

TALK AMERICA HOLDINGS INC  
Form 10-Q  
November 09, 2004

**SECURITIES AND EXCHANGE COMMISSION**  
Washington, D.C. 20549

---

**FORM 10-Q**

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934**

**For the quarterly period ended September 30, 2004**

**OR**

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE  
SECURITIES EXCHANGE ACT OF 1934**

**For the transition period from \_\_\_\_\_ to \_\_\_\_\_**

**Commission file number 000 - 26728**

**Talk America Holdings, Inc.**

(Exact name of registrant as specified in its charter)

**Delaware**  
(State of incorporation)

**23-2827736**  
(I.R.S. Employer Identification No.)

**12020 Sunrise Valley Drive, Suite 250, Reston, Virginia**  
(Address of principal executive offices)

**20191**  
(Zip Code)

**(703) 391-7500**  
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes  No

Indicate by check mark whether the registrant is an accelerated filer (as defined in Rule 12b-2 of the Act).

Yes  No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practicable date.

26,978,275 shares of Common Stock, par value of \$0.01 per share, were issued and outstanding as of November 2, 2004.

---

**TALK AMERICA HOLDINGS, INC. AND SUBSIDIARIES**  
**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS**  
**(Unaudited)**

**NOTE 1. ACCOUNTING POLICIES**

**(a) Basis of Financial Statements Presentation**

The consolidated financial statements include the accounts of Talk America Holdings, Inc. and its wholly-owned subsidiaries (collectively, "Talk America," "we," "our" and "us"). All intercompany balances and transactions have been eliminated.

The consolidated financial statements and related notes thereto as of September 30, 2004 and for the three and nine months ended September 30, 2004 and September 30, 2003 are presented as unaudited, but in the opinion of management include all adjustments necessary to present fairly the information set forth therein. The consolidated balance sheet information for December 31, 2003 was derived from the audited financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2003, filed March 12, 2004, as amended by our Form 10-K/A filed May 7, 2004. These interim financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2003, as amended by our Form 10-K/A. The interim results are not necessarily indicative of the results for any future periods. Certain prior year amounts have been reclassified for comparative purposes.

**(b) Risks and Uncertainties**

Future results of operations involve a number of risks and uncertainties. Factors that would likely negatively affect future operating results and cash flows and cause actual results to vary materially from historical results include, but are not limited to:

- Dependence on the availability and functionality of the networks of the incumbent local telephone carriers as they relate to the unbundled network element platform.
- Outcomes unfavorable to us of the FCC's rule-making process and of pending litigation with regard to the availability and pricing of various network elements and bundles thereof.
- Additional changes in government policy, regulation and enforcement or adverse judicial or administrative interpretations and rulings or legislative action relating to regulations, enforcement and pricing.
- Increased price competition in telecommunication services, including bundled services of local and long distance.
- Unanticipated delays, costs and technical difficulties in developing, deploying and operating our own local networking capability, including our potential inability to acquire and successfully utilize certain of those technologies that will permit us to reduce our reliance on the incumbent local telephone companies and profitably provide local telephone service through new methods of delivery.

Further negative developments in these areas would likely have a material adverse effect on our business prospects, financial condition and results of operations. See "Other Matters."

## NOTE 2. DEBT AND CAPITAL LEASE OBLIGATIONS

The following is a summary of our debt and capital lease obligations (in thousands):

	September 30, 2004	December 31, 2003
12% Senior Subordinated Notes Due 2007	\$ --	\$ 40,730
8% Convertible Senior Subordinated Notes Due 2007 (1)	--	3,778
5% Convertible Subordinated Notes Due 2004	670	670
Other, primarily vendor-financed computer software	2,401	--
Capital lease obligations	2,469	3,419
Total long-term debt and capital lease obligations	5,540	48,597
Less: current maturities	3,188	16,806
Total long-term debt and capital lease obligations, excluding current maturities	\$ 2,352	\$ 31,791

(1) Includes future accrued interest of \$1.0 million as of December 31, 2003.

### (a) 12% Senior Subordinated Notes Due 2007 and 8% Convertible Senior Subordinated Notes Due 2007

On August 23, 2004, we redeemed the remaining principal amounts of our 12% Senior Subordinated Notes and our 8% Convertible Senior Subordinated Notes. The redemption of the 8% Convertible Senior Subordinated Notes prior to maturity resulted in recording \$0.8 million of future accrued interest benefit as an offset to interest expense.

### (b) 5% Convertible Subordinated Notes Due 2004

As of September 30, 2004, we had \$0.7 million principal amount outstanding of our 5% Convertible Subordinated Notes that mature on December 15, 2004. The notes are convertible, at the option of the holder, at a conversion price of \$76.14 per share. The 5% Convertible Subordinated Notes are redeemable, in whole or in part at our option, at 100.71% of par.

### (c) Other

In 2004, we entered into a vendor-financed computer software purchase agreement for upgrades to our database management systems. Approximately \$2.4 million was outstanding under this agreement at September 30, 2004. Total assets under this purchase agreement are approximately \$2.9 million as of September 30, 2004, consisting of a perpetual software license agreement of approximately \$2.5 million and a one-year vendor maintenance agreement of approximately \$0.4 million. The agreement is repayable in 12 quarterly installments through March 2007, which includes interest based on an annual percentage rate of approximately 3% and annual maintenance agreement

renewals.

