UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-KSB

(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the fiscal year ended June 30, 2001

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from _____ to _____

Commission file number: 001-12531
ASPEN EXPLORATION CORPORATION

(Name of small business issuer in its charter)

Delaware

(State or other jurisdiction of
incorporation or organization)

84-0811316

(IRS Employer
Identification No.)

2050 S. Oneida St., Suite 208
Denver, Colorado

80224-2426

(Address of principal executive offices)

(Zip Code)

Issuer's telephone number: (303) 639-9860

Securities registered pursuant to Section 12(b) of the Exchange Act: None

Securities registered pursuant to Section 12(g) of the Act:
Common Stock, \$0.005 par value

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes X No
--- ---

Check if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-B contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendment to this Form 10-KSB. Yes X No ___

Aspen's revenues for the fiscal year ended June 30, 2001 were \$3,940,563.

At September 24, 2001, the aggregate market value of the shares held by non-affiliates was approximately \$3,058,378.70. The aggregate market value was

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

contractors retained from time to time by Aspen, and, to a lesser extent, unsolicited submissions, we have identified and will continue to identify prospects that we believe are suitable for drilling and acquisition.

Currently, our primary area of interest is in the state of California. We have acquired a number of interests in oil and gas properties in California, as described below in more detail. In addition, we also act as operator for a number of our producing wells and receive management revenues for these services.

Aspen has information on hand which indicates coal deposits exist under the approximate 2,074 acres of leases which Aspen has obtained in Arapahoe and Elbert Counties, Colorado. We do not know if it is possible or economically feasible to produce any coalbed methane which may exist on these leases. The leases are paid-up oil and gas leases (which includes coalbed methane) with a three year term and are renewable for an additional two years. As of June 30, 2001 we have approximately 2,074 gross and net acres of nonproducing leasehold in Colorado. We do not intend to proceed with exploration and development of these properties on our own, rather, we intend to farm out the project to another party. There is no assurance we will be successful in so doing.

Mineral Exploration and Development. During fiscal 1997 and 1998, we also focused our attention on uranium deposits in sandstone in Wyoming. However, the market for uranium projects did not develop as we had anticipated, and we made the decision not to carry out the extensive mining claim and lease acquisition and maintenance necessary to assemble large blocks of land needed for uranium exploration programs. In March 1998, we transferred our interest in two uranium projects in Wyoming to a privately-held Canadian company which issued its capital stock and made cash payments to Aspen. The Canadian company returned the projects and all geologic data to us on August 31, 2000, and we released the unaffiliated company from any further obligations.

2

We have curtailed, for the time being, exploration for precious metals in Alaska and for uranium in Wyoming. We believe that pursuing activities in the mineral segment would not be beneficial to Aspen at the present time.

Power Generation. In 1999, we formed a subsidiary named Aspen Power Systems, LLC ("APS"), a Colorado limited liability company to provide an opportunity for Aspen to participate in the growing demand for electrical power generated by turbines. Our objectives for APS were to seek opportunities or situations where our analysis indicated that a gas turbine generation plant could be constructed and operated profitably. Any plant construction will require a significant amount of capital for property acquisition, permitting, engineering and design, and construction. It is unknown whether Aspen or the other owners of APS would be able to provide this required capital. Consequently, any such activities will likely require the availability of funds from third parties, and we cannot offer any assurance that such funding will be available when needed on commercially-reasonable terms.

During 2000 we restructured our ownership in APS and reduced our financial commitment: We are continuing to provide certain administrative services to APS. Aspen continues to pay the salary of its president, R.V. Bailey when he is working on matters for APS. If APS is funded adequately, APS will repay this amount.

During the fiscal year ended June 30, 2001 APS reimbursed Aspen \$42,700, at the rate of \$75 per hour for time spent by our president on APS matters. At June

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

30, 2001 APS still owed us \$7,100 for unpaid chargeable time of our president.

APS is currently being operated by Larry Baccari of Sheridan, Wyoming, an electrical engineer with experience in constructing turbine power plants. The managers of APS consists of Mr. Baccari, R. V. Bailey, President of Aspen Exploration, and Ray K. Davis, accounting consultant to Aspen Exploration. Initially, Aspen owned an 85% interest in APS. On March 1, 2000 by resolution of the board of directors, with R. V. Bailey abstaining, Aspen:

- (a) reduced our interest in APS from 85% to 25% (by transferring 60% of our interest to R. V. Bailey, Ray K. Davis, and Larry Baccari, in exchange for \$15,000 each which was contributed to the working capital of APS),
- (b) determined to avoid any further capital commitment to APS to the maximum extent possible, and
- (c) accepted a promissory note from APS in the amount of \$130,000 with interest at 8% per annum which reimbursed Aspen for its direct costs for APS through March 1, 2000.

As a result, the ownership of APS is now 25% each for Aspen and for Messrs. Bailey, Baccari and Davis. We plan to account for our 25% interest in APS using the equity method of accounting. As of December 31, 2000 (APS's most current reporting period), we recorded net ordinary income of \$6,300 for tax purposes from APS. During fiscal 2001, Aspen and Messrs. Baccari, Bailey and Davis each loaned an additional \$20,000 to APS. As of this writing, APS has not repaid that amount.

On December 1, 2000 APS entered into an agreement with a major independent power producer. Under the agreement APS will be paid certain success fees if the power producer goes forward with the development of electric power generation facilities within a defined area in Solano County, California. To date, APS has received \$246,000 in fees and reimbursed expenses. APS has retained the right to pursue the development of smaller generation facilities in the same area. We have been advised by the State of California that our proposed 25% owned project in Solano County, California, was not selected by the California Power Commission for further negotiations. We are now reviewing our possible options with regard to the future, if any, of this project.

Company Strategy:

We believe that it is in our shareholders' best interests to diversify our investments in all aspects of our operations. It is for this reason that we reduced our interest in APS, we attempted to develop our uranium prospects through a third party, and we frequently obtain financing for our oil and gas acquisition and drilling activities from third parties.

At the present time, we cannot finance our oil and gas acquisitions and drilling activities solely through our own resources. Consequently, we identify prospects or production to acquire and drill prospects, and seek other industry investors who are willing to participate in these activities with us. We frequently retain a promotional interest in these prospects, but generally we have to finance a portion (and sometimes a significant portion) of the acquisition and drilling costs. We have in the past acquired interests in producing properties by issuing shares of our common stock, but because of the current low price of our stock, it has become more difficult and expensive to do

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

so.

Where we acquire an interest in acreage on which exploration or development drilling is planned, we will seldom assume the entire risk of acquisition or drilling. Rather, we prefer to assess the relative potential and risks of each prospect and determine the degree to which we will participate in the exploration or development drilling. Generally, we have determined that it is more beneficial to invite industry participants to share the risk and the reward of the prospect by financing some or all of the costs of drilling contemplated wells. In such cases, we may retain a carried working interest, a reversionary interest, or may be required to finance all or a portion of our proportional interest in the prospect. Although this approach reduces our potential return should the drilling operations prove successful, it also reduces our risk and financial commitment to a particular prospect.

Conversely, we may from time to time participate in drilling prospects offered by other persons if we believe that the potential benefit from the drilling operations outweighs the risk and the cost of the proposed operations. This approach allows us to diversify into a larger number of prospects at a lower cost per prospect, but these operations (commonly known as "farm-ins") are generally more expensive than operations where we offer the participation to others (known as "farm-outs"). As of this writing, we have not participated in the drilling of any farm-in wells.

Principal Products Produced and Services Rendered. Our principal products during fiscal 2001 were crude oil and natural gas. Crude oil and natural gas are generally sold to various entities, including pipeline companies, which usually service the area in which our producing wells are located. In the fiscal year ended June 30, 2001, crude oil and natural gas sales and revenues from operating oil and gas properties accounted for \$3,867,482 or 98% of our total revenues; while \$73,081, or 2% was from interest and other income.

Distribution Methods of the Products or Services. We are not involved in the distribution aspect of the oil and gas industry.

Status of any Publicly Announced New Products or Services. We do not have a new product or service that would require the investment of a material amount of our assets or which we believe is material to our business. Therefore, we have not made a public announcement of nor have we made information otherwise public about any such product or service.

Although we are attempting to enter the electric power generation business through Aspen Power Systems, LLC, no progress has been made thus far in that attempt. If a situation is found where all the factors needed to generate electrical power are present, of which there is no assurance, APS would have to find a source of funding prior to initiating any significant activities.

Competitive Business Conditions: The exploration for, and development, production and acquisition of, oil, gas, precious metals and other minerals are subject to intense competition, as is the production and sale of electrical power. The principal methods of compensation for the acquisition of oil and gas and other mineral properties are the payment of:

- (i) cash bonuses at the time of the acquisition of leases;
- (ii) delay rentals and the amount of annual rental payments;
- (iii) advance royalties and the use of differential royalty rates; and
- (iv) the stipulations requiring exploration and production commitments by the lessee.

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

General compensation in the electrical generation industry is price sensitive. Electrical power can be sold into the local electrical power grid, but the price at which the power can be sold may not be economical unless the project has been economically acquired and designed, efficiently completed and functions in accordance with its specifications.

4

Some of our current competitors, and many of our potential competitors in each of these industries have vast experience, are larger and have significantly greater financial resources, existing staff and labor forces, equipment, and other resources than we do. Consequently, these competitors may be in a better position to compete for projects in our diverse industries.

In addition, the availability of a ready market for oil and gas will depend upon numerous factors beyond our control, including the extent of domestic production and imports of oil and gas, proximity and capacity of pipelines, and the effect of federal and state regulation of oil and gas sales, as well as environmental restrictions on exploration and usage of oil and gas. Further, we expect that competition for leasing of oil and gas prospects will become even more intense in the future. We have a minimal competitive position in the oil and gas industry. Should we participate in the electrical power generation industry, we will also have a minimal competitive position in that industry.

Sources and Availability of Raw Materials: To conduct business, we depend on such items as drilling rigs and other equipment, casing pipe, drilling mud and other supplies, core drilling equipment, and other equipment necessary for our operations. Should APS commence constructing a plant, APS will be dependent (among other things) on the availability of appropriate gas turbines for generating electricity. Such items have been commonly available from a number of sources. Although we foresee no short supply or difficulty in acquiring any equipment relevant to the conduct of business, we cannot offer any assurances that these items will be available or that we will be able to acquire the items on economically feasible terms.

Dependence Upon One or a Few Major Customers: We generally sell our oil and gas production primarily to a limited number of companies. In fiscal 2000 we obtained more than 10% of our revenues from sales to Tosco Refining Company and Enserco Energy, Inc.; in 2001 more than 10% of our revenues derived from Tosco Refining Company, Calpine Corporation and Enserco Energy, Inc. We do not believe the loss of these customers would adversely impact our revenues because we believe that oil and gas sales are primarily market driven and are not dependent on particular purchasers. Consequently, we believe that substitute purchasers would be available based on the widespread uses of and the need for oil and gas.

Patents, Trademarks, Licenses, Franchises, Concessions, Royalty Agreements or Labor Contracts (Including Duration). We do not own any patents, licenses, franchises, or concessions except oil, gas and other mineral interests granted by governmental authorities and private landowners. We received a trademark registration (serial no. 74-396,919 registered on March 1, 1994) for our corporate logo. The registration is for a term of ten years. To maintain the registration for its entire term we filed an affidavit of commercial use on February 21, 2000.

Need for Governmental Approval of Principal Products or Services. We do not need to seek government approval of our principal products.

Effect of Existing or Probable Governmental Regulation. Oil and gas exploration and production, electric power generation, as well as mining

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

activities, are open to significant governmental regulation including worker health and safety laws, employment regulations and environmental regulations. Operations that occur on public lands may be subject to further regulation by the Bureau of Land Management, the U.S. Army Corps of Engineers, or the U.S. Forest Service as well as other federal and state agencies.

Estimate of Amounts Spent on Research and Development Activities. We have not engaged in any material research and development activities since our inception.

Costs and Effects of Compliance with Environmental Laws (federal, state and local). Because we are engaged in extracting natural resources, our business is subject to various federal, state and local provisions regarding environmental and ecological matters. Therefore, compliance with environmental laws may necessitate significant capital outlays, affect our earnings potential, and cause material changes in our current and proposed business activities.

