DUKE REALTY CORPORATION
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(Unaudited)

1. General Basis of Presentation

The interim condensed consolidated financial statements included herein have been prepared by Duke Realty Corporation (the Company) without audit (except for the Balance Sheet as of December 31, 2005). The financial statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and in accordance with Rule 10-01 of Regulation S-X of the Securities Exchange Act of 1934. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair presentation have been included. These financial statements should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations included herein and the consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2005.

Our rental operations are conducted through Duke Realty Limited Partnership (DRLP). Approximately 91.1% of the common partnership interests of DRLP (Units) were owned by us at September 30, 2006. The remaining Units in DRLP are redeemable for shares of our common stock on a one-to-one basis. We conduct our Service Operations through Duke Realty Services LLC and Duke Realty Services Limited Partnership, both of which we are the sole general partner. We also conduct our Service Operations through Duke Construction Limited Partnership, which is effectively 100% owned by DRLP. The condensed consolidated financial statements include our accounts and our majority-owned or controlled subsidiaries. In this Quarterly Report on Form 10-Q (this Report), the terms we, us and our refer to the Company and those entities owned or controlled by the Company.

2. Reclassifications

Certain 2005 balances have been reclassified to conform to the 2006 presentation.

3. Acquisitions

In 2006, we completed the acquisition of a Washington D.C. metropolitan area portfolio of suburban office and light industrial properties (the Mark Winkler Portfolio). The assets acquired for a purchase price of approximately \$865.2 million are comprised of 32 properties with approximately 2.9 million square feet for rental, 166 acres of undeveloped land, as well as certain related assets of the Mark Winkler Company, a real estate management company. The acquisition was financed primarily through assumed mortgage loans and new borrowings (see Note 4). The assets of the Mark Winkler Portfolio related to the 32 in-service properties, consisting of \$695.9 million of real estate investments and acquired lease related intangible assets, are classified and accounted for as held-for-sale based on meeting the applicable criteria of Statement of Financial Accounting Standards No. 144, *Accounting For the Impairment or Disposal of Long-Lived Assets (SFAS 144)*. As required by SFAS 144, the results of operations of the acquired properties since the date of acquisition have been included in continuing operations, rather than discontinued operations, based on our present intention to sell the majority of our ownership interest in the properties to an entity in which we will retain a minority equity ownership interest. The allocation of purchase price based on the fair value of assets acquired is preliminary.

In the third quarter of 2006, we completed the purchase of a portfolio of industrial real estate properties in

Savannah, Georgia with the purpose of expanding our industrial real estate holdings near major port facilities. We completed a majority of the purchase in January 2006. The assets acquired for a purchase price of approximately \$196.2 million are comprised of 18 buildings with approximately 5.1 million square feet for rental as well as over 60 acres of undeveloped land. The acquisition was financed in part through assumed mortgage loans (see Note 4). The results of operations for the acquired properties since the date of acquisition have been included in continuing rental operations in our consolidated financial statements.

4. Indebtedness

We had one unsecured line of credit available as of September 30, 2006, described as follows (dollars in thousands):

Description	Borrowing Capacity	Maturity Date	Interest Rate	Outstanding Balance at September 30, 2006
Unsecured Line of Credit	\$ 1,000,000	January 2010	LIBOR + .525 %	\$ 904,000

We use this line of credit to fund development activities, acquire additional rental properties and provide working capital.

The line of credit provides us with an option to obtain borrowings from financial institutions that participate in the line, at rates lower than the stated interest rate, subject to certain restrictions. Interest rates on the amounts outstanding on the unsecured line of credit as of September 30, 2006 ranged from LIBOR + .15% to LIBOR + .525% (equal to 5.48% to 5.86% as of September 30, 2006).

The line of credit also contains financial covenants that require us to meet financial ratios and defined levels of performance, including those related to variable interest indebtedness, consolidated net worth and debt-to-market capitalization. As of September 30, 2006, we were in compliance with all covenants under our line of credit.

We took the following actions during the nine-month period ended September 30, 2006, relevant to our indebtedness:

- In January 2006, we renewed our unsecured line of credit. The new facility provides borrowing capacity up to \$1.0 billion and, subject to certain conditions, may be increased to \$1.3 billion. Under the new facility, which replaced the previous unsecured line of credit agreement, the interest rate was reduced, the borrowing capacity was increased by \$500.0 million and the maturity date was extended to January 25, 2010.
- To finance the acquisition of the Mark Winkler Portfolio (see Note 3), we obtained a \$700.0 million term loan with an interest rate of LIBOR + .525%, secured by certain of the acquired real estate properties. This term loan was paid in full in August 2006 with proceeds from the issuance of senior unsecured debt as described below.
- In conjunction with our real estate acquisitions (see Note 3), we assumed \$221.6 million of mortgage loans, of which we received \$10.5 million of proceeds directly. The assumed mortgage loans bear interest at rates ranging between 5.55% and 8.50% and have maturities ranging between 2011 and 2026. An adjustment of \$6.3 million was recorded to increase the assumed loans to fair value.
- In March 2006, we issued \$150.0 million of 5.50% senior unsecured notes due in 2016. A portion of the proceeds were used to retire our \$100.0 million 6.72% unsecured notes. The remaining cash proceeds were used to fund costs associated with the issuance of the debt and to repay amounts outstanding under our line of credit.

- In August 2006, we issued \$450.0 million of 5.95% senior unsecured notes due in 2017 and \$250.0 million of 5.625% senior unsecured notes due in 2011. The proceeds from these issuances were used to pay off the \$700.0 million secured term loan that was obtained to finance the purchase of the Mark Winkler Portfolio (see Note 3).

5. Related Party Transactions

We provide property management, leasing, construction and other tenant related services to unconsolidated companies in which we have equity interests. For the nine months ended September 30, 2006 and 2005, we received management fees of \$3.3 million and \$3.6 million, leasing fees of \$2.2 million and \$3.4 million and construction and development fees of \$16.8 million and \$1.6 million, respectively, from these companies. These fees approximate market rates and we eliminated our ownership percentage of these fees in the condensed consolidated financial statements.

6. Net Income Per Common Share

Basic net income per common share is computed by dividing net income available for common shareholders by the weighted average number of common shares outstanding for the period. Diluted net income per common share is computed by dividing the sum of net income available for common shareholders and the minority interest in earnings allocable to Units not owned by us, by the sum of the weighted average number of common shares and minority Units outstanding, including any dilutive potential common shares for the period.

The following table reconciles the components of basic and diluted net income per common share for the three and nine months ended September 30, 2006 and 2005, respectively (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2006	2005	September 30, 2006	2005

Weighted average number of common shares and dilutive potential common shares	150,947	158,468	149,472	157,453

(1) One of our joint venture partners in one of our unconsolidated companies has the option to convert a portion of its ownership to common shares. The effect of this option on earnings per share is dilutive for the third quarters 2005 and 2006; therefore, conversion to common shares is included in weighted average dilutive potential common shares for both quarters.

7. Segment Reporting

We are engaged in three reportable operating segments, the first two of which consist of the ownership and rental of office and industrial real estate investments. The third segment consists of our build-to-suit for sale operations and providing various real estate services such as property management, maintenance, leasing, development and construction management to third party property owners and joint ventures (Service Operations). Our reportable segments offer different products and services and are managed separately because each segment requires different operating strategies and management expertise.

Non-segment revenue consists mainly of equity in earnings of unconsolidated companies. Segment FFO information (FFO is defined below) is calculated by subtracting operating expenses attributable to the applicable segment from segment revenues. Non-segment assets consist of corporate assets including cash, deferred financing costs and investments in unconsolidated companies. Interest expense and other non-property specific revenues and expenses are not allocated to individual segments in determining our performance measure.

We assess and measure segment operating results based upon an industry performance measure referred to as Funds From Operations (FFO), which management believes is a useful indicator of our operating performance. FFO is used by industry analysts and investors as a supplemental operating performance measure of an equity real estate investment trust (REIT) like Duke. FFO is calculated in accordance with the definition that was adopted by the Board of Governors of the National Association of Real Estate Investment Trusts (NAREIT). NAREIT created FFO as a supplemental measure of REIT operating performance that excludes historical cost depreciation, among other items, from net income determined in accordance with GAAP. FFO is a non-GAAP financial measure developed by NAREIT to compare the operating performance of REITs. The most comparable GAAP measure is net income (loss). FFO should not be considered as a substitute for net income or any other measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other companies.

Historical cost accounting for real estate assets in accordance with GAAP implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. FFO, as defined by NAREIT, represents GAAP net income (loss), excluding extraordinary items as defined under GAAP and gains or losses from sales of previously depreciated operating real estate assets, plus certain non-cash items such as real estate asset depreciation and amortization, and after similar adjustments for unconsolidated partnerships and joint ventures.

