Form 10QSB
November 14, 2005

U.S. SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10-QSB

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For Quarter Ended September 30, 2005
Commission File Number 1-31070

Derma Sciences, Inc.

(Exact name of small business issuer as specified in its charter)

Pennsylvania
(State or other jurisdiction of incorporation or organization)

23-2328753
(I.R.S. Employer Identification No.)

214 Carnegie Center, Suite 100
Princeton, New Jersey 08540
(609) 514-4744
(Address including zip code and telephone
number, of principal executive offices)

Check whether the Issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the Issuer was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.
Yes No

State the number of shares of each of the issuer's classes of common equity, as of the latest practicable date.

Date: September 30, 2005

Class: Common Stock, par value \$.01 per share
Shares Outstanding: 12,285,768

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

Transitional Small Business Disclosure Format (check one): Yes No

Forward Looking Statements

This document includes certain "forward-looking statements" within the meaning of the Private Securities Litigation Reform Act of 1995. These statements are based on management's current expectations and are subject to uncertainty and changes in circumstances. Actual results may differ materially from these expectations due to changes in political, economic, business, competitive, market and regulatory factors.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements (Unaudited)

1. Organization and Summary of Significant Accounting Policies

Derma Sciences, Inc. and its subsidiaries (the Company) are full line providers of wound care, wound closure-fastener and skin care products. The Company markets its products principally through independent distributors servicing the long-term care, home health and acute care markets in the United States, Canada and other select international markets. The Company's U.S. distribution facility is located in St. Louis, Missouri, while the Company's Canadian distribution function is performed by a third party. The Company has manufacturing facilities in Toronto, Canada and Nantong, China.

Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information and with the instructions to Form 10-QSB and Item 310(b) of Regulation S-B. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. Operating results for the three and nine month periods ended September 30, 2005, are not necessarily indicative of the results that may be expected for the year ending December 31, 2005. Information included in the condensed balance sheet as of December 31, 2004 has been derived from the consolidated financial statements and footnotes thereto for the year ended December 31, 2004, included in Form 10-KSB previously filed with the Securities and Exchange Commission. For further information, refer to that Form 10-KSB.

Summary of Significant Accounting Policies:

Principles of Consolidation The consolidated financial statements include the accounts of Derma Sciences, Inc. and its wholly owned subsidiaries. All significant intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates In conformity with accounting principles generally accepted in the United States, the preparation of financial statements requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Although these estimates are based on knowledge of current events and actions which may be undertaken in the future, actual results may ultimately differ from these estimates.

Foreign Currency Translation Assets and liabilities are translated using the exchange rates in effect at the balance sheet date, while income and expenses are translated using average rates. Translation adjustments are reported as a separate component of shareholders' equity in accumulated other comprehensive income.

Cash and Cash Equivalents The Company considers cash and cash equivalents as amounts on hand, on deposit in financial institutions and highly liquid investments with a maturity of three months or less when purchased.

Concentration of Credit Risk Financial instruments that subject the Company to a concentration of credit risk consist principally of cash and cash equivalents and accounts receivable. The Company maintains cash and cash equivalents with various financial institutions in amounts which at times may exceed federally insured limits. Accounts are guaranteed by the Federal Deposit Insurance Corporation (FDIC) up to \$100,000. The Company has not experienced any losses in such accounts. The Company's accounts receivable balance is net of an allowance for doubtful accounts. The Company does not require collateral or other security to support credit sales, but provides an allowance for doubtful accounts based on historical experience and specifically identified risks. Accounts receivable are charged off against the allowance for doubtful accounts when management determines that recovery is unlikely and the Company ceases collection efforts.

[Index](#)

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements (Unaudited)

Foreign Operations Risk The Company's future operations and earnings will depend to a large extent on the results of its operations in Canada and its ability to continue to maintain a continuous supply of basic wound care products from its own operation and/or its suppliers in China. While the Company does not envision any adverse change to the manner in which operations in Canada and China are presently being conducted, there can be no assurance that the Company will be able to successfully conduct such operations in the future, and a failure to do so may have a material adverse effect on the Company's consolidated financial position, results of operations and cash flows. Also, the success of the Company's operations is subject to numerous contingencies, some of which are beyond management's control. These contingencies include general and regional economic conditions, prices for the Company's products, prices for materials and products purchased from suppliers, competition and changes in regulations.

Inventories Inventories consist primarily of raw materials, packaging materials, work in process and finished goods valued at the lower of cost or market. Cost is determined on the basis of the first-in, first-out method.

Equipment and improvements Equipment and improvements are stated at cost and are depreciated principally by the straight-line method over the estimated useful lives of the assets ranging from three to ten years. Leasehold improvements are amortized over the lesser of their useful lives or the remaining lease term.

Fair Value of Financial Instruments The carrying value of cash and cash equivalents, accounts receivable, prepaid expenses and other current assets, accounts payable and accrued expenses reported in the consolidated balance sheets equal or approximate fair value due to their short maturities. The fair value of the Company's long-term debt approximates book value as such notes are at market rates currently available to the Company.

Other Intangible Assets Patents and trademarks and other intangible assets with definite lives are stated on the basis of cost. Patent and trademarks are amortized over 12 to 17 years on a straight-line basis. Other intangible assets consisting of product rights, formulations and specifications, regulatory approvals, customer lists and a non-compete agreement are amortized over 5 years on a straight-line basis.

Long Lived Assets In accordance with Statement of Financial Accounting Standards No. 144 (SFAS 144), Accounting for Impairment or Disposal of Long Lived Assets the Company reviews its long-lived assets with definitive lives whenever events or changes in circumstances indicate that the carrying amount of such assets may not be recoverable. If the carrying amount of the asset or group of assets exceeds its net realizable value, the asset will be written down to its fair value.

Goodwill Goodwill of \$1,110,967 represents the excess of the purchase price over the fair value of identifiable net assets acquired in the 1998 acquisition of Sunshine Products. This business combination was accounted for as a purchase. The Company adopted Statement of Financial Accounting Standards No. 142 Goodwill and Other Intangible Assets (SFAS No. 142) on January 1, 2002. Goodwill and certain other intangible assets having indefinite lives are no longer amortized to earnings, but instead are subject to periodic (annual) testing for impairment. The Company tests goodwill for impairment using the two-step process prescribed by SFAS No. 142. The first step tests for potential impairment, while the second step measures the amount of impairment, if any. The Company uses a discounted cash flow analysis to complete the first step in this process. The Company conducted the required annual impairment review in the fourth quarter of 2004 and determined that the goodwill carrying value is not impaired.

Stock Based Compensation SFAS No. 123, Accounting for Stock-Based Compensation , as amended by SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure , provides companies with a choice to follow the provisions of SFAS No. 123 in the determination of stock-based employee compensation expense based on the fair values of the options or to continue to use the intrinsic value method pursuant to the provisions of Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees (APB 25), and related interpretations in accounting for stock-compensation plans. The Company has elected to follow the provisions of APB 25. Under APB 25, if the exercise price of the Company's stock options granted to employees equals or exceeds the market price of the underlying common stock on the date of grant, generally no compensation expense is recognized.

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements (Unaudited)

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Pro forma information regarding net income (loss) and net income (loss) per share is required by SFAS No. 123, which also requires that the information be determined as if the Company has accounted for its stock options granted to employees under the fair value method of that Statement. The fair value for these options was estimated at the date of grant using a Black-Scholes option pricing model with the following weighted-average assumptions for 2005 and 2004: risk-free interest rate of 4.25% for the three months ended March 31, 2005 and 3.90% for the three months ended June 30, 2005 and September 30, 2005, respectively, and 4.0% for 2004; dividend yield of 0%; a volatility factor of the expected market price of the Company's Common Stock of 1.376, 1.353, and 1.326 for the three months ended March 31, 2005, June 30, 2005 and September 30, 2005, respectively, and 1.463 for 2004; and an expected option life of 5 years.

The Black-Scholes option valuation model was developed for use in estimating the fair value of traded options which have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. The Company's stock options have characteristics significantly different from those of traded options. Further, changes in the subjective input assumptions related to the options can materially affect the fair value estimate. Therefore, in management's opinion the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

For purposes of pro forma disclosures, the estimated fair value of stock options is amortized to expense over the options' vesting period. Therefore, future pro forma compensation expense may be greater as additional options are granted. The Company's pro forma information follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2005	2004	2005	2004
Net income (loss) as reported	\$ 43,105	\$ (243,355)	\$ (11,763)	\$ (1,500)
Pro forma compensation expense - net of tax	(111,153)	(173,736)	(583,541)	(700,000)
	\$ (68,048)	\$ (417,091)	\$ (595,304)	\$ (2,200)
Income (loss) per common share - basic				
As reported	\$0.00	\$ (0.03)	\$ 0.00	\$ (0.03)
Pro forma	\$0.00	\$ (0.04)	\$ (0.05)	\$ (0.04)
Income (loss) per common share - diluted				
As reported	\$0.00	\$ (0.03)	\$ 0.00	\$ (0.03)
Pro forma	\$0.00	\$ (0.04)	\$ (0.05)	\$ (0.04)

As a result of amendments to SFAS No. 123, the Company will be required to expense the fair value of employee stock options beginning with its fiscal quarter ending March 31, 2006.

Income Taxes Deferred tax assets and liabilities are recognized for the future tax consequences attributable to temporary differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases. Deferred tax assets, including tax loss and credit carryforwards, and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Deferred income tax expense represents the change during the period in the deferred tax assets and deferred tax liabilities. The components of the deferred tax assets and liabilities are individually classified as current and non-current based on their characteristics. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely than not that some portion or all of the deferred tax assets will not be realized.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Revenue Recognition The Company operates in three segments: wound care, wound closure-fastener and skin care. Sales are recorded when product is shipped, title passes to customers and collectability is reasonably assured. Gross sales are adjusted for cash discounts, returns and allowances, Medicaid rebates and trade rebates in the same period that the related sales are recorded. Freight costs billed to and reimbursed by customers are recorded as a component of revenue. Freight costs to ship product to customers are recorded as a component of cost of sales.

Net Income (Loss) per Share Net income (loss) per common share basic is computed by dividing net income (loss) by the weighted average number of common shares outstanding for the period. Net income (loss) per common share diluted reflects the potential dilution of earnings by including potentially issuable shares of common stock (potentially dilutive securities), including those attributable to stock options, warrants and convertible preferred stock in the weighted average number of common shares outstanding for a period, if dilutive. Potential common stock has not been included in the computation of diluted loss per share for the nine months ended September 30, 2005 and the three and nine months ended September 30, 2004 as the effect would be anti-dilutive.

Total dilutive shares that have or would have been used to compute income per common share on a fully diluted basis for the three months and nine months ended September 30, 2005 and 2004 (assuming profitability in all periods) are outlined below:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2005	2004	2005	2004
Weighted average common shares outstanding - Basic	12,285,768	9,524,007	12,193,816	9,280,000
Potentially dilutive shares:				
Preferred stock	2,280,407	2,280,407	2,280,407	2,280,407
Warrants	185,373	651,431	63,317	68,000
Stock options	1,053,364	912,706	574,683	1,010,000
Sub-total potentially dilutive shares	3,519,144	3,844,544	2,918,407	3,970,000
Weighted average common shares outstanding - Dilutive	15,804,912	13,368,551	15,112,223	13,260,000

Reclassifications Certain reclassifications have been made to prior year reported amounts to conform with the 2005 presentation.

