TERRITORIAL BANCORP INC. AND SUBSIDIARIES

Notes to Consolidated Financial Statements

(Unaudited)

(1) Basis of Presentation

The accompanying unaudited consolidated financial statements of Territorial Bancorp Inc. have been prepared in accordance with U.S. generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Rule 10-01 of Regulation S-X. Accordingly, certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. These interim condensed consolidated financial statements and notes should be read in conjunction with Territorial Bancorp Inc. s consolidated financial statements and notes thereto filed as part of the Annual Report on Form 10-K for the year ended December 31, 2010. In the opinion of management, all adjustments necessary for a fair presentation have been made and include all normal recurring adjustments. Interim results of operations are not necessarily indicative of results to be expected for the year.

(2) Organization

On November 4, 2008, the Board of Directors of Territorial Mutual Holding Company approved a plan of conversion and reorganization under which Territorial Mutual Holding Company would convert from a mutual holding company to a stock holding company. The conversion to a stock holding company was approved by the depositors and borrowers of Territorial Savings Bank and the Office of Thrift Supervision (OTS) and included the filing of a registration statement with the U.S. Securities and Exchange Commission. Upon the completion of the conversion and reorganization on July 10, 2009, Territorial Mutual Holding Company and Territorial Savings Group, Inc. ceased to exist as separate legal entities and Territorial Bancorp Inc. became the holding company for Territorial Savings Bank. A total of 12,233,125 shares were issued in the conversion at \$10 per share, raising \$122.3 million of gross proceeds. \$3.7 million of conversion expenses were offset against the gross proceeds. Territorial Bancorp Inc. s common stock began trading on the NASDAQ Global Select Market under the symbol TBNK on July 13, 2009

Upon completion of the conversion and reorganization, a special liquidation account was established in an amount equal to the total equity of Territorial Mutual Holding Company as of December 31, 2008. The liquidation account is to provide eligible account holders and supplemental eligible account holders who maintain their deposit accounts with Territorial Savings Bank after the conversion with a liquidation interest in the unlikely event of the complete liquidation of Territorial Savings Bank after the conversion. The liquidation account will be reduced annually to the extent that eligible account holders and supplemental eligible account holders have reduced their qualifying deposits. Subsequent increases will not restore an eligible account holder s or supplemental eligible account holder s interest in the liquidation account. In the event of a complete liquidation of Territorial Savings Bank, and only in such event, each account holder will be entitled to receive a distribution from the liquidation account in an amount proportionate to the adjusted qualifying account balances then held.

(3) Recently Adopted Accounting Pronouncements

In January 2010, the Financial Accounting Standards Board (FASB) amended the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification (ASC). The amendment requires disclosures about the significant transfers in and out of Level 1 and Level 2 fair value measurements and the reasons for the transfers, and requires the reconciliation of activity in Level 3 fair value measurements be made on a gross basis. The amendment also clarifies the level of

6

disaggregation required in disclosures and the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for Level 2 or Level 3 items. The part of the amendment related to the reconciliation of Level 3 activity is effective for interim and annual periods beginning after December 15, 2010, and was adopted by the Company on January 1, 2011. The remaining parts of the amendment were effective for interim and annual periods beginning after December 15, 2009, and were adopted by the Company on January 1, 2010. The Fair Value of Financial Instruments footnote has been updated to include the revised disclosures.

In April 2011, the FASB amended the Receivables topic of the FASB ASC. The amendment helps creditors determine whether a troubled debt restructuring has occurred by clarifying whether a restructuring constitutes a concession and whether the debtor is experiencing financial difficulties. The amendment also requires disclosures related to troubled debt restructurings that were initially effective for periods ending after December 15, 2010, but deferred to make the effective date concurrent with this amendment. The amendment is effective for the first interim or annual period beginning on or after June 15, 2011, and was adopted by the Company on July 1, 2011. The adoption did not have a material effect on its consolidated financial statements.

In April 2011, the FASB amended the Transfers and Servicing topic of the FASB ASC. The amendment modifies the criteria used to determine whether a repurchase agreement is accounted for as a sale or as a secured borrowing. The amendment is effective for interim or annual periods beginning on or after December 15, 2011. Early adoption is not permitted. The Company does not expect the adoption of this amendment to have any effect on its consolidated financial statements.

In May 2011, the FASB amended the Fair Value Measurement topic of the FASB ASC. The amendment results in common fair value measurement and disclosure requirements in U.S. generally accepted accounting principles and International Financial Reporting Standards. The amendment both clarifies the intent about existing fair value measurements as well as changes the principle or requirement for measuring fair value or disclosing fair value information. The amendment is effective for interim or annual periods beginning after December 15, 2011. Early application is not permitted. The Company does not expect the adoption of this amendment to have a material effect on its consolidated financial statements.

