**Note 1. Background and Basis of Presentation**

Artio Global Investors Inc. ( Investors or the Company ) and subsidiaries (collectively, we, us or our ) comprises Investors and its three subsidiaries, Artio Global Holdings LLC ( Holdings ), an intermediate holding company, Artio Global Management LLC ( Investment Adviser ), a registered investment adviser under the Investment Advisers Act of 1940, and Artio Global Institutional Services LLC (formerly known as Artio Capital Management LLC). As of June 30, 2010, Holdings was approximately 98% owned by Investors, 1% owned by Richard Pell, our Chairman, Chief Executive Officer and Chief Investment Officer ( Pell ), and 1% owned by Rudolph-Riad Younes, our Head of International Equity ( Younes, together with Pell, the Principals ). (See Note 2. *Initial Public Offering, Changes in Principals Interests, and Exchange of New Class A Units: Exchange of New Class A Units.*) The Principals interests are reflected in the consolidated financial statements as non-controlling interests. Investment Adviser and Artio Global Institutional Services LLC are wholly owned subsidiaries of Holdings.

Investment Adviser is our primary operating entity and provides investment management services to institutional and mutual fund clients. It manages and advises the Artio Global Funds (the Funds ), which are U.S. registered investment companies; commingled institutional investment vehicles; separate accounts; and sub-advisory accounts. Our assets under management ( AuM ) are invested primarily outside of the U.S. and our clients are primarily U.S.-based. Our revenues are based primarily on the U.S. dollar value of the investment assets we manage for clients. AuM may vary as a result of the market performance of the investments and client cash flows into or out of the investments. A majority of AuM are invested in assets denominated in currencies other than the U.S. dollar. As a result, the U.S. dollar value of AuM fluctuates with changes in foreign currency exchange rates. Our revenues fluctuate with changes in AuM.

The consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America ( U.S. GAAP ). These principles require management to make estimates and assumptions that affect the reported amounts of assets, liabilities (including contingent liabilities), revenues and expenses at the date of the consolidated financial statements. Actual results could differ from those estimates and may have a material effect on the consolidated financial statements.

In accordance with Securities and Exchange Commission s Staff Accounting Bulletin Topic 4:C, the Consolidated Statements of Changes in Equity give retroactive effect to a 10,500:1 stock split that was effected as of August 28, 2009.

Our interim consolidated financial statements are unaudited. Interim results reflect all normal recurring adjustments that are, in the opinion of management, necessary for a fair presentation of the results. *Revenues and other operating income* and *Net income* can vary significantly from quarter to quarter due to the nature of our business activities. The financial results of interim periods may not be indicative of the financial results for the entire year.

As part of the preparation of the interim consolidated financial statements, we performed an evaluation of subsequent events occurring after the Consolidated Statement of Financial Position date of June 30, 2010, through to the date the interim consolidated financial statements were issued.

These statements should be read in conjunction with our consolidated financial statements and related notes as of December 31, 2009, and for the three years then ended, included in our 2009 Annual Report on Form 10-K.

**Note 2. Initial Public Offering, Changes in the Principals Interests and Exchange of New Class A Units**  
*2009 Initial Public Offering and Changes in the Principals Interests*

Prior to the completion of our initial public offering ( IPO ) on September 29, 2009, Investors was a wholly owned subsidiary of GAM Holding Ltd. (formerly known as Julius Baer Holding Ltd.), a Swiss corporation ( GAM ).

**ARTIO GLOBAL INVESTORS INC. AND SUBSIDIARIES**  
**Notes to Consolidated Financial Statements**  
**(Unaudited)**

Before the IPO, each Principal had a 15% Class B profits interest in Investment Adviser, which was accounted for as compensation. Immediately prior to the IPO, each Principal exchanged his Class B profits interest for a 15% non-voting Class A membership interest in Holdings ( New Class A Units ), resulting in the compensation liability being reclassified as equity. Each Principal also purchased, at par value, nine million shares of voting, non-participating, Investors Class B common stock. In addition, the Principals entered into a tax receivable agreement with the Company. The Principals New Class A Units are accounted for by us as non-controlling interests.

*Exchange of New Class A Units*

Concurrent with the IPO, we entered into an exchange agreement with the Principals, which granted each Principal and certain permitted transferees the right to exchange his New Class A Units for shares of Investors Class A common stock, on a one-for-one basis, subject to certain restrictions.

Any exchange of New Class A Units is generally a taxable event for the exchanging Principal. As a result, under the exchange agreement, as amended, (the exchange agreement ) each Principal is permitted to sell shares of Class A common stock in connection with any exchange up to an amount necessary to generate proceeds (after deducting discounts and commissions) sufficient to cover taxes payable, as defined in the exchange agreement, on such exchange.

In the second quarter of 2010, each Principal exchanged 7.2 million New Class A Units for 7.2 million restricted shares of Class A common stock in accordance with the terms of the exchange agreement. At the time of the exchange, an equivalent number of shares of Class B common stock were surrendered by the Principals and canceled. To enable the Principals to sell shares of Class A common stock to cover their taxes payable, as defined in the exchange agreement, on the exchanges discussed above, on June 9, 2010, we completed a synthetic secondary offering (the secondary offering ) of approximately 3.8 million shares of Class A common stock at \$17.33 per share, before the underwriting discount, for net proceeds at the same price of \$62.1 million. The net proceeds were used to purchase and retire approximately 1.9 million shares of Class A common stock from each Principal. On June 14, 2010, the underwriters exercised a portion of their option to purchase additional shares of Class A common stock at the secondary offering price, net of the underwriting discount, resulting in the issuance of approximately 0.4 million shares of Class A common stock. We used the proceeds to repurchase and retire approximately 0.2 million shares of Class A common stock from each of the Principals.

After the exchanges in the second quarter of 2010, each Principal continues to own 600,000 New Class A Units, representing 1% of the outstanding New Class A Units of Holdings. These are accounted for by us as non-controlling interests.

The table below sets forth the effect of the change in our ownership of Holdings as of June 30, 2010, after the exchange by the Principals of New Class A Units for shares of Class A common stock.

**(in thousands)**

Net income attributable to Artio Global Investors for the six months ended June 30, 2010	\$ 37,823
Increase in <i>Additional paid-in capital</i> due to exchange by the Principals of New Class A Units for shares of Class A common stock	3,253
As of June 30, 2010	\$ 41,076

As a result of the exchanges of New Class A Units, we increased the tax basis of Holdings assets. This resulted in a \$161.2 million increase in deferred tax assets. (See *Note 8. Income Taxes: Tax Receivable Agreement.*)

#### Note 4. Related Party Activities

Prior to the IPO, we engaged in transactions with GAM and other affiliates, as well as our mutual funds, in the ordinary course of business. Currently, we continue to engage in transactions with our mutual funds and with affiliates of GAM.

