Bellevue, August 10, 2006

T-MOBILE USA REPORTS SECOND QUARTER 2006 RESULTS

- **613,000 net new customers added in the quarter, of which 507,000 were new postpay customers**
- **Stable postpay ARPU \$55, up from \$54 in the first quarter of 2006 and unchanged compared to the second quarter of 2005**
- **\$3.6 billion in service revenues in the second quarter of 2006, up 18% from the second quarter of 2005**
- **\$1.2 billion in Operating Income Before Depreciation and Amortization (OIBDA) in the quarter, a 12% increase over the second quarter of 2005**
- **T-Mobile USA ranked highest, in a tie, in the semi-annual J.D. Power and Associates Wireless Customer Care Performance Study and ranked top in VocaLabs satisfaction study on the quality of customer service**
- **Continued investment in network quality over 960 new cell sites on air during the quarter**

In the second quarter of 2006 T-Mobile USA added 613,000 net new customers, down from 972,000 in the second quarter of 2005, and the 1.04 million net customers added in the first quarter of 2006. Postpay customers made up 83% of the second quarter customer growth, up from 70% in the first quarter of 2006, and comprised 84% of T-Mobile USA's total customer base at June 30, 2006.

In the second quarter, we followed through on a long-term planned shift in our business aimed at investing in longer relationships with customers, said Robert Dotson, President and Chief Executive Officer, T-Mobile USA. One of the major changes executed was a move to 2-year service agreements. While this

2

change resulted in lower net add growth in April during the transition, by June, we finished with one of our best months of top-line sales since the holidays. Today, we are now well positioned in our drive to reduce customer churn to even lower levels while ensuring our customers continue to Get More from their T-Mobile service. Also encouraging during the quarter was the continued strong growth in our sales of converged devices. We have now surpassed the milestone of 800,000 BlackBerry users, with an increase of 51,000 in the second quarter of 2006, equivalent to 10% of the net growth in postpay customers during the quarter.

Rene Obermann, CEO of T-Mobile International and member of the Board of Management of Deutsche Telekom remarked: T-Mobile USA has delivered quality growth for the business quarter after quarter, year after year. We remain very optimistic about the future growth opportunities for T-Mobile in the U.S. market. We are also encouraged by the U.S. team's continued success in delivering consistently strong financial metrics.

T-Mobile USA reported OIBDA of \$1.21 billion in the second quarter of 2006, up from \$1.10 billion in the first quarter of 2006 and up from \$1.08 billion in the second quarter of 2005. T-Mobile USA's net income for the second quarter of 2006 was \$233 million, down from \$241 million in the first quarter of 2006 and \$387 million in the second quarter of 2005. The decrease in net income, despite higher operating income, is primarily due to higher income tax expense.

T-Mobile USA service revenues, consisting of postpay, prepaid, roaming and other service revenues rose to \$3.59 billion in the second quarter of 2006, up from \$3.39 billion in the first quarter of 2006 and \$3.04 billion in the second quarter of 2005. The increases are primarily due to growth in the number of postpay customers. Other revenues were \$177 million in the second quarter of

2006, down from \$198 million in the first quarter of 2006 and \$269 million in the second quarter of 2005. Other revenues include Wi-Fi revenues, co-location rental income, and wholesale revenues from the usage of our network in California, Nevada, and New York by customers of Cingular Wireless LLC (Cingular). The sequential and year on year decrease in other revenues reflects the ongoing migration of Cingular s customers to their network following the dissolution of our network sharing venture in early 2005. This migration also contributed to the slight reduction in OIBDA margin compared to the second quarter of 2005. Total revenues, including service, equipment, and other revenues were \$4.21 billion in the second quarter of 2006, up from \$4.04 billion in the first quarter of 2006 and \$3.61 billion in the second quarter of 2005.

Average Revenue Per User (ARPU as defined in note 1 to the Selected Data, below) was \$52 in the second quarter of 2006, up from \$51 in the first quarter of 2006 and down from \$54 in the second quarter of 2005. Postpay ARPU was \$55 in the second quarter of 2006, up from \$54 in the first quarter of 2006 and unchanged compared to the second quarter of 2005. The sequential increase in both blended and postpay ARPU related primarily to continued data revenue growth and seasonally strong roaming revenues. The fall in blended ARPU year on year is due to a higher proportion of prepaid customers in the customer base in 2006 and the decrease in prepaid ARPU.

