{16} Non-registered investment company.

{17} A majority of the variable rate loans to our portfolio companies bear interest at a rate that may be determined by reference to either Libor or an alternate Base Rate (commonly based on the Federal Funds Rate or the Prime Rate), at the borrower's option, which reset semi-annually (S), quarterly (Q), bi-monthly (B) monthly (M) or daily (D). For each such loan, we have provided the current interest rate in effect at December 31, 2006.

{18} In addition to the interest earned based on the stated interest rate of this security, we are entitled to receive an additional interest amount of 2.50% on \$24,166,667 aggregate principal amount of the portfolio company's senior term debt previously syndicated by us.

{19} Under the 1940 Act, we are required to deem this non-controlled and non-related portfolio company an "affiliated" company, because we own more than 5% of the portfolio company's outstanding voting securities.

ARES CAPITAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

As of September 30, 2007 (unaudited)

1. ORGANIZATION

Ares Capital Corporation (the Company or ARCC or we) is a specialty finance company that is a closed-end, non-diversified management investment company incorporated in Maryland that is regulated as a business development company under the Investment Company Act of 1940 (the 1940 Act). We were incorporated on April 16, 2004 and initially funded on June 23, 2004. On October 8, 2004, we completed our initial public offering (the IPO). On the same date, we commenced substantial investment operations.

The Company has qualified and has elected to be treated for tax purposes as a regulated investment company, or a RIC , under the Internal Revenue Code of 1986, as amended (the Code). The Company expects to continue to qualify to be treated for tax purposes as a RIC. Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component, and, to a lesser extent, in equity investments in private U.S. middle market companies.

We are externally managed by Ares Capital Management LLC (the Investment Adviser), an affiliate of Ares Management LLC (Ares Management), an independent international firm that manages investment funds. Ares Operations LLC (Ares Administration), an affiliate of Ares Management, provides the administrative services necessary for us to operate pursuant to an amended and restated administration agreement (the Administration Agreement).

Interim financial statements are prepared in accordance with generally accepted accounting principles in the United States (GAAP) for interim financial information and pursuant to the requirements for reporting on Form 10-Q and Article 10 of Regulation S-X. Accordingly, certain disclosures accompanying financial statements prepared in accordance with GAAP are omitted. In the opinion of management, all adjustments, consisting solely of normal recurring accruals, considered necessary for the fair presentation of financial statements for the interim period, have been included. The current period's results of operations will not necessarily be indicative of results that ultimately may be achieved for the fiscal year ending December 31, 2007.

2. SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The accompanying consolidated financial statements have been prepared on the accrual basis of accounting in conformity with GAAP, and include the accounts of the Company and its wholly owned subsidiaries. The consolidated financial statements reflect all adjustments and reclassifications which, in the opinion of management, are necessary for the fair presentation of the results of the operations and financial condition for the periods presented. All significant intercompany balances and transactions have been eliminated.

Cash and Cash Equivalents

Cash and cash equivalents include short-term, liquid investments in a money market fund. Cash and cash equivalents are carried at cost which approximates fair value.

Concentration of Credit Risk

The Company places its cash and cash equivalents with financial institutions and, at times, cash held in money market accounts may exceed the Federal Deposit Insurance Corporation insured limit.

Investments

Investment transactions are recorded on the trade date. Realized gains or losses are computed using the specific identification method. Investments for which market quotations are readily available are valued at such market quotations. Debt and equity securities that are not publicly traded or whose market price is not readily available are valued at fair value as determined in good faith by our board of directors based on the input of our management and audit committee. In addition, the board of directors currently receives input from independent valuation firms that have been engaged at the direction of the board to assist in the valuation of each portfolio investment at least once during a trailing 12 month period. The valuation process is conducted at the end of each fiscal quarter, with approximately a quarter of our valuations of portfolio companies without market quotations subject to review by an independent valuation firm each quarter. The types of factors that the board may take into account in determining the fair value of our investments include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities and other relevant factors.

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. Because there is not a readily available market value for most of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board under a valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize.

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals responsible for the portfolio investment.

Preliminary valuation conclusions are then documented and discussed with our management.

The audit committee of our board of directors reviews these preliminary valuations, as well as the input of an independent valuation firm with respect to the valuations of approximately a quarter of our portfolio companies.

The board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of our management and audit committee and independent valuation firms.

Interest Income Recognition

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

Interest income, adjusted for amortization of premium and accretion of discount, is recorded on an accrual basis. Discounts and premiums on securities purchased are accreted/amortized over the life of the respective security using the effective yield method. The amortized cost of investments represents the original cost adjusted for the accretion of discounts and amortization of premiums.