Management believes that the use of FFO, combined with the required primary GAAP presentations, improves the understanding of operating results of REITs among the investing public and makes comparisons of REIT operating results more meaningful. Management considers FFO to be a useful measure for reviewing comparative operating and financial performance (although FFO should be reviewed in conjunction with net income which remains the primary measure of performance) because by excluding gains or losses related to sales of previously depreciated operating real estate assets and excluding real estate asset depreciation and amortization, FFO provides a useful comparison of the operating performance of our real estate between periods or as compared to different companies.

In addition to revenues and FFO, we also review our recurring capital expenditures in measuring the performance of our individual Rental Operations segments. These recurring capital expenditures consist of tenant improvements, leasing commissions and building improvements. We review these expenditures to determine the costs associated with re-leasing space and maintaining the condition of our properties. Our recurring capital expenditures by segment are summarized as follows for the nine months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005

8. Discontinued Operations

We classified the operations of 257 buildings as discontinued operations in the condensed consolidated statements of operations for the three and nine months ended September 30, 2006 and 2005. These 257 buildings consist of 239 industrial properties, 17 office properties and one retail property. Of these properties, 18 were sold during the first nine months of 2006, 234 were sold during 2005 and five operating properties were classified as held-for-sale at September 30, 2006.

The following table illustrates the operations of the 257 buildings reflected in discontinued operations for the three and nine months ended September 30, 2006 and 2005, respectively (in thousands):

	Three Months Ended September 30,		Nine Months Ended September 30,

Edgar Filing: DUKE REALTY CORP - Form 10-Q

At September 30, 2006, we classified as held-for-sale, and included in discontinued operations, four industrial properties and one office property comprising approximately 852,000 square feet. Additionally, we have classified the 32 in-service properties from the Mark Winkler Portfolio (see Note 3), as well as six additional properties, as held-for-sale. However, the results of these 38 properties are included in continuing operations, as required by SFAS 144, either based on our present intention to sell the majority of our ownership interest in the properties to entities in which we will retain a minority equity ownership interest or because the results of operations for the properties are immaterial. The following table illustrates the aggregate balance sheet of the aforementioned five properties included in discontinued operations, as well as the 38 held-for-sale properties whose results are included in continuing operations at September 30, 2006 (in thousands):

	Held-for-Sale and Included in Discontinued Operations	Held-for-Sale and Included in Continuing Operations	Total
Real estate investments, net	\$ 29,662	\$ 698,734	\$ 728,396
Other assets	1,112	109,048	110,160
Assets held-for-sale	30,774	807,782	838,556
Accrued expenses	\$ 779	\$ 3,856	\$ 4,635
Other liabilities	179	5,885	6,064
Secured debt		144,423	144,423
Liabilities held-for-sale	\$ 958	\$ 154,164	\$ 155,122

We allocate interest expense to discontinued operations as permitted under Emerging Issues Task Force (EITF) Issue No. 87-24, *Allocation of Interest to Discontinued Operations*, and have included such interest expense in computing net income from discontinued operations. Interest expense allocable to discontinued operations includes interest on any debt on secured properties included in discontinued operations and an allocable share of our consolidated unsecured interest expense for unencumbered properties. The allocation of unsecured interest expense to discontinued operations was based upon the gross book value of the discontinued operations unencumbered population as it related to our entire unencumbered population.

For the nine months ended September 30, 2006 and 2005, we recorded impairment adjustments of \$576,000 and \$3.8 million, respectively. The \$576,000 impairment adjustment recorded in the nine months ended September 30, 2006 reflects the write-down of the carrying value of one industrial building, one office building and one land parcel sold in the nine months ended September 30, 2006, in addition to one industrial building that is held for sale as of September 30, 2006. The \$3.8 million impairment adjustment recorded in the nine months ended September 30, 2005 reflects the write-down of the carrying value of three office buildings, three industrial buildings and four land parcels sold at various times in 2005 and 2006.

9. Shareholders Equity

We periodically access the public equity markets to fund the development and acquisition of additional rental properties or to pay down debt. The proceeds of these offerings are contributed to DRLP in exchange for an additional interest in DRLP. In January 2006, we issued \$184 million of 6.95% Series M Cumulative Redeemable Preferred Shares, from which a portion of the net proceeds were used to redeem our \$75 million of outstanding 8.45% Series I Cumulative Redeemable Preferred Shares. Offering costs of \$2.6 million were charged against net income available to common shareholders in conjunction with the redemption of the Series I Cumulative Redeemable Preferred Shares. In June 2006, we issued \$110 million of 7.25% Series N Cumulative Redeemable Preferred Shares.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

The following series of preferred shares were outstanding as of September 30, 2006 (in thousands, except percentage data):

Description	Shares Outstanding	Dividend Rate	Redemption Date	Liquidation Preference
Series B Preferred	265	7.990	% September 30, 2007	\$ 132,250
Series J Preferred	400	6.625	% August 29, 2008	100,000
Series K Preferred	600	6.500	% February 13, 2009	150,000
Series L Preferred	800	6.600	% November 30, 2009	200,000
Series M Preferred	736	6.950	% January 31, 2011	184,000
Series N Preferred	440	7.250	% June 30, 2011	110,000

The dividend rate on the Series B preferred shares increases to 9.99% after September 12, 2012.

All series of preferred shares require cumulative distributions and have no stated maturity date (although we may redeem all such preferred shares on or following their optional redemption dates at our option, in whole or in part).

10. Financial Instruments

We are exposed to capital market risk, such as changes in interest rates. In order to manage the volatility relating to interest rate risk, we may enter into interest rate hedging arrangements from time to time. We do not utilize derivative financial instruments for trading or speculative purposes.

In March 2005, we entered into \$300 million of cash flow hedges through forward-starting interest rate swaps to hedge interest rates on \$300 million of estimated debt offerings in 2006. The swaps qualified for hedge accounting under SFAS 133 with any changes in fair value recorded in Accumulated Other Comprehensive Income (OCI). The market value of these interest rate swaps is dependent upon existing market interest rates, which change over time. In March 2006, we issued \$150 million of 5.5% senior unsecured notes due 2016 (see Note 4) and terminated a corresponding amount of the cash flow hedges designated for this transaction. The settlement amount paid of approximately \$1 million will be recognized to earnings through interest expense ratably over the life of the senior notes and the ineffective portion of the hedge was insignificant. In August 2006, we issued \$450 million of 5.95% senior unsecured notes due 2017 and \$250 million of 5.69% senior unsecured notes due 2011 (see Note 4) and terminated the remaining \$150 million of cash flow hedges. The settlement amount received of approximately \$1.6 million will be recognized to earnings through interest expense ratably over the lives of the senior unsecured notes. The ineffective portion of the hedge was insignificant.

In August 2005, we entered into \$300 million of cash flow hedges through forward-starting interest rate swaps to hedge interest rates on \$300 million of estimated debt offerings in 2007. The swaps qualify for hedge accounting under SFAS 133 with any changes in fair value recorded in OCI. At September 30, 2006, the fair value of these swaps was approximately \$9.6 million in an asset position as the effective rates of the swaps were lower than current interest rates at September 30, 2006.

In June 2006, we entered into a \$250 million cash flow hedge through an interest rate swap to fix the rate on \$250 million of previously floating rate debt which matures in December 2006. The swap qualifies for hedge accounting under SFAS 133 with any changes in fair value recorded in OCI. At September 30, 2006, the fair value of this swap was approximately \$78,000 in a liability position and there was no ineffectiveness.

The effectiveness of our hedges will be evaluated throughout their lives using the hypothetical derivative method under which the change in fair value of the actual swap designated as the hedging instrument is compared to the change in fair value of a hypothetical swap.

11. Stock Based Compensation

Our stock based employee and non-employee compensation plans are described more fully below. We are authorized to issue up to 11,320,552 shares of our common stock under these compensation plans. New shares of common stock are issued to employees upon exercise of share-based awards that are settled in company stock.

For all issuances of stock-based awards prior to 2002, we applied the recognition and measurement provisions of Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB 25), and related interpretations, in accounting for our stock-based compensation.

Accordingly, for stock options granted prior to 2002, no compensation expense is reflected in net income as all options granted had an exercise price equal to the market value of the underlying common shares on the date of the grant.

Effective January 1, 2002, we prospectively adopted the fair value recognition provisions of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation* (SFAS 123), and applied SFAS 123 to all awards granted after January 1, 2002.

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123(R), *Share Based Payment*, (SFAS 123(R)), using the modified prospective application method. Under this method, as of January 1, 2006, we applied the provisions of SFAS 123(R) to new and modified awards, as well as to the nonvested portion of awards granted before the required effective date and outstanding at such time.

