

FEDERAL AGRICULTURAL MORTGAGE CORP
Form 10-Q
August 09, 2011

As filed with the Securities and Exchange Commission on August 9, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2011

Commission File Number 001-14951

FEDERAL AGRICULTURAL MORTGAGE CORPORATION
(Exact name of registrant as specified in its charter)

Federally chartered instrumentality
of the United States
(State or other jurisdiction of
incorporation or organization)

52-1578738
(I.R.S. employer identification number)

1133 Twenty-First Street, N.W., Suite 600
Washington, D.C.
(Address of principal executive offices)

20036
(Zip code)

(202) 872-7700
(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes

No

As of August 1, 2011 the registrant had 1,030,780 shares of Class A Voting Common Stock, 500,301 shares of Class B Voting Common Stock and 8,821,878 shares of Class C Non-Voting Common Stock outstanding.

PART I - FINANCIAL INFORMATION

Item 1. Condensed Consolidated Financial Statements

The following information concerning Farmer Mac's interim unaudited condensed consolidated financial statements is included in this report beginning on the pages listed below:

Condensed Consolidated Balance Sheets as of June 30, 2011 and December 31, 2010	3
Condensed Consolidated Statements of Operations for the three and six months ended June 30, 2011 and 2010	4
Condensed Consolidated Statements of Equity for the six months ended June 30, 2011 and 2010	5
Condensed Consolidated Statements of Cash Flows for the six months ended June 30, 2011 and 2010	6
Notes to Condensed Consolidated Financial Statements	7

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

Note 1.

Accounting Policies

The interim unaudited condensed consolidated financial statements of the Federal Agricultural Mortgage Corporation (“Farmer Mac” or the “Corporation”) and subsidiaries have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). These interim unaudited condensed consolidated financial statements reflect all normal and recurring adjustments that are, in the opinion of management, necessary to present a fair statement of the financial position and the results of operations and cash flows of Farmer Mac and subsidiaries for the interim periods presented. Certain information and footnote disclosures normally included in the annual consolidated financial statements have been condensed or omitted as permitted by SEC rules and regulations. On June 1, 2011, Farmer Mac filed with the SEC an amendment to its Annual Report on Form 10-K for the year ended December 31, 2010 to correct prior misclassifications of proceeds from the repayments of certain loans between operating activities and investing activities on the consolidated statements of cash flows. These misclassifications had no impact on the net increase or decrease in cash and cash equivalents as previously reported and had no effect on Farmer Mac’s previously issued condensed consolidated interim or annual consolidated balance sheets, statements of operations or statements of equity. See Note 1(a) for further information. The December 31, 2010 condensed consolidated balance sheet presented in this report has been derived from the Corporation’s 2010 consolidated financial statements. Management believes that the disclosures are adequate to present fairly the condensed consolidated financial statements as of the dates and for the periods presented. These interim unaudited condensed consolidated financial statements should be read in conjunction with the 2010 consolidated financial statements of Farmer Mac and subsidiaries included in the Corporation’s Annual Report on Form 10-K for the year ended December 31, 2010 filed with the SEC on March 16, 2011, as amended by Amendment No. 1 on Form 10-K/A filed on June 1, 2011. Results for interim periods are not necessarily indicative of those that may be expected for the fiscal year. Below is a summary of Farmer Mac’s significant accounting policies.

Principles of Consolidation

The condensed consolidated financial statements include the accounts of Farmer Mac and its two subsidiaries: (1) Farmer Mac Mortgage Securities Corporation (“FMMSC”), whose principal activities are to facilitate the purchase and issuance of Farmer Mac Guaranteed Securities and to act as a registrant under registration statements filed with the Securities and Exchange Commission, and (2) Farmer Mac II LLC, whose principal activity is the operation of substantially all of the business related to the Farmer Mac II program – primarily the acquisition of the portions of loans (the “USDA-guaranteed portions”) guaranteed by the U.S. Department of Agriculture (“USDA”) presented as “USDA Guaranteed Securities” on the condensed consolidated balance sheets. Farmer Mac II LLC was formed as a Delaware limited liability company on December 10, 2009. The business operations of Farmer Mac II LLC began in January 2010. The condensed consolidated financial statements also include the accounts of variable interest entities (“VIEs”) in which Farmer Mac determined itself to be the primary beneficiary. See Note 2(g) for more information on consolidated VIEs.

A Farmer Mac guarantee of timely payment of principal and interest is an explicit element of the terms of all Farmer Mac Guaranteed Securities. When Farmer Mac retains such securities in its portfolio, that guarantee is not extinguished. For Farmer Mac Guaranteed Securities in the Corporation's portfolio, Farmer Mac has entered into guarantee arrangements with FMMSC. The guarantee fee rate established between Farmer Mac and FMMSC is an element in determining the fair value of these Farmer Mac Guaranteed Securities, and guarantee fees related to these securities are reflected in guarantee and commitment fees in the condensed consolidated statements of operations. These guarantee fees totaled \$2.0 million and \$4.1 million for the three and six months ended June 30, 2011, respectively, compared to \$1.5 million and \$3.2 million for the same periods in 2010, respectively. The corresponding expense of FMMSC has been eliminated against interest income in consolidation. All other inter-company balances and transactions have been eliminated in consolidation.

(a) Cash and Cash Equivalents and Statements of Cash Flows

Farmer Mac considers highly liquid investment securities with maturities at the time of purchase of three months or less to be cash equivalents. The carrying value of cash and cash equivalents is a reasonable estimate of their fair value. Changes in the balance of cash and cash equivalents are reported in the condensed consolidated statements of cash flows. The following table sets forth information regarding certain cash and non-cash transactions for the six months ended June 30, 2011 and 2010.

	For the Six Months Ended June 30,	
	2011	June 30, 2010
	(in thousands)	
Cash paid during the period for:		
Interest	\$49,261	\$ 37,989
Income taxes	11,500	12,000
Non-cash activity:		
Real estate owned acquired through loan liquidation	2,639	3,580
Loans acquired and securitized as loans held for investment in consolidated trusts	8,729	1,288
Consolidation of Farmer Mac I Guaranteed Securities from off-balance sheet to loans held for investment in consolidated trusts	8,729	1,401,659
Consolidation of Farmer Mac I Guaranteed Securities from off-balance sheet to debt securities of consolidated trusts held by third parties	8,729	1,401,659
Transfers of available-for-sale Farmer Mac I Guaranteed Securities to loans held for investment in consolidated trusts, upon the adoption of new consolidation guidance	-	5,385
Transfers of trading Farmer Mac Guaranteed Securities - Rural Utilities to loans held for investment in consolidated trusts, upon the adoption of new consolidation guidance	-	451,448
Deconsolidation of loans held for investment in consolidated trusts - transferred to off-balance sheet Farmer Mac I Guaranteed Securities	-	414,462
Deconsolidation of debt securities of consolidated trusts held by third parties - transferred to off-balance sheet Farmer Mac I Guaranteed Securities	-	414,462
Transfers of loans held for sale to loans held for investment	878,798	-

Effective January 1, 2011, Farmer Mac transferred \$878.8 million of loans in the Farmer Mac I program from held for sale to held for investment because Farmer Mac no longer has the intent to securitize or sell these loans in the foreseeable future. Farmer Mac transferred these loans at their cost, which was lower than the estimated fair value at the time of transfer.

At the time of purchase, loans are classified as either held for sale or held for investment depending upon management's intent and ability to hold the loans for the foreseeable future. On two occasions, once in first quarter 2009 and again in first quarter 2011, consistent with a change in management's intent, Farmer Mac reclassified loans from one classification to the other on the balance sheet. Prior to first quarter 2011, cash receipts from the repayment of loans were classified within the statements of cash flows consistent with the then current balance sheet classification as opposed to the original balance sheet classification assigned based on management's intent upon purchase of the loan, as prescribed by accounting guidance related to the statement of cash flows. As a result of these incorrect classifications, Farmer Mac restated its previously issued interim condensed consolidated statements of cash flows for the six and nine month periods ended June 30, and September 30, 2009 and 2010, respectively, and its consolidated statements of cash flows for the years ended December 31, 2009 and 2010 by amending its Annual Report on Form 10-K for the year ended December 31, 2010, which included the interim periods, on Amendment No.1 of Form 10-K/A filed on June 1, 2011. The restatements impacted only the classification of items in operating activities and investing activities and had no impact on the net increase or decrease in cash and cash equivalents as previously reported and had no effect on Farmer Mac's previously issued condensed consolidated interim or annual consolidated balance sheets, statements of operations or statements of changes in equity.

(b) Allowance for Losses

Farmer Mac maintains an allowance for losses to cover estimated probable losses on loans held ("allowance for loan losses") and loans underlying Long Term Standby Purchase Commitments ("LTSPCs") and Farmer Mac Guaranteed Securities ("reserve for losses") based on available information. Farmer Mac's methodology for determining the allowance for losses separately considers its portfolio segments - Farmer Mac I, Farmer Mac II, and Rural Utilities, and disaggregates its analysis, where relevant, into classes of financing receivables, which currently include loans and AgVantage securities. Further disaggregation to commodity type is performed, where appropriate, in analyzing the need for an allowance for losses.

The allowance for losses is increased through periodic provisions for loan losses that are charged against net interest income and provisions for losses that are charged to non-interest expense and are reduced by charge-offs for actual losses, net of recoveries. Negative provisions, or releases of allowance for losses, are recorded in the event that the estimate of probable losses as of the end of a period is lower than the estimate at the beginning of the period.

The total allowance for losses consists of a general allowance for losses and a specific allowance for impaired loans.

General Allowance for Losses

Farmer Mac I

Farmer Mac’s methodology for determining its allowance for losses incorporates the Corporation’s automated loan classification system. That system scores loans based on criteria such as historical repayment performance, indicators of current financial condition, loan seasoning, loan size and loan-to-value ratio. For the purposes of the loss allowance methodology, the loans in the Farmer Mac I portfolio and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs have been scored and classified for each calendar quarter since first quarter 2000. The allowance methodology captures the migration of loan scores across concurrent and overlapping three-year time horizons and calculates loss rates separately within each loan classification for (1) loans underlying LTSPCs and (2) loans held and loans underlying Farmer Mac I Guaranteed Securities. The calculated loss rates are applied to the current classification distribution of unimpaired loans in Farmer Mac’s portfolio to estimate inherent losses, on the assumption that the historical credit losses and trends used to calculate loss rates will continue in the future. Management evaluates this assumption by taking into consideration factors, including:

- economic conditions;
- geographic and agricultural commodity/product concentrations in the portfolio;
- the credit profile of the portfolio;
- delinquency trends of the portfolio;
- historical charge-off and recovery activities of the portfolio; and
- other factors to capture current portfolio trends and characteristics that differ from historical experience.

Management believes that its use of this methodology produces a reasonable estimate of probable losses, as of the balance sheet date, for all loans held in the Farmer Mac I portfolio and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs. There were no purchases or sales during the first half of 2011 that materially affected the credit profile of the Farmer Mac I portfolio.