**(d) Capital Leases**

During 2003, we entered into a non-cancelable capital lease agreement for upgrades to our customer data storage equipment. Total debt of approximately \$2.5 million and \$3.4 million was outstanding under this agreement at September 30, 2004 and December 31, 2003, respectively. Total assets, net of accumulated depreciation, under this lease agreement are approximately \$2.8 million and \$3.4 million as of September 30, 2004 and December 31, 2003, respectively. The lease is repayable in monthly installments through December 2006, which includes interest based on an annual percentage rate of approximately 2%.

**NOTE 3. COMMITMENTS AND CONTINGENCIES**

We are party to a number of legal actions and proceedings arising from our provision and marketing of telecommunications services (including matters involving do not call regulations), as well as certain legal actions and regulatory matters arising in the ordinary course of business. During the first quarter of 2003, we were made aware that AOL agreed to settle a class action case for approximately \$10 million; the claims in the case allegedly relate to marketing activities conducted pursuant to the former telecommunications marketing agreement, between us and AOL. At the time of the settlement agreement, AOL asserted that we are required to indemnify AOL in this matter under the terms of the marketing agreement and advised that it will seek such indemnification from us. We believe that we do not have an obligation to indemnify AOL in this matter and that any claim by AOL for this indemnification would be without merit. We have received no further information regarding this matter and it is our intention, if AOL initiates a claim for indemnification under the marketing agreement, to defend against the claim vigorously. We believe that the ultimate outcome of the foregoing actions will not result in a liability that would have a material adverse effect on our financial condition or results of operations.

In December 2003, we entered into a new four-year master carrier agreement with AT&T. The agreement provides us with a variety of services, including transmission facilities to connect our network switches as well as services for international calls, local traffic, international calling cards, overflow traffic and operator assisted calls. The agreement also provides that, subject to certain terms and conditions, we will purchase these services exclusively from AT&T during the term of the agreement, provided, however, that we are not obligated to purchase exclusively in certain cases, including if such purchases would result in a breach of any contract with another carrier that was in place when we entered into the AT&T agreement, or if vendor diversity is required. Certain of our network service agreements, including the AT&T agreement, contain certain minimum usage commitments. Our contract with AT&T establishes pricing and provides for annual minimum commitments based upon usage as follows: 2004 - \$25 million, 2005 - \$32 million, 2006 - \$32 million and 2007 - \$32 million and obligates us to pay 65 percent of the revenue shortfall, if any. A separate contract with a different vendor establishes pricing and provides for annual minimum payments for 2004 of \$3.0 million. While we anticipate that we will not be required to make any shortfall payments under these contracts as a result of the restructuring of these obligations, there can be no assurances that we will be successful in our efforts. To the extent that we are unable to meet these minimum commitments, our costs of purchasing the services under the agreement will correspondingly increase.

**NOTE 4. STOCK-BASED COMPENSATION**

We account for our stock option awards under the intrinsic value based method of accounting prescribed by APB Opinion No. 25, "Accounting for Stock Issued to Employees," and related interpretations, including FASB Interpretation No. 44 "Accounting for Certain Transactions Including Stock Compensation," an interpretation of APB Opinion No. 25. Under the intrinsic value based method, compensation cost is the excess, if any, of the quoted market price of the stock at grant date or other measurement date over the amount an employee must pay to acquire the stock. We make pro forma disclosures of net income and earnings per share as if the fair value based method of accounting had been applied as required by SFAS No. 123, "Accounting for Stock-Based Compensation" and SFAS 148, "Accounting for Stock-Based Compensation - Transition and Disclosure - an amendment of SFAS 123." The following disclosure complies with the adoption of this statement and includes pro forma net income as if the fair value based method of accounting had been applied (in thousands except for per share data):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net income as reported	\$ 9,147	\$ 51,566	\$ 26,051	\$ 71,367
Add: Stock-based employee compensation expense included in reported net income	--	--	9	--
Deduct: Total stock-based employee compensation expense determined under fair value based method for all options	1,467	304	4,428	867
Pro forma net income	\$ 7,680	\$ 51,262	\$ 21,632	\$ 70,500

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
<b>Basic earnings per share:</b>				
As reported	\$ 0.34	\$ 1.96	\$ 0.97	\$ 2.71
Pro forma	\$ 0.28	\$ 1.94	\$ 0.81	\$ 2.68
<b>Diluted earnings per share:</b>				
As reported	\$ 0.32	\$ 1.74	\$ 0.91	\$ 2.45
Pro forma	\$ 0.28	\$ 1.75	\$ 0.77	\$ 2.46

For purposes of pro forma disclosures under SFAS 123, the estimated fair value of the options is assumed to be amortized to expense over the options' vesting period. The fair value of the options granted has been estimated at the various dates of the grants using the Black-Scholes option-pricing model with the following assumptions:

- Fair market value based on our closing common stock price on the date the option is granted;
- Risk-free interest rate based on the weighted averaged 5 year U.S. treasury note strip rates;

- Volatility based on the historical stock price over the expected term (5 years);
- No expected dividend yield based on future dividend payment plans.