Some of our stock-based compensation awards, including both stock options and restricted stock units, have a retirement eligible provision, whereby awards granted to an employee who has reached certain age and service criteria, automatically vest upon such employee's retirement. We have previously accounted for this type of arrangement by recognizing compensation cost (for both pro forma and expense recognition purposes) over the full stated vesting period of the award and, if the employee retired before the end of the vesting period, recognizing any remaining unrecognized compensation cost at the date of retirement. Upon adoption of SFAS 123(R), new awards granted to retirement eligible employees are subject to accelerated vesting over a period when the employee's retention of the award is no longer contingent on providing additional service. Had we applied accelerated vesting to all existing unvested awards issued to retirement eligible employees prior to January 1, 2006, we would have recognized an additional \$969,000 in stock-based employee compensation expense for the nine months ended September 30, 2006.

An additional requirement of SFAS 123(R) is that estimated forfeitures be considered in determining compensation expense. As previously permitted, we recorded forfeitures when they occurred. The effect of this accounting change on existing nonvested stock compensation was insignificant.

As a result of adopting SFAS 123(R) on January 1, 2006, our net income available for common shareholders for the nine-months ended September 30, 2006, was \$437,000 higher than if we had continued to account for share-based compensation under SFAS 123 and APB 25. There was no effect on basic and diluted earnings per share from continuing operations as a result of the adoption of SFAS 123(R).

Cash flows resulting from tax deductions in excess of recognized compensation cost from the exercise of stock options (excess tax benefits) were not significant in either period presented.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

The following table illustrates the effect on net income and earnings per share if we had applied the fair value recognition provisions of SFAS 123 to all stock-based employee compensation for the three and nine month periods ended September 30, 2005 (in thousands, except per share data):

	Three Months Ended September 30, 2005	Nine months Ended September 30, 2005

Fixed Stock Option Plans

We had options outstanding under six fixed option plans as of September 30, 2006. Additional grants may be made under one of those plans. Stock option awards granted under our stock based employee and non-employee compensation plans generally vest over five years at 20% per year and have contractual lives of ten years. The exercise price for stock option grants is set at the fair value of our common stock on the day of grant.

The following table summarizes transactions under our stock option plans for the nine months ended September 30, 2006:

	Shares	Weighted Average Exercise Price	Weighted Average Contractual Term (years)	Aggregate Intrinsic Value (1) (in millions)
Outstanding, beginning of year	3,828,157	\$ 25.50		
Granted	857,667	\$ 34.16		
Exercised	(401,764)	\$ 22.03		
Forfeited	(80,259)	\$ 29.66		
Outstanding at September 30, 2006	4,203,801	\$ 27.52	6.36	\$ 41.3
Options exercisable at September 30, 2006	2,297,473	\$ 24.07	4.68	\$ 30.5

(1) The aggregate intrinsic value represents the total pre-tax intrinsic value, based on the closing stock price of \$37.35 at September 30, 2006, which would have been received by the option holders had all option holders exercised their options as of that date. This amount changes continuously based on the fair value of the stock.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

Options granted in the nine-month periods ended September 30, 2006 and 2005, respectively, had a weighted average fair value of \$3.60 and \$3.04. As of September 30, 2006, there was \$4.1 million of total unrecognized compensation expense related to stock options granted under the plans, which is expected to be recognized over a weighted average remaining period of 3.23 years. The total intrinsic value of options exercised during the nine-month periods ended September 30, 2006 and 2005, respectively, was \$5.8 million and \$2.1 million. Compensation expense recognized for fixed stock option plans was \$1.4 million and \$837,000 in the first nine months of 2006 and 2005, respectively. The fair value of options vested during the nine month periods ending September 30, 2006 and 2005 was \$1.3 million and \$1.1 million.

The fair values of the options for the nine months ended September 30, 2006 and 2005, were determined using the Black-Scholes option-pricing model with the following assumptions:

	2006		2005	
Dividend yield	6.25	%	6.25	%
Volatility	20.0	%	20.0	%
Risk-free interest rate	4.5	%	3.8	%
Expected life	6 years		6 years	

The risk free interest rate assumption is based upon observed interest rates appropriate for the term of our employee stock options. The dividend yield assumption is based on the history of and our present expectation of future dividend payouts. Our computation of expected volatility for the valuation of stock options granted in the quarters ended September 30, 2006 and 2005 is based on historic volatility over a period of time equal to the expected term. The expected life of employee stock options represents the weighted average period the stock options are expected to remain outstanding.

Performance Share Plans

Performance shares were granted under the 2000 Performance Share Plan, with each performance share economically equivalent to one share of our common stock.

The performance shares vest over a five-year period with the vesting percentage for a year dependent upon our attainment of certain predefined levels of earnings growth for such year. The performance shares have a contractual life of five years.

In April 2006, the 2000 Performance Share Plan was amended to provide that awards would be settled in shares of common stock rather than cash. The fair value of existing awards was fixed at the date of the amendment and the fair value of subsequent awards will be fixed at the fair value of our common stock at the date of grant. Under our 2005 Long-Term Incentive Plan, additional performance shares may be granted on such terms and conditions as may be selected by our compensation committee, including whether payment will be made in cash, shares of our common stock, DRLP Units or other property.

The following table summarizes transactions for our performance shares for the first nine months of 2006:

2000 Performance Share Plan	Vested	Unvested	Total
Performance Share Plan units at December 31, 2005	84,466	99,001	183,467
Granted			
Vested	25,487	(25,487)	
Forfeited		(3,746)	(3,746)
Dividend reinvestments	6,599		6,599
Disbursements	(13,744)		(13,744)
Total Performance Share Plan units outstanding at September 30, 2006	102,808	69,768	172,576

Edgar Filing: DUKE REALTY CORP - Form 10-Q

Compensation expense recognized for Performance Share Plan units was \$787,000 and \$860,000 for the nine-month periods ended September 30, 2006 and 2005, respectively. As of September 30, 2006, there was \$201,000 of total unrecognized compensation expense related to nonvested performance shares granted under the Plan, which will be recognized based on the Company's actual performance. The total vest date fair value of shares vesting during the nine-month period ended September 30, 2006 was \$918,000.

Shareholder Value Plan Awards

Our 2005 Shareholder Value Plan (2005 SVP Plan), a sub-plan of our 2005 Long-Term Incentive Plan, was approved by our shareholders in April 2005. Upon vesting, payout of the 2005 Shareholder Value Plan awards will be made in shares of our common stock. Under the 2005 SVP Plan, shareholder value awards fully vest three years after the date of grant. The number of common shares to be issued may range from 0%-300% of the target shares awarded and will be based upon our total shareholder return for such three-year period as compared to the S & P 500 Index and the NAREIT Real Estate 50 Index. Each index is weighted at 50%.

Awards made under the 2005 SVP Plan are measured at fair value, which is determined using a Monte Carlo simulation model that was developed to accommodate the unique features of the 2005 SVP Plan. Compensation cost recognized under the 2005 SVP Plan was \$531,000 and \$395,000 for the nine-month periods ended September 30, 2006 and 2005, respectively.

The following table summarizes transactions for our awards under the 2005 SVP Plan for the first nine months of 2006:

2005 Shareholder Value Plan Awards	Number of SVP Units	Weighted Average Grant Date Fair Value
SVP awards at December 31, 2005	75,678	\$ 30.64
Granted	90,356	\$ 34.13
Forfeited	(3,829)	\$ 31.23
SVP awards at September 30, 2006	162,205	\$ 32.57

As of September 30, 2006, there was \$2.1 million of total unrecognized compensation expense related to nonvested SVP Plan awards granted under the 2005 SVP Plan, which will be recognized over a weighted average period of two years. All 2005 SVP Plan awards have a contractual life of three years.

Restricted Stock Units

Under our 2005 Long-Term Incentive Plan and our 2005 Non-Employee Directors Compensation Plan approved by our shareholders in April 2005, restricted stock units (RSUs) may be granted to non-employee directors, executive officers and selected management employees. An RSU is economically equivalent to one share of our common stock. RSUs granted prior to January 1, 2006 vest 20% per year over five years, have contractual lives of five years and are payable in shares of our common stock. RSUs granted to existing non-employee directors subsequent to January 1, 2006 vest 100% over one year, and have contractual lives of one year. We recognize the value of the granted RSUs over this vesting period as expense.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

The following table summarizes transactions for our RSUs, excluding dividend equivalents, for the first nine months of 2006:

Restricted Stock Units	Number of RSUs	Weighted Average Grant Date Fair Value
RSUs at December 31, 2005	172,095	\$ 32.19
Granted	108,118	\$ 34.16
Vested	(16,548)	\$ 30.76
Forfeited	(7,563)	\$ 32.62
RSUs at September 30, 2006	256,102	\$ 33.65

Compensation cost recognized for RSUs totaled \$1.7 million and \$245,000 for the nine-month periods ended September 30, 2006 and 2005, respectively.