2. Acquisition of Kimberly-Clark Corporation's Wound Care Assets

On January 9, 2004, the Company purchased certain wound care assets from Kimberly-Clark Corporation. The primary purpose of the acquisition was to obtain equipment to expand the Company's in-house manufacturing capabilities and to broaden its product line. The assets acquired consist of manufacturing equipment, product rights and other intangibles. The purchase price for the assets was \$1,942,797 and was paid as follows: (1) \$300,100 at closing; (2) \$1,566,000 via a seller financed promissory note due December 31, 2004, without interest; and (3) \$76,697 incurred for transaction costs. The acquisition was accounted for as a purchase of a business, effectively as of January 1, 2004, and the purchase price was allocated to equipment in the amount of \$1,600,000 and identifiable intangible assets (see Note 6) in the amount of \$342,797 based upon the estimated fair values of the assets acquired. The promissory note was paid in full on December 30, 2004.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Kimberly-Clark manufactured wound care products, for the account of the Company, at its facility through April 9, 2004 to meet current customer demand and to build sufficient inventory to cover the period during which production at the Kimberly-Clark facility was discontinued and the equipment was transferred to the Company's facility in Toronto, Canada. Upon cessation of manufacturing at Kimberly-Clark's facility, the Company purchased, in accordance with a pre-determined formula, inventory consisting of raw and packaging materials and up to four months supply of finished goods. The purchase price of this inventory was approximately \$550,000. Cash on hand and borrowings against available credit lines were used to pay for this inventory.

The Company completed the transfer, installation and validation of the equipment and commenced manufacturing in Toronto, Canada in August 2004. Through December 31, 2004, the Company expended approximately \$680,000 on equipment and manufacturing facility upgrades at its Toronto, Canada location.

3. Accounts Receivable

Accounts receivable include the following:

	September 30, 2005 ----	December 31, 2004 ----
Trade accounts receivable	\$3,101,017	\$2,774,293
Less: Allowance for doubtful accounts	(54,242)	(57,090)
Allowance for trade rebates	(1,443,068)	(164,000)

8. Line of Credit Borrowings

Short-term borrowings include the following:

	September 30, 2005 ----	December 31, 2004 ----
U.S. line of credit	\$1,361,772	\$1,312,756
Canadian line of credit	-	1,507,528
	-----	-----
Total line of credit borrowings	\$1,361,772 =====	\$2,820,284 =====

U.S. Line of Credit

On January 31, 2005, the Company entered into a three year revolving credit facility agreement (the "New Agreement") with a new U.S. lender for a maximum principal amount of \$2,000,000. The New Agreement replaces a \$2,000,000 revolving credit facility that expired on January 31, 2005. On January 31, 2005, the Company applied advances of approximately \$1,300,000 under the New Agreement in satisfaction of the prior U.S. lender's outstanding obligations. Future advances will be utilized to fund strategic initiatives and general working capital requirements. The Company incurred loan origination and legal fees of \$147,300 in connection with the implementation of the New Agreement. These fees have been deferred and are being amortized to interest expense over the three year term of the New Agreement.

The Company may request advances under the New Agreement up to the value of 85% of eligible receivables (as defined) and 55% of eligible inventory (as defined). Interest on outstanding advances is payable monthly in arrears at the prime rate (as defined) plus 2.5%, but not less than 7.5% per annum. At September 30, 2005 the effective interest rate was 9.10%. In addition, the Company pays a monthly collateral management fee at the rate of 1.5% per annum upon the daily average amount of advances outstanding and a monthly unused line fee of 0.5% per annum upon the difference between the daily average amount of advances outstanding and \$2,000,000. Outstanding advances are secured by all of the Company's existing and after-acquired tangible and intangible U.S. assets. In addition, the Company has accorded the new U.S. lender its guarantee of payment together with a second lien security interest in the assets of the Company's wholly owned Canadian subsidiary. The new U.S. lender has agreed not to exercise its rights under its second lien security interest and guarantee against the Canadian assets without the Canadian lender's approval.

Over the term of the New Agreement, the Company has agreed to comply with the following covenants as measured at the end of each month for the average of the three most recent calendar months based upon its consolidated operating results: a) maintain EBITDA (earnings before interest, taxes, depreciation and amortization) in the range of negative \$300,000 (as of January 31, 2005) transitioning to positive \$600,000 (post December 31, 2005) and (b) maintain its fixed charge ratio (EBITDA divided by the sum of debt service, capital expenditures, income taxes and dividends) in the range of 1.0 to 1.0 (as of January 31, 2005) to 1.25 to 1.0 (post December 31, 2005). As it pertains to the Company's U.S. operations, cash collections may not be less than \$800,000 for each calendar month through June 30, 2005 and \$900,000 for each calendar month thereafter. In addition, at all times the Company's cash on hand (including unused borrowing capacity under the New Agreement) must not be less than \$200,000. Additional covenants governing permitted indebtedness, liens, payments of dividends and protection of collateral are included in the New Agreement.

Based upon consolidated operating results for March and April 2005, the Company was out of compliance with its EBITDA and fixed charge ratio covenants under the New Agreement. The U.S. lender agreed to waive these covenant violations. Effective June 30, 2005 the

Company and the U.S. lender agreed to prospectively amend the Company's monthly minimum EBITDA and fixed charge ratio covenants to better align these covenants with expected performance. The Company incurred fees of \$10,000 associated with the granting of the covenant amendments. Based upon consolidated operating results for September 30, 2005, the Company was out of compliance with its EBITDA covenant. The U.S. lender agreed to waive the covenant violation for September 2005 and to work with the Company to evaluate the need for amending the existing covenants going forward. The Company expects to, but cannot assure that it will, maintain compliance with all applicable loan covenants in the future.

Index

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements (Unaudited)

The Company may terminate the New Agreement at any time after January 31, 2006 by paying all outstanding indebtedness and any other payments due the new U.S. lender and paying the new U.S. lender a yield maintenance based early termination fee equal to the product of: (a) the effective yield on the facility for the six months prior to termination (expressed as an annual percentage rate), (b) \$2,000,000, and (c) the quotient of the months remaining in the original term of the New Agreement divided by 12.

On January 13, 2005 in connection with the refinancing of the U.S. line of credit, the Company paid off and cancelled the outstanding irrevocable standby letter of credit issued by the former U.S. lender in the amount of \$200,000 held by the Company's Canadian lender as additional security for its credit facility. The \$200,000 paid to the Canadian lender was applied as a permanent principal reduction against the principal amount due in 2007 associated with the Company's outstanding term loan with the Canadian lender (see Note 10). Subsequently, on January 31, 2005 the Canadian lender agreed as part of refinancing of the U.S. line of credit to retain its second lien security interest and guarantee position against the Company's U.S. assets and not to exercise its rights under its second lien security interest and guarantee against the U.S. assets without the U.S. lender's approval.

Canadian Line of Credit

As of September 30, 2005, the Company was in the midst of renewing its revolving credit facility with its Canadian lender (the Canadian Agreement). Management expects that the renewal will be finalized in the near future. In light of the favorable impact of the new distribution agreement (see Note 17) on the borrowing requirements of the Company's wholly owned Canadian subsidiary, Derma Sciences Canada Inc., the maximum principal amount of the credit facility will be reduced to \$653,000 (\$800,000 Canadian) in line with its prospective maximum borrowing capacity. No other significant changes to the terms of the Canadian Agreement are expected.

In September 2004, the Company finalized the annual renewal of the Canadian Agreement for a maximum principal amount of \$1,892,000 (\$2,200,000 Canadian). Derma Sciences Canada Inc. may request advances under the Canadian Agreement up to the value of 75% of eligible receivables (as defined) plus the lesser of \$946,000 (\$1,100,000 Canadian) or 40% of eligible inventory (as defined), less priority claims. Interest on outstanding advances is payable monthly in arrears at prime rate (as defined) plus 1.0%, or 5.50% for Canadian dollar advances and 8.25% for U.S. dollar denominated advances at September 30, 2005. Outstanding advances are secured by all tangible and intangible assets of Derma Sciences Canada Inc. In addition, the Company has accorded the Canadian lender its guarantee of payment together with a second lien security interest in the Company's assets located in the U.S.

Over the term of the Canadian Agreement, the Company has agreed to comply with a number of financial covenants governing minimum working capital, current ratios, tangible net worth, interest coverage, total indebtedness to tangible net worth and total indebtedness to adjusted pre-tax earnings. Additional covenants governing permitted indebtedness, liens, payments of dividends and protection of collateral are included in the Canadian Agreement. In the event of a margin deficiency (as defined) or covenant violation, the Company is required to advance up to an additional \$430,000 (\$500,000 Canadian) of working capital to Derma Sciences Canada Inc. in order to correct the deficiency. This additional working capital may be repaid to the Company 45 days after the margin deficiency or covenant violation has been cured upon the condition that such repayment not result in a margin deficiency, covenant violation or any other event of default.

	=====	=====

In connection with the acquisition of substantially all the assets of Dumex Medical Inc. in August 2002, the Company entered into a five-year term loan agreement with a Canadian Bank. The loan is repayable in monthly payments consisting of principal and interest. Interest on the outstanding principal balance is payable monthly at the bank's prime rate (as defined) plus 1.25%, or 5.75% at September 30, 2005. The term loan is secured by all tangible and intangible assets of Derma Canada and is subject to the same financial covenants applicable to the Canadian operating line of credit (see Note 8).

The Company has three capital lease obligations for certain distribution and computer equipment totaling \$153,103. The capital leases bear interest at annual rates ranging from 3.9% to 10.2% with the longest lease term expiring in April 2009.

11. Shareholders' Equity**Preferred Stock**

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

There are 150,003 shares of series A convertible preferred stock outstanding at September 30, 2005. The series A preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, maintains a liquidation preference of \$4.00 per share, votes as a class on matters affecting the series A preferred stock and maintains voting rights identical to the common stock on all other matters.

There are 440,003 shares of series B convertible preferred stock outstanding at September 30, 2005. The series B preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, maintains a liquidation preference of \$6.00 per share, votes as a class on matters affecting the series B preferred stock and maintains voting rights identical to the common stock on all other matters.

There are 619,055 shares of series C convertible preferred stock outstanding at September 30, 2005. The series C preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, maintains a liquidation preference averaging \$0.70 per share, votes as a class on matters affecting the series C preferred stock and maintains voting rights identical to the common stock on all other matters.

There are 1,071,346 shares of series D convertible preferred stock outstanding at September 30, 2005. The series D preferred stock is convertible into common stock on a one-for-one basis, bears no dividend, maintains a liquidation preference averaging \$0.50 per share, votes as a class on matters affecting the series D preferred stock and maintains voting rights identical to the common stock on all other matters.

Common Stock

On February 8, 2005, the Company closed a private offering of 2,760,000 units at \$0.50 per unit, each unit consisting of one share of the Company's common stock and one four-year series G warrant to purchase one share of common stock at a price of \$1.05. Total offering proceeds of \$1,220,666, net of \$159,334 in offering expenses, were used for working capital. The offering commenced prior to December 31, 2004. During 2005, the Company sold 1,205,000 units at \$0.50 per unit and received total offering proceeds of \$539,307, net of \$80,693 in offering expenses. As of December 31, 2004, the Company had sold 1,555,000 units at \$0.50 per unit and received total offering proceeds of \$681,359, net of \$78,641 in offering expenses.