##### *Affiliate Transactions Mutual and Offshore Funds*

We earn management fees from the Funds, which are considered related parties, as Investment Adviser manages the operations and makes investment decisions for these Funds. Investment Adviser provides investment management services to the Funds pursuant to investment management agreements with the Funds, which are subject to review and approval by their boards of directors or trustees. Investment Adviser also derives investment management revenue from sub-advising certain offshore funds sponsored by affiliates of GAM. Revenues related to these services are included in *Investment management fees* in the Consolidated Statement of Operations as follows:

*Other Related Party Transactions*

Prior to the IPO, we had a licensing fee arrangement with GAM for the use of the Julius Baer name in our products and marketing strategies. These licensing fees were \$0.8 million for the three months ended June 30, 2009, and \$1.6 million for the six months ended June 30, 2009. This arrangement has been terminated.

Certain participants in the deferred compensation plan sponsored by Investors, for employees whose annual discretionary bonus award exceeds certain predefined amounts (the *Funded Plan*), direct a portion of their deferred bonuses to their choice of the Funds. Assets related to the Funded Plan are included in *Marketable securities* on the Consolidated Statement of Financial Position and realized and changes in unrealized gains (losses) on investments in the Funds are recorded in *Net gains (losses) on securities held for deferred compensation* on the Consolidated Statement of Operations (see *Note 5. Marketable Securities, at Fair Value*).

Investors manages, at no cost to the plans, the assets of the non-contributory qualified defined contribution retirement plan sponsored by Investors, which covers most employees.

In the second quarter of 2010, we completed the secondary offering, the net proceeds of which were used to purchase and retire shares of Class A common stock from each Principal. (See *Note 2. Initial Public Offering, Changes in the Principals' Interests and Exchange of New Class A Units: Exchange of New Class A Units.*)

**Note 5. Marketable Securities, at Fair Value**

Marketable securities as of June 30, 2010, and December 31, 2009, consist of the following:

We carry our marketable securities portfolio at fair value using a valuation hierarchy based on the transparency of the inputs to the valuation techniques used to measure fair value. Classification within the hierarchy is based upon the lowest level of input that is significant to the fair value measurement. The valuation hierarchy contains three levels: (i) valuation inputs comprising unadjusted quoted market prices for identical assets or liabilities in active markets ( Level 1 ); (ii) valuation inputs comprising quoted prices for identical assets or liabilities in markets that are not active, quoted market prices for similar assets and liabilities in active markets, and other observable inputs directly or indirectly related to the asset or liability being measured ( Level 2 ); and (iii) valuation inputs that are unobservable and are significant to the fair value measurement ( Level 3 ).

**Note 6. Debt**

In September 2009, Holdings entered into a \$110 million credit facility consisting of a \$60 million three-year term credit facility and a \$50 million three-year revolving credit facility.

In October 2009, Holdings borrowed \$60 million under the term credit facility. As of June 30, 2010, the interest rate was 3.30%, and reset to 3.52% in July 2010. The amortization schedule requires quarterly principal payments of 7.5% in both years two and three, beginning on December 31, 2010, with a final payment of 40% at maturity. There is no remaining capacity under the term credit facility.

The covenants in the credit facility agreement require compliance with certain financial ratios. As of June 30, 2010, Holdings was in compliance with all debt covenants.

*Tax Receivable Agreement*

Concurrent with the IPO, the Principals entered into an exchange agreement with us which provides that they may exchange their New Class A Units for shares of Investors' Class A common stock. Holdings has made an election pursuant to Section 754 of the Internal Revenue Code of 1986, as amended, that upon such an exchange, Holdings will increase the tax basis of its assets. We entered into a tax receivable agreement with the Principals under which each Principal is entitled to receive 85% of the tax benefits realized by us in our tax returns as a result of the increases in tax basis created by that Principal's exchange. Amounts payable to the Principals under the tax receivable agreement are payable approximately 60 days after we file our income tax returns.

In the second quarter of 2010, each Principal exchanged an aggregate of 7.2 million shares of the New Class A Units for an equivalent number of shares of Investors' Class A common stock (see *Note 2. Initial Public Offering, Changes in Principals Interests, and Exchange of New Class A Units: Exchange of New Class A Units*). At the time of the exchanges, a deferred tax asset of \$161.2 million was established for the estimated future tax benefits, resulting from the amortization of the increased tax basis. Of the deferred tax asset recorded at the time of the exchanges, \$137.0 million, representing 85% of the benefits, was recorded in *Due under tax receivable agreement*, and the remaining 15%, or \$24.2 million, was recorded in *Additional paid-in capital* on the Consolidated Statement of Financial Position.

Although the tax receivable agreement payments are calculated based on annual tax savings, for the six months ended June 30, 2010, the payments which would have been made pursuant to the tax receivable agreement, if such period was calculated by itself, were estimated to be \$1.3 million.

On July 26, 2010, the Board of Directors declared a dividend of \$0.06 per share to be paid on August 25, 2010, to holders of record of our Class A and Class C common stock at the close of business on August 11, 2010. To provide funding for the dividend payable to the holders of record of our Class A and Class C common stock, a distribution by Holdings of \$0.06 per New Class A Unit will be paid to all members of Holdings, including the Principals.

**Note 10. Leases**

In December 2008, a portion of our office space was unoccupied. We recorded a liability related to this exit activity at fair value in the period in which the liability was incurred. The total liability related to this space is included in *Other liabilities* on the Consolidated Statement of Financial Position and the amortization of the liability is included in *General and administrative* expense in the Consolidated Statement of Operations. In May 2010, Investment Adviser entered into an agreement to sublet the unused office space. The sublet agreement did not result in an additional charge related to the exit activity.

**Note 11. Commitments and Contingencies**

Although we have no obligation to do so, we have, at our discretion, reimbursed client accounts for certain operational losses incurred. Such amounts were not material for the three months and six months ended June 30, 2010 and 2009.

There are no claims against us that are considered probable or reasonably possible of having a material effect on our cash flows, results of operations or financial position.

Our cash balances are held primarily with a single U.S.-based large money center bank. Effective January 1, 2010, the bank holding our cash balances ended its participation in the U.S. Government's Transaction Account Guarantee Program, which provided unlimited Federal deposit insurance on our cash balances. Substantially all of our cash balance exceeds the insurance provided by the Federal Deposit Insurance Corporation.

**Note 12. Recently Issued Accounting Pronouncements**

In February 2010, the Financial Accounting Standards Board ( FASB ) issued an Accounting Standards Update which defers the effective date of ASC 810.10, *Amendments to FASB Interpretation No. 46(R)*, for companies, such as ours, that have interests in certain investment entities. ASC 810.10 gives additional guidance on determining whether an entity is a variable interest entity and requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity.