As of September 30, 2006, there was \$6.0 million of total unrecognized compensation expense related to nonvested RSUs granted under the Plan, which is expected to be recognized over a weighted average period of 4 years.

In addition, all RSUs earn dividend equivalents that are deemed to be reinvested in additional RSUs. Dividend equivalents vest immediately and will be paid in shares of our common stock when the corresponding portion of the original RSU award vests or upon termination of the participant. Dividend equivalents of 10,732 RSUs were earned in the first nine months of 2006, and 14,814 dividend equivalents were outstanding as of September 30, 2006. A charge to retained earnings of \$706,000 was recorded for the value of these dividend equivalents during the first nine months of 2006.

12. Recent Accounting Pronouncements

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation also provides guidance on description, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 becomes effective on January 1, 2007. We are currently evaluating the effect that the adoption of FIN 48 will have on our financial statements.

In September 2006, the Securities Exchange Commission (SEC) issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Qualifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides guidance regarding the process of qualifying financial statement misstatements. We will adopt SAB 108 in the fourth quarter of 2006 and do not believe that the adoption of SAB 108 will have a material effect on our financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Cautionary Statement Regarding Forward Looking Statements

Certain statements in this quarterly report, including those related to our future operations, constitute forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (the Securities Act) and Section 21E of the Securities Exchange Act of 1934, as amended (the Exchange Act). The words believe, estimate, expect, anticipate, intend, plan, seek, may, and similar expressions regarding future periods are intended to identify forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other important factors that could cause our actual results, performance or achievements, or industry results, to differ materially from any predictions of future results, performance or achievements that we express or imply in this Report. Some of the risks, uncertainties and other important factors that may affect future results include, among others:

- Changes in general economic and business conditions, including performance of financial markets;
- Our continued qualification as a real estate investment trust, or REIT ;
- Heightened competition for tenants and potential decreases in property occupancy;
- Potential increases in real estate construction costs;
- Potential changes in the financial markets and interest rates;
- Our continuing ability to favorably raise funds through the issuance of debt and equity in the capital markets;
- Our ability to successfully identify, acquire, develop and/or manage properties on terms that are favorable to us;
- Our ability to successfully dispose of properties on terms that are favorable to us;
- Inherent risks in the real estate business including tenant defaults, potential liability relating to environmental matters and liquidity of real estate investments; and
- Other risks and uncertainties described herein, including, without limitation, under the caption Item 1A. Risk Factors , and in our other reports and other filings with the Securities and Exchange Commission (SEC).

This list of risks and uncertainties, however, is not intended to be exhaustive. Additional risk factor information is included in our Annual Report on Form 10-K for the fiscal year ended December 31, 2005, which we filed with the SEC on March 7, 2006, and is updated by us from time to time in Quarterly Reports on Form 10-Q and other future filings.

Although we presently believe that the plans, expectations and results expressed in or suggested by the forward-looking statements are reasonable, all forward-looking statements are inherently uncertain as they involve substantial risks and uncertainties beyond our control. New factors emerge from time to time, and it is not possible for us to predict the nature or assess the potential impact of each new factor on our business. Given these uncertainties, we caution you not to place undue reliance on these forward-looking statements. We undertake no obligation to update or revise any of our forward-looking statements for events or circumstances that arise after the statement is made.

Business Overview

We are a self-administered and self-managed REIT that began operations through a related entity in 1972. As of September 30, 2006, we:

- Owned or controlled 733 industrial, office and retail properties (including properties under development), consisting of approximately 112.9 million square feet; and
- Owned or controlled more than 6,500 acres of land with an estimated future development potential of more than 94 million square feet of industrial, office and retail properties.

We provide the following services for our properties and for certain properties owned by third parties and joint ventures:

- Property leasing;
- Property management;
- Construction;
- Development; and
- Other tenant-related services

Acquisitions

In the first quarter of 2006, we completed the majority of the acquisition of a Washington D.C. metropolitan area portfolio of suburban office and light industrial properties (the Mark Winkler Portfolio). The assets acquired for a purchase price of approximately \$865.2 million are comprised of 32 properties with approximately 2.9 million square feet for rental, 166 acres of undeveloped land, as well as certain related assets of the Mark Winkler Company, a real estate management company. The acquisition was financed primarily through assumed mortgage loans and new borrowings.

In the third quarter of 2006, we completed the purchase of a portfolio of industrial real estate properties in Savannah, Georgia with the purpose of expanding our industrial real estate holdings near major port facilities. We completed a majority of the purchase in January 2006. The assets acquired for a purchase price of approximately \$196.2 million are comprised of 18 buildings with approximately 5.1 million square feet for rental as well as over 60 acres of undeveloped land. The acquisition was financed in part through assumed mortgage loans.

Key Performance Indicators

Our operating results depend primarily upon rental income from our office, industrial and retail properties (Rental Operations). The following highlights the areas of Rental Operations that we consider critical for future revenue growth. (All square footage totals and occupancy percentages reflect both wholly owned properties and properties in joint ventures).

Occupancy Analysis: Our ability to maintain favorable occupancy rates is a principal driver of our results of operations. The following table sets forth occupancy information regarding our in-service portfolio of rental properties as of September 30, 2006 and 2005, respectively (in thousands, except percentage data):

Type	Total Square Feet		Percent of Total Square Feet		Percent Occupied	
	2006	2005	2006	2005	2006	2005
Industrial						
Service Centers	4,724	4,724	4.4 %	4.9 %	91.9 %	90.2 %

Total	107,032	97,132	100.0 %	100.0 %	92.5 %	91.2 %

Lease Expiration and Renewal: Our ability to maintain and increase occupancy rates primarily depends upon our continuing ability to re-lease expiring space. The following table reflects our in-service portfolio lease expiration schedule by property type as of September 30, 2006. The following table indicates square footage and annualized net effective rents (based on September 2006 rental revenue) under expiring leases (in thousands, except percentage data):

Year of Expiration	Total Portfolio			Industrial		Office		Retail

Percent Occupied	92.5 %			93.2 %		90.9 %		99.7 %	

Lease Renewals: We renewed 79.6% and 78.9% of leases up for renewal in the three and nine months ended September 30, 2006, totaling 1.9 million and 5.7 million square feet, respectively. This compared to renewals of 78.8% and 74.2% for the three and nine months ended September 30, 2005 totaling 2.7 million and 7.6 million square feet, respectively.

The average term of renewals for the three and nine months ended September 30, 2006, was 4.7 and 3.9 years, respectively, compared to an average term of 5.3 and 4.4 years for the three and nine months ended September 30, 2005, respectively.

Future Development: Another source of growth in earnings is the development of additional properties. These properties should provide future earnings through Service Operations income upon sale or from Rental Operations growth as they are placed in service. As of September 30, 2006, we had 11.4 million square feet of property under development with total estimated costs upon completion of \$1.1 billion, which were 39% pre-leased as of September 30, 2006. This compares to 6.9 million square feet with total estimated costs of \$480.8 million, which were 34% pre-leased as of September 30, 2005.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

A summary of properties under development as of September 30, 2006, follows (in thousands, except percentage data):

	5,565	52	%	\$ 653,180	8.58	%
Total	11,391	39	%	\$ 1,101,768	8.92	%

Acquisition and Disposition Activity: Sales proceeds from dispositions of wholly owned properties for the nine months ended September 30, 2006 and 2005 were \$165.6 million and \$1.1 billion, respectively. The sales in the first nine months of 2006 and 2005 were comprised of both held-for-rental properties that no longer met our long-term growth objectives and held-for-sale properties that were developed with the intent to sell upon completion.

On the acquisition front, our strategy is to pursue acquisitions with value added opportunities. During the first nine months of 2006, we closed on over \$1.2 billion of building and land acquisitions, as previously discussed, which compares to building and land acquisitions of \$423.8 million for the same period in 2005. We will continue to identify and pursue both disposition and acquisition opportunities that arise and are in line with our business plan.

Funds From Operations

Funds From Operations (FFO) is used by industry analysts and investors as a supplemental operating performance measure of an equity REIT like Duke. FFO is calculated in accordance with the definition that was adopted by the Board of Governors of the National Association of Real Estate Investment Trusts (NAREIT). NAREIT created FFO as a supplemental measure of REIT operating performance that excludes historical cost depreciation, among other items, from net income determined in accordance with United States generally accepted accounting principles (GAAP). FFO is a non-GAAP financial measure developed by NAREIT to compare the operating performance of REITs. The most comparable GAAP measure is net income (loss). FFO should not be considered as a substitute for net income or any other measures derived in accordance with GAAP and may not be comparable to other similarly titled measures of other companies.

