UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark one)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2008.

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Numbers: 000-10972

First Farmers and Merchants Corporation

(Exact name of registrant as specified in its charter)

Tennessee

(State or other jurisdiction of incorporation or organization)

62-1148660

(I.R.S. Employer Identification No.)

**816 South Garden Street
Columbia, Tennessee**

(Address of principal executive offices)

38402-1148

(Zip Code)

931-388-3145

(Registrant's telephone number, including area code)

(Former name, former address and former fiscal year, if changed since last report)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act.

Large accelerated filer

Accelerated filer

Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date.

5,605,000 shares of common stock as of November 7, 2008

PART I - FINANCIAL INFORMATION

Item 1. Financial Statements.

The following unaudited consolidated financial statements of the Registrant and its subsidiaries are included in this Report:

Consolidated balance sheets - September 30, 2008 and December 31, 2007

Consolidated statements of income - For the three months and nine months ended September 30, 2008 and September 30, 2007

Consolidated statements of cash flows - For the nine months ended September 30, 2008 and September 30, 2007

Selected notes to consolidated financial statements

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - OTHER INFORMATION

The interim unaudited consolidated financial statements of First Farmers and Merchants Corporation (the Corporation) presented in this report have been prepared on a consistent basis and in accordance with the instructions to Form 10-Q and do not include all of the information and notes required by U.S. generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation have been included. These adjustments were of a normal, recurring nature and consistent with U.S. generally accepted accounting principles. For further information, refer to the consolidated financial statements and notes included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2007.

NOTE 2 STOCK REPURCHASE

During the third quarter of 2008, the Corporation repurchased, through negotiated transactions with third-party sellers, 19,643 shares of the Corporation's common stock at a price of \$50 per share for an aggregate purchase price of approximately \$982,000.

NOTE 3 FAIR VALUE MEASUREMENT

In September 2006, the Financial Accounting Standards Board (the FASB) issued Statement of Financial Accounting Standard (SFAS) No. 157, Fair Value Measurements (SFAS 157), which defines fair value, establishes a framework for measuring fair value in U.S. generally accepted accounting principles and expands disclosures about fair value measurements. SFAS 157 applies only to fair-value measurements that are already required or permitted by other accounting standards and is expected to increase the consistency of those measurements. The definition of fair value focuses on the exit price (i.e., the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date) not the entry price (i.e., the price that would be paid to acquire the asset or received to assume the liability at the measurement date). The statement emphasizes that fair value is a market-based measurement rather than an entity-specific measurement. Therefore, the fair value measurement should be determined based on the assumptions that market participants would use in pricing the asset or liability. The effective date for SFAS No. 157 is for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The Corporation adopted SFAS 157 effective January 1, 2008.

In February of 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS 159), which gives entities the option to measure eligible financial assets and financial liabilities at fair value on an instrument by instrument basis, that are otherwise not permitted to be accounted for at fair value under other accounting standards. The election to use the fair value option is available when an entity first recognizes a financial asset or financial liability. Subsequent changes in fair value must be recorded in earnings. This statement is effective as of the beginning of a company's first fiscal year after November 15, 2007. The adoption of SFAS 159 did not have a significant impact on the Corporation's consolidated financial statements. The Corporation also adopted SFAS 159 effective January 1, 2008, but did not elect the fair value option for any financial instrument not presently being accounted for at fair value.

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

The Corporation and its wholly-owned subsidiary, First Farmers and Merchants Bank (the Bank), has an established process for determining fair values. Fair value is based upon quoted market prices, where available. If listed prices or quotes are not available, fair value is based upon internally developed models or processes that use primarily market-based or independently-sourced market data, including interest rate yield curves, option volatilities and third party information. Valuation adjustments may be made to ensure that financial instruments are recorded at fair value. These adjustments include amounts to reflect counterparty credit quality (for financial assets reflected at fair value), the Bank 's creditworthiness (for financial liabilities reflected at fair value), liquidity and other unobservable parameters that are applied consistently over time as follows:

Table of Contents

- Credit valuation adjustments are necessary when the market price (or parameter) is not indicative of the credit quality of the counterparty;
- Debit valuation adjustments are necessary to reflect the credit quality of the Bank in the valuation of liabilities measured at fair value;
- Liquidity valuation adjustments are necessary when the Bank may not be able to observe a recent market price for a financial instrument that trades in inactive (or less active) markets or to reflect the cost of exiting larger-than-normal market-size risk positions; and
- Unobservable parameter valuation adjustments are necessary when positions are valued using internally developed models that use as their basis unobservable parameters – that is, parameters that must be estimated and are, therefore, subject to management judgment to substantiate the model valuation. These financial instruments are normally traded less actively.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while management of the Corporation believes that the Corporation's valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different estimate of fair value at the reporting date.