In June 2011, the FASB amended the Comprehensive Income topic of the FASB ASC. The amendment eliminates the option of presenting components of other comprehensive income as part of the statement of changes in stockholders equity. Non-owner changes in stockholders equity must be presented either in a continuous statement of comprehensive income or in two separate but consecutive statements. The amendment is effective for interim or annual periods beginning after December 15, 2011, with early adoption permitted. The adoption of this amendment will affect the location of disclosures related to other comprehensive income, but the Company does not expect any other material effect on its consolidated financial statements.

(4) Cash and Cash Equivalents

The table below presents the balances of cash and cash equivalents:

(Dollars in thousands)	September 30, 2011		Dec	ember 31, 2010
Cash and due from banks Interest-earning deposits in other banks	\$	9,266 123,182	\$	8,827 185,608
Cash and cash equivalents	\$	132,448	\$	194,435

(5) Investment Securities

The amortized cost and fair values of investment securities are as follows:

(Dollars in thousands)	Amortized cost	Gross unrealized Gains Losses		Estimated fair value
September 30, 2011:				
Held to maturity:				
U.S. government-sponsored mortgage-backed securities	\$ 658,542	36,324	(38)	\$ 694,828
Trust preferred securities	32	136	0	168
Total	\$ 658,574	36,460	(38)	\$ 694,996
December 31, 2010: Held to maturity:				
U.S. government-sponsored mortgage-backed securities	\$ 530,523	18,191	(1,998)	\$ 546,716
Trust preferred securities	32	96	0	128
Total	\$ 530,555	18,287	(1,998)	\$ 546,844
Available for sale:				
U.S. government-sponsored mortgage-backed securities	\$ 15,540	0	(530)	\$ 15,010
Total	\$ 15,540	0	(530)	\$ 15,010

\$15.0 million of U.S. government-sponsored mortgage-backed securities were reclassified from available-for-sale to held-to-maturity during the three months ended June 30, 2011. Management considers the held-to-maturity classification of these securities to be appropriate as the Company has the positive intent and ability to hold these securities to maturity.

The amortized cost and estimated fair value of investment securities at September 30, 2011 are shown below. Incorporated in the maturity schedule are mortgage-backed and trust preferred securities, which are allocated using the contractual maturity as a basis. Expected maturities may differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Amortized cost	Estimated fair value
Held to maturity:		
Due after 5 years through 10 years	\$ 8,018	\$ 8,278
Due after 10 years	650,556	686,718
Total	\$ 658,574	\$ 694,996

Realized gains and losses and the proceeds from sales of securities available for sale and trading are shown in the table below. All sales of securities were U.S. government-sponsored mortgage-backed securities.

	Three month Septembe		Nine months ended September 30,		
(Dollars in thousands)	2011	2010	2011	2010

Total	\$ 98,524	2,480	2,962	48	17	101,486	2,528

Trust Preferred Securities. At September 30, 2011, the Company owns two trust preferred securities, PreTSL XXIII and XXIV, with a carrying value of \$32,000. The difference between the carrying value of \$32,000 and the remaining amortized cost basis of \$1.1 million is included as a component of accumulated other comprehensive loss, net of taxes, and is related to non-credit factors such as the trust preferred securities market being inactive. The trust preferred securities represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions. All of these securities are classified in the Bank s held-to-maturity investment portfolio.

The trust preferred securities market is considered to be inactive as there were only five transactions in the last 21 months in similar tranches to the securities owned by the Company. The

Company used a discounted cash flow model to determine whether these securities are other-than-temporarily impaired. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates, estimated deferral and default rates on collateral, and estimated cash flows.

Based on the Company s review, the Company s investment in trust preferred securities did not incur additional impairment during the quarter ending September 30, 2011 as the present value of cash flows exceed the amortized cost basis of \$1.1 million.

At September 30, 2011, PreTSL XXIII and XXIV are rated C by Fitch.

It is reasonably possible that the fair values of the trust preferred securities could decline in the near term if the overall economy and the financial condition of some of the issuers continue to deteriorate and the liquidity of these securities remains low. As a result, there is a risk that the Company s amortized cost basis of \$1.1 million on its trust preferred securities could be other-than-temporarily impaired in the near term. The impairment could be material to the Company s consolidated statements of income.

The table below provides a cumulative roll forward of credit losses recognized in earnings for debt securities held and not intended to be sold:

(Dollars in thousands)	2011	2010
Balance at January 1	\$ 5,885	\$ 3,481
Credit losses on debt securities for which other-than-temporary impairment was not previously recognized	0	2,404
Balance at September 30	\$ 5,885	\$ 5,885

The table below shows the components of comprehensive loss, net of taxes, resulting from other-than-temporarily impaired securities:

(Dollars in thousands)	 mber 30, 011	nber 31, 010
Non-credit losses on other-than-temporarily impaired securities	\$ 679	\$ 679

22

There were no loans individually evaluated for impairment with a related allowance for loan loss as of September 30, 2011 or December 31, 2010.

