Item 5. Other Events

On December 20, 2001, ONEOK, Inc. announced it has revised its earnings guidance. Net income excluding the effect of the Oklahoma Corporation Commission (OCC) charge is estimated to be in the range of \$1.20 per diluted share of common stock. This revision in guidance is prompted primarily by lower commodity prices and margins coming from the company's natural gas gathering and processing segment and the impact of warmer-than-normal weather on energy prices and the distribution segment. Net income is estimated to be in the range of \$1.02 per diluted share of common stock including the impact of the OCC charge.

In addition, ONEOK, Inc. updated its exposure to Enron. ONEOK had

previously announced the company's estimated exposure to Enron to be less than \$40 million. ONEOK has not received payment from Enron on \$14 million of November and December 2001 commodity transactions that were to settle in late November and early December 2001. Enron's filing of the voluntary bankruptcy proceeding may also have created an event of technical default related to various financing leases tied to ONEOK's Bushton gas processing plant. Enron is one of three guarantors of these Busthon plant leases. However, ONEOK is the primary guarantor and will continue to make all payments due under the leases. ONEOK has notified the lessor and indenture trustee under the leases of the potential technical default.