Valuation Hierarchy

SFAS 157 establishes a three-level valuation hierarchy for disclosure of fair value measurements. The valuation hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. The three levels are defined as follows:

- Level 1 – inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets;
- Level 2 – inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, and inputs that are observable for the asset or liability, either directly or indirectly, for substantially the full term of the financial instrument; and
- Level 3 – inputs to the valuation methodology are unobservable and significant to the fair value measurement.

A financial instrument's categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement. Below is a description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy.

Assets

Securities - Where quoted prices are available in an active market, securities are classified within level 1 of the valuation hierarchy. Level 1 securities include highly liquid government bonds, federal funds sold and certain other products. If quoted market prices are not available, then fair values are estimated by using pricing models, quoted prices of securities with similar characteristics, or discounted cash flows. Examples of such instruments, which would generally be classified within level 2 of the valuation hierarchy, include the Corporation's available-for-sale investment

securities portfolio. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within level 3 of the valuation hierarchy. At September 30, 2008, the Corporation had no securities classified within level 3.

Impaired loans A loan is considered to be impaired when it is probable the Bank will be unable to collect all principal and interest payments due in accordance with the contractual terms of the loan agreement. Individually identified impaired loans are measured based on the present value of expected payments using the loan's original effective

Table of Contents

rates as the discount rate, the loan's observable market price, or the fair value of the collateral if the loan is collateral dependent. If the recorded investment in the impaired loans exceeds the measure of fair value, a valuation allowance may be established as a component of the allowance for loan losses. Impaired loans are classified within the level 3 of the hierarchy.

Other assets Included in other assets are certain assets carried at fair value, including the cash value of Bank-owned life insurance policies. The carrying amount of these assets is based on information received from the insurance carriers indicating the financial performance of the policies and the amount the Bank would receive should the policies be surrendered. The Bank reflects these investments within level 2 of the valuation hierarchy.

Liabilities

Securities sold under repurchase agreements (repurchase agreements), federal funds purchased and other borrowings - At September 30, 2008, all of the Bank's repurchase agreements, federal funds purchased and other borrowings (overnight borrowings from the Federal Home Loan Bank) are settled on a short-term basis, usually daily. As a result, the fair value of the instruments approximates their carrying amount and classified such liabilities as level 2 within the valuation hierarchy.

Other liabilities The Bank has certain liabilities carried at fair value. These include future obligations pursuant to a supplemental retirement plan and proceeds of split-dollar life insurance policies. For these obligations, the Bank discounts the anticipated future cash flows using current interest rates. These liabilities are classified as level 2 within the valuation hierarchy.

The following table presents the financial instruments carried at fair value as of September 30, 2008, by caption on the consolidated balance sheet and by SFAS 157 valuation hierarchy (as described above) (dollars in thousands):

Assets and liabilities measured at fair value on a recurring basis as of September 30, 2008

| | Total carrying value in the consolidated balance sheet | Quoted market prices in an active market (Level 1) | Internal models with significant observable market parameters (Level 2) | Internal models with significant unobservable market parameters (Level 3) |
|-----------------------------------|--|--|---|---|
| Federal funds sold | \$ 25,025 | \$ 25,025 | | \$ |
| Available-for-sale securities | 165,848 | | 165,848 | |
| Other assets | 19,663 | | 19,663 | |
| Total assets at fair value | \$ 210,536 | \$ 25,025 | \$ 185,511 | \$ |

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

| | | | | | | |
|---|----|-------|----|----|-------|----|
| Securities sold under repurchase agreements | \$ | 1,652 | \$ | \$ | 1,652 | \$ |
| Other liabilities | | 5,509 | | | 5,509 | |
| Total liabilities at fair value | \$ | 7,161 | \$ | \$ | 7,161 | \$ |

Table of Contents

The Corporation may be required, from time to time, to measure certain assets at fair value on a nonrecurring basis in accordance with generally accepted accounting principles. These include assets that are measured at the lower of cost or market that were recognized at fair value below the cost at the end of the period. The following table presents the financial instruments carried at fair value as of September 30, 2008, by caption on the consolidated balance sheets and by SFAS 157, valuation hierarchy (as described above):