In January 2010, the FASB issued an Accounting Standards Update to ASC 820.10, *Fair Value Measurements and Disclosures (FAS 157)*, to improve disclosures about fair value measurements. The adoption of the additional disclosure requirements did not impact our Notes to Consolidated Financial Statements.

**Note 13. Subsequent Events**

On July 27, 2010, our Board of Directors authorized a share repurchase program of up to 1,000,000 shares of our common stock. This repurchase is intended to eliminate the dilutive impact of RSU awards granted at the time of the IPO that have vested, or will vest, through 2011.

### **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations ( MD&A ).**

#### *Introduction*

Artio Global Investors Inc. ( Investors or the Company ) and subsidiaries (collectively, we, us or our ) comprises Investors and its three subsidiaries, Artio Global Holdings LLC ( Holdings ), an intermediate holding company, Artio Global Management LLC ( Investment Adviser ), a registered investment adviser under the Investment Advisers Act of 1940, and Artio Global Institutional Services LLC (formerly known as Artio Capital Management LLC). Holdings is approximately 98% owned by Investors, 1% owned by Richard Pell, our Chairman, Chief Executive Officer and Chief Investment Officer ( Pell ), and 1% owned by Rudolph-Riad Younes, our Head of International Equity ( Younes, together with Pell, the Principals ). The Principals' interests are reflected in the Consolidated Financial Statements as non-controlling interests. Investment Adviser and Artio Global Institutional Services LLC are wholly owned subsidiaries of Holdings.

Our MD&A is provided in addition to the accompanying consolidated financial statements and footnotes to assist readers in understanding our results of operations, liquidity and capital resources, and cash flows. The MD&A is organized as follows:

*General Overview.* Beginning on page 17, we provide a summary of our overall business, our 2009 initial public offering ( IPO ), the exchanges of New Class A Units by the Principals in the second quarter of 2010 and the related synthetic secondary offering (the secondary offering ), and the economic environment.

*Key Performance Indicators.* Beginning on page 18, we discuss some of the operating and financial indicators that guide management's review of our performance.

*Assets Under Management.* Beginning on page 22, we provide a detailed discussion of our assets under management ( AuM ), which is a major driver of our operating revenues and key performance indicators.

*Revenues and Other Operating Income.* Beginning on page 26, we compare our revenue and other operating income to the corresponding period a year ago.

*Operating Expenses.* Beginning on page 27, we compare our operating expenses to the corresponding period a year ago.

*Non-operating Income (Loss).* Beginning on page 29, we compare our non-operating income (loss) to the corresponding period a year ago.

*Income Taxes.* Beginning on page 29, we compare our effective tax rates to the corresponding period a year ago.

*Liquidity and Capital Resources.* Beginning on page 30, we discuss our working capital as of June 30, 2010, and December 31, 2009, and cash flows for the first six months of 2010 and 2009. Also included is a discussion of the amount of financial capacity available to help fund our future activities.

*New Accounting Standards.* Beginning on page 32, we discuss new accounting pronouncements that may apply to us.

*Cautionary Note Regarding Forward-Looking Statements.* Beginning on page 32, we describe the risks and uncertainties that could cause actual results to differ materially from those discussed in forward-looking statements set forth in this MD&A relating to our financial results, operations, business plans and prospects. Such forward-looking statements are based on management's current expectations about future events, which are inherently susceptible to uncertainty and changes in circumstances.

### **General Overview**

#### **Business**

We are an asset management company that provides investment management services to institutional and mutual fund clients. We manage and advise proprietary funds, commingled institutional investment vehicles, institutional separate accounts and sub-advisory accounts. Our operations are based principally in the U.S. However, our AuM are invested primarily outside of the U.S. and are denominated in currencies other than the U.S. dollar. Our revenues are primarily billed in U.S. dollars and are computed on the U.S. dollar value of the investment assets we manage for clients.

#### **Initial Public Offering, Changes in Principals' Interests and Exchange of New Class A Units**

##### *2009 Initial Public Offering and Changes in Principals' Interests*

Prior to the completion of our initial public offering ( IPO ) of Investors' Class A common stock, which is listed on the New York Stock Exchange under the symbol ART, on September 29, 2009, Investors was a wholly owned subsidiary of GAM Holding Ltd. ( GAM ), a Swiss corporation formerly known as Julius Baer Holding Ltd.

Before the IPO, each Principal had a 15% Class B profits interest in Investment Adviser, which was accounted for as compensation for financial accounting purposes. Immediately prior to the IPO, each Principal exchanged his Class B profits interest for a 15% non-voting Class A membership interest in Holdings ( New Class A Units ). Subsequent to the IPO, the Principals' New Class A Units are accounted for by us as non-controlling interests.

##### *Exchange of New Class A Units*

In the second quarter of 2010, each Principal exchanged 7.2 million New Class A Units for 7.2 million restricted shares of Class A common stock. At the time of the exchanges, an equivalent number of shares of Class B common stock were surrendered by the Principals and canceled.

Also in the second quarter of 2010, in order to enable the Principals to sell shares of Class A common stock to cover their taxes payable, as defined in the exchange agreement, as amended, (the exchange agreement ) on the exchanges discussed above, 4.2 million shares of Class A common stock were issued to the public in connection with a secondary offering, including 0.4 million shares issued due to the underwriters exercising a portion of their option to purchase shares of Class A common stock. The net proceeds were used to purchase and retire 2.1 million shares of Class A common stock from each Principal. We did not retain any of the proceeds related to the secondary offering. After the exchanges in the second quarter of 2010, each Principal retains 600,000 New Class A Units, representing a 1% interest in Holdings, which are accounted for by us as non-controlling interests.

As a result of the exchanges of New Class A Units, we increased the tax basis of Holdings' assets, creating a \$161.2 million increase in deferred tax assets. (See Notes to Consolidated Financial Statements, *Note 8. Income Taxes: Tax Receivable Agreement*.)

#### **Economic Environment**

As an investment manager, we derive substantially all of our operating revenues from providing investment management services to our institutional and mutual fund clients. Such revenues are driven by the amount and composition of our AuM, as well as by our fee structure. Accordingly, our business results are highly dependent upon the prevailing global economic climate and its impact on investor sentiment and capital markets.

