PART I. FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

See Pages F-1 through F-11.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

CRITICAL ACCOUNTING POLICIES

Our consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States (GAAP). These accounting principles require us to make certain estimates, judgments and assumptions. We believe that the estimates, judgments and assumptions upon which we rely are reasonable based upon information available to us at the time that these estimates, judgments and assumptions are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities as of the date of the financial statements, as well as the reported amounts of revenues and expenses during the periods presented. To the extent there are material differences between these estimates, judgments or assumptions and actual results, our financial statements will be affected. The significant accounting policies that we believe are the most critical to aid in fully understanding and evaluating our reported financial results include the following:

- o Revenue Recognition
- o Deferred Revenue
- o Intangible Assets and Goodwill
- o Foreign currency translation
- o Accounting for Income Taxes

REVENUE RECOGNITION

We recognize revenue for finished products when the goods are shipped and title passes to the customer, provided that there are no uncertainties regarding customer acceptance, persuasive evidence of an arrangement exist; the sales price is fixed or determinable; and collectibility is deemed probable.

DEFERRED REVENUE

We have sold extended warranty contracts covering a period of four to nine years beyond the one year basic guarantee. The deferred revenue is recognized as income over the four to nine year period on a straight-line basis commencing one year from the sale of the contracts.

INTANGIBLE ASSETS AND GOODWILL

We account for intangible assets and goodwill in accordance with Statement of Financial Accounting Standards (SFAS) 142, "Goodwill and Other Intangible Assets", which we adopted on February 1, 2002. In accordance with that statement, goodwill and intangible assets with indefinite lives are no longer amortized, but rather tested for impairment at least annually. Intangible assets with estimable useful lives, consisting of patents, trademarks, and rights, are amortized on a straight-line basis over the estimated useful lives of 5 to 15 years, and are reviewed for impairment in accordance with SFAS 144, "Accounting for the Impairment of Long-Lived Assets".

Goodwill represents the excess of purchase price over the fair value of identifiable assets acquired in a purchase business combination. Goodwill and intangible assets with definite lives are tested annually for impairment in accordance with the provisions of SFAS 142.

Edgar Filing: DECTRON INTERNATIONALE INC - Form 10-Q

Impairment of goodwill is tested at the reporting unit level by comparing the reporting unit's carrying amount, including goodwill, to the fair value of the reporting unit. The fair values of the reporting units are estimated using a combination of the income or discounted cash flows approach and the market approach, which utilizes comparable companies' data. If the carrying amount of the reporting unit exceeds its fair value, then a second step is performed to measure the amount of impairment loss, if any. Any impairment loss would be expensed in the consolidated statements of earnings. The impairment test for intangibles with indefinite useful lives consists of a comparison of the fair value of the intangible assets with its carrying amount. When the carrying amount of the intangible assets exceeds its fair value, an impairment loss would be recognized for the difference.

Intangible assets with estimable lives and other long-lived assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of an asset or assets group may not be recoverable in accordance with SFAS 144. Recoverability of intangible assets with estimable lives and other long-lived assets is measured by a comparison of the carrying amount of an assets or asset group to future net undiscounted pretax cash flows expected to be generated by the assets or asset group. If these comparisons indicated that an asset is not recoverable, the impairment loss recognized is the amount by which the carrying amount of the asset or the asset group exceeds the related estimated fair value.

FOREIGN CURRENCY TRANSLATION

We maintain our books and records in Canadian dollars. Foreign currency transactions are translated using the temporal method. Under this method, all monetary items are translated into Canadian funds at the rate of exchange prevailing at balance sheet date. Non-monetary items are translated at historical rates. Income and expenses are translated at the rate in effect on the transaction dates. Transaction gains and losses are included in the determination of earnings for the year.

The translation of the financial statements from Canadian dollars into United States dollars is performed for the convenience of the reader. Balance sheet accounts are translated using closing exchange rates in effect at the balance sheet date and income and expense accounts are translated using an average exchange rate prevailing during each reporting period. No representation is made that the Canadian dollar amounts could have been, or could be, converted into United States dollars at the rates on the respective dates and or at any other certain rates. Adjustments resulting from the translation are included in the accumulated other comprehensive income in stockholder's equity.