Loans are generally placed on non-accrual status when principal or interest payments are past due 30 days or more or when there is reasonable doubt that principal or interest will be collected. Accrued interest is generally reversed when a loan is placed on non-accrual status. Interest payments received on non-accrual loans may be recognized as income or applied to principal depending upon management's judgment. Non-accrual loans are restored to accrual status when past due principal and interest is paid and, in management's judgment, are likely to remain current. The Company may make exceptions to this if the loan has sufficient collateral value and is in the process of collection. As of September 30, 2007, \$10,222,345 aggregate principal amount of loans were placed on non-accrual status. As of December 31, 2006, \$5,000,000 aggregate principal amount of loans were placed on non-accrual status.

Payment in Kind Interest

The Company has loans in its portfolio that contain a payment-in-kind (PIK) provision. The PIK interest, computed at the contractual rate specified in each loan agreement, is added to the principal balance of the loan and recorded as interest income. To maintain the Company's status as a RIC, this non-cash source of income must be paid out to stockholders in the form of dividends even though the Company has not yet collected the cash. For the three and nine months ended September 30, 2007, \$4,281,447 and \$10,015,029 in PIK income was recorded. For the three and nine months ended September 30, 2006, \$1,817,565 and \$4,373,346 in PIK income was recorded.

Capital Structuring Service Fees

The Company's Investment Adviser seeks to provide assistance to our portfolio companies in connection with the Company's investments and in return the Company may receive fees for capital structuring services. These fees are normally paid at the closing of the investments, are generally non-recurring and are recognized as revenue when earned upon closing of the investment. The services that the Company's Investment Adviser provides vary by investment, but generally consist of reviewing existing credit facilities, arranging bank financing, arranging equity financing, structuring financing from multiple lenders, structuring financing from multiple equity investors, restructuring existing loans, raising equity and debt capital, and providing general financial advice, which concludes upon closing of the investment. Any services of the above nature subsequent to the closing would generally generate a separate fee payable to the Company. In certain instances where the Company is invited to participate as a co-lender in a transaction and does not provide significant services in connection with the investment, a portion of loan fees paid to the Company in such situations will be deferred and amortized over the estimated life of the loan. The Company's Investment Adviser may also take a seat on the board of directors of a portfolio company, or observe the meetings of the board of directors without taking a formal seat.

Foreign Currency Translation

The Company's books and records are maintained in U.S. dollars. Any foreign currency amounts are translated into U.S. dollars on the following basis:

- (1) Market value of investment securities, other assets and liabilities at the exchange rates prevailing at the end of the day.
- (2) Purchases and sales of investment securities (and related income and expenses) at the rates of exchange prevailing on the respective dates of such transactions.

Although net assets and fair values are presented based on the applicable foreign exchange rates described above, the Company does not isolate the portion of its results of operations based on changes in foreign exchange rates from the portion of its results of operations based on changes in the fair value of its investments. Such exchange rate fluctuations are included with the net realized and unrealized gains or losses from investments. Foreign security and currency translations may involve certain considerations and risks not typically associated with investing in U.S. companies and U.S. government securities. These risks include, but are not limited to, currency fluctuations and revaluations and future

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

adverse political, social and economic developments, which could cause investments in their markets to be less liquid and prices more volatile than those of comparable U.S. companies or U.S. government securities.

Offering Expenses

The Company's offering costs were charged against the proceeds from the February Add-on Offering (as defined in Note 10), the April Add-on Offering (as defined in Note 10) and the August Add-on Offering (as defined in Note 10) when received. For the nine months ended September 30, 2007, the Company incurred approximately \$864,000 of such costs.

Debt Issuance Costs

Debt issuance costs are being amortized over the life of the related debt obligation using the straight line method, which closely approximates the effective yield method.

Federal Income Taxes

The Company has qualified and elected, and intends to continue to qualify, for the tax treatment applicable to regulated investment companies under Subchapter M of the Code and, among other things, has made and intends to continue to make the requisite distributions to its stockholders which will relieve the Company from federal income taxes. In order to qualify as a RIC, among other factors, the Company is required to timely distribute to its stockholders at least 90% of investment company taxable income, as defined by the Code, for each year.

Depending on the level of taxable income earned in a tax year, we may choose to carry forward taxable income in excess of current year dividend distributions into the next tax year and pay a 4% excise tax on such income, as required. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions, the Company accrues an excise tax estimate, if any, on estimated excess taxable income. For the three months ended September 30, 2007, the Company recorded a benefit of approximately \$(34,000) for this federal excise tax. For the nine months ended September 30, 2007 the Company recorded a benefit of approximately \$(64,000) for federal excise tax. For the three and nine months ended September 30, 2006, the Company recorded a benefit of approximately \$(253,000) and a provision of \$571,000 respectively for federal excise tax.