Farmer Mac has not provided an allowance for losses for loans underlying Farmer Mac I AgVantage securities. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible loans in an amount at least equal to the outstanding principal amount of the security, with some level of overcollateralization also required for Farmer Mac I AgVantage securities. Farmer Mac excludes the loans that secure AgVantage securities from the credit risk metrics it discloses because of the credit quality of the issuing institutions, the collateralization level for the securities, and because delinquent loans are required to be removed from the pool of pledged loans and replaced with current eligible loans.

Farmer Mac II

No allowance for losses has been provided for USDA Guaranteed Securities or Farmer Mac II Guaranteed Securities. The USDA-guaranteed portions presented as “USDA Guaranteed Securities” on the condensed consolidated balance sheets, as well as those that collateralize Farmer Mac II Guaranteed Securities, are guaranteed by the USDA. Each USDA guarantee is an obligation backed by the full faith and credit of the United States. Farmer Mac excludes these guaranteed portions from the credit risk metrics it discloses because of the USDA guarantee.

Rural Utilities

Farmer Mac separately evaluates the rural utilities loans it owns, as well as the lender obligations and loans underlying or securing its Farmer Mac Guaranteed Securities – Rural Utilities, including AgVantage securities, to determine if there are probable losses inherent in those assets. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is collateralized by eligible loans in an amount at least equal to the outstanding principal amount of the security. No allowance for losses has been provided for this portfolio segment based on the credit quality of the collateral supporting rural utilities assets and Farmer Mac's counterparty risk analysis. As of June 30, 2011, there were no delinquencies and no probable losses inherent in Farmer Mac's rural utilities loans held or in any Farmer Mac Guaranteed Securities – Rural Utilities.

Specific Allowance for Impaired Loans

Farmer Mac also analyzes assets in its portfolio for impairment in accordance with the Financial Accounting Standards Board ("FASB") standard on measuring individual impairment of a loan. Farmer Mac's impaired assets generally include:

- non-performing assets (loans 90 days or more past due, in foreclosure, restructured, in bankruptcy – including loans performing under either their original loan terms or a court-approved bankruptcy plan);
- loans for which Farmer Mac has adjusted the timing of borrowers' payment schedules, but still expects to collect all amounts due and has not made economic concessions; and
- additional performing loans that have previously been delinquent or are secured by real estate that produces agricultural commodities or products currently under stress.

For loans with an updated appraised value, other updated collateral valuation or management's estimate of discounted collateral value, this analysis includes the measurement of the fair value of the underlying collateral for individual loans relative to the total recorded investment, including principal, interest and advances and net of any charge-offs. In the event that the collateral value does not support the total recorded investment, Farmer Mac provides an allowance for the loan for the difference between the recorded investment and its fair value, less estimated costs to liquidate the collateral. For the remaining impaired assets without updated valuations, this analysis is performed in the aggregate in consideration of the similar risk characteristics of the assets and historical statistics.

As of June 30, 2011 and 2010, Farmer Mac's specific allowances for losses were \$7.5 million and \$3.0 million, respectively.

Allowance for Losses

The following is a summary of the changes in the allowance for losses for the three and six months ended June 30, 2011 and 2010:

	June 30, 2011			June 30, 2010		
	Allowance for Loan Losses	Reserve for Losses	Total Allowance for Losses (in thousands)	Allowance for Loan Losses	Reserve for Losses	Total Allowance for Losses
For the Three Months Ended:						
Beginning Balance	\$ 11,084	\$ 8,378	\$ 19,462	\$ 9,142	\$ 6,427	\$ 15,569
Provision for/(release of) losses	160	(935)	(775)	(1,870)	3,043	1,173
Charge-offs	(191)	-	(191)	-	-	-
Recoveries	-	-	-	2,223	-	2,223
Ending Balance	\$ 11,053	\$ 7,443	\$ 18,496	\$ 9,495	\$ 9,470	\$ 18,965
For the Six Months Ended:						
Beginning Balance	\$ 9,803	\$ 10,312	\$ 20,115	\$ 6,292	\$ 7,895	\$ 14,187
Provision for/(release of) losses	1,441	(2,869)	(1,428)	980	1,575	2,555
Charge-offs	(191)	-	(191)	-	-	-
Recoveries	-	-	-	2,223	-	2,223
Ending Balance	\$ 11,053	\$ 7,443	\$ 18,496	\$ 9,495	\$ 9,470	\$ 18,965

During second quarter 2011, Farmer Mac recorded provisions to its allowance for loan losses of \$0.2 million and releases from its reserve for losses of \$0.9 million. The net release from the allowance for losses in second quarter 2011 was primarily due to a decline in estimated probable losses related to Farmer Mac's exposure to the ethanol and dairy industries. Farmer Mac also charged off \$0.2 million of losses upon acquisition of real estate owned ("REO") during second quarter 2011. In first quarter 2011, Farmer Mac purchased two defaulted loans pursuant to the terms of an LTSPC agreement. This resulted in the reclassification of \$1.8 million of specific allowance, which had been recorded in fourth quarter 2010, from the reserve for losses to the allowance for loan losses. The provision for/(release of) losses for the six months ended June 30, 2011 reflects this reclassification as well as the decline in estimated probable losses related to Farmer Mac's exposure to the ethanol and dairy industries.

During second quarter 2010, Farmer Mac recorded releases from its allowance for loan losses of \$1.9 million and provisions to its reserve for losses of \$3.0 million. Farmer Mac also recorded recoveries of \$2.2 million on a loan secured by an ethanol plant during second quarter 2010. For the six months ended June 30, 2010, Farmer Mac recorded provisions to its allowance for loan losses and its reserve for losses of \$1.0 million and \$1.6 million, respectively. These amounts include the reclassification of \$2.0 million from the reserve for losses to the allowance for loan losses upon adoption of the new consolidation guidance in first quarter 2010.

Farmer Mac's reserve for losses for off-balance sheet Farmer Mac I Guaranteed Securities and LTSPCs as of June 30, 2011 were \$0.5 million and \$6.9 million, respectively, compared to \$0.6 million and \$9.7 million, respectively as of December 31, 2010.

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following tables present the ending balances of Farmer Mac I loans held and loans underlying LTSPCs and Farmer Mac I Guaranteed Securities and the related allowance for losses by impairment method and commodity type as of June 30, 2011 and December 31, 2010 and changes in the allowance for losses for the three and six months ended June 30, 2011.

Farmer Mac recognized interest income of approximately \$0.3 million and \$1.1 million on impaired loans during the three months and six months ended June 30, 2011, respectively, compared to \$0.4 million and \$0.9 million, respectively, for the same periods in 2010. During the three and six months ended June 30, 2011, Farmer Mac's average investment in impaired loans was \$89.1 million and \$94.4 million, respectively, compared to \$115.7 million and \$124.3 million, respectively, for the same periods in 2010.

The following tables present by commodity type the unpaid principal balances, recorded investment and specific allowance for losses related to impaired loans, the recorded investment in loans on nonaccrual status as of June 30, 2011 and December 31, 2010 and the average recorded investment and interest income recognized on impaired loans for the three and six months ended June 30, 2011.

In accordance with the terms of all applicable trust agreements, Farmer Mac generally acquires all loans that collateralize Farmer Mac Guaranteed Securities that become and remain either 90 or 120 days or more past due (depending on the provisions of the applicable agreement) on the next subsequent loan payment date. In accordance with the terms of all LTSPCs, Farmer Mac acquires loans that are either 90 days or 120 days delinquent (depending on the provisions of the applicable agreement) upon the request of the counterparty.

Farmer Mac records all such defaulted loans at their unpaid principal balance during the period in which Farmer Mac becomes entitled to purchase the loans and therefore regains effective control over the transferred loans.

During the three and six months ended June 30, 2011, Farmer Mac purchased 5 defaulted loans having an unpaid principal balance of \$1.4 million and 13 defaulted loans having an unpaid principal balance of \$18.3 million, respectively, from pools underlying Farmer Mac I Guaranteed Securities and LTSPCs. During the three and six months ended June 30, 2010, Farmer Mac purchased 2 defaulted loans having an unpaid principal balance of \$0.9 million and 7 defaulted loans having an unpaid principal balance of \$3.4 million, respectively, from pools underlying Farmer Mac I Guaranteed Securities and LTSPCs. The following table presents Farmer Mac's purchases of defaulted loans underlying Farmer Mac I Guaranteed Securities and LTSPCs.

	For the Three Months		For the Six Months Ended	
	Ended June 30, 2011	Ended June 30, 2010	June 30, 2011	June 30, 2010
	(in thousands)

Defaulted loans purchased underlying LTSPCs	1,420	913	16,976	1,080
Total defaulted loan purchases	\$ 1,420	\$ 913	\$ 18,345	\$ 3,403

Credit Quality Indicators

The following tables present credit quality indicators related to Farmer Mac I loans held and loans underlying LTSPCs and Farmer Mac I Guaranteed Securities (excluding AgVantage securities) as of June 30, 2011 and December 31, 2010. Farmer Mac uses 90-day delinquency information to evaluate its credit risk exposure on these assets because historically it has been the best measure of borrower credit quality deterioration. Most of the Farmer Mac I loans held and underlying LTSPCs and Farmer Mac I Guaranteed Securities have annual (January 1) or semi-annual (January 1 and July 1) payment dates and are supported by less frequent and less predictable revenue sources, such as the cash flows generated from the maturation of crops, sales of livestock and government farm support programs. Taking into account the reduced frequency of payment due dates and revenue sources, Farmer Mac considers the 90-day delinquency point to be the most significant observation point when evaluating its credit risk exposure.

	As of June 30, 2011

50.01% to 60.00%	1,241,290	1,246,675
60.01% to 70.00%	1,067,894	1,056,132
70.01% to 80.00%	147,255	155,363
80.01% to 90.00%	52,506	44,626
Total	\$ 4,315,987	\$ 4,304,120

(1) Geographic regions: Northwest (AK, ID, MT, ND, NE, OR, SD, WA, WY); Southwest (AZ, CA, CO, HI, NM, NV, UT); Mid-North (IA, IL, IN, MI, MN, MO, WI); Mid-South (KS, OK, TX); Northeast (CT, DE, KY, MA, MD, ME, NC, NH, NJ, NY, OH, PA, RI, TN, VA, VT, WV); Southeast (AL, AR, FL, GA, LA, MS, SC).

The original loan-to-value ratio is calculated by dividing the loan principal balance at the time of guarantee, purchase or commitment by the appraised value at the date of loan origination or, when available, the updated appraised value at the time of guarantee, purchase or commitment. Current loan-to-value ratios may be higher or lower than the original loan-to-value ratios.

-19-

(c) Financial Derivatives

Farmer Mac enters into transactions involving financial derivatives principally to protect against risk from the effects of market price or interest rate movements on the value of certain assets, future cash flows or debt issuance, not for trading or speculative purposes. Farmer Mac enters into interest rate swap contracts to adjust the characteristics of its short-term debt to match more closely the cash flow and duration characteristics of its longer-term loans and other assets, and also to adjust the characteristics of its long-term debt to match more closely the cash flow and duration characteristics of its short-term assets, thereby reducing interest rate risk and often times deriving an overall lower effective cost of borrowing than would otherwise be available to Farmer Mac in the conventional debt market. Farmer Mac also recognizes certain contracts and commitments as derivatives when the characteristics of those contracts and commitments meet the definition of a derivative.