Impaired loans at September 30, 2011 and December 31, 2010 amounted to \$5.0 million and \$3.4 million, respectively, and included all nonaccrual and restructured loans. During the nine months ended September 30, 2011, the average recorded investment in impaired loans was \$5.0 million and interest income recognized on impaired loans was \$108,000. During the nine months ended September 30, 2010, the average recorded investment in impaired loans was \$3.2 million and interest income recognized on impaired loans was \$98,000.

The Company primarily uses the aging of loans and accrual status to monitor the credit quality of its loan portfolio. When a mortgage loan becomes seriously delinquent (90 days or more contractually past due), it displays weaknesses which may result in a loss. As a loan becomes more delinquent, the likelihood of the borrower repaying the loan decreases and the loan becomes more collateral dependent. A mortgage loan becomes collateral dependent when the proceeds for repayment can be expected to

Table of Contents 23

14

come only from the sale or operation of the collateral and not from borrower repayments. Generally, new appraisals are obtained after a loan becomes collateral dependent or is five months delinquent. The carrying value of collateral dependent loans is adjusted to the fair market value of the collateral less selling costs. Any commercial real estate, commercial, or construction loan that has a loan balance in excess of a specified amount is also periodically reviewed to determine whether the loan exhibits any weaknesses and is performing in accordance with its contractual terms.

The Company had 11 nonaccrual loans with a book value of \$2.4 million at September 30, 2011 and seven nonaccrual loans with a book value of \$808,000 as of December 31, 2010. The Company collected or recognized interest income on nonaccrual loans of \$8,000 and \$0 during the nine months ended September 30, 2011 and 2010, respectively. The Company would have recognized additional interest income of \$84,000 and \$19,000 during the nine months ended September 30, 2011 and 2010, respectively, had the loans been accruing interest. The Company did not have any loans 90 or more days past due and still accruing interest as of September 30, 2011 and December 31, 2010.

The table below presents information about the Company s new troubled debt restructurings by class of loans:

			2011		2010						
(Dollars in thousands)	Number of Loans	Pre- Modification Recorded Investment		Post- Modification Recorded Investment		Number of Loans	Mod Red	Pre- ification corded estment	Post- Modification Recorded Investment		
Nine months ended September 30:											
One- to four-family residential	0	\$	0	\$	0	2	\$	417	\$	396	
Total	0	\$	0	\$	0	2	\$	417	\$	396	

There were no new troubled debt restructurings during the three months ended September 30, 2011 or 2010. There were also no new troubled debt restructurings within the past twelve months that subsequently defaulted.

The Company had nine troubled debt restructurings totaling \$2.6 million as of September 30, 2011, all of which were one- to four-family residential mortgage loans and considered to be impaired. Eight of the nine loans are performing in accordance with their restructured terms and accruing interest at September 30, 2011. One loan was 29 days delinquent and still accruing interest at September 30, 2011. There were nine restructured one- to four-family residential mortgage loans totaling \$2.6 million as of December 31, 2010 that were considered to be impaired. Eight of the nine loans were performing in accordance with their restructured terms and accruing interest as of December 31, 2010. One loan was 29 days delinquent and still accruing interest at December 31, 2010. Restructurings include deferrals of interest and/or principal payments and temporary or permanent reductions in interest rates due to the financial difficulties of the borrowers. We have no commitments to lend any additional funds to these borrowers. The troubled debt restructurings were individually evaluated for impairment and did not have a significant effect on the allowance for loan losses.

Nearly all of our real estate loans are collateralized by real estate located in the State of Hawaii. Loan-to-value ratios on these real estate loans generally do not exceed 80% at the time of origination.

During the nine months ended September 30, 2011 and 2010, the Company sold \$35.3 million and \$31.1 million, respectively, of residential mortgage loans held for sale and recognized gains of \$374,000 and \$420,000, respectively. During the three months ended September 30, 2011 and 2010, the Company sold \$9.2 million and \$12.4 million, respectively, of mortgage loans held for sale and recognized gains of

\$138,000 and \$165,000, respectively. The Company had 13 residential mortgage loans held for sale totaling \$3.0 million at September 30, 2011 and 13 residential mortgage loans held for sale totaling \$3.2 million at December 31, 2010. We have not had to repurchase any loans from Freddie Mac for the nine months ended September 30, 2011 and 2010.

The Company serviced loans for others of \$120.8 million at September 30, 2011 and \$131.6 million at December 31, 2010. Of these amounts, \$7.1 million and \$8.1 million relate to securitizations for which the Company continues to hold the related mortgage-backed securities at September 30, 2011 and December 31, 2010, respectively. The amount of contractually specified servicing fees earned for the nine-month periods ended September 30, 2011 and 2010 was \$266,000 and \$302,000, respectively. The amount of contractually specified servicing fees earned for the three-month periods ended September 30, 2011 and 2010 was \$87,000 and \$100,000, respectively. The fees are reported in service fees on loan and deposit accounts in the consolidated statements of income.