**NOTE 5. PER SHARE DATA**

Basic earnings per common share for a fiscal period is calculated by dividing net income by the weighted average number of common shares outstanding during the fiscal period. Diluted earnings per common share is calculated by adjusting the weighted average number of common shares outstanding and the net income during the fiscal period for the assumed conversion of all potentially dilutive stock options, warrants and convertible bonds (and assuming that the proceeds hypothetically received from the exercise of dilutive stock options are used to repurchase our common stock at the average share price during the fiscal period). For the diluted earnings calculation, we also adjust the net income by the interest expense on the convertible bonds assumed to be converted. Income per share is computed as follows (in thousands except per share data):

8

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Net income used to compute basic earnings per share	\$ 9,147	\$ 51,566	\$ 26,051	\$ 71,367
Interest expense on convertible bonds, net of tax affect (See Note 2 (a))	--	152	--	455
Net income used to compute diluted earnings per share	\$ 9,147	\$ 51,718	\$ 26,051	\$ 71,822
Average shares of common stock outstanding used to compute basic earnings per share	26,974	26,367	26,799	26,325
Additional common shares to be issued assuming exercise of stock options and warrants (net of shares assumed reacquired) and conversion of convertible bonds *	1,238	3,394	1,683	3,012
Average shares of common and common equivalent stock outstanding used to compute diluted earnings per share	28,212	29,761	28,482	29,337
Income per share - Basic:				
Net income per share	\$ 0.34	\$ 1.96	\$ 0.97	\$ 2.71
Weighted average common shares	26,974	26,367	26,799	26,325
Income per share - Diluted:				

Net income per share	\$	0.32	\$	1.74	\$	0.91	\$	2.45
Weighted average common and common equivalent shares outstanding		28,212		29,761		28,482		29,337

\* The diluted share basis for both the three and nine months ended September 30, 2004 and 2003, respectively, excludes 9 shares, respectively, associated with certain convertible bonds due to their antidilutive effect. The diluted share basis for the three months ended September 30, 2004 and 2003 excludes 3,400 and 1,204 shares, respectively, and for the nine months ended September 30, 2004 and 2003 excludes 2,933 and 1,288 shares, respectively, associated with the options and warrants due to their antidilutive effect.

## Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in conjunction with our Consolidated Financial Statements included elsewhere in this Form 10-Q and in our Annual Report on Form 10-K filed March 12, 2004, as amended by our Form 10-K/A filed May 7, 2004 and any subsequent filings. Certain of the statements contained herein may be considered "forward-looking statements" for purposes of the securities laws. From time to time, oral or written forward-looking statements may also be included in other materials released to the public. These forward-looking statements are intended to provide our management's current expectations or plans for our future operating and financial performance, based on our current expectations and assumptions currently believed to be valid. For these statements, we claim protection of the safe harbor for forward-looking statements provided by the Private Securities Litigation Reform Act of 1995. These forward-looking statements can be identified by the use of forward-looking words or phrases, including, but not limited to, "believes," "estimates," "expects," "expected," "anticipates," "anticipated," "plans," "strategy," "target," "prospects" and other words of similar meaning in connection with a discussion of future operating or financial performance. Although we believe that the expectations reflected in such forward-looking statements are reasonable, there can be no assurance that such expectations will prove to have been correct.

---

All forward-looking statements involve risks and uncertainties that may cause our actual results to differ materially from those expressed or implied in the forward-looking statements. In addition to those factors discussed in this Form 10-Q Report, you should see our other reports on Forms 10-K, 10-Q and 8-K filed with the Securities and Exchange Commission from time to time for information identifying factors that may cause actual results to differ materially from those expressed or implied in the forward-looking statements.

## OVERVIEW

We offer a bundle of local and long distance phone services to residential and small business customers in the United States. We have built a large, profitable base of bundled phone service customers using the wholesale operating platforms of the incumbent local telephone companies and plan to migrate customers to our own networking platform, where feasible, and further increase our revenues and profitability by offering new products and services to these customers. As a result of significant changes to the FCC rules that require incumbent local telephone companies to provide unbundled network elements to us (discussed under "Other Matters," below), the wholesale rates that we are charged in order to provide our services will most likely increase significantly in 2005 and over time. These cost increases will likely lead to increases in our product pricing and inhibit our ability to add new customers. The FCC has established interim rules that make unbundled network elements available to us on a grandfathered basis until March 2005 and we currently plan to continue to market our services and to build our base of bundled customers through

such date. However, in the event that either the FCC's final rules provide for an earlier date where our pricing from the incumbent local telephone companies significantly increases, as contemplated in the interim rules, or we have knowledge regarding such an increase in price, we expect to reduce our efforts to increase subscriber growth and focus on markets with potential for networking, as described below.

An integral element of our current business strategy is to develop our own local networking capability. Local networking would enhance our operating flexibility and provide us with an alternative to the wholesale operating platforms of the incumbent local telephone companies. Beginning in 2003, we deployed networking assets in Michigan and, as of September 30, 2004, we had approximately 10,000 bundled lines on our Michigan network. We are continuing the expansion of our network by colocating our networking equipment in the incumbent local telephone companies' end offices to provide service over our own network to a larger existing customer base in geographic regions where we have a high density of customers. As a result of the significant changes in the regulatory environment, we have accelerated our networking initiatives and by the end of 2005 we expect to have 150,000 bundled lines on our network in Michigan, although some of the regulatory changes could also impede this deployment (discussed under "Other Matters," below). We also continue to automate the business processes required to provide local network-based services. In addition, we are actively exploring next generation networking opportunities with a variety of vendors in order to decrease our cost of delivering service, reduce our reliance upon the incumbent local telephone companies and provide local telephone services through new, innovative methods of delivery. However, we have not previously developed, deployed or operated a local network of our own and of this scale and there can be no assurance that we shall be able successfully to do so and thereafter profitably provide local telephone services through such a network.

