Selling Security Holder Offering Prospectus

Viragen, Inc.

29,757,000 shares of common stock

This prospectus covers the resale of an aggregate of 29,757,000 shares of our common stock, consisting of 22,750,000 outstanding shares and 7,007,000 shares issuable upon exercise of outstanding common stock purchase warrants. We will not receive any proceeds from the sale of shares by the selling security holders.

Our common stock is listed on the American Stock Exchange under the symbol **VRA**. On February 6, 2004, the last reported sale price for our common stock was \$0.28 per share.

This investment involves a high degree of risk. You should purchase shares only if you can afford a complete loss. See Risk Factors beginning at page 7.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this prospectus is February 9, 2004.

ABOUT VIRAGEN

Because this is a summary, it does not contain all the information about us that may be important to you. You should read the more detailed information and the financial statements and related notes which are incorporated by reference in this prospectus.

Viragen, Inc. and its subsidiaries are engaged in the research, development, manufacture and sale of a natural human alpha interferon product designed to treat a broad range of viral and malignant diseases. Our strategy also includes the development of avian transgenics technology for the large-scale, cost-effective contract manufacturing of protein-based drugs. We are also researching and developing therapeutic protein-based drugs designed for the treatment of targeted cancers.

Our majority-owned subsidiary, Viragen International, Inc., whose shares are traded on the over-the-counter Bulletin Board under the symbol VGNI, is a biopharmaceutical company engaged in researching, developing, manufacturing and selling a natural human alpha interferon product designed to treat a broad range of viral and malignant diseases. Viragen International, Inc. produces a natural human alpha interferon product under the tradename *Multiferon*, from human white blood cells, also known as leukocytes. Natural interferon-alpha is one of the body's most important natural defense mechanisms to foreign substances like viruses, but it also stimulates and modulates the human immune system. In addition, interferon inhibits the growth of various viruses including those associated with diseases like hepatitis, some types of cancer, multiple sclerosis, and severe acute respiratory syndrome (SARS).

Our avian transgenic project is designed to enable us to produce protein-based drugs, including monoclonal antibodies, inside the eggs of specially developed chickens. Monoclonal antibodies are laboratory-produced, highly specialized therapeutic proteins that can locate and bind to cancer cells wherever they are in the body. Many monoclonal antibodies are used in cancer detection or therapy. Our goal is to develop a technology which will enable us to meet the large-scale production requirements for our own therapeutic protein-based products currently under development. We also believe this technology has potential to offer to others in the biopharmaceutical industry an alternate faster method of production of their protein-based products with higher capacity and at a lower cost. Specifically, using transgenic chickens in production may provide advantages over current traditional methods including relative ease of scale-up, time to develop commercial scale production levels and reduced capital outlay when compared to the most common production methods, which utilize capital intensive bioreactors.

We believe that no single approach or method is likely to treat all cancers effectively. We have approached the treatment of targeted cancers from several directions, which we believe will increase our likelihood of clinical success. In collaboration with the Memorial Sloan-Kettering Cancer Center, we have initiated research on human monoclonal antibodies targeting ganglioside GD3 for the treatment of melanoma and possibly certain other cancers. In collaboration with the UK's Cancer Research Campaign, we are developing monoclonal antibodies to block the protective effect of the protein CD55 on the surface of tumor cells. In collaboration with the University of Miami's Sylvester Comprehensive Cancer Center, we are researching and developing a specific anti-cancer technology designed to develop a novel form of an immune enhancing drug that has shown promise by inhibiting tumor growth in rats for a broad range of cancers. The drug is a novel 11 amino acid peptide called IEP 11, which was derived from a tumor transmembrane glycoprotein. We believe IEP 11 possesses anti-cancer vaccine properties, both prophylactically and therapeutically.

Our executive offices are located at 865 SW 78th Avenue, Suite 100, Plantation, Florida 33324. Our telephone number is (954) 233-8746; our facsimile number is (954) 233-1414. Unless otherwise indicated, references in this prospectus to Viragen, we, us and our are to Viragen, Inc., and our wholly-owned and majority-owned subsidiaries.

Table of Contents

Financial Matters

We issued common stock purchase warrants in connection with the sale of convertible debentures under our April and June 2003 securities purchase agreements. At the time of issuance the warrants were valued using their expected lives, which was less than their contractual lives. Ernst & Young LLP, our independent auditors, concurred with this approach. In January 2004, we were informed by Ernst & Young LLP that they had reevaluated their interpretation of the accounting literature as it relates to the accounting for common stock purchase warrants issued in connection with financing transactions. As a result of this subsequent interpretation, we and Ernst & Young LLP determined that valuing the warrants issued in connection with our April and June 2003 securities purchase agreements using their expected lives was not correct. By using the expected lives of the warrants, less value was attributed to them than if we had used the contractual lives. Thus, less discount was recorded on the convertible debentures issued under the April and June 2003 securities purchase agreements.