The European sovereign debt crisis, ignited by fears over a potential Greek default, set the tone for markets during the second quarter of 2010. Although a rescue package was ultimately put together in early May 2010 by the European Union and the International Monetary Fund to shore up the finances of the eurozone's most indebted countries, it was not enough to calm the markets. As investors became fixated on the unhealthy fiscal positions of

**Table of Contents**

many developed countries, a dramatic flight to quality ensued, negatively impacting equities. It also led to a decline in the euro in favor of the U.S. dollar, viewed as a safer alternative despite the challenged fiscal position in which the U.S. finds itself. Many European leaders began to consider unpopular austerity measures, which increased investors concerns over the potential impact on economic growth and the sustainability of the euro. Against this backdrop, non-U.S. dollar investments posted particularly harsh returns for U.S. dollar-based investors.

In June 2010, China garnered headlines as its central bank announced that it would increase flexibility of the yuan, indicating that the shift would reduce the economy's overreliance on exports. However, equities continued to slide, as concerns remained over whether industrialized nations will be able to effectively address their huge deficits and unprecedented levels of government debt without extinguishing economic recovery and potentially slipping back into recession.

We believe that concerns over sovereign risk in Europe, along with renewed fears over the sustainability of the global economic recovery, and generally lower appetite for risk, moved equity markets lower and contributed to the significant increase in net client cash outflows we experienced during the second quarter of 2010, particularly within our Proprietary Funds.

## Table of Contents

### Operating Indicators

Our revenues are driven by the amount and composition of our AuM, as well as by our fee structure. As a result, management closely monitors our AuM. We believe average AuM is important as most of our fees are calculated based on daily or monthly AuM, rather than quarter-end balances of AuM.

Net client cash flows represent sales either to new or existing clients, less redemptions. Our net client cash flows are driven by the performance of our investment strategies, competitiveness of fee rates, the success of our marketing and client service efforts, and the state of the overall equity and fixed income markets. In addition, our net client cash flows reflect client-specific actions, such as portfolio rebalancing or decisions to change portfolio managers.

As of June 30, 2010, AuM of \$49.0 billion had increased 5% from the comparable 2009 period, reflective of improved market conditions since the market lows experienced in early 2009. However, during the second quarter of 2010, the strength of the economic recovery was questioned, leading to increased market volatility and a sharp sell-off in equity markets during the latter part of the second quarter of 2010. While our net client cash flows are influenced by a number of factors, including clients' asset allocation preferences and the performance of our products, we believe that recent market events and generally lower appetite for risk may dampen search activity and negatively impact our net client cash flows in the second half of 2010.

### Financial Indicators

Management reviews certain financial ratios to monitor progress with internal forecasts, understand the underlying business and compare our firm with others in the financial services industry. The effective fee rate represents the amount of investment management fees we earn divided by the average dollar value of client assets we manage. We use this information to evaluate the contribution to revenue of our products. Operating and EBITDA margins are important indicators of our profitability and the efficiency of our business model. (See the Adjusted Performance Measures section of this MD&A for a discussion of financial indicators not prepared in conformity with U.S. Generally Accepted Accounting Principles ( GAAP ).) Other ratios shown in the Key Performance Indicators table above allow us to review expenses in comparison with our revenues.

Our effective fee rate of 63.4 basis points for the three months ended June 30, 2010, declined slightly compared to the corresponding period in 2009, mainly due to an increase in proportion of our average AuM being within our fixed income strategies, which typically have average fee rates lower than our equity strategies, partially offset by the recognition of a \$0.4 million performance fee, compared to the clawback of performance fees recorded in 2009. Our effective fee rate for the six months ended June 30, 2010, increased over the corresponding period in 2009, due primarily to the receipt of performance fees in 2010, as compared to the impact of the clawback of performance fees recorded in 2009.

Our Adjusted operating income and Adjusted EBITDA margins in the three months ended June 30, 2010, decreased compared to the corresponding period in 2009, as expense growth exceeded revenue growth. Our Adjusted operating income and Adjusted EBITDA margins in the six months ended June 30, 2010, increased compared to the corresponding period in 2009, as revenue growth exceeded expense growth. Although the economic events in the latter part of 2008 severely impacted our business in 2009 and 2010, we continued to generate strong Adjusted operating income and Adjusted EBITDA margins, which we believe reflects the strength of our franchise and the variability of our expense base.

### Adjusted Performance Measures

Certain of our financial indicators are not prepared in conformity with GAAP. These indicators are adjusted versions of balances in our consolidated financial statements. The adjustments are also not in conformity with GAAP. We believe these adjustments are meaningful as they are more representative of our ongoing organizational structure. The adjustments primarily relate to certain expenses recorded in *Employee compensation and benefits* and the tax effect associated with those adjustments. For the three months and six months ended June 30, 2010, we have excluded the amortization expense associated with equity awards granted to employees at the time of the IPO. For

the three months and six months ended June 30, 2009, we have excluded the compensation charges associated with the former compensation structure of the Principals, as that structure ended upon our IPO. In addition, we have adjusted *Income taxes* to reflect the appropriate effective tax rate for each period after taking into consideration these non-GAAP adjustments. We also present Adjusted net income attributable to Artio Global Investors per diluted share, which assumes the full exchange of our Principals' non-controlling interests for Class A common stock at the beginning of each period presented. These adjustments are reflected in Adjusted operating income, Adjusted operating margin, Adjusted EBITDA, Adjusted EBITDA margin, Adjusted compensation ratio, Adjusted net income attributable to Artio Global Investors and Adjusted diluted earnings per share.

(a) *Non-operating income (loss)* represents primarily interest income and expense, including gains and losses on interest-bearing marketable securities.

(b) Excludes amortization expense associated with equity awards granted at the time of the IPO, as such expense is included in total compensation adjustments.

(c) Adjusted weighted average diluted shares assumes Investors ownership structure following the IPO was in effect at the beginning of each period and that the Principals had exchanged all of their New Class A Units for Class A common stock.

**Table of Contents****Assets under Management ( AuM )**

Changes to our AuM, the distribution of our AuM among our investment products and investment strategies, and the effective fee rates on our products, all affect our operating results from one period to another.

The amount and composition of our AuM are, and will continue to be, influenced by a variety of factors including, among other things:

investment performance, including our investment decisions and fluctuations in both the financial markets and foreign currency exchange rates;

client cash flows into and out of our investment products;

the mix of AuM among our various strategies; and

our introduction or closure of investment strategies and products.

Our five core investment strategies are:

International Equity;

Global Equity;

U.S. Equity;

High Grade Fixed Income; and

High Yield.

Investors are able to invest in our strategies through the investment vehicles set forth in the following table.

The following table sets forth a summary of our AuM by investment vehicle type as of June 30, 2010 and 2009.

The different fee structures associated with each type of investment vehicle make the composition of our AuM an important determinant of the investment management fees we earn. We typically earn higher effective investment management fee rates from our proprietary funds and institutional commingled funds as compared to our separate and sub-advised accounts.