Assets and liabilities measured at fair value on a nonrecurring basis as of September 30, 2008

| | Total carrying value in the consolidated balance sheet | Quoted market prices in an active market (Level 1) | Internal models with significant observable market parameters (Level 2) | Internal models with significant unobservable market parameters (Level 3) |
|--|--|--|---|---|
| Impaired Loans | \$ 11,996 | \$ | \$ | \$ 11,996 |
| Total assets at fair value | \$ 11,996 | \$ | \$ | \$ 11,996 |
| Other liabilities | \$ | \$ | \$ | \$ |
| Total liabilities at fair value | \$ | \$ | \$ | \$ |

NOTE 4 - FEDERAL HOME LOAN BANK CREDIT LINE

The Bank has a Blanket Agreement for Advances and Security Agreement (the Blanket Agreement) with the Federal Home Loan Bank of Cincinnati (the FHLB). Advances made to the Bank under the Blanket Agreement are collateralized by the FHLB stock and unidentified qualifying residential mortgage loans totaling 150% of the outstanding amount borrowed. These collateralization matters are outlined in the Blanket Agreement dated March 31, 2008 between the Bank and the FHLB.

Scheduled annual principal maturities of borrowings under this credit line as of September 30, 2008 for the next five years are as follows:

| | | |
|-------|----|------------|
| 2009 | \$ | 7,000,000 |
| 2010 | | 10,077,052 |
| 2011 | | 7,000,000 |
| 2012 | | 7,000,000 |
| 2013 | | 10,100,000 |
| Total | \$ | 41,177,052 |

Stock held in the FHLB totaling \$2.9 million at September 30, 2008 is carried at cost. The stock is restricted and can only be sold back to the FHLB at par.

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

The Bank also has a Cash Management Advance (the CMA) Line of Credit Agreement dated September 30, 2008 with the Federal Home Loan Bank. The CMA is a component of the Blanket Agreement. The purpose of the CMA is to assist with short-term liquidity management. Under the terms of the CMA, the Bank may borrow a maximum of \$40,000,000, selecting a variable rate of interest for up to 90 days or a fixed rate for a maximum of 30 days. There were no borrowings outstanding under the CMA Line of Credit as of September 30, 2008.

NOTE 5- RECENT ACCOUNTING PRONOUNCEMENTS

In September 2006, the FASB ratified the consensus the Emerging Issues Task Force (the EITF) reached regarding EITF Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements (EITF 06-4), which provides accounting guidance for postretirement benefits related to endorsement split-dollar life insurance arrangements, whereby the employer owns and controls the insurance policies. The consensus concludes that an employer should recognize a liability for the postretirement benefit in accordance with SFAS No. 106, Employers Accounting for Postretirement Benefits Other

Table of Contents

Than Pensions (FAS 106), or Accounting Principles Board Opinion No. 12, Omnibus Opinion-1967 (APB 12). In addition, the consensus states that an employer should also recognize an asset based on the substance of the arrangement with the employee. EITF 06-4 is effective for fiscal years beginning after December 15, 2007.

In March 2007, the FASB ratified the consensus the EITF reached regarding EITF Issue No. 06-10, Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements (EITF 06-10), which provides accounting guidance for postretirement benefits related to collateral assignment split-dollar life insurance arrangements, whereby the employee owns and controls the insurance policies. The consensus concludes that an employer should recognize a liability for the postretirement benefit in accordance with FAS 106 or APB 12, as well as recognize an asset based on the substance of the arrangement with the employee. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The Corporation and the Bank adopted EITF 06-4 and 06-10 on January 1, 2008, and the effect of adoption on the consolidated financial statements was a reduction in retained earnings of approximately \$268,000 and an increase in accrued liabilities of approximately \$268,000.