(7) Securities Sold Under Agreements to Repurchase

Securities sold under agreements to repurchase are treated as financings and the obligations to repurchase the identical securities sold are reflected as a liability with the dollar amount of securities underlying the agreements remaining in the asset accounts. Securities sold under agreements to repurchase are summarized as follows:

	September	30, 2011	December 31, 2010			
(Dollars in thousands)	Repurchase Liability	Weighted Average Rate	Repurchase Liability	Weighted Average Rate		
Maturing:						
1 year or less	\$ 40,200	4.72%	\$ 43,900	3.53%		
Over 1 year to 2 years	33,000	3.91	28,300	4.75		
Over 2 years to 3 years	0	0	33,000	3.91		
Over 3 years to 4 years	47,000	2.11	0	0		
	\$ 120,200	3.48%	\$ 105,200	3.98%		

Below is a summary comparing the carrying value and fair value of securities pledged to secure repurchase agreements, the repurchase liability, and the amount at risk at September 30, 2011. The amount at risk is the greater of the carrying value or fair value over the repurchase liability. All the agreements to repurchase are with JP Morgan Chase Bank N.A. and JP Morgan Securities LLC. The securities pledged are issued and guaranteed by U.S. government-sponsored enterprises.

(Dollars in thousands)	Carrying value of securities	Fair value of securities	Repurchase liability	Amount at risk	Weighted average months to maturity
Maturing:					
Over 90 days	\$ 137,143	\$ 145,209	\$ 120,200	\$ 25,009	24
	\$ 137,143	\$ 145,209	\$ 120,200	\$ 25,009	24

(8) Employee Benefit Plans

The Company has a noncontributory defined benefit pension plan (Pension Plan) that covers substantially all employees with at least one year of service. Effective December 31, 2008, under approved changes to the Pension Plan, there were no further accruals of benefits for any participants and benefits will not increase with any additional years of service. Net periodic benefit cost, subsequent to December 31, 2008, has not been significant and is not disclosed in the table below.

In addition, the Company sponsors a Supplemental Employee Retirement Plan (SERP), a noncontributory supplemental retirement benefit plan, which covers certain current and former employees of the Company for amounts in addition to those provided under the Pension Plan.

The components of net periodic benefit cost were as follows:

	Three M	SERP onths Ended ember 30,	Nine Mon	CRP oths Ended other 30,
(Dollars in thousands)	2011	2010	2011	2010
Net periodic benefit cost for the period				
Service cost	\$ 111	\$ 155	\$ 332	\$ 465
Interest cost	53	89	161	266
Expected return on plan assets	0	0	0	0
Amortization of prior service cost	0	0	0	0
Recognized actuarial loss	0	0	0	0
Recognized curtailment loss	0	0	0	0
Net periodic benefit cost	\$ 164	\$ 244	\$ 493	\$ 731

(9) Employee Stock Ownership Plan

Effective January 1, 2009, Territorial Savings Bank adopted an Employee Stock Ownership Plan (ESOP) for eligible employees. The ESOP borrowed \$9.8 million from the Company and used those funds to acquire 978,650 shares or 8% of the total number of shares issued by the Company in its initial public offering. The shares were acquired at a price of \$10.00 per share.

The loan is secured by the shares purchased with the loan proceeds and will be repaid by the ESOP over the 20-year term of the loan with funds from Territorial Savings Bank s contributions to the ESOP

and dividends payable on the shares. The interest rate on the ESOP loan is an adjustable rate equal to the prime rate, as published in The Wall Street Journal. The interest rate adjusts annually and will be the prime rate on the first business day of the calendar year.

Shares purchased by the ESOP are held by a trustee in an unallocated suspense account, and shares are released annually from the suspense account on a pro-rata basis as principal and interest payments are made by the ESOP to the Company. The trustee allocates the shares released among participants on the basis of each participant s proportional share of compensation relative to all participants. As shares are committed to be released from the suspense account, Territorial Savings Bank reports compensation expense based on the average fair value of shares released with a corresponding credit to stockholders—equity. The shares committed to be released are considered outstanding for earnings per share computations. Compensation expense recognized for the three months ended September 30, 2011 and 2010 amounted to \$236,000 and \$212,000, respectively. Compensation expense recognized for the nine months ended September 30, 2011 and 2010 amounted to \$704,000 and \$677,000, respectively.

Shares held by the ESOP trust were as follows:

	September 30, 2011	December 31, 2010
Allocated shares	134,564	97,865
Unearned shares	844,086	880,785
Total ESOP shares	978,650	978,650
Fair value of unearned shares, in thousands	\$ 16,164	\$ 17,536

The ESOP restoration plan is a non-qualified plan that provides supplemental benefits to certain executives who are prevented from receiving the full benefits contemplated by the employee stock ownership plan s benefit formula. The supplemental cash payments consist of payments representing shares that cannot be allocated to the participants under the ESOP due to IRS limitations imposed on tax-qualified plans. We accrue for these benefits over the period during which employees provide services to earn these benefits. For the three months ended September 30, 2011 and 2010, we accrued \$1,000 and \$3,000, respectively, for the ESOP restoration plan. For the nine months ended September 30, 2011 and 2010, we accrued \$159,000 and \$158,000, respectively, for the ESOP restoration plan.

