred tax assets to the amount expected to be realized. The Company periodically assesses the value of its deferred tax asset, a majority of which has been generated by the disposition of Willtek, and determines the necessity for a valuation allowance.

The Company evaluates which portion, if any, will more likely than not be realized by offsetting future taxable income, taking into consideration any limitations that may exist on its use of its net operating loss carryforwards.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

Under ASC 740, the Company must recognize the tax benefit from an uncertain position only if it is more-likely-than-not the tax position will be sustained on examination by the taxing authority, based on the technical merits of the position. The tax benefits recognized in the financial statements attributable to such position are measured based on the largest benefit that has a greater than 50% likelihood of being realized upon the ultimate resolution of the position.

The Company has analyzed its filing positions in all of the federal, state and foreign jurisdictions where it is required to file income tax returns. As of December 31, 2010 and 2009, the Company has identified its federal tax return, its state tax return in New Jersey and its foreign return in Germany as major tax jurisdictions, as defined, in which it is required to file income tax returns. Based on the evaluations noted above, the Company has concluded that there are no significant uncertain tax positions requiring recognition in its consolidated financial statements.

Based on a review of tax positions for all open years and contingencies as set out in Company's notes to the consolidated financial statements, no reserves for uncertain income tax positions have been recorded pursuant to ASC 740 during the years ended December 31, 2010 and 2009, and the Company does not anticipate that it is reasonably possible that any material increase or decrease in its unrecognized tax benefits will occur within twelve months.

Income (Loss) Per Common Share:

Basic income (loss) per share is calculated by dividing income available to common shareholders by the weighted average number of shares of common stock outstanding during the period. Diluted income (loss) per share is calculated by dividing income available to common shareholders by the weighted average number of common shares outstanding for the period and, when dilutive, potential shares from stock options and warrants to purchase common stock, using the treasury stock method. In accordance with ASC 260, *Earnings Per Share*, the following table reconciles basic shares outstanding to fully diluted shares outstanding.

		Years Ended December 31,	
		2010	2009
Weighted average number of common shares outstanding	Basic	25,658,203	25,658,203
Potentially dilutive stock options		27,088	
Weighted average number of common and equivalent shares outstanding-Diluted		25,685,291	25,658,203

Common stock options are included in the diluted income (loss) per share calculation only when option exercise prices are lower than the average market price of the common shares for the period presented. The weighted average number of common stock equivalents not included in diluted income (loss) per share, because the effects are anti-dilutive, was 2,753,472 and 3,317,778 for 2010 and 2009, respectively.

Subsequent events:

The Company has evaluated subsequent events and, except for the events described with respect to the stock repurchase, the appointment of a corporate officer and the granting of restricted stock (see Note 13), the Company has determined that there were no other subsequent events or transactions requiring recognition or disclosure in the consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

Recent Accounting Pronouncements Affecting the Company:

In December 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standard Update (ASU) 2010-28, When to Perform Step 2 of the Goodwill Impairment Test for Reporting Units with Zero or Negative Carrying Amounts (amendments to FASB ASC Topic 350, Intangibles, Goodwill and Other). The objective of this ASU is to address diversity in practice in the application of goodwill impairment testing by entities with reporting units with zero or negative carrying amounts, eliminating an entity's ability to assert that a reporting unit is not required to perform Step 2 because the carrying amount of the reporting unit is zero or negative despite the existence of qualitative factors that indicate the goodwill is more likely than not impaired. This ASU is effective for interim periods after January 1, 2011. The Company is in the process of evaluating the impact of adopting this ASU on its consolidated financial statements.

In April 2010, the FASB issued ASU 2010-17, Revenue Recognition Milestone Method (Topic 605). ASU 2010-17 provides guidance in applying the milestone method of revenue recognition to research and development arrangements. Under this guidance management may recognize revenue contingent upon the achievement of a milestone in its entirety, in the period in which the milestone is achieved, only if the milestone meets all the criteria within the guidance to be considered substantive. This ASU is effective on a prospective basis for research and development milestones achieved in fiscal years, beginning on or after June 15, 2010. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements as the Company has no material research and development arrangements which will be accounted for under the milestone method.