Data services revenue from postpay and prepaid customers continued to grow, reaching a total of \$390 million in the second quarter of 2006. Data revenues, which are a component of service revenues, represented 10.9% of blended ARPU, or \$5.65 per customer, in the second quarter of 2006, compared to 10.1%, or \$5.12, in the first quarter of 2006 and 7.5%, or \$4.03, in the second quarter of 2005. T-Mobile USA s data offering was further strengthened during the quarter with the launch of the Sidekick 3 and BlackBerry 8700g. The number

of BlackBerry users rose above 800,000 by the end of the quarter, with 51,000 net new users. Continued strong growth in messaging (both SMS and MMS) helped contribute to the increase in data ARPU. The total number of SMS and MMS messages increased to 7.9 billion in the second quarter of 2006, compared to 6.9 billion in the first quarter of 2006 and 4.1 billion in the second quarter of 2005.

Postpay churn declined to 2.2% in the second quarter of 2006 compared to 2.3% in the second quarter of 2005 and rose slightly from 2.1% in the first quarter of 2006. Prepaid churn was 6.6% in the second quarter of 2006, compared to 5.8% in the first quarter of 2006 and 6.4% in the second quarter of 2005. Blended churn, including both postpay and prepaid customers, was 2.9% in the second quarter of 2006, up from 2.7% in the first quarter of 2006 and 2.8% in the second quarter of 2005. Compared to the second quarter of 2005, blended churn increased due to the higher proportion of prepaid customers in the total customer base.

The average cost of acquiring a customer, Cost Per Gross Add (CPGA , as defined in note 3 to the Selected Data, below) was \$322 in the second quarter of 2006, up from \$275 in the first quarter of 2006 and \$310 in the second quarter of 2005. Compared to the first quarter of 2006 the increase in CPGA is primarily due to higher advertising costs, fewer gross adds due largely to the move to two year service agreements, and the change in mix of gross adds towards postpay.

The average cash cost of serving customers, Cash Cost Per User (CCPU , as defined in note 2 to the Selected Data, below), was \$24.96 per customer per month in the second quarter of 2006, down from \$25.66 in the first quarter of 2006 and \$25.66 in the second quarter of 2005. The sequential decrease in

CCPU compared to the first quarter of 2006 was primarily due to a fall in the average upgrade handset subsidy loss.

Capital expenditures were \$593 million in the second quarter of 2006, compared with \$770 million in the first quarter of 2006 and \$815 million in the second quarter of 2005. As part of its ongoing commitment to network coverage and quality, T-Mobile USA added approximately 960 new cell sites in the second quarter of 2006, bringing the total number of cell sites to over 34,500.

T-Mobile USA's industry-leading commitment to customer care and customer satisfaction was further reinforced and validated during the quarter as T-Mobile achieved the top ranking in the semi-annual J.D. Power and Associates Wireless Customer Care Performance Study for the fourth consecutive reporting period and also topped the VocaLabs satisfaction study on the quality of customer service among the largest wireless phone companies. These successes build upon other recent achievements – earlier this year, T-Mobile USA topped the J.D. Power and Associates 2006 Wireless Regional Customer Satisfaction Index Study in all six regions and the J.D. Power and Associates Wireless Customer Care Performance Study, each for the third-straight reporting period.

This press release includes non-GAAP financial measures. The non-GAAP financial measures should be considered in addition to, but not as a substitute for, the information provided in accordance with GAAP. Reconciliations from the non-GAAP financial measures to the most directly comparable GAAP financial measures are provided below following Selected Data and the financial statements.

Edgar Filing: DEUTSCHE TELEKOM AG - Form 6-K

T-Mobile USA, Inc. (T-Mobile USA) is the U.S. operation of T-Mobile International AG & Co. KG (T-Mobile International), the mobile communications subsidiary of Deutsche Telekom AG (Deutsche Telekom) (NYSE: DT). In order to provide comparability with the results of other U.S. wireless carriers all financial amounts are in US dollars and are based on accounting principles generally accepted in the United States (GAAP). T-Mobile USA results are included in the consolidated results of Deutsche Telekom, but differ from the information contained herein as Deutsche Telekom reports financial results in accordance with International Financial Reporting Standards (IFRS).

