Brazil Minerals, Inc. Form 10-Q August 19, 2015

U.S. SECURITIES AND EXCHANGE COMMISSION Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the quarterly period ended June 30, 2015

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934.

For the transition period from ______ to _____

Commission File Number 000-55191

Brazil Minerals, Inc.

(Exact name of registrant as specified in its charter)

Nevada39-2078861(State or other jurisdiction of
incorporation or organization)(IRS Employer
Identification No.)

155 North Lake Avenue Suite 800 Pasadena, California 91101 (Address of principal executive offices)

(213) 590-2500

Issuer's telephone number, including area code:

Indicate by check mark whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Edgar Filing: Brazil Minerals, Inc. - Form 10-Q

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Do not check if a smaller reporting company Smaller repo

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes "No b

APPLICABLE ONLY TO CORPORATE ISSUERS

As of August 17, 2015 the registrant had 2,378,174,998 shares of common stock issued and outstanding.

NOTE 1 - ORGANIZATION, BUSINESS AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Organization and Description of Business

Brazil Minerals, Inc. ("BMIX" or the "Company") was incorporated as Flux Technologies, Corp. under the laws of the State of Nevada, U.S. on December 15, 2011. The Company, through subsidiaries, mines and sells diamonds, gold, sand, and mortar. The Company, through subsidiaries, owns outright or jointly owns 11 mining concessions (the highest level of mineral right in Brazil) and 15 other mineral rights in Brazil, almost all for diamonds and gold. The Company, through subsidiaries, owns a large alluvial diamond and gold processing and recovery plant, and several pieces of earth-moving capital equipment used for mining.

On December 18, 2012, the Company entered into and consummated an acquisition agreement with Brazil Mining, Inc. ("BMI") whereby BMI agreed to transfer to the Company certain mining and exploration rights, in exchange for 35,783,342 shares of the Company. At the same time, the previous sole director surrendered for voluntary cancellation, 99,999,000 shares of common stock of the Company such that, upon the transaction and a simultaneous private placement by the Company of its common stock, BMI owned 51% of the outstanding common stock of the Company. The Company changed its name to Brazil Minerals, Inc. on December 24, 2012. See Note 2 for additional information.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its 99.99% subsidiary, BMIX Participações Ltda. ("BMIX Subsidiary"), which at December 31, 2013 owned 55% of Mineração Duas Barras Ltda. ("MDB"). During the year ended December 31, 2014, the BMIX Subsidiary acquired the remaining 45% of MDB. Thus, as of June 30, 2015 and December 31, 2014, MDB is a wholly owned subsidiary and has been consolidated within the Company's financial statements. See Note 2 for additional information.

During the year ended December 31, 2014, the BMIX Subsidiary acquired an initial 25% interest in RST Recursos Minerais Ltda. ("RST"), and during the first quarter of 2015 it acquired, an additional 25% interest in RST, thus bringing its total ownership of RST to 50%. As of March 18, 2015, RST has been consolidated within the Company's financial statements.

On April 17, 2015, the BMIX Subsidiary incorporated Hercules Resources Corporation ("HRC"). On May 27, 2015, HRC incorporated and formalized title to 99.99% of Hercules Brasil Comercio e Transportes Ltda. ("Hercules Brasil"). Thus, as of June 30, 2015, Hercules Brasil is a wholly owned subsidiary and has been consolidated within the Company's financial statements.

All material intercompany accounts and transactions have been eliminated in consolidation.

Going Concern

Edgar Filing: Brazil Minerals, Inc. - Form 10-Q

The financial statements have been prepared on a going concern basis which contemplates the realization of assets and the settlement of liabilities in the normal course of business. The Company has limited working capital, and has incurred losses in each of the past two years. These factors create doubt about the Company's ability to continue as a going concern. The consolidated financial statements do not include any adjustment that might be necessary if the Company is unable to continue as a going concern.

The ability of the Company to continue as a going concern is dependent on the Company generating cash from its operations, the sale of its stock, and/or obtaining debt financing. During the six months ended June 30, 2015, the Company funded operations through the receipt of \$552,780 in net proceeds from equity and debt sales. Subsequent to June 30, 2015, the Company has received \$205,000 in proceeds related to sales of equity and debt. Management's plan to fund its capital requirements and ongoing operations include increase in cash received from sales of diamond and gold derived from mining new areas, and increase in cash received from mortar and sand sales, all of which are expected to occur within 2015. Management's secondary plan to cover any shortfall is selling its equity securities and obtaining debt financing. There can be no assurance the Company will be successful in these efforts.

Interim Consolidated Financial Statements

The accompanying unaudited interim consolidated financial statements have been prepared by the Company pursuant to the rules and regulations of the United States Securities and Exchange Commission. Certain information and disclosures normally included in annual financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to such rules and regulations. In the opinion of management, all adjustments and disclosures necessary for a fair presentation of these consolidated financial statements have been included. Such adjustments consist of normal recurring adjustments. These interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements of the Company for the year ended December 31, 2014. The results of operations for the six months ended June 30, 2015 are not indicative of the results that may be expected for the full year.

Basis of Presentation

The consolidated financial statements of the Company have been prepared on the accrual basis of accounting in accordance with generally accepted accounting principles ("GAAP") of the United States of America and are presented in U.S. dollars.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingencies at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results may differ from those estimates.

Fair Value of Financial Instruments

The Company follows the guidance of Accounting Standards Codification ("ASC") Topic 820 – Fair Value Measurement and Disclosure. Fair value is defined as the exit price, or the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants as of the measurement date. The guidance also establishes a hierarchy for inputs used in measuring fair value that maximizes the use of observable inputs and minimizes the use of unobservable inputs by requiring that the most observable inputs be used when available. Observable inputs are inputs market participants would use in valuing the asset or liability and are developed based on market data obtained from sources independent of our Company. Unobservable inputs are inputs that reflect our Company's assumptions about the factors market participants would use in valuing the asset or liability. The guidance establishes three levels of inputs that may be used to measure fair value:

Level 1. Observable inputs such as quoted prices in active markets;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

As of June 30, 2015 and December 31, 2014, the Company's derivative liabilities were considered a level 2 liability. See Note 4 for a discussion regarding the determination of the fair market value. The Company does not have any level 3 assets or liabilities.

The Company's financial instruments consist of cash and cash equivalents, accounts receivable, taxes recoverable, prepaid expenses, inventory, deposits and other assets, accounts payable, accrued expenses, deferred revenue, and convertible notes payable. The carrying amount of these financial instruments approximates fair value due to either length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in these consolidated financial statements.

Cash and Cash Equivalents

The Company considers all highly liquid instruments purchased with a maturity of three months or less to be cash equivalents to the extent that the funds are not being held for investment purposes. The Company's bank accounts are deposited in FDIC insured institutions. Funds held in U.S. banks are insured up to \$250,000 and funds held in Brazilian banks are insured up to 250,000 Brazilian Reais (approximately \$80,575 as of June 30, 2015).

Inventory

Inventory consists of rough diamonds, gold, ore stockpile, parts, supplies and related production costs and is stated at lower of cost or market. The amount of any write-down of inventories to net realizable value and all losses, are recognized in the period the write-down of loss occurs. At June 30, 2015 and December 31, 2014, inventory consisted primarily of ore stockpile.

Value-Added Taxes Receivable

The Company records a receivable for value added taxes recoverable from Brazilian authorities on goods and services purchased by its Brazilian subsidiaries. The Company intends to recover the taxes through the acquisition of capital equipment from sellers who accept tax credits as payments.