In January 2010, the FASB issued ASU 2010-06, Improving Disclosures about Fair Value Measurements. This update provides amendments to Subtopic 820-10 that requires new disclosure about recurring or nonrecurring fair-value measurements including significant transfers into or out of Level 1 and Level 2 fair-value classifications. It also requires information on purchases, sales, issuances and settlements on a gross basis in the reconciliation of Level 3 fair-value assets and liabilities. These disclosures are required for fiscal years beginning on or after December 15, 2009. The ASU also clarifies existing fair-value measurement disclosure guidance about the level of disaggregation, inputs and valuation techniques, which are required to be implemented in fiscal years and interim periods beginning on or after December 15, 2010.

Since the requirements of this ASU only relate to disclosure, the adoption of the portion of this guidance that became effective January 1, 2010 did not have a material impact on the Company's consolidated financial statements. Furthermore, we do not expect the portion of the guidance to become effective January 1, 2011 to have a material impact in the Company's consolidated financial statements.

In October 2009, the FASB issued ASU 2009-14, Certain Revenue Arrangements that Include Software Elements. This update amends Accounting Standards Codification Subtopic 985-605, Software Revenue Recognition, to exclude from its scope tangible products that contain both software and non-software components that function together to deliver a product's essential functionality. The ASU is effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. Early adoption is permitted. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 1 - DESCRIPTION OF COMPANY AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued):

In October 2009, the FASB issued ASU 2009-13, Revenue Recognition (Topic 605): Multiple Deliverable Revenue Arrangements A Consensus of the FASB Emerging Issues Task Force. This update provides application guidance on whether multiple deliverables exist, how the deliverables should be separated and how the consideration should be allocated to one or more units of accounting. This update establishes a selling price hierarchy for determining the selling price of a deliverable. The selling price used for each deliverable will be based on vendor-specific objective evidence, if available, third-party evidence if vendor-specific evidence is not available, or estimated selling price if neither vendor-specific nor third-party evidence is available. The Company will be required to apply this guidance prospectively for revenue arrangements entered into or materially modified after January 1, 2011; however, earlier application is permitted. The Company does not expect the adoption of this standard to have a material impact on its consolidated financial statements.

NOTE 2 DISCONTINUED OPERATIONS:

In November 2009, in light of the market challenges facing Willtek and the continuing deterioration of the Willtek operations, the Company's board of directors made a decision to conclude efforts to seek strategic alternatives regarding the operations, assets and intellectual property relating to the Company's foreign subsidiary, so that the Company could focus on growing its domestic based divisions. The board of directors authorized management to begin negotiations with interested parties to sell substantially all of the assets of Willtek or cease incurring costs related to its development.

On April 9, 2010, the Company entered into an asset purchase agreement to sell substantially all of the operating assets and certain liabilities of Willtek and, on May 7, 2010, successfully completed this sale. Although no longer included in its consolidated balance sheets as of December 31, 2010, the table below presents the Willtek assets and liabilities held for sale as of the May 7, 2010 sale date and as of December 31, 2009.

Additionally, Willtek's operating activities through the May 7, 2010 sale date are included in the Company's consolidated statement of operations as discontinued operations. Included in accrued expenses and other current liabilities at December 31, 2010 are remaining estimated unpaid costs and fees of \$1,052,074 associated with the disposition of Willtek.

