A Under U.S. GAAP, marketable securities would be divided between held-to-maturity securities and available-for-sale securities. Those securities classified as available-for-sale would be recorded at market value and the unrealized gain or loss would be recorded as part of comprehensive income.

B For U.S. GAAP purposes, the Company accounts for stock-based employee compensation arrangements using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No.25, iAccounting for Stock Issued to Employees. Under U.S. GAAP, when the exercise price of certain stock options is amended (the iRepricing i), these options are accounted for as variable compensation from the date of the effective Repricing. Under this method, following the Repricing date, compensation expense is recognized when the quoted market value of the Company's common shares exceeds the amended exercise price. Should the quoted market value subsequently decrease, a recovery of a portion, or all of the previously recognized compensation expense will be recognized. For U.S. GAAP purposes, the Company will adopt SFAS 123R, iAccounting for Stock Based Compensationi effective January 1, 2006. SFAS 123R requires the use of the fair value method of accounting for stock based compensation. This standard is substantially consistent with the revised provisions of CICA 3870, which was adopted by the Company for Canadian GAAP effective January 1, 2004. For U.S.GAAP, the Company has not yet determined which acceptable method of adoption it will apply.

C Under Canadian GAAP, the Company capitalizes mineral property exploration and development costs after proven and probable reserves have been established. The Company also capitalizes costs on properties where it has found non-reserve material that does not meet all the criteria required for classification as proven or probable reserves. Under U.S. GAAP, exploration and development expenditures incurred on properties where mineralization has not been classified as a proven and probable reserve under SEC rules, are expensed as incurred. Accordingly, certain expenditures are capitalized for Canadian GAAP purposes but expensed under U.S. GAAP.

### Pro-forma stock based compensation

For U.S. GAAP purposes, the Company accounts for stock-based employee compensation arrangements using the intrinsic value method. Had the fair value method of accounting been used under U.S. GAAP, the net loss and net loss per share would have been as follows:

	2005	2004	2003