At the present time, however, the environmental laws do not materially hinder nor adversely affect our business. Capital expenditures relating to environmental control facilities have not been material to our operations since our inception.

5

Employees:

At June 30, 2001, we employed three full-time persons. We also employ independent contractors and other consultants, as needed.

ITEM 2. PROPERTIES

General Information:

We have a significant amount of information regarding the proven developed and undeveloped oil and gas reserves which can be found in below in this Item 2 as well as in the notes to our financial statements.

Drilling Activity:

During the fiscal year ended June 30, 2001 we participated in the drilling of 10 gross (1.22 net) wells, of which 6 gross (.58 net) were completed as gas wells, 3 were dry holes, and 1 is currently being evaluated. Of the 10 wells drilled, 8 were drilled in the Denverton Creek Field, 1 was drilled in the Malton Black Butte Field, and 1 was drilled elsewhere.

Denverton Creek Field, Solano County, California.

For the past three years, we have been the recipient of the California Division of Oil, Gas, and Geothermal Resources (CDOGGR) "Outstanding Lease Maintenance Award" for our operations in the Denverton Creek gas field. CDOGGR gives this award to operators who not only meet, but exceed, the requirements for producing well operations set by CDOGGR.

The 8 gross (.93 net) wells drilled this fiscal year in the Denverton Creek gas field bring Aspen's total to 12 productive wells out of 15 attempts.

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Cumulative gross production from the field is in excess of 8.4 BCF (billion cubic feet) of natural gas. The field is productive from 10 separate horizons ranging in depth from 9,000' to 12,000'. Aspen has extended the former field limits by 2 miles to the northeast and discovered new pay horizons. Current production is in excess of 3,000 gross (350 net) MCFPD of high quality natural gas (1090 BTU) with numerous behind-pipe zones in many of the wells.

Malton Black Butte, Tehama and Glenn Counties, California.

On July 16, 1998, we purchased a 100% working interest in two natural gas units (the Johnson and Gay Units located in Tehama and Glenn Counties, California) from D. E. Craggs, Inc., ("Craggs") an unaffiliated third party. The purchase price consisted of \$275,000 in cash and 275,000 shares of Aspen's restricted common stock valued at \$1.00 per share. Pursuant to the agreement, we paid Craggs 25% of the purchase price (\$68,750 cash and 68,750 common shares) at the closing and an additional 25% each during January 1999 and 2000. We paid the final 25% (plus interest on the cash from the date of closing at the daily rate of 0.015%) in January 2001.

Simultaneously with the acquisition, we sold a 69% working interest in the two prospects to certain unaffiliated and a 10% working interest to three affiliated purchasers for a total price of \$477,950 (\$6,050 per one percent working interest, as compared to Aspen's purchase price of \$5,500 per one percent working interest). The affiliated purchasers are Aspen's president, R.V. Bailey, vice president, Robert A. Cohan, and consulting accountant, Ray K. Davis, who acquired working interests of 3%, 2%, and 5%, respectively. The affiliated and unaffiliated parties who purchased the working interests from Aspen paid their entire purchase price prior to the closing. As a result of these transactions, we currently own a net 21% working interest (16.17% net revenue interest) in the Johnson Unit and in the Gay Unit. We also own a 5% royalty interest in the Gay Unit.

At the same time, we also acquired 3 square miles of seismic data to evaluate the undeveloped acreage on the Johnson and Gay leases. Aspen has participated in the drilling of 5 successful wells out of 7 attempts on acreage in this vicinity. These wells have produced in excess of 3 BCF of gas.

6

Drilling Activity:

The following table sets forth the results of our drilling activities during the fiscal years ended June 30, 1999, 2000 and 2001:

Drilling Activity						

Year	Gross Wells			Net Wells		
	Total	Producing	Dry	Total	Producing	Dry
----	-----	-----	---	-----	-----	---
1999 Exploratory	4	2	2	.76	.35	.41
2000 Exploratory	11	8	3	1.61	1.29	.32
2001 Exploratory	10	6	4*	1.22	.58	.64

* Emigh #34-2 is currently shut in pending further evaluation. It has tested at

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

marginal flow rates. A stimulation treatment may result in commercial production.

Production Information:

Net Production, Average Sales Price and Average Production Costs (Lifting).

The table below sets forth the net quantities of oil and gas production (net of all royalties, overriding royalties and production due to others) attributable to Aspen for the fiscal years ended June 30, 1999, 2000, and 2001, and the average sales prices, average production costs and direct lifting costs per unit of production.

	Years Ended June 30,		
	2001	2000	1999
	----	----	----
Net Production			

Oil (Bbls)	5,206	6,282	10,317
Gas (MMcf)	377	384	458
Average Sales Prices			

Oil (per Bbl)	\$26.64	\$22.58	\$10.94
Gas (per Mcf)	\$ 9.20	\$ 2.94	\$ 2.31
Average Production Cost(1)			

Per equivalent			
Bbl of oil	\$ 7.53	\$ 4.90	\$ 4.14
Average Lifting Costs(2)			

Per equivalent			
Bbl of oil	\$ 1.65	\$ 1.44	\$ 0.91

(1) Production costs include all operating expenses, depreciation, depletion and amortization, lease operating expenses and all associated taxes.

(2) Direct lifting costs do not include impairment expense, ceiling write-down, or depreciation, depletion and amortization.

7

Productive Wells and Acreage:

Gross and Net Productive Oil and Gas Wells, Developed Acres, and Overriding

Royalty Interests.

Leasehold Interests - Productive Wells and Developed Acres: The tables below sets forth Aspen's leasehold interests in productive and shut-in oil and gas wells, and in developed acres, at June 30, 2001:

Reserve Information - Oil and Gas Reserves:

Cecil Engineering, Inc evaluated our oil and gas reserves attributable to our properties at June 30, 2001.

Reserve calculations by independent petroleum engineers involve the estimation of future net recoverable reserves of oil and gas and the timing and amount of future net revenues to be received therefrom. Those estimates are based in numerous factors, many of which are variable and uncertain. Reserve estimators are required to make numerous judgments based upon professional training, experience and educational background. The extent and significance of the judgments in them are sufficient to render reserve estimates of future events, actual production determinations involve estimates inherently imprecise, since reserve revenues and operating expenses may not occur as estimated. Accordingly, it is common for the actual production and revenues later received to vary from earlier estimates. Estimates made in the first few years of production from a property are generally not as reliable as later estimates based on a longer

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

production history. Reserve estimates based upon volumetric analysis are inherently less reliable than those based on lengthy production history. Also, potentially productive gas wells may not generate revenue immediately

10

due to lack of pipeline connections and potential development wells may have to be abandoned due to unsuccessful completion techniques. Hence, reserve estimates may vary from year to year.

Estimated Proved Reserves/ Developed and Undeveloped Reserves: The following tables set forth the estimated proved developed and proved undeveloped oil and gas reserves of Aspen for the years ended June 30, 2000 and 2001. See Note 10 to the Consolidated Financial Statements and the above discussion.

Estimated Proved Reserves

Proved Reserves -----	Oil (Bbls) -----	Gas (Mcf) -----

June 30, 2000	749,000	1,624,000	2,373,000
June 30, 2001	584,000	1,659,000	2,243,000

For information concerning the standardized measure of discounted future net cash flows, estimated future net cash flows and present values of such cash flows attributable to our proved oil and gas reserves as well as other reserve information, see Note 10 to the Consolidated Financial Statements.

Oil and Gas Reserves Reported to Other Agencies: We did not file any estimates of total proved net oil or gas reserves with, or include such

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

information in reports to, any federal authority or agency since the beginning of the fiscal year ended June 30, 2001.

Title Examinations: Oil and Gas: As is customary in the oil and gas industry, we perform only a perfunctory title examination at the time of acquisition of undeveloped properties. Prior to the commencement of drilling, in most cases, and in any event where we are the Operator, a thorough title examination is conducted and significant defects remedied before proceeding with operations. We believe that the title to our properties is generally acceptable to a reasonably prudent operator in the oil and gas industry. The properties we own are subject to royalty, overriding royalty and other interests customary in the industry, liens incidental to operating agreements, current taxes and other burdens, minor encumbrances, easements and restrictions. We do not believe that any of these burdens materially detract from the value of the properties or will materially interfere with our business.

We have purchased producing properties on which no updated title opinion was prepared. In such cases, we have retained third party certified petroleum landmen to review title.

11

Office Facilities:

Our principal office is located in Denver, Colorado. We also have offices located in Castle Rock, Colorado and Bakersfield, California. The Denver office consists of approximately 1,108 square feet with an additional 750 square feet of basement storage. We entered into a one-year lease agreement to December 31, 2001 for a lease rate of \$1,155 per month.

Aspen also subleases from R.V. Bailey, its president, a portion of Mr. Bailey's office in Castle Rock, Colorado on a month-to-month basis for \$260 per month.

We pay \$683 per month for the Bakersfield, California office, which consists of approximately 546 square feet. The Bakersfield, California lease expires February 2, 2003.

ITEM 3. LEGAL PROCEEDINGS

We are not subject to any pending or, to our knowledge, threatened, legal proceedings.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were presented to security holders for a vote during the year ended June 30, 2001, or any subsequent period.

PART II

ITEM 5. MARKET FOR COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

Market Information:

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Our common stock is quoted on the Over-the-Counter Bulletin Board ("OTCBB") under the symbol "ASPN". The quotations reflect inter-dealer prices without retail mark-up, mark-down or commission and may not reflect actual transactions.

The OTCBB adopted new rules that result in companies not current in their reporting requirements under the Securities Exchange Act of 1934 being removed from the quotation service. At June 30, 2000 and 2001, we believe that we were in full compliance with these rules.

	Quarter Ended Sept., 2000	Dec., 2000	March, 2001	June 30, 2001
Common Stock ("ASPN")				
High	\$.53125	\$.9375	\$1.4375	\$2.50
Low	\$.375	\$.40625	\$.6875	\$1.25

	Quarter Ended Sept., 1999	Dec., 1999	March, 2000	June 30, 2000
Common Stock ("ASPN")				
High	\$.53125	\$.375	\$.59375	\$.53125
Low	\$.375	\$.3125	\$.3125	\$.37

Holders:

As of June 30, 2000 and 2001, there were approximately 1,344 and 1,319 holders of record of our Common Stock, respectively. This does not include an indeterminate number of persons who hold our Common Stock in brokerage accounts and otherwise in 'street name.'

12

Dividends:

We have never declared or paid a cash dividend on our Common Stock. We presently intend to retain our earnings to fund development and growth of our business. Decisions concerning dividend payments in the future will depend on income and cash requirements.

Holders of common stock are entitled to receive such dividends as may be declared by Aspen's Board of Directors. There were no dividends declared by the Board of Directors during the fiscal year ended June 30, 2001, or subsequently, and we have paid no cash dividends on its common stock since inception. There are no contractual restrictions on our ability to pay dividends to our shareholders.

ITEM 6. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION OR PLAN OF OPERATION

Overview:

Founded in 1980, Aspen Exploration Corporation is an oil and gas company, which participates in the oil and gas segment by acquiring interest in producing

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

oil and gas properties, and participating in drilling operations.

In fiscal 2000 through the formation of Aspen Power Systems, LLC, of which we own 25%, we expanded our business scope to include a goal of participating in the electric power segment.

Liquidity and Capital Resources:

During prior years, we had to finance many of our oil and gas operations through short-term borrowings, which were paid back out of the funds generated from our operations. During fiscal 2001, we were able to finance all of our oil and gas operations from funds generated from operations and through farmout agreements and other forms of third party participation.

For example, in order to provide interim financing, we withdrew \$125,000 during 2000 against a split dollar life insurance plan, as well as interest payable of \$30,430. Also, during October of 1997, we borrowed an additional \$130,000 to finance our share of drilling an offset well on the Denverton Creek property from an affiliate. At June 30, 2001, the \$155,430 insurance loan was paid in full and the balance due to the affiliate was also paid in full from cash made available by operations.

