The Trust invests primarily in debt securities issued by Massachusetts municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at August 31, 2009, 31.2% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution ranged from 1.1% to 15.3% of total investments.

(1) Security represents the underlying municipal bond of an inverse floater.

Table of Contents

A summary of financial instruments outstanding at August 31, 2009 is as follows:

Interest Rate Swaps

		Annual	Floating		.
	Notional	Fixed Rate Paid by	Rate	Effective Date/	Net Unrealized
Counterparty	Amount	Trust	Paid to Trust	Termination Date	Depreciation
				September 14, 2009	
			3-month USD-	/	
JPMorgan Chase Co.	\$ 787,500	4.743%	LIBOR-BBA	September 14, 2039	\$ (89,123)
Merrill Lynch Capital			3-month USD-	December 1, 2009 /	
Services, Inc.	1,250,000	4.517	LIBOR-BBA	December 1, 2039	(81,180)
					\$ (170,303)

The effective date represents the date on which the Trust and the counterparty to the interest rate swap contract begin interest payment accruals.

At August 31, 2009, the Trust had sufficient cash and/or securities to cover commitments under these contracts.

The Trust is subject to interest rate risk in the normal course of pursuing its investment objectives. Because the Trust holds fixed rate bonds, the value of these bonds may decrease if interest rates rise. To hedge against this risk, the Trust may enter into interest rate swap contracts.

At August 31, 2009, the aggregate fair value of derivative instruments (not accounted for as hedging instruments under Financial Accounting Standards Board (FASB) Statement of Financial Accounting Standards No. 133) in a liability position and whose primary underlying risk exposure is interest rate risk was \$170,303.

The cost and unrealized appreciation (depreciation) of investments of the Trust at August 31, 2009, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 56,490,576
Gross unrealized appreciation Gross unrealized depreciation	\$ 1,170,188 (3,620,002)
Net unrealized depreciation	\$ (2,449,814)

FASB Statement of Financial Accounting Standards No. 157, Fair Value Measurements , established a three-tier hierarchy to prioritize the assumptions, referred to as inputs, used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.