Certain of our wholly owned subsidiaries are subject to federal and state income taxes. For the three and nine months ended September 30, 2007, we recognized tax benefits of approximately \$(45,000) and \$(48,000), respectively, for these subsidiaries. For the three and nine months ended September 30, 2006, we recorded a tax provision of approximately \$4,244,000 and \$4,354,000, respectively, for these subsidiaries.

Dividends

Dividends and distributions to common stockholders are recorded on the record date. The amount to be paid out as a dividend is determined by the board of directors each quarter and is generally based upon the earnings estimated by management. Net realized capital gains, if any, are generally distributed at least annually, although we may decide to retain such capital gains for re-investment.

We have adopted a dividend reinvestment plan that provides for reinvestment of our distributions on behalf of our stockholders, unless a stockholder elects to receive cash. As a result, if our board of directors authorizes, and we declare, a cash dividend, then our stockholders who have not opted out of our dividend reinvestment plan will have their cash dividends automatically reinvested in additional shares of our common stock, rather than receiving the cash dividends.

Use of Estimates in the Preparation of Financial Statements

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of actual and contingent assets and liabilities at the date of the financial statements and the reported amounts of income or loss and expenses during the reporting period. Actual results could differ from those estimated or assumed. Significant estimates include the valuation of investments.

Fair Value of Financial Instruments

The carrying value of the Company's financial instruments approximate fair value. The carrying value of interest and open trade receivables, accounts payable and accrued expenses, as well as the credit facilities payable approximate fair value due to their short maturity. As of September 30, 2007, the fair value of the CLO Notes (as defined in Note 7) was approximately \$279.1 million (carrying value was \$314.0 million). As of December 31, 2006, the fair value of the CLO Notes approximated the carrying value as the variable interest rates were considered to be at market.

3. AGREEMENTS

The Company has entered into an amended and restated investment advisory and management agreement (the "Advisory Agreement") with the Investment Adviser under which the Investment Adviser, subject to the overall supervision of our board of directors, provides investment advisory services to the Company. For providing these services, the Investment Adviser receives a fee from us, consisting of two components: a base management fee and an incentive fee. The base management fee is calculated at an annual rate of 1.5% of our total assets (other than cash

or cash equivalents but including assets purchased with borrowed funds). The base management fee is payable quarterly in arrears. The base management fee is calculated based on the average value of our total assets (other than cash or cash equivalents but including assets purchased with borrowed funds) at the end of the two most recently completed calendar quarters.

The incentive fee has two parts. One part is calculated and payable quarterly in arrears based on our pre-incentive fee net investment income for the quarter. Pre-incentive fee net investment income means interest income, dividend income and any other income (including any other fees such as commitment, origination, structuring, diligence and consulting fees or other fees that we receive from portfolio companies but excluding fees for providing managerial assistance) accrued during the calendar quarter, minus operating expenses for the quarter (including the base management fee, any expenses payable under the administration agreement, and any interest expense and dividends paid on any outstanding preferred stock, but excluding the incentive fee). Pre-incentive fee net investment income includes, in the case of investments with a deferred interest feature such as market discount, debt instruments with payment-in-kind interest, preferred stock with payment-in-kind dividends and zero coupon securities, accrued income that we have not yet received in cash. The Investment Adviser is not under any obligation to reimburse us for any part of the incentive fee it received that was based on accrued income that we never received as a result of a default by an entity on the obligation that resulted in the accrual of such income.

Pre-incentive fee net investment income does not include any realized capital gains, realized capital losses or unrealized capital appreciation or depreciation. Pre-incentive fee net investment income, expressed as a rate of return on the value of our net assets (defined as total assets less indebtedness) at the end of the immediately preceding calendar quarter, is compared to a fixed hurdle rate of 2.00% per quarter.

We pay the Investment Adviser an incentive fee with respect to our pre-incentive fee net investment income in each calendar quarter as follows:

no incentive fee in any calendar quarter in which the pre-incentive fee net investment income does not exceed the hurdle rate;

100% of our pre-incentive fee net investment income with respect to that portion of such pre-incentive fee net investment income, if any, that exceeds the hurdle rate but is less than 2.50% in any calendar quarter. We refer to this portion of our pre-incentive fee net investment income (which exceeds the hurdle rate but is less than 2.50%) as the catch-up provision. The catch-up is meant to provide our Investment Adviser with 20% of the pre-incentive fee net investment income as if a hurdle rate did not apply if this net investment income exceeds 2.50% in any calendar quarter; and

20% of the amount of our pre-incentive fee net investment income, if any, that exceeds 2.50% in any calendar quarter.