Stock Options

During the three and nine months ended September 30, 2005, the Company granted stock options at fair market value as follows:

	Number of Granted Stock Options -----	Per Share Exercise Price -----
Three months ended March 31, 2005	1,021,000	\$0.50
Three months ended June 30, 2005	465,000	\$0.42
Three months ended September 30, 2005	40,000	\$0.67

Total for nine months ended September 30, 2005	1,526,000 =====	

There were no other changes in outstanding options during the nine months ended September 30, 2005.

Stock Purchase Warrants

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

During the three months ended March 31, 2005, the Company issued 1,205,000 series G warrants in conjunction with the private offering discussed above. The Company's 1,870,007 series E warrants expired unexercised on July 18, 2005.

At September 30, 2005, the Company had warrants outstanding to purchase 4,069,441 shares of the Company's common stock as outlined below:

Series	Number of Warrants	Exercise Price	Expiration Date
F	1,309,441	\$0.57	January 6, 2007
G	2,760,000	\$1.05	December 31, 2008

	=====	=====	=====	=====

13. Operating Segments

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

The Company consists of three operating segments: wound care, wound closure-fasteners and skin care. Products in the wound care segment consist of basic and advanced dressings, ointments and sprays designed to treat wounds. Wound closure-fastener products include wound closure strips, nasal tube fasteners, a variety of catheter fasteners and net dressings. The skin care segment consists of bath sponges, antibacterial skin cleansers, hair and body soaps, lotions and moisturizers designed to enable customers to implement and maintain successful skin care/ hygiene programs.

Products in all three operating segments are marketed to long-term care facilities, hospitals, physicians, clinics, home health care agencies and other healthcare institutions. The manufacture of advanced wound care wound closure-fastener products and skin care products are primarily outsourced. Basic wound care products are manufactured in-house. Internally, the segments are managed at the gross profit level. The aggregation or allocation of other costs by segment is not practical.

Segment net sales and gross profit for the three months and nine months ended September 30, 2005 and 2004 were as follows:

	=====	=====	=====	=====	=====

Long-lived assets consist of property and equipment, patents and trademarks, other intangible assets and goodwill. Wound care long-lived assets consist principally of Derma Sciences Canada Inc., equipment and improvements and other intangible assets acquired in the January 2004 Kimberly-Clark wound care asset acquisition and patents and trademarks. Wound closure-fasteners are for the most part outsourced and accordingly are not supported by long-lived assets. Skin care long-lived assets consist of goodwill associated with the acquisition of Sunshine Products, Inc. and equipment and improvements associated therewith. Corporate headquarters and the Company's U.S. distribution center equipment and improvements are included in the other costs column since they service all three business segments.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

For the nine months ended September 30, 2005 the skin care segment gross profit (loss) includes a \$106,000 charge for closure of the Company's soap and lotion manufacturing facility in St. Louis, Missouri.

The following table presents net sales by geographic region.

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2005	2004	2005	2004
United States	46%	51%	42%	53%
Canada	51%	46%	54%	43%
Other	3%	3%	4%	4%

Canada net sales for the nine months ended September 30, 2005 represent a higher percentage of total net sales compared with 2004 as a result of the one-time benefit of approximately \$1,840,000 related to the sale of inventory on hand to fill the distribution pipeline in conjunction with the appointment of an exclusive third party distributor for the Company's Canadian subsidiary in the second quarter 2005 (see footnote 17).

The following table presents net long-lived assets by geographic region.

	September 30,	September 30,
	2005	2004
United States	\$1,779,843	\$2,060,025
Canada	3,094,001	3,162,588

DERMA SCIENCES, INC. AND SUBSIDIARIES

Notes To Consolidated Financial Statements (Unaudited)

14. Income Taxes

The provision for income taxes has been offset during the third quarter of 2005 and 2004 and the nine months ended September 30, 2005 and 2004 by the utilization of the Company's net operating losses. No benefit has been recorded as the realization of the net operating losses is not assured.

At December 31, 2004, the Company has net operating loss carryforwards of approximately \$8,300,000 for federal income tax purposes that expire in years 2012 through 2024. For state income tax purposes, the Company has net operating loss carryforwards in a number of jurisdictions in varying amounts and with varying expiration dates. The most significant net operating loss is in New Jersey, site of the Company's domicile. This state presently has a moratorium on the use of net operating losses. As of December 31, 2004, the Company has foreign (primarily Canadian) net operating loss carryforwards of approximately \$1,065,000 which begin to expire in 2009. The timing in which the Company can utilize its U.S. net operating loss carryforwards in any year or in total may be limited under the Internal Revenue Code section 382 regarding changes in ownership of corporations. Due to uncertainties surrounding the Company's ability to use its net operating loss carryforwards, a full valuation allowance has been provided for all periods presented.

15. Distribution Agreement Upset Fee

In August 2004, the Company's exclusive distribution agreement for certain catheter fasteners expired and was not renewed by the manufacturer. Sales and gross profit of these catheter fasteners for the three and nine months ended September 30, 2005 and 2004 were as follows:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2005	2004	2005	2004
Sales	\$18,000	\$148,000	\$113,300	\$772,200
Gross profit	\$9,700	\$68,000	\$55,900	\$350,500

In accordance with the Company's distribution agreement with a major customer for these catheter fasteners, if the customer subsequently entered into an agreement with the manufacturer to distribute these products, then the customer shall pay the Company an upset fee of \$200,000 payable in forty-eight monthly installments of \$4,167. As of January 2005, the customer advised the Company that it had entered into an agreement with the manufacturer to distribute the catheter fasteners and that it was liable for payment of the upset fee. In January 2005, the Company discounted the future cash flow stream associated with the payment of the upset fee and recognized a gain of \$164,300 in other income. The current portion of the receivable has been recorded in accounts receivable and the long-term portion in other assets in the balance sheet.

16. Employee Termination Costs

On March 9, 2004 the Company terminated the employment of its Executive Vice President and President of its Derma Sciences Canada Inc. subsidiary. Thereupon, the former employee initiated litigation against the Company for wrongful termination. The Company recorded an estimated charge of \$450,000 representing severance, benefits and other costs potentially recoverable by the employee. The charge was recorded against general administrative expense in the statement of operations. The liability was initially recorded to the extent of \$225,000 in other current liabilities and to the extent of \$225,000 in other long-term liabilities in the balance sheet.

On September 24, 2004, the Company settled the subject litigation. In accordance with the settlement, the Company extended the expiration date of previously granted options to purchase 500,000 shares of the Company's common stock at \$0.50 per share from May 9, 2004 to September 30, 2006. The settlement costs, and other costs associated with the termination and modification of the previously granted options, totaling \$301,600 were recorded in general and administrative expense in the 2004 consolidated statement of operations.

Index**DERMA SCIENCES, INC. AND SUBSIDIARIES**

Notes To Consolidated Financial Statements (Unaudited)

17. Appointment of Canadian Distributor

On May 9, 2005 the Company entered into a five-year agreement expiring May 1, 2010 with a Canadian company to serve as the exclusive distributor of its products in Canada. The agreement also appoints the distributor as the Company's servicing agent to fulfill supply contracts held directly by the Company. The agreement automatically renews thereafter for consecutive periods of one year each on the same terms and conditions unless either party gives notice of its intent not to renew 180 days prior to expiry. Either party shall have the right to terminate the agreement when an event of default (as defined) has occurred with respect to the other party.

Effective June 1, 2005 the distributor assumed responsibility for customer service, product delivery and maintenance and warehousing of sufficient inventory to meet agreed upon order fulfillment requirements. On an ongoing basis, the distributor will place inventory replenishment orders with the Company at agreed upon prices, 120 days in advance of scheduled delivery. Unless amended, each order becomes

non-cancelable 90 days in advance of scheduled delivery.

With respect to sales made by the distributor to the Company's contract customers in its capacity as a servicing agent, the Company will pay the distributor an agreed upon distribution fee and a specified incentive for growth (as achieved). The Company will reimburse the distributor for the difference between the price paid by the distributor and the Company's contract price with its customer upon submission by the distributor of an agreed upon rebate report. With respect to sales made by the distributor to its customers, the distributor's compensation will consist solely of the excess of the proceeds over the cost of the product and the Company will not be responsible for payment of any distribution fee. Further, the agreement requires the distributor to meet specified minimum sales growth targets of 15%, 12%, 12% and 12% in the first four years and private label product purchase targets failing which the Company may cancel the agreement. The Company believes that the agreement will provide better service to its customers throughout Canada and greater opportunity for sales growth.

In connection with implementing the agreement, the Company sold to the distributor its existing inventory of saleable finished product on hand and will sell all saleable finished product it committed to manufacture prior to signing of the agreement for delivery by the Company through September 2005 at the agreed upon prices to initially stock and maintain its distribution pipeline. It is expected the Company's saleable finished product commitments will be fulfilled by October 2005 at which time the distributor will begin to receive product based upon its initial orders placed with the Company beginning in June 2005. Other than the one-time sale in May and June 2005 of its existing inventory on hand which is estimated to represent two to two and one-half months sales, prospective sales are expected to resume historical trends affected only by existing market conditions and the growth opportunities inherent in the agreement. Given economic order quantities and normal lead times associated with the products sold to the distributor, it is expected that a two to three month safety stock will be required prospectively by the distributor to maintain required customer service requirements. In addition, the Company incurred one-time costs consisting of severance and other costs to dismantle its distribution capabilities and sub-lease its distribution warehouse. A summary of the estimated one-time benefit and cost of the agreement recognized in the nine months ended September 30, 2005 is outlined below:

Net Sales	\$1,840,000
Cost of Sales	1,240,000

Gross Profit	600,000
Expenses	105,000

Pretax Income	\$ 495,000
	=====

Further, implementation of the agreement resulted in an estimated one-time positive cash flow benefit of \$2,705,000 stemming from lower receivable and inventory requirements going forward and the one-time pretax income benefit of the sale of existing saleable finished product inventory on hand to the distributor.

Item MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

2.

Quarter Ended September 30, 2005 Compared to Quarter Ended September 30, 2004.

Results of Operations

Overview

The 2005 and 2004 operating results include Derma Sciences, Inc. and its subsidiaries. Unless otherwise indicated by the context, the term Canadian operations is used throughout this discussion in reference to the operations of Derma Sciences Canada Inc. and the term U.S. operations is used throughout this discussion in reference to the Company's U.S. operations.

The Company engages in the manufacture, marketing and sale of three dermatological product lines consisting of wound care, wound closure and fasteners and skin care. The wound care line is composed of basic and advanced wound care products. Basic wound care consists of gauze dressings, packing strips, impregnated gauze dressings, abdominal pads, laparotomy sponges, burn dressings and bandages. Advanced

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

wound care products consist of ointments, silver dressings, calcium alginate dressings, hydrogel dressings, hydrocolloid dressings and foam dressings. The wound closure and fastener line consists of wound closure strips and a variety of catheter fasteners. The skin care line consists of bath sponges, skin cleansers, soaps, hair and body washes and moisturizers.