Investment under the Equity Method

In June 2014, the Company entered into an agreement to purchase 25% of the equity of RST for cash payments of 250,000 Brazilian Reals and the issuance of shares of the Company's common stock valued at 100,000 Brazilian Reals. In connection with this agreement the Company issued 1,428,572 shares of common stock with a value of \$43,868 and made cash payments of \$107,858. As of December 31, 2014, the investment was accounted for using the equity method. Effective March 18, 2015, the Company purchased an additional 25% of RST. See Note 2 for additional information. The remaining 50% interest in RST is owned by BMI, a related party. RST's assets are 10 mining concessions for diamond and gold as well as 12 other mineral rights. Income and expenses related to RST were insignificant during the six months ended June 30, 2015. At the date of acquisition of the additional ownership percentage the Company accounted for the investments in RST as a business combination.

Property and Equipment

Property and equipment are stated at cost. Major improvements and betterments are capitalized. Maintenance and repairs are expensed as incurred. Depreciation is computed using the straight-line method over the estimated useful life. At the time of retirement or other disposition of property and equipment, the cost and accumulated depreciation are removed from the accounts and any resulting gain or loss is reflected in the statements of operations as other gain or loss, net.

The diamond and gold processing plant and other machinery are depreciated over an estimated useful life of 10 years; and computer and other office equipment over an estimated useful life of three (3) years. As of June 30, 2015 and December 31, 2014, all property and equipment related to the processing plant and other production machinery has been depreciated, except for approximately \$800 in computer equipment. Accumulated depreciation as of June 30, 2015, was \$155,006.

Mineral Properties

Costs of exploration, carrying and retaining unproven mineral rights properties are expensed as incurred. Mineral property acquisition costs are capitalized. The Company has taken steps to verify title to mineral properties in which it has an interest, and believes title to be in good status for its properties.

Impairment losses are recorded on mineral properties used in operations when indicators of impairment are present and the undiscounted cash flows estimated to be generated by those assets are less than the assets' carrying amount. As of June 30, 2015 and December 31, 2014, the Company did not recognize any impairment losses related to mineral properties held.

Intangible Assets

For intangible assets purchased in a business combination, the estimated fair values of the assets received are used to establish their recorded values. For intangible assets acquired in a non-monetary exchange, the estimated fair values of the assets transferred (or the estimated fair values of the assets received, if more clearly evident) are used to establish their recorded values, unless the values of neither the assets received nor the assets transferred are determinable within reasonable limits, in which case the assets received are measured based on the carrying values of the assets transferred. Valuation techniques consistent with the market approach, income approach and/or cost approach are used to measure fair value. Intangible assets consist of mineral rights held by MDB and RST.

Impairment of Long-Lived Assets

For long-lived assets, such as property and equipment and intangible assets subject to amortization, the Company continually monitors events and changes in circumstances that could indicate carrying amounts of long-lived assets may not be recoverable. When such events or changes in circumstances are present, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through undiscounted expected future cash flows. If the total of the future cash flows is less than the carrying amount of those assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets to be disposed of are reported at the lower of the carrying amount or the fair value less costs to sell.

Revenue Recognition

The Company recognizes revenue when products are fully delivered or services have been provided and collection is reasonably assured. Typically, the Company records revenues upon delivery of the products to the customer. As of June 30, 2015 and December 31, 2014, the Company had deposits of \$588,752 and \$543,630, respectively, related to proceeds received for future diamond and gravel sales which have been recorded as customer deposits. A portion of these deposits are recorded as long term as the agreements provide for the delivery of diamonds in excess of one year from the balance sheet date. See Note 4 and 6 for additional information related to these agreements.

Costs of Goods Sold

Included within costs of goods sold are the costs of cutting and polishing rough diamonds, and costs of production such as diesel fuel, labor, and transportation.

Stock-Based Compensation

The Company records stock-based compensation in accordance with ASC Topic 718, Compensation - Stock Compensation. ASC 718 requires companies to measure compensation cost for stock-based employee compensation at fair value at the grant date and recognize the expense over the employee's requisite service period. Under ASC 718, volatility is based on the historical volatility of our stock or the expected volatility of the stock of similar companies. The expected life assumption is primarily based on historical exercise patterns and employee post-vesting termination behavior. The risk-free interest rate for the expected term of the option is based on the U.S. Treasury yield curve in effect at the time of grant.

The Company uses the Black-Scholes option-pricing model, which was developed for use in estimating the fair value of options. Option-pricing models require the input of highly complex and subjective variables including the expected life of options granted and the expected volatility of our stock price over a period equal to or greater than the expected life of the options. Because changes in the subjective assumptions can materially affect the estimated value of our employee stock options, it is management's opinion that the Black-Scholes option-pricing model may not provide an accurate measure of the fair value of our employee stock options. Although the fair value of employee stock options is determined in accordance with ASC Topic 718 using an option-pricing model, that value may not be indicative of the fair value observed in a willing buyer/willing seller market transaction.

The Company has adopted a stock plan to attract, retain and motivate its directors, officers, employees, consultants and advisors. The Company's stock plan provides for the issuance of up to 15,000,000 common shares for employees, consultants, directors, and advisors.

Foreign Currency

The Company's foreign subsidiaries use a local currency, the Brazilian real, as the functional currency. Resulting translation gains or losses are recognized as a component of accumulated other comprehensive income. Transaction gains or losses related to balances denominated in a currency other than the functional currency are recognized in the consolidated statements of operations. Net foreign currency transaction losses included in the Company's consolidated statements of operations were negligible for all years presented.

Income Taxes

The Company accounts for income taxes in accordance with ASC Topic 740, Income Taxes. ASC 740 requires a company to use the asset and liability method of accounting for income taxes, whereby deferred tax assets are recognized for deductible temporary differences, and deferred tax liabilities are recognized for taxable temporary differences. Temporary differences are the differences between the reported amounts of assets and liabilities and their tax bases. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion, or all of, the deferred tax assets will not be realized. Deferred tax assets and liabilities are adjusted for the effects of changes in tax laws and rates on the date of enactment. As of June 30, 2015 and December 31, 2014, the Company's deferred tax assets had a full valuation allowance.

Under ASC 740, a tax position is recognized as a benefit only if it is "more likely than not" that the tax position would be sustained in a tax examination being presumed to occur. The amount recognized is the largest amount of tax benefit

Edgar Filing: Brazil Minerals, Inc. - Form 10-Q

that is greater than 50% likely of being realized on examination. For tax positions not meeting the "more likely than not" test, no tax benefit is recorded. The Company has identified the United States Federal tax returns as its "major" tax jurisdiction. The United States Federal return years 2011 through 2014 are still subject to tax examination by the United States Internal Revenue Service; however, we do not currently have any ongoing tax examinations. The Company is subject to examination by the California Franchise Tax Board for the years ended 2011 through 2014 and currently does not have any ongoing tax examinations.

Basic Income (Loss) Per Share

The Company computes loss per share in accordance with ASC Topic 260, Earnings per Share, which requires presentation of both basic and diluted earnings per share on the face of the statement of operations. Basic loss per share is computed by dividing net loss available to common shareholders by the weighted average number of outstanding common shares during the period. Diluted loss per share gives effect to all dilutive potential common shares outstanding during the period. As of June 30, 2015 and 2014, the Company's potentially dilutive securities relate to common stock issuable in connection with convertible notes payable, options and warrants. Dilutive loss per share for the three and six months ended June 30, 2015 and 2014 excludes all potential common shares if their effect is anti-dilutive. As of June 30, 2015, if all holders of convertible notes payable, options and warrants exercised their right to exercise or convert these securities into common stock, the Company would have outstanding shares of common stock in excess of its authorized shares of common stock.