The additional discount associated with the convertible debentures resulted in an understatement of our non-cash interest expense and thus net loss of approximately \$436,000 in the quarter ended June 30, 2003 and \$477,000 in the quarter ended September 30, 2003. Additionally, the carrying value of the convertible debentures was overstated and total stockholders' equity was correspondingly understated by approximately \$986,000 and \$509,000 as of June 30, 2003 and September 30, 2003, respectively. After consideration of all of the facts and circumstances, we recognized the full amount of the prior period non-cash interest expense in the quarter ended December 31, 2003, as management believes it is not material to any period affected. Also, we will record additional non-cash interest expense of approximately \$509,000 in the quarter ended December 31, 2003 relating to this matter. Since the amortization of the additional discount resulted in non-cash interest expense, there is no impact on the cash flows of the Company for the June 30, 2003, September 30, 2003 and December 31, 2003 periods. As of December 31, 2003 there is no effect on total stockholders' equity as a result of these adjustments.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the Securities and Exchange Commission a registration statement on Form S-3 under the Securities Act for the common stock offered by this prospectus. This prospectus, which is a part of the registration statement, does not contain all of the information in the registration statement and the exhibits filed with it, portions of which have been omitted as permitted by Securities and Exchange Commission rules and regulations. For further information concerning us and the securities offered by this prospectus, we refer to the registration statement and the exhibits filed with it. Statements contained in this prospectus as to the content of any contract or other document referred to are not necessarily complete. Where a contract or other document is an exhibit to the registration statement, you should review the provisions of the exhibit to which reference is made. You may obtain these exhibits from the Securities and Exchange Commission, as discussed below.

We are required to file annual, quarterly, and current reports, proxy statements and other information with the Securities and Exchange Commission. You may read and copy these filings at the Securities and Exchange Commission's Public Reference Room at 450 Fifth Street, N.W. Washington, D.C. 20549, and at the Securities and Exchange Commission's regional offices located in New York, NY and Chicago, IL. You may request copies of these documents by writing to the Securities and Exchange Commission and paying the required fee for copying. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for more information about the operation of their public reference rooms. Copies of our filings are also available at the Securities and Exchange Commission website at <http://www.sec.gov>.

The Securities and Exchange Commission allows us to incorporate by reference information that we file with them, which means that we can disclose important information to you by referring you to those documents. The information incorporated by reference is an important part of this prospectus, and information that we file later with the Securities and Exchange Commission will automatically update and supercede this information. We incorporate by reference the documents listed below and any future filings we make with the Securities and Exchange Commission under Section 13(a), 14 or 15(d) of the Securities Exchange Act of 1934:

Our Current Report on Form 8-K dated December 23, 2003 filed with the SEC on December 31, 2003;

Our Quarterly Report on Form 10-Q for the quarter ended September 30, 2003 filed with the SEC on November 12, 2003;

Our Current Report on Form 8-K dated September 29, 2003 filed with the SEC on October 2, 2003;

Our Annual Report on Form 10-K for the fiscal year ended June 30, 2003 filed with the SEC on September 29, 2003; and

Our Current Report on Form 8-K dated July 1, 2003 filed with the SEC on July 1, 2003.

We will deliver without charge a copy of our Annual Report on Form 10-K for the fiscal year ended June 30, 2003 and our Quarterly Report on Form 10-Q that has been filed with the SEC for any quarter ended after June 30, 2003 to each person receiving a copy of this prospectus. If you need an additional copy of these documents, or if you would like to receive a copy of the other items referenced above, you may request copies, at no cost, by writing or telephoning us at the following address:

FORWARD-LOOKING STATEMENTS

This prospectus, and other documents that we have incorporated by reference or included by attachment, contain forward-looking statements. Forward-looking statements express our expectations or predictions of future events or results. They are not guarantees and are subject to many risks and uncertainties. There are a number of factors many beyond our control that could cause actual events or results to be significantly different from those described in the forward-looking statement. Any or all of our forward-looking statements in this report or in any other public statements we make may turn out to be wrong.

Forward-looking statements might include one or more of the following:

anticipated debt or equity fundings;

projections of future revenue;

anticipated clinical trial commencement dates, completion timelines or results;

descriptions of plans or objectives of management for future operations, products or services;

forecasts of future economic performance; and

descriptions or assumptions underlying or relating to any of the above items.

Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They use words such as anticipate, estimate, expect, project, intend, plan, believe or words of similar meaning. They may also use words such as will, would, could or may. Factors that may cause our actual results to differ materially from those described in forward-looking statements include the risks discussed elsewhere in this prospectus under the caption Risk Factors.

Table of Contents

RISK FACTORS

An investment in our common stock is highly speculative. You should be aware you could lose the entire amount of your investment. Prior to making an investment decision, you should carefully read this entire prospectus and consider the following risk factors. The risks and uncertainties described below are not the only ones we face. There may be additional risks and uncertainties that are not known to us or that we do not consider to be material at this time. If the events described in these risks occur, our business, financial condition and results of operations could be adversely affected. This prospectus contains forward-looking statements that involve risks and uncertainties. Our actual results may differ significantly from the results discussed in the forward-looking statements. This section discusses the business risk factors that might cause those differences.

Risks Related to Our Financial Condition

We have a history of losses due to lack of significant sales and regulatory approvals. If we do not receive necessary regulatory approvals and develop profitable operations, we will need to terminate our operations. As a result, investors may lose their entire investment.