Historical cost accounting for real estate assets in accordance with GAAP implicitly assumes that the value of real estate assets diminishes predictably over time. Since real estate values instead have historically risen or fallen with market conditions, many industry investors and analysts have considered presentation of operating results for real estate companies that use historical cost accounting to be insufficient by themselves. FFO, as defined by NAREIT, represents GAAP net income (loss), excluding extraordinary items as defined under GAAP and gains or losses from sales of previously depreciated operating real estate assets, plus certain non-cash items such as real estate depreciation and amortization, and after similar adjustments for unconsolidated partnerships and joint ventures.

Management believes that the use of FFO, combined with the required primary GAAP presentations, has

Edgar Filing: DUKE REALTY CORP - Form 10-Q

improved the understanding of operating results of REITs among the investing public and made comparisons of REIT operating results more meaningful. Management considers FFO to be a useful measure for reviewing comparative operating and financial performance (although FFO should be reviewed in conjunction with net income which remains the primary measure of performance) because, by excluding gains or losses related to sales of previously depreciated operating real estate assets and excluding real estate asset depreciation and amortization, FFO provides a useful comparison of the operating performance of our real estate between periods or as compared to different companies.

The following table shows a reconciliation of net income available for common shareholders to the calculation of FFO for the three and nine months ended September 30, 2006 and 2005, respectively (in thousands):

Comparison of Three Months Ended September 30, 2006 to Three Months Ended September 30, 2005**Rental Income From Continuing Operations**

Overall, rental income from continuing operations increased from \$170.0 million for the quarter ended September 30, 2005 to \$208.3 million for the same period in 2006. The following table reconciles rental income from continuing operations by reportable segment to our total reported rental income from continuing operations for the quarters ended September 30, 2006 and 2005 (in thousands):

	2006	2005
Office	\$ 158,036	\$ 125,278
Industrial	47,664	42,240
Non-segment	2,553	2,504
Total	\$ 208,253	\$ 170,022

The following factors contributed to these results:

- We acquired 50 properties and placed 25 developments in service from October 1, 2005 to September 30, 2006. These acquisitions and developments are the primary factor in the overall \$38.2 million increase in rental revenue for the third quarter of 2006, compared to the same period in 2005, as they provided revenues of \$27.0 million in the third quarter of 2006.
- Lease termination fees totaled \$5.2 million in the third quarter of 2006, compared to \$373,000 for the same period in 2005.
- The remaining increase in rental revenues was attributable to our in-service occupancy increasing from 91% at September 30, 2005 to 92% at September 30, 2006, as well as from increases in our rental rates for rollover and renewal leases.

Rental Expenses and Real Estate Taxes

The following table reconciles rental expenses and real estate taxes by reportable segment to our total reported amounts in the statement of operations for the three months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005
Rental Expenses:		
Office	\$ 41,398	\$ 34,717
Industrial	3,799	5,166
Non-segment	876	619
Total	\$ 46,073	\$ 40,502
Real Estate Taxes:		
Office	\$ 16,072	\$ 15,407
Industrial	5,739	5,074
Non-segment	1,275	1,203
Total	\$ 23,086	\$ 21,684

Of the overall \$5.6 million increase in rental expenses, \$4.0 million was attributable to properties acquired and developments placed in service from October 1, 2005 to September 30, 2006. The remaining increase in rental expense is the result of increased occupancy and inflationary factors. The increase in real estate taxes was due to properties acquired and developments placed in service from October 1, 2005 to September 30, 2006.

Interest Expense

Interest expense from continuing operations increased from \$30.5 million in the third quarter of 2005 to \$50.2 million in the third quarter of 2006 primarily due to an increase in secured debt, unsecured notes and an increase in borrowings and interest rates on our unsecured line of credit. The overall increase in debt was mainly attributable to increased borrowings to fund the 2006 acquisitions and a substantial increase in properties under development. Interest expense related to secured debt and the unsecured line of credit increased by \$6.9 million and \$9.5 million, respectively, from the third quarter of 2005, offset by an increase in capitalized interest of \$7.2 million. Additionally, \$9.4 million more of interest expense was allocated to discontinued operations in the third quarter of 2005 than in the third quarter of 2006.

Depreciation and Amortization

Depreciation and amortization expense increased from \$59.5 million for the third quarter of 2005 to \$63.9 million for the same period in 2006 due to increases in our held-for-rental asset base from acquisitions and developments during 2005 and 2006.

Service Operations

Service Operations primarily consist of sales of properties developed or acquired with the intent to sell within a short period of time and the leasing, management, construction and development services for joint venture properties and properties owned by third parties. These operations are heavily influenced by the current state of the economy, as leasing and management fees are dependent upon occupancy while construction and development services rely on the expansion of business operations. Service Operations earnings decreased from \$12.6 million for the quarter ended September 30, 2005 to \$10.6 million for the quarter ended September 30, 2006, primarily as a result of shifting our resources from third party construction services to wholly owned construction activities. Also, our Service Operations building development and sales program, whereby a building is developed and then sold, is generally a significant component of construction and development income. During the third quarter of 2006, we included one such building sale in continuing operations for a gain of \$4.4 million. We sold five properties in the third quarter of 2005 for a gain of \$5.2 million.

General and Administrative Expense

General and administrative expenses increased from \$5.8 million in the quarter ended September 30, 2005 to \$6.8 million for the quarter ended September 30, 2006. General and administrative expenses are comprised of two components. The first is direct expenses that are not attributable to specific assets such as legal fees, external audit fees, marketing costs, investor relations expenses and other corporate overhead. The second component is the unallocated indirect overhead costs associated with the operation of our owned properties and Service Operations, including construction, leasing and maintenance operations. Those overhead costs not allocated to these operations are charged to general and administrative expenses. The increase from the quarter ended September 30, 2005 was largely attributable to the \$7.1 million increase in our overall pool of overhead costs which exceeded the allocation of those costs to leasing and construction activities by \$468,000 and an increase in direct corporate general and administrative costs of \$470,000. Our overall pool of overhead costs has increased in order to support our actual and anticipated increase in overall rental and service operations.

Other Income and Expenses

Interest and other income in the third quarter of 2006 was \$4.4 million compared to \$1.5 million during the same period of 2005. The increase in interest and other income is mainly due to an increase in interest-bearing advances to unconsolidated companies and miscellaneous other income from a variety of sources, including seller-financed property sales.

We pursue opportunities to dispose of undeveloped land in markets with a high concentration of undeveloped land and those markets where the land no longer meets our strategic development plans. Earnings from the sale of land, net of impairment adjustments, are comprised of the following amounts for the three months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005
Gain on land sales	\$ 2,982	\$ 2,427
Impairment adjustment for land		(56)
Total	\$ 2,982	\$ 2,371

We sold eight parcels of undeveloped land in the third quarter of 2006, compared to 11 such parcels in the third quarter of 2005. We recorded impairment charges of \$56,000 in the third quarter of 2005 associated with three land parcel sales. No impairment charges on land were recorded in the third quarter of 2006.

Discontinued Operations

The results of operations for properties sold during the year or designated as held-for-sale to unrelated parties at the end of the period are required to be classified as discontinued operations. The property specific components of net earnings that are classified as discontinued operations include rental revenues, rental expenses, real estate taxes, allocated interest expense, depreciation expense and minority interest, as well as the net gain or loss on the disposition of properties.

We classified the operations of 257 buildings as discontinued operations as of September 30, 2006. These 257 buildings consist of 239 industrial properties, 17 office properties and one retail property. As a result, we classified net income (loss) from operations, net of minority interest, of (\$35,000) and \$3.0 million as net income (loss) from discontinued operations for each of the quarters ended September 30, 2006 and 2005, respectively. Of these properties, 13 were sold during the third quarter of 2006 and 218 properties were sold during the third quarter of 2005. The gains on disposal of these properties, net of impairment adjustment and minority interest, of \$39.8 million and \$192.6 million for the quarters ended September 30, 2006 and 2005, respectively, are also reported in discontinued operations. The remaining 26 properties consist of 16 properties sold in 2005, five properties sold in the first six months of 2006 and five operating properties classified as held-for-sale at September 30, 2006. We also classified 38 buildings as held-for-sale, but have not included these buildings in discontinued operations, based on our present intention to sell the majority of our ownership interest in these properties to an entity in which we will retain a minority equity ownership interest or because the results of operations for those buildings were not material.