Net client cash flows across all investment vehicles decreased \$2.6 billion during the three months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of \$2.1 billion decrease in our International Equity II strategy's net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, a \$0.7 billion increase in our International Equity I strategy's net client cash outflows and a \$0.5 billion decrease in our High Yield strategy's net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009. These decreases were partially offset by a \$0.4 billion increase in our High Grade Fixed Income strategy's net client cash flows, as the three months ended June 30, 2010, had net client cash inflows compared to net client cash outflows during the corresponding period in 2009.

Net client cash flows across all investment vehicles decreased \$2.7 billion during the six months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of \$2.7 billion decrease in our International Equity II strategy's net client cash flows, as the six months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009 and a \$0.9 billion increase in our International Equity I strategy's net client cash outflows. These decreases were partially offset by a \$0.4 billion increase in our Global Equity strategy's net client cash flows, as the six months ended June 30, 2010, had net client cash inflows compared to net client cash outflows during the corresponding period in 2009, a \$0.2 billion increase in our High Grade Fixed Income strategy's net client cash inflows and a \$0.2 billion increase in our U.S. Equity strategies' net client cash flows, as the six months ended June 30, 2010, had net client cash inflows compared to net

In the three months ended June 30, 2010, the gross performances of our International Equity I strategy was ahead of the index by 0.6% and our International Equity II strategy was ahead of the index by 0.7%.

The MSCI AC World ex USA Index decreased 11.1% during the six months ended June 30, 2010, and increased by 13.9% during the six months ended June 30, 2009. In the six months ended June 30, 2010, the gross performances of our International Equity I strategy trailed the index by 0.3% and our International Equity II strategy trailed the index by 0.6%.

**Proprietary Funds**

Net client cash flows related to proprietary funds decreased \$1.7 billion during the three months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of \$1.0 billion decrease in our International Equity II Fund's net client cash flows and a \$0.4 billion decrease in Global High Income Fund's net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, and a \$0.3 billion increase in our International Equity I Fund's net client cash outflows. Net client cash flows related to proprietary funds decreased \$1.6 billion during the six months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$1.5 billion decrease in our International Equity II Fund's net client cash flows, as the six months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, and a \$0.2 billion increase in our International Equity I Fund's net client cash outflows.

**Institutional Commingled Funds**

Net client cash flows related to institutional commingled funds decreased \$0.5 billion during the three months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$0.3 billion decrease in our International Equity II vehicles' net client cash flows and a \$0.2 billion decrease in our International Equity I vehicles' net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009.

### **Separate Accounts**

Net client cash flows related to separate accounts decreased \$0.2 billion during the three months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$0.5 billion decrease in our International Equity II strategies' net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, and a \$0.1 billion increase in our International Equity I strategies' net client cash outflows. These decreases were partially offset by a \$0.5 billion increase in our High Grade Fixed Income strategy's net client cash flows, as the three months ended June 30, 2010, had net client cash inflows compared to net client cash outflows during the corresponding period in 2009.

Net client cash flows related to separate accounts decreased \$0.6 billion during the six months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$0.8 billion decrease in our International Equity II strategies' net client cash flows, as the six months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, and a \$0.4 billion increase in our International Equity I strategies' net client cash outflows. These decreases were partially offset by a \$0.3 billion increase in our Global Equity strategy's net client cash flows and a \$0.2 billion increase in our High Grade Fixed Income strategy's net client cash flows, as the six months ended June 30, 2010, had net client cash inflows compared to net client cash outflows in the corresponding period in 2009.

### **Sub-advisory Accounts**

Net client cash flows related to sub-advised accounts decreased \$0.1 billion during the three months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$0.3 billion decrease in our International Equity II strategy's net client cash flows, as the three months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009, partially offset by a \$0.1 billion increase in our U.S. Equity strategies' net client cash flows.

Net client cash flows related to sub-advised accounts increased slightly during the six months ended June 30, 2010, compared to the corresponding period in 2009, mainly as a result of a \$0.2 billion increase in our High Yield strategy's net client cash inflows and a \$0.1 billion increase in our U.S. Equity strategies' net client cash flows, as the six months ended June 30, 2010, had net client cash inflows compared to net client cash outflows during the corresponding period in 2009, partially offset by a \$0.3 billion decrease in our International Equity II strategy's net client cash flows, as the six months ended June 30, 2010, had net client cash outflows compared to net client cash inflows during the corresponding period in 2009.

### **Revenues and Other Operating Income**

Our revenues are driven by investment management fees earned from managing clients' assets. Investment management fees fluctuate based on the total value of AuM, composition of AuM among our investment vehicles and among our investment strategies, changes in the investment management fee rates on our products and, for the few accounts on which we are eligible to earn performance based fees, the investment performance of those accounts. Performance fees may be subject to clawback provisions as a result of performance declines. If such declines occur, the performance fee clawback provisions are recognized when the amount is probable and estimable. (See also the Assets under Management section of this MD&A.)

Total revenues and other operating income	\$ 83,335	\$ 70,793	18	\$ 168,966	\$ 133,320	27

*Total revenues and other operating income* increased by \$12.5 million for the three months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to a 20% increase in average AuM, partially offset by net losses on securities held for deferred compensation in the second quarter of 2010 compared to net gains on securities held for deferred compensation in the second quarter of 2009. (Gains and losses on marketable securities that we own to manage future deferred compensation liabilities correlate with related adjustments to compensation expense over the service period of the deferred compensation.) The increase in average AuM relates to the recovery of equity markets since the end of the first quarter of 2009.

*Total revenues and other operating income* increased by \$35.6 million for the six months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to a 25% increase in average AuM, partially offset by net losses on securities held for deferred compensation in the first half of 2010 compared to net gains on securities held for deferred compensation in the first half of 2009. The increase in average AuM relates to the recovery of equity markets since the end of the first quarter of 2009. The increase in the effective fee rate is primarily the result of a higher proportion of average AuM in proprietary and commingled funds, our highest margin vehicles, and the receipt of performance fees in 2010 compared to a performance fee clawback in 2009.

Performance fees as a percentage of *Total revenues and other operating income* approximated 0.5% for the three months ended June 30, 2010, 0.3% for the six months ended June 30, 2010, (2.3)% for the three months ended June 30, 2009, and (1.2)% for the six months ended June 30, 2009. The negative performance fees in 2009 resulted from a clawback.

Operating expenses decreased by \$19.5 million for the three months ended June 30, 2010, and by \$36.0 million for the six months ended June 30, 2010, compared to the corresponding periods in 2009, mainly due to changes in the nature of the Principals' economic interests after the IPO.

Total employee compensation and benefits	\$ 24,647	\$ 46,646	*	\$ 49,816	\$ 91,927	*

\* Calculation not meaningful, due to the impact of the reorganization transactions at the time of the IPO.