The following table highlights the quarters ended September 30, 2005 versus 2004 operating results:

	Quarter Ended September 30,		Variance	
	2005	2004		
Gross Sales	\$6,825,971	\$5,254,203	\$1,571,768	29.9%
Adjustments	(1,113,514)	(284,379)	(829,135)	291.6%
Net sales	5,712,457	4,969,824	742,633	14.9%
Cost of sales	3,750,384	3,768,367	(17,983)	(0.5%)

	=====	=====	=====	

Gross to Net Sales Adjustments

Gross sales are adjusted for trade rebates, Medicaid rebates, returns and allowances and cash discounts to derive net sales. Trade rebates are trued-up monthly based upon an analysis of historical sales subject to rebate and actual rebates received from distributors. The normal rebate cycle is one month. Non-exclusive distributors generally carry one month's inventory. As distributor inventory is depleted via sales, it is replenished via purchases from the Company. Rebates are processed and submitted for credit on a timely basis consistent with distributor sales. If the normal rebate cycle were one-half month at September 30, 2005, the trade rebate reserve would be overstated by approximately \$165,000. If the normal rebate cycle were two months at September 30, 2005, the trade rebate reserve would be understated by approximately \$330,000. To minimize its cash outflow invested in rebates, distributors generally strive to optimize the rebate credit submission process.

Index

Given the nature of the Company's products and business, there is no external information available to further validate the reasonableness of the trade rebate accrual balance. Historical trends of sales subject to rebate and rebates received are evaluated monthly, by distributor, on a 3 month, 6 month and 12 month rolling basis to update the continued reasonableness of the assumptions used to quantify the accrual trade rebate balance. Deviations in the trends resulting, among other causes, from distributors not submitting their rebates on a timely basis are analyzed and factored in determining the required accrual balance.

Medicaid rebates are accrued monthly based upon recent historical activity and reconciled quarterly based upon receipt of rebate reports from participating state agencies. Returns and allowances and cash discounts have historically been accounted for on a cash basis, which approximates accrual based accounting given the month-to-month consistency of these charges.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Gross to net sales adjustments comprise the following:

	Quarter Ended September 30,	
	2005	2004
Gross Sales	\$6,825,971	\$5,254,203
Trade rebates	(1,053,717)	(223,796)
Medicaid rebates	(8,717)	(12,511)
Returns and allowances	(11,640)	(10,896)
Cash discounts	(39,440)	(37,176)
Total adjustments	(1,113,514)	(284,379)
Net sales	\$5,712,457	\$4,969,824

Trade rebates increased significantly in the third quarter 2005 versus 2004 due to the Company's implementing an exclusive third party distribution agreement in the second quarter 2005 for its Canadian business, continuing growth of rebate intensive U.S. private label sales and a general increase in the level of sales subject to rebate (contract business) in other areas of the Company's business. Implementing the third party distribution agreement was responsible for approximately \$780,000 of the increase as the majority of the Canadian sales represent contract business subject to rebate. A continuing trend towards lower levels of Medicaid reimbursed sales is responsible for the lower level of Medicaid rebates. Sales returns and allowances were comparable period to period and on balance reflect a normal level of activity. The slight increase in cash discounts reflects the growth of sales to larger customers that routinely take advantage of available discount terms.

Rebate Reserve Roll Forward

A quarterly roll forward of the trade rebate accruals at September 30, 2005 and 2004 is outlined below:

	Quarter Ended September 30,	
	2005	2004
Beginning balance - July 1	\$1,363,463	\$168,000
Rebates paid	(965,657)	(190,747)
Rebates accrued	1,047,754	219,103
Ending balance - September 30	\$1,445,560	\$196,356

The \$82,097 increase in the third quarter 2005 trade rebate reserve reflects a \$159,745 increase to \$1,131,813 in the reserve associated with the commencement of the Company's third party distribution agreement in Canada during the second quarter 2005 partially offset by a higher level of scheduled U.S. private label rebate payments during the third quarter 2005 which served to significantly reduce the outstanding balance owed. There has been no other discernable change in the nature of the Company's business as it relates to the accrual and subsequent payment of rebates, nor has there been any material prior period related adjustments to the trade rebate accrual in the third quarter 2005. The \$28,356 increase in the third quarter 2004 trade rebate reserve reflects the continued growth of the rebate intensive U.S. private label business coupled with the commencement of extended payment terms with two large customers, partially offset by the work down of a higher than normal trade rebate accrual balance due to significant sales of product subject to rebate earlier in the year.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Net Sales and Gross Margin

The following table highlights the September 30, 2005 versus 2004 product line net sales and gross profit:

	Quarter Ended September 30,		Variance	
	2005	2004		
Product Line Net Sales				
Wound care	\$4,684,049	\$3,733,166	\$950,883	25.5%
Wound closure and fasteners	657,471	725,930	(68,459)	(9.4%)
Skin care	370,937	510,728	(139,791)	(27.4%)
Total	\$5,712,457	\$4,969,824	\$742,633	14.9%
Product Line Gross Profit				
Wound care	\$1,606,267	\$ 705,303	\$900,964	127.7%
Wound closure and fasteners	333,916	368,217	(34,301)	(9.3%)
Skin care	21,890	127,937	(106,047)	(82.9%)
Total	\$1,962,073	\$1,201,457	\$760,616	63.3%

Wound care sales increased \$950,883, or 25.5%, to \$4,684,049 in 2005 from \$3,733,166 in 2004. The increase is attributable to a basic wound care increase of \$606,742, or 21.9%. This increase was driven by an increase in Canadian basic wound care sales of \$595,385 comprised of growth of \$390,945 and favorable exchange of \$204,440 (reflecting a 8.2% strengthening of the Canadian dollar) while U.S. sales increased \$11,357, or 2.4%. The Canadian sales growth was driven by the exclusive distribution agreement that commenced in the second quarter 2005. The U.S. sales performance reflects the relatively stable demand for these products. Advanced wound care sales increased \$344,142, or 35.8%, to \$1,305,803 in 2005 from \$961,661 in 2004. This increase was principally driven by continued growth of the Company's private label sales to U.S. customers together with higher Dermagran and former Kimberly-Clark product sales. This increase was partially offset by lower silver advanced wound care product sales which, while improving in the third quarter 2005, were \$85,077 less than sales in the third quarter 2004.

Wound care gross profit increased \$900,964, or 127.7%, to \$1,606,267 in 2005 from \$705,303 in 2004. Gross profit margin increased to 34.3% in 2005 from 18.9% in 2004. The margin dollar increase and improved gross margin percentage are due to the increase in sales and the flow through of lower basic wound care costs negotiated in 2004, lower silver dressing costs associated with sourcing from a new supplier, lower advanced wound care costs associated with manufacturing the former Kimberly-Clark products in-house versus the acquisition related negotiated costing used in 2004 and the non-recurrence of one-time Kimberly-Clark equipment transfer, start-up and product validation costs incurred in the third quarter 2004. Also contributing was the transfer of approximately \$90,000 of freight costs to distribution expense. Excluding the benefit of the freight expense reclassification, wound care margins would have been 32.4%. In connection with the implementation of the exclusive distribution agreement for the Company's products in Canada in the second quarter 2005, the distributor took over responsibility for all distribution costs. Outbound freight costs previously recorded as part of cost of sales are now being absorbed by the distributor and charged back to the Company as part of its overall distribution fee which is recorded in distribution expense.

Wound closure and fastener sales decreased \$68,459, or 9.4%, to \$657,471 in 2005 from \$725,930 in 2004. A reduction of approximately \$124,000 in sales of certain catheter fasteners in 2005 versus 2004 associated with the loss of the Company's exclusive distribution agreement for the sale of these products in August 2004 is primarily responsible for the decrease. Higher suture strip and catheter fastener sales due to improving demand served to partially mitigate the decrease.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Wound closure-fastener gross profit decreased \$34,301, or 9.3%, to \$333,916 in 2005 from \$368,217 in 2004. Gross profit margins were essentially unchanged at 50.8% in 2005 versus 50.7% in 2004. The decrease in margin dollars is consistent with the sales shortfall.

Skin care sales decreased \$139,791, or 27.4%, to \$370,937 in 2005 from \$510,728 in 2004 due to continuing competitive pressure and the loss of several key customers. Skin care gross profit decreased \$106,047 to \$21,890 in 2005 from \$127,937 in 2004. The Company completed the closure of its skin care manufacturing operation at the end of August 2005 and commenced outsourcing these products to a third party supplier. The lower margin dollars and percentage experienced during the quarter reflect continuation of high cost manufacturing for half the quarter coupled with a number of one-time costs associated with the closure. Skin care margins are expected to improve going forward once the Company works through its higher cost inventory on hand and begins to realize the full benefit of the facility's closure.

Operating Expense

The following table highlights September 30, 2005 versus 2004 operating expenses by type:

	Quarter Ended September 30,			
	2005	2004	Variance	
Distribution	\$ 389,807	\$ 243,232	\$146,575	60.3%
Marketing	90,700	57,785	32,915	57.0%
Sales	458,569	444,852	13,717	3.1%
General administrative	892,704	647,953	244,751	37.8%
	-----	-----	-----	
Total	\$1,831,780	\$1,393,822	\$437,958	31.4%
	=====	=====	=====	

Operating expense increased \$437,958, or 31.4%, to \$1,831,780 in 2005 from \$1,393,822 in 2004 including an increase of \$36,339, or 2.6%, attributable to exchange associated with an 8.2% strengthening of the Canadian dollar on the Canadian operations.

Distribution expense increased \$146,575, or 60.3%, in 2005 versus 2004. Expenses in Canada increased \$167,026 (including \$8,487 expense related to exchange) while expenses in the U.S. decreased \$20,451. The increase in Canada was attributable to implementation of the new distribution agreement. Effective June 1, 2005 the new distributor assumed responsibility for customer service, product delivery and inventory maintenance and warehousing while, to the extent possible, the Company eliminated its internal costs for these services. The distributor charges the Company a distribution fee each month based on a fixed percentage of eligible distributor net sales of the Company's product to end users. The \$158,539 increase (excluding exchange) is attributable to an estimated \$108,000 of freight and customer service costs being included in the distribution fee and recorded as distribution expense that the Company previously recorded (when it internally provided distribution services) as cost of sales (freight) and general and administrative expense (customer service). The balance of approximately \$50,500 represents the cost of maintaining a temporary distribution warehouse until such time as these activities can be integrated into existing leased manufacturing space estimated at \$33,000 together with slightly higher overall distributor fees versus the Company's previous internal costs. The U.S. decrease was attributable to lower compensation costs associated with running the new U.S. distribution facility opened in March 2004 more cost effectively in 2005 and the absence in 2005 of start up related costs incurred in 2004 associated with bringing the new U.S. distribution center on line.

Marketing expense increased \$32,915, or 57.0%, in 2005 versus 2004. The increase is principally attributable to higher literature, promotion and product development expense in support of the Company's growth initiatives.

Index

Sales expense increased \$13,717, or 3.1%, in 2005 versus 2004. Expenses in Canada increased \$8,211 (including \$7,913 expense related to exchange) while expenses in the U.S. increased \$5,506. The slight increase in Canada (excluding exchange) is attributable to a higher level of sales support activities consisting principally of travel, convention attendance and sampling to expand market visibility and improve contract compliance offset by elimination of one sales position and related expenses in the second quarter 2005 as a result of the new distribution agreement. The U.S. increase was attributable to higher compensation and commissions of \$12,500 associated with hiring two new sales representatives (one replacement and one new position), one-time recruiting fees of \$28,000 and higher travel costs of \$7,000. Partially

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

offsetting these increases were savings of \$20,000 related to the elimination of a sales database consultant and related expenses, lower sample costs of \$12,000 and lower manufacturers' representative commissions of \$10,000 due to the discontinuance of manufacturers' representatives in the second quarter of 2005.