Assets and liabilities held for sale as of the May 7, 2010 sale date and as of December 31, 2009 consist of the following:

	May 7, 2010	December 31, 2009
Assets held for sale		
Accounts receivable -net	\$ 1,028,443	\$ 2,037,731
Inventory - net	968,019	1,284,005
Prepaid expenses and other current assets - net	314,722	235,457
Property, plant and equipment - net		
Pension insurance and other long-term assets	2,670,873	3,420,970
	\$ 4,982,057	\$ 6,978,163
Liabilities held for sale		
Accounts payable	\$ 1,562,083	\$ 1,546,794
Accrued expenses	1,180,434	1,332,607
Pension liability	1,420,673	1,268,582
Other long-term liabilities		345,426
	\$ 4,163,190	\$ 4,493,409

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 2 DISCONTINUED OPERATIONS (Continued):

As a result of the sale of Willtek, the Company recorded a loss on sale of discontinued operations of \$3,778,687, which represents the excess of net assets, and the related realization of other comprehensive income, over the net sales price. Of this amount, \$430,565 was recognized during 2010 to reflect a change in the estimate of the carrying value less the cost to dispose Willtek. The loss on sale of discontinued operations has been reflected as a reduction of assets held for sale in the May 7, 2010 and December 31, 2009 columns in the table above.

The following table summarizes the components of discontinued operations:

	For the Year Ended December 31,	
	2010	2009
Net sales	\$ 6,642,152	\$ 25,860,848
Gross profit	2,609,331	12,982,522
(Loss) from discontinued operations before taxes	(1,313,032)	(73,961)
Provision (benefit) for income taxes	(744)	5,986
(Loss) from discontinued operations	(1,312,288)	(79,947)
(Loss) from sale of discontinued operations	(430,565)	(3,348,122)
Net (loss) from discontinued operations	\$ (1,742,853)	\$ (3,428,069)

Cash flows from discontinued operations for the years ended December 31, 2010 and 2009 are combined with the cash flows from operations within each of the three categories presented. Cash flows from discontinued operations are as follows:

	For the Year Ended December 31,	
	2010	2009
Cash flows from operating activities	\$ 94,064	\$ 612,305
Cash flows from investing activities	(3,136)	(153,317)
Cash flows from financing activities	\$ (415,211)	\$ (365,114)

NOTE 3 - PROPERTY, PLANT AND EQUIPMENT:

Property, plant and equipment, consists of the following:

Other	202,979	401,799
Total	<u>\$ 2,322,135</u>	<u>\$ 1,930,225</u>

NOTE 6 - MORTGAGE AND NOTE PAYABLE LONG TERM:

The Company has a mortgage payable secured by certain properties in the amount of \$2,771,259. This note bears interest at an annual rate of 7.45%, requires monthly payments of principal and interest of \$23,750 and matures in August 2013.

Maturities of mortgage principal payments for the next two years are \$68,347 and \$73,697, respectively, with a balloon payment due in the third and final year of \$2,629,215.

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

At December 31, 2009, Willtek carried a bank loan in the amount of Euro 1,178,100 (U.S. \$1,688,571), which had been bearing interest at the annual rate of 4% and required semi-annual payments to be made. This bank loan was not part of the sale of Willtek and accordingly the Company continued to assume responsibility for repayment. In 2010, the Company satisfied the entire outstanding principal and interest due through payment of \$1,475,149 to the bank. Since this bank note was in principle a Euro denominated loan, the outstanding loan balance was subject to foreign currency fluctuations. The Company benefited from the weakening Euro at time of payment.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 7 - SHAREHOLDERS' EQUITY:

During fiscal year 2000, shareholders approved the Company's 2000 Stock Option Plan (the "2000 Plan"). The 2000 Plan provides for the grant of Incentive Stock Options ("ISOs") and Non-Qualified Stock Options ("NQSOs") in compliance with the Code to employees, officers, directors, consultants and advisors of the Company who are expected to contribute to the Company's future growth and success. 1,500,000 shares of common stock were reserved for issuance upon the exercise of options under the original 2000 Plan. On July 6, 2006, the Company's shareholders approved by vote to amend and restate the 2000 Plan (the "Amended and Restated 2000 Plan"), authorizing the grant of an additional 2,000,000 shares of common stock options. On September 17, 2008, shareholders further approved an amendment to the Company's Amended and Restated 2000 Plan providing for an additional 1,000,000 shares of the Company's common stock that may be available for future grants under the plan.