(a) At the time of the IPO (see the Initial Public Offering and Changes in Principals Interests section of this MD&A), the Class B profits interests were exchanged for New Class A Units that are reflected as non-controlling interests subsequent to the IPO.

Prior to the IPO, the Principals did not receive bonuses, but instead benefited from the increased value of their Class B profits interests, as well as distributions in respect of such interests. Subsequent to the IPO, each Principal entered into an employment agreement, which entitles each Principal to bonus amounts, subject to modification by the Board of Directors and subject to a deferral plan, and an annual base salary. For the three months and six months ended

June 30, 2010, *Salaries, incentive compensation and benefits* includes bonuses paid to the Principals.

*Total employee compensation and benefits* decreased \$22.0 million for the three months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to changes in the nature of the Principals' economic interests after the IPO, partially offset by an increase in incentive compensation accruals and the amortization of share-based compensation expense for the three months ended June 30, 2010, as well as an increase in costs resulting from increased headcount.

*Total employee compensation and benefits* decreased \$42.1 million for the six months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to changes in the nature of the Principals' economic interests after the IPO, partially offset by an increase in incentive compensation accruals and the amortization of share-based compensation expense for the six months ended June 30, 2010, as well as an increase in costs resulting from increased headcount.

We do not expect the Health Care and Education Reconciliation Act of 2010 and Patient Protection and Affordable Care Act to have a material impact on our operating results.

#### Shareholder Servicing and Marketing

*Shareholder servicing and marketing* expenses increased \$1.5 million to \$5.6 million for the three months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to the increase in the average market value of proprietary fund AuM increasing shareholder servicing costs and higher marketing expenses.

*Shareholder servicing and marketing* expenses increased \$2.9 million to \$10.1 million for the six months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to the increase in the average market value of proprietary fund AuM increasing shareholder servicing costs and higher marketing expenses.

#### General and Administrative

*General and administrative* expenses increased \$1.0 million to \$10.4 million for the three months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to an increase in costs associated with our status

as a public company, higher professional fees resulting from the secondary offering and higher business-related expenses, partially offset by the cessation of licensing fee payments, which ended upon the IPO.

*General and administrative* expenses increased \$3.2 million to \$20.7 million for the six months ended June 30, 2010, compared to the corresponding period in 2009, due primarily to an increase in costs associated with our status as a public company, higher professional fees resulting from the secondary offering and higher business-related expenses, partially offset by the cessation of licensing fee payments, which ended upon the IPO.

**Non-operating Income (Loss)**

*Non-operating income (loss)* primarily results from interest income earned on invested funds and interest expense incurred on borrowings under our term credit facility. The following table sets forth *Non-operating income (loss)*.

(in thousands, except percentages)	Three Months Ended June 30,			Six Months Ended June 30,		
	2010	2009	% Change	2010	2009	% Change
Interest income	\$	\$ 97	(100)%	\$ 1	\$ 214	(100)
Interest expense	(659)	(12)	*	(1,320)	(12)	*
Net gains (losses) on marketable securities	(1)	(337)	100	(2)	(535)	100
Other income	12		N/A	12		N/A
Total non-operating income (loss)	\$ (648)	\$ (252)	(157)%	\$ (1,309)	\$ (333)	293%

\* Calculation not meaningful, due to the impact our \$60 million borrowing under our term credit facility in the fourth quarter of 2009.

N/A Not applicable.

Total non-operating loss increased for the three months and six months ended June 30, 2010, compared to the corresponding periods in 2009, primarily due to interest expense related to our \$60 million borrowing under our term credit facility and interest expense related to amended tax returns.

**Income Taxes**

Investors is organized as a Delaware corporation, and therefore is subject to U.S. Federal, state and local income taxes. As a member of Holdings, Investors incurs U.S. Federal, state and local income taxes on its allocable share of income of Holdings, including its wholly owned subsidiaries.

Our effective tax rates were 38% for the three months ended June 30, 2010, and 48% for the three months ended June 30, 2009. Our effective tax rates were 35% for the six months ended June 30, 2010, and 48% for the six months ended June 30, 2009.

Since the IPO, our effective tax rate has been lower due to the accounting for the Principals' member interests in Holdings as non-controlling interests, which had been accounted for as compensation expense prior to the IPO. For tax purposes, the Principals' member interests are treated as partnership income. Accordingly, we do not account for the U.S. Federal and state income taxes on the Principals' member interests. At the time of the IPO, the Principals' non-controlling interests in Holdings were approximately 26%. Subsequent to the Principals' exchanges of New Class A Units for shares of Class A common stock in the second quarter of 2010, the Principals' non-controlling interests are

2% and as a result, our effective tax rate will be higher in future periods.

Our effective tax rate would have been approximately 45% for the three months ended June 30, 2010, and 44% for the six months ending June 30, 2010, had the Principals exchanged all of their New Class A Units at the beginning of the respective periods.

**Table of Contents****Liquidity and Capital Resources****Working Capital**

Below is a table showing our liquid assets.

	As of June 30,	As of December 31,	% Change
<b>(in thousands, except percentages)</b>	<b>2010</b>	<b>2009</b>	
Cash and cash equivalents	\$ 91,766	\$ 60,842	51%
Fees receivable and accrued fees, net of allowance for doubtful accounts	54,229	56,911	(5)
Total liquid assets	\$ 145,995	\$ 117,753	24

Prior to the IPO, we declared a dividend and capital distribution payable to GAM, of which \$40.1 million remains payable by September 29, 2010. We may make seed capital investments of up to an aggregate of \$35.0 million in the second half of 2010. In addition, beginning in the fourth quarter of 2010, our term credit facility requires quarterly principal payments of \$4.5 million for two years, with a final payment of \$24.0 million at maturity in 2012.

On July 27, 2010, our Board of Directors authorized a share repurchase program of up to 1,000,000 shares of our common stock. This repurchase is intended to eliminate the dilutive impact of restricted stock unit awards granted at the time of the IPO that have vested, or will vest, through 2011.

On July 26, 2010, the Board of Directors also declared a dividend of \$0.06 per share to be paid on August 25, 2010, to holders of record of our Class A and Class C common stock at the close of business on August 11, 2010. To provide funding for the dividend payable to the holders of record of our Class A and Class C common stock, a distribution by Holdings of \$0.06 per New Class A Unit (see the Initial Public Offering, Changes in Principals Interests and Exchange of New Class A Units section of this MD&A) will be paid to all members of Holdings, including the Principals.

Our working capital requirements historically have been met through operating cash flows. In the future we may rely on both our operating cash flows and borrowing facilities to meet our working capital requirements. We believe our current working capital and \$50.0 million revolving credit facility are sufficient to meet our current obligations and support our organic growth initiatives.