Farmer Mac manages the interest rate risk related to loans it has committed to acquire, but has not yet purchased and permanently funded, through the use of forward sale contracts on the debt of other government-sponsored enterprises (“GSEs”), futures contracts involving U.S. Treasury securities and interest rate swap contracts. Farmer Mac uses forward sale contracts on GSE securities to reduce its interest rate exposure to changes in both U.S. Treasury rates and spreads on Farmer Mac debt. The notional amounts of these contracts are determined based on a duration-matched hedge ratio between the hedged item and the hedge instrument. Gains or losses generated by these hedge transactions should offset changes in funding costs.

All financial derivatives are recorded on the balance sheet at fair value as a freestanding asset or liability. Farmer Mac does not designate its financial derivatives as fair value hedges or cash flow hedges; therefore, the changes in the fair values of financial derivatives are reported as gains or losses on financial derivatives in the condensed consolidated statements of operations without any corresponding changes in the fair values of the hedged items.

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following tables summarize information related to Farmer Mac's financial derivatives as of June 30, 2011 and December 31, 2010:

	June 30, 2011						
	Notional Amount	Fair Value Asset	Fair Value (Liability)	Weighted-Average Pay Rate	Weighted-Average Receive Rate	Weighted-Average Forward Price	Weighted-Average Remaining Life (in years)

-----------------------------	-------------	----------	--------------

In the normal course of business, collateral requirements contained in Farmer Mac's derivative contracts are enforced by Farmer Mac and its counterparties. Upon enforcement of the collateral requirements, the amount of collateral posted is typically based on the net fair value of all derivative contracts with the counterparty, i.e., derivative assets net of derivative liabilities at the counterparty level. If Farmer Mac were to be in violation of certain provisions of the derivative contracts, the related counterparty could request payment or full collateralization on the derivative contracts. As of June 30, 2011, the fair value of Farmer Mac's derivatives in a net liability position at the counterparty level, which includes accrued interest but excludes any adjustment for nonperformance risk, was \$87.2 million. As of June 30, 2011, Farmer Mac posted cash of \$5.1 million as collateral for its derivatives in net liability positions. Farmer Mac records posted cash as a reduction in the outstanding balance of cash and cash equivalents and an increase in the balance of prepaid expenses and other assets. If Farmer Mac had breached certain provisions of the derivative contracts as of June 30, 2011, it could have been required to settle its obligations under the agreements or post additional collateral of \$82.1 million.

The following table summarizes the effects of Farmer Mac's financial derivatives on the condensed consolidated statements of operations for the three and six months ended June 30, 2011 and 2010:

	Losses on Financial Derivatives			
	For the Three Months		For the Six Months Ended	
	Ended		June 30,	June 30, 2010
	June 30,	June 30, 2010	2011	June 30, 2010

Total	\$(17,806)	\$ (15,840)	\$(13,801)	\$ (21,644)

As of June 30, 2011, Farmer Mac had outstanding basis swaps with Zions First National Bank, a related party, with a total notional amount of \$74.1 million and a fair value of \$(1.8) million, compared to \$85.0 million and \$(3.4) million, respectively, as of December 31, 2010. Under the terms of those basis swaps, Farmer Mac pays Constant Maturity Treasury-based rates and receives LIBOR. Those swaps economically hedge most of the interest rate basis risk related to loans Farmer Mac purchases that pay a Constant Maturity Treasury based-rate and the discount notes Farmer Mac issues to fund the loan purchases (the pricing of discount notes is closely correlated to LIBOR rates). Farmer Mac recorded unrealized losses of \$0.1 million and unrealized gains of \$1.6 million on those outstanding basis swaps for the three and six months ended June 30, 2011, respectively, compared to unrealized losses of \$0.1 million and \$25,000, respectively, for the same periods in 2010.

(d) Earnings Per Common Share

Basic earnings per common share is based on the weighted-average number of shares of common stock outstanding. Diluted earnings per common share is based on the weighted-average number of shares of common stock outstanding adjusted to include all potentially dilutive common stock options, stock appreciation rights (“SARs”) and nonvested restricted stock awards. The following schedule reconciles basic and diluted earnings per common share (“EPS”) for the three and six months ended June 30, 2011 and 2010:

	For the Three Months Ended					
	June 30, 2011			June 30, 2010		
	Net Income	Shares	\$ per Share	Net Income	Shares	\$ per Share
	(in thousands, except per share amounts)					
Basic EPS						
Net income available to common stockholders	\$5,170	10,343	\$0.50	\$1,824	10,210	\$0.18
Effect of dilutive securities(1):						
Stock options, SARs and restricted stock		376	(0.02)		400	(0.01)
Diluted EPS	\$5,170	10,719	\$0.48	\$1,824	10,610	\$0.17

(1) For the three months ended June 30, 2011 and 2010, stock options and SARs of 652,234 and 1,650,050, respectively, were outstanding but not included in the computation of diluted earnings per share of common stock because they were anti-dilutive. For the three months ended June 30, 2011 and 2010, contingent shares of non-vested restricted stock of 170,760 and 126,000, respectively, were outstanding but not included in the computation of diluted earnings per share because the performance conditions were not met.

	For the Six Months Ended					
	June 30, 2011			June 30, 2010		
	Net Income	Shares	\$ per Share	Net Income	Shares	\$ per Share
	(in thousands, except per share amounts)					
Basic EPS						
Net income available to common stockholders	\$23,493	10,314	\$2.28	\$3,591	10,177	\$0.35
Effect of dilutive securities(1):						
Stock options, SARs and restricted stock		378	(0.08)		354	(0.01)
Diluted EPS	\$23,493	10,692	\$2.20	\$3,591	10,531	\$0.34

(1) For the six months ended June 30, 2011 and 2010, stock options and SARs of 705,515 and 1,616,008, respectively, were outstanding but not included in the computation of diluted earnings per share of common stock because they were anti-dilutive. For the six months ended June 30, 2011 and 2010, contingent shares of non-vested restricted stock of 148,380 and 104,250, respectively, were outstanding but not included in the computation of diluted earnings per share because the performance conditions were not met.

(e) Stock-Based Compensation

Farmer Mac's 2008 Omnibus Incentive Compensation Plan authorizes the grants of restricted stock, stock options and SARs, among other alternative forms of equity-based compensation, to directors, officers and other employees. SARs awarded to officers and employees vest annually in thirds. If not exercised or terminated earlier due to the termination of employment, SARs granted to officers or employees expire after ten years. For all SARs granted, the exercise price is equal to the closing price of Farmer Mac's Class C Non-Voting Common Stock on the date of grant. SARs granted to officers in second quarter 2011 have an exercise price of \$18.77. As of June 30, 2011, there were no outstanding SARs awarded to directors. Restricted stock awarded to directors during second quarter 2011 vests fully on March 31, 2012, approximately one year after grant. Restricted stock awarded to officers during second quarter 2011 vests after approximately three years and only vests if certain performance conditions are met. Restricted stock awards granted to both directors and officers are not issued until full vesting occurs.

For the three and six months ended June 30, 2011, Farmer Mac recognized \$0.8 million and \$1.5 million, respectively, of compensation expense related to stock options, SARs and restricted stock, compared to \$0.8 million and \$1.5 million, respectively, for the same periods in 2010.

-24-

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following tables summarize activity related to stock options, SARs and nonvested restricted stock awards for the three and six months ended June 30, 2011 and 2010:

	June 30, 2011		June 30, 2010	
	Stock Options and SARs	Weighted- Average Exercise Price	Stock Options and SARs	Weighted- Average Exercise Price
For the Three Months Ended:				
Outstanding, beginning of period	1,322,461	\$19.37	1,799,465	\$22.68
Granted	113,000	18.77	247,000	12.20
Exercised	-	-	(21,331)	13.15
Canceled	(106,561)	28.83	(102,084)	20.88
Outstanding, end of period	1,328,900	\$18.57	1,923,050	\$21.53
For the Six Months Ended:				
Outstanding, beginning of period	1,924,133	\$21.16	1,799,465	\$22.68
Granted	113,000	18.77	247,000	12.20
Exercised	(5,667)	7.48	(21,331)	13.15
Canceled	(702,566)	25.79	(102,084)	20.88
Outstanding, end of period	1,328,900	\$18.57	1,923,050	\$21.53
Options and SARs exercisable at end of period	886,237	\$21.68	1,433,792	\$25.04

	June 30, 2011		June 30, 2010	
	Non-vested Restricted Stock	Weighted- Average Grant-date Fair Value	Non-vested Restricted Stock	Weighted- Average Grant-date Fair Value
For the Three Months Ended:				
Outstanding, beginning of period	126,000	\$8.47	200,548	\$5.93
Granted	73,060	18.77	111,085	12.28
Canceled	-	-	(11,599)	8.15
Vested and issued	-	-	(118,048)	5.93
Outstanding, end of period	199,060	\$12.25	181,986	\$9.66
For the Six Months Ended:				
Outstanding, beginning of period	182,609	\$9.63	200,548	\$5.93
Granted	73,060	18.77	111,085	12.28
Canceled	-	-	(11,599)	8.15
Vested and issued	(56,609)	12.22	(118,048)	5.93
Outstanding, end of period	199,060	\$12.25	181,986	\$9.66

The cancellations of stock options, SARs and nonvested restricted stock during the first six months of 2011 were due to vested options terminating unexercised on their expiration dates.

For the three and six months ended June 30, 2011 adjustments to additional paid-in capital from exercises or expiration of stock options and SARs and the vesting or expiration of restricted stock was \$0.1 million and \$(0.5) million, respectively, compared to \$0.3 million for the three and six months ended June 30, 2010. The reduction of income taxes to be paid as a result of the deduction for exercises of stock options and SARs was \$0.4

million for the six months ended June 30, 2011. The reduction of income taxes to be paid as a result of the deduction for exercises of stock options and SARs and the vesting or accelerated tax elections of restricted stock was \$0.9 million for the three and six months ended June 30, 2010.