June 30, 2001 as compared to June 30, 2000

	June 30, 2001	June 30, 2000
	-----	-----
Current Assets	\$3,303,463	\$875,641
Current Liabilities	\$1,480,947	\$793,414
Working Capital	\$1,822,516	\$ 82,227
Investments in Oil & Gas Properties/Drilling Activities	\$1,370,905	\$753,370

Compared to fiscal 2000, there was a 22-fold increase in working capital. In light of recent successful drilling operations, the acquisition of producing properties and our continued improvement in oil and gas prices received, we believe that the increased revenues should continue to have a positive effect on our working capital and contribute significantly to our cash flow in the year ahead. However, for the three months ended September 30, 2001 the price we received for natural gas sold declined from an average of \$9.60 per MMBTU during fiscal 2001, to approximately \$2.70 per MMBTU. Oil averaged \$26.64 per barrel during 2001 and was \$23.10 for September 2001. Given the current downturn of our economy, we do not see any near term improvement of these prices. Our capital requirements can fluctuate over a twelve month period because our drilling activities are usually carried out during California's dry season (from late April until October) after which wet weather either precludes further activity or makes it cost prohibitive.

Investments in Oil and Gas Properties/Drilling Activities

We invested \$753,000 and \$1,371,905 in our oil and gas properties for the fiscal years ended June 30, 2000 and 2001. While we have not finalized drilling plans for fiscal 2002, we have committed to participate in the drilling of 3 wells through October 2001, with our share of drilling costs estimated to be approximately \$271,000, and we anticipate additional drilling will occur in fiscal 2002. We believe that internally generated funds will be sufficient to

finance our drilling and operating expenses for the next twelve months. We have

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

eliminated our outstanding loans in fiscal 2001 but may be required to again seek outside funding to facilitate our fiscal 2003 drilling program.

Termination and Release of Agreement with Canadian Company

In March 1998, we negotiated an agreement with a privately-held Canadian company which provided for Aspen to receive certain cash payments from, and to be issued 2,000,000 shares of stock in, the Canadian company. In exchange, we conveyed all of our interest in two uranium projects in Wyoming to the Canadian company. On August 31, 2000, pursuant to a Termination Agreement and Release we released the Canadian company from any further obligations in exchange for the return of all of Aspen's geological data. These Canadian shares have no value and we did not receive any cash from the Canadian company.

Aspen Power Systems, LLC

During fiscal 1999 and 2000, we dedicated certain cash resources to APS to investigate the economic possibilities of the sale, design, construction and/or operation of gas turbines to produce electricity. Through June 30, 2000, we expended approximately \$130,000 on this project, \$45,657 of which was expensed in the twelve months ended June 30, 2000. During fiscal 2001, we advanced a further \$20,000 to defray APS current operating costs which we have recorded as a receivable at June 30, 2001. The funding to APS came from our operating funds derived from oil and gas production. As discussed above, we did not assign a value to the \$130,000 note receivable due from APS and do not anticipate any significant future requirements to fund further projects of APS.

Results of Operations:

We continued to focus our operations on the production of oil and gas and the investigation for possible acquisition of producing oil and gas properties during the twelve months ended June 30, 2001.

June 30, 2001 as compared to June 30, 2000

The following table sets forth, for the periods indicated, certain statement of operations data expressed as a percentage of net revenues. The table and the discussion below should be read in conjunction with the audited financial statements and the notes thereto appearing elsewhere in this report.

	Year Ended June 30,	
	2001	2000
Oil and Gas Revenues(a)	\$3,867,482	\$1,424,278
Oil and Gas Production Expenses	122,114	100,221
Depreciation, depletion and amortization	412,688	255,927
Total operating expenses	567,833	565,862
	2,764,847	502,268
Other income (expense)	73,081	16,301
	2,837,928	518,569
Income tax expense	(339,424)	(23,000)
	2,498,504	\$ 495,569
Net income		

=====

(a) Oil and gas revenues includes income from management fees

Oil and Gas Revenues

For the twelve months ended June 30, 2001, oil and gas revenues increased \$2,443,204, a 172% improvement. We believe the increase in oil and gas revenues is reflective of our increased emphasis on our California operations and the continued production from the Denverton Creek and Malton Black Butte fields. The major reason for improved oil and gas revenues was the increase in the price we received for our natural gas sold from December through May. The average price received during 2001 was \$9.20 per MMBTU compared to \$2.98 per MMBTU received during fiscal 2000. During fiscal 2001, we participated in the drilling of 10 wells, 6 of which were completed as successful gas wells and 3 were dry holes, with 1 pending further evaluation.

14

Oil and Gas Production Expenses

Oil and gas production expenses increased \$21,893, a 22% increase. We believe the increase was due primarily to the addition of 6 producing gas wells drilled during the year, the perforating and recompleting uphole of several of the gas wells in the Denverton Creek field as well as putting several gas wells on compressor and increased water production from our Kern County oil wells.

Depletion, depreciation and amortization increased \$156,761, or 61% from \$255,927 in fiscal 2000 to \$412,688 in fiscal 2001. While the depletable assets in the full cost pool increased by approximately \$1,355,000 in fiscal 2001, the proved, recoverable reserves of oil and gas decreased from BOE 411,000 (barrel of oil equivalent) in fiscal 2000 to BOE 387,000 in fiscal 2001, a 6% decrease. This decrease in recoverable reserves resulted in substantially the same percentage of depletion applied to the increased full cost pool and hence a larger depletion expense for fiscal 2001.

Selling, general and administrative expenses increased \$49,671 or 9.7% during fiscal 2001, due to higher insurance, audit and legal fees. These increases were offset somewhat by a reduction of \$42,698 in salary expense due to reimbursement from APS. We continue our commitment to contain costs and increase cash flow wherever possible.

As a result of our operations for the fiscal year ended June 30, 2001, we ended the year with a net income of \$2,498,504 compared to a net income of \$495,569 a year earlier. This increase of \$2,002,935 reflected an increase of approximately \$2,443,204 in oil and gas sales and related management fees from outside third parties. These increases are the direct result of successful drilling and production operations conducted in California as well as a significant increase in the price received per MMBTU for gas sold during the year. Interest and other income increased \$56,780 or 348% from \$16,301 in 2000 to \$73,081 in 2001. The increase in interest and other income was due to excess working capital and prepaid drilling costs deposited in money market accounts. At June 30, 2001 we had approximately \$2,636,000 in interest bearing accounts.

During the twelve months ended June 30, 2001, the energy industry saw a substantial improvement in the price received for natural gas. Our oil price was \$27.37 during July 2000 and \$24.70 for June 2001, a 9% decrease. Increases in

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

the price of natural gas were evident with gas prices increasing from \$4.28 in July 2000 to \$9.30 at the end of June 2001, a 117% increase.

Factors that may Affect Future Operating Results

In evaluating our business, readers of this report should carefully consider the following factors in addition to the other information presented in this report and in our other reports filed with the SEC that attempt to advise interested parties of the risks and factors that may affect our business. As noted elsewhere herein, the future conduct of Aspen's business, non-oil and gas exploration activities, participation in APS stock ownership, and discussions of possible future activities is dependent upon a number of factors, and there can be no assurance that Aspen will be able to conduct its operations as contemplated herein. These risks include, but are not limited to:

- (1) The possibility that the described operations, reserves, or exploration or production activities will not be completed or continued on economic terms, if at all.
- (2) The exploration and development of oil and gas, and mineral properties are enterprises attendant with high risk, including the risk of fluctuating prices for oil, natural gas and other minerals being sought.
- (3) Imports of petroleum products from other countries.
- (4) Not encountering adequate resources despite expending large sums of money.
- (5) Test results and reserve estimates may not be accurate, notwithstanding best effort precautions.

15

- (6) The possibility that the estimates on which we are relying are inaccurate and that unknown or unexpected future events may occur that will tend to reduce or increase our ability to operate successfully, if at all.
- (7) Our ability to participate in these projects may be dependent on the availability of adequate financing from third parties which may not be available on commercially-reasonable terms, if at all.
- (8) Although we currently do not have active operations in the mining segment, mining exploration and mining have inherent risks including the environment, low prices for commodities, competition from better financed companies and the risk of failure in either exploration or mining. There is no assurance we will be able to compete successfully in the exploration and mining business should that course of action be undertaken.
- (9) We currently do not have active operations in the power generation business. Risks involved in power generation include permitting, availability of fuel and power lines on an economical basis, a market for the product, availability of equipment, and competition from other better financed companies. There is no assurance we will be able to compete successfully in the power generation business should an opportunity be found.

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

(10) Our stock price may be hurt by future sales of our shares or the perception that such sales may occur. As of the date of this Form 10-KSB, approximately 2,121,744 shares of Common Stock held by existing stockholders constitute "restricted shares" as defined in Rule 144 under the Securities Act. These shares may only be sold if they are registered under the Securities Act or sold under Rule 144 or another exemption from registration under the Securities Act. Sales under Rule 144 are subject to the satisfaction of certain holding periods, volume limitations, manner of sale requirements, and the availability of current public information about us.

ITEM 7. FINANCIAL STATEMENTS

The information required by this item begins on page 26 of Part III of this Report on Form 10-KSB and is incorporated into this part by reference.

ITEM 8. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND

FINANCIAL DISCLOSURE

Not applicable.

PART III

ITEM 9. DIRECTORS, EXECUTIVE OFFICERS, PROMOTERS AND CONTROL PERSONS, COMPLIANCE WITH SECTION 16(A) OF THE EXCHANGE ACT

Identification of Directors and Executive Officers:

The following table sets forth the names and ages of all the Directors and Executive Officers of Aspen, and the positions held by each such person. As described below, the Board of Directors is divided into three classes which, under Delaware law, must be as nearly equal in number as possible. The members of each class are elected for three-year terms at each successive meeting of stockholders serve until their successors are duly elected and qualified; officers are appointed by, and serve at the pleasure of, the Board of Directors. We have held no annual meetings since February 25, 1994. Therefore the terms of each class of director expires at the next annual meeting of stockholders.

16

Name	Age	Position	Class	Director Since
R. V. Bailey	69	President, Chief Executive Officer, Chief Financial Officer, Treasurer and Director	I	1980
Robert F. Sheldon	78	Director	II	1981
Robert A. Cohan	45	President, West Coast Division, Secretary, and Director	III	1998

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Each of the directors will be up for reelection at the next annual meeting of stockholders and until his successor is elected and qualified or until his or her earlier death, resignation, or removal. We do not expect to hold an annual meeting during fiscal 2002.

Each officer is appointed annually and serves at the discretion of the Board of Directors until his successor is duly elected and qualified. No arrangement exists between any of the above officers and directors pursuant to which any of those persons was elected to such office or position. None of the directors are also directors of other companies filing reports under the Securities Exchange Act of 1934.

R. V. Bailey. R. V. Bailey obtained a Bachelor of Science degree in Geology from the University of Wyoming in 1956. He has approximately 40 years experience in exploration and development of mineral deposits, primarily gold, uranium, coal, and oil and gas. His experience includes basic conception and execution of mineral exploration projects. Mr. Bailey is a member of several professional societies, including the Society for Mining and Exploration, the Society of Economic Geologists and the American Association of Petroleum Geologists, and has written a number of papers concerning mineral deposits in the United States. He is the co-author of a 542-page text, published in 1977, concerning applied exploration for mineral deposits. Mr. Bailey is the founder of Aspen and has been an officer and director since its inception.

Robert F. Sheldon. Mr. Sheldon obtained a Bachelor of Science degree in Geological Engineering from the University of British Columbia in 1948. He served a total of approximately 40 years at various mining companies, with his experience covering a wide range of mineral commodities including gold, silver, copper, uranium, lead, zinc, nickel, mercury, molybdenum and tungsten. He is a member of the Professional Engineers of British Columbia, the Society of Mining Engineers, the Canadian Institute of Mining and Metallurgy, and the Yukon Chamber of Mines (where he served as an officer for four years). Mr. Sheldon joined Aspen's Board of Directors in April 1981.