Since the organization of Viragen, we have incurred operating losses. Losses have totaled:

\$3,903,253 for the three month period ended September 30, 2003;

\$17,348,686 for the fiscal year ended June 30, 2003;

\$11,088,832 for the fiscal year ended June 30, 2002; and

\$11,007,809 for the fiscal year ended June 30, 2001.

At September 30, 2003, we had an accumulated deficit since organization of \$106,194,464, and our working capital totaled \$9,384,037.

We presently produce a natural human alpha interferon product under the name *Multiferon*. The product is approved in Sweden and Mexico for the treatment of chronic myeloid leukemia, hairy cell leukemia and for the treatment of any and all diseases for which recombinant interferon therapy failed or the patient was unable to tolerate the regimen. The product is also approved for sale in the treatment of chronic myeloid leukemia and hairy cell leukemia in the Czech Republic, Egypt, Hong Kong, Indonesia, Myanmar and Thailand. However, as the United States Food and Drug Administration and other European Union regulatory authorities have not approved our natural interferon product, we have limited sales revenues. We have not sought the approval of our natural human interferon product from the United States Food and Drug Administration or its European Union counterparts, except Sweden.

We will not be able to significantly reduce our losses or operate profitably until we obtain the necessary approvals to manufacture and sell natural interferon or other products on a widely accepted basis. We expect sales of natural interferon to be our primary source of income for the foreseeable future. Investors must understand that our natural interferon product may never receive certain approvals sought from regulatory authorities. In addition, even if approval is received, we may not be able to achieve sufficient profit from the sale of natural interferon. If we do not obtain the required approvals, or we do not profit from the sale of natural interferon or other products, we will likely cease operations. In that case, investors in Viragen will likely lose their entire investment.

Table of Contents

Our business is capital intensive, and because we do not currently generate sufficient operating revenues, we will require additional financing that may not be available to us. If we are unable to obtain additional funds from other financings we may have to significantly curtail the scope of our operations.

We believe that our cash and cash equivalents are sufficient to meet our operating requirements through our fiscal year ending June 30, 2004. As of September 30, 2003, we had approximately \$8.4 million in cash. Subsequent to September 30, 2003 we received approximately \$6.0 million from the exercise of outstanding common stock purchase warrants and the sale of our common stock. For our fiscal year ending June 30, 2004, we estimate the need for approximately \$8.5 million for operating activities, \$1.5 million for investing activities and \$0.5 million to service our outstanding debt obligations. Subsequent to December 31, 2004 it will be necessary for us to raise additional funding in order to continue our operating activities.

Our operating losses and working capital requirements continue to adversely affect cash flow. Product sales for our fiscal years ended June 30, 2001, 2002 and 2003 were \$0, \$1,275,264 and \$630,785, respectively, which were not sufficient to generate positive cash flow from operations. We are dependant upon further equity or debt fundings to successfully execute our business plan. In the event of our inability to raise sufficient capital, or a lack of expanded revenue from the sale of our natural interferon product, we would be required to significantly curtail or suspend a portion or all of our operations. Further, sufficient funding may not be available to finance planned future scientific collaborations, planned marketing efforts or planned plant facility expansions or modifications. Any failure to raise additional funds in the future may also result in our inability to successfully promote our brand name, complete existing and/or undertake new research and development projects, take advantage of business opportunities or respond to competitive pressures, any of which could have a material adverse effect on our financial condition and results of operations.

The recent economic and political environment has made raising capital difficult and we have found few sources of available funds.

As a result of the decline in the capital markets, which began in 2000, and certain world events including the September 11, 2001 terrorist attacks on the United States, we have experienced a reduction in available investment capital coupled with investors' general reluctance to invest in development companies. Our success in attracting additional funding has been limited to transactions in which our equity is used as currency. Financing activities during this period have consisted of sales of our common stock at a discount to the market price and the issuance of debentures convertible into shares of our common stock, usually at a discount to prevailing market prices. In light of the availability of this type of financing, and the lack of alternative proposals, our board of directors has determined that the continued use of our equity for these purposes may be necessary if Viragen is to sustain operations.

Table of Contents

Risks Related to this Offering and the Market for our Shares

The issuance of our shares under our December 2003 securities purchase agreement and upon exercise of outstanding options or warrants to purchase our common stock may cause significant dilution to our stockholders and may have an adverse impact on the market price of our common stock.

As of the date of this prospectus, there are 365,919,879 shares of our common stock outstanding. Resales of shares by the purchasers under our December 2003 securities purchase agreement will increase the number of our publicly traded shares, which could depress the market price of our common stock. Moreover, as all the shares we issued under the securities purchase agreement will be available for immediate resale as of the date of this prospectus, the mere prospect of these resales could depress the market price for our common stock. The shares of our common stock issued under the securities purchase agreement were sold at approximately 80% of the closing market price on the trading day preceding the closing date of the transaction. The issuance of shares under the securities purchase agreement therefore diluted the equity interest of existing stockholders.

