National Grid Transco Close period trading update
for the year ended 31 March 2004

Strong Profit and Earnings Growth

National Grid Transco plc (the "Group") is today issuing its trading update on the commencement of the close period and prior to the announcement of its preliminary results on Thursday 20 May 2004.

The Group's financial performance for the year ended 31 March 2004 has been particularly strong, earnings per share (excluding exceptional items and goodwill amortisation) will be substantially in excess of expectations.

Profit before tax (excluding exceptional items and goodwill amortisation) is now expected to be in excess of £30m as a result of our decision to suspend, with effect from 1 October 2002, recognition of cash) UK pension surplus credits.

As previously indicated, we do not expect to release any prior year tax provisions and the effective tax rate on the profit before tax (excluding exceptional items) is anticipated to be approximately 20%.

The cashflow impact of the programmes previously announced to deliver restructuring and

Edgar Filing: NATIONAL GRID TRANSCO PLC - Form 6-K

benefits, combined with the Group's share buy-back programme, will result in net debt of around £1.5 billion at 31 March 2003.

During the course of the year (up to 25 March 2003), the Group purchased for cancellation 24,220,000 of its ordinary shares at an average price of 401.59p.