Other Comprehensive Income

Other comprehensive income is defined as the change in equity of a business enterprise during a period from transactions and other events and circumstances from non-owner sources, other than net income and including foreign currency translation adjustments.

Recent Accounting Pronouncements

In April 2015, the FASB issued Accounting Standard Update ("ASU") 2015-03, Simplifying the Presentation of Debt Issuance Costs. This update requires capitalized debt issuance costs to be classified as a reduction to the carrying value of debt rather than a deferred charge, as is currently required. This update will be effective for the Company for all annual and interim periods beginning after December 15, 2015 and is required to be adopted retroactively for all periods presented, and early adoption is permitted. The Company is currently evaluating the expected impact of this new accounting standard on its financial statements.

The Company has reviewed other recent accounting pronouncements issued to the date of the issuance of these consolidated financial statements, and do not believe any of these pronouncements will have a material impact.

NOTE 2 - ACQUISITIONS

RST Recursos Minerais Ltda. ("RST")

In June 2014, the Company entered into an agreement to purchase 25% of the equity of RST for cash payments of 250,000 Brazilian Reais and the issuance of shares of the Company's common stock valued at 100,000 Brazilian Reais. In connection with this agreement the Company issued 1,428,572 shares of common stock with a value of \$43,868 and made cash payments of \$107,858. At December 31, 2014, the investment was accounted for using the equity method. Effective March 18, 2015, the Company purchased an additional 25% of RST from a third party for R\$400,000 or \$124,680. Under the terms of the agreement, the Company is to make monthly payments ranging from R\$75,000 to R\$100,000 beginning March 25, 2015. As of June 30, 2015, R\$350,000 or \$112,805 remained payable in connection with the acquisition and is included within notes payable on the accompanying balance sheet.

As a result of the additional 25% acquired, the Company owns 50% of RST and has consolidated the operations in the Company as of March 18, 2015. The remaining 50% ownership is held by BMI. On the date of consolidation, the Company determined the fair market value of RST to be \$570,548. The fair market value was based upon the average price paid by the Company for the 50% ownership, including the relief of monies advanced to RST and increasing for the non-controlling interest which represents 50%. The Company allocated 100% of the fair market value to the mineral rights held by RST.

The purpose of the Company's acquisition of RST was due to the quality of its mineral assets, close proximity to the Company's MDB diamond and gold processing plant, and attractive acquisition price. Pro-forma financial statements have not been provided as the assets, liabilities and current operations of RST are not significant. The Company expects the future expected cash flows to exceed the carrying value of the assets due to the close proximity to MDB's plant which is expected to shorten the exploration period as new plant and equipment will not need to be procured.

Mineração Duas Barras Ltda. ("MDB")

On March 23, 2013, upon approval by its Board of Directors, the Company entered into an agreement pursuant to which BMI sold to the Company the rights to all profits, losses and appreciation or depreciation and all other economic and voting interests of any kind in respect of the BMI's interest in MDB in exchange for the issuance to BMI of 1,000,000 shares of the Company's common stock. The shares were valued at their fair market value of \$0.66 per share as of March 23, 2013. As a result of the acquisition, a deemed dividend of \$800,000 was recorded related to the acquisition of the option. The net assets of MDB at the date of the acquisition of the 55% equity interest in MDB were \$1,035,695. The acquisition was accounted for using the purchase method. As a result of the transaction, non-controlling interest of \$460,663 was recognized in the consolidated financial statements.

The net assets upon the above acquisition consisted of the following:

Cash	\$56,914	
Inventory	497,002	
Equipment	508,105	
Intangible assets	163,918	
Liabilities assumed	(202,244)

Net assets \$1,023,695

During the year ended December 31, 2014, the Company acquired the remaining 45% interest in MDB for cash of \$1,050,000 and 2,817,857 shares of common stock of the Company with a fair market value of \$212,100 based upon the closing market price of the Company's common stock on the dates of acquisition. This resulted in a decrease in non-controlling interest of \$417,870 and a decrease in additional paid in capital of \$844,230. As of December 31, 2014, the Company owned 99.99% of the issued and outstanding equity of MDB and has removed the non-controlling interest from its financial statements.

NOTE 3 - COMPOSITION OF CERTAIN FINANCIAL STATEMENT ITEMS

Intangible Assets

Intangible assets consist of mining rights at MDB and RST and are not amortized as rights are perpetual. The carrying value was \$692,451 and \$124,245 at June 30, 2015 and December 31, 2014, respectively.

Accounts Payable and Accrued Liabilities

		As of
	As of	December
	June 30,	31,
	2015	2014
Accounts payable and other accruals	\$429,551	\$545,665
Accrued interest	129,210	-
Total	\$558,761	\$545,665

NOTE 4 - CONVERTIBLE PROMISSORY NOTES PAYABLE

Convertible Notes Payable - Fixed Conversion Price

On January 7, 2014, the Company issued to a family trust a Senior Secured Convertible promissory note in the principal amount of \$244,000 (the "Note") and warrants to purchase an aggregate of 488,000 shares of the Company's common stock, par value \$0.001 per share at an exercise price of \$0.125 per share through December 26, 2018 (the "Warrants"). The Company received gross proceeds of \$244,000 for the sale of such securities. The outstanding principal of the Note bears interest at the rate of 12% per annum. All principal on the Note is payable on June 30, 2015 (the "Maturity Date"), which as of the date of this filing is past due and in technical default. However, no demands for payment have been made. Interest is payable on September 30, 2014 and on the Maturity Date. The Note is convertible at the option of the holder into common stock of the Company at a conversion rate of one share for each \$0.10 of principal and interest converted. A debt discount related to the value of the warrants in the amount of \$10,252 was recorded and was being amortized over the life of the note. During the six months ended June 30, 2015, the discount was fully amortized.

In January 2015, the Company issued four convertible promissory notes totaling \$200,000 in proceeds and options to purchase an aggregate of 40,000,000 shares of the Company's common stock at an exercise price of \$0.005 per share for a period of three years. The convertible promissory notes incur interest at 10.0% and are due January 30, 2018. The convertible promissory notes are convertible at the option of the holder at a fixed conversion price of \$0.0025 per share. A debt discount related to the relative fair market value of the options in the amount of \$22,423 and an implied beneficial conversion feature of \$22,423 were recorded and are being amortized over the life of the notes. During the six months ended June 30, 2015, \$13,703 of the discount was amortized to interest expense. As of June 30, 2015, \$31,143 of the discount remained. The note has been reflected as a long-term liability on the accompanying balance sheet.

In January 2015, the Company purchased machinery and equipment from a third party making an initial deposit of \$10,910 (R\$35,000), issuing notes payable totaling \$38,963 (R\$125,000) payable in five equal monthly installments starting March 15, 2015 and \$43,638 in customer deposits (R\$140,000) which are to be satisfied through sand produced by MDB. The note payable is convertible into common stock of the Company at the market rate on the date of issuance and thus a beneficial conversion feature was not recorded. As of June 30, 2015, the deposit had been paid, \$40,288 was included within notes payable and \$45,122 within customer deposits on the accompany balance sheet.

In June 2015, the Company issued three fixed-floor convertible promissory notes and received an aggregate of \$100,000 in proceeds. The convertible promissory notes incur interest at 10.0% per annum and are due December 31, 2016. The convertible promissory notes are convertible at the option of the holder at a 40% discount to the average of the five lowest closing prices of the Company's common stock over the previous 20 calendar days. In addition, the conversion rate of each of the notes has a ceiling of \$0.03 and a floor of \$0.000033 per share. A debt discount related to the beneficial conversion feature of \$87,720 was recorded and is being amortized over the life of the notes. During the six months ended June 30, 2015, \$7,310 of the discount was amortized to interest expense. As of June 30, 2015, \$80,410 of the discount remained. The notes have been reflected as a long-term liability on the accompanying balance sheet. Subsequent to June 30, 2015, \$75,000 was agreed to be changed to preferred equity; please see Note 8.

