ABOUT GENSET

Genset is a genomics-based biotechnology company focused on generating a pipeline of drug targets and drug candidates in the areas of CNS and metabolic disorders. Genset has successfully used its integrated technology platform and association studies approach to identify and characterize drug targets and drug response markers in the fields of CNS, metabolic and other diseases. Building upon the expertise accumulated in various alliances with pharmaceutical partners and its portfolio of genomic patents, Genset discovers and validates novel drug targets and candidates for its own account. Its teams have already discovered and launched the development of a lead protein in the metabolism field named Famoxin, and are continuing their research with a view to discovering and developing other drugs. Genset's news releases are available on the Company's Web site at <http://www.genset.fr>.