Robert A. Cohan. Mr. Cohan obtained a Bachelor of Science degree in Geology from the State University College at Oneonta, NY in 1979. He has approximately 22 years experience in oil and gas exploration and development, including employment in Denver, CO with Western Geophysical, H. K. van Poolen & Assoc., Inc., as a Reservoir Engineer and Geologist, Universal Oil & Gas, and as a principal of Rio Oil Co., Denver, CO. Mr. Cohan served as Manager, Oil & Gas Operations, Aspen Exploration Corporation, Denver, CO from 1989 to 1992. He was employed as Vice President, Oil & Gas Operations, for Tri-Valley Oil & Gas Co., Bakersfield, CA. from 1992 to April 1995, at which time Mr. Cohan rejoined Aspen Exploration Corporation as Vice President (now President), West Coast Division, opening an office in Bakersfield, CA. He is a member of the Society of Petroleum Engineers (SPE) and the American Association of Petroleum Geologists (AAPG).

Meetings of the Board and Committees:

The Board of directors held six formal meetings during the fiscal year ended June 30, 2001. Each director attended all of the formal meetings either in person or by telephone, without exception. In addition, regular communications were maintained throughout the year among all of the officers and directors of the Company and the directors acted by unanimous consent four times during fiscal 2000 and six times subsequently through June 30, 2001.

Identification of Significant Employees:

There are no significant employees who are not also directors or executive officers as described above. No arrangement exists between any of the above

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

officers and directors pursuant to which any one of those persons was elected to such office or position.

17

Family Relationships:

As of June 30, 2001, and subsequently, there were no family relationships between any director, executive officer, or person nominated or chosen by the Company to become a director or executive officer.

Involvement in Legal Proceedings:

We are not subject to any pending or, to our knowledge, threatened, legal proceedings.

Section 16(a) Beneficial Ownership Reporting Compliance:

Section 16(a) of the Securities Exchange Act of 1934 (the "Exchange Act") requires Aspen's directors and officers and any persons who own more than ten percent of Aspen's equity securities, to file reports of ownership and changes in ownership with the Securities and Exchange Commission (the "SEC"). All directors, officers and greater than ten-percent shareholders are required by SEC regulation to furnish Aspen with copies of all Section 16(a) reports files. Based solely on our review of the copies of the reports it received from persons required to file, we believe that during the period from July 1, 1995 through September 28, 2001, all filing requirements applicable to its officers, directors and greater-than-ten-percent shareholders were complied with. However, there were two untimely-filed filings (Form 4) for two officers, R. V. Bailey and Ray K. Davis.

ITEM 10. EXECUTIVE COMPENSATION

The following table sets forth information regarding compensation awarded, paid to, or earned by the chief executive officer and the other principal officers of Aspen for the three years ended June 30, 1999, 2000, and 2001. No other person who is currently an executive officer of Aspen earned salary and bonus compensation exceeding \$100,000 during any of those years. This includes all compensation paid to each by Aspen and any subsidiary.

Name and Principal Position	Fiscal Year	Annual compensation			Long-term Compensation Awards		
		(\$) Salary	(\$) Bonus	(\$) Other (a)	(\$) Restricted Awards	Securities Underlying Options & SARs (#)	Payout
							LTIP Payout
R. V. Bailey, President and CEO	1999	100,000	0	9,331	0	0	0
	2000	100,000	0	12,613	0	0	0
	2001	100,000	0	0	0	0	0

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

R. A. Cohan	1999	91,042	0	0	0	0	0
President,	2000	96,041	0	11,525	0	0	0
West Coast	2001	101,250	0	0	0	0	0
Division							

(a) We have an "Amended Royalty and Working Interest Plan" by which we, in our discretion, are able to assign overriding royalty interests or working interests in oil and gas properties or in mineral properties. This plan is intended to provide additional compensation to Aspen's personnel involved in the acquisition, exploration and development of Aspen's oil or gas or mineral prospects.

We have a medical insurance plan for our employees and those of its subsidiaries, and a life insurance plan for our president and chief executive officer, R. V. Bailey. This life insurance plan includes the split-dollar insurance plan for the benefit of Mr. Bailey, which is described in Note 2 to the financial statements.

Additional compensation of \$-0- and \$612 has been recognized as reimbursement to the president for income taxes for the years ended June 30, 2001 and 2000. Mr. Bailey's taxable amount was \$-0- and \$2,188 for fiscal 2001 and 2000, equal to the "economic benefit" attributed to the president as defined by the Internal Revenue Code. The Company paid no premiums during fiscal 2001 and 2000.

18

We adopted a Profit-Sharing 401(k) Plan which took effect July 1, 1990. All employees are immediately eligible to participate in this Plan. Aspen's contribution (if any) to this plan is determined by the Board of Directors each year. At June 30, 2001, we contributed \$-0- to the plan. At June 30, 2000, we paid \$27,981 to the plan. When amounts are contributed to Mr. Bailey's and Mr. Cohan's accounts (which amounts are fully vested), these amounts are also included in column (e) of the tables, above.

We have furnished a vehicle to Mr. Bailey, and the compensation allocable to this vehicle, plus amounts paid for various travel and entertainment paid on behalf of Mr. Bailey and Mr. Bailey's wife when she accompanied him for business purposes, are also included in column (i) of the table. Aspen also purchased a vehicle for Mr. Cohan. This vehicle is used substantially for business purposes; therefore, no vehicle costs were charged to Mr. Cohan.

We have agreed to reimburse its officers and directors for out-of-pocket costs and expenses incurred on behalf of Aspen.

During fiscal 2001, we assigned to employees royalties, which accumulated during the fiscal year ended June 30, 2001, on certain wells drilled during the year. The value assigned to these overrides is considered nominal, as the assignments were made before the leases were proved. The overriding royalty interests in these California properties granted to our employees were as follows:

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

	R. V. Bailey -----	R. A. Cohan -----	J. L. Shelton -----
Armstrong 17-4	1.260000%	1.260000%	0.480000%
Cygnus 2	0.345961%	0.345961%	0.131795%
Pale Rider 3-26	0.508032%	0.508032%	0.193536%

Stock Options and Stock Appreciation Rights Granted during the Last Fiscal Year:

No options or SARs were granted to executive officers during the fiscal year ended June 30, 2001. There was no exercise of options or SARs during the fiscal year ended June 30, 2001.

Aggregated Option Exercises in Last Fiscal Year and Fiscal Year End Option Values:

Two of our officers exercised stock options during the fiscal year ended June 30, 2001:

The following table sets forth information regarding the year-end value of options being held by the Chief Executive Officer and the other such named officers and persons on June 30, 2001.

Name and Principal Position -----	Shares acquired on exercise (#) -----	Value realized -----	Number of securities underlying unexercised options/SARs at June 30, 2001 Exercisable/Unexercisable -----	Val in-the a Exerci -----

Long Term Incentive Plans/Awards in Last Fiscal Year:

We do not have a long-term incentive plan nor have we made any awards during the fiscal year ended June 30, 2001

Employment contracts and termination of employment and change in control arrangements:

Mr. Bailey: We currently have no employment agreement with Mr. Bailey. In January 1983, we entered into a Stock Purchase Agreement with Mr. Bailey whereby Mr. Bailey granted Aspen an option to purchase up to 75% of our common stock owned by him at his death. This agreement was replaced by a Stock Purchase Agreement dated June 4, 1993. The 1993 agreement requires that we apply 75% of any key man insurance proceeds it receives upon Mr. Bailey's death towards the

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

purchase of up to 75% of the common shares owned by him at the time of his death, and Mr. Bailey's estate is obligated to sell such shares to Aspen. The purchase price of the shares acquired under the 1993 agreement shall be the fair market value of the shares on the date of death. Both Aspen and Mr. Bailey agree that the fair market value of the shares on the date of death may not necessarily be the market price of the stock on the date of death as quoted on the OTCBB, or as reported by any exchange. The 1993 agreement further requires us to maintain one or more life insurance policies on Mr. Bailey's life in the amount of \$1,000,000 for the purposes of this agreement.

Mr. Cohan: On April 16, 1998, we entered into an employment agreement with Robert A. Cohan, which provides for the payment of \$90,000 for the first year of employment, plus reimbursement of expenses, including health insurance. We have renewed the agreement effective April 15, 1999 to April 15, 2002 at the rate of \$95,000 per year for the year commencing April 15, 1999, \$100,000 for the year commencing April 15, 2000 and \$105,000 for the year commencing April 15, 2001. (See Item 10 (g) below.) On August 1, 2001 Mr. Cohan's salary was increased to \$125,000 per year.

Prior to February 2000, Aspen and Mr. Cohan agreed to utilize a portion of Mr. Cohan's home in Bakersfield, California in which to conduct Aspen's business. Mr. Cohan did not charge Aspen any rent for the use of his home as a business office. Aspen agreed to pay for all office supplies, communication and copy equipment used by Mr. Cohan in his office, as well as the monthly telephone expense incurred by Mr. Cohan on behalf of Aspen. On February 7, 2000 Aspen entered into a three year lease of office space in Bakersfield, California thereby alleviating the necessity of home office reimbursement to Mr. Cohan.

See also Item 12(a) Transactions with Management and Others.

ITEM 11. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT.

The following table sets forth as of September 24, 2001 the number and percentage of Aspen's shares of \$.005 par value common stock owned of record and beneficially owned by each person owning more than five percent of such common stock, and by each Director, and by all Officers and Directors as a group.

Beneficial Owner	Beneficial Ownership	
-----	Number of Shares	Percent of Total
-----	-----	-----
R. V. Bailey	1,294,403(i)	22.27%
Robert A. Cohan	540,619(ii)	9.30%
Robert F. Sheldon	163,160(iii)	2.81%
All Officers and Directors as a Group (3 persons)	1,998,182	34.38%

The address for all of the above directors and executives officers is:

2050 S. Oneida St., Suite 208, Denver, CO 80224

(i) This number includes 970,952 shares of stock held of record in the name of R. V. Bailey and 16,320 shares of record in the name of Mieko Nakamura Bailey, his wife. In addition, all shares held in the name of R. V. Bailey are subject to an obligation of Aspen to purchase up to 75% of the common shares of Aspen owned by Bailey at the time of his death. This obligation expires 120 days

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

from the date of Bailey's death. In addition, the number of shares owned includes 100,000 shares of common stock granted in a property exchange and stock options to purchase 200,000 shares of restricted common stock that were

20

exercised on June 11, 2001. Additionally, Aspen issued 32,000 shares of common stock to the Aspen Exploration Profit Sharing Plan for the benefit of R. V. Bailey as a corporation contribution to Mr. Bailey's 401(k) account.

(ii) This number includes 300,000 shares of common stock granted and stock options to purchase 200,000 shares of restricted common stock that were exercised on February 27, 2001. Additionally, Aspen issued 30,733 shares of common stock to the Aspen Exploration Profit Sharing Plan for the benefit of Robert A. Cohan as a corporation contribution to Mr. Cohan's 401(k) account. During May 2001 Mr. Cohan sold 15,000 shares of Aspen common stock at \$2.46 per share, 8,000 shares at \$2.15 per share and 7,000 shares at \$2.04 per share; and during June 2001 Mr. Cohan sold 5,000 shares at \$2.06 per share; 2,500 shares at \$2.08 per share; and 12,500 shares at \$2.06 per share, for a combined total sales of 50,000 shares of common stock.

(iii) This number includes 20,000 shares of common stock granted December 13, 1996, 20,000 shares of common stock granted November 1, 1997 and stock options granted for 80,000 shares of common stock on November 1, 1997.

Except with respect to Aspen's option to purchase Mr. Bailey's shares upon his death, and the employment agreement between Aspen and R. V. Bailey, we know of no arrangement, the operation of which may, at a subsequent date, result in change in control of Aspen.

ITEM 12. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The following sets out information regarding transactions between officers, directors and significant shareholders of Aspen during the most recent two fiscal years and during the subsequent fiscal year.

Working Interest Participation:

Some of the directors and officers of Aspen are engaged in various aspects of oil and gas and mineral exploration and development for their own account. Aspen has no policy prohibiting, nor does its Certificate of Incorporation prohibit, transactions between Aspen and its officers and directors. We plan to enter into cost-sharing arrangements with respect to the drilling of its oil and gas properties. Directors and officers may participate, from time to time, in these arrangements and such transactions may be on a non-promoted basis (actual costs), but must be approved by a majority of the disinterested directors of our Board of Directors.