-25-

Edgar Filing: FEDERAL AGRICULTURAL MORTGAGE CORP - Form 10-Q

The following tables summarize information regarding stock options, SARs and nonvested restricted stock outstanding as of June 30, 2011:

Range of Exercise Prices	Outstanding		Exercisable		Vested or Expected to Vest	
	Stock Options and SARs	Weighted-Average Remaining Contractual Life	Stock Options and SARs	Weighted-Average Remaining Contractual Life	Stock Options and SARs	Weighted-Average Remaining Contractual Life
\$5.00 - \$9.99	261,666	7.8 years	151,670	7.8 years	238,667	7.8 years
10.00 - 14.99	302,000	8.8 years	82,333	8.8 years	269,030	8.8 years
15.00 - 19.99	163,786	7.7 years	50,786	3.1 years	155,876	7.6 years
20.00 - 24.99	172,289	3.7 years	172,289	3.7 years	172,289	3.7 years
25.00 - 29.99	400,159	4.3 years	400,159	4.3 years	400,159	4.3 years
30.00 - 34.99	29,000	5.2 years	29,000	5.2 years	29,000	5.2 years
	1,328,900		886,237		1,265,021	

Weighted-Average Grant-Date Fair Value	Outstanding		Expected to Vest	
	Nonvested Restricted Stock	Weighted-Average Remaining Contractual Life	Nonvested Restricted Stock	Weighted-Average Remaining Contractual Life
\$5.00 - \$9.99	75,000	1.0 years	67,500	1.0 years
10.00 - 14.99	51,000	2.0 years	45,900	2.0 years
15.00 - 19.99	73,060	2.2 years	63,024	2.2 years
	199,060		176,424	

The weighted-average grant date fair value of SARs granted during the first six months of 2011 and 2010 were \$13.75 and \$8.31 per share, respectively. The fair values for SARs were estimated using the Black-Scholes option pricing model based on the following assumptions:

	2011	2010
Risk-free interest rate	2.6%	3.3%
Expected years until	6 years	7 years

exercise		
Expected		
stock		
volatility	97.8%	88.3%
Dividend		
yield	1.0%	1.8%

(f) Fair Value Measurement

Farmer Mac follows accounting guidance for fair value measurements that defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and establishes a fair value hierarchy that ranks the quality and reliability of the inputs to valuation techniques used to measure fair value. The hierarchy gives highest rank to unadjusted quoted prices in active markets for identical assets or liabilities (level 1 measurements) and the lowest rank to unobservable inputs (level 3 measurements).

Farmer Mac's assessment of the significance of the input to the fair value measurement requires judgment, and considers factors specific to the financial instrument. Both observable and unobservable inputs may be used to determine the fair value of positions that Farmer Mac has classified within the level 3 category. As a result, the unrealized gains and losses for assets and liabilities within the level 3 category may include changes in fair value that were attributable to both observable (e.g., changes in market interest rates) and unobservable (e.g., changes in long-dated volatilities) inputs.

See Note 7 for more information regarding fair value measurement.

(g) Consolidation of Variable Interest Entities

Farmer Mac has interests in various entities that are considered to be VIEs. These interests include investments in securities issued by VIEs, such as Farmer Mac agricultural mortgage-backed securities created pursuant to Farmer Mac's securitization transactions and mortgage and asset-backed trusts that Farmer Mac did not create. Effective January 1, 2010, Farmer Mac adopted two new accounting standards that eliminated the concept of qualifying special purpose entities ("QSPEs") and amended the accounting for transfers of financial assets and the consolidation model for VIEs. All formerly designated QSPEs were evaluated for consolidation in accordance with the new consolidation model, which changed the method of analyzing which party to a VIE should consolidate the VIE. The new consolidation model uses a qualitative evaluation that requires consolidation of an entity when the reporting enterprise both (1) has the power to direct matters which significantly impact the activities and success of the entity, and (2) has exposure to benefits and/or losses that could potentially be significant to the entity. The reporting enterprise that meets both these conditions is deemed the primary beneficiary of the VIE.

The new consolidation standard requires the incremental assets and liabilities consolidated upon adoption to initially be reported at their carrying amounts. Carrying amount refers to the amount at which the assets and liabilities would have been carried in the consolidated financial statements if the new guidance had been effective when Farmer Mac first met the conditions to be the primary beneficiary of the VIE. If determining the carrying amounts is not practicable, the assets and liabilities of the VIE shall be measured at fair value at the date the new standards first apply. For the outstanding trusts consolidated effective January 1, 2010, Farmer Mac initially recorded the assets and liabilities on the consolidated balance sheet at their carrying amounts, adjusted, where applicable, for fair value option elections that had been made previously. Accrued interest and allowance for losses have also been recognized as appropriate.

Although these new accounting standards did not change the economic risk to Farmer Mac's business, specifically Farmer Mac's liquidity, credit and interest rate risks, the adoption of these new accounting standards had a significant impact on the presentation of Farmer Mac's consolidated financial statements. On the consolidated balance sheet, there was an increase in loans held for investment, interest receivable, debt and accrued interest payable, and a decrease in available-for-sale and trading Farmer Mac Guaranteed Securities, the reclassification of a portion of the reserve for losses to allowance for loan losses, and the elimination of the guarantee and commitment fees receivable and guarantee and commitment obligations related to the consolidated trusts. On the income statement, there was an increase in interest income and interest expense attributable to the assets and liabilities of the consolidated trusts and a reclassification of a portion of guarantee fee income to interest income.

The VIEs in which Farmer Mac has a variable interest are limited to securitization trusts. The major judgment in determining if Farmer Mac is the primary beneficiary was whether Farmer Mac had the power to direct the activities of the trust that potentially had the most significant impact on the economic performance of the trust. Generally, the ability to make decisions regarding default mitigation was evidence of that power. Farmer Mac determined that it was the primary beneficiary for the securitization trusts related to most Farmer Mac I and all Rural Utilities securitization transactions because of its rights as guarantor under both programs to control the default mitigation activities of the trusts. For certain securitization trusts created when loans subject to LTSPCs were converted to Farmer Mac I Guaranteed Securities, Farmer Mac determined that it was not the primary beneficiary since the power to make decisions regarding default mitigation was shared among unrelated parties. For similar securitization transactions where the power to make decisions regarding default mitigation was shared with a related party, Farmer Mac determined that it was the primary beneficiary because the applicable accounting guidance does not permit parties within a related party group to conclude that the power is shared.

For those trusts that Farmer Mac is the primary beneficiary, the assets and liabilities are presented on the condensed consolidated balance sheet as “Loans held for investment in consolidated trusts” and “Debt securities of consolidated trusts held by third parties,” respectively. These assets can only be used to satisfy the obligations of the related trust.

For those trusts where Farmer Mac has a variable interest but has not been determined to be the primary beneficiary, Farmer Mac’s interests are presented as either “Farmer Mac Guaranteed Securities” or “Investment securities” on the condensed consolidated balance sheets. Farmer Mac’s involvement in on-balance sheet VIEs classified as Farmer Mac Guaranteed Securities include securitization trusts under the Farmer Mac II program and trusts related to AgVantage securities. In the case of Farmer Mac II trusts, Farmer Mac was not determined to be the primary beneficiary because it does not have the decision-making power over default mitigation activities. For the AgVantage trusts, Farmer Mac currently does not have the power to direct the activities that have the most significant economic impact to the trust unless, as guarantor, there is a default by the issuer of the trust securities. Should there be a default, Farmer Mac would reassess whether it is the primary beneficiary of those trusts. For VIEs classified as investment securities, which include auction-rate certificates, asset-backed securities and GSE-guaranteed mortgage-backed securities, Farmer Mac was determined not to be the primary beneficiary because of the lack of voting rights or other powers to direct the activities of the trust. As of June 30, 2011, these Farmer Mac Guaranteed Securities trusts and investment securities trusts have carrying amounts on the condensed consolidated balance sheet totaling \$1.8 billion and \$867.6 million, respectively, which is Farmer Mac’s maximum exposure to loss. In addition, Farmer Mac has a variable interest in off-balance sheet VIEs, which include a guarantee of timely payment of principal and interest, totaling \$2.7 billion as of June 30, 2011.

(h) New Accounting Standards

Troubled Debt Restructurings

In January 2011, the FASB issued Accounting Standards Update (“ASU”) 2011-01, Deferral of the Effective Date of Disclosures about Troubled Debt Restructurings in Update No. 2010-20 (discussed below). The effective date of the new disclosures about troubled debt restructurings was delayed to coordinate the disclosures with the FASB project on determining what constitutes a troubled debt restructuring. In April 2011, the FASB completed that project and issued ASU 2011-02, A Creditor’s Determination of Whether a Restructuring Is a Troubled Debt Restructuring. ASU 2011-02 states that a troubled debt restructuring exists when a creditor concludes that both the restructuring constitutes a concession and the debtor is experiencing financial difficulties and clarifies the guidance on evaluating these criteria. ASU 2011-02 is effective for the first interim or annual period beginning on or after June 15, 2011 and should be applied retrospectively to the beginning of the annual period of adoption (i.e., for Farmer Mac, it will be effective for third quarter 2011 reporting). The troubled debt restructuring disclosures in ASU 2010-20 also will be effective in third quarter 2011. Farmer Mac does not expect the adoption of these standards to have a significant impact on the Corporation’s financial position, results of operations or cash flows.

Fair Value Measurement and Disclosure

On May 12, 2011, the FASB issued ASU 2011-04, Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs, which provides converged guidance on how to measure fair value and on what disclosures to provide about fair value measurements. The new guidance is largely consistent with existing fair value measurement principles, but expands existing disclosure requirements for fair value measurement. ASU 2011-04 is effective for interim and annual periods beginning after December 15, 2011. Farmer Mac does not expect the adoption of the new accounting guidance to have a significant impact on Farmer Mac’s fair value disclosures.

Comprehensive Income

On June 16, 2011, the FASB issued ASU 2011-05, Presentation of Comprehensive Income, which revised the manner in which entities present comprehensive income in their financial statements. The new guidance requires entities to report components of comprehensive income in either (1) a continuous statement of comprehensive income or (2) two separate but consecutive statements. ASU 2011-05 is effective for interim and annual periods beginning after December 15, 2011. Farmer Mac does not expect the adoption of the new accounting guidance to have a material effect on Farmer Mac’s financial position, results of operations or cash flows.

(i) Reclassifications

Certain reclassifications of prior period information were made to conform to the current period presentation.

Note 2.

Investment Securities

The following tables present the amortized cost and estimated fair values of Farmer Mac's investments as of June 30, 2011 and December 31, 2010.

	June 30, 2011

-30-

During the three and six months ended June 30, 2011 and 2010, Farmer Mac did not recognize in earnings any other-than-temporary impairment charges.

During the three and six months ended June 30, 2011, Farmer Mac received proceeds of \$75.1 million and \$153.6 million, respectively, from the sale of securities from its available-for-sale investment portfolio, resulting in gross realized gains of \$38,000 and \$0.2 million, respectively. During the three months ended June 30, 2010, Farmer Mac did not receive any proceeds from the sale of securities from its available-for-sale investment portfolio. During the six months ended June 30, 2010, Farmer Mac received proceeds of \$69.2 million from the sale of securities from its available-for-sale investment portfolio, resulting in gross realized gains of \$0.4 million and gross realized losses of \$0.2 million.

As of June 30, 2011 and December 31, 2010, unrealized losses on available-for-sale investment securities were as follows:

	June 30, 2011			
	Available-for-Sale Securities			
	Unrealized loss position for less than 12 months		Unrealized loss position for more than 12 months	
	Fair Value	Unrealized Loss	Fair Value	Unrealized Loss

-31-

The temporary unrealized losses presented above are principally due to a general widening of credit spreads from the dates of acquisition to June 30, 2011 and December 31, 2010, as applicable. The resulting decreases in fair values reflect an increase in the perceived risk by the financial markets related to those securities. As of June 30, 2011 and December 31, 2010, all of the investment securities in an unrealized loss position were rated at least "A" by a nationally recognized statistical rating organization. The unrealized losses were on 30 and 47 individual investment securities as of June 30, 2011 and December 31, 2010, respectively.