We will continue to add new services and enhance our existing service and product offerings, as available. We believe that the addition of these new services and of enhanced services will increase our revenues and gross margins from our customers while also meeting the needs and demands of our customers and reducing our customer turnover. We launched a new dial-up internet service in June 2004, and began testing digital subscriber line, or DSL, service in the third quarter 2004.

## RESULTS OF OPERATIONS

The following table sets forth for the periods indicated certain of our financial data as a percentage of revenue:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Revenue	100.0%	100.0%	100.0%	100.0%
Costs and expenses:				
Network and line costs	50.0	46.1	49.3	47.3
General and administrative expenses	13.2	14.2	13.6	14.1
Provision for doubtful accounts	4.8	3.4	4.1	3.0
Sales and marketing expenses	16.0	14.2	16.2	12.5
Depreciation and amortization	4.5	4.5	4.6	4.7
Total costs and expenses	88.5	82.4	87.8	81.6

Edgar Filing: TALK AMERICA HOLDINGS INC - Form 10-Q

Operating income	11.5	17.6	12.2	18.4
Other income (expense):				
Interest income	--	--	0.1	0.1
Interest expense	0.5	(1.5)	(0.2)	(2.2)
Other, net	--	--	--	0.9
Income before income taxes	12.0	16.1	12.1	17.2
Provision (benefit) for income taxes	4.4	(35.5)	4.5	(8.1)
Net income	7.6%	51.6%	7.6%	25.3%

The following table sets forth for certain items of our financial data for the periods indicated the percentage increase or (decrease) in such item from the prior year comparable fiscal period:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2004	2003	2004	2003
Revenue	20.6%	26.3%	22.5%	19.2%
Costs and expenses:				
Network and line costs	30.9	21.8	27.7	15.2
General and administrative expenses	11.9	19.1	18.5	(1.3)
Provision for doubtful accounts	66.3	57.3	64.2	(4.9)
Sales and marketing expenses	36.6	107.1	58.8	79.0
Depreciation and amortization	22.3	(3.5)	21.0	(2.6)
Total costs and expenses	29.6	29.9	31.8	16.0
Operating income	(21.3)	11.9	(19.1)	35.3
Other income (expense):				
Interest income	45.2	(86.0)	(39.5)	(30.1)
Interest expense	(136.0)	(39.3)	(88.5)	(12.6)
Other, net	(100.0)	103.8	(100.0)	367.8
Income before income taxes	(10.1)	20.4	(14.7)	57.0
Provision for income taxes	115.1	--	167.5	--
Net income	(82.3)%	285.5%	(63.5)%	130.8%

### THIRD QUARTER 2004 COMPARED TO THIRD QUARTER 2003

**Revenue.** The increase in revenue for the third quarter 2004 from the third quarter 2003 was due to an increase in bundled revenue offset by a decline in long distance revenue. During 2004, we have increased certain fees and rates related to our various telecommunications products and such changes in rates may adversely impact customer turnover.

Bundled revenue increased to \$105.2 million for the third quarter 2004 from \$72.4 million for the third quarter 2003 due to higher average bundled lines in 2004 as compared to 2003, partially offset by lower average monthly revenue per customer. We ended the third quarter 2004 with 683,000 billed bundled lines, compared to 495,000 at the end of the third quarter 2003 and 672,000 at the end of the second quarter 2004. Approximately 49% of the bundled lines at the end of the third quarter 2004 were in Michigan, compared to 64.8% at the end of the third quarter 2003, reflecting our continued efforts to market into other states. Should there be a significant increase in the costs we pay for network services from the incumbent local telephone carriers (see discussion in "Other Matters," below) we likely will have to (i) dramatically limit the marketing of new customers in some or all states, resulting in a decline in revenues in the future, and (ii) raise prices to customers resulting in our products being less attractively priced or less competitive when compared to the incumbents.

Our long distance revenue decreased for the third quarter 2004 to \$15.4 million from \$27.5 million for the third quarter 2003. Our decision in 2000 to invest in building a bundled customer base, together with customer turnover, contributed to the decline in the number of long distance customers and the amount of revenue, although the effect on 2004 and 2003 revenue of the decline in the number of customers was offset partially by an increase in average monthly revenue per customer due to price increases. We expect this decline in the number of long distance customers and the amount of revenues to continue.

Network and Line Costs. The increase of network and line costs for the third quarter 2004 from the third quarter 2003 is primarily due to the growth in customer lines. As a percentage of revenue, network and line costs were greater in the third quarter 2004 than the third quarter 2003 due to the shift in customer mix from the lower cost long distance product to the higher cost bundled product, as well as increases in network cost pricing and costs of unbundled network elements in certain states. Network and line costs as a percentage of revenue in the third quarter 2004 reflected the benefit of a net reduction in accruals for network and line costs of approximately \$2 million, primarily due to the expiration of backbilling periods and the favorable resolution of certain accrued expenses. Network and line costs exclude depreciation and amortization.