R. V. Bailey, president and director of Aspen, Robert A. Cohan, vice president and director of Aspen, and Ray K. Davis, consultant to Aspen, each have working and royalty interests in certain of the California oil and gas properties operated by Aspen. The affiliates paid for their proportionate share of all costs to acquire, develop and operate these properties. As of June 30, 2001, working interests of the Company and its affiliates in certain producing California properties are set forth below:

GROSS WELLS		NET WELLS	
OIL	GAS	OIL	GAS

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

	---	---	---	---
Aspen Exploration	4	27	.55	2.57
R. V. Bailey	4	14	.06	.23
R. A. Cohan	1	14	.01	.23
R. K. Davis	4	26	.24	.55
J. L. Shelton	-	1	-	.01

Amended Royalty and Working Interest Plan:

The allocations for royalty under Aspen's "Royalty and Working Interest Plan" for employees are based on a determination of whether there is any "room" for royalties in a particular transaction. In some specific cases an oil or gas property or project is sufficiently burdened with existing royalties so that no additional royalty burden can be allocated to our employees for that property or project. In other situations a determination may be made that there are royalty interests available for assignment to our employees. The determination of whether royalty interests are available and how much to assign to employees (usually less than 3%) is made on a case by case basis by Robert A. Cohan, vice president, and R. V. Bailey, president, both of whom may benefit from royalty interests assigned. Within approximately the past two fiscal years, assignments to Mr. Cohan and Mr. Bailey have been on an equal basis, while Ms. Judy Shelton, the corporate office manager, was assigned a lesser amount. A discussion of specific royalties assigned is included in Item 10 "Executive Compensation" above.

21

Aspen Power Systems, LLC:

In order to provide an opportunity for Aspen to participate in the growing demand for electrical power generated by turbines, our management established an 85% owned subsidiary named Aspen Power Systems, LLC ("APS"), a Colorado limited liability company. On March 1, 2000 our interest in APS was reduced to 25%. The transaction is more fully described in Item 1 "Aspen Power Systems, LLC".

APS organized Solano Power, LLC on December 27, 1999 for the purpose of carrying out The Solano Project. Solano Power plans to find a joint venture partner to develop a 50 MW natural gas powered electric generation plant in Solano County, California. We own a 25% interest in Solano Power, the managers; Larry Baccari, R. V. Bailey and Ray K. Davis each contributed \$5,000 to fund Solano operations and own a 25% interest each in the project. The managers are seeking an industry partner in order to financially assist Solano Power to build and operate the plant. At June 30, 2000 APS had expended approximately \$28,400 on behalf of Solano Power as well as accruing expenses for consulting fees of R. V. Bailey and Ray K. Davis of \$31,050 and \$7,462, respectively. At June 30, 2001 Solano had no outstanding obligations and was inactive for most of the year. APS has assumed the responsibilities of finding partners to fund the power plant. At June 30, 2001 Solano transferred its operations to Aspen Power Systems and APS has assumed the responsibility for pursuing this project.

On September 17, 2001, we were advised by the State of California that our 25% owned project in Solano County, California has not been selected by the California Power Commission for further negotiations. We are now reviewing other possible options with regard to the future, if any, of this project.

Aspen Borrowings:

During fiscal 2000 Aspen borrowed an additional \$125,000 against the cash surrender value of the policy and that amount plus accrued interest of \$30,430

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

at 6% per annum was outstanding at June 30, 2000. On October 5, 2000, these amounts were repaid in full.

We borrowed \$130,000 from Ray K. Davis on October 15, 1997 for the drilling and completion of the Emigh 2-1 payable over 36 months. This loan bears interest of 11.2% and was paid in full during August 2000.

Other Arrangements:

In addition, during the fiscal year 2001 Aspen paid for various hospitality functions and for travel, lodging and hospitality expenses for spouses who occasionally accompanied directors when they were traveling on company business. Our president has also supplied Aspen with certain promotional items. The net effect of these items has been a cost to Aspen of less than \$5,000 for the fiscal years ended June 30, 2001 and 2000, respectively. Management believes that the expenditures were to Aspen's benefit. During the years ended June 30, 2001 and 2000, Aspen provided one vehicle each to Aspen's president and to an officer/director.

We also have entered into an employment agreement and a Stock Purchase Agreement with its president, as discussed in "Item 10 - Employee Compensation" and "Item 11 - Security Ownership."

We sublease a portion of our president's office in Castle Rock, Colorado on a month to month basis for a monthly fee of \$260.

Certain Business Relationships:

None.

(1)-(5) Indebtedness of Management:

None.

Transactions with Promoters:

Not applicable.

Compensation Agreements:

Please refer to the prior section, Item 10. Executive Compensation, describing the employment agreements between the Company and Messrs. Bailey and Cohan.

INDEPENDENT AUDITORS' REPORT

Board of Directors
Aspen Exploration Corporation and Subsidiary
Denver, Colorado

We have audited the consolidated balance sheets of Aspen Exploration Corporation and Subsidiary as of June 30, 2001 and 2000 and the related statements of operations, stockholders' equity, and cash flows for the years ended June 30, 2001 and 2000. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Aspen Exploration Corporation and Subsidiary as of June 30, 2001 and 2000, and the results of their consolidated operations and cash flows for the years ended June 30, 2001 and 2000 in conformity with accounting principles generally accepted in the United States.

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Nature of Business

We were incorporated under the laws of the State of Delaware on February 28, 1980 for the primary purpose of acquiring, exploring and developing oil and gas and other mineral properties. Our principal executive offices are located at 2050 S. Oneida St., Suite 208, Denver, Colorado 80224. Our telephone number is (303) 639-9860, and our facsimile number is 303-639-9863. We are currently engaged primarily in the exploration and development of oil and gas properties in California, although we have a significant amount of geologic data regarding uranium prospects in Wyoming and precious mineral prospects in Alaska. We also have a 25% interest in Aspen Power Systems, LLC, a company we incorporated to investigate, finance, and construct electrical power generation projects.

Oil and Gas Exploration and Development. Our major emphasis has been our participation in the oil and gas segment acquiring interests in producing oil or gas properties and participating in drilling operations. We engage in a broad range of activities associated with

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

the oil and gas business in an effort to develop oil and gas reserves. With the assistance of our management, independent contractors retained from time to time by Aspen, and, to a lesser extent, unsolicited submissions, we have identified and will continue to identify prospects that we believe are suitable for drilling and acquisition. Currently, our primary area of interest is in the state of California. We have acquired a number of interests in oil and gas properties in California, as described below in more detail. In addition, we also act as operator for a number of our producing wells and receive management revenues for these services.

Mineral Exploration and Development. During fiscal 1997 and 1998, we also focused our attention on uranium deposits in sandstone in Wyoming. However, the market for uranium projects did not develop as we had anticipated, and we made the decision not to carry out the extensive mining claim and lease acquisition and maintenance necessary to assemble large blocks of land needed for uranium exploration programs. In March 1998, we transferred our interest in two uranium projects in Wyoming to a privately-held Canadian company which issued its capital stock and made cash payments to Aspen. The Canadian company returned the projects and all geologic data to us in August 31, 2000, and we released the unaffiliated company from any further obligations.

We have curtailed, for the time being, exploration for precious metals in Alaska and for uranium in Wyoming. We believe that pursuing activities in the mineral segment would not be beneficial to Aspen at the present time.

Power Generation. In 1999, we formed a subsidiary named Aspen Power Systems, LLC ("APS"), a Colorado limited liability company to provide an opportunity for Aspen to participate in the growing demand for electrical power generated by turbines. Our objectives for APS were to seek opportunities or situations where our analysis indicated that a gas turbine generation plant could be constructed and operate profitably. Any plant construction will require a significant amount of capital for property acquisition, permitting, engineering and design, and construction. Neither Aspen nor the other owners of APS will be able to provide this required capital. Consequently, any such activities will likely require the availability of funds from third parties, and we cannot offer any assurance that such funding will be available when needed on commercially-reasonable terms.

During 2000 we restructured our ownership in APS and reduced our financial commitment. We are continuing to provide certain administrative services to APS. Aspen continues to pay the salary of its president, R.V. Bailey when he is working on matters for APS.

During the fiscal year ended June 30, 2001 APS reimbursed us \$42,700, at the rate of \$75 per hour for time spent by our president on APS matters. At June 30, 2001 APS still owed us \$7,100 for unpaid chargeable time of our president.

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

an electrical engineer with experience in constructing turbine power plants. The board of directors of APS consists of Mr. Baccari, R. V. Bailey, President of Aspen Exploration, and Ray K. Davis, accounting consultant to Aspen Exploration. Initially, Aspen owned an 85% interest in APS. On March 1, 2000 by resolution of the board of directors, we:

- |X| reduced our interest in APS from 85% to 25% (by transferring 60% of our interest to R. V. Bailey, Ray K. Davis, and Larry Baccari, in exchange for \$15,000 each which was contributed to the working capital of APS), and
- |X| accepted a promissory note from APS in the amount of \$130,000 with interest at 8% per annum that reimbursed Aspen for its direct costs for APS.

As a result, the ownership of APS is now 25% each for and Messrs. Bailey, Baccari and Davis. We account for our 25% interest in APS using the equity method of accounting. As of December 31, 2001 (APS's most current reporting period), we recorded net ordinary income of \$6,300 from APS. During fiscal 2001, we advanced an additional \$20,000 to APS. As of this writing, APS has not repaid that amount.

On December 1, 2000 APS entered into an agreement with a major independent power producer. Under the agreement APS will be paid certain success fees if the power producer goes forward with the development of electric power generation facilities within a defined area in Solano County, California. To date, APS has received \$246,000 in fees and reimbursed expenses.

A summary of our Company's significant accounting policies follows:

Consolidated Financial Statements

The consolidated financial statements include our Company and its wholly-owned subsidiary, Aspen Gold Mining Company. Significant intercompany accounts and transactions, if any, have been eliminated. The subsidiary is currently inactive.

The equity method has been used to account for our Company's 25% interest Aspen Power Systems, LLC formed in February 1999. Using the equity method, an investment in a company is recorded at acquisition cost which is subsequently adjusted for the Company's share of dividends, earnings, or losses.

Statement of Cash Flows

For statement of cash flows purposes, we consider short-term investments with original maturities of three months or less to be cash equivalents. Cash restricted from use in operations beyond three months is not considered a cash equivalent.

Management's Use of Estimates

Generally accepted accounting principles require us to make certain estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent liabilities at the date of the financial statements and reported amounts of revenues and

expenses. Actual results could differ from those estimates.

33

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The mining and oil and gas industries are subject, by their nature, to environmental hazards and cleanup costs for which we carry catastrophe insurance. At this time, we know of no substantial costs from environmental accidents or events for which we may be currently liable. In addition, our oil and gas business makes it vulnerable to changes in wellhead prices of crude oil and natural gas. Such prices have been volatile in the past and can be expected to be volatile in the future. By definition, proved reserves are based on current oil and gas prices and estimated reserves. Price declines reduce the estimated quantity of proved reserves and increase annual depletion expense (which is based on proved reserves).

Impairment of Long-lived Assets

Long-lived assets and identifiable intangibles are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. If the expected undiscounted future cash flow from the use of the assets and their eventual disposition is less than the carrying amount of the assets, an impairment loss is recognized and measured using the asset's fair value or discounted cash flows.

Financial Instruments

The carrying value of current assets and liabilities reasonably approximates their fair value due to their short maturity periods. The carrying value of our debt obligations reasonably approximates their fair value as the stated interest rate approximates current market interest rates of debt with similar terms.

Precious Metals and Revenues

Precious metals inventories are valued at the lower of cost (specific identification method) or market. There is no allowance for unrealized losses against inventories due to market decline at June 30, 2001. There were no sales of gold from inventory for the years ended June 30, 2001 and 2000.