During the six months ended June 30, 2015, the Company issued 911,596,774 shares of common stock upon conversion of \$685,756 in convertible notes payable and accrued interest.

Convertible Notes Payable - Variable Conversion Price

At various times to fund operations, the Company issues convertible notes payable in which the conversion features are variable. In addition, some of these convertible notes payable have on issuance discounts and other fees withheld. During the six months ended June 30, 2015, the Company issued convertible notes payable with principal amounts aggregating \$230,825 in which proceeds of \$203,780 were received. The convertible notes payable incur interest rates ranging from 8.0% to 12.0% per annum with due dates ranging from March 2015 to June 2016. The convertible notes payable are convertible into common stock of the Company at discounts ranging from 40-50% of either the lowest, or the average of two or three lowest, closing prices or volume-weighted average prices in the 20 days before the conversion date. Due to the variable conversion price, the Company has recorded a derivative liability in connection with the convertible notes payable. The combination of the original issue discount ("OID"), fees paid and allocation to the derivative liabilities resulting in a full discount to the convertible notes payable. The discounts are being amortized over the term of the convertible notes payable.

Including the convertible notes payable discussed in the preceding paragraph, as of June 30, 2015, the Company has \$610,479 in principal of notes payable with remaining discounts of \$216,825. The convertible notes payable incur interest at rates ranging from 8.0% to 12.0% per annum with due dates ranging from March 2015 to June 2016. The convertible notes payable are convertible into common shares of the Company at discounts ranging from 35-50% of either the lowest, or the average of two or three of the lowest, closing prices or volume-weighted average prices from 5 to 20 days before the conversion date. Due to the variable conversion prices of these notes, the Company recorded derivative liabilities in connection with the convertible notes payable. The combination of the OID, fees paid and allocation to the derivative liabilities resulted in a full discount to the convertible notes payable. The discounts are being amortized over the term of the convertible notes payable. During the six months ended June 30, 2015 and 2014, \$479,809 and \$0 of the discount was amortized to interest expense, respectively. As of June 30, 2015, the unamortized debt discount was \$216,825.

Derivative Liabilities

In connection with convertible notes payable the Company records derivative liabilities for the conversion feature. The derivative liabilities are valued on the date of issuance of the convertible note payable and revalued at each reporting period. During the six months ended June 30, 2015, the Company recorded derivative liabilities of \$488,229 based upon the following Black-Scholes option pricing model average assumptions: an exercise price of \$0.0015 to \$0.0003, our stock price on the date of grant (\$0.0033 to \$0.0007), expected dividend yield of 0%, expected volatility of 218% to 313%, risk free interest rate of 0.12%, and an expected term of 0.50 years. Upon initial valuation, the derivative liability exceeded the face value of the convertible note payable of \$230,825, a day one loss on derivative liability of \$288,449 was recorded.

On June 30, 2015, the derivative liabilities were revalued at \$961,564 resulting in a gain of \$1,036,954 related to the change in fair market value of the derivative liabilities. The derivative liabilities were revalued using the Black-Scholes option pricing model with the following average assumptions: an exercise price of \$0.0007 to \$0.0003, stock price on the date of grant (\$0.0011 to \$0.0007), expected dividend yield of 0%, expected volatility of 258% to 318%, risk-free interest rate of 0.12%, and an expected term of 0.5 years.

Future Potential Dilution

Most of the Company's convertible notes payable contain adjustable conversion terms with significant discounts to market. As of June 30, 2015, the Company's convertible notes payable are convertible into an aggregate of approximately 1.7 billion shares of common stock. In addition, due to the variable conversion prices on some of the Company's convertible notes, the number of common shares issuable is dependent upon the traded price of the Company's common stock. As of June 30, 2015, if all holders of convertible notes payable exercised their right to the common stock, the outstanding shares of common stock of the Company would be in excess of its authorized shares of common stock.

NOTE 5 - STOCKHOLDERS' DEFICIT

Authorized, Amendments and Stock Split

On March 29, 2015, the Company amended its articles of incorporation to increase the authorized number of shares of common stock to two (2) billion shares, and on June 29, 2015, the Company further amended its articles of incorporation to increase the authorized number of shares of common stock to four (4) billion shares. As of December 31, 2014, the Company had 300,000,000 common shares authorized with a par value of \$0.001 per share and 10,000,000 Series A preferred stock authorized with a par value of \$0.001.

Six Months Ended June 30, 2015 Transactions

During the six months ended June 30, 2015, the Company issued 7,409,184 shares of common stock with a fair market value of \$24,808 to consultants in lieu of cash payments. The shares were valued based upon the closing market price of the Company's common stock on the date the service was complete.

During the six months ended June 30, 2015, the Company issued 45,030,163 shares of common stock with a fair market value of \$42,915 to its chief executive officer in satisfaction of amounts payable. The shares were valued based upon the closing market price of the Company's common stock on the date the service was complete.

During the six months ended June 30, 2015, the Company issued 150,897,436 shares of common stock for cash proceeds of \$97,500.

See Note 4 for discussion of additional common stock issuances.

Six Months Ended June 30, 2014 Transactions

On April 30, 2014, the Company issued 675,000 shares of common stock with a deemed value of \$62,100 pursuant to an agreement to purchase an additional 18.75% interest in MDB.

During the six months ended June 30, 2014, the Company issued 2,769,874 shares of common stock with a deemed value of \$228,060 to its officer and certain consultants in lieu of cash payment. Prepaid stock compensation of \$23,182 was recorded to be amortized over the remaining term of the consulting contract.

During the six months ended June 30, 2014, a shareholder returned 33,125 shares of common stock to treasury for cancellation. This resulted in an increase of \$33 to additional paid in capital.

During the six months ended June 30, 2014, the Company issued 1,428,572 shares of common stock with a deemed value of \$100,000 pursuant to an acquisition of an equity interest in RST.

During the six months ended June 30, 2014 the Company issued 1,391,559 of shares of common stock of the Company in settlement of promissory notes of \$55,000.

Common Stock Options

In January 2015, options to purchase 400,000,000 shares of common stock were issued in connection with \$200,000 in convertible notes payable. See Note 5 for additional information. The options expire on January 30, 2018 and have an exercise price of \$0.005 per share. The fair value of the options was \$79,111, of which \$22,423 was allocated to the options based upon the relative fair market value. The options were valued using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.0024), expected dividend yield of 0%, expected volatility of 176%, risk-free interest rate of 1.70%, and an expected term of 3.00 years.

During the six months ended June 30, 2015, the Company granted options to purchase an aggregate of 12,922,854 shares of common stock to non-management directors and a consultant. The options were valued at \$39,200. The options were valued using the Black-Scholes option pricing model with the following average assumptions: our stock price on date of grant (\$0.0018), expected dividend yield of 0%, expected volatility of 176%, risk-free interest rate of 1.70%, and an expected term of 5.00 years.