General administrative expense increased \$244,751, or 37.8%, in 2005 versus 2004. Expenses in Canada increased \$201,467 (including \$7,393 expense related to exchange) while expenses in the U.S. increased \$43,284. The increase in Canada reflects the non-recurrence of a \$123,600 employee termination settlement gain recognized in the third quarter 2004 (original settlement expense was recorded in the first quarter 2004) coupled with higher compensation costs related to the hiring of a director of materials and logistics in the second quarter 2005 together with higher travel, computer and professional services expenses. Partially offsetting these increases was an estimated benefit of \$18,000 related to the elimination of the customer service department in the second quarter 2005 in connection with commencement of the new exclusive distribution agreement. The U.S. increase principally reflects board of directors fees initiated in January 2005, increased compensation associated with the retention of an employee formerly part of the skin care manufacturing team (facility closed in August 2005) to serve as supervisor of materials and logistics and higher benefit, travel and professional service expenses.

Interest Expense

Interest expense increased \$14,687, or 24.0%, to \$75,929 in 2005 from \$61,242 in 2004. Interest expense in Canada decreased \$17,944 (net of \$2,865 expense related to exchange) while interest expense in the U.S. increased \$32,631. The decrease in Canada reflects lower outstanding line of credit and term loan balances in 2005, partially offset by slightly higher interest rates and fees. Canada's outstanding line of credit balance was significantly reduced beginning in mid-May 2005 and reached zero by the end of June 2005 through use of the initial one-time positive cash flow generated by implementation of the new distribution agreement. Canada's term loan was significantly reduced in January 2005 as a result of the pay off of an outstanding irrevocable standby letter of credit issued by the U.S. lender in the amount of \$200,000 held by the Canadian lender as additional security for its credit facility. The \$200,000 payment was applied to the term loan as a permanent principal reduction against the principal amount due in 2007. The U.S. increase is due to higher outstanding line of credit balances, higher interest rates and higher line of credit fees in 2005 versus 2004. In January 2005, the U.S. operation refinanced its line of credit at a higher overall cost.

Other Income/Expense

Other expense increased \$21,511 to \$11,259 expense in 2005 from \$10,252 income in 2004. The increase is primarily driven by losses on fixed asset disposals related to the closure of the skin care manufacturing facility and higher storage and demurrage charges associated with a trucker's strike in Canada in 2005 compared to 2004 that included a favorable exchange gain partially offset by higher state taxes.

Income Taxes

The Company's provision for income taxes in the third quarter 2005 and 2004 was offset by the utilization of net operating losses.

Net Income (Loss)

The Company generated net income of \$43,105, or \$0.00 per share (basic and diluted) in the third quarter 2005, compared to a \$243,355 loss, or \$0.03 loss per share (basic and diluted) in the third quarter 2004.

	=====	=====	=====	

Gross to Net Sales Adjustments

Gross to net sales adjustments comprise the following:

	Nine Months Ended September 30,	
	2005	2004
Gross Sales	\$20,273,239	\$15,705,084
Trade rebates	(2,549,451)	(598,428)
Medicaid rebates	(22,137)	(36,253)
Returns and allowances	(50,134)	(44,145)
Cash discounts	(111,395)	(113,001)
Total adjustments	(2,733,117)	(791,827)
Net sales	\$17,540,122	\$14,913,257
	=====	=====

Trade rebates increased significantly in the first nine months of 2005 versus 2004 due to the Company's implementing an exclusive third party distribution agreement in the second quarter 2005 for its Canadian business, continuing growth of rebate intensive U.S. private label sales and a general increase in the level of sales subject to rebate (contract business) in other areas of the Company's business. Implementing the third party distribution agreement was responsible for approximately \$1,752,000 of the increase as the majority of the Canadian sales represent contract business subject to rebate. A continuing trend towards lower levels of Medicaid reimbursed sales is responsible for the lower level of

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Medicaid rebates. Sales returns and allowances were comparable period to period and on balance reflect a normal level of activity. The slight decrease in cash discounts reflects the Company's efforts to tighten its discount terms while experiencing a trend in sales growth towards larger customers that routinely take advantage of available discount terms.

Index

Rebate Reserve Roll Forward

A nine month roll forward of the trade rebate accruals at September 30, 2005 and 2004 is outlined below:

	Nine Months Ended September 30,	
	2005	2004
	-----	-----
Beginning balance - January 1	\$ 235,200	\$212,000
Rebates paid	(1,318,658)	(589,333)
Rebates accrued	2,529,018	573,689
	-----	-----
Ending balance - September 30	\$1,445,560	\$196,356
	=====	=====

The \$1,210,360 net increase in rebates the first nine months of 2005 reflects a \$1,131,000 incremental reserve associated with implementing the third party distribution agreement in Canada during the second quarter 2005 coupled with lower rebates paid due to extended rebate payment terms with two large customers. There has been no other discernable change in the nature of the Company's business as it relates to the accrual and subsequent payment of rebates, nor has there been any material prior period related adjustments to the trade rebate accruals in 2005. The \$15,644 decrease in the first nine months of 2004 trade rebate reserve reflects the work down of a higher than normal beginning accrual balance due to significant sales of product subject to rebate in December 2003 and January 2004 coupled with a decrease in the amount of corresponding sales subject to rebate in the following months as customers worked down their existing inventory levels. This decrease was partially offset by the commencement of extended rebate payment terms with two large customers during the first half of 2004.

Net Sales and Gross Margin

The following table highlights the September 30, 2005 versus 2004 product line net sales and gross profit:

	Nine Months Ended September 30,			
	2005	2004		Variance
	-----	-----		-----
Product Line Net Sales				

Wound care	\$14,435,532	\$10,798,118	\$3,637,414	33.7%
Wound closure and fasteners	1,955,742	2,624,198	(668,456)	(25.5%)
Skin care	1,148,848	1,490,941	(342,093)	(22.9%)
	-----	-----	-----	
Total	\$17,540,122	\$14,913,257	\$2,626,865	17.6%
	=====	=====	=====	
Product Line Gross Profit				

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Wound care	\$ 4,597,081	\$ 2,398,221	\$2,198,860	91.7%
Wound closure and fasteners	997,178	1,304,621	(307,443)	(23.6%)
Skin care	(72,193)	325,345	(397,538)	-
	-----	-----	-----	
Total	\$ 5,522,066	\$ 4,028,187	\$1,493,879	37.1%
	=====	=====	=====	

Wound care sales increased \$3,637,414, or 33.7%, to \$14,435,532 in 2005 from \$10,798,118 in 2004. The increase is principally attributable to a basic wound care increase of \$3,158,187, or 41.0%. This increase was driven by a significant increase in Canadian basic wound care sales of \$3,092,462 comprised of growth of \$2,574,376 and favorable exchange of \$518,086 (reflecting a 7.5% strengthening of the Canadian dollar) while U.S. sales increased \$65,725, or 5.0%. The Canadian sales growth was driven by a one-time benefit of approximately \$1,740,000 (excluding foreign exchange benefit) related to the sale of inventory on hand to fill the distribution pipeline in conjunction with the appointment of an exclusive third party distributor for Canada in the second quarter coupled with normal growth of \$834,376, or 13.5%, due principally to improved contract compliance and the improved market visibility afforded by the new exclusive distribution agreement effective June 1, 2005. Advanced wound care sales increased \$479,228, or 15.5%, to \$3,577,639 in 2005 from \$3,098,411 in 2004. This increase was driven by continued growth of the Company's private label sales to U.S. customers. These increases were partially offset by lower former Kimberly-Clark private label product sales attributable to competitive pressure and lower silver product sales which, while improving in the third quarter 2005, were \$170,544 less than in 2004.

28

Index

Wound care gross profit increased \$2,198,860, or 91.7%, to \$4,597,081 in 2005 from \$2,398,221 in 2004. Gross profit margin increased to 31.8% in 2005 from 22.2% in 2004. Approximately \$600,000 of the increased gross margin dollars relates to the one-time sale of inventory to fill the new Canadian distributor's pipeline. The balance of the margin dollar increase and improved gross margin percentage are due to the increase in sales and the flow through of lower basic wound care costs negotiated in 2004, lower silver dressing costs associated with sourcing from a new supplier, lower advanced wound care costs associated with manufacturing the former Kimberly-Clark products in-house versus the acquisition related negotiated costing used in much of 2004, the non-recurrence of one-time advanced wound care private label manufacturing and Kimberly-Clark equipment transfer start-up and product validation costs incurred in 2004, and the non-recurrence of a one-time \$59,400 inventory write-off in the first quarter 2004. Also contributing was the transfer of approximately \$120,000 of freight costs out of cost of sales to distribution expense in 2005. Excluding the benefit of the freight expense reclassification, 2005 wound care margins would have been 31.0%. In connection with the implementation of the exclusive distribution agreement for the Company's products in Canada in the second quarter 2005, the distributor took over responsibility for all distribution costs. Outbound freight costs previously recorded as part of cost of sales are now being incurred by the distributor and charged back to the Company as part of its overall distribution fee.

Wound closure and fastener sales decreased \$668,456, or 25.5%, to \$1,955,742 in 2005 from \$2,624,198 in 2004. A reduction of approximately \$664,000 in sales of certain catheter fasteners in 2005 versus 2004 associated with the loss of the Company's exclusive distribution agreement for the sale of these products in August 2004 is primarily responsible for the decrease. Lower catheter fastener sales due to competitive pressure partially offset by a slight increase in suture strip sales is responsible for the balance of the sales decrease.

Wound closure and fastener gross profit decreased \$307,443, or 23.6%, to \$997,178 in 2005 from \$1,304,621 in 2004. Gross profit margins improved to 51.0% in 2005 from 49.7% in 2004. The decrease in margin dollars is consistent with the sales shortfall. The margin improvement principally reflects the benefit of the loss of the exclusive catheter fastener business, which was slightly lower margined than the average for the line.

Skin care sales decreased \$342,093, or 22.9%, to \$1,148,848 in 2005 from \$1,490,941 in 2004 due to continuing competitive pressure and the loss of several key customers. Skin care gross profit decreased \$397,538 to a loss of \$72,193 in 2005 from a profit of \$325,345 in 2004. The Company completed the closure of its skin care manufacturing operation on schedule at the end of August 2005 and commenced outsourcing the manufacture of its skin care products from a third party supplier. Included in the 2005 loss are one-time costs of approximately \$106,000 associated with the closure of the facility. Excluding these one-time costs, the skin care line generated a positive gross margin of approximately \$34,000 for the first nine months of 2005. Skin care margins are expected to improve going forward once the Company works through its higher cost inventory on hand and begins to realize the full benefit of the facility's closure.

Operating Expense

The following table highlights September 30, 2005 versus 2004 operating expenses by type:

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

	Nine Months Ended September 30,			
	-----		-----	
	2005	2004	Variance	
	----	----	-----	-----
Distribution	\$ 974,494	\$ 806,681	\$167,813	20.8%
Marketing	316,002	267,057	48,945	18.3%
Sales	1,390,741	1,347,945	42,796	3.2%
General administrative	2,731,755	2,895,998	(164,243)	(5.7%)
	-----	-----	-----	-----
Total	\$5,412,992	\$5,317,681	\$ 95,311	1.8%
	=====	=====	=====	

29

Index

Operating expense increased \$95,311, or 1.8%, to \$5,412,992 in 2005 from \$5,317,681 in 2004 including an increase of \$137,266, or 2.6%, attributable to exchange associated with a 7.9% strengthening of the Canadian dollar on the Canadian operations.