Oil and Gas Properties

We follow the "full-cost" method of accounting for our oil and gas properties. Under this method, all costs associated with property acquisition, exploration and development activities, including internal costs that can be directly identified with those activities, are capitalized within one cost center. No gains or losses are recognized on the receipt of prospect fees or on the sale or abandonment of oil and gas properties, unless the disposition of significant reserves is

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

involved.

Depletion and amortization of our full-cost pool is computed using the units-of-production method based on proved reserves as determined annually by us and independent engineers. An additional depletion provision in the form of a valuation allowance is made if the costs incurred on our oil and gas properties, or revisions in reserve estimates, cause the total capitalized costs of our oil and gas properties in the cost center to exceed the capitalization ceiling. The capitalization ceiling is the sum of (1) the present value of our future net revenues from estimated production of proved oil and gas reserves applicable to the cost center plus (2) the lower of cost or estimated fair value of our cost center's unproved properties less (3) applicable income tax effects. The valuation allowance was \$281,719 at June 30, 2001 and 2000. Depletion and amortization expense was \$400,824 and \$240,284 for the years ended June 30, 2001 and 2000, respectively.

Property and Equipment -----

Depreciation and amortization of our property and equipment are expensed in amounts sufficient to relate the expiring costs of depreciable assets to operations over estimated service lives,

34

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

principally using the straight-line method. Estimated service lives range from three to eight years. When assets are sold or otherwise disposed of, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in operations in the period realized. Depreciation expense was \$11,864 and \$15,643 for the years ended June 30, 2001 and 2000, respectively.

Undeveloped Mining Properties -----

We capitalize all costs associated with acquiring properties and developing proved mineral properties, including certain internal costs which specifically relate to each mining property area ("cost center"). Our capitalized costs are deferred until the area of interest to which they relate is put into operation, sold, abandoned or impaired. Our pro rata share of advance mineral royalties, bonuses and other cash payments received by us from joint ventures or other exploration participants reduce the amount of our cost center as a recovery of capitalized costs. The excess of our pro rata share of advance mineral royalties, bonuses and other cash payments received by us from joint ventures or other exploration participants over capitalized costs in a specific cost center are recognized as revenue in the period received. All exploration costs and gains or losses on the sale or abandonment of our mining properties are charged to current operations.

Deferred Compensation Costs -----

We record the fair value of stock bonuses to employees as an expense

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

and an increase to paid-in capital in the year of grant unless the bonus vests over future years. Bonuses that vest are deferred and expensed ratably over the vesting period. During the fiscal year ended June 30, 2001 and 2000, we expensed \$19,625 and \$9,167, respectively, in stock bonuses.

Allowance for Bad Debts

We consider accounts receivable to be fully collectible as recorded as of June 30, 2001 and 2000; accordingly, no allowance for doubtful accounts is required.

Revenue Recognition

Sales of oil and gas production are recognized at the time of delivery of the product to the purchaser.

Management fees from outside parties are recognized at the time the services are rendered.

Earnings Per Share

We follow Financial Accounting Standard No. 128 ("SFAS No. 128"), addressing earnings per share. SFAS No. 128 established the methodology of calculating basic earnings per share and diluted earnings per share. The calculations differ by adding any instruments convertible to common stock (such as stock options, warrants, and convertible preferred stock) to weighted average shares outstanding when computing diluted earnings per share.

35

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following is a reconciliation of the numerators and denominators used in the calculations of basic and diluted earnings per share for the years ended June 30, 2001 and 2000:

	2001		Per Share Amount	Net Income
	Net Income	Shares	-----	-----
Basic earnings per share:				
Net income and				
share amounts	\$2,498,504	5,454,441	\$.46	\$495,5
Dilutive securities				
stock options		180,000		

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Repurchased shares (83,430)

Diluted earnings per share:

Net income and assumed share conversion	\$2,498,504	5,551,011	\$.45	\$495,5
	=====	=====	=====	=====

Segment Reporting

We follow SFAS No. 131, "Disclosure about Segments of an Enterprise and Related Information" ("SFAS No. 131"), which amended the requirements for a public enterprise to report financial and descriptive information about its reportable operating segments. Operating segments, as defined in the pronouncement, are components of an enterprise about which separate financial information is available that is evaluated regularly by us in deciding how to allocate resources and in assessing performance. The financial information is required to be reported on the basis that is used internally for evaluating segment performance and deciding how to allocate resources to segments.

New Accounting Pronouncements

Business Combinations

In June 2001, the Financial Accounting Standards Board finalized FASB Statement No. 141, Business Combinations ("SFAS 141"), and No. 142, Goodwill and Other Intangible Assets ("SFAS 142"). SFAS 141 requires the use of the purchase method of accounting and prohibits the use of the pooling-of-interests method of accounting for business combinations initiated after June 30, 2001. SFAS 141 also requires that the Company recognize acquired intangible assets apart from goodwill if the acquired intangible assets meet certain criteria. SFAS 141 applies to all business combinations initiated after June 30, 2001 and for purchase business combinations completed on or after July 1, 2001. It also requires, upon adoption of SFAS 142, that the Company reclassify the carrying amounts of intangible assets and goodwill based on the criteria in SFAS 141.

Goodwill and Other Intangible Assets

SFAS 142 requires, among other things, the companies no longer amortize goodwill, but instead test goodwill for impairment at least annually. In addition, SFAS 142 requires that the Company identify reporting units for the purposes of assessing potential future impairments of goodwill, reassess the useful lives of other existing recognized

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

intangible assets, and cease amortization of intangible assets with an indefinite useful life. An intangible asset with an indefinite useful life should be tested for impairment in accordance with the guidance in SFAS 142. SFAS 142 is required to be applied in fiscal years beginning after December 15, 2001 to all goodwill and other intangible assets recognized at the date, regardless of when those assets were initially recognized. SFAS 142 requires the Company to complete a transitional goodwill impairment test six months from the date of adoption. The Company is also required to reassess the useful lives of other intangible assets within the first interim quarter after adoption of SFAS 142.

Income Taxes

We account for income taxes under Statement of Financial Accounting Standards No. 109, "Accounting for Income Taxes" (SFAS 109). Temporary differences are differences between the tax basis of assets and liabilities and their reported amounts in the financial statements that will result in taxable or deductible amounts in future years.

Stock Award and Stock Option Plans

We grant common stock and stock options to employees and non-employees and apply Accounting Principles Board (APB) Opinion No. 25 (APB 25), "Accounting for Stock Issued to Employees", and related Interpretations in accounting for all stock award and stock option plans for employees and directors.

Following the guidance of APB 25, compensation cost has been recognized for stock options issued to employees and directors as the excess of the market price of the underlying common stock on the date of the grant over the exercise price of the Company's stock options on the date of the grant.

Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" (SFAS 123), requires us to provide pro forma information regarding net income as if compensation cost for the Company's stock option plans had been determined in accordance with the fair value based method prescribed in SFAS 123. To provide the required pro forma information, we estimate the fair value of each stock option at the grant date by using the Black-Scholes option-pricing model.

In certain circumstances, we issue common stock for invoiced services, to pay creditors and in other similar situations. In accordance with SFAS No. 123, payments in equity instruments to non-employees for goods or services are accounted for by the fair value method, which relies on the valuation of the service at the date of the transaction, or public stock sales price, whichever is more reliable as a measurement.

Note 2 EMPLOYEE BENEFIT PLANS

Defined Contribution Plan

We have a 401(k) defined contribution plan that covers all employees. Under the amended terms of the plan, an employee is eligible to participate in the plan immediately upon being hired to work at least 1,000 hours per year and having attained age 21. Participants may

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

contribute up to a maximum of 11.75% of their pre-tax earnings (not to exceed \$10,500) to the plan. Under the plan, we may make discretionary contributions to the plan. We made a plan contribution for fiscal 2001 of \$-0- and \$27,981 for fiscal 2000.

37

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Split Dollar Life Insurance Plan -----

As part of the President's employment agreement, we purchased a split dollar life insurance policy for the President's benefit. We paid annual premiums of \$360,000 on behalf of the President, of which a portion ("split") constituted compensation for the President. At each anniversary we pay the President an amount as a bonus to reimburse the President for personal income tax on his split. Additional compensation of \$-0- and \$612 has been recognized as reimbursement to the President for income taxes for the years ended June 30, 2001 and 2000. The President's taxable amount was \$-0- and \$2,188 for fiscal 2001 and 2000, equal to the "economic benefit" attributed to the President as defined by the Internal Revenue Code. We paid no premiums during fiscal 2001 and 2000.

In the event of termination of the plan, we would receive the lesser of the policy cash surrender value, or the accumulated Corporate Premium Payments (split). The President would receive the excess of the total policy cash surrender value over the corporate cash surrender value, if any. In the event of premature death of the President, we would receive an amount equal to the accumulated corporate premium payments and the President's named beneficiary would receive the proceeds of the death benefit.

As of June 30, 2001 and June 30, 2000, our accumulated cash surrender value was \$239,095, which has been included as an asset on our balance sheet. During 2000, we borrowed \$125,000 against the cash surrender value of the policy and that amount plus capitalized and accrued interest of \$30,430 and \$3,084, respectively, was outstanding at June 30, 2000. That amount was paid in full on October 5, 2000. The death benefit payable to the named beneficiary as of June 30, 2001 and 2000 is approximately \$760,000.

Medical Benefit Plan -----

For the fiscal years ended June 30, 2001 and 2000, we had a policy of reimbursing employees for medical expenses incurred but not covered by our paid medical insurance plan. Expenses reimbursed for fiscal 2001 and fiscal 2000 were \$14,751 and \$13,621, respectively.

Note 3 MAJOR CUSTOMERS

We derived in excess of 10% of our revenue from various sources (oil and gas sales and mineral royalties) as follows:

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

	The Company		
	A	B	C
Year ended:			
June 30, 2001	39%	11%	45%
June 30, 2000	75%	12%	-

38

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 4 NOTES PAYABLE

We owe the following debt:

	June 30,	
	2001	2000
Borrowings from life insurance company on cash surrender value of officer life insurance, interest at 6% per annum, collateralized by cash surrender value of policy.	\$ -0-	\$ 155,430
Note payable to related party, interest at 11.21% per annum, monthly principal and interest payments of \$4,269, due September 2000, collateralized by working interests in the Emigh lease.	-0-	12,566
Note payable to third party for the purchase of producing oil and gas properties. Interest at 5.475% per annum. Principal payments of \$68,875 due in January 2001. There is no collateral for this note.	-0-	68,750
Total notes payable	-0-	236,746
Less current portion	-0-	236,746
Long term portion	\$ -0-	\$ -0-

The weighted average interest rate on short term borrowings outstanding at June 30, 2001 and 2000 were -0- and 16.33%, respectively.

Note 5 STOCKHOLDERS' EQUITY

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Stock Options

During fiscal 2000 one director exercised his options for 80,000 shares of the Company stock at an average price of \$0.26 per share, or \$20,800. On March 2, 2000 stock options were granted to the President of Aspen Power Systems, LLC for 100,000 shares of the Company's common stock at a grant price of \$0.625 per share. These options are exercisable for 25,000 shares per annum from March 15, 2000 through March 15, 2003.

A total of 100,000 shares of restricted stock with a weighted average grant value of \$0.18 per share using the Black-Scholes option-pricing model were awarded to a consultant in fiscal 2000.

39

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

During fiscal 2001 two officers, one employee and a consultant exercised their stock options for 600,000 shares of our common stock at an average exercise price of \$0.26 per share. As consideration for the option shares purchased, the individuals surrendered common stock with a fair value equal to the exercise price of the option shares. The fair value of the shares surrendered was based on a ten-day average bid price immediately prior to the exercise date. Total shares surrendered were 133,733. The effect of this transaction is a net increase to the common stock par value of \$2,331 and a corresponding decrease to additional paid in capital of \$2,331.

Total compensation expense in the statement of operations includes amortization of prior stock awards of \$19,625 during 2001 and \$9,167 during 2000.

As of June 30, 2001, we had an aggregate of 180,000 common shares reserved for issuance under its stock option plans. These plans provide for the issuance of common shares pursuant to stock option exercises, restricted stock awards and other equity based awards.