In September 2006, the FASB ratified the consensus reached by the EITF on Issue 06-5, Accounting for Purchases of Life Insurance-Determining the Amount That Could Be Realized in Accordance with FASB Technical Bulletin No. 85-4, Accounting for Purchases of Life Insurance (EITF 06-5). The effective date of EITF 06-5 is for fiscal years beginning after December 15, 2006. The EITF concluded that a policyholder should consider any additional amounts included in the contractual terms of the policy in determining the amount that could be realized under the insurance contract. Amounts that are recoverable by the policyholder at the discretion of the insurance company should be excluded from the amount that could be realized. The Company adopted EITF 06-5 effective January 1, 2007. The adoption of EITF 06-5 had no effect on the Company's consolidated balance sheets or consolidated statements of income.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this report may not be based on historical facts and are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These forward-looking statements may be identified by, among other things, the use of forward-looking terminology such as could, expects, believes, may or will, or future or conditional verb tenses, and variations or negatives of such terms. These forward-looking statements include, without limitation, those relating to fair value methodologies and determinations, the potential sale of available-for-sale securities, loan portfolio concentrations and diversifications, reserves against loan portfolio segments, repayment of loans by borrowers, exposure to commercial borrowers in the construction and development industries, satisfaction of capital adequacy requirements, the repayment of borrowings from the Federal Home Loan Bank of Cincinnati (the FHLB), adequacy of capital resources and traditional sources of cash generated from operating activities to meet liquidity needs, the effect of fluctuating interest rates, the realization of deferred income tax assets and internal control over financial reporting. We caution you not to place undue reliance on such forward-looking statements in this report because results could differ materially from those anticipated due to a variety of factors. These factors include, but are not limited to, changes in economic conditions; fluctuations in prevailing interest rates and the effectiveness of our risk monitoring systems; the ability of our borrowers to repay loans; adverse changes in our special mention credits; our ability to sell available-for-sale securities to fund increased loan demand; our ability to meet regulatory capital adequacy requirements; our ability to meet liquidity needs from operating activities; the accuracy of assumptions in our rate risk analysis; our ability to recognize deferred tax assets; our ability to maintain credit quality; laws and regulations affecting financial institutions in general; our ability to control factors influencing net interest income; the geographic concentration of our assets; our ability to maintain sufficient asset quality and cost controls; and other factors generally understood to affect the financial results of financial services companies and other factors detailed from time to time in our filings with the Securities and Exchange Commission. We undertake no obligation to update these forward-looking statements to reflect events or circumstances that occur after the date of this report.

EXECUTIVE OVERVIEW

At September 30, 2008, the consolidated total assets of First Farmers and Merchants Corporation (the Corporation) were \$883.9 million, its consolidated net loans were \$550.4 million, its total deposits were \$719.2 million and its total shareholders' equity was \$106.6 million. The loan portfolio at September 30, 2008 reflected an increase of \$57.6 million, or 11.7%, compared to December 31, 2007. Total deposits increased \$20.2 million and shareholders' equity increased 0.3% during the first nine months of 2008.

FINANCIAL CONDITION

Average earning assets at September 30, 2008 were up 5.9%, or \$42.7 million, from average earning assets at December 31, 2007. Average overnight investments at September 30, 2008 were down \$4.7 million compared to December 31, 2007. Average investment securities at September 30, 2008 were up 5.8% compared to the average at December 31, 2007. Average total assets of \$842.2 million at September 30, 2008 increased 5.6% or \$45.0 million, compared to \$797.2 million at December 31, 2007.

Securities

The securities portfolio of First Farmers and Merchants Bank (the Bank), the Corporation's sole direct subsidiary, is an integral part of its asset/liability management process. These securities represent an important source of liquidity available to fund loans and accommodate asset reallocation strategies dictated by changes in the Bank's operating and tax plans, shifting yield spread relationships and changes in configuration of the yield curve. At September 30, 2008, the

Table of Contents

Bank's investment securities portfolio held \$165.8 million of available-for-sale securities, which are valued at fair market value, and \$63.3 million of held-to-maturity securities, which are valued at cost on the balance sheet. These compare to \$163.9 million of available-for-sale securities and \$75.6 million of held-to-maturity securities as of December 31, 2007. At September 30, 2008, the amortized cost of approximately \$167.9 million securities in the available-for-sale category exceeded the fair market value by \$2.0 million. These securities are predominantly securities issued by municipalities and mortgage-backed securities. The losses are due to overall increases in the market interest rates subsequent to purchase. The Corporation has the ability and the intent to hold these securities for a period of time sufficient to recover all gross unrealized losses. Accordingly, the Corporation has not recognized any other-than-temporary impairment for these securities.

Loans

The loan portfolio is the largest component of earning assets for the Bank and, consequently, provides the highest amount of revenues for the Corporation. The loan portfolio also contains the highest exposure to risk as a result of the possibility of unexpected deterioration in the credit quality of borrowers. When analyzing potential loans, management of the Bank assesses both interest rate objectives and credit quality objectives in determining whether to make a given loan and the appropriate pricing for that loan.