On March 31, 2014, June 30, 2014, June 30, 2014, September 30, 2014 and December 31, 2014, the Board of Directors of the Company granted options to purchase an aggregate of 424,560, 366,860, 123,578, 851,745, and 3,335,468, respectively, shares of common stock to non-management directors and a consultant;. The options were valued at \$35,345, \$25,000, \$8,281, \$37,116 and \$59,433, respectively, using the Black-Scholes option pricing model with the following assumptions:

				September	December
				30, 2014	31, 2014
	March	June 30,	June 30,	(weighted	(weighted
	31, 2014	2014	2014	avg.)	avg.)
Stock price	\$0.10	\$0.08	\$0.09	\$ 0.05	\$ 0.02
Exercise price	\$0.09590	\$0.082	\$0.074	\$ 0.06	\$ 0.02
Expected life (years)	5 years	5 years	5 years	5 years	5 years
Risk free interest rate	1.20 %	1.20 %	1.20 %	1.70 %	1.70 %
Volatility	120.95 %	120.95%	120.95%	137.00 %	154.00 %

See Note 6 discussion regarding options issued in connection with future diamond sales.

Common Stock Warrants

Warrants Issued with Convertible Notes

488,000 warrants were issued as part of a convertible note placement that occurred on January 7, 2014. These warrants expire on December 26, 2018 and have an exercise price of \$0.125 per share. The fair value of the warrants was \$10,252 and was calculated using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.07), expected dividend yield of 0%, expected volatility of 53%, risk-free interest rate of 1.69%, and an expected term of 5.00 years.

400,000 warrants were issued as part of a convertible note placement that occurred on April 30, 2014. These warrants expire on April 30, 2017 and have an exercise price of \$0.11 per share. The fair value of the warrants was \$13,151 and was calculated using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.09), expected dividend yield of 0%, expected volatility of 75%, risk-free interest rate of 0.12%, and an expected term of 3 years.

2,000,000 warrants were issued as part of a convertible note placement that occurred on June 27, 2014. These warrants expire on June 30, 2017 and have an exercise price of \$0.11 per share. The fair value of the warrants was \$65,481 and was calculated using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.08), expected dividend yield of 0%, expected volatility of 76%, risk-free interest rate of 0.12%, and an expected term of 3 years.

Warrants Issued with Private Placements of Equity

During the year ended December 31, 2014, 1,636,907 warrants were issued in connection with private placements of equity. These warrants expire in three years and have an exercise price of \$0.10 per share. The fair value of the warrants was \$70,810 and was calculated using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.06), expected dividend yield of 0%, expected volatility of 136%, risk-free interest rate of 0.12%, and an expected term of three years.

In June 2015, in connection with a common stock raise, the Company issued a total of 31,153, 846 warrants that expire on August 31, 2017 and have an exercise price of \$0.001 per share. The value of the warrants was approximately \$30,000 which is a decrease to additional paid-in capital.

NOTE 6 - COMMITMENTS AND CONTINGENCIES

Operating Leases

The Company leases offices in Pasadena, California, U.S., and in Olhos D'Agua, Brazil. Such costs are immaterial to the consolidated financial statements and accordingly are not reflected herein.

Mine Option

On July 30, 2013, the BMIX Subsidiary acquired for zero cost an option to develop and own up 75% of a vanadium, titanium, and iron property in the state of Piauí in Brazil in exchange for the performance over a period of time of certain defined geological research steps, as well as the payment, over a period of time, of 875,000 Brazilian reais in cash (\$282,013 as of June 30, 2015) and the equivalent of 125,000 Brazilian reais in common stock (\$40,288 as of June 30, 2015).

Diamond Delivery Agreements

On March 4, 2014, the Company received proceeds of \$500,000 from a sale of polished and GIA graded diamonds pursuant to an agreement with two buyers that agreed to receive these diamonds over a period of one year. One of the buyers has expertise and a long and successful history of investments in natural resources. As part of this transaction, we pledged with a third party collateral agent an aggregate of 11,000,000 shares of our common stock, valued at approximately \$990,000 at the time the transaction was consummated, in order to secure the delivery of the diamonds. The number of shares pledged is subject to periodic adjustment as diamonds are delivered and as the market price of our common stock may change. We also issued to the buyers two-year options to purchase an aggregate of 3,000,000 shares of our common stock at an exercise price (subject to adjustment upon the occurrence of certain events) of \$0.12 per share, a premium of 33% above the stock price when the transaction was consummated. These options were initially to expire on March 4, 2016 and have an exercise price of \$0.12, which was reduced to \$0.08 per share in October 2014 and the expiration date extended to March 4, 2018. The fair value of the options was \$93,280 was calculated using the Black-Scholes option pricing model with the following assumptions: our stock price on date of grant (\$0.09), expected dividend yield of 0%, expected volatility of 78%, risk-free interest rate of 0.78%, and an expected term of 2 years. There were no deliveries under this contract during the six months ended June 30, 2015.

On April 30, 2014, the Company entered into Subscription Agreements with four investors (the "Buyers"), pursuant to which the Buyers agreed to pay to the Company an aggregate of \$500,000 and the Company agreed to deliver to the Buyers from time to time on or before December 31, 2015, polished and GIA-graded diamonds of at least 0.4 carats having a certain aggregate Rappaport value. The Company agreed to pledge with third party collateral agents for the Buyers an aggregate of 8,000,000 shares of its common stock, valued at approximately \$800,000 at the time the transaction was consummated, in order to secure the delivery of the diamonds. The number of shares pledged is subject to periodic adjustment as diamonds are delivered and as the market price of the Company's stock may change. On the date of the agreement, the Company reserved for the Buyers or their designees, an aggregate of 3,750,000 shares of the Company's common stock (the "Shares") and two year options to purchase an aggregate of 1,875,000 shares of Common Stock at an exercise price of \$0.12 per share, payable in cash to the Company (the "Options"). The fair value of the options was \$57,662 was calculated using the Black-Scholes option pricing model with the following assumptions: stock price on date of grant (\$0.09), expected dividend yield of 0%, expected volatility of 78%, risk-free interest rate of 0.11%, and an expected term of 2 years. The common stock issued was valued at \$348,750 based upon the closing market price of the Company's common stock. Since the agreement contained various elements, the Company allocated the \$47,544 to the options, \$287,552 to the shares issued and \$164,904 to deferred revenue based upon the relative fair market value. There were no deliveries under this contract during the six months ended June 30, 2015.

NOTE 7 - RELATED PARTY TRANSACTIONS

Brazil Mining, Inc. ("BMI")

As of June 30, 2015 and December 31, 2014, amounts due from BMI, a related party, in connection with loans made for operating purposes were \$106,527 and \$123,691, respectively. The loan does not incur interest and is due on

demand.

During the six months ended June 30, 2015, BMI transferred equipment with a carrying value of \$44,854 to the Company as a partial offset to the amounts due.

Chief Executive Officer

As of June 30, 2015 and December 31, 2014, amounts payable to the chief executive officer for accrued salaries and advances made included within accounts payable and accrued expenses were \$18,100 and \$12,500, respectively.

NOTE 8 - SUBSEQUENT EVENTS

In accordance with FASB ASC 855-10, Subsequent Events, the Company has analyzed its operations subsequent to June 30, 2015 to the date these consolidated financial statements were issued, and has determined that it does not have any material subsequent events to disclose in these consolidated financial statements, except as noted below.

Subsequent to June 30, 2015, the \$75,000 in proceeds received by the Company as convertible notes in June 2015 agreed, for no cost, to a modification to uncollateralized, non-recourse convertible preferred equity. The Company is still determining the accounting impact of this transaction.

Subsequent to June 30, 2015 and until August 16, 2015, the Company received \$175,000 in proceeds related to fixed-floor variable-rate convertible notes, of which \$75,000 has already contractually agreed, for no cost, to a modification to uncollateralized, non-recourse convertible preferred equity, and the remainder \$100,000 is expected to agree to such modification as well. The Company is still determining the accounting impact of this transaction.

F-19

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of our financial condition and results of operations should be read in conjunction with our unaudited consolidated financial statements and the notes to those financial statements appearing elsewhere in this Report.