(10) Share-Based Compensation

On August 19, 2010, Territorial Bancorp Inc. adopted the 2010 Equity Incentive Plan, which provides for awards of stock options and restricted stock to key officers and outside directors. In accordance with the Compensation Stock Compensation topic of the FASB ASC, the cost of the 2010 Equity Incentive Plan is based on the fair value of the awards on the grant date. The fair value of restricted stock is based on the closing price of the Company s stock on the grant date. The fair value of stock options is estimated using a Black-Scholes option pricing model using assumptions for dividend yield, stock price volatility, risk-free interest rate and option term. These assumptions are based on our judgments regarding future events, are subjective in nature, and cannot be determined with precision. The cost of the awards will be recognized on a straight-line basis over the six-year vesting period during which participants are required to provide services in exchange for the awards.

Shares of our common stock issued under the Plan shall be authorized but unissued shares. The maximum number of shares that will be awarded under the Plan will be 1,712,637 shares. Share-based compensation expense for the three months and nine months ended September 30, 2011 was \$1.5 million and \$3.0 million, respectively.

Stock Options

The table below presents the stock option activity for the nine months ended September 30, 2011:

	Options	Weighted average exercise price	Remaining contractual life (years)	in	gregate trinsic value nousands)
Balance at December 31, 2010	871,144	\$ 17.36	9.67	\$	2,221
Granted	0	0	0	Ψ	0
Exercised	0	0	0		0
Forfeited	0	0	0		0
Expired	0	0	0		0
Balance at September 30, 2011	871,144	\$ 17.36	8.92	\$	1,559

As of September 30, 2011, the Company had \$3.5 million of unrecognized compensation costs related to stock options. The cost of stock options will be amortized in equal annual installments over the six-year vesting period. There were 179,587 options vested in the nine months ending September 30, 2011.

The fair value of the Company s stock options was determined using the Black-Scholes option pricing formula. The following assumptions were used in the formula:

Expected volatility	31.98%
Risk-free interest rate	2.58%
Expected dividends	1.61%
Expected life (in years)	6.75
Grant price for the stock options	\$ 17.36

Expected volatility - Based on the historical volatility of the Company s stock and a peer group of comparable thrifts.

Risk-free interest rate - Based on the U.S. Treasury yield curve and expected life of the options at the time of grant.

Expected dividends - Based on the quarterly dividend and the price of the Company s stock at the time of grant.

Expected life - Based on a weighted-average of the six-year vesting period and the 10-year contractual term of the stock option plan.

Grant price for the stock options - Based on the closing price of the Company s stock on the date of grant.

Restricted Stock Awards

Restricted stock awards are accounted for as fixed grants using the fair value of the Company s stock at the time of grant. Unvested restricted stock awards may not be disposed of or transferred during the vesting period. Restricted stock awards carry with them the right to receive dividends.

The table below presents the restricted stock award activity for the six months ended September 30, 2011:

	Restricted stock awards	Weighted average grant date fair value
Non-vested at December 31, 2010	713,600	\$ 17.36
Granted	0	0
Vested	149,606	0
Forfeited	0	0
Non-vested at September 30, 2011	563,994	\$ 17.36

There were 149,606 shares vested in the nine months ending September 30, 2011.

As of September 30, 2011, the Company had \$9.6 million of unrecognized compensation cost related to restricted stock awards. The cost of the restricted stock awards will be amortized in equal annual installments over the six-year vesting period.

(11) Earnings Per Share

The table below presents the information used to compute basic and diluted earnings per share:

		Three Months Ended September 30,					Months Ended otember 30,					
(Dollars in thousands, except share data)	2011		2011 2010 2011		2011		2	2010				
Net income	\$	2,986	\$	3,134	\$	9,371	\$	7,830				
Weighted average number of shares used in:												
Basic earnings per share	10,	659,532	11,	,334,058 10,969.		,969,320	0 11,321,91					
Dilutive common stock equivalents:												
Stock options and restricted stock units		176,117		10,564		148,124	34,825					
Diluted earnings per share	10,	835,649	11,344,622		11,344,622		11,344,622		11,	,117,444	11,	,356,737
Net income per common share, basic	\$	0.28	\$	0.28	\$	0.85	\$	0.69				
Net income per common share, diluted	\$	0.28	\$	0.28	\$	0.84	\$	0.69				

(12) Fair Value of Financial Instruments

In accordance with the Fair Value Measurements and Disclosures topic of the FASB ASC, the Company groups its financial assets and liabilities at fair value into three levels based on the markets in which the financial assets and liabilities are traded and the reliability of the assumptions

Edgar Filing: Territorial Bancorp Inc. - Form 10-Q

used to determine fair value as follows:

Level 1 Valuation is based upon quoted prices (unadjusted) for identical assets or liabilities traded in active markets. A quoted price in an active market provides the most reliable evidence of fair value and shall be used to measure fair value whenever available.

