Cemig in Brazil's Carbon Efficient Index for second year

Cemig (*Companhia Energética de Minas Gerais*), a listed company with securities traded on the stock exchanges of São Paulo, New York and Madrid, as part of its commitment to best corporate governance practices, informs its stockholders and the market as follows:

Cemig is in Brazil's ICO2 Carbon Efficient Index for the second consecutive year.

The **ICO2 stock index** (*Índice Carbono Eficiente*) was created last year by the BM&FBovespa (the São Paulo Stock, Commodities and Futures Exchange) and by the Brazilian Development Bank (BNDES), as an indicator to Brazilian and international capital markets of the commitment of Brazilian listed companies to the most up-to-date positions and debate on climate change.

The ICO2 index includes companies in the **IBrX-50** index that have committed to the conditions of this initiative which include comprehensive measurement of greenhouse gas emissions.

Calculation for the index uses the figures for each company's greenhouse gas emissions, in tons of carbon equivalent, weighted for the company's annual gross revenue in Reais.

Cemig's sources of energy are predominantly renewable, and its position in the index reflects its commitment in relation to climate change. Cemig helps to reduce greenhouse gas emissions by investing in energy efficiency and conservation programs, small and large hydroelectric power plants, alternative energy sources, and projects within the scope of the **CDM** (Clean Development Mechanism) of the Kyoto Protocol.