**Debt**

In September 2009, Holdings entered into a \$110 million credit facility consisting of a \$60 million three-year term credit facility and a \$50 million three-year revolving credit facility. In October 2009, we borrowed \$60 million under the term credit facility.

The credit facility agreement also contains customary affirmative and negative covenants, including limitations on indebtedness, liens, cash dividends and fundamental corporate changes. As of June 30, 2010, our consolidated leverage ratio was 0.5:1 and our consolidated interest coverage ratio was 85:1, each in compliance with our debt covenants.

**Table of Contents****Cash Flows**

The following table sets forth our cash flows for the first six months of 2010 and 2009.

(in thousands, except percentages)	Six Months Ended June 30,		
	2010	2009	% Change
<b>Cash flow data:</b>			
Net cash provided by (used in) operating activities	\$ 49,252	\$ (3,234)	1,623%
Net cash provided by (used in) investing activities	(1,141)	41,963	(103)
Net cash used in financing activities	(17,165)	(14,000)	(23)
Effect of exchange rate changes on cash	(22)	32	(169)
Net increase in cash and cash equivalents	\$ 30,924	\$ 24,761	25

*Net cash provided by operating activities* was \$49.3 million for the six months ended June 30, 2010, compared to *Net cash used in operating activities* of \$3.2 million in the corresponding period in 2009, primarily reflecting higher revenues in the first half of 2010 and payments made to the Principals under the Class B profits interests agreement in the first half of 2009.

*Net cash used by investing activities* was \$1.1 million in the six months ended June 30, 2010, compared to *Net cash provided by investing activities* of \$42.0 million in the corresponding period in 2009, primarily reflecting the sales of marketable securities in the first quarter of 2009. We liquidated our holdings of investment securities in 2009 to fund distributions to GAM and the Principals.

*Net cash used by financing activities* increased \$3.2 million in the six months ended June 30, 2010, compared to the corresponding period in 2009, primarily reflecting distributions to non-controlling interests, partially offset by lower dividend payments in 2010.

**Deferred Taxes**

Concurrent with the IPO, the Principals entered into an exchange agreement which provides that they may exchange their New Class A Units for shares of Investors' Class A common stock. Upon such exchanges, Holdings has made an election under Section 754 of the Internal Revenue Code of 1986, as amended, to increase the tax basis of its assets. A tax receivable agreement with the Principals entitles each Principal to receive 85% of the tax benefits realized by us in our tax returns as a result of the increases in tax basis created by that Principal's exchange.

In the second quarter of 2010, the Principals exchanged 14.4 million shares of the New Class A Units for an equivalent number of shares of Investors' Class A common stock (see Notes to Consolidated Financial Statements, Note 2. *Initial Public Offering, Changes in Principals Interests, and Exchange of New Class A Units: Exchange of New Class A Units*). At the time of the exchanges in the second quarter of 2010, an aggregate deferred tax asset of \$161.2 million was established for the estimated future tax benefits, resulting from the amortization of the increased tax basis. Of the deferred tax asset recorded at the time of the exchanges, \$137.0 million, representing 85% of the benefits, was recorded in *Due under tax receivable agreement*, and the remaining 15%, or \$24.2 million, was recorded in *Additional paid-in capital* on the Consolidated Statement of Financial Position.

The majority of our deferred tax assets are recoverable over a 15-year period and will depend on our ability to generate sufficient taxable income. Based on an analysis of our deferred tax assets, as of June 30, 2010, there will be sufficient annual taxable income to realize these deferred tax assets. In addition, as we have historically generated taxable income, we believe that it is more likely than not that the deferred tax asset will be recovered and, therefore, no valuation allowance is necessary.

**Off-Balance Sheet Arrangements**

We did not have any off-balance sheet arrangements as of June 30, 2010, or as of December 31, 2009.

### **New Accounting Standards**

#### **Recently Adopted Accounting Pronouncements**

In February 2010, the Financial Accounting Standards Board ( FASB ) issued an Accounting Standards Update which defers the effective date of ASC 810.10, *Amendments to FASB Interpretation No. 46(R)*, for companies, such as ours, that have interests in certain investment entities. ASC 810.10 gives additional guidance on determining whether an entity is a variable interest entity and requires ongoing assessments of whether an enterprise is the primary beneficiary of a variable interest entity.

In January 2010, the FASB issued an Accounting Standards Update to ASC 820.10, *Fair Value Measurements and Disclosures (FAS 157)*, to improve disclosures about fair value measurements. The adoption of the additional disclosure requirements did not impact our Notes to Consolidated Financial Statements.

#### **CAUTIONARY NOTE REGARDING FORWARD-LOOKING STATEMENTS**

We have made statements in our Management's Discussion and Analysis of Financial Condition and Results of Operations and in other sections of this Report on Form 10-Q that are forward-looking statements. In some cases, you can identify these statements by forward-looking words such as may, might, will, should, expects, plans, and believes, estimates, predicts, potential or continue, the negative of these terms and other comparable terminology. These forward-looking statements, which are subject to risks, uncertainties and assumptions, may include projections of our future financial performance, our anticipated growth strategies, descriptions of new business initiatives, investor behavior, our free cash flow and anticipated trends in our business. These statements are only predictions based on our current expectations and projections about future events. There are important factors that could cause our actual results, level of activity, performance or achievements to differ materially from the results, level of activity, performance or achievements expressed or implied by the forward-looking statements.

Although we believe the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, level of activity, performance or achievements. Moreover, neither we nor any other person assumes responsibility for the accuracy and completeness of any of these forward-looking statements. We are under no duty to update any of these forward-looking statements after the date of this Report on Form 10-Q to conform our prior statements to actual results or revised expectations.

Our Registration Statement on Form S-1 (File No. 333-166992) as filed with the U.S. Securities and Exchange Commission ( SEC ) on May 21, 2010, as amended, ( Form S-1 ), pursuant to the provisions of the Securities Act of 1933, as amended (the Act ), listed various important factors that could cause actual results to differ materially from projected and historic results. We note these factors for investors as permitted by the Private Securities Litigation Reform Act of 1995. You can find them in our Form S-1 under the heading Risk Factors. We incorporate that section of the Form S-1 in this filing and readers of this Report on Form 10-Q should refer to it. It is not possible to predict or identify all such factors. Consequently, you should not consider any such list to be a complete set of all potential risks or uncertainties.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

Market Risk

#### ***Revenues and Other Operating Income***

Our exposure to market risk is directly related to the value of the proprietary funds, institutional commingled funds, separate accounts and sub-advised accounts we manage. Substantially all of our revenue is derived from investment advisory agreements with these funds and accounts. Under these agreements, the fees we receive are based on the fair value of the assets under management ( AuM ) and our fee rates. Accordingly, our revenue and income may decline as a result of:

## **Table of Contents**

the value of AuM decreasing;

our clients withdrawing funds; or

a shift in product mix to lower margin products.