Since all companies do not calculate these figures in the same manner, the information contained in this press release may not be comparable to similarly titled measures reported by other companies.

1 Average Revenue Per User (ARPU) represents the average monthly service revenue we earn from our customers. ARPU is calculated by dividing service revenues for the specified period by the average customers during the period, and further dividing by the number of months in the period. We believe ARPU provides management with useful information to evaluate the recurring revenues generated from our customer base.

Service revenues include postpay, prepaid, and roaming and other service revenues, and do not include equipment sales and other revenues. Revenues from our Wi-Fi business, co-

location rental income, and revenues for network usage by Cingular customers who have not yet transitioned from the former joint venture networks in California, Nevada, and New York, are therefore not included in ARPU. The joint venture was terminated at the beginning of 2005.

2 The average cash cost of serving customers, or Cash Cost Per User (CCPU) is a non-GAAP financial measure and includes all network and general and administrative costs as well as the subsidy loss unrelated to customer acquisition. Subsidy loss unrelated to customer acquisition includes upgrade handset costs offset by upgrade equipment revenues and other related direct costs. This measure is calculated as a per month average by dividing the total costs for the specified period by the average total customers during the period and further dividing by the number of months in the period. We believe that CCPU, which is a measure of the costs of serving a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.

3 Cost Per Gross Add (CPGA) is a non-GAAP financial measure and is calculated by dividing the costs of acquiring a new customer, consisting of customer acquisition costs plus the subsidy loss related to customer acquisition for the specified period, by gross customers added during the period. Subsidy loss related to customer acquisition consists of costs directly incurred to acquire new customers such as handset and accessory costs offset by related revenues. We believe that CPGA, which is a measure of the cost of acquiring a customer, provides relevant and useful information and is used by our management to evaluate the operating performance of our business.

4 OIBDA is a non-GAAP financial measure, which we define as operating income before depreciation and amortization. In a capital-intensive industry such as wireless telecommunications, we believe OIBDA, as well as the associated percentage margin calculation, to be meaningful measures of our operating performance. OIBDA should not be construed as an alternative to operating income or net income as determined in accordance with GAAP, as an alternative to cash flows from operating activities as determined in accordance with GAAP or as a measure of liquidity. We use OIBDA as an integral part of our planning and internal financial reporting processes, to evaluate the performance of our senior management and to compare our performance with that of many of our competitors. We believe that operating income is the financial measure calculated and presented in accordance with GAAP that is the most directly comparable to OIBDA.

5 OIBDA margin is a non-GAAP financial measure, which we define as OIBDA (as described in note 4 above) divided by total revenues less equipment sales.

About T-Mobile USA:

Based in Bellevue, WA, T-Mobile USA, Inc. is a member of the T-Mobile International group, the mobile telecommunications subsidiary of Deutsche Telekom AG (NYSE: DT).

T-Mobile USA's GSM/GPRS 1900 voice and data network in the United States reaches over 275 million people, including roaming and other agreements. In addition, T-Mobile USA operates the largest carrier-owned Wi-Fi (802.11b) wireless broadband (WLAN) network in the United States, available in more than 7,800 public access locations including Starbucks coffeehouses, Kinko's copy shops, Borders Books and Music, Hyatt and Accor hotels, selected airports, American Airlines Admirals Clubs, United Red Carpet Clubs, US Airways Clubs and Delta Air Lines Clubs. T-Mobile USA is committed to providing the best value in wireless service through its GET MORE promise to provide customers with more minutes, more features and more service. For more information, visit the company website at www.t-mobile.com.

About T-Mobile International:

T-Mobile International is one of the world's leading companies in mobile communications. As one of Deutsche Telekom's (NYSE: DT) three strategic business units, T-Mobile concentrates on the key markets in Europe and the United States.

By the end of the second quarter of 2006, more than 90 million mobile customers were served by companies of the Deutsche Telekom group, all over a common technology platform based on GSM, the world's most widely used digital wireless standard. This also makes T-Mobile the only mobile communications provider with a transatlantic service.

For more information about T-Mobile International, please visit www.t-mobile.net. For further information on Deutsche Telekom, please visit www.telekom.de/investor-relations.