Comparison of Nine Months Ended September 30, 2006 to Nine Months Ended September 30, 2005**Rental Income From Continuing Operations**

Overall, rental income from continuing operations increased from \$486.5 million for the nine months ended September 30, 2005 to \$599.2 million for the same period in 2006. The following table reconciles rental income from continuing operations by reportable segment to our total reported rental income from continuing operations for the nine months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005
Office	\$ 440,244	\$ 356,520
Industrial	149,976	122,879
Non-segment	8,955	7,135
Total	\$ 599,175	\$ 486,534

The following factors contributed to these results:

- We acquired 50 properties and placed 25 developments in service from October 1, 2005 to September 30, 2006. These acquisitions and developments are the primary factor in the overall \$112.6 million increase in rental revenue for the first nine months in 2006, compared to the same period in 2005, as these transactions provided revenues of \$61.6 million in the first nine months of 2006.
- Revenues from acquisitions and developments placed in service in the first nine months of 2005 increased by \$20.8 million in the first nine months of 2006.
- Lease termination fees totaled \$15.3 million for the first nine months of 2006, compared to \$3.3 million for the same period in 2005.
- The remaining increase in rental revenues was attributable to our in-service occupancy increasing from 91% at September 30, 2005 to 92% at September 30, 2006 as well as from increases in our rental rates for rollover and renewal leases.

Equity in Earnings of Unconsolidated Companies

Equity in earnings decreased from \$25.0 million for the first nine months of 2005 to \$21.4 million for the same period in 2006. Our share of the gains on joint venture building sales was \$8.1 million in the first nine months of 2006 compared to \$11.2 million for the same period in 2005, which is the main reason for the decrease.

Rental Expenses and Real Estate Taxes

The following table reconciles rental expenses and real estate taxes by reportable segment to our total reported amounts in the statement of operations for the nine months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005
Rental Expenses:		
Office	\$ 118,260	\$ 98,199
Industrial	17,059	16,380
Non-segment	1,179	1,306
Total	\$ 136,498	\$ 115,885
Real Estate Taxes:		
Office	\$ 48,253	\$ 40,916
Industrial	17,481	14,874
Non-segment	4,018	3,613
Total	\$ 69,752	\$ 59,403

Of the overall increase in rental expenses and real estate taxes of \$20.6 million and \$10.3 million, respectively, \$8.0 million and \$4.4 million, respectively, were attributable to properties acquired and developments placed in service from October 1, 2005 to September 30, 2006, as noted above. In addition, rental expenses and real estate taxes for acquisitions and developments placed in service in the first nine months of 2005 increased by \$5.0 million and \$2.4 million, respectively, in the same period of 2006, as a result of having a full nine months of operating activity on these properties. The remaining increase in rental expenses is the result of increased occupancy and inflationary factors and the remaining increase to real estate taxes was driven by normal increases in assessments by municipal authorities.

Interest Expense

Interest expense from continuing operations increased from \$86.1 million for the nine months ended September 30, 2005 to \$133.3 million for the same period in 2006 due to an increase in secured debt, unsecured notes and an increase in borrowings and interest rates on our unsecured line of credit. The overall increase in debt was mainly attributable to increased borrowings to fund the 2006 acquisitions and a substantial increase in properties under development. Interest expense related to secured debt and the unsecured line of credit increased by \$22.3 million and \$21.2 million, respectively, from the third quarter of 2005, and was offset by a decrease in interest expense on unsecured notes of \$3.2 million and an increase in capitalized interest of \$18.7 million. Additionally, \$23.8 million more of interest expense was allocated to discontinued operations in the first nine months of 2005 than in the first nine months of 2006.

Depreciation and Amortization

Depreciation and amortization expense increased from \$164.2 million for the first nine months of 2005 to \$187.1 million for the same period in 2006 due to increases in our held-for-rental asset base from acquisitions and developments during 2005 and 2006.

Service Operations

Service Operations primarily consist of sales of properties developed or acquired with the intent to sell within a short period and the leasing, management, construction and development services for joint venture properties and properties owned by third parties. These operations are heavily influenced by the current state of the economy, as leasing and management fees are dependent upon occupancy while construction and development services rely on the expansion of business operations. Service Operations earnings decreased

Edgar Filing: DUKE REALTY CORP - Form 10-Q

from \$37.4 million for the nine months ended September 30, 2005 to \$18.5 million for the same period in 2006, primarily as a result of shifting our resources from third party construction services to wholly owned construction activities. Also, our Service Operations building development and sales program, whereby a building is developed and then sold, is generally a significant component of construction and development income. During the nine months ended September 30, 2006, we included one such building sale in continuing operations for a gain of \$4.4 million while we sold eight properties in the first nine months of 2005 for a gain of \$17.8 million.

General and Administrative Expense

General and administrative expenses increased from \$21.3 million for the nine months ended September 30, 2005 to \$27.7 million for the same period in 2006. General and administrative expenses are comprised of two components. The first is direct expenses that are not attributable to specific assets such as legal fees, external audit fees, marketing costs, investor relations expenses and other corporate overhead. The second component is the unallocated overhead costs associated with the operation of our owned properties and Service Operations, including construction, leasing and maintenance operations. Those overhead costs not allocated to these operations are charged to general and administrative expenses. The increase from the nine months ended September 30, 2005 was largely attributable to the \$16.9 million increase in our overall pool of overhead costs exceeding the allocation of those costs to leasing and construction activities by \$6 million. The increase in the overall pool of overhead costs was made in order to meet actual and anticipated increases in leasing, development and construction activities in 2006 and beyond.

Other Income and Expenses

Interest and other income in the first nine months of 2006 was \$8.3 million compared to \$3.7 million during the same period of 2005. The increase in interest and other income is mainly due to an increase in interest-bearing advances to unconsolidated companies and miscellaneous other income from a variety of sources, including seller-financed property sales.

We pursue opportunities to dispose of land in markets with a high concentration of undeveloped land and those markets where the land no longer meets our strategic development plans. Earnings from the sale of land, net of impairment adjustments, are comprised of the following amounts for the nine months ended September 30, 2006 and 2005, respectively (in thousands):

	2006	2005
Gain on land sales	\$ 5,737	\$ 5,912
Impairment adjustment for land	(310)	(133)
Total	\$ 5,427	\$ 5,779

We recorded \$310,000 and \$133,000 of impairment charges on land parcels for the nine months ended September 30, 2006 and 2005, respectively. The land parcel associated with the \$310,000 impairment charge recorded in the second quarter of 2006 was sold in the third quarter of 2006. One of the four land parcels related to the \$133,000 impairment charge was sold in the second quarter of 2005 and the other three parcels were sold in the third quarter of 2005.

Discontinued Operations

We classified the operations of 257 buildings as discontinued operations as of September 30, 2006. These 257 buildings consist of 239 industrial properties, 17 office properties and one retail property. As a result, we classified net income from operations, net of minority interest, of \$4.2 million and \$10.3 million as net income from discontinued operations for the nine months ended September 30, 2006 and 2005, respectively. Of these

properties, 18 were sold during the first nine months of 2006 and 230 properties were sold during the first nine months of 2005. The gains on disposal of these properties, net of impairment adjustment and minority interest, of \$41.6 million and \$200.5 million for the nine months ended September 30, 2006 and 2005, respectively, are also reported in discontinued operations. The remaining nine properties consist of four properties sold during the last three months of 2005 and five operating properties classified as held-for-sale at September 30, 2006. We also classified 38 buildings as held-for-sale, but have not included these buildings in discontinued operations, based on our present intention to sell the majority of our ownership interest in these properties to an entity in which we will retain a minority equity ownership interest or because the results of operations of those buildings were not material.

Liquidity and Capital Resources

Sources of Liquidity

We expect to meet our short-term liquidity requirements over the next twelve months, including payments of dividends and distributions, as well as recurring capital expenditures relating to maintaining our current real estate assets, primarily through the following:

- working capital;
- net cash provided by operating activities; and
- proceeds received from real estate dispositions.

Although we historically have not used any other sources of funds to pay for recurring capital expenditures on our current real estate investments, we may rely on the temporary use of borrowings or property disposition proceeds needed to fund such expenditures during periods of high leasing volume.

We expect to meet long-term liquidity requirements, such as scheduled mortgage debt maturities, refinancing of long-term debt, preferred share redemptions, the retirement of unsecured notes and amounts outstanding under the unsecured credit facility, property acquisitions, financing of development activities and other non-recurring capital improvements, primarily through the following sources:

- issuance of additional equity, including common and preferred stock;
- issuance of additional debt securities;
- undistributed cash provided by operating activities, if any; and
- proceeds received from real estate dispositions.

Rental Operations

We believe that our principal source of liquidity, cash flows from Rental Operations, provides a stable source of cash to fund operational expenses. We believe that this cash-based revenue stream is substantially aligned with revenue recognition (except for periodic straight-line rental income accruals and amortization of above or below market rents) as cash receipts from the leasing of rental properties are generally received in advance of or in a short time following the actual revenue recognition.

We are subject to risks of decreased occupancy through market conditions, as well as tenant defaults and bankruptcies, and potential reduction in rental rates upon renewal or re-letting of properties, which would result in reduced cash flow from operations. However, we believe that these risks are mitigated by our relatively strong market presence in most of our locations and the fact that we perform in-house credit review and analysis on major tenants and all significant leases before they are executed.