20

Level 2 Valuation is based upon quoted prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 Valuation is generated from model-based techniques that use significant assumptions not observable in the market. These unobservable assumptions reflect management s own estimates of assumptions that market participants would use in pricing the asset or liability. Valuation techniques include use of discounted cash flow models and similar techniques that require the use of significant judgment or estimation.

In accordance with the Fair Value Measurements and Disclosures topic, the Company bases its fair values on the price that it would expect to receive if an asset were sold or the price that it would expect to pay to transfer a liability in an orderly transaction between market participants at the measurement date. Also as required, the Company maximizes the use of observable inputs and minimizes the use of unobservable inputs when developing fair value measurements.

The Company uses fair value measurements to determine fair value disclosures. Investment securities held for sale and derivatives are recorded at fair value on a recurring basis. From time to time, the Company may be required to record other financial assets at fair value on a nonrecurring basis, such as loans held for sale, impaired loans and investments, and mortgage servicing assets. These nonrecurring fair value adjustments typically involve application of the lower of cost or fair value accounting or write-downs of individual assets.

Cash and Cash Equivalents, Accrued Interest Receivable, Accounts Payable and Accrued Expenses (excluding interest rate contracts), Current Income Taxes Payable, and Advance Payments by Borrowers for Taxes and Insurance. The carrying amount approximates fair value because of the short maturity of these instruments.

Investment Securities. The fair values for investment securities were based on quoted market prices, if available, and were classified as Level 1. The estimated fair values of U.S. government-sponsored mortgage-backed securities are considered Level 1 inputs. If quoted market prices were not available, the valuation for investment securities utilized pricing models that varied based on asset class and included trade, bid and other observable market information. Securities priced using this information were classified as Level 2.

The trust preferred securities represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions. The trust preferred securities market is considered to be inactive since there have been only five sales transactions of similar rated securities over the past 21 months and no new issues of pooled trust preferred securities have occurred since 2007. The fair value of our trust preferred securities was determined by an independent third-party pricing service which used a discounted cash flow model. Our pricing service used a discount rate of 23.00% and provided a fair value estimate of \$4.75 per \$100 of par value for PreTSL XXIII.

The discounted cash flow analysis included a review of all issuers within each collateral pool and incorporated higher deferral and default rates in the cash flow projections over the next three years and a forecast of lower deferral and default rates in later years. The fair value of the trust preferred securities are classified as Level 3 inputs because they are based on discounted cash flow models.

21

FHLB Stock. FHLB stock, which is redeemable for cash at par value, is reported at its par value.

Loans. The fair value of loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities. The fair value of loans is not based on the concept of exit price.

Deposits. The fair value of checking and Super NOW savings accounts, passbook accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting future cash flows using the rates currently offered for deposits with similar remaining maturities.

Advances from the FHLB and Securities Sold Under Agreements to Repurchase. Fair value is estimated by discounting future cash flows using the rates currently offered to the Company for debt with similar remaining maturities.

Interest Rate Contracts. The Company may enter into interest rate lock commitments with borrowers on loans intended to be sold. To manage interest rate risk on the lock commitments, the Company may also enter into forward loan sale commitments. The interest rate lock commitments and forward loan sale commitments are treated as derivatives and are recorded at their fair value determined by referring to prices quoted in the secondary market for similar contracts. Interest rate contracts that are classified as assets are included with prepaid expenses and other assets on the consolidated balance sheet while interest rate contracts that are classified as liabilities are included with accounts payable and accrued expenses.

The estimated fair values of the Company s financial instruments are as follows:

	September	r 30, 2011	December	December 31, 2010		
(Dollars in thousands)	Carrying amount	Estimated fair value	Carrying amount	Estimated fair value		
Assets						
Cash and cash equivalents	\$ 132,448	132,448	194,435	194,435		
Investment securities available for sale	0	0	15,010	15,010		
Investment securities held to maturity	658,574	694,996	530,555	546,844		
FHLB stock	12,348	12,348	12,348	12,348		
Loans held for sale	2,987	3,093	3,234	3,234		
Loans receivable, net	662,734	764,118	641,790	666,339		
Accrued interest receivable	4,882	4,882	4,536	4,536		
Interest rate contracts	199	199	456	456		
Liabilities						
Deposits	\$ 1,139,317	1,141,523	1,076,470	1,078,590		
Advances from the Federal Home Loan Bank	20,000	20,637	10,000	10,274		
Securities sold under agreement to repurchase	120,200	125,103	105,200	109,953		
Accounts payable and accrued expenses	19,549	19,549	20,116	20,116		
Interest rate contracts	178	178	314	314		
Current income taxes payable	416	416	577	577		
Advance payments by borrowers for taxes and insurance	2,088	2,088	3,376	3,376		

22

At September 30, 2011 and December 31, 2010, neither the commitment fees received on commitments to extend credit nor the fair value thereof was material to the consolidated financial statements of the Company.