The perceived risk of dilution may cause our stockholders to sell their shares, which would contribute to a downward movement in the stock price of our common stock. Moreover, the perceived risk of dilution and the resulting downward pressure on our stock price could encourage investors to engage in short sales of our common stock. By increasing the number of shares offered for sale, material amounts of short selling could further contribute to progressive price declines in our common stock.

As of the date of this prospectus, there are 33,910,393 shares of our common stock issuable upon exercise or conversion of the following securities. These securities represent approximately 9.3% of our outstanding shares outstanding as of the date of this prospectus.

Convertible preferred stock, Series A	11,289
Officers, employees, and directors options (exercisable at an average price of \$1.20 through June 2009)	2,592,000
Consultant warrants (exercisable at an average price of \$2.56 through February 2009)	1,988,500
Debt and equity offering warrants (exercisable at an average price of \$0.24 through June 2008)	29,318,604
	33,910,393

In the event that our stockholders do not approve and ratify certain financing transactions, including the transactions in which the shares covered by this prospectus were issued, we could be in violation of American Stock Exchange requirements, which could serve as a basis for delisting.

We have scheduled our 2004 annual meeting of stockholders for March 2004. At the annual meeting, stockholders, among other things, will be requested to approve and ratify certain financing transactions consummated by us in which shares of our common stock were issued and are issuable. American Stock Exchange rules provide that we obtain stockholder approval for the issuance or potential issuance of more than 19.9% of our outstanding common stock in one transaction or a series of related transactions. Since there are common purchasers to the transactions to be voted upon by stockholders, these transactions may be deemed to be a series of related transactions. While the transactions were authorized by our board of directors and consummated, in the event that our stockholders do not approve and ratify the transactions, the AMEX could assert that we have not obtained the necessary stockholder approval and that we are, therefore, not in compliance with AMEX requirements. In such event, the

Table of Contents

AMEX could use such non-compliance as a basis to delist our shares. The market for our shares could be adversely affected if our shares were delisted by the AMEX.

We are engaged in the biotechnology industry; as a result, the market price for our common stock may be subject to extreme volatility.

The market for securities of biotechnology companies, including companies such as ours, has historically been more volatile than the market for stocks in general. As a result, the price of our common stock may be subject to wide fluctuations in response to factors, some of which are beyond our control, including, without limitation:

quarter-to-quarter variations in our operating results;

our announcement of material events;

price fluctuations in sympathy to others engaged in our industry; and

the effects of media coverage of our business.

Because of the limited trading market for our common stock, and because of the possible price volatility, you may not be able to sell your shares of common stock when you desire to do so. The inability to sell your shares in a rapidly declining market may substantially increase your risk of loss because of such illiquidity and because the price for our common stock may suffer greater declines because of its price volatility.

Viragen's common stock traded on the over-the-counter Bulletin Board from June 29, 1999 through April 16, 2000, under the symbol VRGN. Our common stock began trading on the American Stock Exchange on April 17, 2000, under the symbol VRA. Our common stock has traded between a high of \$1.69 and a low of \$0.05 since January 1, 2001.

We could use preferred stock to resist takeovers, and the issuance of preferred stock may cause additional dilution.

Our Certificate of Incorporation authorizes the issuance of up to 1,000,000 shares of preferred stock, of which 2,650 shares of series A preferred stock are issued and outstanding on the date of this prospectus. Our Certificate of Incorporation gives our board of directors the authority to issue preferred stock without approval of our stockholders. We may issue additional shares of preferred stock to raise money to finance our operations. We may authorize the issuance of the preferred stock in one or more series. In addition, we may set the terms of preferred stock, including:

dividend and liquidation preferences;

voting rights;

conversion privileges;

redemption terms; and

other privileges and rights of the shares of each authorized series.

The issuance of large blocks of preferred stock could possibly have a dilutive effect to our existing stockholders. It can also negatively impact our existing stockholders' liquidation preferences. In addition, while we include preferred stock in our capitalization to improve our financial flexibility, we could possibly issue our preferred stock to friendly third parties to preserve control by present management. This could occur if we become subject to a hostile takeover that could ultimately benefit Viragen and Viragen's stockholders.

Table of Contents

Risks Related to our Business

Competitive conditions in the pharmaceutical industry may force us to terminate operations.

Competition for investment capital and market share in the immunological and pharmaceutical products industry is very strong. Our competitors, which include major pharmaceutical companies, have more experience in research, development and clinical testing of pharmaceutical and biomedical products. We have not yet developed an immunological product that can be widely marketed. Our competitors also have greater financial, marketing and human resources. Some of our competitors, including Hoffmann-La Roche, Inc. and Schering-Plough Corporation, have received approvals for their synthetic interferons. They have been marketing their products since 1986 and have received wide acceptance from the medical community and the patient population for their products. This will make it more difficult for us to introduce and penetrate the market with our product, if and when we receive the necessary regulatory approvals. We expect competition to increase in the future.

In addition, technological advances made by our competitors may make synthetic interferon products more effective, less costly and with less harmful side effects. We may not be able to keep pace with technological advances by others, either because we do not have sufficient resources or because we cannot achieve greater improvements in our technology. If we are unable to compete with our larger, more experienced competitors, we will likely terminate operations.