The vast majority of the Bank's outstanding loans continue to be housed in the Maury and Lawrence County portfolios. These two counties now account for 78.6% of total loans in the Bank's loan portfolio, which is down from 79.5% at June 30, 2008. The unemployment rate in five of the Bank's seven counties has worsened over the past 12 months. Overall, the softness in the general economy is being felt throughout the markets that the Bank serves, which increases the credit risk of the loan portfolio.

Although there is not an industry concentration as measured by regulatory guidelines within the Bank's loan portfolio, the Bank currently has heavy exposure in four broad industry categories: commercial construction and development; real estate renting and leasing; other services (churches); and public administration. These industries are monitored closely to ensure that underwriting practices, policies and loss allowance levels match the level of risk posed. Real estate loans represented 78.7% of total loans at September 30, 2008 compared to 77.9% at December 31, 2007. Management of the Bank believes the risk of this concentration is acceptable given the quality of underwriting and the low level of historical loss experience. The Bank's exposure to commercial borrowers in the construction and development industries declined by \$2.1 million in the third quarter. Loans in this industry were \$31.0 million at September 30, 2008, which represents 10.9% of commercial loans outstanding and which management believes is quite moderate in comparison to peers. The Bank's exposure to the residential construction component in particular is down considerably from peak levels reached 18 months ago. The portfolio remains well diversified across several different types of construction and development activity. All loans are expected to be repaid from cash flow or proceeds from the sale of selected assets of the borrowers. Collateral requirements for the loan portfolio are based on credit evaluation of the borrowers.

The analysis and review of asset quality by the Bank's credit administration includes a formal review that evaluates the adequacy of the allowance for possible loan and lease losses. This review is updated monthly and evaluated more completely quarterly in conjunction with loan review reports and evaluations that are discussed in meetings with loan officers, credit administration and the Bank's Board of Directors. The allowance for possible loan and lease losses was \$7.4 million, or 1.3% of gross loans and leases, at September 30, 2008, compared to \$7.4 million, or 1.5% of gross loans and leases, at December 31, 2007. Net charge-offs through September 30, 2008 were approximately \$75,000, which results in an annualized net charge-off ratio of 0.19%.

A formal process is in place to enhance control over the underwriting of loans and to monitor loan collectability. This process includes education and training of personnel about the Bank's loan policies and procedures, credit analysts to support lenders, timely identification of

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

loans with adverse characteristics, control of corrective actions and objective monitoring of loan reviews. The Special Assets Department of the Bank identifies and monitors assets that need attention. At September 30, 2008, this process identified loans totaling \$17.5 million, or 3.1% of the portfolio, that were classified as other assets especially mentioned, compared to loans totaling \$8.2 million, or 1.7% of the portfolio, so classified at

Table of Contents

December 31, 2007. Loans totaling \$14.5 million, or 2.6% of the portfolio, were classified as substandard at September 30, 2008, compared to loans totaling \$7.4 million, or 1.5% of the portfolio, so classified at . No loans were classified as doubtful at September 30, 2008 and December 31, 2007.

Deposits

The Bank does not have any foreign offices and all deposits are serviced in its 20 domestic offices. The Bank's average deposits increased 2.8% during the first nine months of 2008 compared to a decline of 1.0% in the first nine months of 2007. The increase results from the Bank offering more competitive rates on interest-bearing deposits. Average total noninterest-bearing deposits, which contribute to the Bank's low cost of deposits, were 17.4% of total deposits at September 30, 2008, compared to 17.9% at September 30, 2007 and 18.0% at December 31, 2007.

Regulatory Requirements for Capital

The Corporation and the Bank are subject to federal regulatory risk-adjusted capital adequacy standards. Failure to meet capital adequacy requirements could result in certain mandatory, and possibly additional discretionary actions by regulators that could have a direct material adverse effect on the financial condition of the Corporation and the Bank. The regulations require the Corporation and the Bank to meet specific capital adequacy guidelines that involve quantitative measures of assets, liabilities and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital classification is also subject to qualitative judgments by the regulators about components, risk weightings and other factors.