The table below presents the balance of assets and liabilities measured at fair value on a recurring basis:

(Dollars in thousands)			Lev	el 1	Level 2	Level 3	Total
September 30, 2011							
Interest rate contracts	assets		\$	0	199	0	199
Interest rate contracts	liabilities			0	(178)	0	(178)
December 31, 2010							
Interest rate contracts	assets		\$	0	456	0	456
Interest rate contracts	liabilities			0	(314)	0	(314)
Available-for-sale inve	estments			0	15,010	0	15,010

The fair value of interest rate contracts was determined by referring to prices quoted in the secondary market for similar contracts. Gains and losses are included in gain on sale of loans in the consolidated statements of income. The fair value of available-for-sale investments was determined using quoted market prices for similar investments. The losses, net of taxes, are included in accumulated other comprehensive loss in the consolidated balance sheets.

The table below presents the balance of assets measured at fair value on a nonrecurring basis and the related gains and losses for the nine months ended September 30, 2011 and the year ended December 31, 2010:

(Dollars in thousands)	Lev	el 1	Level 2	Level 3	Total	Total Gains (Losses)
September 30, 2011						
Impaired loans	\$	0	0	2,425	2,425	1
Mortgage servicing assets		0	0	1,008	1,008	(32)
December 31, 2010						
Impaired loans	\$	0	254	2,429	2,683	(183)
Trust preferred securities		0	0	128	128	(2,404)
Mortgage servicing assets		0	0	1,366	1,366	(64)

The fair value of impaired loans that are considered to be collateral dependent is determined using the value of collateral less estimated selling costs. The fair value of impaired loans that are not

considered to be collateral dependent is determined based on the present value of expected future cash flows discounted at the loan s effective interest rate. Gains and losses on impaired loans are included in the provision for loan losses in the consolidated statements of income. The fair value of trust preferred securities was determined by an independent third-party pricing service using a discounted cash flow model. The assumptions used in the discounted cash flow model are discussed above. Losses on trust preferred securities are included in net other-than-temporary impairment losses in the consolidated statements of income. Mortgage servicing assets are valued using a cash flow model prepared by an independent third-party appraiser. Assumptions used in the model include mortgage prepayment speeds, discount rates, cost of servicing and ancillary income. Losses on mortgage servicing assets are included in service fees on loan and deposit accounts in the consolidated statements of income.

(13) Subsequent Events

On October 13, 2011, Territorial Bancorp Inc. announced that it completed its second repurchase program. The Company repurchased 581,265 shares of its common stock at an average price of \$19.22 per share.

On November 3, 2011, the Board of Directors of Territorial Bancorp Inc. declared a quarterly cash dividend of \$0.09 per share of common stock. The dividend is expected to be paid on December 1, 2011 to stockholders of record as of November 17, 2011.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS Cautionary Statement Regarding Forward-Looking Information

This Quarterly Report contains forward-looking statements, which can be identified by the use of words such as estimate, project, believe, intend, anticipate, plan, seek, expect, will, may and words of similar meaning. These forward-looking statements include, but are not l

statements of our goals, intentions and expectations;

statements regarding our business plans, prospects, growth and operating strategies;

statements regarding the asset quality of our loan and investment portfolios; and

estimates of our risks and future costs and benefits.

These forward-looking statements are based on our current beliefs and expectations and are inherently subject to significant business, economic and competitive uncertainties and contingencies, many of which are beyond our control. In addition, these forward-looking statements are subject to assumptions with respect to future business strategies and decisions that are subject to change. We are under no duty to and do not take any obligation to update any forward-looking statements after the date of this Quarterly Report.

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in the forward-looking statements:

general economic conditions, either nationally or in our market areas, that are worse than expected;

24

competition among depository and other financial institutions;

inflation and changes in the interest rate environment that reduce our margins or reduce the fair value of financial instruments:

adverse changes in the securities markets;

changes in laws or government regulations or policies affecting financial institutions, including changes in regulatory fees and capital requirements;

our ability to enter new markets successfully and capitalize on growth opportunities;

our ability to successfully integrate acquired entities, if any;

changes in consumer spending, borrowing and savings habits;

changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board, the Securities and Exchange Commission and the Public Company Accounting Oversight Board;

changes in our organization, compensation and benefit plans;

changes in our financial condition or results of operations that reduce capital available to pay dividends; and

changes in the financial condition or future prospects of issuers of securities that we own.

Because of these and a wide variety of other uncertainties, our actual future results may be materially different from the results indicated by these forward-looking statements.

Critical Accounting Policies

There are no material changes to the critical accounting policies disclosed in Territorial Bancorp Inc. s Annual Report on Form 10-K for the year ended December 31, 2010.