These calculations are adjusted for any share issuances or repurchases during the quarter.

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The second part of the incentive fee (the Capital Gains Fee) is determined and payable in arrears as of the end of each calendar year (or upon termination of the Advisory Agreement, as of the termination date), commencing with the calendar year ending on December 31, 2004, and is calculated at the end of each applicable year by subtracting (a) the sum of the Company's cumulative aggregate realized capital losses and aggregate unrealized capital depreciation from (b) the Company's cumulative aggregate realized capital gains, in each case calculated from October 8, 2004. If such amount is positive at the end of such year, then the Capital Gains Fee for such year is equal to 20.0% of such amount, less the aggregate amount of Capital Gains Fees paid in all prior years. If such amount is negative, then there is no Capital Gains Fee for such year.

The cumulative aggregate realized capital gains are calculated as the sum of the differences, if positive, between (a) the net sales price of each investment in the Company's portfolio when sold and (b) the accreted or amortized cost basis of such investment.

The cumulative aggregate realized capital losses are calculated as the sum of the amounts by which (a) the net sales price of each investment in the Company's portfolio when sold is less than (b) the accreted or amortized cost basis of such investment.

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

The aggregate unrealized capital depreciation is calculated as the sum of the differences, if negative, between (a) the valuation of each investment in the Company's portfolio as of the applicable Capital Gains Fee calculation date and (b) the accreted or amortized cost basis of such investment.

We defer cash payment of any incentive fee otherwise earned by the Investment Adviser if during the most recent four full calendar quarter period ending on or prior to the date such payment is to be made the sum of (a) the aggregate distributions to our stockholders and (b) the change in net assets (before taking into account any incentive fees payable during that period) is less than 8.0% of our net assets at the beginning of such period. These calculations were appropriately pro rated during the first three calendar quarters following October 8, 2004 and are adjusted for any share issuances or repurchases.

For the three and nine months ended September 30, 2007, we incurred \$6,158,583 and \$17,062,254, respectively, in base management fees and \$5,966,012 and \$16,949,183 respectively, in incentive management fees related to pre-incentive fee net investment income. For the three and nine months ended September 30, 2007, we accrued no incentive management fees related to net realized capital gains. As of September 30, 2007, \$12,124,595 was unpaid and included in management and incentive fees payable in the accompanying consolidated balance sheet.

For the three and nine months ended September 30, 2006, we incurred \$3,660,997 and \$9,311,853, respectively, in base management fees and \$4,358,427 and \$11,365,248, respectively, in incentive management fees related to pre-incentive fee net investment income. For the three and nine months ended September 30, 2006, we accrued \$105,714 and \$2,962,176, respectively, in incentive management fees related to net realized capital gains.

We also entered into the Administration Agreement with Ares Administration under which Ares Administration furnishes us with office, equipment and clerical, bookkeeping and record keeping services at our office facilities. Payments under the Administration Agreement are equal to an amount based upon our allocable portion of Ares Administration's overhead and other expenses incurred in performing its obligations under the Administration Agreement, including our allocable portion of the cost of certain of our officers and their respective staffs. Under the Administration Agreement, Ares Administration also performs or oversees the performance of our required administrative services, which include, among other things, being responsible for the financial records which we are required to maintain and preparing reports to our stockholders and reports filed with the SEC. In addition, Ares Administration assists us in determining and publishing the net asset value, oversees the preparation and filing of our tax returns and the printing and dissemination of reports to our stockholders, and generally oversees the payment of our expenses and the performance of administrative and professional services rendered to us by others. Under the Administration Agreement, Ares Administration also provides on our behalf, managerial assistance to those portfolio companies to which we are required to provide such assistance. The Administration Agreement may be terminated by either party without penalty upon 60-days' written notice to the other party.

For the three and nine months ended September 30, 2007, we incurred \$291,000 and \$736,357, respectively, in administrative fees. As of September 30, 2007, \$291,000 was unpaid and included in accounts payable and accrued expenses in the accompanying consolidated balance sheet.

For the three and nine months ended September 30, 2006, we incurred \$201,763 and \$567,787, respectively, in administrative fees.