Quantitative measures established by the Board of Governors of the Federal Reserve System to ensure capital adequacy require the Corporation and the Bank to maintain minimum amounts and ratios of Tier 1 Capital and Total Capital (Tier 1 plus Tier 2 Capital) to risk-weighted assets and of Tier 1 Capital to average total assets (leverage capital ratio). Equity capital (net of certain adjustments for intangible assets and investments in non-consolidated subsidiaries and certain classes of preferred stock) is considered Tier 1 Capital. Tier 2 Capital consists of core capital plus subordinated debt, some types of preferred stock, and a defined percentage of the allowance for possible loan and lease losses. To be well-capitalized under federal bank regulations, a bank holding company must have a Tier 1 Capital ratio of at least 6%, a Total Capital ratio of at least 10%, and a leverage capital ratio of at least 5%. As of September 30, 2008, the Corporation's Tier 1, Total Capital and leverage capital ratios were 16.5%, 17.7% and 11.5%, respectively. The ratios were 16.9%, 18.2% and 12.2%, respectively, at December 31, 2007. As of September 30, 2008, the Bank's Tier 1 Capital, Total Capital and leverage capital ratios were 16.5%, 17.4%, and 11.3%, respectively, compared to 16.6%, 17.9%, and 11.9% at December 31, 2007. Management believes, as of September 30, 2008, that the Corporation and the Bank each met all capital adequacy requirements to which they are subject.

Liquidity and Capital Resources

Most of the capital needs of the Bank have historically been financed with retained earnings and deposits received and the Corporation's primary source of liquidity is dividends declared by the Bank. During March 2008, the Bank obtained five advances of \$7 million each for an aggregate borrowing of \$35 million from the FHLB. Scheduled repayment of the advances will begin in 2009 and end in 2013. In September, the Bank obtained two additional advances of \$3.1 million each, for a total borrowing for 2008 of \$41.2 million. Please refer to Note 4 in the notes to

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

consolidated financial statements for details.

The Bank is subject to Tennessee statutes and regulations that impose restrictions on the amount of dividends that may be declared. Furthermore, any dividend payments are subject to the continuing ability of the Bank to maintain its compliance with minimum federal regulatory capital requirements and to retain its characterization under federal regulations as a well-capitalized institution. The Bank declared a \$0.355 per share dividend in the second quarter of 2008, which was paid in the third quarter of 2008.

Management believes that the Corporation's traditional sources of cash generated from the Bank's operating activities are adequate to meet the Corporation's liquidity needs for normal ongoing operations. The Bank's Board of Directors has adopted a liquidity policy that outlines specific liquidity target balances. Compliance with this policy is

Table of Contents

reviewed quarterly by the Bank's Asset/Liability Committee and results are reported to the Bank's Board of Directors. The Bank's formal asset and liability management process is used to control interest rate risk and assist management in maintaining reasonable stability in the gross interest margin as a result of changes in the level of interest rates and/or the spread relationships among interest rates. The Bank uses an earnings simulation model to evaluate the impact of different interest rate scenarios on the gross margin. Each quarter, the Bank's Asset/Liability Committee monitors the relationship of rate sensitive earning assets to rate sensitive interest-bearing liabilities (interest rate sensitivity), which is the principal factor in determining the effect that fluctuating interest rates will have on future net interest income. Rate sensitive earning assets and interest-bearing liabilities are financial instruments that can be repriced to current market rates within a defined time period.

Critical Accounting Policies

The accounting principles the Bank follows and the methods of applying these principles conform with accounting principles generally accepted in the United States and with general practices within the banking industry. In connection with the application of those principles, the Bank's management has made judgments and estimates that, in the case of the determination of the allowance for loan and lease losses (ALLL) and the recognition of deferred income tax assets, have been critical to the determination of the Corporation's financial position, results of operations and cash flows. As of September 30, 2008, the deferred income tax asset was \$6.2 million, which was included with other assets on the balance sheet.

Allowance for Loan and Lease Losses

The Bank's management assesses the adequacy of the ALLL prior to the end of each month and prepares a more formal review quarterly to assess the risk in the Bank's loan portfolio. This assessment includes procedures to estimate the allowance and test the adequacy and appropriateness of the resulting balance. The ALLL represents calculated amounts for specifically identified credit exposure and exposures readily predictable by historical or comparative experience. Even though this calculation considers specific credits, the entire allowance is available to absorb any credit losses.