All service-based options granted have 10-year terms and, from the date of grant, vest annually and become fully exercisable after a maximum of five years. Performance-based options granted have 10-year terms and vest and become fully exercisable when determinable performance targets are achieved. Performance targets are agreed to, and approved by, the Company's board of directors.

Under the Company's stock option plans, options may be granted to purchase shares of the Company's common stock exercisable at prices generally equal to or above the fair market value on the date of the grant.

On December 21, 2010, upon the unanimous recommendation of the Compensation Committee, the Board of Directors approved the grant of performance-based stock options to certain employees of the Company. Accordingly, the Company entered into stock option agreements dated as of December 21, 2010, pursuant to which certain employees of the Company were awarded options to purchase collectively up to 300,000 shares of the Company's common stock at an exercise price of \$0.78 per share, representing a 5% premium over the closing price of the Company's common stock reported on the NYSE Amex on December 21, 2010, the date of grant.

On November 8, 2010, upon the unanimous recommendation of the Compensation Committee, the Board of Directors approved the grant of performance-based stock options to the Company's Acting Chief Financial Officer (Acting CFO). Accordingly, the Company entered into stock option agreements dated as of November 8, 2010, pursuant to which the Company's Acting CFO was awarded options to purchase up to 50,000 shares of the Company's common stock at an exercise price of \$0.75 per share, representing a 5% premium over the closing price of the Company's common stock reported on the NYSE Amex (formerly the American Stock Exchange) on November 8, 2010, the date of grant.

On April 15, 2010, upon the unanimous recommendation of the Compensation Committee, the Board of Directors approved the grant of performance-based stock options to the Company's Vice President of Global Sales and Marketing. Accordingly, the Company entered into stock option agreements dated as of April 15, 2010, pursuant to which the Company's executive was awarded options to purchase up to 300,000 shares of the Company's common stock at an exercise price of \$0.96 per share, representing a 5% premium over the average closing bid and asked prices of the Company's common stock for the five trading days previous to the date of grant, as reported on the NYSE Amex.

On November 24, 2009, upon the unanimous recommendation of the Compensation Committee, the Board of Directors approved the grant of performance-based stock options to the Company's Chief Executive Officer (CEO). Accordingly, the Company entered into stock option agreements dated as of November 24, 2009, pursuant to which the Company's CEO was awarded options to purchase up to 500,000 shares of the Company's common stock at an exercise price of \$0.78 per share, representing a 5% premium over the closing price of the Company's common stock reported on the NYSE Amex on November 24, 2009, the date of grant.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 7 - SHAREHOLDERS' EQUITY (Continued):

Under the terms of the performance-based stock option agreements, provided the employee remains in the continuous service of the Company at such times, the options will fully vest and become exercisable upon the earlier to occur of (a) the date on which the Board shall have determined that specific revenue and operating income targets have been met or (b) the date on which a Change-of-Control (as defined in the option agreements) of the Company is consummated, provided that all consideration in exchange therefore to which the employee may become entitled as a result of such Change-of-Control of the Company shall not be delivered to the employee until the earlier of (i) the date on which the employee's employment with the Company is Involuntarily Terminated (as defined in the option agreements) following the consummation of such Change-of-Control or (ii) the date that is six months next following the date on which such Change-of-Control is consummated. The Company has not incurred expense relating to these performance-based options as, at December 31, 2010, it is more likely than not that the performance targets will not be achieved.

