Item 7.01 Regulation FD Disclosure.

On February 25, 2012, the Company received draft Cohort Default Rates from the federal Department of Education (ED) for students of the Company's institutions who entered repayment during the federal fiscal year ending September 30, 2010 (the 2010 Cohort). The weighted average of all institutions was 6.7%, a 14.8 percentage point improvement over the weighted average of 21.5% for the Company's institutions who entered repayment during the federal fiscal year ending September 30, 2009 (the 2009 Cohort). As anticipated, none of our institutions exceeded the 25% default threshold.

Under the Higher Education Act (the HEA), an institution could lose its eligibility to participate in some or all of the federal student financial aid programs if defaults by its former students on their federal student loans equal or exceed 25% per year for three consecutive years, or 40% in a single year. The term "institution" means a main campus and its additional locations, as defined by ED's regulations. ED generally publishes draft cohort default rates in February of each year for the repayment period that ended the prior September 30. We review all annually published Cohort Default Rates and appeal the rates we believe are inaccurate. Draft rates do not result in sanctions and can change between February and the release of the official cohort default rates in September.

The 2008 Higher Education Opportunity Act (the HEOA) made significant changes to the requirements governing the Title IV Programs, including the provisions on cohort default rates. Under the HEOA, a separate calculation will be performed starting for the 2009 Cohort that will add an additional federal fiscal year of borrowers' repayment performance to the applicable cohort year. Starting after rates for the 2011 Cohort are finalized in 2014, sanctions will be imposed if an institution has a cohort default rate, under the new calculation, of 30% or more per year for three consecutive federal fiscal years, or more than 40% for a single year.

As noted above, the average two-year default rate for the 2009 Cohort was substantially higher than the 2010 Cohort. We expect the higher two-year rates for the 2009 Cohort to translate into substantially elevated three-year rates for the same cohort, draft results for which we expect to receive in early March 2012. Thus, we expect a majority of our institutions to exceed the 30% threshold under the new 3-year measurement for the 2009 Cohort. Sanctions do not become applicable for the 3-year measurement until 2014, at which time final rates will have been published under the three-year measurement for the 2009, 2010 and 2011 Cohorts.

On an on-going basis, we monitor cohort repayment data, and we are currently monitoring the repayment and default status of the 2010, 2011 and 2012 Cohorts. Given the draft results for the 2010 Cohort (under the two-year measurement methodology), we believe we have significantly reduced the risk of any of our institutions exceeding the 30% threshold for three consecutive years under the new three-year measurement rules. We believe that these positive trends are the result of three main factors: 1) our substantial investment in cohort default prevention over the past two years; 2) stabilization in the student lending environment; and 3) the increased participation of loan servicers in default management.

If any of our institutions, depending on its size, were to lose eligibility to participate in federal student financial aid programs because of high student loan default rates, it could have a material adverse effect on our business.

Preliminary 2010 Cohort Default Rates by OPEID (under the current two-year measurement method):

The following table sets forth the draft Cohort Default Rates for our institutions as of February 25, 2012 for the 2010 Cohort:

Certain statements in this Report on Form 8-K may be deemed to be forward-looking statements under the Private Securities Litigation Reform Act of 1995. The Company intends that all such statements be subject to the safe-harbor provisions of that Act. Such statements include, but are not limited to, those pertaining to the Company's expectation that its institutions will be able to comply with the limitations on cohort default rates. Many factors may cause the Company's actual results to differ materially from those discussed in any such forward-looking statements, including risks associated with the uncertain effectiveness of the Company's default prevention efforts; possible changes in general macroeconomic and market conditions (including unemployment); and other risks and uncertainties described in the Company's filings with the U.S. Securities and Exchange Commission. If any of the Company's institutions, depending on its size, were to lose eligibility to participate in federal student financial aid programs because of high student cohort default rates, it could have a material adverse effect on the Company's business. The historical results achieved are not necessarily indicative of future prospects. The Company undertakes no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events or otherwise.