Competition for funding in the pharmaceutical industry is also intense. We have a limited source of income at this time, and we will require additional funding to conduct clinical trials so we may receive regulatory approvals. We must obtain additional funding from outside sources to conduct these trials. If we are unable to locate funding or obtain funding on reasonable terms, we will likely terminate operations. In that case, investors in Viragen will likely lose their entire investment.

Government regulation may affect Viragen's ability to develop and distribute natural interferon.

All pharmaceutical manufacturers are subject to state, federal and foreign rules and regulations, including those of the United States Food and Drug Administration, Asian markets and the European Union regulatory authorities. These rules and regulations are constantly changing. These changes could extend the period of clinical trials, involve costly compliance measures and may restrict our ability to produce and distribute our natural interferon product based on the results of testing. It is possible that we may never receive these regulatory approvals for any specific illness or range of illnesses that we are attempting to treat with our natural interferon product.

If patients have problems receiving third party reimbursements for natural interferon, it will be more difficult to market our product. In addition, our marketing costs would increase.

Our ability to successfully market our products will depend in part on the availability of reimbursements from government health administration authorities, private health coverage insurers and other organizations. The pricing of products similar to ours, or the amount of reimbursement available to patients, may affect our ability to market our product at a profit. Third party reimbursement limitations could restrict the patient population that will use our product. If third party payors decline or otherwise limit reimbursement for our product, sales would likely decline and we could be required to increase our marketing efforts, which, in turn, will involve greater expense to us.

Table of Contents

Our proprietary technology and any future patents that we receive may not provide sufficient protection to us.

We intend to rely, in part, on technology developed by our scientists for the efficient and safe production of natural interferon, our avian transgenics technologies and our oncology technologies. If we are not successful in obtaining patents or demonstrating that our production processes are proprietary under trade secret law, we will have limited protection against those who might copy our technology. We have not received any communications or had any conversations with the owners of related patents that may potentially make claims or who have threatened to make a claim that our patents infringe their patents. However, we may be damaged if we are accused of misappropriating a competitor's proprietary technology, even if these claims are untrue. We cannot assure you that any of our patent applications will be approved. Even if granted, we cannot assure you that these patents or any future patent applications or our other proprietary rights will provide sufficient protection to us.

We may not be able to produce targeted drugs in egg whites of transgenic chickens in commercially viable quantities.

Our avian transgenics project, still in the development stage, is designed to enable Viragen to produce protein-based drugs, including monoclonal antibodies, inside the egg whites of transgenic developed chickens. Even if we are successful in producing the targeted proteins in egg whites, we are unable to predict whether this technology will yield commercially viable quantities.

Technology transfers to third parties may not result in revenue to us.

One of our proposed marketing strategies is to license our manufacturing technology to third parties. They, in turn, will use our technology to produce and market our natural interferon outside the United States of America. We cannot guarantee that these third parties will be able to successfully market the product or that we will receive revenue from their efforts.

We may be exposed to product liability claims, and our product liability insurance may not be sufficient to cover all claims or continue to be available to us.

Persons who claim to be injured from use of our natural interferon, or other products or processes, may file claims for personal injuries or other damages against us. Directives in the European Union provide for strict liability and permit compensation claims to be made within a ten year period from when the product is placed on the market, and three years from the event giving rise to the claim, thereby creating a 13 year period within which compensation claims could be asserted. In order to protect ourselves against these claims, we maintain product liability insurance in the amount of \$5,000,000. We cannot be sure that our insurance coverage will be adequate to insulate us from liabilities that may result from the use of our products. Also, in the future this type of insurance may not be available, or we may not be able to afford this form of insurance.

Table of Contents

Our reliance on foreign third party manufacturers may disrupt operations.

Foreign manufacturing could expose us to risks involved with fluctuations in exchange rates of foreign currencies. In addition, reliance on international vendors exposes us to all the risks of dealing with a foreign manufacturing source. These risks include:

unexpected changes in regulatory requirements;

tariffs and other trade barriers, including import and export restrictions;

political or economic instability;

compliance with foreign laws;

transportation delays and interruptions;

difficulties in protecting intellectual property rights in foreign countries; and

currency exchange risks.

Foreign manufacturing arrangements may also limit our control, and could disrupt our operations, which, in turn, could negatively impact upon your investment in us.

We do not expect to pay dividends in the foreseeable future.

We have never paid cash dividends on our common stock. We do not expect to pay cash dividends on our common stock any time in the foreseeable future. The future payment of dividends directly depends upon our future earnings, capital requirements, financial requirements and other factors that our board of directors will consider. For the foreseeable future, we will use earnings from operations, if any, to finance our growth, and we will not pay dividends to our common stockholders. You should not rely on an investment in our common stock if you require dividend income. The only return on your investment in our common stock, if any, would most likely come from any appreciation of our common stock.

We depend on the continued services of our executive officers and on our ability to attract and maintain other qualified employees.

While we do not rely upon one specific individual to provide the management and scientific leadership, the team of executive management in the U.S. and the scientific teams located in Scotland and Sweden, taken together, are crucial to the future development of the company. Though competition for qualified scientific and managerial personnel is at times intense in the markets in which we operate, we have in the past had a high level of success in attracting and retaining such personnel, and, while we can give you no assurance, we anticipate continued success in such regard in the future.