Distribution expense increased \$167,813, or 20.8%, in 2005 versus 2004. Expenses in Canada increased \$303,368 (including \$24,083 expense related to exchange) while expenses in the U.S. decreased \$135,555. The increase in Canada was attributable to implementation of the new distribution agreement. Effective June 1, 2005 the new distributor assumed responsibility for customer service, product delivery and inventory maintenance and warehousing while, to the extent possible, the Company eliminated its internal cost for these services. The distributor charges the Company a distribution fee each month based on a fixed percentage of eligible distributor net sales of the Company's products to end users. The \$279,285 increase (excluding exchange) is attributable to an estimated \$144,000 of freight and customer service costs being included in the distribution fee and recorded as distribution expense that the Company previously recorded (when it internally provided distribution services) as cost of sales (freight) and general and administrative (customer service). In addition, the Company incurred approximately \$52,000 in one-time severance and other related costs associated with the transition to the new distribution agreement. The balance of the increase relates to the cost of maintaining a temporary distribution warehouse until such time that these activities can be integrated into existing leased manufacturing space, incremental transition related expenses and slightly higher distributor fees versus the Company's previous internal costs. The U.S. decrease principally reflects the benefit of closing one of the Company's distribution facilities in April 2004 and the non-recurrence in 2005 of approximately \$60,000 of one-time costs to close the facility and various incremental start-up related expenses associated with bringing the new U.S. distribution center which opened in March 2004, on-line. Partially offsetting these expense reductions were higher lease costs associated with the new, larger U.S. distribution center.

Marketing expense increased \$48,945, or 18.3%, in 2005 versus 2004. The increase is principally attributable to higher literature, promotion and product development expense in support of the Company's growth initiatives.

Sales expense increased \$42,796, or 3.2%, in 2005 versus 2004. Expenses in Canada increased \$101,540 (including \$22,516 expense related to exchange) while expenses in the U.S. decreased \$58,744. The increase in Canada is attributable to a higher level of sales support activities consisting principally of travel, convention attendance and sampling to expand market visibility and improve contract compliance and one-time severance and travel costs associated with implementing the new distribution agreement. The U.S. decrease was attributable to lower compensation of \$45,000 associated with lower sales representative commissions due to timing, lower manufacturers' representative commissions due to the decision to discontinue the use of manufacturers' representatives in the second quarter 2005 partially offset by the addition of a new sales representative in September 2005, elimination of a sales database consultant and related expenses in early 2005 generated savings of \$50,000 and lower sampling expense of \$10,000, also contributed. Partially offsetting these decreases were higher recruiting expenses of \$28,000 and travel costs of \$17,000.

General and administrative expense decreased \$164,243, or 5.7%, in 2005 versus 2004. Expenses in Canada decreased \$184,333 (net of \$90,667 expense related to exchange) while expenses in the U.S. increased \$20,090. The \$275,000 decrease (excluding exchange) in Canada principally reflects the non-recurrence in 2005 of a \$326,400 charge for employee termination costs, a benefit of \$24,000 related to the elimination of the customer service department in the second quarter 2005 in connection with the commencement of the new distribution agreement and generally lower miscellaneous spending in an effort to contain costs. Partially offsetting these decreases were one-time costs of \$41,700 for severance and other costs associated with implementing the new distribution agreement together with higher compensation costs of \$46,000 associated with the hiring of a director of materials and logistics in the second quarter 2005. The increase in the U.S. reflects board of directors fees of \$50,000 initiated in 2005, higher information technology costs of \$18,000 associated with an upgrade of the Company's hardware and overall systems capabilities, incremental Sarbanes Oxley related fees of \$30,000 and travel of \$10,000, partially offset by the non-recurrence in 2005 of a \$42,600 bad debt write-off taken in the first quarter 2004 coupled with lower public relations, legal and regulatory costs due to cost containment efforts.

Index*Interest Expense*

Interest expense increased \$96,394, or 60.5%, to \$255,782 in 2005 from \$159,388 in 2004. Interest expense in Canada decreased \$20,369 (net of \$8,071 expense related to exchange) while interest expense in the U.S. increased \$116,763. The \$28,440 decrease in Canada (excluding exchange) reflects lower outstanding line of credit and term loan balances in 2005, partially offset by slightly higher interest rates and fees. Canada's outstanding line of credit balance was significantly reduced beginning in mid-May 2005 to zero by the end of June 2005 through the use of the initial one-time positive cash flow generated by implementation of the new distribution agreement. Canada's term loan was significantly reduced in January 2005 as a result of the pay off of an outstanding irrevocable standby letter of credit issued by the U.S. lender in the amount of \$200,000 held by the Canadian lender as additional security for its credit facility. The \$200,000 payment was applied to the term loan as a permanent principal reduction against the principal amount due in 2007. The increase in the U.S. is due to higher outstanding line of credit balances, higher interest rates and higher line of credit fees in 2005 versus 2004. In January 2005, the U.S. refinanced its line of credit at a higher overall cost. In addition, in 2004 the U.S. operation did not move into a net borrowing position until June 2004.

Other Income/Expense

Other income increased \$236,183 to \$134,945 income in 2005 from \$101,238 expense in 2004. The 2005 net income was comprised of a gain plus interest of \$176,000 related to a distribution agreement upset fee recorded in the first quarter 2005 and license fee income of \$14,000 less unfavorable exchange of \$22,000, fixed asset write-offs of \$22,000 and miscellaneous net expense of \$11,000. The 2004 net expense was comprised of fixed asset write-offs of \$83,000, reversal of a prior year gain on sale of \$14,000 and miscellaneous net expense of \$4,000.

Income Taxes

The Company did not record any tax expense in the first nine months of 2005 or 2004 given its net operating losses and available net operating loss carryforwards.

Net Loss

The Company incurred a net loss of \$11,763, or \$0.00 loss per share (basic and diluted), in the first nine months of 2005 compared to a \$1,550,120 loss, or \$0.17 loss per share (basic and diluted), in the first nine months of 2004.

Liquidity and Capital Resources*Operational Overview*

In the first nine months of 2005, overall sales have not met expectations. Adjusted for one-time items, lost business and foreign exchange, period-to-period sales growth was approximately 6%. Sales in Canada have exceeded expectations as the Company has focused on contract compliance, exploring opportunities in other market segments (other than its traditional strength in the acute care segment) and working closely with its new exclusive distributor to capitalize on sales growth opportunities presented by this new relationship. Sales in the U.S. are essentially flat period to period. Growth in the private label area has effectively been offset by softness in the skin care area of the business, while Dermagran, basic wound care and wound closure-fastener sales have remained relatively stable.

In the second quarter 2005, the Company realized a significant one-time benefit associated with entering into an exclusive distribution agreement for its products in Canada. In connection with implementing the agreement in the second quarter of 2005, the Company realized estimated one-time net sales, gross margin and net income of \$1,840,000, \$600,000 and \$495,000, respectively, related to the sale to the new distributor of its existing inventory required to stock the new distributor's pipeline, less the Company's one-time costs to dismantle its existing distribution network. Further, implementation of the agreement resulted in an estimated one-time positive cash flow benefit of \$2,705,000 stemming from prospective lower receivable and inventory requirements coupled with the net income realized.

Index

As expected, the Company has realized the benefit of its major manufacturing and sourcing initiatives completed in 2004. Notwithstanding the impact of sales pricing and mix on margins, the Company has realized an improvement in its overall gross margin percentage in 2005 stemming from lower product costs.

In an effort to enhance manufacturing efficiency and competitiveness, the Company decided to shut down its skin care manufacturing facility and outsource the manufacture of these products. An agreement was signed in July 2005 to cost effectively outsource the manufacture of the Company's skin care products. The Company completed the closure of the skin care manufacturing facility on schedule at the end of August 2005. Excluding one-time costs, the skin care line generated a modest positive gross margin through the first nine months of 2005. Skin care gross margins are expected to improve going forward as the Company works through its existing higher cost inventory on hand and begins to realize the full benefit of the facility's closure.

Excluding one-time costs in both periods and the impact of expense reclassifications and exchange, 2005 operating costs were essentially flat versus 2004, reflecting an effort to restrain expenses to the extent possible without adversely affecting the underlying infrastructure previously put in place to support planned growth.

Excluding a one-time gain of \$164,300 related to a distribution agreement upset fee, the first quarter 2005 net loss was \$377,352. Excluding the one-time gain of \$495,000 associated with the implementation of the new distribution agreement and the \$98,000 expense associated with the closure of the skin care manufacturing facility, the second quarter 2005 net loss was \$238,816. In the third quarter 2005, excluding additional skin care manufacturing costs of \$8,000, the Company generated a profit of \$51,105. Adjusting for these one-time items, the loss for the first nine months of 2005 was \$565,063 versus \$11,763, as reported. Notwithstanding the benefit of improving quarterly performance and the Canadian distribution agreement on liquidity, this performance continues to put pressure on the Company's overall liquidity. In response, the Company will continue to focus on, and take the steps necessary to accelerate, sales growth while properly aligning operating expenses with expected revenues.

On January 9, 2004, the Company purchased the Kimberly-Clark Corporation wound care business for total consideration of \$1,942,797. The consideration consisted of cash of \$376,797 and a seller financed, non-interest bearing promissory note due on or before December 31, 2004 of \$1,566,000. The cash outlay consisted of \$300,100 paid at closing and \$76,697 for acquisition related costs. The equipment purchased was installed in a newly renovated area in the Company's manufacturing facility in Toronto, Canada that was completed in August 2004. The cost to transfer, install and validate the equipment was approximately \$680,000. The promissory note was paid in full on December 30, 2004 using restricted cash on deposit with the U.S. lender and available line capacity.

On February 25, 2004, the Company closed a private offering of 2,057,145 shares of its common stock at a price of \$1.05 per share. Offering proceeds were used to fund the acquisition of the Kimberly-Clark Corporation wound care business and for general working capital purposes. Offering proceeds of \$1,961,797, net of offering expenses of \$198,203, were received.

On September 24, 2004, the Company settled litigation brought against it and its wholly owned Canadian subsidiary by a former executive relative to the executive's termination of employment. Pursuant to the settlement, the Company agreed to pay the sum of \$269,500 over a period of seven months and extend the expiration date of previously granted options to purchase 500,000 shares of the Company's common stock at \$0.50 per share from May 9, 2004 to September 30, 2006. The settlement costs, together with estimated other costs associated with the termination aggregating \$301,600, were charged against the reserve established in March 2004 to cover the estimated cost of the litigation. The balance due the former employee was fully paid as of April 2005.

In 2004, the Company entered into operating and capital leases totaling approximately \$4,222,000 in commitments through 2012, with terms ranging from three to five years, relative to the following: extension of the Canada manufacturing facility lease in the amount of \$1,902,000, lease for the new U.S. distribution center in the amount of \$1,118,000, Canada distribution and U.S. manufacturing facility extensions in the amount of \$903,000 and U.S. distribution center equipment and upgrades to the Company-wide telecommunications and information technology equipment in the amount of \$299,000. No further significant lease obligations are anticipated in the foreseeable future.