These calculated amounts are determined by assessing loans identified as not in compliance with loan agreements. These loans are generally in two different risk groups. One group is unique loans (commercial loans, including those loans considered impaired). The second group is pools of homogenous loans (generally retail and mortgage loans). The calculation for unique loans is based primarily on risk rating grades assigned to each of these loans as a result of the Bank's loan management and review processes. Each risk-rating grade is assigned a loss ratio, which is determined based on the experience of management, discussions with banking regulators and the independent loan review process. The amount allocated for an impaired loan is based on estimated cash flows discounted at the loan's original effective interest rate or the underlying collateral value. Historical data, including actual loss experience on specific types of homogenous loans, is used to allocate amounts for loans or groups of loans meeting the specified criteria. Management has developed procedures that provide more detailed historical data by category of retail and consumer credit and performance characteristics that broaden the analysis and improve monitoring of potential credit risk.

Criteria considered and processes utilized in evaluating the adequacy of the ALLL are:

- Portfolio quality trends;

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

- Changes in the nature and volume of the portfolio;
- Present and prospective economic and business conditions, locally and nationally;
- Management review systems and board oversight, including external loan review processes;
- Changes in credit policy, credit administration, portfolio management and procedures;
- Changes in personnel, management and staff; and
- Existence and effect of any concentrations of credit.

In assessing the adequacy of the ALLL, the risk characteristics of the entire loan portfolio are evaluated. This process includes the judgment of the Bank's management, input from independent loan reviews and reviews that may have been conducted by bank regulators as part of their usual examination process.

Table of Contents

Deferred Income Tax Assets

Deferred income tax assets consist mainly of the tax effect of excess provisions for loan and lease losses over actual losses incurred and deferred compensation. Management believes that it is more likely than not that these assets will be realized in future years.

OFF-BALANCE SHEET ARRANGEMENTS

The Bank is a party to financial instruments with off-balance-sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and stand-by letters of credit. Those instruments involve, to varying degrees, elements of credit risk in excess of the amount recognized on the balance sheet. The contract or notional amounts of those instruments reflect the extent of involvement the Bank has in those financial instruments. Loan commitments are agreements to lend to a customer as long as there is not a violation of any condition established in the contract. Stand-by letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements, including commercial paper, bond financing and similar transactions. The credit risk involved in issuing letters of credit is essentially the same as that involved in making a loan.

The total outstanding loan commitments and stand-by letters of credit in the normal course of business at September 30, 2008 were \$110.9 million and \$11.1 million, respectively, compared to \$116.9 million and \$12.0 million, respectively, at September 30, 2007 and \$139.6 million and \$17.7 million, respectively at December 31, 2007.

At September 30, 2008, the Corporation and the Bank did not have any off-balance sheet arrangements other than commitments to extend credit and stand-by letters of credit.

RESULTS OF OPERATIONS

Total interest income for the first nine months of 2008 was \$32.9 million compared to \$32.6 million for the first nine months of 2007, and \$10.9 million for the three months ended September 30, 2008 compared to \$11.0 million for the three months ended September 30, 2007. Interest and fees earned on loans and investments are the components of total interest income. Interest and fees earned on loans were \$24.7 million, a decrease of approximately \$75,000, or 0.3%, during the first nine months of 2008 compared to the first nine months of 2007, and \$8.2 million for the three months ended September 30, 2008, a decrease of approximately \$287,000, or 3.4%, compared to the three months ended September 30, 2007. Nominal interest earned on investment securities and other investments was \$8.2 million, an increase of approximately \$417,000, or 5.3%, during the first nine months of 2008 compared to the first nine months of 2007, and \$2.7 million for the three months ended September 30, 2008 compared to \$2.5 million for the three months ended September 30, 2007.

Total interest expense in the first nine months of 2008 was \$9.5 million, a decrease of \$2.6 million, or 21.2%, compared to the first nine months of 2007, and \$3.0 million for the three months ended September 30, 2008, a decrease of \$1.0 million, or 25.6%, compared to the three months

Edgar Filing: FIRST FARMERS & MERCHANTS CORP - Form 10-Q

ended September 30, 2007. The lower interest rates for certificates of deposits and public funds during the first nine months of 2008 were the primary reason for the lower expense. As a policy, budgeted financial goals are monitored on a monthly basis by the Bank's Asset/Liability Committee, which reviews the actual dollar change in net interest income for different interest rate movements. A negative dollar change in net interest income for a 12-month and 24-month period of less than 10.0% of net interest income given a 100-200 basis point shift in interest rates is considered an acceptable rate risk position. The rate risk analysis for the 12-month period beginning October 1, 2008 and ending September 30, 2009 showed a worst-case potential change to net interest income of a negative 6.6%, reflecting a potential decline in net interest income of \$2.1 million by the end of the period.