This Quarterly Report contains forward-looking statements. Forward-looking statements for Brazil Minerals, Inc. reflect current expectations, as of the date of this Quarterly Report, and involve certain risks and uncertainties. Actual results could differ materially from those anticipated in these forward-looking statements as a result of various factors. Factors that could cause future results to materially differ from the recent results or those projected in forward-looking statements include: unprofitable efforts resulting not only from the failure to discover mineral deposits but also from finding mineral deposits that, though present, are insufficient in quantity and quality to return a profit from production; market fluctuations; government regulations, including regulations relating to royalties, allowable production, importing and exporting of minerals, and environmental protection; competition; the loss of services of key personnel; unusual or infrequent weather phenomena, sabotage, government or other interference in the maintenance or provision of infrastructure as well as general economic conditions.

Overview

Brazil Minerals, Inc. ("Brazil Minerals", the "Company", "we", "us", or "our"), together with its subsidiaries, is a U.S. holding company with Brazilian mining properties that produce diamonds, gold, and sand, and a business that manufactures and sells mortar. We consolidate the results of our controlled subsidiaries in this Quarterly Report.

Our current primary objectives are twofold: a) to eliminate the vast majority, if not all, of the floorless variable-rate convertible debt from our balance sheet during 2015, and b) to become a cash flow positive company by the end of the first quarter of 2016 or sooner. Currently, it is not our objective to achieve the highest revenues possible. We are only focused on those revenues that can be obtained with the lowest possible cost and greatest certainty.

Our progress has been steady: in early 2013, we had access to only 1 mining concession and 2 mineral rights, and now we have access to 11 mining concessions and 17 mineral rights. Our product mix has increased from rough diamonds and gold to also include polished diamonds, mortar, and sand.

From 2013 to today, we have been taking shape as a holding company owner of different subsidiaries. We now own the following stakes:

100% of Mineração Duas Barras Ltda. ("MDB"), a Brazilian producer and seller of polished and rough diamonds,
 gold bars, and sand used for construction. MDB owns a fully-operational mining concession with the largest alluvial processing plant for diamonds and gold in Latin America, and has a Brazilian permit to export its production.

50% of RST Recursos Minerais Ltda. ("RST"), a Brazilian company that owns 10 mining concessions and 12 other (2)mineral rights for diamond and gold. Many of the RST areas are located near MDB's plant, and all of them are in the Jequitinhonha River valley, a well-known area for diamonds and gold for over two centuries.

(3)^{100%} of Hercules Brasil Ltda., a Brazilian company with an operating plant and a line of three mortar products under the brand name "Hercules."

Edgar Filing: Brazil Minerals, Inc. - Form 10-Q

Some significant developments to our business during Q2 2015 were as follows:

(1)We received \$97,500 in common equity investment from five different accredited investors.

(2) We extinguished a net amount of \$297,247 in floorless variable-rate convertible debt.

We received \$100,000 in proceeds from the sale of fixed-floor convertible debentures to three accredited investors. (3)Subsequent to June 30, 2015, these investors have agreed to exchange these debentures for a new preferred stock, with mandatory conversion to common stock by 2016.

During the quarter ended June 30, 2015 ("Q2 2015"), we made a cash payment towards our purchase of the 50% stake in RST, and subsequent to the end of the quarter we completed all such contractual cash payments for such stake. We have had title to 50% of RST since March 2015.

RST is a Brazilian company with 10 mining concessions and 12 other minerals rights, all for diamond and gold. These RST mining concessions are located in the same general area as our MDB diamond and gold recovery plant. Prior to our involvement, the last time RST shares had been acquired by a publicly-traded company occurred in June 2008, when a Canadian issuer contractually agreed to pay US\$10.5 million dollars for 100% of RST.

(4) Subsequently, and as part of such contractual agreement, this Canadian buyer paid US\$2 million to the sellers, but was unable to pay the remainder due to the global financial crisis affecting its situation. RST was never explored by it or other owners since then and its mining concession areas have remained essentially untouched. RST mining concessions and minerals rights are located on the banks of the Jequitinhonha River, a well-known alluvial diamond and gold area for the last two centuries. Any mining in an RST area will likely initially be processed at our large diamond and gold recovery plant located within the MDB concession, a few miles away. We are currently focused on one particular area of RST, which could lend itself to 10 to 20 years of mining for diamonds and gold, according to predictions from local experts after assessing our initial drilling results, as commented below.

During Q2 2015, and also subsequent to the end of the quarter, we announced drilling results of an area within the RST mining concession (the "RST Initial Area"). It is a dry location, amenable to a potential program of extraction by open surface excavation and removal and transport of the thick white gravel to our diamond and gold processing and recovery plant. In total, nine holes were drilled using our own Banka 4-inch drill. All holes showed presence of commercially-viable gravel containing diamonds and gold. Initial analysis of the data obtained indicates a strong likelihood of continuity of the gravel layer along the overall area sampled. In relative terms, this researched locale was small compared to the total surface area of this mineral right, which measures 5.3 million square meters or 1,310 acres. While the results obtained have been highly encouraging, there is no assurance that these preliminary (5) findings will be replicable to the entirety of or other locations in this area, or that a material amount of minerals will be found.

RST mining concessions and minerals rights are located on the banks of the Jequitinhonha River, a well-known alluvial diamond and gold area for the last two centuries. RST has no workers at this time, and any mining in an RST area will likely initially be processed at our large diamond and gold recovery plant located within the MDB concession, a few miles away. We are currently focused on one particular area of RST, which could lend itself to 10 to 20 years of mining for diamonds and gold, according to predictions from local experts after assessing our initial drilling results, as commented below.

In April 2015, we announced that we had mined our largest rough diamond to date at 4.01 carats. This diamond (6) was cut and polished in Brazil, and yielded a highly attractive 2.01 pear shaped polished diamond. The cut was chosen based on the fact that this rough stone had a larger table. The resulting polished diamond will be either sold privately, and interest has been received, or auctioned through a global diamond-services firm.

- 3 -

In June 2015, we announced that we had cut our Brazilian fixed costs by 50% as a result of the relocation of our Brazilian administration to an office 15 miles away from our diamond, gold and sand mine operations. To facilitate oversight and communications we eliminated the Belo Horizonte office, which had been established before our acquisitions and located over 300 miles away from the MDB and RST areas. Because of savings in both labor and office costs and the elimination of travel and lodging expenses, the result of the relocation is expected to be a (7)decrease in Brazilian fixed costs by 50%. A further benefit was the achievement of easier communication between administrative and operational staff, with our chief executive officer now directly interfacing with the directors responsible for the two business components of the Company: diamonds and gold; and sand and mortar. Other activities, such as mineral rights analysis, environmental compliance, and human resources, which are not revenue-generating, have been allocated to expert consultants who are used only as needed and reporting directly to our chief executive officer.

Subsequent to June 30, 2015:

In August 2015, we announced that we had established a subsidiary in Brazil called Hercules Brasil Ltda. ("Hercules") to pursue opportunities in the construction materials business.

Initially, Hercules is focused on the production and sale of mortar. A medium size plant that can produce mortar, grout and other industrialized sand products has been fully built and is operating. The plant is located next to a busy asphalt highway to facilitate transportation and is 18 miles away from our Duas Barras sand mine. It operates on electric power which lowers costs and utilizes a staff of three. At full capacity, with a staff of five, the plant has the capacity to produce up to 25,000 bags of mortar per month.

The content of sand per weight in a mortar bag ranges from approximately 80% to 90%. On a per kilogram basis, the aggregate value realized from recent mortar sales is 10 to 40 times that of raw sand. Gross product margins obtained on initial mortar sales to stores have ranged from 100% to 300% depending on the type of mortar sold.