On October 29, 2004, we formed Ares Capital CP Funding LLC ("Ares Capital CP"), a wholly owned subsidiary of the Company, through which we established a revolving credit facility (the "CP Funding Facility"). On November 3, 2004, we entered into the CP Funding Facility that, as amended, allows Ares Capital CP to issue up to \$350.0 million of variable funding certificates. 8. DERIVATIVE INSTRUMENTS

In 2005, we entered into a costless collar agreement in order to manage the exposure to changing interest rates related to the Company's fixed rate investments. The costless collar agreement is for a notional amount of \$20 million, has a cap of 6.5%, a floor of 2.72% and matures in 2008. The costless collar agreement allows us to receive an interest payment for any quarterly period when the 3-month LIBOR exceeds 6.5%, and requires us to pay an interest payment for any quarterly period when the 3-month LIBOR is less than 2.72%. The costless collar resets quarterly based on the 3-month LIBOR. As of September 30, 2007, the 3-month LIBOR was 5.23%. As of September 30, 2007, this agreement had no fair value.

The underwriting costs related to our IPO were \$7,425,000, or \$0.675 per share. As a part of the IPO, the Investment Adviser, on our behalf, agreed to pay the underwriters \$0.225 of the \$0.675 per share in underwriting discount and commissions for a total of approximately \$2.5 million. We were obligated to repay this amount, together with accrued interest (charged at the 3-month LIBOR plus 2% starting on October 8,

13. IMPACT OF NEW ACCOUNTING STANDARDS

In July 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, (FIN 48). FIN 48 provides guidance on how uncertain tax positions should be recognized, measured, presented, and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Company's tax returns to determine whether the tax positions are more-likely-than-not of being sustained by the applicable tax authorities. Tax positions not deemed to satisfy the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. FASB required adoption of FIN 48 for fiscal years beginning after December 15, 2006, and FIN 48 is to be applied to all open tax years as of the effective date. However, on December 22, 2006, the Securities and Exchange Commission delayed the required implementation date of FIN 48 for business development companies until March 31, 2007. The Company has evaluated the implications of FIN 48 and determined that there is no material impact on the consolidated financial statements.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157, Fair Value Measurement (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements, but does not require any new fair value measurements. SFAS No. 157 is effective for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years. The Company has evaluated the implications of SFAS No. 157

and determined that there is no material impact in the consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which provides companies with an option to report selected financial assets and liabilities at fair value. The objective of SFAS 159 is to reduce both complexity in accounting for financial instruments and the volatility in earnings caused by measuring related assets and liabilities differently. SFAS 159 establishes presentation and disclosure requirements designed to facilitate comparisons between companies that choose different measurement attributes for similar types of assets and liabilities and to more easily understand the effect of the company's choice to use fair value on its earnings. SFAS 159 also requires

entities to display the fair value of the selected assets and liabilities on the face of the balance sheet. SFAS 159 does not eliminate disclosure requirements of other accounting standards, including fair value measurement disclosures in SFAS 157. This Statement is effective as of the beginning of an entity's first fiscal year beginning after November 15, 2007. Early adoption is permitted as of the beginning of the previous fiscal year provided that the entity makes that choice in the first 120 days of that fiscal year and also elects to apply the provisions of Statement 157. At this time, the Company is evaluating the implications of SFAS No. 159, and its impact in the consolidated financial statements has not yet been determined.

14. SUBSEQUENT EVENTS

OVERVIEW

We are a specialty finance company that is a closed-end, non-diversified management investment company incorporated in Maryland that is regulated as a business development company (a BDC) under the Investment Company Act of 1940 (the 1940 Act). We were founded on April 16, 2004 and were initially funded on June 23, 2004. On October 8, 2004, we completed our initial public offering (the IPO).

Our investment objective is to generate both current income and capital appreciation through debt and equity investments. We invest primarily in first and second lien senior loans and mezzanine debt, which in some cases includes an equity component, and, to a lesser extent, in equity investments in private U.S. middle market companies.

We are externally managed by Ares Capital Management LLC (the Investment Adviser), an affiliate of Ares Management LLC, an independent Los Angeles based firm that manages investment funds. Ares Operations LLC (Ares Administration), an affiliate of Ares Management LLC, provides the administrative services necessary for us to operate pursuant to an amended and restated administration agreement (the Administration Agreement).

As a BDC, we are required to comply with certain regulatory requirements. For instance, we generally have to

invest at least 70% of our total assets in qualifying assets, including securities and indebtedness of private U.S. companies, cash, cash equivalents, U.S. government securities and high-quality debt investments that mature in one year or less.

We have qualified and elected to be treated as a regulated investment company, or a RIC, under Subchapter M of the Internal Revenue Code of 1986, as amended (the Code). To qualify as a RIC, we must, among other things, meet certain source-of-income and asset diversification requirements and timely distribute to our stockholders at least 90% of our investment company taxable income, as defined by the Code, for each year. Pursuant to these elections, we generally will not have to pay corporate-level taxes on any income that we distribute to our stockholders.