Comparison of Financial Condition at September 30, 2011 and December 31, 2010

Assets. At September 30, 2011, our assets were \$1.516 billion, an increase of \$72.6 million, or 5.0%, from \$1.443 billion at December 31, 2010. The growth in assets was primarily the result of increases in investment securities and loans receivable, which were partially offset by a decrease in cash and cash equivalents.

Cash and Cash Equivalents. Cash and cash equivalents were \$132.4 million at September 30, 2011, a decrease of \$62.0 million since December 31, 2010. Cash and cash equivalents, along with the

25

proceeds from a \$62.8 million increase in deposits and a \$25.0 million increase in borrowings, were primarily used to fund an increase of \$113.0 million in investment securities and \$20.7 million in total loans, repurchase Company shares costing \$23.5 million, and pay dividends of \$2.7 million to common shareholders.

Loans. Total loans, including \$3.0 million of loans held for sale, were \$665.7 million at September 30, 2011, or 43.9% of total assets. During the nine months ended September 30, 2011, the loan portfolio increased by \$20.7 million, or 3.2%. The increase in the loan portfolio occurred as one- to four-family residential loan production exceeded principal repayments and loan sales.

Securities. At September 30, 2011, our securities portfolio totaled \$658.6 million, or 43.4% of assets. At September 30, 2011, all of such securities were classified as held-to-maturity and none of the underlying collateral consisted of subprime or Alt-A (traditionally defined as non-conforming loans having less than full documentation) loans. During the nine months ended September 30, 2011, our securities portfolio increased by \$113.0 million, or 20.7%, primarily due to purchases exceeding repayments.

\$15.0 million of U.S. government-sponsored mortgage-backed securities were reclassified from available-for-sale to held-to-maturity during the nine months ended September 30, 2011. Management considers the held-to-maturity classification of these securities to be appropriate as the Company has the positive intent and ability to hold these securities to maturity.

At September 30, 2011, we owned trust preferred securities with a carrying value of \$32,000. This portfolio consists of two securities (PreTSL XXIII and PreTSL XXIV), which represent investments in a pool of debt obligations issued primarily by holding companies for Federal Deposit Insurance Corporation-insured financial institutions. The difference between the carrying value of \$32,000 and the remaining amortized cost basis of \$1.1 million is included as a component of accumulated other comprehensive loss, net of taxes, and is related to non-credit factors such as the trust preferred securities market being inactive.

The trust preferred securities market is considered inactive as only five sales transactions of similarly rated securities have occurred over the past 21 months. In addition, there have been no new issues of pooled trust preferred securities since 2007. Because the trust preferred securities market is inactive, we use a discounted cash flow model to determine whether they are other-than-temporarily impaired. The assumptions used in preparing the discounted cash flow model include the following: estimated discount rates (using yields of comparable traded instruments adjusted for illiquidity and other risk factors), estimated deferral and default rates on collateral, and estimated cash flows.

Based on the Company s review, the Company s investment in trust preferred securities did not incur additional impairment during the quarter ending September 30, 2011 as the present value of cash flows exceeded the amortized cost basis of \$1.1 million.

At September 30, 2011, PreTSL XXIII and XXIV are rated C by Fitch.

It is reasonably possible that the fair values of the trust preferred securities could decline in the near term if the overall economy and the financial condition of some of the issuers continue to deteriorate and the liquidity of these securities remains low. As a result, there is a risk that the Company s amortized cost basis of \$1.1 million on its trust preferred securities could become other-than-temporarily impaired in the near term. Any such impairment could be material to the Company s consolidated statements of income.

Deposits. Deposits were \$1.139 billion at September 30, 2011, an increase of \$62.8 million, or 5.8%, since December 31, 2010. The increase in deposits was caused by opening two new branches and our continuing to promote higher-than-market rates for savings accounts.

26

Borrowings. During the nine months ended September 30, 2011, our borrowings increased by \$25.0 million, or 21.7%, to \$140.2 million, due to a \$15.0 million net increase in securities sold under agreements to repurchase and a \$10.0 million increase in Federal Home Loan Bank advances. The increase in long-term borrowings was part of the Bank s strategy to control interest rate risk.

Stockholders Equity. Stockholders equity was \$214.2 million at September 30, 2011, a decrease of \$13.1 million, or 5.8%, since December 31, 2010. The decrease in stockholders equity occurred primarily because of the repurchase of shares costing \$23.5 million and the payment of \$2.7 million of dividends to shareholders. This decrease in stockholders equity was offset by current year s earnings of \$9.4 million and a \$2.8 million increase in paid-in-capital related to stock benefit plans.

Average Balances and Yields

The following tables set forth average balance sheets, average yields and rates, and certain other information at and for the periods indicated. No tax-equivalent yield adjustments were made, as the effect thereof was not material. All average balances are daily average balances. Non-accrual loans were included in the computation of average balances, but have been reflected in the table as loans carrying a zero yield. The yields set forth below include the effect of net deferred costs, discounts, and premiums that are amortized or accreted to interest income.