A summary of combined service and performance-based stock option activity, and related information for the years ended December 31, follows:

	Options	Weighted Average Exercise Price
Outstanding, December 31, 2008	3,336,967	2.25
Granted	500,000	0.78
Exercised		
Forfeited/Expired	(1,528,000)	2.07
Canceled		
Outstanding, December 31, 2009	2,308,967	2.05
Granted	650,000	0.86
Exercised		
Forfeited/Expired	(445,300)	2.36
Canceled		
Outstanding, December 31, 2010	2,513,667	1.68

Options exercisable:

December 31, 2009	1,337,467	2.52
December 31, 2010	1,082,917	2.58

The options outstanding and exercisable as of December 31, 2010 are summarized as follows:

Range of exercise prices	Weighted average exercise price	Options Outstanding	Options Exercisable	Weighted average remaining life
\$0.75 - \$1.42	\$ 0.74	1,370,000		9.1 years
\$1.69 - \$2.25	\$ 1.92	50,000	50,000	1.9 years
\$2.28 - \$3.13	\$ 2.63	1,093,667	1,032,917	4.0 years

<u>2,513,667</u>	<u>1,082,917</u>
------------------	------------------

As of December 31, 2010, the unearned compensation related to Company granted service-based incentive stock options is \$52,004 which will continue to be amortized over the next year. The fair value, and unamortized amount, of performance-based options granted by the Company as of December 31, 2010 is \$836,959. This unearned compensation will not be recognized until the performance conditions described above are considered by management to be achievable.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 7 - SHAREHOLDERS' EQUITY (Continued):

The fair value of performance-based options awarded during 2010 was estimated on the date of grant using the Black-Scholes option-pricing model and included the following range of assumptions; dividend yield of 0%, risk-free interest rates of 1.13% to 2.57%, and expected option lives of 4 years. Volatility assumption was 118%. The forfeiture rate was assumed to be 0%. For 2009, the fair value of options awarded was also estimated on the date of grant using the Black-Scholes option-pricing model and included the following range of assumptions; dividend yield of 0%, risk-free interest rate of 2.15%, and expected option lives of 4 years. Volatility assumption was 113%. The forfeiture rate was assumed to be 0%.

The per share weighted average fair value of performance-based options granted in the years 2010 and 2009 were \$0.60 and \$0.58, respectively.

On June 8, 2010, the Company granted 40,000 shares of restricted common stock to select members of its board of directors. The shares were granted at the June 8th closing market price of \$0.84 per share and will vest on the date of the Company's next annual shareholders meeting, a vesting period of approximately one year. The total compensation expense to be recognized over the vesting period will be \$33,600 of which \$16,800 has been realized in 2010.

NOTE 8 - OPERATIONAL INFORMATION AND EXPORT SALES:

Sales:

The Company and its subsidiaries develop and manufacture various types of electronic test equipment and are aggregated into a single operating segment based on similar economic characteristics, products, services, customers, U.S. Government regulatory requirements, manufacturing processes and distribution channels.

For the years ended December 31, 2010 and 2009, no customer accounted for more than 5% and 7% of total sales, respectively.

In addition to its in-house sales staff, the Company uses various manufacturers' representatives to sell its products. For the years ended December 31, 2010 and 2009, no representative accounted for more than 10% of total sales.

Regional Sales:

The Company, in accordance with ASC 280, "Disclosures about Segments of an Enterprise and Related Information", has disclosed the following segment information:

	For the Twelve Months Ended December 31,	
<u>Revenues</u> <u>from</u> <u>continuing</u> <u>operations by</u> <u>Region</u>	2010	2009
Americas	\$ 17,027,598	\$ 15,633,581
Europe, Middle East, Africa (EMEA)	4,932,729	5,072,513
Asia Pacific (APAC)	2,603,899	2,122,234
	<u>\$ 24,564,226</u>	<u>\$ 22,828,328</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 8 - OPERATIONAL INFORMATION AND EXPORT SALES (Continued):

Net sales are attributable to a geographic area based on the destination of the product shipment. The majority of shipments in the Americas are to customers located within the United States. For the years ended December 31, 2010 and 2009, sales in the United States amounted to \$15,999,539 and \$14,686,491, respectively. Shipments to the remaining regions presented above were largely concentrated in Germany (EMEA) and China (APAC). For the years ended December 31, 2010 and 2009, sales to Germany amounted to \$1,006,454, or 20% of all shipments to the EMEA region, and \$1,077,772, or 21% of all shipments to the EMEA region, respectively. Sales to China, for the years ended December 31, 2010 and 2009, amounted to \$1,508,282, or 58% of all shipments to the APAC region, and \$1,154,850, or 54% of all shipments to the APAC region, respectively. There were no other shipments significantly concentrated in one country.