Credit Facilities

We had one unsecured line of credit available as of September 30, 2006, summarized as follows (dollars in thousands):

Description	Borrowing Capacity	Maturity Date	Interest Rate	Outstanding Balance at September 30, 2006
Unsecured Line of Credit	\$ 1,000,000	January 2010	LIBOR + .525	% \$ 904,000

We use this line of credit to fund development activities, acquire additional rental properties and provide working capital.

The line of credit provides us with an option to obtain borrowings from financial institutions that participate in the line, at rates lower than the stated interest rate, subject to certain restrictions. Interest rates on the amounts outstanding on the unsecured line of credit as of September 30, 2006, ranged from LIBOR + .15% to LIBOR + .525% (equal to 5.48% to 5.86% as of September 30, 2006).

The line of credit also contains financial covenants that require us to meet financial ratios and defined levels of performance, including those related to variable interest indebtedness, consolidated net worth and debt-to-market capitalization. As of September 30, 2006, we were in compliance with all covenants under our line of credit.

Debt and Equity Securities

On July 31, 2006, we filed with the SEC an automatic shelf registration statement on Form S-3, relating to the offer and sale, from time to time of an indeterminate amount of debt securities, common stock, preferred stock, depository shares and warrants. From time to time, we expect to issue additional securities under this new automatic shelf registration statement to fund the development and acquisition of additional rental properties and to fund the repayment of the credit facilities and other long-term debt upon maturity.

The indenture governing our unsecured notes also requires us to comply with financial ratios and other covenants regarding our operations. We were in compliance with all such covenants as of September 30, 2006.

On July 21, 2006, we announced that DRLP had received the requisite consent of the holders of certain outstanding notes to amend the terms of the following series of its outstanding notes:

CUSIP No.	Principal Amount Outstanding	Security Description	Consent Payment per \$1,000
264414AS2	\$ 100,000,000	6.75% Notes due 5/30/2008	\$ 1.00
264414AT0	\$ 125,000,000	6.80% Notes due 2/12/2009	\$ 2.50
26441YAC1	\$ 150,000,000	7.75% Notes due 11/15/2009	\$ 2.50
26441YAE7	\$ 175,000,000	5.25% Notes due 1/15/2010	\$ 2.50
26441YAD9	\$ 175,000,000	6.95% Notes due 3/15/2011	\$ 3.75
264411AB5	\$ 150,000,000	5.875% Notes due 8/15/2012	\$ 3.75
26441QAD6	\$ 50,000,000	5.45% Notes due 10/1/2012	\$ 3.75
26441QAC8	\$ 50,000,000	7.25% Notes due 6/15/2028	\$ 5.00

The purpose of the consent solicitation was to obtain the consent of the holders of the securities to amend certain financial covenants governing the securities to make them consistent with the financial covenants in each series of DRLP's notes issued on or after May 22, 2003.

Sale of Real Estate Assets

We utilize sales of real estate assets as an additional source of liquidity. We pursue opportunities to sell real estate assets at favorable prices to capture value created by us as well as to improve the overall quality of our portfolio by recycling sales proceeds into new properties with greater value creation opportunities.

Uses of Liquidity

Our principal uses of liquidity include the following:

- Property investments;
- Recurring leasing/capital costs;
- Dividends and distributions to shareholders and unitholders;
- Long-term debt maturities; and
- Other contractual obligations.

Property Investment

We evaluate development and acquisition opportunities based upon market outlook, supply and long-term growth potential.

Recurring Expenditures

One of our principal uses of our liquidity is to fund the development, acquisition and recurring leasing/capital expenditures of our real estate investments. The following is a summary of our recurring capital expenditures for the nine months ended September 30, 2006 and 2005, respectively, (in thousands):

	2006	2005
Tenant improvements	\$ 34,226	\$ 47,672
Leasing costs	12,338	24,618
Building improvements	5,490	10,370
Totals	\$ 52,054	\$ 82,660

Debt Maturities

Debt outstanding at September 30, 2006 totaled \$4.1 billion with a weighted average interest rate of 5.95% maturing at various dates through 2028. We had \$2.8 billion of unsecured debt, \$904.0 million outstanding on our unsecured line of credit, and \$371.5 million of secured debt outstanding at September 30, 2006. Scheduled principal amortization of such debt totaled \$7.2 million for the nine months ended September 30, 2006.

Edgar Filing: DUKE REALTY CORP - Form 10-Q

The following is a summary of the scheduled future amortization and maturities of our indebtedness at September 30, 2006 (in thousands, except percentage data):

Year	Future Repayments			Weighted Average Interest Rate of Future Repayments
	Scheduled Amortization	Maturities	Total	
2006	\$ 3,002	\$ 275,000	\$ 278,002	5.80 %

2015	7,593	5,807	13,400	7.13 %
2016	6,671	187,473	194,144	6.59 %
Thereafter	36,652	541,723	578,375	6.06 %
	\$ 145,208	\$ 3,930,475	\$ 4,075,683	5.95 %

Historical Cash Flows

Cash and cash equivalents were \$25.0 million and \$124.9 million at September 30, 2006 and 2005, respectively. The following highlights significant changes in net cash associated with our operating, investing and financing activities (in millions):

	Nine months Ended September 30,	
	2006	2005
Net Cash Provided by Operating Activities	\$ 104.7	\$ 323.9
Net Cash Provided by (used for) Investing Activities	\$ (1,291.6)	\$ 455.3
Net Cash Provided by (used for) Financing Activities	\$ 1,185.2	\$ (659.9)

Operating Activities

Cash flows from operating activities provide the cash necessary for us to meet normal operational requirements of our rental operations and Service Operations activities. The receipt of rental income from rental operations continues to provide the primary source of our revenues and operating cash flows. In addition, we also develop buildings with the intent to sell them at or soon after completion, which provides another significant source of operating cash flow activity.

- During the nine-month period ended September 30, 2006, we incurred Service Operations building development costs of \$188.7 million, compared to \$58.9 million for the nine-month period ended September 30, 2005. The difference is reflective of the increased activity in our held-for-sale pipeline. The pipeline of held-for-sale projects under construction as of September 30, 2006 has anticipated future costs of \$271.4 million.
- We sold three Service Operations buildings in the first nine months of 2006 compared to sales of nine Service Operations buildings for the same period in 2005, recognizing after tax gains of \$8.8 million and \$17.5 million, respectively.

Investing Activities

Investing activities are one of the primary uses of our liquidity. Development and acquisition activities typically generate additional rental revenues and provide cash flows for operational requirements. Highlights of significant cash uses are as follows:

- Development costs totaled \$274.7 million for the nine-month period ended September 30, 2006, compared to \$130.8 million for the same period in 2005. The increased development costs from 2005 is the result of our increased focus on wholly owned development activity in 2006.
- During the first nine months of 2006, we paid cash of \$735.3 million for real estate acquisitions and \$367.5 million for undeveloped land acquisitions, compared to \$285.3 million for real estate acquisitions and \$93.2 million for undeveloped land acquisitions in the same period of 2005. The most significant activity in the first nine months of 2006 consisted of the purchase of the Mark Winkler Portfolio of suburban office and light industrial properties and undeveloped land in the Washington, D.C. area for \$865.2 million (\$713.5 million paid in cash), a portfolio of industrial properties in Savannah, Georgia for \$196.2 million (\$125.9 million paid in cash), and the purchase of land held for development of \$367.5 million. The most significant activity in the first nine months of 2005 was the acquisition of a five building office complex in our Chicago market for \$257.0 million.
- Sales of land and depreciated property provided \$140.3 million in net proceeds for the nine-month period ended September 30, 2006, compared to \$1.1 billion for the same period in 2005. In addition, during the first nine months of 2006 we received distributions of \$21.2 million for our share of proceeds on the sales of land and depreciable property within three of our joint ventures. An industrial portfolio sale of 212 properties consisting of approximately 14.1 million square feet of primarily light distribution and service center properties and approximately 50 acres of undeveloped land, which was completed on September 29, 2005, provided \$955 million of the \$1.1 billion of proceeds received in the nine months ended September 30, 2005. We continue to dispose of non-strategic and older properties as part of our capital recycling program to fund acquisitions and new development while improving the overall quality of our investment portfolio.