We seek to structure and price our products in order to maintain network and line costs as a percentage of revenue at certain targeted levels. While the control of the structure and pricing of our products assists us in mitigating risks of increases in network and line costs, the telecommunications industry is highly competitive and there can be no assurances that we will be able to effectively market these higher priced products. In addition, there are several factors that could cause our network and line costs as a percentage of revenue to increase in the future, including, without limitation:

- Determinations by the FCC, courts, or state commission(s) that make unbundled local switching and/or combinations of unbundled network elements effectively unavailable to us in some or all of our geographic service areas, requiring us to provide services in these areas through other means, including total service resale agreements with incumbent local telephone companies, purchase of special access services or network elements purchased from the Regional Bell Operating Companies at "just and reasonable" rates under Section 271 of the Act, in any case at significantly increased costs, or to provide services over our own switching facilities, if we are able to deploy them. The U.S. Court of Appeals for the District of Columbia, on March 2, 2004, issued an order that reversed the FCC's Triennial Review Order in part and remanded to the FCC with instructions to revise the Order in material ways that may make unbundled switching, other unbundled network elements and/or combinations of unbundled network elements effectively unavailable to us in some or all of our geographic service areas (see our discussion under "Liquidity and Capital Resources, Other Matters," below).
- Adverse changes to the current pricing methodology mandated by the FCC for use in establishing the prices charged to us by incumbent local telephone companies for the use of their unbundled network elements. The FCC's 2003 Triennial Review Order, which was reversed in part and remanded to the FCC with instructions to revise the Order in material ways, (see our discussion under "Liquidity and Capital Resources, Other Matters," below), clarified several aspects of these pricing principles related to depreciation, fill factors (i.e. network utilization) and cost of capital, which could enable incumbent local telephone companies to increase the prices for unbundled network elements. In addition, the FCC released a Notice of Proposed Rulemaking on December 15, 2003, which initiated a proceeding to consider making additional changes to its

unbundled network element pricing methodology, including reforms that would base prices more on the actual network costs incurred by incumbent local telephone companies than on the hypothetical network costs that would be incurred when the most efficient technology is used. These changes could result in material increases in prices charged to us for unbundled network elements.

12

---

- Determinations by state commissions to increase prices for unbundled network elements in ongoing state cost dockets.

Changes in the pricing of our service plans could also cause network and line costs as a percentage of revenue to change in the future. See our discussion under "Other Matters," below.

General and Administrative Expenses. General and administrative expenses increased for the third quarter 2004 from the third quarter 2003 primarily due to an increase in the number of employees for customer service, information technology and our local networking initiatives to support our expanding base of bundled customers. The increase was also attributable to a new operating lease for information technology equipment.

Provision for Doubtful Accounts. The provision for doubtful accounts as a percentage of total revenue increased for the third quarter 2004 from the third quarter 2003 due to reduced employee collection hours as a result of several hurricanes near our Florida customer service centers, changes in the states where we have customers and the decision to test new credit methodologies in an effort to expand addressable markets.

Sales and Marketing Expenses. The increase in sales and marketing expenses for the third quarter 2004 from the third quarter 2003 is attributable to increased levels of sales and marketing activity to continue our bundled line growth. In addition, the cost of acquiring a customer has also increased in 2004. Currently, substantially all of our sales and marketing expenses relate to the bundled product. We currently plan to continue to market our services and to build our base of bundled customers through March 2005 or until such time as we determine that our pricing from the incumbent local telephone companies significantly increase, at which point we expect to reduce our efforts to increase subscriber growth and to focus on markets with potential for networking. We also expect sales and marketing expense to decline in 2005 as we limit our customer growth efforts to markets in which we have or expect to have our own networking facilities.

Interest Expense. The decrease in interest expense for the third quarter 2004 from the third quarter 2003 is primarily attributable to the decrease in outstanding debt balances. Interest expense in the third quarter 2004 also included a benefit of \$0.8 million related to the redemption of the 8% Convertible Senior Subordinated Notes prior to maturity.

Depreciation and Amortization. The increase in depreciation and amortization for the third quarter 2004 from the third quarter 2003 is primarily attributable to depreciation on costs incurred in 2003 related to our deployment of networking assets (our local switch and colocation equipment) in Michigan, and amortization of capitalized software projects completed during 2003 primarily related to the development of customer relations management software.

Other Income, Net. Other income for the third quarter 2003 consists of gains from our repurchase of a portion of our 12% Senior Subordinated Notes at a discount to par.

Provision for Income Taxes. The effective tax rate for the third quarter 2004 was 36.9%. The effective tax rate is expected to be approximately 37.1% for fiscal 2004 and approximately 41% for fiscal 2005. As a result of the application of net operating loss carryforwards, we currently expect to pay accrued alternative minimum taxes and state income taxes; we expect net-operating losses will be fully utilized during 2006.

## **YEAR TO DATE 2004 COMPARED TO YEAR TO DATE 2003**

Revenue. The increase in revenue for the year to date 2004 from the year to date 2003 was due to an increase in bundled revenue offset by a decline in long distance revenue. During 2004, we increased certain fees and rates related to our long distance and bundled products and such changes in rates may adversely impact customer turnover.

Bundled revenue increased to \$296.0 million for the year to date 2004 from \$200.2 million for the year to date 2003 due to higher average bundled lines in 2004, as compared to 2003, partially offset by lower average monthly revenue per customer.

Our long distance revenue decreased for the year to date 2004 to \$48.8 million from \$81.3 million for the year to date 2003. Our decision in 2000 to invest in building a bundled customer base, together with customer turnover, contributed to the decline in the number of long distance customers and the amount of revenue, although the effect on 2004 and 2003 revenue of the decline in the number of customers was offset partially by an increase in average monthly revenue per customer due to price increases.