Purchases

In 2010 and 2009, no third-party supplier accounted for more than 8% and 6% of the Company's total inventory purchases, respectively.

NOTE 9 - RETIREMENT PLANS:

The Company has a 401(k) profit sharing plan covering all eligible U.S. employees. Company contributions to the plan for the years ended December 31, 2010 and 2009 aggregated \$297,308 and \$313,298, respectively.

The Company also maintained a non-contributory, defined benefit pension plan covering 15 active and 30 former employees of its German subsidiary. As a result of the May 7, 2010 sale of certain assets and liabilities of Willtek, the Company is no longer obligated to maintain such defined benefit plan as the ongoing responsibility was assumed by the buyer.

NOTE 10 - INCOME TAXES:

The components of income tax expense (benefit) related to income from continuing operations are as follows:

	Year Ended December 31,	
	2010	2009
Current:		
Federal	\$ 461,845	\$ (2,351,789)
State	115,170	283,627
Deferred:		
Federal	(568,552)	(3,395,964)
State	(100,333)	(902,725)
	<u>\$ (91,870)</u>	<u>\$ (6,366,851)</u>

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 10 - INCOME TAXES (Continued):

The following is a reconciliation of the maximum statutory federal tax rate to the Company's effective tax relative to continuing operations:

	Year Ended December 31,	
	2010	2009
	% of Pre Tax Earnings	% of Pre Tax Earnings
Statutory federal income tax rate	34.0%	(34.0)%
Change in valuation allowance on deferred taxes	(30.0)	
Investment in foreign subsidiary	(64.2)	(736.8)
State income tax net of federal tax benefit	12.5	39.6
Income tax recoverable adjustment	33.2	
Permanent differences	(8.0)	11.9
Over/under accruals	3.2	
Other	9.3	17.0
	(10.0)%	(702.3)%

In 2010 and 2009, the difference between the statutory and the effective tax rate is due mainly to the disposition of Willtek.

The components of deferred income taxes are as follows:

	December 31,	
	2010	2009
Deferred tax assets:		
Uniform capitalization of inventory costs for tax purposes	\$ 185,024	\$ 185,322
Allowances for doubtful accounts	29,528	62,069
Accruals	242,663	216,800
Tax effect of goodwill	(116,228)	(13,524)
Book depreciation over tax	23,494	(7,644)
Net operating loss carryforward	18,709,159	18,572,869
	19,073,640	19,015,892
Valuation allowance for deferred tax assets	(13,380,250)	(13,991,388)
	\$ 5,693,390	\$ 5,024,504

The Company has a domestic net operating loss carryforward at December 31, 2010 of approximately \$29,200,000 which expires in 2029. The Company also has a foreign net operating loss carryforward at December 31, 2010 of approximately \$23,400,000 which has no expiration.

As a result of the disposition of the assets of Willtek (see Note 2), the Company benefited from a tax deduction on its 2009 tax return equal to its outside basis in its investment in, and advances to, Willtek. Accordingly, the Company realized a tax benefit, net of valuation allowance, of approximately \$6,400,000 in 2009. Earnings per share of \$0.21 from continuing operations in 2009, includes \$0.25 per share relating to this tax benefit.