Index

On February 8, 2005, the Company closed a private offering of 2,760,000 units at \$0.50 per unit, each unit consisting of one share of the Company's common stock and one four-year series G warrant to purchase one share of common stock at a price of \$1.05. Total offering proceeds of \$1,220,666, net of \$159,334 in offering expenses, were used for working capital. The offering was initiated in December 2004. In 2004, the

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Company sold 1,555,000 units and received offering proceeds of \$681,359, net of \$78,641 in offering expenses. In 2005, the Company sold 1,205,000 units and received offering proceeds of \$539,307, net of \$80,693 in offering expenses.

In 2004, the Company's exclusive distribution agreement for certain catheter fasteners expired and was not renewed by the manufacturer. In accordance with the Company's distribution agreement with a major customer for the fasteners, if the customer subsequently enters into an agreement with the manufacturer to distribute these products, then the customer would be required to pay the Company an upset fee of \$200,000 in forty-eight monthly installments of \$4,167. As of January 2005, the customer advised the Company that it had entered into an agreement with the manufacturer to distribute the catheter fasteners and that it was liable for payment of the upset fee. In January 2005, the Company discounted the future cash flow stream associated with the payment of the upset fee and recognized a gain of \$164,300.

On May 9, 2005 the Company entered into a five-year agreement expiring May 1, 2010 with a Canadian company to serve as the exclusive distributor of its products in Canada. Effective June 1, 2005 the distributor assumed responsibility for customer service, product delivery and maintenance and warehousing of sufficient inventory to meet order fulfillment requirements. With respect to sales made by the distributor to the Company's contract customers in its capacity as a servicing agent, the Company will pay the distributor a distribution fee and a specified incentive for growth (as achieved). The Company will reimburse the distributor for the difference between the price paid by the distributor and the Company's contract price with its customer upon submission by the distributor of a rebate report. With respect to sales made by the distributor to its customers, the distributor's compensation will consist solely of the excess of the proceeds over the cost of the product and the Company will not be responsible for payment of any distribution fee. Further, the agreement requires the distributor to meet specified minimum sales growth targets of 15%, 12%, 12% and 12% in the first four years, together with private label product purchase targets, failing which the Company may cancel the agreement. The Company believes that the agreement will provide better service to its customers throughout Canada and greater opportunity for prospective sales and profit growth.

In connection with implementing the agreement, the Company sold to the distributor its existing inventory of saleable finished product on hand and will sell all saleable finished product it committed to manufacture prior to signing of the agreement for delivery by the Company through September 2005 at the agreed upon prices to initially stock and maintain its distribution pipeline. It is expected the Company's saleable finished product commitments will be fulfilled by October 2005 at which time the distributor will begin to receive product based upon its initial orders placed with the Company beginning in June 2005. Other than the one-time sale in May and June 2005 of its existing inventory on hand, which is estimated to represent two to two and one-half months sales, prospective sales are expected to resume historical trends affected only by existing market conditions and the growth opportunities inherent in the agreement. Given economic order quantities and normal lead times associated with the products sold to the distributor, it is expected that a two to three month safety stock will be required prospectively by the distributor to maintain required customer service requirements. In addition, the Company incurred one-time costs consisting of severance and other costs to dismantle its distribution capabilities and sub-lease its distribution warehouse. A summary of the estimated one-time benefit and costs of the agreement recognized in the nine months ended September 30, 2005 is outlined below:

Net Sales	\$1,840,000
Cost of Sales	1,240,000

Gross Profit	600,000
Expenses	105,000

Pretax Income	\$ 495,000
	=====

Further, implementation of the agreement resulted in an estimated one-time positive cash flow benefit of \$2,705,000 stemming from lower receivable and inventory requirements going forward and the one-time pretax income benefit of the sale of existing saleable finished product inventory on hand to the distributor.

Index

In June 2005, the Company announced its intention to close its skin care manufacturing facility in St. Louis, Missouri and outsource the facility's production with a view to reducing overhead and improving cost competitiveness. The Company recorded a charge of \$98,000 for estimated severance and lease costs associated with the closure. The facility was closed on schedule at the end of August 2005. One-time closure related costs of approximately \$118,000 consisting of severance, lease costs, inventory write-offs and fixed asset write-offs were incurred. Ongoing estimated monthly lease and facility maintenance costs of \$7,500, net of existing committed lease cost and estimated sub-lease income through lease expiration on January 31, 2007, will be expensed as incurred.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

In June 2005, in connection with implementation of the new distribution agreement, the Company sub-leased its Canadian distribution center through June 2008 at its existing rates and terms. The sub-lessee has the right to continue leasing the facility after June 2008 on a month-to-month basis with the Company's approval or extend the lease term for up to two additional years. The Company's lease expires August 2009. Total payments under the sub-lease agreement through June 2008 aggregate approximately \$360,000.

Cash Flow

At September 30, 2005 and December 31, 2004, the Company had cash and cash equivalents on hand of \$624,221 and \$46,508, respectively. The \$577,713 increase represents a timing difference that results from net cash provided by operating activities of \$2,010,264 partially offset by net cash used in financing activities of \$1,388,666, net cash used in investing activities of \$100,372 and cash provided as a result of exchange rate changes of \$56,487. Subject to constraints surrounding the movement of cash between legal entities, the Company's objective is to maintain minimum cash balances on hand while using available funds to pay down its outstanding line of credit balances.

Net cash provided by operating activities stems from an estimated \$2,705,000 positive cash infusion associated with implementation of the Canadian distribution agreement in the second quarter 2005 partially offset by estimated cash used in ongoing operations of \$704,000 (exclusive of a one-time distribution upset fee gain of \$164,300 and the \$118,000 estimated cost of closing the skin care manufacturing facility). Of the estimated \$704,000 cash used in operations, approximately \$217,000 represented cash provided (net losses less non cash items) and the balance of approximately \$921,000 represented cash used from the net change in operating assets and liabilities. Higher receivables, replenishment of lower than normal inventory levels for several key products and the pay down of outstanding payables and accrued liabilities afforded by the improved cash flow were the major drivers behind the net change in ongoing operating assets and liabilities. Cash provided by operations of approximately \$23,000 related to pay down of the distribution upset fee and cash outflows associated with the skin care manufacturing closure also contributed.

Net cash used in financing activities principally reflects the use of the funds generated from operating activities to pay down the Company's outstanding line of credit balance by \$1,433,934. Other uses pertain to the debt repayment of \$377,449, including, in addition to normal scheduled payments, a one-time payment of \$200,000 in January 2005 related to the payoff of the outstanding standby letter of credit issued by the U.S. lender in favor of the Company's Canadian lender as additional security for the Company's credit facility and deferred financing costs of \$116,590 related to refinancing the U.S. line of credit in January 2005. Partially offsetting these cash uses were net proceeds of \$539,307 from the sale of common stock in the first quarter 2005.

Net cash used in investing activities of \$100,372 reflects modest capital investment of \$136,001 consistent with the Company's plan to limit capital expenditures to that necessary to continue running the business or generate an above average return until operational performance improves, less proceeds from the sale of excess equipment.

Working Capital

Working capital increased \$412,390, or 14.5%, at September 30, 2005 to \$3,261,986 from \$2,849,596 at December 31, 2004. The increase reflects the net impact of the cash inflows and outflows outlined in the Cash Flow section above.

Index

Financing Arrangements - United States

On January 31, 2005, the Company entered into a three-year revolving credit facility agreement (the "New Agreement") with a new U.S. lender for a maximum principal amount of \$2,000,000. The New Agreement replaces a \$2,000,000 revolving credit facility that expired on January 31, 2005 with the previous U.S. lender. At January 31, 2005, maximum potential advances under the New Agreement were approximately \$1,700,000. On January 31, 2005, the Company applied advances of approximately \$1,300,000 under the New Agreement in satisfaction of the prior U.S. lender's outstanding obligations. Future advances will be utilized to fund strategic initiatives and general working capital requirements. The Company incurred loan origination and legal fees of approximately \$147,300 in connection with the implementation of the New Agreement. These fees have been deferred and are being amortized to interest expense over the three-year term of the New Agreement.

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

The Company may request advances under the New Agreement up to the value of 85% of eligible receivables (as defined) and 55% of eligible inventory (as defined). Interest on outstanding advances is payable monthly in arrears at the prime rate (as defined) plus 2.5%, but not less than 7.5% per annum. At September 30, 2005, the effective interest rate was 9.10%. In addition, the Company pays a monthly collateral management fee at the rate of 1.5% per annum upon the daily average amount of advances outstanding and a monthly unused line fee of 0.5% per annum upon the difference between the daily average amount of advances outstanding and \$2,000,000. Outstanding advances are secured by all of the Company's existing and after-acquired tangible and intangible U.S. assets. In addition, the Company has accorded the new U.S. lender its guarantee of payment together with a second lien security interest in the assets of the Company's wholly owned Canadian subsidiary. The new U.S. lender has agreed not to exercise its rights under its second lien security interest and guarantee against the Canadian assets without the Canadian lender's approval.

Maximum potential advances under the New Agreement at September 30, 2005 were \$1,800,000. Advances outstanding against the line were \$1,361,772 at September 30, 2005, leaving an additional \$438,228 available for borrowing.

Over the term of the New Agreement, the Company has agreed to comply with the following covenants as measured at the end of each month for the average of the three most recent calendar months based upon its consolidated operating results: a) maintain EBITDA (earnings before interest, taxes, depreciation and amortization) in the range of negative \$300,000 (as of January 31, 2005) transitioning to positive \$600,000 (post December 31, 2005) and (b) maintain its fixed charge ratio (EBITDA divided by the sum of debt service, capital expenditures, income taxes and dividends) in the range of 1.0 to 1.0 (as of January 31, 2005) to 1.25 to 1.0 (post December 31, 2005). In addition, as it pertains to the Company's U.S. operations, cash collections may not be less than \$800,000 for each calendar month through June 30, 2005 and \$900,000 for each calendar month thereafter, and at all times the Company's cash on hand (including unused borrowing capacity under the New Agreement) must not be less than \$200,000. Additional covenants governing permitted indebtedness, liens, payments of dividends and protection of collateral are included in the New Agreement.

Based upon consolidated operating results for March and April 2005, the Company was out of compliance with its EBITDA and fixed charge ratio covenant under the New Agreement. The U.S. lender agreed to waive these covenant violations. Effective June 30, 2005, the Company and the U.S. lender agreed to prospectively amend the Company's monthly minimum EBITDA and fixed charge ratio covenants to better align these covenants with expected performance. The Company incurred fees of \$10,000 associated with the granting of the covenant amendments. Based upon consolidated operating results for September 2005, the Company was out of compliance with its EBITDA covenant. The U.S. lender agreed to waive the covenant violation for September 2005 and to work with the Company to evaluate the need for amending the existing covenants going forward. The Company expects to, but cannot assure that it will, maintain compliance with all applicable loan covenants in the future.

The Company may terminate the New Agreement at any time after January 31, 2006 by paying all outstanding indebtedness and any other payments due the U.S. lender and paying the U.S. lender a yield maintenance based early termination fee equal to the product of: (a) the effective yield on the facility for the six months prior to termination (expressed as an annual percentage rate), (b) \$2,000,000, and (c) the quotient of the months remaining in the original term of the New Agreement divided by 12.