Net interest income of the Corporation on a fully taxable equivalent basis is influenced primarily by changes in:

- (1) the volume and mix of earning assets and sources of funding;
- (2) market rates of interest; and
- (3) income tax rates.

Table of Contents

The impact of some of these factors can be controlled by management policies and actions. External factors also can have a significant impact on changes in net interest income from one period to another. Some examples of such factors are:

- (1) the strength of credit demands by customers;
- (2) Federal Reserve Board monetary policy; and
- (3) fiscal and debt management policies of the federal government, including changes in tax laws.

The net interest margin, on a tax equivalent basis, at September 30, 2008, September 30, 2007 and December, 31, 2007 was 4.36%, 4.07% and 4.11%, respectively.

The analysis and review of asset quality by Management's loan review function and credit administration also includes a formal review that is prepared quarterly to assess the risk in the loan portfolio and to determine the adequacy of the allowance for loan and lease losses. An addition of \$50,000 was made to the allowance during the third quarter of 2008. Prior to the third quarter, no additions had been made to the allowance for 2008. The review supported management's assertion that the allowance was adequate at September 30, 2008.

Noninterest income was \$10.2 million, an increase of \$1.4 million, or 15.8%, during the first nine months of 2008 compared to the first nine months of 2007, and \$3.3 million for the three months ended September 30, 2008 compared to \$2.9 million for the three months ended September 30, 2007. Contributing to this increase for the nine-month period were gains on sales of available-for-sale securities, representing \$1.3 million in income.

Noninterest expenses, excluding the provision for possible loan and lease losses, were up \$2.1 million, or 9.9%, in the first nine months of 2008 as compared to the first nine months of 2007, and \$585,000, or 8.0%, higher for the three months ended September 30, 2008 compared to the three months ended September 30, 2007. Salaries and benefits expense was up \$1.3 million, or 11.1%, for the nine months ended September 30, 2008 compared to the same period in 2007, and up approximately \$222,000, or 5.5%, for the three months ended September 30, 2008 compared to the same period in 2007 because of changes in the Bank's incentive and retirement plans. Other operating expenses were up approximately \$664,000, or 8.8%, for the nine months ended September 30, 2008 compared to the same period in 2007, and up approximately \$290,000, or 12.29%, for the three months ended September 30, 2008 compared to the same period in 2007 because of increases in advertising expenses and professional fees.

The Corporation does not have any long-term debt or other long-term obligations other than the \$41.2 million aggregate advances from the FHLB received by the Bank in March and September 2008. Scheduled repayment of the advances will begin in 2009 and end in 2013. Please refer to Note 4 in the notes to consolidated financial statements for details.

The Bank leases certain bank properties. There was not a change during the nine-month period ended September 30, 2008 in the terms of these leases.

Net income for the nine months ended September 30, 2008 was \$8.1 million, compared to \$6.2 million for the nine months ended September 30, 2007, and \$2.8 million for the three months ending September 30, 2008 compared to \$2.1 million for the three months ending September 30, 2007. An increase in service fees, along with a realized gain on available-for-sale securities, contributed to the period-over-period increases. The Corporation earned \$0.50 per share in the third quarter of 2008 and \$0.37 per share in the third quarter of 2007.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

During the nine months ended September 30, 2008, there were no material changes in the quantitative and qualitative disclosures about market risk presented in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2007.

Table of Contents

Item 4. Controls and Procedures.

(a) Evaluation of Disclosure Controls and Procedures. The Corporation, with the participation of its management, including the Corporation's Chief Executive Officer and Assistant Treasurer (principal financial officer), carried out an evaluation of the effectiveness of the design and operation of its disclosure controls and procedures (as defined in Rules 13a-15 and 15d-15 under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based upon that evaluation and as of the end of the period covered by this report, the Corporation's Chief Executive Officer and Assistant Treasurer (principal financial officer) concluded that the Corporation's disclosure controls and procedures were effective in ensuring that information required to be disclosed in its reports that the Corporation files or submits to the Securities and Exchange Commission under the Exchange Act is recorded, processed, summarized and reported on a timely basis.

(b) Changes in Internal Control Over Financial Reporting. There has been no change in the Corporation's internal control over financial reporting that occurred during the third quarter of 2008 that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors.

There have been no material changes in the risk factors previously disclosed in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2007.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

The following table provides information regarding purchases of the Corporation's common stock made by the Corporation during the third quarter of 2008:

CORPORATION'S PURCHASES OF EQUITY SECURITIES