PORTFOLIO AND INVESTMENT ACTIVITY

Consistent with lower loan volumes for the broader market, for the three months ended September 30, 2007, we issued 8 new commitments in an aggregate amount of \$113.9 million (\$34.0 million to new portfolio companies and \$79.9 million to existing portfolio companies) where the average commitment amount was approximately \$14.2 million and the weighted average commitment term was approximately 68 months, compared to 13 new commitments in an aggregate amount of \$285.5 million (\$204.0 million to new portfolio companies and \$81.5 million to existing portfolio companies) where the average commitment amount was approximately \$22.0 million and the weighted average commitment term was approximately 73 months for the three months ended September 30, 2006. Also during the three months ended September 30, 2007, we had \$106.2 million in exits and repayments of commitments resulting in net commitments of \$7.7 million for the period. For the three months ended September 30, 2006, we had \$119.4 million in exits and repayments of commitments resulting in net commitments of \$166.1 million for the period. We have remaining contractual obligations for \$7.5 million with respect to commitments funded as of September 30, 2007. The weighted average yield of debt and income producing equity securities funded during the three months ended September 30, 2007 and September 30, 2006 was approximately 12.16% and 12.04%, respectively, and the weighted average yield of debt and income producing equity securities exited or repaid during the three months ended September 30, 2007 and September 30, 2006 was approximately 11.50% and 12.49%, respectively (computed as (a) annual stated interest rate or yield earned plus the net annual amortization of original issue discount and market discount earned on accruing debt divided by (b) total debt and income producing equity securities at fair value).

For the three months ended September 30, 2007, the Company funded (A) \$75.1 million aggregate principal amount of senior term debt, (B) \$34.0 million aggregate principal amount of senior subordinated debt and (C) \$11.3 million of investments in equity securities. The Investment Adviser employs an investment rating system to categorize our investments. In addition to various risk management and monitoring tools, the Investment Adviser grades all loans on a scale of 1 to 4 no less frequently than quarterly. This system is intended to reflect the performance of the borrower's business, the collateral coverage of the loans and other factors considered relevant. Under this system, loans

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

with a grade of 4 involve the least amount of risk in our portfolio. The borrower is performing above expectations and the trends and risk factors are generally favorable (including a potential exit). Loans graded 3 involve a level of risk that is similar to the risk at the time of origination. The borrower is performing as expected and the risk factors are neutral to favorable. All new loans are initially graded 3. Loans graded 2 involve a borrower performing below expectations and indicates that the loan's risk has increased materially since origination. The borrower may be out of compliance with debt covenants, however, loan payments are generally not more than 120 days past due. For loans graded 2, we increase procedures to monitor the borrower and we will write down the fair

value of the investment if it is deemed to be impaired. A loan grade of 1 indicates that the borrower is performing materially below expectations and that the loan risk has substantially increased since origination. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. Loans graded 1 are not anticipated to be repaid in full and we will reduce the fair market value of the investment to the amount we anticipate will be recovered. As of September 30, 2007, the weighted average investment grade of the debt in our portfolio was 3.0 and one loan was past due or on non-accrual. The weighted average investment grade of the debt in our portfolio as of December 31, 2006 was 3.0. The following is a distribution of the grades of our portfolio companies as of September 30, 2007 and December 31, 2006:

	September 30, 2007		December 31, 2006	
	Fair Value	Number of Companies	Fair Value	Number of Companies
Grade 1	\$ 8,586,770	1	\$ 504,206	1
Grade 2	70,679,490	5	14,206,419	1
Grade 3	1,483,852,945	60	1,189,399,643	56
Grade 4	52,453,574	3	31,711,568	2
	\$ 1,615,572,779	69	\$ 1,235,821,836	60

As of September 30, 2007, the weighted average yield of the debt and income producing equity securities in our portfolio was approximately 11.63%. As of September 30, 2007, the weighted average yield on our entire portfolio was 10.25%. As of September 30, 2007, the weighted average yield on our senior term debt, senior subordinated debt and income producing equity securities was 11.32%, 12.58% and 9.57%, respectively. Of the senior term debt at September 30, 2007, the weighted average yield attributable to first lien senior term debt and second lien senior term debt was 10.81% and 12.21%, respectively.

As of December 31, 2006, the weighted average yield of the debt and income producing equity securities in our portfolio was approximately 11.95%. As of December 31, 2006, the weighted average yield on our entire portfolio was 10.79%. As of December 31, 2006, the weighted average yield on our senior term debt, senior subordinated debt and income producing equity securities was 11.52%, 13.16% and 10.00%, respectively. Of the senior term debt at December 31, 2006, the weighted average yield attributable to first lien senior term debt and second lien senior term debt was 11.22% and 11.94%, respectively.