As of June 30, 2011, 12 of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$16.9 million. As of December 31, 2010, 29 of the securities in loss positions had been in loss positions for more than 12 months and had a total unrealized loss of \$24.7 million. Securities in unrealized loss positions 12 months or more have a fair value as of June 30, 2011 that is, on average, approximately 91 percent of their amortized cost basis. Farmer Mac believes that all these unrealized losses are recoverable within a reasonable period of time through changes in credit spreads or maturity and expects to recover the amortized cost basis of these securities. Accordingly, Farmer Mac has concluded that none of the unrealized losses on these available-for-sale investment securities represent other-than-temporary impairment as of June 30, 2011. Farmer Mac does not intend to sell these securities and it is not more likely than not that Farmer Mac will be required to sell the securities before recovery of the amortized cost basis.

Farmer Mac did not own any held-to-maturity investments as of June 30, 2011 and December 31, 2010. As of June 30, 2011, Farmer Mac owned trading investments with an amortized cost of \$88.8 million, a fair value of \$88.2 million, and a weighted-average yield of 8.14 percent. As of December 31, 2010, Farmer Mac owned trading investments with an amortized cost of \$89.8 million, a fair value of \$86.1 million and a weighted-average yield of 8.12 percent.

The amortized cost, fair value and weighted-average yield of investments by remaining contractual maturity for available-for-sale investment securities as of June 30, 2011 are set forth below. Asset-backed and mortgage-backed securities are included based on their final maturities, although the actual maturities may differ due to prepayments of the underlying assets or mortgages.

Investment Securities Available-for-Sale as of June 30, 2011			
	Amortized Cost	Fair Value (dollars in thousands)	Weighted- Average Yield
Due within one year	\$ 920,611	\$ 921,252	1.01%
Due after one year through five years	80,217	80,558	1.77%
Due after five years through ten years	418,586	420,553	1.13%
Due after ten years	594,945	583,351	2.52%
Total	\$ 2,014,359	\$ 2,005,714	1.51%

Note 3. Farmer Mac Guaranteed Securities and USDA Guaranteed Securities

The following table sets forth information about on-balance sheet Farmer Mac Guaranteed Securities and USDA Guaranteed Securities as of June 30, 2011 and December 31, 2010.

	June 30, 2011		
	Available- for-Sale	Trading (in thousands)	Total
Farmer Mac I	\$ 1,759,205	\$ -	\$ 1,759,205

USDA Guaranteed Securities	1,005,679	311,765	1,317,444
Total	\$ 3,912,943	\$ 311,765	\$ 4,224,708
Amortized cost	\$ 3,880,418	\$ 315,655	\$ 4,196,073
Unrealized gains	50,583	106	50,689
Unrealized losses	(18,058)	(3,996)	(22,054)
Fair value	\$ 3,912,943	\$ 311,765	\$ 4,224,708

The temporary unrealized losses presented above are principally due to changes in interest rates from the date of acquisition to June 30, 2011 and December 31, 2010, as applicable. As of June 30, 2011, the unrealized losses presented above are related to Farmer Mac II Guaranteed Securities and USDA Guaranteed Securities. As of December 31, 2010, the unrealized losses presented above are related to Farmer Mac I, Farmer Mac II Guaranteed Securities and USDA Guaranteed Securities. USDA Guaranteed Securities and the USDA-guaranteed portions underlying Farmer Mac II Guaranteed Securities are backed by the full faith and credit of the United States. Farmer Mac has concluded that none of the unrealized losses on its available-for-sale Farmer Mac Guaranteed Securities and USDA Guaranteed Securities represent other-than-temporary impairment as of June 30, 2011 and December 31, 2010. Farmer Mac does not intend to sell these securities and it is not more likely than not that Farmer Mac will be required to sell the securities before recovery of the amortized cost basis.

On January 25, 2010, Farmer Mac contributed substantially all of the assets comprising the Farmer Mac II program, in excess of \$1.1 billion, to Farmer Mac's subsidiary, Farmer Mac II LLC. The assets that Farmer Mac contributed to Farmer Mac II LLC consisted primarily of USDA-guaranteed portions that had not been securitized by Farmer Mac (i.e., not transferred to a trust from which Farmer Mac II Guaranteed Securities were issued) but also included \$35.0 million of Farmer Mac II Guaranteed Securities. Other than the guarantee already in place on the transferred Farmer Mac II Guaranteed Securities, Farmer Mac did not guarantee the timely payment of principal and interest on the \$1.1 billion of contributed USDA-guaranteed portions. The contributed USDA-guaranteed portions had previously been presented as Farmer Mac II Guaranteed Securities on the condensed consolidated financial statements of Farmer Mac and are now presented as "USDA Guaranteed Securities" on the condensed consolidated balance sheets. The assets of Farmer Mac II LLC will only be available to creditors of Farmer Mac after all obligations owed to creditors of and equity holders in Farmer Mac II LLC have been satisfied.

Farmer Mac realized no gains or losses from the sale of Farmer Mac Guaranteed Securities and USDA Guaranteed Securities for the three and six months ended June 30, 2011 and 2010.

The table below presents a sensitivity analysis for the Corporation's on-balance sheet Farmer Mac Guaranteed Securities and USDA Guaranteed Securities as of June 30, 2011 and December 31, 2010.

	June 30, 2011		December 31, 2010	
	(dollars in thousands)			
Fair value of beneficial interests retained in Farmer Mac Guaranteed Securities and USDA Guaranteed Securities	\$	4,613,436	\$	4,224,708
Weighted-average remaining life (in years)		3.7		3.5
Weighted-average prepayment speed (annual rate)		3.0	%	3.5
Effect on fair value of a 10% adverse change	\$	(205)	\$	(18)
Effect on fair value of a 20% adverse change	\$	(418)	\$	(17)
Weighted-average discount rate		2.5	%	2.3
Effect on fair value of a 10% adverse change	\$	(27,998)	\$	(20,257)
Effect on fair value of a 20% adverse change	\$	(55,912)	\$	(40,315)

These sensitivities are hypothetical. Changes in fair value based on 10 percent or 20 percent variations in assumptions generally cannot be extrapolated because the relationship of the change in assumptions to the change in fair value may not be linear. Also, the effect of a variation in a particular assumption on the fair values is calculated without changing any other assumption. In fact, changes in one factor may result in changes in another (for example, increases in market interest rates may result in lower prepayments), which might amplify or counteract the sensitivities.

Farmer Mac securitizes three types of assets: agricultural real estate mortgage loans, USDA-guaranteed portions, and rural utilities loans. Farmer Mac manages the credit risk of its securitized loans, both on- and off-balance sheet, together with its on-balance sheet loans and the loans underlying its off-balance sheet LTSPCs.

As part of fulfilling its guarantee obligations for Farmer Mac Guaranteed Securities and commitments to purchase eligible loans underlying LTSPCs, Farmer Mac purchases defaulted loans, all of which are at least 90 days delinquent at the time of purchase, out of the loan pools underlying those securities and LTSPCs, and records the purchased loans as such on its balance sheet.

-35-

The table below presents the outstanding principal balances for Farmer Mac loans, LTSPCs and Farmer Mac Guaranteed Securities and USDA Guaranteed Securities as of June 30, 2011 and December 31, 2010.

Outstanding Balance of Loans, Loans Underlying Farmer Mac
Guaranteed Securities and LTSPCs, and USDA Guaranteed Securities

	June 30, 2011	December 31, 2010

Total	\$ 12,198,497	\$ 12,216,709

When particular criteria are met, such as the default of the borrower, Farmer Mac becomes entitled to purchase the defaulted loans underlying Farmer Mac Guaranteed Securities (commonly referred to as “removal-of-account” provisions). Farmer Mac records all such defaulted loans at their unpaid principal balance during the period in which Farmer Mac becomes entitled to purchase the loans and therefore gains effective control over the transferred loans. Subsequent to the purchase, such defaulted loans are treated as nonaccrual loans and, therefore, interest is

accounted for on the cash basis. Any decreases in expected cash flows are recognized as impairment.

The following table presents information related to Farmer Mac's acquisition of defaulted loans for the three and six months ended June 30, 2011 and 2010 and the outstanding balances and carrying amounts of all such loans as of June 30, 2011 and December 31, 2010, respectively.

	For the Three Months Ended		For the Six Months Ended	
	June 30, 2011 (in thousands)	June 30, 2010	June 30, 2011	June 30, 2010

	June 30, 2011 (in thousands)	December 31, 2010		
Outstanding balance	\$ 37,442	\$ 34,473		
Carrying amount	29,865	30,365		

Net credit losses and 90-day delinquencies as of and for the periods indicated for loans held and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs are presented in the table below. Information is not presented for loans underlying AgVantage securities, USDA Guaranteed Securities, Farmer Mac II Guaranteed Securities, or rural utilities loans held or underlying Farmer Mac Guaranteed Securities – Rural Utilities. Each AgVantage security is a general obligation of an issuing institution approved by Farmer Mac and is secured by eligible loans in an amount at least equal to the outstanding principal amount of the security. Farmer Mac excludes the loans that secure AgVantage securities from the credit risk metrics it discloses because of the credit quality of the issuing institutions, the collateralization level for the securities, and because delinquent loans are required to be removed from the pool of pledged loans and replaced with current eligible loans. As of June 30, 2011, there were no probable losses inherent in Farmer Mac’s AgVantage securities due to the credit quality of the obligors, as well as the underlying collateral. As of June 30, 2011, Farmer Mac had not experienced any credit losses on any AgVantage securities. The USDA-guaranteed portions presented as USDA Guaranteed Securities, as well as those that collateralize Farmer Mac II Guaranteed Securities, are guaranteed by the USDA. Each USDA guarantee is an obligation backed by the full faith and credit of the United States. As of June 30, 2011, neither Farmer Mac nor Farmer Mac II LLC had experienced any credit losses on any USDA Guaranteed Securities or Farmer Mac II Guaranteed Securities. As of June 30, 2011, there were no delinquencies and no probable losses inherent in Farmer Mac’s rural utilities loans held or in any Farmer Mac Guaranteed Securities – Rural Utilities. As of June 30, 2011 and 2010, Farmer Mac had not experienced any credit losses on any of those loans or securities.

	90-Day Delinquencies (1)			Net Credit Losses/(Recoveries)	
	As of June 30, 2011	As of December 31, 2010	As of June 30, 2010	For the Six Months Ended June 30, 2011	June 30, 2010
	(in thousands)				
On-balance sheet assets:					
Farmer Mac I:					
Loans	\$32,862	\$ 37,665	\$38,709	\$ 191	\$(1,926)
Total on-balance sheet	\$32,862	\$ 37,665	\$38,709	\$ 191	\$(1,926)

Total off-balance sheet	\$21,771	\$ 32,583	\$17,302	\$-	\$-
Total	\$54,633	\$ 70,248	\$56,011	\$ 191	\$(1,926)

(1) Includes Farmer Mac I loans held and loans underlying Farmer Mac I Guaranteed Securities and LTSPCs that are 90 days or more past due, in foreclosure, restructured after delinquency, and in bankruptcy, excluding loans performing under either their original loan terms or a court-approved bankruptcy plan.