Specialists in mortar have worked in developing proprietary formulations which utilize the MDB raw sand for the Hercules mortar. Hercules currently produces the three basic types of mortar used in Brazilian construction: AC-I, AC-II, and AC-III, which have increasing levels of strength. Although mortars have been around for a long time, some specific and innovative solutions were devised that allow Hercules to increase the quality and lower the cost of its products. We believe that initial market response has noted that Hercules products are of high quality and comparable to the best national brands.

Hercules buys sand from our MDB mine and processes it at the mortar plant, adding specific other ingredients for each type of mortar, mixing them, and finally packaging the resulting mixtures in 20-kg bags. AC-I bags have blue details, whereas AC-II bags have details in red and AC-III green.

"Hercules" is the brand name adopted for the mortar business; it has been protected as a trademark in Brazil. Initial buyers of Hercules mortar have been small construction materials stores; some are already recurrent buyers with predictable bi-weekly orders. The Company believes that over time, it will have several additional as well as larger stores and chains as costumers. Some small amount of Hercules mortar has also been sold directly to retail buyers at higher gross margins. We believe that the local region of Montes Claros, northern part of Minas Gerais state, with a population of 1 to 2 million residents, is an attractive market for our mortar.

In keeping with our entrepreneurial spirit, the entrance into construction materials adds a new business which on a standalone basis has strong prospects for margin and growth. Of relevance to us as a holding company is the fact that cash flows from the construction materials business are uncorrelated to those from diamond and gold mining.

(2)In August 2015, we received \$30,000 in proceeds from a common equity investment from an accredited investor.

In July and August 2015, the Company received \$150,000 in proceeds related to fixed-floor variable-rate convertible notes, the holders of which \$75,000 principal amount of such notes have agreed, to exchange

(3) such notes for convertible preferred stock, and the holders of the remaining \$75,000 of such notes have also been offered such exchange.

Results of Operations

Comparison of Three Months Ended June 30, 2015 to Three Months Ended June 30, 2014

We had revenues of \$28,780 and \$97,162 during the three months ended June 30, 2015 ("Q2 2015") and three months ended June 30, 2014 ("Q2 2014"), respectively. The decrease in revenues for Q2 2015 as compared to Q2 104 was primarily due to the lesser number of days of processing of gravel in our recovery plant during Q2 2015. Going forward as we begin to run gravel from the RST Initial Area, we project the revenues to be materially higher. We also project annual revenues, once steady state of mining operations in the RST Initial Area is reached, to be materially higher than the revenues in 2013 or 2014.

Our cost of goods sold in Q2 2015, consisting entirely of production expenses, was \$97,012. In Q2 2014, our cost of goods sold was \$75,539. The primary reason that costs of goods sold increased in Q2 2015 compared to Q2 2014 even though revenues decreased, was related to increase in the cost and amount of diesel to gather and store gravel for further processing, as well as costs to prepare the RST Initial Area.

Our gross loss in Q2 2015 was \$68,232 as compared to a gross profit of \$222,613 in Q2 2014. This was attributable to lower revenues and higher costs of goods sold in Q2 2015 as compared to Q2 2014.

We had an aggregate of \$264,583 in total operating expenses in Q2 2015, a decrease of \$246,232 or approximately 48.2% as compared to the \$510,815 in total operating expenses in Q2 2014. The primary reasons for the decrease in total operating expenses in Q2 2015 as compared to Q2 2014 were that general and administrative expenses decreased from \$238,492 to \$127,001 and stock based compensation decreased from \$117,438 to \$48,946.

Edgar Filing: Brazil Minerals, Inc. - Form 10-Q

Our loss from operations decreased by \$155,387 or approximately 31.8%, from \$488,202 in Q2 2014 to \$332,815 in Q2 2015. The decrease in loss from operations was primarily as a result of the \$246,232 decrease in total operating expenses, which was partially offset by an increase in gross loss.

We had total other expense of \$566,531 in Q2 2015 as compared to \$480,482 in Q2 2014. This change was attributable to amortization of debt discount and other fees increasing to \$387,376 in Q2 2015 as compared to \$78,861 in Q2 2014 which difference was partially offset by a gain on derivative liabilities in Q2 2015 of only \$137,348 as compared to a \$285,631 gain on derivative liabilities in Q2 2014.

- 5 -

Primarily as a result of a \$155,387 decrease in loss from operations which was partially offset by a \$90,845 difference in gross profit (loss) and an \$89,049 increase in total other expenses in Q2 2015, we had net loss of \$899,346 in Q2 2015 as compared to a net loss of \$968,684 in Q2 2014, a reduction in net loss of \$69,335.

Comparison of Six Months Ended June 30, 2015 to Six Months Ended June 30, 2014

We had revenues of \$40,186 and \$101,444 during the six months ended June 30, 2015 ("H1 2015") and six months ended June 30, 2014 ("H1 2014"), respectively. The decrease in revenues for H1 2015 as compared to H2 104 was primarily due to the lesser number of days of processing of gravel in our recovery plant during H1 2015. Going forward as we begin to run gravel from the RST Initial Area, we project the revenues to be materially higher. We also project annual revenues, once steady state of mining operations in the RST Initial Area is reached, to be materially higher than the revenues in 2013 or 2014.

Our cost of goods sold in H1 2015, consisting entirely of production expenses, was \$137,026. In H1 2014, our cost of goods sold was \$75,046. The primary reason that costs of goods sold increased in H1 2015 compared to H1 2014 even though revenues decreased, was related to an increase in the cost and amount of diesel to gather and store gravel for further processing, as well as costs to prepare the RST Initial Area.

Our gross loss in H1 2015 was \$96,840 as compared to a gross profit of \$25,554 in H1 2014. This was attributable to lower revenues and higher costs of goods sold in H1 2015 as compared to H1 2014.

We had an aggregate of \$458,821 in total operating expenses in H1 2015, a decrease of \$425,826 or approximately 48.1% as compared to the \$884,647 in total operating expenses in H1 2014. There were reductions in all expense areas from H1 2014 to H1 2015: professional fees declined from \$126,842 in H1 2014 to \$99,041 in H1 2015, general and administrative expenses decreased from \$309,543 in H1 2014 to \$227,536 in H1 2015, compensation expenses were reduced from \$94,465 in H1 2014 to \$49,098 in H1 2015, and stock-based compensation was cut from \$353,797 in H1 2014 to \$83,146 in H1 2015.

Our loss from operations decreased by \$303,432 or approximately 35.3%, from \$859,093 in H1 2014 to \$555,661 in H1 2015. The decrease in loss from operations was primarily as a result of the decrease in total operating expenses, as described above.

We had total other income of \$183 in H1 2015 as compared to total other expenses of \$508,415 in H1 2014. This change was attributable to gain on derivative liabilities in H1 2015 providing income of \$748,505 as compared to expenses of \$273,799 in H1 2014, which difference was partly offset by expenses from amortization of debt discount increasing from \$107,167 in H1 2014 to \$648,932 in H1 2015.

Primarily as a result of the decrease in loss from operations, we had a net loss of \$555,478 in H1 2015 as compared to a net loss of \$1,367,508 in H2 2014, a reduction in net loss of \$812,030 or 59.4%.

Net cash used in operating activities was \$748,399 in H1 2015 as compared to net cash provided by operating activities of \$316,007 in H1 2014.

Net cash used in investing activities decreased from \$777,802 in H1 2014 to \$113,721 in H1 2015, primarily because \$255,585 was used for acquisition of capital assets in H1 2014 while only \$130,885 was used for such purpose in H1 2015 and \$500,000 was used for the purchase of a non-controlling interest in H1 2014.