The weighted average yield on our debt and income producing equity securities was lower as of September 30, 2007 compared to the weighted average yield on our debt and income producing equity securities as of December 31, 2006 because we added a higher percentage of lower yielding first lien investments during the nine months ended September 30, 2007, and the average yield on our exits and repayments was higher than the investments added during the period.

Interest expense and credit facility fees increased \$4.5 million, or 91%, to \$9.4 million for the three months ended September 30, 2007 from \$4.9 million for the comparable period in 2006, primarily due to the increase in the average outstanding borrowings. FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

Since the Company's inception, the Company's liquidity and capital resources have been generated primarily from the net proceeds of its initial public offering and subsequent public add-on offerings of common stock, the Debt Securitization, advances from the CP Funding Facility and the Revolving Credit Facility (each as defined in Note 7 to the consolidated financial statements), as well as cash flows from operations. During 2007, we received \$7.5 million in proceeds net of underwriting and offering costs related to the underwriter's exercise of the over-allotment option granted to it in connection with the December 19, 2006 public add-on offering, \$27.2 million in proceeds net of underwriting and offering costs from our February 9, 2007 public add-on offering, \$267.2 million in proceeds net of underwriting and offering costs from our April 4, 2007 public add-on offering and \$42.3 million in proceeds net of underwriting and offering costs from our August 28, 2007 public add-on offering. As of September 30, 2007, total market capitalization for the Company was \$1.2 billion compared to \$994.4 million as of December 31, 2006.

A portion of the proceeds from our public offerings in 2007 were used to repay outstanding indebtedness. The remaining unused portion of the proceeds from our public offerings was used to fund investments in portfolio companies in accordance with our investment objectives and strategies.

The weighted average stated interest rate of all our outstanding borrowings for the nine months ended September 30, 2007 and September 30, 2006 was 6.03% and 6.04%, respectively. As of September 30, 2007 and December 31, 2006, the weighted average maturity of all our outstanding borrowings was 8.1 years and 9.0 years, respectively. As of September 30, 2007 and December 31, 2006, the fair value of investments and cash and cash equivalents, and the outstanding borrowings under the Debt Securitization, CP Funding Facility and the Revolving Credit Facility were as follows:

	September 30, 2007		December 31, 2006	
Cash and cash equivalents	\$	48,707,617	\$	91,538,878
Senior term debt		1,005,544,463		791,677,723
Senior notes				10,000,000
Senior subordinated debt		387,842,496		299,877,755

The available amount for borrowing under the CP Funding Facility is \$350.0 million (see Note 7 to the consolidated financial statements for more detail on the CP Funding Facility arrangement). As of September 30, 2007, there was \$85.0 million outstanding under the CP Funding Facility. As of September 30, 2007, the CP Funding Facility was scheduled to expire on October 31, 2007 unless extended prior to such date with the consent of the lenders. On October 18, 2007, we entered into an amendment to extend the maturity of the CP Funding Facility to October 8, 2008. Additionally, the interest rate charged on the CP Funding Facility was increased to the commercial paper rate plus 1.00%.

The available outstanding committed amount for borrowing under the Revolving Credit Facility is \$350.0 million (see Note 7 to the consolidated financial statements for more detail on the Revolving Credit Facility arrangement).

Edgar Filing: ARES CAPITAL CORP - Form 10-Q

As of September 30, 2007, there was \$128.5 million outstanding under the Revolving Credit Facility. The Revolving Credit Facility expires on December 28, 2010.

As part of the Debt Securitization, \$314.0 million principal amount of asset-backed notes (including \$50.0 million revolving notes all of which had been drawn as of September 30, 2007) were issued to third parties and secured by a pool of middle market loans that had been purchased or originated by the Company. We retained approximately \$86.0 million of certain BBB and non-rated securities in the Debt Securitization. As of September 30, 2007, there was \$314.0 million aggregate principal amount of CLO Notes (as defined in Note 7 to the consolidated financial statements) outstanding. The CLO Notes mature on December 20, 2019.

During the quarter, Ares Capital received a long-term issuer rating of Baa3 from Moody's Investor Service and a long-term counterparty credit rating from Standard & Poor's Ratings Service of BBB, which it believes will provide access to broader financing sources and further diversify its capital raising alternatives.

For the three months ending September 30, 2007, average total assets were \$1.7 billion. The ratio of total debt outstanding to stockholders' equity as of September 30, 2007 was 0.46:1.00 compared to 0.61:1.00 as of December 31, 2006.