Note 4.

Comprehensive Income

Comprehensive income represents all changes in stockholders' equity except those resulting from investments by or distributions to stockholders, and is comprised primarily of net income and unrealized gains and losses on securities available-for-sale, net of related taxes.

The following table sets forth Farmer Mac's comprehensive income for the three and six months ended June 30, 2011 and 2010:

	For the Three Months Ended		For the Six Months Ended	
	June 30, 2011	June 30, 2010	June 30, 2011	June 30, 2010
	(in thousands)			
Net income	\$ 11,437	\$ 8,090	\$ 36,027	\$ 21,679
Available-for-sale securities, net of tax:				
Net unrealized holding gains	27,466	23,853	20,911	28,353
Reclassification adjustment for realized gains (1)	(645)	-	(2,750)	(190)
Net change from available-for-sale securities (2)	26,821	23,853	18,161	28,163
Financial derivatives, net of tax:				
Reclassification for amortization of financial derivatives transition adjustment (3)	-	29	-	52
Other comprehensive income, net of tax	26,821	23,882	18,161	28,215
Comprehensive income	38,258	31,972	54,188	49,894
Less: Comprehensive income attributable to non-controlling interest	5,547	5,546	11,094	9,614
Total comprehensive income	\$ 32,711	\$ 26,426	\$ 43,094	\$ 40,280

- (1) Includes the reclassification of deferred gains recognized on certain Farmer Mac II Guaranteed Securities and USDA Guaranteed Securities of \$0.6 million and \$2.6 million, after tax, for the three and six months ended June 30, 2011, respectively.
- (2) Unrealized gains on available for sale securities are shown net of income tax expense of \$14.4 million and \$12.8 million for the three months ended June 30, 2011 and 2010, respectively, and \$9.8 million and \$15.3 million for the six months ended June 30, 2011 and 2010, respectively.
- (3) Amortization of the financial derivatives transition adjustment is shown net of income tax expense of \$16,000 and \$28,000 for the three and six months ended June 30, 2010, respectively.

During the three and six months ended June 30, 2011, Farmer Mac reclassified \$0.6 million and \$2.6 million (of a total \$7.0 million), respectively, of after-tax unrealized gains into earnings related to fair value changes of Farmer Mac II Guaranteed Securities and USDA Guaranteed Securities designated as available-for-sale that were transferred to Farmer Mac II LLC in January 2010. Included in these reclassifications are amortization amounts of \$1.8 million that relate to prior periods, beginning with first quarter 2010. These gains are presented as "Other income" on the condensed consolidated statements of operations. Farmer Mac will recognize in earnings the remainder of these deferred gains over the estimated remaining lives of the underlying USDA-guaranteed portions. There will, however, be no net effect on income on a consolidated basis because these gains will be offset by the amortization of premium expense on the assets held by Farmer Mac II LLC.

The following table presents Farmer Mac's accumulated other comprehensive income as of June 30, 2011 and December 31, 2010 and changes in the components of accumulated other comprehensive income for the six months ended June 30, 2011 and the year ended December 31, 2010.

	June 30, 2011	December 31, 2010
	(in thousands)	
Available-for-sale securities:		
Beginning balance	\$ 18,275	\$ 3,300
Net unrealized gains, net of tax	18,161	14,975
Ending balance	\$ 36,436	\$ 18,275
Financial derivatives:		
Beginning balance	\$ -	\$ (46)
Amortization of financial derivatives transition adjustment, net of tax	-	46
Ending balance	\$ -	\$ -
Accumulated other comprehensive income, net of tax	\$ 36,436	\$ 18,275

Note 5. Off-Balance Sheet Guarantees and Long Term Standby Purchase Commitments

Farmer Mac offers approved lenders two credit enhancement alternatives to increase their liquidity or lending capacity while retaining the cash flow benefits of their loans: (1) Farmer Mac Guaranteed Securities, which are available through the Farmer Mac I program, the Farmer Mac II program or the Rural Utilities program, and (2) LTSPCs, which are available through the Farmer Mac I program or the Rural Utilities program. For securitization trusts where Farmer Mac is the primary beneficiary, as described in Note 1(g), the trust assets and liabilities are included on Farmer Mac's condensed consolidated balance sheet. Upon consolidation, Farmer Mac eliminates the portion of the guarantee and commitment fees receivable and guarantee and commitment obligations related to the consolidated trusts. For the remainder of these transactions, or in the event of deconsolidation, both of these alternatives result in the creation of off-balance sheet obligations for Farmer Mac. Farmer Mac accounts for these transactions and other financial guarantees in accordance with accounting guidance on accounting for guarantees. Farmer Mac records, at the inception of a guarantee, a liability for the fair value of its obligation to stand ready to perform under the terms of each guarantee and an asset that is equal to the fair value of the fees that will be received over the life of each guarantee. The fair values of the guarantee obligation and asset at inception are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. Because the cash flows of these instruments may be interest rate path dependent, these values and projected discount rates are derived using a Monte Carlo simulation model. The guarantee obligation and corresponding asset are subsequently amortized into guarantee and commitment fee income in relation to the decline in the unpaid principal balance on the underlying agricultural real estate mortgage and rural utilities loans.

Off-Balance Sheet Farmer Mac Guaranteed Securities

Eligible loans and other eligible assets may be placed into trusts that are used as vehicles for the securitization of the transferred assets and the Farmer Mac-guaranteed beneficial interests in the trusts are sold to investors. Proceeds from new securitizations during the six months ended June 30, 2011 and 2010 were \$10.7 million and \$12.9 million, respectively. The following table summarizes cash flows received from and paid to trusts used for Farmer Mac securitizations:

	For the Six Months Ended	
	June 30,	June 30, 2010
	2011	
	(in thousands)	
Proceeds from new securitizations	\$ 10,734	\$ 12,906
Guarantee fees received	4,286	2,620
Purchases of assets from the trusts	(1,369)	(2,323)
Servicing advances	(20)	(343)
Repayments of servicing advances	14	174

The following table presents the maximum principal amount of potential undiscounted future payments that Farmer Mac could be required to make under all off-balance sheet Farmer Mac Guaranteed Securities as of June 30, 2011 and December 31, 2010, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans.

Outstanding Balance of Off-Balance Sheet Farmer Mac Guaranteed Securities		
	June 30, 2011	December 31, 2010
	(in thousands)	
Farmer Mac I:		
Farmer Mac Guaranteed Securities - AgVantage	\$ 2,445,000	\$ 2,945,000
Farmer Mac Guaranteed Securities	696,257	750,217
Farmer Mac II:		
Farmer Mac Guaranteed Securities	45,120	48,103
Rural Utilities:		
Farmer Mac Guaranteed Securities - AgVantage	18,080	15,292
Total off-balance sheet Farmer Mac Guaranteed Securities	\$ 3,204,457	\$ 3,758,612

For those securities issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the guarantee in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$14.5 million as of June 30, 2011 and \$17.7 million as of December 31, 2010. Upon adoption of the new accounting guidance on consolidation on January 1, 2010, Farmer

Mac eliminated \$15.5 million of the guarantee and commitment obligation related to the consolidated trusts. During second quarter 2010, Farmer Mac deconsolidated \$414.5 million of certain securitization trusts created when loans subject to LTSPCs were converted to Farmer Mac I Guaranteed Securities because Farmer Mac was no longer determined to be the primary beneficiary when the counterparty to the transaction ceased being a related party as a result of changes to the membership of Farmer Mac's board of directors. This deconsolidation resulted in an increase to the guarantee and commitment obligation of \$2.7 million as of June 30, 2010. See Note 1(g) for more information. As of June 30, 2011, the weighted-average remaining maturity of all loans underlying off-balance sheet Farmer Mac Guaranteed Securities, excluding AgVantage securities, was 13.6 years. As of June 30, 2011, the weighted-average remaining maturity of the off-balance sheet AgVantage securities was 2.4 years. For information on Farmer Mac's methodology for determining the reserve for losses on off-balance sheet Farmer Mac Guaranteed Securities, see Note 1(b).

LTSPCs

An LTSPC is a commitment by Farmer Mac to purchase eligible loans from a segregated pool of loans under enumerated circumstances, either for cash or in exchange for Farmer Mac Guaranteed Securities, on one or more undetermined future dates. As consideration for its assumption of the credit risk on loans underlying an LTSPC, Farmer Mac receives a commitment fee payable monthly in arrears in an amount approximating what would have been the guarantee fee if the transaction were structured as Farmer Mac Guaranteed Securities.

The maximum principal amount of potential undiscounted future payments that Farmer Mac could be requested to make under all LTSPCs, not including offsets provided by any recourse provisions, recoveries from third parties or collateral for the underlying loans, was \$1.7 billion as of June 30, 2011 and \$1.8 billion as of December 31, 2010.

As of June 30, 2011, the weighted-average remaining maturity of all loans underlying LTSPCs was 13.8 years. For those LTSPCs issued or modified on or after January 1, 2003, Farmer Mac has recorded a liability for its obligation to stand ready under the commitment in the guarantee and commitment obligation on the condensed consolidated balance sheet. This liability approximated \$13.1 million as of June 30, 2011 and \$12.6 million as of December 31, 2010.

Note 6.

Equity

Common Stock

Farmer Mac has three classes of common stock outstanding:

- Class A Voting Common Stock, which may be held only by banks, insurance companies and other financial institutions or similar entities that are not institutions of the Farm Credit System. By federal statute, no holder of Class A Voting Common Stock may directly or indirectly be a beneficial owner of more than 33 percent of the outstanding shares of that class of stock;
- Class B Voting Common Stock, which may be held only by institutions of the Farm Credit System. There are no restrictions on the maximum holdings of Class B Voting Common Stock; and
 - Class C Non-Voting Common Stock, which has no ownership restrictions.

From first quarter 2009 through second quarter 2011, Farmer Mac paid a quarterly dividend of \$0.05 per share on all classes of the Corporation's common stock. Farmer Mac's ability to declare and pay a dividend could be restricted if it failed to comply with regulatory capital requirements.

Preferred Stock

As of June 30, 2011 and December 31, 2010, Farmer Mac had 57,578 shares of Series C preferred stock outstanding. The Series C preferred stock is a component of Stockholders' Equity on the condensed consolidated balance sheets. The 57,578 shares of Series C preferred stock outstanding as of June 30, 2011 and December 31, 2010, were all held by the National Rural Utilities Cooperative Finance Corporation ("CFC"), a related party.

Farmer Mac's ability to declare and pay dividends on its outstanding preferred stock could be restricted if it failed to comply with regulatory capital requirements. All series of Farmer Mac's preferred stock are included as components of core capital for regulatory and statutory capital compliance measurements.

Non-Controlling Interest in Farmer Mac II LLC

On January 25, 2010, Farmer Mac completed a private offering of \$250.0 million of securities issued by a newly formed Delaware statutory trust. The trust securities represent undivided beneficial ownership interests in 250,000 shares of non-cumulative perpetual preferred stock (the "Farmer Mac II LLC Preferred Stock") of Farmer Mac's subsidiary, Farmer Mac II LLC, a Delaware limited liability company. The Farmer Mac II LLC Preferred Stock has a liquidation preference of \$1,000 per share.