Financing Activities

The following significant items highlight fluctuations in net cash provided by financing activities:

- In January 2006, we received approximately \$177.7 million in net proceeds from the issuance of our Series M Cumulative Redeemable Preferred Shares. These preferred shares bear a dividend yield of 6.95%. We applied a portion of the net proceeds from the Series M preferred shares issuance to redeem \$75.0 million of Series I preferred shares in February, which had an 8.45% dividend rate.
- In February 2006, we obtained a \$700.0 million secured term loan, which was priced at LIBOR +.525%. The proceeds were used to finance the acquisition of the Mark Winkler Portfolio in the Washington, D.C. metropolitan area, and the loan is secured by these properties. This term loan was paid in full in August 2006 with proceeds from the issuance of senior unsecured debt as described below.
- In March 2006, we issued \$150.0 million of 5.50% senior unsecured notes due in 2016. A portion of the proceeds were used to retire our \$100.0 million 6.72% puttable option reset securities. The remaining cash proceeds were used to fund costs associated with the issuance of debt and to repay amounts outstanding under our line of credit.
- During the first nine months of 2006, we increased net borrowings on our \$1.0 billion line of credit by \$521.0 million. These borrowings were used to fund our development and acquisition activity in the first nine months of 2006.

- In June 2006, we received approximately \$106.3 million in net proceeds from the issuance of our Series N Cumulative Redeemable Preferred Shares. These preferred shares bear a dividend yield of 7.25%.
- In August 2006, we issued \$450.0 million of 5.95% senior unsecured notes due in 2017 and \$250.0 million of 5.625% senior unsecured notes due in 2011. The proceeds from these issuances were used to pay off the \$700.0 million secured term loan.

Financial Instruments

We are exposed to capital market risk, such as changes in interest rates. In order to manage the volatility relating to interest rate risk, we may enter into interest rate hedging arrangements from time to time. We do not utilize derivative financial instruments for trading or speculative purposes.

In March 2005, we entered into \$300 million of cash flow hedges through forward-starting interest rate swaps to hedge interest rates on \$300 million of estimated debt offerings in 2006. The swaps qualified for hedge accounting with any changes in fair value recorded in Accumulated Other Comprehensive Income (OCI). The market value of these interest rate swaps is dependent upon existing market interest rates, which change over time. In March 2006, we issued \$150 million of 5.5% senior unsecured notes due 2016 and terminated a corresponding amount of the cash flow hedges designated for this transaction. The settlement amount paid of approximately \$1 million will be recognized to earnings through interest expense ratably over the life of the senior notes and the ineffective portion of the hedge was insignificant. In August 2006, we issued \$450 million of 5.95% senior unsecured notes due 2017 and \$250 million of 5.69% senior unsecured notes due 2011 and terminated the remaining \$150 million of cash flow hedges. The settlement amount received of approximately \$1.6 million will be recognized to earnings through interest expense ratably over the lives of the senior unsecured notes. The ineffective portion of the hedge was insignificant.

In August 2005, we entered into \$300 million of cash flow hedges through forward-starting interest rate swaps to hedge interest rates on \$300 million of estimated debt offerings in 2007. The swaps qualify for hedge accounting with any changes in fair value recorded in OCI. At September 30, 2006, the fair value of these swaps was approximately \$9.6 million in an asset position as the effective rates of the swaps were lower than current interest rates at September 30, 2006.

In June 2006, we entered into a \$250 million cash flow hedge through an interest rate swap to fix the rate on \$250 million of previously floating rate debt, which matures in December 2006. The swap qualifies for hedge accounting with any changes in fair value recorded in OCI. At September 30, 2006, the fair value of this swap was approximately \$78,000 in a liability position and there was no ineffectiveness.

Recent Accounting Pronouncements

In June 2006, the FASB issued Interpretation No. 48, *Accounting for Uncertainty in Income Taxes, an Interpretation of FASB Statement No. 109* (FIN 48). FIN 48 clarifies the accounting for uncertainty in income taxes recognized in a company's financial statements and prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or expected to be taken in a tax return. The Interpretation also provides guidance on description, classification, interest and penalties, accounting in interim periods, disclosure and transition. FIN 48 becomes effective on January 1, 2007. We are currently evaluating the effect that the adoption of FIN 48 will have on our financial statements.

In September 2006, the SEC issued Staff Accounting Bulletin No. 108, *Considering the Effects of Prior Year Misstatements when Qualifying Misstatements in Current Year Financial Statements* (SAB 108). SAB 108 provides guidance regarding the process of qualifying financial statement misstatements. We will adopt SAB 108 in the fourth quarter of 2006 and do not believe that the adoption of SAB 108 will have a material effect on our financial statements.

Investments in Unconsolidated Companies

We analyze our investments in joint ventures under FASB Interpretation No. 46(R), *Consolidation of Variable Interest Entities* (FIN 46(R)), to determine if the joint venture is a VIE and would require consolidation. To the extent that our joint ventures do not qualify as VIEs, we further assess under the guidelines of EITF No. 04-5, *Determining Whether a General Partner, or the General Partners as a Group, Controls a Limited Partnership or Similar Entity when the Limited Partners Have Certain Rights* (EITF 04-5); Statement of Position 78-9, *Accounting for Investments in Real Estate Ventures*; Accounting Research Bulletin No.51, *Consolidated Financial Statements* and FASB No. 94, *Consolidation of All Majority-Owned Subsidiaries*, to determine if the venture should be consolidated.

We have equity interests in unconsolidated partnerships and joint ventures that own and operate rental properties, develop properties and hold land for development. The equity method of accounting is used for these investments in which we have the ability to exercise significant influence, but not control, over operating and financial policies. As a result, the assets and liabilities of these joint ventures are not included on our balance sheet. Our investment in unconsolidated companies represents approximately 6% of our total assets as of September 30, 2006.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to interest rate changes primarily as a result of our line of credit, preferred stock and long-term debt used to maintain liquidity and fund capital expenditures and expansion of our real estate investment portfolio and operations. Our interest rate risk management objective is to limit the impact of interest rate changes on earnings and cash flows and to lower our overall borrowing costs. To achieve our objectives, we borrow primarily at fixed rates and may enter into derivative financial instruments such as interest rate swaps, caps and treasury locks in order to mitigate our interest rate risk on a related financial instrument. We do not enter into derivative or interest rate transactions for speculative purposes. For a discussion of the market risk with respect to our outstanding cash flow hedges, see Management's Discussion and Analysis of Financial Condition and Results of Operations – Liquidity and Capital Resources – Financial Instruments.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities and Exchange Act of 1934, as amended, is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. These disclosure controls and procedures are further designed to ensure that such information is accumulated and communicated to management, including the Chief Executive Officer and the Chief Financial Officer to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rules 13a-15 and 15d-15. Based upon the foregoing, the Chief Executive Officer and the Chief Financial Officer concluded that, as of the end of the period covered by this Report, our disclosure controls and procedures are effective in all material respects.

(b) Changes in Internal Control over Financial Reporting

During the nine months ended September 30, 2006, there have been no changes in our internal control over financial reporting during the period covered by this report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Part II - Other Information

Item 1. Legal Proceedings

From time to time, we are parties to a variety of legal proceedings and claims arising in the ordinary course of our businesses. While these matters generally are covered by insurance, there is no assurance that our insurance will cover any particular proceeding or claim. We presently believe that all of these proceedings to which we were subject as of September 30, 2006, taken as a whole, will not have a material adverse effect on our liquidity, business, financial condition or results of operations.

Item 1A. Risk Factors

In addition to the information set forth in this Report, you also should carefully review and consider the information contained in our other reports and periodic filings that we make with the SEC, including, without limitation, the information contained under the caption "Item 1A. Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2005, and in our Quarterly Reports on Form 10-Q filed after the date of such Annual Report. Those risk factors could materially affect our business, financial condition and results of operations.

The risks that we describe in our public filings are not the only risks that we face. Additional risks and uncertainties not currently known to us, or that we presently deem to be immaterial, also may materially adversely affect our business, financial condition and results of operations.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

(a) Unregistered Sales of Equity Securities

None

(b) Use of Proceeds

None

(c) Issuer Purchases of Equity Securities

From time to time, we repurchase our common shares under a \$750 million repurchase program that initially was approved by the board of directors and publicly announced in October 2001 (the "Repurchase Program"). In July 2005, the Board of Directors authorized management to purchase up to \$750 million of common shares pursuant to this plan. Under the Repurchase Program, we also execute share repurchases on an ongoing basis associated with certain employee elections under our compensation and benefit programs.

The approximate dollar value of common shares that may yet be purchased under the Share Repurchase Program was \$450.4 million as of September 30, 2006.

Item 3. Defaults upon Senior Securities

During the period covered by this Report, we did not default under the terms of any of our material indebtedness, nor has there been any material arrearage of dividends or other material uncured delinquency with respect to any class of our preferred stock.

Item 4. Submission of Matters to a Vote of Security Holders

None.

Item 5. Other Information

During the period covered by this Report, there was no information required to be disclosed by us in a Current Report on Form 8-K that was not so reported, nor were there any material changes to the procedures by which our security holders may recommend nominees to our board of directors.