Index

On January 13, 2005, in connection with the refinancing of the U.S. line of credit, the Company paid off and cancelled the outstanding irrevocable standby letter of credit issued by the U.S. lender in the amount of \$200,000 held by the Company's Canadian lender as additional security for its credit facility. The \$200,000 paid to the Canadian lender was applied as a permanent principal reduction against the principal amount due in 2007 associated with the Company's outstanding term loan with the Canadian lender. Subsequently, on January 31, 2005, the Canadian lender agreed as part of refinancing of the U.S. line of credit to retain its second lien security interest and guarantee position against the Company's U.S. assets and not to exercise its rights under its second lien security interest and guarantee against the U.S. assets without the new U.S. lender's approval.

On December 30, 2004, the Company paid off the promissory note due Kimberly-Clark Corporation in the amount of \$1,566,000 using the restricted cash on deposit with the U.S. lender of \$1,000,000 and available line capacity. In addition, the irrevocable standby letter of credit issued on behalf of the Kimberly-Clark Corporation in the amount of \$1,566,000 was cancelled. In connection with this transaction, the maximum principal amount of the line was reduced from \$4,000,000 to \$2,000,000. All other terms of the prior agreement remained in full force and effect.

On January 30, 2004, the Company entered into a modified one year line of credit agreement with its previous U.S. lender (the prior agreement). The maximum principal amount of the line increased to \$4,000,000 from \$3,000,000. In connection with entering into this line of credit agreement, the Company deposited \$1,000,000 of cash in a restricted account with the U.S. lender and the U.S. lender issued an irrevocable standby letter of credit on the Company's behalf for the benefit of Kimberly-Clark Corporation in the amount of \$1,566,000. Advances were used to fund strategic initiatives and for general working capital purposes. Estimated maximum potential advances under the

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

prior agreement were equal to the lesser of (A) \$4,000,000 or (B) the sum of (i) 80% of eligible receivables (as defined), (ii) 50% of eligible inventory (as defined), (iii) an amount equal to the immediate liquidation value of funds deposited with the U.S. lender in a restricted account as security for any letters of credit extended by the lender on the Company's behalf up to \$1,000,000, less the aggregate amount of any outstanding letters of credit issued by the U.S. lender.

Outstanding advances were secured by all tangible and intangible assets of the Company's U.S. operations. Over the term of the Agreement, the Company agreed to maintain its fixed charge ratio (as defined) at not less than 1.25:1.0 as measured quarterly on a twelve month trailing basis. Additional covenants governing permitted indebtedness, changes in entity status, purchases of securities and protection of collateral were included in the Agreement. Ongoing operating losses resulted in the Company being out of compliance with certain of its U.S. line of credit covenants at March 31, June 30 and September 30, 2004. In return for a commitment to secure alternative financing for its U.S. obligations prior to the January 31, 2005 maturity date of the prior agreement, the U.S. lender agreed to waive the Company's prior covenant violations and to maintain the line of credit until maturity thereof. The Company incurred waiver fees of \$7,500 and agreed to an increase in the rate of interest payable under the line. All other terms of the prior agreement were maintained in full force and effect.

Financing Arrangements - Canada

The Company is in the midst of renewing its revolving credit facility with its Canadian lender (the Canadian Agreement). It is expected that the renewal will be finalized in the near future. In light of the favorable impact of the new distribution agreement on Derma Sciences Canada Inc. borrowing requirements, the maximum principal amount of the line will be reduced to \$653,000 (\$800,000 Canadian) in line with its prospective maximum borrowing capacity. No other significant changes to the terms of the Canadian Agreement are expected.

In September 2004, the Company finalized the annual renewal of the Canadian Agreement for a maximum principal amount of \$1,795,000 (\$2,200,000 Canadian). The Company's wholly owned Canadian subsidiary, Derma Sciences Canada Inc., may request advances under the Canadian Agreement up to the value of 75% of eligible receivables (as defined) plus the lesser of \$946,000 (\$1,100,000 Canadian) or 40% of eligible inventory (as defined), less priority claims. Interest on outstanding advances is payable monthly in arrears at prime rate (as defined) plus 1.0%, or 5.50% for Canadian dollar advances and 8.25% for U.S. dollar denominated advances at September 30, 2005. Outstanding advances are secured by all tangible and intangible assets of Derma Sciences Canada Inc. In addition, the Company has accorded the Canadian lender its guarantee of payment together with a second lien security interest in the Company's assets located in the U.S. Maximum potential advances under the Canadian Agreement at September 30, 2005 were \$520,000. Advances outstanding against the Canadian Agreement were zero at September 30, 2005, leaving an additional \$520,000 available for borrowing.

Index

Over the term of the Canadian Agreement, the Company has agreed to comply with a number of financial covenants governing minimum working capital, current ratios, tangible net worth, interest coverage, total indebtedness to tangible net worth and total indebtedness to adjusted pre-tax earnings. Additional covenants governing permitted indebtedness, liens, payments of dividends and protection of collateral are included in the Canadian Agreement. In the event of a margin deficiency (as defined) or covenant violation, the Company is required to advance up to an additional \$430,000 (\$500,000 Canadian) of working capital to Derma Sciences Canada Inc. in order to correct the deficiency. This additional working capital may be repaid to the Company 45 days after the margin deficiency or covenant violation has been cured upon the condition that such repayment not result in a margin deficiency, covenant violation or any other event of default.

At June 30, 2005, Derma Sciences Canada was out of compliance with its minimum working capital covenant. The violation occurred due to the adverse impact on Derma Sciences Canada's working capital associated with accelerating repayment of an inter company loan and extending credit terms on regular inter company trade receivables to the U.S. parent in June 2005 in an effort to optimize the use of the positive cash flow associated with implementing the new distribution agreement in Canada. The violation has been corrected and the Canadian lender agreed to waive the covenant violation at June 30, 2005.

Losses principally associated with the write-off of obsolete equipment, employee termination costs and a revamping of manufacturing operations in Toronto resulted in Derma Sciences Canada being out of compliance with certain of its income based loan covenants that are measured annually at December 31, 2004. The Canadian lender agreed to waive the covenant violations at December 31, 2004. The Company incurred fees of \$12,000 associated with the granting of the waivers in 2004. The Company expects to, but cannot assure that it will, maintain compliance with all applicable loan covenants in the future.

Prospective Assessment

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

The Company seeks to increase sales and gross margins by increasing sales of contracted private label products and focusing on organic growth of its core product lines in the U.S. and Canada. The recently signed exclusive distribution agreement in Canada represents a significant opportunity for sales and profit growth in the foreseeable future. In the first nine months of 2005, the Company began to realize the benefit of lower basic wound care product costs negotiated in mid-2004 and lower advanced wound care costs associated with the commencement in late 2004 of in-house manufacture of a wide range of products using the equipment purchased from Kimberly-Clark Corporation. Further, over the balance of 2005, the Company expects to benefit from the non-recurrence of the one-time costs incurred in the last half of 2004 associated with bringing the manufacture of the Kimberly-Clark products on line. Steps have been taken to reduce operating expenses wherever possible and to limit incremental spending in this area to that necessary to support existing operations. Operational expenditures will continue to be closely monitored and adjusted as necessary to ensure alignment with expected sales and margin growth.

Capital spending has been, and will continue to be, limited to that necessary to maintain current operations until the Company's financial performance improves. The Company will continue to closely monitor inventory levels with the objective of reducing its investment in inventory wherever possible.

The Company believes that available funds from expected improving operations and available lines of credit will be sufficient to satisfy the Company's liquidity requirements for the foreseeable future. If need be, the Company expects that it would be able to secure additional equity funding to improve liquidity. In addition, the Company will continue to evaluate external opportunities to leverage its core capabilities for growth.

The Common Stock of the Company is traded on the OTC Bulletin Board under the symbol DSCI.OB. The Common Stock is also traded on the Boston and Pacific Stock Exchanges under the symbol DMS. The Company has paid no cash dividends in respect of its Common Stock and does not intend to pay cash dividends in the foreseeable future.

Additional Financial Information

Forward Looking Statements

Statements that are not historical facts, including statements about the Company's confidence, strategies, expectations about new or existing products, technologies, opportunities, market demand or acceptance of new or existing products are forward-looking statements that involve risks and uncertainties. These uncertainties include, but are not limited to, product demand and market acceptance risk, impact of competitive products and prices, product development, commercialization or technological delays or difficulties, and trade, legal, social, financial and economic risks.

Critical Accounting Policies

Estimates and assumptions are required in the determination of sales deductions for trade rebates, discounts and allowances. Significant estimates and assumptions are also required in determining the appropriateness of amortization periods for identifiable intangible assets, the potential impairment of goodwill and the valuation of inventory. Some of these judgments can be subjective and complex, and, consequently, actual results may differ from these estimates. For any individual estimate or assumption made by the Company, there may also be other reasonable estimates or assumptions. The Company believes, however, that given current facts and circumstances, it is unlikely that applying any such other reasonable judgment would cause a material adverse effect on the consolidated results of operations, financial position or cash flows for the periods represented in this section. The Company's most critical accounting policies are described below:

Revenue Recognition and Adjustments to Revenue

Revenue is recognized when product is shipped and title passes to the customer and collectability is reasonably assured. When the Company recognizes revenue from the sale of its products, it simultaneously adjusts revenue for estimated trade rebates. A trade rebate represents the difference between the invoice price to the wholesaler and the indirect customer's contract price. These rebates are estimated based on historical experience, estimated future trends, estimated customer inventory levels, current contract sales terms with wholesale and indirect customers and other competitive factors. If the assumptions used to calculate these rebates do not appropriately reflect future activity, the

Edgar Filing: DERMA SCIENCES, INC. - Form 10QSB

Company's financial position, results of operations and cash flows could be impacted. The Company continually monitors the factors that influence these rebates and make adjustments as necessary.

Goodwill

At September 30, 2005, the Company's skin care segment had \$1,110,967 of goodwill. The Company tests goodwill for impairment in the fourth quarter of each year or when impairment indicators are present. The process of evaluating the potential impairment of goodwill is highly subjective and requires significant judgments and assumptions in estimating future cash flows to determine the fair value of the reporting unit. These assumptions include future growth rates, discount factors, future tax rates and other factors. The Company's cash flow forecasts are based on assumptions that are consistent with the plans and estimates used to manage the underlying business. In addition, the Company makes certain judgments about allocating shared assets to the balance sheet for this segment. If the expected cash flows are not realized, impairment losses may be recorded in the future.

Inventory

The Company writes down the value of inventory by the estimate of the difference between the cost of the inventory and its net realizable value. The estimate takes into account projected sales of the inventory on hand and the age of the inventory in stock. If actual future demand or market conditions are less favorable than those projected by management, additional inventory write-downs may be required. The provision for the write-down of inventory is recorded in cost of sales.

Item 3. CONTROLS AND PROCEDURES

The Company's management, with the participation of the Company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the Company's disclosure controls and procedures as of September 30, 2005. Based on this evaluation, the Company's Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective for gathering, analyzing and disclosing the information the Company is required to disclose in the reports it files under the Securities Exchange Act of 1934, within the time periods specified in the SEC's rules and forms.

During the three months ended September 30, 2005, there was no change in the Company's internal controls over financial reporting that materially affected, or is reasonably likely to materially affect, the Company's internal controls over financial reporting.