Dividends on the Farmer Mac II LLC Preferred Stock will be payable if, when and as declared by Farmer Mac II LLC's board of directors, quarterly, on a non-cumulative basis, on March 30, June 30, September 30, and December 30 of each year. For each quarterly period from the date of issuance to but excluding the payment date occurring on March 30, 2015, the dividend rate on the Farmer Mac II LLC Preferred Stock will be 8.875 percent per annum. For each quarterly period from March 30, 2015 to but excluding the payment date occurring on March 30, 2020, the dividend rate on the Farmer Mac II LLC Preferred Stock will be 10.875 percent per annum. For each quarterly period beginning on March 30, 2020, the dividend rate on the Farmer Mac II LLC Preferred Stock will be an annual rate equal to three-month LIBOR plus 8.211 percent. Dividends on the Farmer Mac II LLC Preferred Stock will be non-cumulative, so dividends that are not declared for a payment date will not accrue. The Farmer Mac II LLC Preferred Stock is permanent equity of Farmer Mac II LLC and is presented as "Non-controlling interest – preferred stock" within permanent equity on the condensed consolidated balance sheets of Farmer Mac. Farmer Mac II LLC incurred \$8.1 million of direct costs related to the issuance of the Farmer Mac II LLC Preferred Stock, which reduced the amount of non-controlling interest – preferred stock. The accrual of declared dividends is presented as "Net income attributable to non-controlling interest – preferred stock dividends" on the condensed consolidated statements of operations on a pre-tax basis. The consolidated tax benefit is included in income tax expense.

Farmer Mac used part of the proceeds from the sale of \$250.0 million of the Farmer Mac II LLC Preferred Stock to repurchase and retire all \$150.0 million of the outstanding Series B Preferred Stock, which was newly issued during 2008 and reported as Mezzanine Equity on the condensed consolidated balance sheets.

Statutory and Regulatory Capital Requirements

Farmer Mac is subject to, and as of June 30, 2011 was in compliance with, its three statutory and regulatory capital requirements:

- Minimum capital – Farmer Mac’s minimum capital level is equal to the sum of 2.75 percent of Farmer Mac’s aggregate on-balance sheet assets, as calculated for regulatory purposes, plus 0.75 percent of the aggregate off-balance sheet obligations of Farmer Mac, including Farmer Mac Guaranteed Securities and LTSPCs;
- Critical capital – Farmer Mac’s critical capital level is equal to 50 percent of the minimum capital requirement at that time; and
- Risk-based capital – the Farm Credit Administration (“FCA”) has established a risk-based capital stress test for Farmer Mac.

As of June 30, 2011, Farmer Mac’s minimum and critical capital requirements were \$321.9 million and \$161.0 million, respectively, and Farmer Mac’s core capital level (common and preferred stock outstanding plus non-controlling interest – preferred stock, additional paid-in-capital and retained earnings) was \$484.2 million, \$162.3 million above the minimum capital requirement and \$323.2 million above the critical capital requirement. As of December 31, 2010, Farmer Mac’s minimum and critical capital requirements were \$301.0 million and \$150.5 million, respectively, and its actual core capital level was \$460.6 million, \$159.6 million above the minimum capital requirement and \$310.1 million above the critical capital requirement.

Based on the new risk-based capital stress test that became effective in second quarter 2011, Farmer Mac’s risk-based capital requirement as of June 30, 2011 was \$122.9 million and Farmer Mac’s regulatory capital (core capital plus the allowance for losses) of \$502.7 million exceeded that requirement by approximately \$379.8 million. Based on the risk-based capital stress test in effect prior to second quarter 2011, Farmer Mac’s risk-based capital requirement as of June 30, 2011 would have been \$32.7 million and Farmer Mac’s regulatory capital (core capital plus the allowance for losses) of \$502.7 million would have exceeded that requirement by approximately \$470.0 million. See “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Regulatory Matters” for more information about changes to the risk-based capital stress test applicable to Farmer Mac.

Note 7.

Fair Value Disclosure

Fair Value Measurement

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (also referred to as an exit price).

In determining fair value, Farmer Mac uses various valuation approaches, including market, income and/or cost approaches. The fair value hierarchy requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. When available, the fair value of Farmer Mac's financial instruments is based on quoted market prices, valuation techniques that use observable market-based inputs or unobservable inputs that are corroborated by market data. Pricing information obtained from third parties is internally validated for reasonableness prior to use in the condensed consolidated financial statements.

When observable market prices are not readily available, Farmer Mac estimates fair value using techniques that rely on alternate market data or internally-developed models using significant inputs that are generally less readily observable. Market data includes prices of financial instruments with similar maturities and characteristics, interest rate yield curves, measures of volatility and prepayment rates. If market data needed to estimate fair value is not available, Farmer Mac estimates fair value using internally-developed models that employ a discounted cash flow approach. Even when market assumptions are not readily available, Farmer Mac's assumptions reflect those that market participants would likely use in pricing the asset or liability at the measurement date.

The fair value hierarchy ranks the quality and reliability of the information used to determine fair values. The hierarchy gives highest priority to unadjusted quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The standard describes the following three levels used to classify fair value measurements:

Level 1 Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2 Quoted prices in markets that are not active or financial instruments for which all significant inputs are observable, either directly or indirectly.

Level 3 Prices or valuations that require unobservable inputs that are significant to the fair value measurement.

Farmer Mac performs a detailed analysis of the assets and liabilities carried at fair value to determine the appropriate level based on the transparency of the inputs used in the valuation techniques. In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an instrument's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Farmer Mac's assessment of the significance of a particular input to the fair value measurement of an instrument requires judgment and consideration of factors specific to the instrument. While Farmer Mac believes its valuation methods are appropriate and consistent with those of other market participants, using different methodologies or assumptions to determine fair value could result in a materially different estimate of the fair value of some financial instruments.

The following is a description of the fair value techniques used for instruments measured at fair value as well as the general classification of such instruments pursuant to the valuation hierarchy described above. Fair value measurements related to financial instruments that are reported at fair value in the consolidated financial statements each period are referred to as recurring fair value measurements. Fair value measurements related to financial instruments that are not reported at fair value each period but are subject to fair value adjustments in certain circumstances are referred to as non-recurring fair value measurements.

Recurring Fair Value Measurements and Classification

Available-for-Sale and Trading Investment Securities

The fair value of investments in U.S. Treasuries is based on unadjusted quoted prices in active markets. Farmer Mac classifies these fair value measurements as level 1.

For a significant portion of Farmer Mac's investment portfolio, including most asset-backed securities, corporate debt securities, senior agency debt securities, Government/GSE guaranteed mortgage-backed securities and preferred stock issued by GSEs, fair value is primarily determined using a reputable and nationally recognized third party pricing service. The prices obtained are non-binding and generally representative of recent market trades. The fair value of certain asset-backed and Government guaranteed mortgage-backed securities are estimated based on quotations from brokers or dealers. Farmer Mac corroborates its primary valuation source by obtaining a secondary price from another independent third party pricing service. Farmer Mac classifies these fair value measurements as level 2.

For investment securities that are thinly traded or not quoted, Farmer Mac estimates fair value using internally-developed models that employ a discounted cash flow approach. Farmer Mac maximizes the use of observable market data, including prices of financial instruments with similar maturities and characteristics, interest rate yield curves, measures of volatility and prepayment rates. Farmer Mac generally considers a market to be thinly traded or not quoted if the following conditions exist: (1) there are few transactions for the financial instruments; (2) the prices in the market are not current; (3) the price quotes vary significantly either over time or among independent pricing services or dealers; or (4) there is a limited availability of public market information. Farmer Mac classifies these fair value measurements as level 3.

Farmer Mac classifies its estimates of fair value for auction-rate certificates ("ARCs") as level 3 measurements. Farmer Mac uses unadjusted quotes from a broker specializing in these types of securities to determine the estimated fair value of these investments as of each quarter end. Farmer Mac believes these quotes are the best indication of fair value as of the measurement date, although there is uncertainty regarding the ability to transact at such levels. Considering (1) there is no active secondary market for these securities, although limited observable transactions do occasionally occur, (2) price quotes vary significantly among dealers or independent pricing services, if provided at all, and (3) there is little transparency in the price determination, Farmer Mac believes these measurements are appropriately classified as level 3. Prior to 2010, Farmer Mac used a discounted cash flow model to determine the estimated fair value of these investments as of each quarter end. The assumptions used in preparing the model included estimates for the amount and timing of future interest and principal payments and the rate of return required by investors to own these securities in the current environment. In making these assumptions, Farmer Mac considered relevant factors including: the formula for each security that defines the interest rate paid to investors in the event of a failed auction; forward projections of the interest rate benchmarks specified in such formulas; the likely timing of principal repayments; the probability of full repayment considering the underlying student loans are backed by the full faith and credit of the United States; and, publicly available pricing data for student loan asset-backed securities that are not subject to auctions. Farmer Mac classified these fair value measurements as level 3.

Net transfers in and/or out of the different levels within the fair value hierarchy are based on the fair values of the assets as of the beginning of the quarterly reporting period. Farmer Mac made no transfers within the fair value hierarchy for the fair value measurements of its investment securities in the first half of 2011. Transfers within the fair value hierarchy for the fair value measurements of investment securities in first quarter 2010 are described below.

During the first half of 2010, Farmer Mac transferred its investments in the subordinated debt and preferred stock of CoBank, ACB and its investment in the preferred stock of AgFirst Farm Credit Bank, with par values of \$70.0 million, \$88.5 million and \$88.0 million, respectively, as of December 31, 2009, from level 3 measurements to level 2 measurements. Taking into consideration its own recently executed trades during first quarter 2010, along with an increase in observable trading activity for these securities, Farmer Mac determined that the best estimates of fair value for these securities as of March 31, 2010 and continuing through June 30, 2011, were the fair values provided by an independent third party pricing service. Farmer Mac transferred these securities out of level 3 based on their fair values as of the beginning of the first quarter 2010.

Available-for-Sale and Trading Farmer Mac Guaranteed Securities and USDA Guaranteed Securities

Farmer Mac estimates the fair value of its Farmer Mac Guaranteed Securities and USDA Guaranteed Securities by discounting the projected cash flows of these instruments at projected interest rates. The fair values are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. Farmer Mac classifies these measurements as level 3 because there is limited market activity and therefore little or no price transparency. On a sample basis, Farmer Mac corroborates the fair value of its Farmer Mac Guaranteed Securities and USDA Guaranteed Securities by obtaining a secondary valuation from an independent third party service.

Farmer Mac made no transfers within the fair value hierarchy for the fair value measurements of Farmer Mac Guaranteed Securities and USDA Guaranteed Securities in the first six months of 2011. Transfers out of level 3 during first quarter 2010 resulted from the consolidation of certain trusts whereby the underlying assets were no longer reported at fair value on a recurring basis. Transfers out of level 3 are based on the fair values of the assets as of the beginning of the quarterly reporting period and are described in more detail below.

