Item 8.01 Other Events.

Chemtura Corporation announced today that it has rescinded those parts of a Global Settlement Agreement covering rubber chemicals and EPDM that were intended to resolve consolidated direct purchaser class action lawsuits pending in the United States District Courts in the Northern District of California and the District of Connecticut. As announced last January, the Company reserved the right to rescind all or part of the Global Settlement Agreement based on the number of members of the applicable classes who exercised their opt out rights. As a result of the opt outs in rubber chemicals and EPDM, the Company is currently negotiating settlements directly with the largest claimants in those actions. Chemtura does not intend to adjust the reserves previously established with respect to these lawsuits at this time.

Under the Global Settlement Agreement, Chemtura agreed to pay a total of \$97 million, consisting of \$62 million with respect to rubber chemicals, \$30 million with respect to EPDM and \$5 million with respect to nitrile rubber. The nitrile rubber portion of the Global Settlement Agreement has been approved by the United States District Court for the Western District of Pennsylvania.

Chemtura also announced that the Company has reached agreements with class claimants in Canada covering direct and indirect purchasers of EPDM for approximately USD \$3.9 million and is working toward a resolution of similar claims with respect to rubber chemicals, urethanes and urethane chemicals. These agreements will be subject to court approval and notice to class members, with opt out options for potential class members and a recovery by the Company of a portion of the settlement funds with respect to members of the classes who choose to opt out of the settlements.

Chemtura cannot predict the outcome of these class actions. It will continue to seek cost-effective resolutions of these claims and others pending or hereafter asserted against Chemtura or any of its subsidiaries; however, the resolution of such claims could have a material adverse effect on the Company's financial condition, results of operations and prospects.