13

---

Network and Line Costs. The increase of network and line costs for the year to date 2004 from the year to date 2003 is primarily due to the growth in customer lines. As a percentage of revenue, network and line costs were greater in the year to date 2004 than the year to date 2003 due to the shift in customer mix from the lower cost long distance product to the higher cost bundled product, as well as increases in network cost pricing and costs of unbundled network elements in certain states. Network and line costs as a percentage of revenue in the year to date 2004 reflected the benefit of a net reduction in accruals for network and line costs of approximately \$1.0 million primarily due to the expiration of backbilling periods and the favorable resolution of certain accrued expenses. Network and line costs exclude depreciation and amortization.

General and Administrative Expenses. General and administrative expenses increased for the year to date 2004 from the year to date 2003 primarily due to an increase in the number of employees for customer service, information technology and our local networking initiatives to support our expanding base of bundled customers. The increase was also attributable to a new operating lease for information technology equipment.

Provision for Doubtful Accounts. The provision for doubtful accounts as a percentage of total revenue increased for the year to date 2004 from the year to date 2003 due to reduced employee collection hours as a result of several hurricanes near our Florida customer service centers, changes in the states where we have customers and the decision to test new credit methodologies in an effort to expand addressable markets.

Sales and Marketing Expenses. The increase in sales and marketing expenses for the year to date 2004 from the year to date 2003 is primarily attributable to increased levels of sales and marketing activity to continue our bundled sales growth. The cost of acquiring a customer has also increased in 2004. Currently, substantially all of our sales and

marketing expenses relate to the bundled product.

Interest Expense. The decrease in interest expense for the year to date 2004 from the year to date 2003 is primarily attributable to the decrease in outstanding debt balances.

Depreciation and Amortization. The increase in depreciation and amortization for the year to date 2004 from the year to date 2003 is primarily attributable to depreciation on costs incurred in 2003 related to our deployment of networking assets (our local switch and colocation equipment) in Michigan and amortization of capitalized software projects completed during 2003 primarily related to the development of customer relations management software.

Other Income, Net. Other income for the year to date 2003 consists of gains from our repurchase of a portion of our 12% Senior Subordinated Notes at a discount to par.

Provision for Income Taxes. The effective tax rate for the year to date 2004 was 37.1%. The decrease in the effective tax rate reflects the impact of income tax returns filed during the first quarter 2004 for the 2003 tax year.

## LIQUIDITY AND CAPITAL RESOURCES

Our management assesses our liquidity in terms of our ability to generate cash to fund our operations, capital expenditures and debt service obligations. For the third quarters 2004 and 2003, our operating activities provided net cash flow of \$49.5 million and \$55.7 million, respectively, which was used by us along with existing cash and cash equivalents, to reduce our outstanding debt obligations and fund capital expenditures and capitalized software development costs. As of September 30, 2004, we had \$29.4 million in cash and cash equivalents and long-term debt (including current maturities) of \$5.5 million, compared to \$35.2 million and \$48.6 million, respectively, at December 31, 2003.

Our contractual obligations as of September 30, 2004 are summarized by years to maturity as follows (in thousands):

Contractual Obligations	Total	1 year or less	2 - 3 Years	4 - 5 Years	Thereafter
<u>Talk America Holdings, Inc.:</u>					
5% Convertible Subordinated Notes due 2004	670	670	--	--	--
<u>Talk America Inc. and other subsidiaries:</u>					
Capital lease obligations	2,469	1,127	1,342	--	--
Other, primarily vendor-financed computer software	2,401	1,391	1,010	--	--
	5,540	3,188	2,352	--	--

Operating leases	6,766	3,009	3,022	360	375
Carrier commitments (1)	81,650	19,250	41,600	20,800	--
Total Contractual Obligations	\$ 93,956	\$ 25,447	\$ 46,974	\$ 21,160	375

(1) In December 2003, we entered into a new four-year master carrier agreement with AT&T. The agreement provides us with a variety of services, including transmission facilities to connect our network switches as well as services for international calls, local traffic, international calling cards, overflow traffic and operator assisted calls. The agreement also provides that, subject to certain terms and conditions, we will purchase these services exclusively from AT&T during the term of the agreement, provided, however, that we are not obligated to purchase exclusively in certain cases, including if such purchases would result in a breach of any contract with another carrier that was in place when we entered into the AT&T agreement, or if vendor diversity is required. Certain of our network service agreements, including the AT&T agreement, contain certain minimum usage commitments. Our contract with AT&T establishes pricing and provides for annual minimum commitments based upon usage as follows: 2004 - \$25 million, 2005 - \$32 million, 2006 - \$32 million and 2007 - \$32 million and obligates us to pay 65 percent of the revenue shortfall, if any. A separate contract with a different vendor establishes pricing and provides for annual minimum payments for 2004 of \$3.0 million. While we anticipate that we will not be required to make any shortfall payments under these contracts as a result of the restructuring of these obligations, there can be no assurances that we will be successful in our efforts. To the extent that we are unable to meet these minimum commitments, our costs of purchasing the services under the agreement will correspondingly increase.