RECENT DEVELOPMENTS

As of November 7, 2007, the Company has issued \$220.7 million of commitments since September 30, 2007. In addition, as of November 7, 2007, the Company has an investment backlog and pipeline of approximately \$306.7 million and \$132.8 million, respectively. The Company expects to syndicate a portion of these amounts to third parties. The consummation of any of the investments in this backlog and pipeline depends upon, among other things, one or more of the following: satisfactory completion of our due diligence investigation of the prospective portfolio company, our acceptance of the terms and structure of such investment and the execution and delivery of satisfactory transaction documentation. The Company cannot assure you that we will make any of these investments.

Item 3. Quantitative and Qualitative Disclosures about Market Risk.

We are subject to financial market risks, including changes in interest rates and the valuations of our investment portfolio.

Interest Rate Risk

Interest rate sensitivity refers to the change in earnings that may result from changes in the level of interest rates. Because we fund a portion of our investments with borrowings, our net investment income is affected by the spread between the rate at which we invest and the rate at which we borrow. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income.

As of September 30, 2007, approximately 39% of the investments at fair value in our portfolio were at fixed rates while approximately 50% were at variable rates and 11% were non-interest earning. In addition, the Debt Securitization, the CP Funding Facility and the Revolving Credit Facility all feature variable rates.

We regularly measure our exposure to interest rate risk. We assess interest rate risk and manage our interest rate exposure on an ongoing basis by comparing our interest rate sensitive assets to our interest rate sensitive liabilities. Based on that review, we determine whether or not any hedging transactions are necessary to mitigate exposure to changes in interest rates.

On January 7, 2005, we entered into a costless collar agreement in order to manage the exposure to changing interest rates related to the Company's fixed rate investments. The costless collar agreement was for a notional amount of \$20 million, has a cap of 6.5%, a floor of 2.72% and matures in 2008. The costless collar agreement allows us to receive an interest payment when the 3-month LIBOR exceeds 6.5% and obligates us to pay an interest payment when the 3-month LIBOR is less than 2.72%. The costless collar resets quarterly based on the 3-month LIBOR. As of September 30, 2007, the 3-month LIBOR was 5.23%. As of September 30, 2007, this agreement had no fair value.

While hedging activities may mitigate our exposure to adverse fluctuations in interest rates, certain hedging transactions that we may enter into in the future, such as interest rate swap agreements, may also limit our ability to participate in the benefits of lower interest rates with respect to our portfolio investments.

Based on our September 30, 2007 balance sheet, the following table shows the impact on net income of base rate changes in interest rates assuming no changes in our investment and borrowing structure.

Basis Point Change	Interest Income		Interest Expense		Net Income
Up 300 basis points	\$	22,527,194	\$	15,825,000	\$ 6,702,194

Portfolio Valuation

Investments for which market quotations are readily available are valued at such market quotations. Debt and equity securities that are not publicly traded or whose market price is not readily available are valued at fair value as determined in

good faith by our board of directors based on the input of our management and audit committee. In addition, the board of directors currently receives input from independent valuation firms that have been engaged at the direction of the board to assist in the valuation of each portfolio investment at least once during a trailing 12 month period. The valuation process is conducted at the end of each fiscal quarter, with approximately a quarter of our valuations of portfolio companies subject to review by an independent valuation firm each quarter. The types of factors that the board may take into account in fair value valuation of our investments include, as relevant, the nature and realizable value of any collateral, the portfolio company's ability to make payments and its earnings and discounted cash flow, the markets in which the portfolio company does business, comparison to publicly traded securities and other relevant factors.

When an external event such as a purchase transaction, public offering or subsequent equity sale occurs, we use the pricing indicated by the external event to corroborate our valuation. Because there is not a readily available market value for most of the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by our board under a valuation policy and a consistently applied valuation process. Due to the inherent uncertainty of determining the fair value of investments that do not have a readily available market value, the fair value of our investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that we may ultimately realize.

In addition, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the valuations currently assigned.

With respect to investments for which market quotations are not readily available, our board of directors undertakes a multi-step valuation process each quarter, as described below:

Our quarterly valuation process begins with each portfolio company or investment being initially valued by the investment professionals responsible for the portfolio investment.

Preliminary valuation conclusions are then documented and discussed with our management.

The audit committee of our board of directors reviews these preliminary valuations, as well as the input of an independent valuation firm with respect to the valuations of approximately a quarter of our portfolio companies.

The board of directors discusses valuations and determines the fair value of each investment in our portfolio in good faith based on the input of our management and audit committee and independent valuation firms.