- 6 -

Net cash provided by financing activities increased from \$934,110 in H1 2014 to \$1,012,789 in H1 2015.

The effect of the foregoing and other changes in cash flows was that cash and cash equivalents decreased to \$126,188 at June 30, 2015 from \$643,098 at June 30, 2014.

Liquidity and Capital Resources

At June 30, 2015, we had total current assets of \$531,933 compared to total current liabilities of \$3,087,346 for a negative working capital of \$2,555,413 as compared to total current assets of \$538,765, total current liabilities of \$3,062,857 and a negative working capital of \$2,524,092 as of December 31, 2014.

In 2015, our principal sources of liquidity have been private placements of our common stock, fixed-floor convertible debt, and convertible notes.

Off-Balance Sheet Arrangements

We currently have no off-balance sheet arrangements.

Critical Accounting Policies and Estimates

Our financial instruments consist of cash and cash equivalents, loans to a related party, accrued expenses, and an amount due to a director. The carrying amount of these financial instruments approximates fair value due either to length of maturity or interest rates that approximate prevailing market rates unless otherwise disclosed in our financial statements. If our estimate of the fair value is incorrect at March 31, 2015, it could negatively affect our financial position and liquidity and could result in our having understated our net loss.

Recent Accounting Pronouncements

Our consolidated financial statements are prepared in accordance with U.S. generally accepted accounting principles. Our significant accounting policies are described in Note 1 of the financial statements. We have reviewed all recent accounting pronouncements issued to the date of the issuance of these financial statements, and we do not believe any of these pronouncements will have a material impact on us.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Pursuant to Item 305(e) of Regulation S-K (§ 229.305(e)), the Company is not required to provide the information required by this Item as it is a "smaller reporting company," as defined by Rule 229.10(f)(1).

Item 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and Chief Financial Officer, has evaluated the design, operation, and effectiveness of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act as of June 30, 2015. On the basis of that evaluation, management concluded that our disclosure controls and procedures designed to provide reasonable assurance that the information required to be disclosed in reports filed or submitted pursuant to the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized, and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission (the "Commission"), and that such information is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer as appropriate, to allow timely decisions regarding required disclosure were not effective for the reasons described in Item 4(b), but we intend to make them effective by the actions described in Item 4(b).

(b) Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as such term is defined in Exchange Act Rule 13a-15(f). Our internal control system is designed to provide reasonable assurance to management and to our Board of Directors regarding the preparation and fair presentation of published financial statements. Our Chief Executive Officer and Chief Financial Officer, conducted an evaluation of the effectiveness of our internal control over financial reporting based on the framework in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on his evaluation under the framework in Internal Control—Integrated Framework, he concluded that our internal control over financial reporting was effective as of June 30, 2015.

(c) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting that occurred in the second quarter of 2015 that materially affected, or would be reasonably likely to materially affect, our internal control over financial reporting.

PART II OTHER INFORMATION

Item 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

On May 28, 2015, we issued and sold to JSJ Investments, Inc. for \$25,000 a \$25,000 convertible promissory note. The note bears interest at 12% per annum and is due on November 28, 2015. The note payable can be converted into our Common Shares at a conversion rate per share equal to the lower of (a) 50% of the lowest daily volume weighted average price of the Company's Common Stock during the twenty trading days before a notice of conversion is given or (b) 50% of the lowest daily volume weighted average price of the Company's Common Stock during the twenty trading days before May 28, 2015. The note was issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to only one purchaser which represented to the Company that it is an accredited investor and that it was acquiring the note for investment and could bear the economic risk of the investment.

On June 4, 2015, we issued and sold to LG Capital Funding, LLC for 26,500 a 27,825 convertible promissory note. The note bears interest at 10% per annum and is due on June 4, 2016. The note payable can be converted into common shares at a conversion rate per share equal to 55% of the average of the 2 lowest daily closing prices of the Common Stock as reported on the otcmarkets.com OTCQB quotation service on which the Company's shares of Common Stock are traded or any exchange upon which the Common Stock may be traded in the future for the twenty trading days ended on the date a conversion notice is received by the Company. The note was issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to only one purchaser which represented to the Company that it is an accredited investor and that it was acquiring the note for investment and could bear the economic risk of the investment.

On June 4, 2015, we issued and sold to Carl Suter for \$25,000 a \$25,000 convertible promissory note. The note bears interest at 10% per annum and is due on December 31, 2016. The note payable can be converted into common shares at a conversion rate per share equal 60% of the average of the lowest 5 closing prices of the Company's Common Stock in the 20 calendar day period ended on the day before a notice of conversion is given, except that the conversion price shall not be higher than \$0.03 per share nor lower than \$0.000033 per share. The note was issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to only one purchaser which represented to the Company that he is an accredited investor and that he was acquiring the note for investment and could bear the economic risk of the investment.

On June 9, 2015, we issued and sold to the 2004 Helvin Family Trust and the Nazari and Associates International Group Inc. Defined benefit Pension Plan for \$25,000 each, \$25,000 convertible promissory notes. The notes bear interest at 10% per annum and are due on December 31, 2016. The notes payable can be converted into common shares at a conversion rate per share equal 60% of the average of the lowest 5 closing prices of the Company's Common Stock in the 20 calendar day period ended on the day before a notice of conversion is given, except that the conversion price shall not be higher than \$0.03 per share nor lower than \$0.000033 per share. The notes was issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to only two purchasers which represented to the Company that they are accredited investors and that they were acquiring the notes for investment and could bear the economic risk of the investment.

On June 30, 2015, we issued and sold to GW Holdings Group, LLC for 334,000 a 334,000 convertible promissory note. The note bears interest at 8% per annum and is due on June 30, 2016. The note payable can be converted into common shares at a conversion rate per share equal to 55% of the lowest closing price of the Common Stock as reported on otcmarkets.com or any exchange upon which the Common Stock may be traded in the future for the twenty trading days ended on the date a conversion notice is received by the Company. The note was issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to only one purchaser which represented to the Company that it is an accredited investor and that it was acquiring the note for investment and could bear the economic risk of the investment. In April 2015 the Company issued to the Jonathan and Kristen Croxton Family Trust for an aggregate purchase price of \$31,000 an aggregate of 47,692,308 shares of the Company's Common Stock and warrants to purchase an aggregate of 15,576,923 shares of Common Stock at an exercise price of \$.001 per share (subject to adjustment upon the occurrence of certain events) through April 29, 2017. In April 2015 the Company's Common Stock and warrants to purchase price of \$26,000 an aggregate of 40,000,000 shares of the Company's Common Stock and warrants to purchase an aggregate of 15,576,923 shares of Common Stock at an exercise price of \$26,000 an aggregate of 40,000,000 shares of the Company's Common Stock and warrants to purchase an aggregate of 15,576,923 shares of Common Stock at an exercise price of \$.001 per share (subject to adjustment upon the occurrence of certain events) through April 29, 2017. In April 2015 the Company issued to Greg Reed for an aggregate purchase price of \$23,500 an aggregate of 36,153,846 shares of the Company's Common Stock In April 2015 the Company issued to Joshua Volen for a purchase price of \$10,000 an aggregate of 15,384,615 shares of the Company's Common Stock. The foregoing securities were issued in accordance with an exemption from the registration requirements of the Securities Act under Section 4(a)(2) of the Securities Act by virtue of being offered without employing any means of general solicitation and issued to purchasers which represented to the Company that they are accredited investors and that they acquiring the securities for investment and could bear the economic risk of the investment.