Cash Provided By Operating Activities. Net cash provided by operating activities was \$49.5 million for the year to date 2004. The major contributors to the net cash provided by operating activities in this period were:

- Net income of \$26.1 million;
- Increases in accounts payable of \$8.4 million, primarily due to increased levels of sales and marketing activity, and an increase in network and line costs primarily due to the increase in bundled customers;
- Non-cash items of \$42.1 million, including utilization of deferred tax assets of \$13.1 million. The application of NOL carryforwards has limited our current payment of income taxes to cash taxes for alternative minimum taxes and state income taxes. We expect that our NOLs will be fully utilized during 2006; and
- An increase in deferred revenue of \$4.7 million for advance customer billings, primarily due to the growth in bundled customers.

Partially offsetting these contributors to the net 2004 cash provided by operating activities were:

- An increase in accounts receivable of \$22.6 million primarily due to the growth of our customer base and also due to reduced employee collection hours as a result of several hurricanes near our Florida customer service centers;
- A decrease in accrued compensation of \$5.2 million due to payment of year-end performance bonuses; and
- A decrease in other current liabilities of \$2.0 million primarily attributable to a decrease in accrued interest due to both lower debt levels and accrued interest payments.

For the year to date 2003, the major contributors to the \$55.7 million net cash provided by operating activities were:

- Net income of \$71.4 million;
- An increase in accounts payable of \$3.6 million attributable to an increase in network and line costs primarily due to the increase in bundled customers;
- An increase in deferred revenue of \$3.3 million for advance customer billings, primarily due to the growth in bundled customers; and
- A decrease in other assets of \$1.4 million attributable to repayment of a related party loan.

Partially offsetting these contributors to the 2003 net cash provided by operating activities were:

- An increase in accounts receivable of \$17.5 million, primarily due to the continued shift in our customer base from long distance customers to local bundled customers with higher average monthly revenue per customer;
- Non-cash items of \$5.2 million, primarily consisting of reduction of deferred tax asset reserves of \$24.2 million; and
- A decrease in other current liabilities of \$4.1 million primarily attributable to accrued interest payments.

Net Cash Used in Investing Activities. Net cash used in investing activities was \$10.7 million during the year to date 2004, consisting of capitalized software development costs of \$2.7 million and capital expenditures of \$8.0 million, consisting primarily of upgrades to our information technology capabilities and build-out of our local networking platform. Net cash used in investing activities was \$11.2 million during the year to date 2003, consisting of capitalized software development costs of \$2.0 million and capital expenditures primarily for the purchase of equipment of \$9.2 million.

We currently plan to continue to market our services and to build our base of bundled customers through March 2005 or until such time as we determine that our pricing from the incumbent local telephone companies significantly increase, at which point we expect to reduce our efforts to increase subscriber growth and to focus on markets with potential for networking.

In 2004, we expect to incur capital expenditures of approximately \$12 to \$15 million for both network and non-network assets. The FCC is considering whether incumbent local telephone companies should continue to be required to provide all or some unbundled network elements to competitive carriers, and we believe that it is likely that the proceeding will result in the elimination of our existing right to purchase some or all unbundled network elements that we currently rely upon to provide services to our customers. The FCC has established interim rules that make unbundled network elements available on a grandfathered basis until March 2005. If the FCC does not promulgate new rules prior to the expiration of these interim rules, our cost of service would increase substantially, and we may need to further accelerate our plans for 2005 to migrate those customers to our own networking platform and our capital expenditures would increase significantly, although there can be no assurance that we will be successful in such efforts. We expect to spend approximately \$30 million in 2005 for the buildout of the Michigan networking facilities. However, we have not previously developed and deployed a local network of our own and of this scale and there can be no assurance that we will not encounter unanticipated costs in acquiring the assets necessary for such networking capability and its operation or in deploying the new network.

Capitalized software development costs consist of direct development costs associated with internal-use computer software, including payroll costs for employees devoting time to the software projects. In 2003, capitalized software development costs totaled \$2.7 million and were primarily related to the development of customer relations management software. We expect software development costs in 2005 to be consistent with 2004 as we continue to develop the integrated information systems required to provide local switch-based service.

Net Cash Used in Financing Activities. Net cash used in financing activities for the year to date 2004 and 2003 was \$44.6 million and \$43.0 million, respectively, primarily attributable to debt repayments of \$44.3 million and \$38.7 million in 2004 and 2003, respectively. In addition, for the year to date 2003, pursuant to our former share buyback program announced in January 2003, we purchased 1,315,789 shares for a purchase price of \$5.0 million. On June 1, 2004, we announced that our Board of Directors had authorized a share buyback program for us to purchase up to \$50 million of our outstanding shares. The shares may be purchased from time to time, in the open market and/or private transactions. To date we have not purchased any shares under this program.

16

---

During 2004, we redeemed \$40.7 million of our 12% Senior Subordinated Notes, and \$2.8 million of our 8% Convertible Senior Subordinated Notes, respectively, representing the respective entire principal amounts outstanding as of December 31, 2003.

While we believe that we have access to new capital in the public or private markets to fund our ongoing cash requirements, there can be no assurance as to the timing, amounts, terms or conditions of any such new capital or whether it could be obtained on terms acceptable to us. We anticipate that our cash requirements will generally be met from our cash-on-hand and from cash generated from operations. Based on our current projections for operations, we believe that our cash-on-hand and our cash flow from operations will be sufficient to fund our currently contemplated capital expenditures, our debt service obligations, and the expenses of conducting our operations for at least the next twelve months. However, there can be no assurance that we will be able to realize our projected cash flows from operations, which is subject to the risks and uncertainties discussed in this report, or that we will not be required to consider capital expenditures in excess of those currently contemplated, as discussed in this report.