The following information summarizes information with respect to options granted under our equity plans:

	Number of Shares -----	Weighted Average Exercise Price of Shares Under Plans -----
Outstanding balance		
June 30, 1999	760,000	\$.26
Granted	100,000	.625
Exercised	(80,000)	.26
Forfeited or expensed	-0-	-0-

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Outstanding balance June 30, 2000	780,000	.31
Granted	-0-	-0-
Exercised	(600,000)	.26
Forfeited or expensed	-0-	-0-
	-----	-----
Outstanding balance June 30, 2001	180,000 =====	\$.46 =====

40

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following table summarizes information concerning outstanding and exercisable options as of June 30, 2001:

Exercise Price	Number Outstanding	Outstanding		Exercisable	
		Weighted Average Remaining Contractual Life In Years	Weighted Average Exercisable Price	Number Exercisable	Weighted Average Exercise Price
\$.20	20,000	01/01/2002(1)	\$.20	20,000	\$.20
.24	20,000	01/01/2002(1)	.24	20,000	.24
.28	20,000	01/01/2002(1)	.28	20,000	.28
.32	20,000	01/01/2002(1)	.32	20,000	.32
.625	100,000	03/15/2004	.625	50,000	.625
	----- 180,000 =====			----- 130,000 =====	

(1) The term of the option will be the earlier of January 1, 2002 or the date the optionee is no longer an employee of the Company.

The fair value of each option grant, as opposed to its exercisable price, is estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted average assumptions: no dividend yield, expected volatility of 8.60%, risk free interest rates of 8.5% and expected lives of 4 years. There were no options granted in 2001 or 2000.

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

We account for the two stock option plans using APB Opinion No. 25. The stock options granted during fiscal year 2000 were to consultants. These options were valued using the fair value method of SFAS 123 as calculated by the Black-Scholes option-pricing model and the resulting compensation was included in operating expense during fiscal year 2000. No options were granted to employees during the fiscal years 2001 and 2000. Therefore, no adjustment to net income for compensation expense would be recorded under SFAS No. 123, on a pro forma basis, as reflected in the following table:

		2001 -----	2000 -----
Net Income:	As Reported	2,498,504	495,569
	Pro Forma	2,498,504	495,569
Basic EPS:	As Reported	.46	.09
	Pro Forma	.46	.09
Diluted EPS:	As Reported	.45	.09
	Pro Forma	.45	.09

41

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 6 INCOME TAXES

We deferred \$179,200 in income taxes for the year ended June 30, 2001 and \$-0- deferred income taxes in fiscal 2000. We accrued \$23,000 of income tax expense to the state of California in fiscal 2000 and paid \$160,224 in state income taxes in fiscal 2001. During 2001, we used \$1,747,656 in net operating loss carryforwards to offset fiscal June 30, 2001 federal taxable income. During 2000, we used \$508,262 in net operating loss carryforwards to offset fiscal June 30, 2000 federal taxable income. At June 30, 2001 and 2000, approximately \$-0- and \$85,500, respectively, of net operating loss carryforwards expired.

During 2001, we reduced the valuation allowance related to the deferred tax assets to \$-0-.

The deferred tax consequences of temporary differences in reporting items for financial statement and income tax purposes are recognized, if appropriate. Realization of future tax benefits related to the deferred tax assets is dependent on many factors, including our ability to generate taxable income within the net operating loss carryforward period. We have considered these factors in reaching our conclusion as to the valuation allowance for financial reporting purposes.

The income tax effect of temporary differences comprising the deferred tax assets and deferred tax liabilities on the accompanying balance sheet is the result of the following:

	2001 -----	2000 -----
Deferred tax assets:		
General business credit	\$ 1,200	\$ 6,600

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Federal tax loss		
carryforwards	258,850	934,207
Valuation allowance	-0-	(834,895)
	-----	-----
	260,050	105,912
	-----	-----
Deferred tax liabilities:		
Property, plant and		
equipment	(3,750)	(1,455)
Oil and gas properties	(435,500)	(104,457)
	-----	-----
	(439,250)	(105,912)
	-----	-----
	(\$179,200)	\$ -0-
	=====	=====

42

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

A reconciliation between the statutory federal income tax rate (34%) and the effective rate of income tax expense for the two years ended June 30 is as follows:

	2001	2000
	-----	-----
Statutory federal income tax rate	(34%)	(34%)
State tax, net of federal benefit	5.6%	4.4%
Utilization of net operating loss carryforwards	(34%)	34%
	-----	-----
Effective rate	5.6%	4.4%
	=====	=====

The provision for income taxes consists of the following components:

	2001	2000
	-----	-----
Current tax expense, state	\$160,224	\$ 23,000
Deferred tax expense	179,200	--
	-----	-----
Total income tax Provision	\$339,424	\$ 23,000
	=====	=====

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

We have available net operating loss carryforwards of approximately \$670,550 (\$350,000 expires after June 30, 2002 with the balance expiring through the year ending June 30, 2012). The valuation allowance was reduced to \$-0- in the year ended June 30, 2001 due to usage of net operating loss carryforwards and increased profitability of operations.

In addition, we have tax credit carryforwards of approximately \$1,200 that expired after June 30, 2001.

43

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 7 SEGMENT INFORMATION

We operate in three industry segments within the United States: (1) oil and gas exploration and development, (2) mineral exploration and development and (3) electrical generation construction.

Identified assets by industry are those assets that are used in our operations in each industry. Corporate assets are principally cash, cash surrender value of life insurance, and furniture, fixtures and vehicles.

We have adopted Statement of Financial Accounting Standards No. 131, "Disclosures about Segments of an Enterprise and Related Information" (SFAS 131). The adoption of SFAS 131 requires the presentation of descriptive information about reportable segments which is consistent with that made available to our management to assess performance.

The oil and gas segment derives its revenues from the sale of oil and gas and prospect generation and administrative overhead fees charged to participants in our oil and gas ventures.

The mining segment receives its revenues primarily from the sale of minerals and precious metals and from time to time from the sale of a mineral venture that it has originated. Currently, this segment is inactive.

The electrical generation construction segment will receive its revenues from the sale, design, construction and/or operation of gas turbine or other electrical generation projects. As of June 30, 2001, we were in the planning stage of this segment and no revenues have been received. However, we did advance APS \$20,000 for operating expenses.

During the years ended June 30, 2001 and 2000, there were no intersegment revenues. The accounting policies applied by each segment are the same as those used by us in general.

Net sales to one customer of the oil and gas segment totaled approximately \$1,625,000 of revenues or 45% for the year ended June 30, 2001.

There have been no differences from the last annual report in the basis of measuring segment profit or loss. There have been no material changes in the amount of assets for any operating segment since the

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

last annual report except for the oil and gas segment which capitalized approximately \$1,371,000 for the development and acquisition of oil and gas property.

44

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Segment information consists of the following:

	Oil and Gas	Mining	Power Plant	Corporat
Revenues:				
2001	\$3,867,482	\$ -0-	\$ -0-	\$ 73,0
2000	1,424,278	-0-	-0-	16,3

Capital expenditures:				
2001	\$1,370,905	\$ -0-	\$ -0-	\$ 21,1
2000	753,370	-0-	-0-	40,4

Note 8 RELATED PARTY TRANSACTIONS

During the years ended June 30, 2001 and 2000, we provided one vehicle each to our president and to an officer/director. We also paid travel, lodging and meal expenses for spouses who, from time to time, accompanied directors or officers when they were traveling or entertaining on company business. The cost of these items to us totaled less than \$5,000 in each of the years ended June 30, 2001 and 2000. We

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

believe that the expenditures were to our benefit.

In January 1983, we entered into a Stock Purchase Agreement with our president, R. V. Bailey, whereby Mr. Bailey granted us an option to purchase up to 75% of our common stock owned by him at his death. The agreement was replaced by a Stock Purchase Agreement dated June 4, 1993 which requires us to apply 75% of any key man insurance proceeds it receives upon Mr. Bailey's death towards the purchase of up to 75% of the common shares owned by him at the time of his death. Mr. Bailey's estate is obligated to sell such shares to us. The purchase price of the shares acquired under the Agreement shall be the fair market value of the shares on the date of death. We and Mr. Bailey agree that the fair market value of the shares on the date of death may not necessarily be the market price of the stock on the date of death as quoted on the OTC Bulletin Board, or as reported by another NASDAQ quotation service or any exchange on which our common stock is quoted. The 1993 Agreement further requires that we maintain one or more life insurance policies on Mr. Bailey's life in the amount of \$1,000,000 for the purpose of this Agreement. Therefore, we may be required to expend up to \$750,000 of the insurance proceeds to acquire up to 75% of the shares owned by Mr. Bailey at the time of his death. Premiums for this policy were \$6,970 for each of the fiscal years ended June 30, 2001 and 2000.

45

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Prior to February 2000, Mr. Cohan, our West Coast Division president who resides in California, provided us an office in his home at no cost. We reimbursed Mr. Cohan for expenses he incurred in his home office on behalf of ourselves, such as telephone and other general and administrative expenses. During February 2000, we opened a separate office in Bakersfield and no longer reimburse home office expense to Mr. Cohan.

Larry Baccari, President and 25% minority shareholder of Aspen Power Systems, LLC, and consultant to Aspen received compensation of \$-0- and \$37,631 relating to consulting fees incurred in the startup of this venture during fiscal 2001 and 2000.

During fiscal 2001, we assigned the following overrides at no cost to employees:

	R. V. Bailey -----	R. A. Cohan -----	J. L. Shelton -----
Armstrong 17-4	1.260000%	1.260000%	0.480000%
Cygnus 2	0.345961%	0.345961%	0.131795%
Pale Rider 3-26	0.508032%	0.508032%	0.193536%

R. V. Bailey, President and director of the Company, Robert A. Cohan, President - West Coast Division and director of the Company, and Ray K. Davis, consultant and officer of us, each have working and royalty interests in certain of the California oil and gas properties operated

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

by us. The related parties paid for their proportionate share of all costs to acquire, develop and operate these properties on the same terms as other unaffiliated participants. As of June 30, 2001, our working interests of us and related parties in certain producing California properties are as set forth below:

	GROSS WELLS		NET WELLS	
	OIL	GAS	OIL	GAS
	---	---	---	---
Aspen Exploration	4	27	.55	2.57
R. V. Bailey	4	14	.06	.23
R. A. Cohan	1	14	.01	.23
R. K. Davis	4	26	.24	.55
J. L. Shelton	-	1	-	.01

See Note 11 for additional related party disclosure.

Note 9 CONCENTRATION OF CREDIT RISK

Financial instruments, which potentially subject us to concentrations of credit risk, consist principally of cash and cash equivalents, accounts receivable and the cash surrender value of life insurance. While we have approximately \$1,290,223 in excess of the FDIC \$100,000 limit at one bank, we place our cash and cash equivalents with high

46

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

quality financial institutions in order to limit credit risk. Concentrations of credit risk with respect to accounts receivable are limited since relatively small amounts are due from each account, and the accounts are distributed across unrelated businesses and individuals, with the exception of one major gas purchaser, who normally settles within 25 days of the previous month's gas purchases. An international insurance company holds the cash surrender value of the split dollar life insurance contract. We believe our exposure to credit risk is minimal.

Note 10 OIL AND GAS ACTIVITIES

Capitalized costs

Capitalized costs associated with oil and gas producing activities are as follows:

	June 30,	
2001		2000

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

	-----	-----
Proved properties	\$ 4,297,306	\$ 2,942,712
	-----	-----
Accumulated depreciation, depletion and amortization	(1,639,694)	(1,238,870)
Valuation allowance	(281,719)	(281,719)
	-----	-----
	(1,921,413)	(1,520,589)
	-----	-----
Net capitalized costs	\$ 2,375,893	\$ 1,422,123
	=====	=====

Results of operations

Results of operations for oil and gas producing activities are as follows:

	Year ended June 30,	
	-----	-----
	2001	1999
	-----	-----
Revenues*	\$3,867,482	\$1,424,278
Production costs	(122,114)	(100,221)
Depreciation and depletion	(400,824)	(240,284)
	-----	-----
Results of operations (excluding corporate overhead)	\$3,344,544	\$1,083,773
	=====	=====

*Includes oil and gas related fees and equipment rentals.

