Client Base**75.3 thousand net additions in 3Q03**

By the end of the third quarter, the Company had 1,887,030 subscribers, with 545,426 postpaid and 1,341,604 prepaid customers, representing 29% and 71% of the client base, respectively.

Edgar Filing: TELE CELULAR SUL PARTICIPACOES SA - Form 6-K/A

In terms of gross additions, TSU acquired 196,790 new customers, an increase of 45% when compared to the 3Q02. This represents an estimated new acquisition market share of 55%.

In 3Q03, the estimated market share was 58% and the total penetration rate was 21%.

Operating Revenue

Sales of handsets increased 41.6%

The 3Q03 total gross operating revenue was R\$ 341.0 million, an 18.1% increase over 3Q02. This increase can be mostly attributed to the growth of the subscriber base and an increase in handset business.

VAS amounted to R\$ 9.2 million for the quarter, representing 3.3% of gross service revenues. The popularity of text messaging (SMS) is continuously increasing and in the 3Q03 the number of messages grew by 130% compared to the 3Q02.

The ARPU (Average Revenue per User) for the period was R\$ 38, remaining stable when compared with the 3Q02, despite the strong growth of prepaid costumers.

On July 6, 2003, the Company launched the new Carrier Selection Code (CSP), allowing users to choose a long distance carrier. This new CSP forms part of the operating requirements under the new Personal Communications Service (PCS) system, which the Company has been operating under since December 2002.

As of the third quarter of 2003, in light of the new rate structure introduced by the PCS system, we began disclosing the Company's Long Distance Service Revenues; it should be noted that this replaces the VC2 (calls made by a client in a registration area to persons outside the registration area but within the Company's service area) and VC3 (calls made by a client in a registration area to another registration area, outside of the Company's service area) voice revenues.

Costs

Cost of services, excluding depreciation or amortization, amounted to R\$ 44.6 million, an increase of 12.2% over 3Q02, mainly reflecting the growth in the customer.

Edgar Filing: TELE CELULAR SUL PARTICIPACOES SA - Form 6-K/A

Selling expenses for the quarter totaled R\$ 44.1 million, an increase of 33% over 3Q02, mostly due to the greater sales volume during the period, which increased by 45%.

SAC decreased by 25% However, subscriber acquisition cost (SAC) decreased from R\$ 91 in the 3Q02 to R\$ 68 in the 3Q03, reflecting the decrease in handset subsidies, which were mainly focused on retention as well as a smaller impact of the dollar on the cost of the handsets, which resulted from the more favorable exchange rate.

Decreasing Bad Debt In 3Q03, bad debt totaled R\$ 5.0 million, showing a continued decreasing trend year-over-year.

G&A expenses in line with the 2Q03 G&A expenses totaled R\$ 17.7 million in 3Q03, a 15.4% increase when compared to the R\$ 15.3 reported in 3Q02. The increase in G&A throughout 2003 was mainly due to the increase in expenses related to IT warranties, that expired during the year resulting in higher expenses .

Depreciation and Amortization, including the amortization of goodwill that resulted from the Company's privatization, amounted to R\$ 60,6 million, or 4.7% above the figure reported in the 3Q02.

EBITDA

Improved EBITDA Margin in 3Q03 vs 2Q03 In the 3Q03, EBITDA (earnings before net financial expenses, excluding depreciation and amortization) reached R\$ 95.6 million, representing an EBITDA margin of 45% over net service revenues. The strong growth in gross addition created more pressure on EBITDA margins, on the period.