Upon the adoption of the new accounting guidance on consolidation on January 1, 2010, Farmer Mac was deemed to be the primary beneficiary of certain VIEs where Farmer Mac held beneficial interests in trusts used as vehicles for the securitization of agricultural real estate mortgage loans or rural utilities loans. Prior to 2010, Farmer Mac presented these beneficial interests as "Farmer Mac Guaranteed Securities" on the condensed consolidated balance sheet and reported them at their fair value. Upon consolidation, Farmer Mac transferred these assets from "Farmer Mac Guaranteed Securities" to "Loans held for investment in consolidated trusts." These loans are reported at their amortized cost and are no longer included in recurring fair value measurements. Farmer Mac transferred these securities out of level 3 based on their fair values as of the beginning of the first quarter 2010.

Financial Derivatives

The fair value of exchange-traded U.S. Treasury futures is based on unadjusted quoted prices for identical financial instruments. Farmer Mac classifies these fair value measurements as level 1.

Farmer Mac's derivative portfolio consists primarily of interest rate swaps, credit default swaps and forward sales contracts on the debt of other GSEs. Farmer Mac estimates the fair value of these financial instruments based upon the counterparty valuations. Farmer Mac internally values its derivative portfolio using a discounted cash flow valuation technique and obtains a secondary valuation for certain interest rate swaps to corroborate the counterparty valuations. Farmer Mac also regularly reviews the counterparty valuations as part of the collateral exchange process. Farmer Mac classifies these fair value measurements as level 2.

Certain basis swaps are nonstandard interest rate swap structures and are therefore internally modeled using significant assumptions and unobservable inputs, resulting in level 3 classification. Farmer Mac uses a discounted cash flow valuation technique, using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discounted rates commensurate with the risks involved.

As of June 30, 2011 and December 31, 2010, the consideration of credit risk related to both Farmer Mac and the counterparties resulted in an adjustment to the valuations of Farmer Mac's derivative portfolio of \$(0.2) million and \$(0.4) million, respectively. See Note 1(c) for further information regarding Farmer Mac's derivative portfolio.

Nonrecurring Fair Value Measurements and Classification

Loans Held for Sale

Loans held for sale are reported at the lower of cost or fair value in the condensed consolidated balance sheets. Farmer Mac internally models the fair value of loans by discounting the projected cash flows of these instruments at projected interest rates. The fair values are based on the present value of expected cash flows using management's best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. The fair values of these instruments are classified as level 3 measurements. As of June 30, 2011, Farmer Mac recorded an adjustment of \$9.9 million to report loans held for sale at the lower of cost or fair value. As of December 31, 2010, Farmer Mac recorded an adjustment of \$8.7 million to report loans held for sale at the lower of cost or fair value.

Real Estate Owned

Farmer Mac initially records REO properties at fair value less costs to sell and subsequently records them at the lower of carrying value or fair value less costs to sell. The fair value of REO is determined by third-party appraisals when available. When third-party appraisals are not available, fair value is estimated based on factors such as prices for comparable properties in similar geographical areas and/or assessment through observation of such properties. Farmer Mac classifies the REO fair values as level 3 measurements.

Fair Value Classification and Transfers

As of June 30, 2011, Farmer Mac's assets and liabilities recorded at fair value include financial instruments valued at \$5.1 billion whose fair values were estimated by management in the absence of readily determinable fair values (i.e., level 3). These financial instruments measured as level 3 represented 49 percent of the total assets and 70 percent of financial instruments measured at fair value as of June 30, 2011. As of December 31, 2010, Farmer Mac's asset and liabilities recorded at fair value included financial instruments valued at \$4.6 billion whose fair values were estimated by management in the absence of readily determinable fair values (i.e., level 3). These financial instruments measured as level 3 represented 49 percent of the total assets and 71 percent of financial instruments measured at fair value as of December 31, 2010.

The following tables present information about Farmer Mac's asset and liabilities measured at fair value on a recurring and nonrecurring basis as of June 30, 2011 and December 31, 2010, respectively, and indicate the fair value hierarchy of the valuation techniques used by Farmer Mac to determine such fair value.

Fair Value Option

Accounting guidance on the fair value option for financial instruments permits entities to make a one-time irrevocable election to report financial instruments at fair value with changes in fair value recorded in earnings as they occur. This guidance provides entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions.

Farmer Mac made no fair value option elections for the three and six months ended June 30, 2011 and 2010. For the three and six months ended June 30, 2011, Farmer Mac recorded net gains on trading assets of \$1.3 million and \$1.9 million, respectively, for changes in fair values of assets previously selected for the fair value option, compared to net gains of \$4.9 million and \$8.4 million, respectively, for the same periods ended June 30, 2010. These changes in fair value are presented as “Gains on trading assets” in the condensed consolidated statements of operations.

Disclosures about Fair Value of Financial Instruments

The following table sets forth the estimated fair values and the carrying amounts for financial assets, liabilities and guarantees and commitments as of June 30, 2011 and December 31, 2010 in accordance with accounting guidance on disclosures about fair value of financial instruments.

	June 30, 2011		December 31, 2010	
	Fair Value	Carrying Amount	Fair Value	Carrying Amount
(in thousands)				
Financial assets:				
Cash and cash equivalents	\$768,335	\$ 768,335	\$729,920	\$ 729,920

Farmer Mac Guaranteed Securities	17,298	14,528	15,653	17,681

The carrying amount of cash and cash equivalents, certain short-term investment securities, interest receivable and accrued interest payable is a reasonable estimate of their approximate fair value. Farmer Mac estimates the fair value of its loans, guarantee and commitment fees receivable/obligation and notes payable by discounting the projected cash flows of these instruments at projected interest rates. The fair values are based on the present value of expected cash flows using management’s best estimate of certain key assumptions, which include prepayment speeds, forward yield curves and discount rates commensurate with the risks involved. Because the cash flows of these instruments may be interest rate path dependent, these values and projected discount rates are derived using a Monte Carlo simulation model. Different market assumptions and estimation methodologies could significantly affect estimated fair value amounts.

Note 8.

Business Segment Reporting

Farmer Mac accomplishes its congressional mission of providing liquidity and lending capacity to rural lenders through three programs – Farmer Mac I, Farmer Mac II and Rural Utilities. Prior to first quarter 2010, Farmer Mac reported its financial results as a single segment using GAAP-basis income. Beginning in first quarter 2010, Farmer Mac revised its segment financial reporting, by using core earnings, a non-GAAP financial measure, to reflect the manner in which management has begun assessing the Corporation's performance since the contribution of substantially all of the Farmer Mac II program business to a subsidiary, Farmer Mac II LLC. Farmer Mac uses core earnings to measure corporate economic performance and develop financial plans because, in management's view, core earnings more accurately reflects Farmer Mac's economic performance, transaction economics and business trends. Core earnings differs from GAAP net income by excluding the effects of fair value accounting guidance, which are not expected to have a permanent effect on capital. Core earnings also differs from GAAP net income by excluding specified infrequent or unusual transactions that Farmer Mac believes are not indicative of future operating results and that may not reflect the trends and economic financial performance of the Corporation's core business. This non-GAAP financial measure may not be similar to non-GAAP financial measures disclosed by other companies.

The financial information presented below reflects the accounts of Farmer Mac and its subsidiaries on a consolidated basis. Accordingly, the core earnings for Farmer Mac's reportable operating segments will differ from the stand-alone financial statements of Farmer Mac's subsidiaries. These differences will be due to various factors, including the reversal of unrealized gains and losses related to fair value changes of trading assets and financial derivatives, as well as the allocation of certain expenses such as dividends and interest expense related to the issuance of capital and the incurrence of indebtedness managed at the corporate level. The allocation of general and administrative expenses that are not directly attributable to an operating segment may also result in differences. The assets of Farmer Mac's subsidiary Farmer Mac II LLC will only be available to creditors of Farmer Mac after all obligations owed to creditors of and equity holders in Farmer Mac II LLC have been satisfied. As of June 30, 2011, Farmer Mac II LLC held assets with a fair value of \$1.4 billion, had debt outstanding of \$141.0 million, had preferred stock outstanding with a liquidation preference of \$250.0 million and had \$1.0 billion of common stock outstanding, all of which is held by Farmer Mac.

Management has determined that the Corporation's operations consist of three reportable segments – Farmer Mac I, Farmer Mac II and Rural Utilities. Farmer Mac uses these three segments to generate revenue and manage business risk, and each segment is based on distinct products and distinct business activities. In addition to these three program operating segments, a corporate segment is presented. That segment represents activity in Farmer Mac's liquidity investment portfolio and other corporate activities. The segment financial results include directly attributable revenues and expenses. Corporate charges for administrative expenses that are not directly attributable to an operating segment are allocated based on headcount.

-57-

Each of the program operating segments generates revenue through purchasing loans or securities, committing to purchase loans or guaranteeing securities backed by eligible loans. Purchases of both program assets and assets held in Farmer Mac's liquidity investment portfolio are funded through debt issuance of various maturities. Management makes decisions about pricing, funding and guarantee and commitment fee levels based on inherent credit risks, resource allocation and target returns on equity separately for each segment.

Under the Farmer Mac I program, Farmer Mac purchases or commits to purchase eligible mortgage loans secured by first liens on agricultural real estate, including through the issuance of LTSPCs. Farmer Mac also guarantees securities representing interests in, or obligations secured by, pools of eligible agricultural real estate mortgage loans, and may purchase those securities.

Under the Farmer Mac II program, Farmer Mac II LLC purchases USDA-guaranteed portions of loans, which are presented as "USDA Guaranteed Securities" on the condensed consolidated balance sheets. Farmer Mac currently operates only that part of the Farmer Mac II program that involves the guarantee of Farmer Mac II Guaranteed Securities to investors other than Farmer Mac or Farmer Mac II LLC.

Under the Rural Utilities program, Farmer Mac's business activities include loan purchases, guarantees and purchases of securities with respect to eligible rural utilities loans. To date, all of the business under the Rural Utilities program has been with one lender, CFC, a related party.

The following tables present core earnings for Farmer Mac's reportable operating segments and a reconciliation to GAAP net income for the three and six months ended June 30, 2011 and 2010.

- (1) Includes reconciling adjustments for yield maintenance income and discount amortization on certain prepaid loans, and amortization of premiums on assets consolidated at fair value to reflect core earnings amounts.
- (2) Based on effective funding cost determined for each operating segment, including the expense related to interest rate swaps, which is included in losses on financial derivatives on the GAAP financial statements.
- (3) Includes reconciling adjustments for the reclassification of yield maintenance, discount amortization on certain prepaid loans and the expense related to interest rate swaps and fair value adjustments on loans held for sale and financial derivatives and trading assets.
- (4) Includes directly attributable costs and an allocation of indirectly attributable costs based on headcount.
- (5) Net adjustments to reconcile core earnings before income taxes; core earnings before preferred stock dividends, attribution of income to non-controlling interest, and loss on retirement of preferred stock; and segment core earnings to corresponding GAAP measures: income before income taxes, net income, and net income available to common stockholders, respectively.

Core Earnings by Business Segment