INCOME TAXES

As part of the process of preparing our financial statements, we will be required to estimate our income taxes in each of the jurisdictions in which we operate. This process will involve estimates of our actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as depreciation and amortization, for tax and accounting purposes.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Market Risk and Risk Management

We are exposed to fluctuations in foreign currency exchange rates and interest rates. To manage certain of those exposures, we use futures, options and swaps. The instruments we utilize in our hedging activities are viewed as risk management tools, involve little complexity and are not used for trading or speculative purposes. Management believes that we satisfactorily diversify the counterparts used and monitor the concentration of risk to limit our counterpart exposure.

4

Interest Rate Risk

We are exposed to market risk related to fluctuations in interest rates on its debt. Increase in prevailing interest rates could increase our interest payment obligations relating to variable rate debt. For example, a 100 basis point increase in interest rates would increase annual interest expense by \$125,000.

ITEM 4. CONTROLS AND PROCEDURES

We believe it is critical to provide investors and other users of our financial statements with information that is relevant, objective, understandable and timely, so that they can make informed decisions. As a result, we have established and we maintain accounting systems and practices and internal control processes designed to provide reasonable assurance that transactions are properly executed and recorded and that our policies and procedures are carried out appropriately.

Edgar Filing: DECTRON INTERNATIONALE INC - Form 10-Q

Our management team is committed to providing high-quality, relevant and timely information about our businesses. Management performs reviews of each of our businesses throughout the year, addressing issues ranging from financial performance and strategy to personnel and compliance.

Management is responsible for implementing and maintaining adequate systems of internal and disclosure controls and procedures and for monitoring their effectiveness.

We evaluated the effectiveness of the design and operation of our "disclosure controls and procedures" ("Disclosure Controls") pursuant to Rules 13a-14(c) of the Securities Exchange Act of 1934, as amended (the "Exchange Act") and our "internal controls and procedures for financial reporting" (Internal Controls) as of the end of the period covered by this Quarterly Report on Form 10-Q. This evaluation was done under the supervision and with the participation of management.

- o Disclosure Controls are procedures that are designed with the objective of ensuring that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure Controls are also designed with the objective of ensuring that such information is accumulated and communicated to our management, including the Chief Executive Officer to allow timely decisions regarding required disclosure.
- o Internal Controls are procedures which are designed with the objective of providing reasonable assurance that (1) our transactions are properly authorized; (2) our assets are safeguarded against unauthorized or improper use; and (3) our transactions are properly recorded and reported, all to permit the preparation of our financial statements in conformity with generally accepted accounting principles in the United States Of America.

There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives

Based upon our management's evaluation, our chief executive officer and chief financial officer have concluded that, as of October 31, 2004, the disclosure and internal accounting controls provide reasonable assurance that information required to be disclosed in the reports that we file under the Exchange Act is recorded, processed, summarized and reported as and when required, including with specific reference that our assets are safeguarded, transactions are executed in accordance with management's authorizations and the financial records are reliable for the purpose of preparing financial statements.

There were no significant changes in our internal and disclosure controls or in other factors that could significantly affect such internal and disclosure controls subsequent to the date of their evaluation.

The company maintains its books and records in Canadian dollars. The operation of the company's subsidiary in the United States is an integrated corporation. As a result, monetary assets and liabilities in foreign currency are translated into Canadian dollars at exchange rates in effect at the balance sheet date, whereas non-monetary assets and liabilities are translated at the average exchange rates in effect at transaction dates. Income and expenses in foreign currency are translated at the average rate effective during the year with the exception of depreciation and amortization, which is translated at the historical rate. Gains and losses resulting from the translation of foreign currency transactions are included in earnings.

The translation of the financial statements from Canadian dollars into United States dollars is performed for the convenience of the reader. Balance sheet accounts are translated using closing exchange rates in effect at the balance sheet date and income and expense accounts are translated using an average exchange rate prevailing during each reporting period. No representation is made that the Canadian dollar amounts could have been, or could be, converted into United States dollars at the rates on the respective dates and or at any other certain rates. Adjustments resulting from the translation are included in the accumulated other comprehensive income in stockholder's equity.