Table of Contents

USE OF PROCEEDS

We will not receive any of the proceeds from the sale of shares by the selling security holders. To the extent that the warrants underlying certain of the shares covered by this prospectus are exercised on other than a cashless basis, we could receive gross proceeds of up to approximately \$1.81 million. We intend to use any net proceeds we receive upon the exercise of warrants for general corporate purposes, including:

funding of the commercialization of our *Multiferon* product;

funding collaborative research projects for the development of new technologies;

financing capital expenditures;

payment of financing obligations; and

working capital.

Pending use of the net proceeds for any of these purposes, we may invest the net proceeds in short-term, investment grade, interest-bearing securities.

SELLING SECURITY HOLDERS

Securities Purchase Agreement dated December 23, 2003

On December 23, 2003, we entered into a securities purchase agreement with Palisades Master Fund LP, Alpha Capital AG, Crescent International, Ltd., Bristol Investment Fund Ltd., Gryphon Master Fund, LP and Gamma Opportunity Capital Partners, LP for the purchase of an aggregate of \$4,550,000 of our common stock. The shares our common stock were purchased at a price of \$0.20 per share, which was approximately 80% of the closing bid price for our common stock on the trading day preceding the closing date of the transaction. Under the terms of the securities purchase agreement, we also issued common stock purchase warrants to the investors to purchase an aggregate of 6,825,000 shares of our common stock at \$0.26 per share for a period of three years. The warrants are exercisable on a cashless basis, whereby the holder, rather than pay the exercise price in cash, may surrender a number of warrants equal to the exercise price of the warrants being exercised.

HPC Capital Management acted as placement agent in connection with the December 23, 2003 securities purchase agreement. HPC Capital Management introduced us to the selling security holders and assisted us with structuring the securities purchase agreement. As consideration for HPC Capital Management's services as placement agent in connection with this securities purchase agreement, we paid \$295,750, or 6.5% of the gross proceeds, to HPC Capital Management, and issued them a warrant to purchase up to 182,000 shares of our common stock, exercisable at a price of \$0.20 per share for a period of three years.

Resale of the shares of our common stock issued and issuable in connection with the securities purchase agreement dated December 23, 2003 is covered by this prospectus.

Table of Contents**Ownership Table**

The following table sets forth:

the name of each selling security holder;

the amount of common stock owned beneficially by each selling security holder;

the number of shares that may be offered by each selling security holder pursuant to this prospectus;

the number of shares to be owned by each selling security holder following sale of the shares covered by this prospectus; and

the percentage of our common stock to be owned by each selling security holder following sale of the shares covered by this prospectus (based on 365,919,879 shares of common stock of Viragen outstanding as of the date of this prospectus), as adjusted to give effect to the issuance of shares upon the exercise of the named selling security holder's warrants, but no other person's warrants.

Beneficial ownership is determined in accordance with the rules of the SEC and generally includes voting or investment power with respect to outstanding voting securities, as well as any voting securities which the person has the right to acquire within 60 days, through the conversion or exercise of any security or other right. The information as to the number of shares of our common stock owned by each selling security holder is based upon our books and records and the information provided by our transfer agent.

We may amend or supplement this prospectus, from time to time, to update the disclosure set forth in the table. Because the selling security holders identified in the table may sell some or all of the shares owned by them which are included in this prospectus, and because there are currently no agreements, arrangements or understandings with respect to the sale of any of the shares, no estimate can be given as to the number of shares available for resale hereby that will be held by the selling security holders upon termination of this offering. We have, therefore, assumed for the purposes of the following table, that the selling security holders will sell all of the shares owned beneficially by them, which are covered by this prospectus, but will not sell any other shares of our common stock that they presently own.

Name of Selling Security Holder	Number of Shares Beneficially Owned and to be Owned (8)	Number of Shares to be Offered	Number of Shares Owned After Offering	Percent After Offering
Palisades Equity Fund LP	12,009,821(1)	11,050,000	959,821	*
Alpha Capital AG	9,950,887(2)	2,600,000	7,350,887	2.0%

* less than 1%

(1) Includes 8,500,000 shares of common stock held and 2,550,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 959,821 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement. PEF Advisors, LLC ("PEF") serves as investment manager to Palisades Equity Fund LP, a limited partnership formed under the laws of the British Virgin Islands ("Palisades"). By reason of such relationships, PEF may be deemed to have dispositive power

Table of Contents

over the shares of our common stock owned by Palisades. PEF disclaims beneficial ownership of such shares of our common stock. As of October 30, 2003, Mr. Paul T. Mannion, Jr. and Mr. Andrew S. Reckles, managing members of PEF, have delegated authority from the members of PEF regarding the portfolio management decisions of Palisades with respect to the shares of common stock owned by Palisades. By reason of such delegated authority, Messrs. Mannion and Reckles may be deemed to share dispositive power over the shares of our common stock owned by Palisades. Messrs. Mannion and Reckles disclaim beneficial ownership of such shares of our common stock and neither of such persons has any legal right to maintain such delegated authority. The address of Messrs. Mannion and Reckles is 200 Mansell Court East, Suite 550A, Roswell, Georgia, 30076.