Realization of the Company's deferred tax assets is dependent upon the Company generating sufficient taxable income in the appropriate tax jurisdictions in future years to obtain benefit from the reversal of net deductible temporary differences and from utilization of net operating losses and tax credit carryforwards. The Company has recorded a valuation allowance due to the uncertainty related to the realization of certain deferred tax assets existing at December 31, 2010. The amount of deferred tax assets considered realizable is subject to adjustment in future periods if estimates of future taxable income are changed. Management believes that it is more likely than not that the Company will realize the benefits of its deferred tax assets, net of valuation allowances as of December 31, 2010.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 10 - INCOME TAXES (Continued):

The Company files income tax returns in the U.S. (federal and various states), German and French taxing jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal and state tax examinations in its major tax jurisdictions for periods before 2006.

The Company does not have any significant unrecognized tax benefits and does not anticipate significant increase or decrease in unrecognized tax benefits within the next twelve months. Amounts recognized for income tax related interest and penalties as a component of the provision for income taxes are immaterial for the years ended December 31, 2010 and 2009.

NOTE 11 - COMMITMENTS AND CONTINGENCIES:

Warranties:

The Company typically provides one-year warranties on all of its products covering both parts and labor. The Company, at its option, repairs or replaces products that are defective during the warranty period if the proper preventive maintenance procedures have been followed by its customers. Historically, warranty expense within the Company has been minimal. In 2009, there was a onetime increase of \$240,000 in warranty costs due to the potential rework of specific product shipped in 2008. This product is no longer being produced at original specifications and this amount represents the maximum potential warranty related to these shipments.

Leases:

The Company leases a 45,700 square foot facility located in Hanover Township, Parsippany, New Jersey, which is currently being used as its principal corporate headquarters and manufacturing plant. The term of the lease agreement is for ten years beginning on October 1, 2001 and ending September 30, 2011 and can be renewed at the tenants option for one five-year period at fair market value to be determined at term expiration.

The Company is also responsible for its proportionate share of the cost of utilities, repairs, taxes, and insurance. The future minimum lease payments are aligned with the lease expiration date of September 30, 2011. The future minimum lease payments through this period are \$335,133.

Additionally, the Company leased a 36,000 square foot facility located in Ismaning, Germany, which was being used as Willtek's headquarters and manufacturing plant. Due to the May 7, 2010 sale of Willtek, the lease was assumed by the buyer and is no longer an obligation of the Company.

Rent expense included in continuing operations for the years ended December 31, 2010 and 2009 was \$535,194 and \$533,905, respectively.

The Company owns a 44,000 square foot facility located in Mahwah, New Jersey which is leased to an unrelated third party. This lease, which terminates in 2013, provides for annual rental income of \$385,991 throughout the lease term. The current tenant has an exclusive option to purchase the property, at a predetermined purchase price of approximately \$3,500,000, up through August 1, 2012.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 11 - COMMITMENTS AND CONTINGENCIES (Continued):

The Company leases certain equipment under operating lease arrangements. These operating leases expire in various years through 2015. All leases may be renewed at the end of their respective leasing periods. Future payments relative to continuing operations consist of the following at December 31, 2010:

2011	\$ 75,514
2012	74,267
2013	74,267
2014	74,267
2015	55,700
	<hr/>
	\$ 354,015
	<hr/>

Environmental Contingencies:

Following an investigation by the New Jersey Department of Environmental Protection (NJDEP) in 1982, of the waste disposal practices at a certain site formerly leased by Boonton, the Company put a ground water management plan into effect as approved by the NJDEP. Costs associated with this site are charged directly to income as incurred. The owner of this site has previously notified the Company that if the NJDEP investigation proves to have interfered with a sale of the property, the owner may seek to hold the Company liable for any resulting damages. Since May 1983, the owner has been on notice of this problem and has failed to institute any legal proceedings with respect thereto. While this does not bar the owner from instituting a suit, it is the opinion of the Company's legal counsel that it is unlikely that the owner would prevail on any claim.