Fees charged by us to operate the properties totaled approximately \$21,400 per month in 2001 and \$12,800 per month in 2000.

Prospect generation fees received from outside investors in wells drilled during fiscal 2001 and 2000 amounted to \$-0- and \$109,000, respectively. These amounts were charged against the full cost pool.

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited oil and gas reserve quantities

The following unaudited reserve estimates presented as of June 30, 2001 and 2000 were prepared by an independent petroleum engineer. There are many uncertainties inherent in estimating proved reserve quantities and in projecting future production rates and the timing of development expenditures. In addition, reserve estimates of new discoveries that have little production history are more imprecise than those of

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

properties with more production history. Accordingly, these estimates are expected to change as future information becomes available.

Proved oil and gas reserves are the estimated quantities of crude oil, condensate, natural gas and natural gas liquids which geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions.

Proved developed oil and gas reserves are those reserves expected to be recovered through existing wells with existing equipment and operating methods.

48

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited net quantities of proved and proved developed reserves of crude oil (including condensate) and natural gas (all located within the United States) are as follows:

Changes in proved reserves	(Bbls)	(MCF)
	(in thousands)	
Estimated quantity, June 30, 1999	17	1,851
Revisions of previous estimates	3	(33)
Discoveries	1	935
Production	(6)	(380)
Estimated quantity, June 30, 2000	15	2,373
Revisions of previous estimates	1	(362)
Discoveries	2	589
Purchased	-	20
Production	(5)	(377)
Estimated quantity, June 30, 2001	13	2,243
	=====	=====

June 30, 2001	584	1,659	2,243

49

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited standardized measure

The following table presents a standardized measure of the discounted future net cash flows attributable to our proved oil and gas reserves. Future cash inflows were computed by applying year-end prices of oil and gas to the estimated future production of proved oil and gas reserves. The future production and development costs represent the estimated future expenditures (based on current costs) to be incurred in developing and producing the proved reserves, assuming continuation of existing economic conditions. Future income tax expenses were computed by applying statutory income tax rates to the difference between pre-tax net cash flows relating to our proved oil and gas reserves and the tax basis of proved oil and gas properties and available net operating loss carryforwards. Discounting the future net cash inflows at 10% is a method to measure the impact of the time value of money.

	June 30, 2001	2000
	-----	-----
	(in thousands)	
Future cash inflows	\$ 22,774	\$ 11,923
Future production and development costs	(1,334)	(959)
Future income tax expense	(8,335)	(3,558)
	-----	-----
Future net cash flows	13,105	7,406
10% annual discount for estimated timing of cash flows	(4,647)	(2,198)
	-----	-----
Standardized measure of discounted future net cash flows	\$ 8,458 =====	\$ 5,208 =====

50

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

The following presents the principal sources of the changes in the standardized measure of discounted future net cash flows:

	Years ended June 30,	
	2001	2000
	(in thousands)	
Standardized measure of discounted		
future net cash flows, beginning of year	\$ 5,208	\$ 2,52
Sales and transfers of oil and gas produced, net of production costs	(3,488)	(1,17
Net changes in prices and production costs and other	8,327	3,59
Net change due to discoveries	3,673	2,56
Acquisition of reserves	121	-0
Revisions of previous quantity estimates	(2,199)	(3
Development costs incurred	207	15
Accretion of discount	736	28
Net change in income taxes	(4,777)	(2,89
Other	650	20
	-----	-----
	3,250	2,68
	-----	-----
Standardized measure of discounted future cash flows, end of year	\$ 8,458	\$ 5,20
	=====	=====

Net changes in prices and production costs of \$8,327 were the result of an increase in the price received for oil and gas at year end which was offset slightly by an increase in operating costs associated with more producing gas wells in 2001 than in 2000 and fewer oil wells. The revision of previous estimates of (\$2,199) was the result of assigning 1,000 more recoverable barrels of oil and reducing recoverable reserves of gas by approximately 362,000 MCF. All adjustments were based on performance reviews of individual wells.

Note 11 COMMITMENTS AND CONTINGENCIES

At June 30, 2001, we were committed to the following drilling and development projects in California:

Project	Aspen Cost
-----	-----
Armstrong 17-4 Completion	\$108,000

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

Brandt 36X-27 Drilling	108,000
Fistfull of Dollars Drilling	55,000
Sour Grass Seismic	75,000

Total	\$346,000
	=====

51

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Total costs for the Armstrong 17-4 completion to be paid by us are estimated to be \$108,000. This well has been completed and gas sales commenced on September 17, 2001.

In 1991, we entered into an employment agreement with our president, R. V. Bailey, which provides for the payment of \$100,000 per year to him, as salary, and also the reimbursement of expenses, health insurance, and other benefits (including the split-dollar life insurance plan). The agreement provided for a two-year term which was automatically renewed for two additional two-year terms (through November 1999) at Mr. Bailey's option. We were not entitled to terminate this agreement except upon Mr. Bailey's death, disability, or for cause (as defined in the agreement). This agreement expired by its own terms on November 30, 1999 and has not been renewed. However, we continue to pay Mr. Bailey \$100,000 salary per year plus other benefits. On August 1, 2001, Mr. Bailey's salary was increased to \$125,000 per year.

In January 1983, we entered into a Stock Purchase Agreement with Mr. Bailey whereby Mr. Bailey granted Aspen an option to purchase up to 75% of our common stock owned by him at his death. This agreement was replaced by a Stock Purchase Agreement dated June 4, 1993. The 1993 agreement requires that we apply 75% of any key man insurance proceeds it receives upon Mr. Bailey's death towards the purchase of up to 75% of the common shares owned by him at the time of his death, and Mr. Bailey's estate is obligated to sell such shares to Aspen. The purchase price of the shares acquired under the 1993 agreement shall be the fair market value of the shares on the date of death. Both Aspen and Mr. Bailey agree that the fair market value of the shares on the date of death may not necessarily be the market price of the stock on the date of death as quoted on the OTCBB, or as reported by any exchange. The 1993 agreement further requires us to maintain one or more life insurance policies on Mr. Bailey's life in the amount of \$1,000,000 for the purpose of this agreement.

On April 16, 1998, we entered into an employment agreement with Robert A. Cohan, which provides for the payment of \$90,000 for the first year of employment, plus reimbursement of expenses, including health insurance. We have renewed the agreement effective April 15, 1999 to April 15, 2002 at the rate of \$95,000 per year for the year commencing April 15, 1999, \$100,000 for the year commencing April 15, 2000 and \$105,000 for the year commencing April 15, 2001. (See Item 10 (g) below.) On August 1, 2001 Mr. Cohan's salary was increased to \$125,000 per year. Prior to February 2000, we and Mr. Cohan agreed to utilize a portion of Mr. Cohan's home in Bakersfield, California from which to conduct Aspen's business. Mr. Cohan did not charge Aspen any rent for

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

the use of his home as a business office. Aspen agreed to pay for all office supplies, communication and copy equipment used by Mr. Cohan in his office, as well as the monthly telephone expense incurred by Mr. Cohan on behalf of Aspen. On February 7, 2000, we entered into a three-year lease of office space in Bakersfield, California thereby alleviating the necessity of home office reimbursement to Mr. Cohan.

Note 12 SUBSEQUENT EVENTS

In August 2001, the Armstrong 17-4 well, in which we have a 36% working interest, tested 2000 MCFPD and went on production September 17, 2001.

The Brandt 36X-27 well commenced drilling operations on September 11, 2001.

A 7.5 square mile 3-D seismic survey is currently being conducted over our leasehold in Tehama County, California. The data should be acquired and processed by late October 2001.

52

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 13 INTERIM FINANCIAL DATA

The year-end adjustment that is material to the results of the fourth quarter ending June 30, 2000 is the adjustment to depreciation, depletion and amortization as a result of receiving the reserve study from an independent reservoir engineer. The aggregate effect of this year-end adjustment to the results of the fourth quarter was to decrease depletion expense for the year from an estimated \$301,500 based on prior years' reserve studies to an actual depletion expense of approximately \$240,000, a decrease of \$61,500 or 20%.

There were no year-end adjustments that were material to the results of the fourth quarter ending June 30, 2001.

Note 14 OPERATING LEASE

We maintain office space in Denver, Colorado, our principal office; Castle Rock, Colorado and Bakersfield, California. The Denver office consists of approximately 1,108 square feet with an additional 750 square feet of basement storage. We entered into a one-year lease agreement to December 31, 2001 for a lease rate of \$1155 per month. We also sublease a portion of our president's office in Castle Rock, Colorado on a month to month basis for a monthly fee of \$260. The Bakersfield, California office has 546 square feet and a monthly rental fee of \$683. The three year lease expires February 2, 2003. Rent expense for the years ended June 30, 2001 and 2000 were \$25,320 and \$17,337, respectively.

Future minimum lease payments are as follows:

2002	\$ 15,120
2003	\$ 8,190

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

2004 \$ 5,460

Note 15 ASPEN POWER SYSTEMS, LLC

On March 1, 2000, we passed a resolution concerning Aspen Power Systems, LLC ("APS") which (1) reduced our interest in APS from 85% to 25%; (2) accepted a note receivable from APS in the amount of \$130,000 with interest at 8% per annum and (3) transferred our 60% relinquished interest to R. V. Bailey, president and chairman, Ray K. Davis, consulting accountant, and Larry Baccari, consultant, in exchange for \$15,000 each which was contributed to the working capital of APS. The ownership of Aspen Power Systems, LLC is now 25% each for us and Messrs. Bailey, Baccari and Davis. We plan to account for our 25% interest in APS using the equity method of accounting.

We will not be required to fund any future projects of APS and no further dilution of our equity in APS is anticipated. We have expensed the entire amount of funds advanced to APS prior to June 30, 2000 and assigned no value to the note receivable due from APS. As of June 30, we have a receivable of \$20,000 that we believe to be fully collectable.

We have been providing a limited amount of office space and certain general and administrative costs to APS, which are a nominal expense. In addition, we have been paying all of Mr. Bailey's salary at a direct rate of approximately \$48.00 per hour (excluding benefits). APS has reimbursed us \$42,700 at the rate of \$75.00 per hour for services through June 30, 2001. At our fiscal year end June 30, 2001, APS owed us approximately \$7,100 for Mr. Bailey's unreimbursed time. Actual

53

ASPEN EXPLORATION CORPORATION AND SUBSIDIARY
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

expenses incurred by Mr. Bailey in connection with work on behalf of APS are reimbursed to Mr. Bailey by APS from its own funds. At June 30, 2001, there were no outstanding balances due Mr. Bailey from APS.

On March 2, 2000 Larry Baccari, president of APS and consultant to us, was granted non-qualified stock options to purchase 100,000 shares of our common stock. The options are exercisable at a price of \$0.625 per share for a period of four years through March 15, 2004.

Startup costs relative to Aspen Power Systems, LLC were \$-0- and \$45,657 for the years ended June 30, 2001 and 2000, and were expensed in those periods.

APS organized Solano Power, LLC on December 27, 1999 for the purpose of carrying out The Solano Project. Solano Power plans to find a joint venture partner to develop a 50 MW natural gas powered electric generation plant in Solano County, California. We own a 25% interest in Solano Power, the managers; Larry Baccari, R. V. Bailey and Ray K. Davis each contributed \$5,000 to fund Solano operations and own a 25% interest each in the project. The managers are seeking an industry partner in order to financially assist Solano Power to build and operate the plant. At June 30, 2000, APS had expended approximately

Edgar Filing: ASPEN EXPLORATION CORP - Form 10KSB

\$28,400 on behalf of Solano Power as well as accruing expenses for consulting fees of R. V. Bailey and Ray K. Davis of \$31,050 and \$7,462, respectively. At June 30, 2001 Solano had no outstanding obligations and was inactive for most of the year. APS has assumed the responsibilities of finding partners to fund the power plant. At June 30, 2001 Solano transferred its operations to Aspen Power Systems and APS has assumed the responsibility for pursuing this project.