(2) Includes 2,000,000 shares of common stock held and 600,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 758,929 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement, 2,768,695 shares underlying common stock purchase warrants issued to Alpha Capital in connection with a securities purchase agreement dated June 27, 2003 and 3,823,263 shares underlying common stock purchase warrants issued to Alpha Capital on June 11, 2003. The person making investment decisions for the named selling security holder is Konrad Ackerman, whose address is Pradafant 7, Furstentums 9490, Vaduz, Liechtenstein.

(3) Includes 5,000,000 shares of common stock held and 1,500,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 892,857 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement and 4,166,667 shares underlying common stock purchase warrants issued to Crescent International on June 26, 2003. Also includes 539,801 shares of common stock acquired in other prior financing transactions with Viragen. Mel Crow and Maxi Brezzi, in their capacity as managers for GreenLight (Switzerland) SA, the investment advisor to Crescent, share voting and dispositive power over the shares offered by Crescent. Messrs. Crow and Brezzi disclaim beneficial ownership of such shares of our common stock. The address for Messrs. Crow and Brezzi is 84 Avenue Louis-Casai, CH 1216 Cointrin, Geneva, Switzerland.

(4) Includes 3,750,000 shares of common stock held and 1,125,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 758,929 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement and 2,083,334 shares underlying common stock purchase warrants issued to Bristol Investment Fund on June 9, 2003. The person making investment decisions for the named selling security holder is Paul Kessler, whose address is 6363 Sunset Boulevard, 5th Floor, Hollywood, California 90028.

Table of Contents

(5) Includes 2,500,000 shares underlying convertible debentures and 750,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 446,429 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement and 384,349 shares underlying common stock purchase warrants issued to Gryphon Master Fund, LP in connection with a securities purchase agreement dated June 27, 2003. The person making investment decisions for the named selling security holder is E. B. Lyon IV, whose address is 500 Crescent Court, Suite 270, Dallas, Texas, 75201.

(6) Includes 1,000,000 shares of common stock held and 300,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Christopher Rossman has voting and dispositive power over the shares of our common stock owned by Gamma Opportunity Capital Partners. The address of Mr. Rossman is British Colonial Centre of Commerce, One Bay Street, Suite 401, Nassau, Bahamas.

(7) Includes 182,000 shares underlying common stock purchase warrants issued in connection with the December 23, 2003 securities purchase agreement. Also includes 480,000 shares of common stock issued in connection with the letter agreement dated January 5, 2004. Also includes 275,000 shares of common stock and 191,000 shares underlying common stock purchase warrants issued in connection with the September 29, 2003 securities purchase agreement and 250,000 shares underlying common stock purchase warrants issued to HPC Capital Management in connection with a common stock purchase agreement dated March 31, 2003. The person making investment decisions for the named selling security holder is Paul T. Mannion, Jr., whose address is 200 Mansell Court East, Suite 550A, Roswell, GA 30076.

(8) Holders of Viragen's warrants have contractually agreed not to exercise at a time when exercise would result in beneficial ownership of more than 4.99% of the number of shares of our common stock outstanding immediately after giving effect to the exercise.

Certain of the selling security holders have participated in prior financings concluded by us. The following table describes their participation. The table does not give effect to the conversion of debentures or exercise of warrants that took place subsequent to the date of financing.

HPC Capital Management has previously acted as placement agent in connection with the placement of certain of our securities. In connection with those services, HPC Capital Management was issued shares of our common stock and common stock purchase warrants. We are advised that HPC Capital Management continues to own 755,000 shares of our common stock and 623,000 common stock purchase warrants all of which are reflected in the selling security holder table above.

Neither the selling security holders nor HPC Capital Management has held any positions or offices or had material relationships with us or any of our affiliates within the past three years other than as a result of the ownership of our common stock. If, in the future, the selling security holders or HPC Capital Management's relationship with us changes, we will amend or supplement this prospectus to update this disclosure.

Table of Contents

PLAN OF DISTRIBUTION

The selling stockholders of the common stock of Viragen, Inc. and any of their pledgees, assignees and successors-in-interest may, from time to time, sell any or all of their shares of common stock on any stock exchange, market or trading facility on which the shares are traded or in private transactions. These sales may be at fixed or negotiated prices. The selling stockholders may use any one or more of the following methods when selling shares:

ordinary brokerage transactions and transactions in which the broker-dealer solicits purchasers;

block trades in which the broker-dealer will attempt to sell the shares as agent but may position and resell a portion of the block as principal to facilitate the transaction;

purchases by a broker-dealer as principal and resale by the broker-dealer for its account;

an exchange distribution in accordance with the rules of the applicable exchange;

privately negotiated transactions;

settlement of short sales;

broker-dealers may agree with the selling stockholders to sell a specified number of such shares at a stipulated price per share;

a combination of any such methods of sale; and

any other method permitted pursuant to applicable law.

The selling stockholders may also sell shares under Rule 144 under the Securities Act of 1933, as amended, if available, rather than under this prospectus.