AuM was \$49.0 billion as of June 30, 2010. Assuming a 10% increase or decrease in the value of the AuM and the change being proportionally distributed over all our products, the fair value would increase or decrease by \$4.9 billion, which would cause an annualized increase or decrease in *Total revenues and other operating income* of approximately \$31.2 million at our current effective fee rate.

We have not adopted a corporate-level risk management policy regarding client assets, nor have we historically attempted to hedge revenue risks that would arise from fluctuations in the fair value of separate client portfolios or our overall AuM.

### *Marketable Securities*

We are subject to market risk from a decline in the price of marketable securities that we own to manage our investable cash and fund future deferred compensation liabilities. As of June 30, 2010, the securities we own to fund future deferred compensation liabilities consisted of Artio Global Funds. The fair value of these securities was \$8.0 million as of June 30, 2010. Management regularly monitors the value of these investments; however, given their nature and relative size, we have not adopted a specific risk management policy to manage the associated market risk. Assuming a 10% increase or decrease in the values of these marketable securities, the fair value would increase or decrease by \$0.8 million as of June 30, 2010. Gains or losses on marketable securities that we own to manage future deferred compensation liabilities correlate with related adjustments to compensation expense over the service period of the deferred compensation.

The marketable securities held as of June 30, 2010, were denominated in U.S. dollars. The securities held in relation to the deferred compensation plan include Artio Global Funds whose underlying assets are primarily non-dollar denominated. The effect of a 10% change in exchange rates on such securities would not have a significant effect on the financial statements.

### *Exchange Rate Risk*

A substantial portion of the accounts that we advise, or sub-advise, hold investments that are denominated in currencies other than the U.S. dollar. These client portfolios may hold currency forwards or other derivative instruments. The fair value of these investments and instruments may be affected by movements in the rate of exchange between the U.S. dollar and the underlying foreign currency. Such movements in exchange rates affect the fair value of assets held in accounts we manage, thereby affecting the amount of revenue we earn. The fair value of the assets we manage was \$49.0 billion as of June 30, 2010. The fair value of the AuM would decrease, with an increase in the value of the U.S. dollar, or increase, with a decrease in the value of the U.S. dollar. A 10% increase or decrease in the value of the U.S. dollar would decrease or increase the fair value of the AuM by \$3.3 billion, which would cause an annualized increase or decrease in *Total revenues and other operating income* of \$21.0 million. As of June 30, 2010, approximately 67% of our AuM was in currencies other than the U.S. dollar, as compared to 78% as of March 31, 2010.

### *Interest Rate Risk*

Certain of the accounts we advise or sub-advise own fixed income securities. Further, from time to time, we may invest our excess cash balances in short-term U.S. government fixed income securities. Interest rate changes affect the fair value of such investments or the revenue we earn from them.

Assuming a 100 basis point increase or decrease in interest rates, we estimate that the value of the fixed income securities we manage or sub-advise would change by approximately \$420.9 million. The impact of such change would not have a material impact on our revenues or net income.

## **Table of Contents**

In connection with borrowings under our \$60 million term credit facility, assuming a 100 basis point increase or decrease in the LIBOR rate, the impact of such a change would not have a material impact on our net income.

### **Item 4. Controls and Procedures.**

As of the end of the period covered by this report, we carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the "Exchange Act")). Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective in alerting them in a timely manner to material information required to be disclosed in our periodic reports filed with the SEC.

During our most recent fiscal quarter, there has not occurred any change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

## **PART II OTHER INFORMATION**

### **Item 1. Legal Proceedings.**

We have been named in certain litigation. In the opinion of management, the possibility of an outcome from this litigation that is materially adverse to us is remote.

### **Item 1A. Risk Factors.**

Our Registration Statement on Form S-1 (File No. 333-166992) filed with the Securities and Exchange Commission on May 21, 2010, as amended, ( "Form S-1" ), contains a section entitled "Risk Factors." We incorporate that section of the Form S-1 in this filing and readers should refer to it.

### **Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.**

#### *Unregistered Sales of Equity Securities*

In connection with a synthetic secondary offering, on May 18, 2010, and June 9, 2010, Investors issued an aggregate of 7.2 million shares of Class A common stock to each Principal in exchange for an equivalent number of New Class A Units and the cancelation of an equivalent number of shares of Class B common stock. These issuances are exempt from registration pursuant to Section 4(2) of the Act.

#### *Use of Proceeds*

On June 9, 2010, we completed a synthetic secondary offering of approximately 3.8 million shares of Class A common stock at a price of \$17.33 per share, before the underwriting discount, for net proceeds of \$62.1 million. The net proceeds were used to repurchase, at the secondary offering price, net of the underwriting discount, an aggregate of 3.8 million shares of Class A common stock from the Principals. All repurchased shares were retired. This transaction is described in our Form S-1, as filed with the SEC on May 21, 2010, as amended.

On June 17, 2010, the underwriters (managed by Goldman Sachs & Co. as lead underwriter) exercised part of their option to purchase additional shares of Class A common stock at the secondary offering price, net of the underwriting discount, resulting in the issuance of approximately 0.4 million shares of Class A common stock. The net proceeds were used to repurchase, at the secondary offering price, net of the underwriting discount, approximately 0.4 million shares of Class A common stock from the Principals. All repurchased shares were retired.

**Table of Contents**

Investors share repurchase activity for each of the three months in the period ended June 30, 2010, was as follows:

<b>Period</b>	<b>Total Number of Shares Repurchased(a)</b>	<b>Average Price Paid Per Share \$</b>	<b>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(b)</b>	<b>Approximate Dollar Value of Shares that May Yet be Purchased Under the Plans or Programs(b)</b>

May 1, 2010 through May 31, 2010				
June 1, 2010 through June 30, 2010	4,208,695	16.46		
For the quarter ended June 30, 2010	4,208,695	16.46		

(a) This column reflects the repurchase and retirement of approximately 3.8 million shares of Class A common stock in connection with the secondary offering during the second quarter of 2010 and the repurchase and retirement of approximately 0.4 million shares of Class A common stock in connection with the exercise of a portion of the underwriters

option.

- (b) As of June 30, 2010, Investors did not have a share repurchase program. On July 27, 2010, our Board of Directors authorized a share repurchase program of up to 1,000,000 shares of our common stock. This repurchase is intended to eliminate the dilutive impact of restricted stock unit awards granted at the time of the IPO that have vested, or will vest, through 2011.