## **OTHER MATTERS**

Our provision of telecommunications services is subject to government regulation. FCC rules that were in effect until June 15, 2004 required incumbent local telephone companies to provide to competitive local telephone carriers, such as we are, in most geographic areas, an unbundled network element platform, which includes all of the network elements required by a competitor to provide a competitive retail local telecommunications service, including local switching (for use in serving mass market customers) and high capacity transport unbundled network elements.

To date, our local telecommunications services have been provided almost exclusively through the use of unbundled network elements purchased from incumbent local telephone companies that were made available to us pursuant to these FCC rules. It is primarily the availability of these unbundled network elements from the incumbent local telephone companies' facilities at substantially lower prices than those available for resale through total service resale agreements that has enabled us to price our local telecommunications services competitively.

On March 2, 2004, the U.S. Court of Appeals for the District of Columbia reversed the FCC order that adopted the rules requiring incumbent local telephone companies to provide unbundled network elements in important respects. Among other things, the Court ruled that the FCC had improperly determined that the ability of competitive local telephone carriers to provide telecommunications services was impaired nationwide without access to the local switching and high capacity transport unbundled network elements, and that the FCC had erroneously delegated to state commissions decision-making authority over where particular unbundled network elements must be provided. Accordingly, the Court of Appeals vacated important portions of the FCC's orders relating to the provision of unbundled network elements effective as of June 15, 2004, including the portions that required incumbent local

telephone carriers to provide critical components of the unbundled network element platform.

In response to the Court's decision, the FCC adopted interim rules that grandfathered competitive carriers, such as we are, and enabled us to continue until March 2005 to order all unbundled network elements that were available to us under interconnection agreements that were in effect as of June 15, 2004. After that date, we will not be able to order any of the unbundled networks elements vacated by the Court unless the FCC adopts replacement rules creating such a right. The FCC is also currently considering whether to require the incumbent local telephone companies to continue providing to competitive carriers the local switching, high capacity loop and high capacity dedicated transport elements. We cannot predict whether the FCC will complete work on the proceeding prior to the expiration of its interim rules in March 2005, or if so, whether the FCC will promulgate rules that would entitle us to continue ordering the network elements that we currently use.

In addition, the incumbent telephone companies have appealed the FCC's interim network element rules, and have petitioned the Court to issue a mandamus order to set them aside. The Court has held this petition in abeyance, but invited interested parties to supplement their requests on or before January 4, 2005. Thus, the Court could set aside the interim rules before March 2005.

Should the unbundled network element platform become effectively unavailable to us, we will be unable to offer our telecommunications services as we have done in the past and will instead be required to serve customers by other means, including through total service resale agreements with the incumbent local telephone companies, through the use of our own network facilities, by migrating customers onto the networks of other facilities-based competitive local telephone companies or by purchasing critical unbundled network elements at "just and reasonable" rates pursuant to Section 271 of the Act, which presumably will be higher than the rates currently available to us. Similarly, should cost-based transport unbundled network elements become effectively unavailable to us, our plans to deploy our own network facilities could be substantially impeded, and we could be forced to use other means to effect this deployment, including the use of facilities purchased at higher special access rates or transport services purchased from other facilities-based competitive local telephone carriers. In either event, our cost of service could rise dramatically and our plans for a service roll-out for use of our own network facilities could be delayed substantially or derailed entirely. This would have a material adverse effect on our business, prospects, operating margins, results of operations, cash flows and financial condition.

## **CRITICAL ACCOUNTING POLICIES**

Our discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. Certain amounts for 2003 have been reclassified to conform to the current year presentation. The preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, we evaluate our estimates, including those related to bad debt, goodwill and intangible assets, income taxes, sales taxes, network and line costs, contingencies and litigation. We base our estimates and judgments on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

Additional information about these critical accounting policies may be found in our Annual Report on Form 10-K for the year ended December 31, 2003 filed March 12, 2004, as amended by our Form 10-K/A filed May 7, 2004, and in our subsequently filed Quarterly Reports on Form 10-Q, in each case in Management's Discussion and Analysis of Financial Condition and Results of Operations, under the heading Critical Accounting Policies.

### **Item 3. Quantitative and Qualitative Disclosure about Market Risk**

In the normal course of business, our financial position is subject to a variety of risks, such as the collectibility of our accounts receivable and the recoverability of the carrying values of our long-term assets. Our long-term obligations consist primarily of long term debt with fixed interest rates. We do not presently enter into any transactions involving derivative financial instruments for risk management or other purposes.

Our available cash balances are invested on a short-term basis (generally overnight) and, accordingly, are not subject to significant risks associated with changes in interest rates. Substantially all of our cash flows are derived from our operations within the United States and we are not subject to market risk associated with changes in foreign exchange rates.

We generally do not have a significant concentration of credit risk with respect to net trade accounts receivable, due to the large number of end-users comprising our customer base.

### **Item 4. Controls and Procedures**

As of September 30, 2004, we carried out an evaluation under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of our disclosure controls and procedures. Based on that evaluation, the chief executive officer and chief financial officer have concluded that our disclosure controls and procedures are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms. There were no significant changes in our internal controls over financial reporting during the quarter ended September 30, 2004 that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

## **PART II - OTHER INFORMATION**

### **Item 6. Exhibits**