Broker-dealers engaged by the selling stockholders may arrange for other broker-dealers to participate in sales. Broker-dealers may receive commissions or discounts from the selling stockholders (or, if any broker-dealer acts as agent for the purchaser of shares, from the purchaser) in amounts to be negotiated. The selling stockholders do not expect these commissions and discounts to exceed what is customary in the types of transactions involved.

The selling stockholders may, from time to time, pledge or grant a security interest in some or all of the shares of common stock owned by them and, if they default in the performance of their secured obligations, the pledgees or secured parties may offer and sell the shares of common stock, from time to time, under this prospectus, or under an amendment to this prospectus under Rule 424 (b)(3) or other applicable provision of the Securities Act of 1933, as amended, amending the list of selling stockholders to include the pledgee, transferee or other successors-in-interest as selling stockholders under this prospectus.

The selling stockholders and any broker-dealers or agents that are involved in selling the shares may be deemed to be underwriters within the meaning of the Securities Act of 1933, as amended, in connection with such sales. In such event, any commissions received by such broker-dealers or agents and any profit on the resale of the shares purchased by them may be deemed to be underwriting commissions or discounts under the Securities Act of 1933, as amended. The selling stockholders have informed us that they do not have any agreement or understanding, directly or indirectly, with any person to distribute the common stock.

We are required to pay certain fees and expenses incurred by us incident to the registration of the shares covered by this prospectus. We have agreed to indemnify the selling stockholders against certain losses, claims, damages and liabilities, including liabilities under the Securities Act of 1933, as amended.

Table of Contents

DESCRIPTION OF SECURITIES

Viragen is currently authorized to issue up to 700,000,000 shares of common stock, par value \$.01 per share and 1,000,000 shares of preferred stock, par value \$1.00 per share. As of the date of this prospectus, there are 365,919,879 shares of common stock and 2,650 shares of series A preferred stock outstanding.

Common Stock

Subject to the dividend rights of preferred stockholders, common stockholders share dividends on a proportionate basis, as may be declared by the board of directors. Upon liquidation, dissolution or winding up of Viragen, after payment to creditors and holders of our outstanding preferred stock, Viragen's remaining assets, if any, will be divided proportionately on a per share basis among the holders of our common stock.

Each share of our common stock has one vote. Holders of our common stock do not have cumulative voting rights. This means that the holders of a plurality of the shares voting for the election of directors can elect all of the directors. In that event, the holders of the remaining shares will not be able to elect any directors. Viragen's By-Laws provide that a majority of the outstanding shares of our common stock are a quorum to transact business at a stockholders' meeting. Our common stock has no preemptive, subscription or conversion rights. Also, our common stock is not redeemable.

Preferred Stock

Viragen is authorized to issue a total of 1,000,000 shares of preferred stock, par value \$1.00 per share. Viragen's board of directors may issue preferred stock by resolutions, without any action of the stockholders. These resolutions may authorize issuance of preferred stock in one or more series. In addition, the board of directors may fix and determine all privileges and rights of the authorized preferred stock series including:

dividend and liquidation preferences,

voting rights,

conversion privileges, and

redemption terms.

Viragen includes preferred stock in its capitalization to improve its financial flexibility. However, Viragen could use preferred stock to preserve control by present management, in the event of a potential hostile takeover of Viragen. In addition, the issuance of large blocks of preferred stock could have a dilutive effect to existing holders of Viragen's common stock.

Series A Preferred Stock

Viragen established the series A preferred stock in November 1986. Each share of series A preferred stock is immediately convertible into 4.26 shares of our common stock. Dividends on the series A preferred stock are cumulative and have priority to our common stock. These dividends are payable in either cash or common stock, at Viragen's option.

Table of Contents

The series A preferred stock has voting rights only if dividends are in arrears for five annual dividends. Upon this occurrence, the voting is limited to the election of two directors. Voting rights terminate upon payment of the cumulative dividends. Viragen may redeem the series A preferred stock at any time after expiration of ten consecutive business days during which the bid or last sale price for our common stock is \$6.00 per share or higher. There is no mandatory redemption or sinking fund obligation for the series A preferred stock.

Owners of the series A preferred stock are entitled to receive \$10.00 per share, plus accrued and unpaid dividends, upon liquidation, dissolution or winding up of Viragen. This must be satisfied before any distribution or payment is made to holders of the common stock or other stock of Viragen junior to the series A preferred stock.

Transfer Agent

The transfer agent for the shares of our common stock is Mellon Investor Services, Overpeck Center, 85 Challenger Road, Ridgefield Park, New Jersey 07660-2108.

LEGAL MATTERS

Schneider Weinberger LLP will review the validity of the issuance of the shares of common stock offered by this prospectus. Schneider Weinberger LLP is located at 2499 Glades Road, Suite 108, Boca Raton, Florida 33431.

EXPERTS

Ernst & Young LLP, independent certified public accountants, have audited our consolidated financial statements included in our Annual Report on Form 10-K for the year ended June 30, 2003, as set forth in their report, and which is incorporated by reference in this prospectus and elsewhere in the registration statement. Our consolidated financial statements are incorporated by reference in reliance on Ernst & Young LLP's report, given on their authority as experts in accounting and auditing.