Costs charged to operations in connection with the water management plan amounted to approximately \$50,000 and \$70,000 for the years ended December 31, 2010 and 2009, respectively. The Company estimates that expenditures in this regard, including the costs of operating the wells and analyzing soil and water samples, will continue until the NJDEP determines that testing is complete. Recently, the Company has hired a new environmental consultant to evaluate the results of the current remediation plan that has been in effect since 1982. The Company is diligently pursuing efforts to satisfy the requirements of the original plan and receive a new determination from the NJDEP. While management anticipates that the expenditures in connection with this site will not be substantial in future years, the Company could be subject to significant future liabilities and may incur significant future expenditures if further contaminants from Boonton's testing are identified and the NJDEP requires additional remediation activities. Management is unable to estimate future remediation costs, if any, at this time. The Company will continue to be liable under the plan, in all future years, until such time as the NJDEP releases it from all obligations applicable thereto.

Software license:

In September 2010, the Company entered into a software license and support agreement with an accounting and business software supplier as part of an investment to upgrade the Company's business and systems infrastructure. The costs associated with the systems migration are expected not to exceed \$350,000.

Line of Credit:

In September 2009, the Company secured a line of credit with its investment bank. The credit facility provides borrowing availability of up to 100% of the Company's money market account balance and 99% of the Company's short-term investment securities (U.S. Treasury bills) and, under the terms and conditions of the loan agreement, is fully secured by said money fund account and short-term investment holdings. Advances under the facility will bear interest at a variable rate equal to the London InterBank Offered Rate (LIBOR) in effect at time of borrowing. Additionally, under the terms and conditions of the loan agreement, there is no annual fee and any amount outstanding under the loan facility may be paid at any time in whole or in part.

without penalty.

F 24

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Wireless Telecom Group, Inc.

NOTE 11 - COMMITMENTS AND CONTINGENCIES (Continued):

As of December 31, 2010, the Company had no borrowings outstanding under the facility and approximately \$6,000,000 of borrowing availability. The Company has no current plans to borrow from this credit facility as it believes cash generated from operations will adequately meet near-term working capital requirements.

Risks and Uncertainties:

Proprietary information and know-how are important to the Company's commercial success. There can be no assurance that others will not either develop independently the same or similar information or obtain and use proprietary information of the Company. Certain key employees have signed confidentiality and non-compete agreements regarding the Company's proprietary information.

The Company believes that its products do not infringe the proprietary rights of third parties. There can be no assurance, however, that third parties will not assert infringement claims in the future.

NOTE 12 - SELECTED QUARTERLY FINANCIAL DATA (UNAUDITED):

The following is a summary of selected quarterly financial data from continuing operations (in thousands, except per share amounts).

2010	Quarter			
	1 st	2 nd	3 rd	4 th
Net sales	\$ 6,137	\$ 6,081	\$ 5,710	\$ 6,636
Gross profit	2,803	2,956	2,696	3,100
Operating income (loss)	312	321	(40)	213
Net income from continuing operations	320	298	39	358

Net income (loss) from continuing operations	(223)	(198)	(18)	5,912
Diluted net income (loss) per share from continuing operations	\$ (.01)	\$ (.01)	\$ (.00)	\$.23

NOTE 13 - SUBSEQUENT EVENTS:

On January 2, 2011, the Company closed on an agreement, entered into during the fourth quarter of 2010, to repurchase 692,917 shares of its common stock for a price of \$0.66 per share, or an aggregate price of \$457,325. The number of shares repurchased represents 2.7% of the Company's outstanding common stock. In 2008, the Company's Board of Directors authorized the repurchase of up to 5% of the Company's outstanding common stock. Although the Company does not expect to repurchase

Edgar Filing: WIRELESS TELECOM GROUP INC - Form 10-K

additional shares in the near-future, the authorized repurchase program does not have an expiration date.

On March 22, 2011, the Company's Board of Directors appointed its current Senior Vice President of Global Sales and Marketing to serve as an officer of the Company.

Additionally, on March 22, 2011, the Company's Board of Directors approved the granting of 50,000 shares of restricted stock to the Company's Chief Executive Officer. The shares will vest over a one-year period.
