Notes to Condensed Consolidated Financial Statements (Unaudited)

March 30, 2013

(In thousands, except share and per share information)

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the 13-week period ended March 30, 2013 are not necessarily indicative of the results that may be expected for the year ending December 28, 2013.

The condensed consolidated balance sheet at December 29, 2012 has been derived from the audited financial statements at that date but does not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K for the year ended December 29, 2012.

The Company's fiscal year is based on a 52-53 week period ending on the last Saturday of the calendar year. Therefore the financial results of certain fiscal years, and the associated 14-week quarters, will not be exactly comparable to the prior and subsequent 52-week fiscal years and the associated quarters having only 13 weeks. The quarters ended March 30, 2013 and March 31, 2012 both contain operating results for 13 weeks.

2. Inventories

The components of inventories consist of the following:

future conditions and are recorded as a liability on the balance sheet. The following reconciliation provides an illustration of changes in the aggregate warranty reserve.

6. Commitments and Contingencies

We are party to certain commitments, which includes raw materials, advertising and other indirect purchases in connection with conducting our business. Pursuant to these agreements, the Company is contractually committed to make purchases of approximately \$204,692 over the next five years.

In the normal course of business, the Company and its subsidiaries are parties to various legal claims, actions, and complaints, including matters involving patent infringement, other intellectual property, product liability, customer claims and various other risks. It is not possible to predict with certainty whether or not the Company and its subsidiaries will ultimately be successful in any of these legal matters, or if not, what the impact might be. However, the Company's management does not expect that the results in any of these legal proceedings will have a material adverse effect on the Company's results of operations, financial position or cash flows.

On March 14, 2013, the Company entered into a Memorandum of Agreement (the "Agreement") with Bombardier, Inc. ("Bombardier"). The Company is the supplier of the avionics system for the Lear 70 and Lear 75 aircraft currently in development for Learjet, Inc., which is a subsidiary of Bombardier (the "Program"). In order to assist Bombardier in connection with delayed cash flows from the Program partially related to the certification of avionics for the Program exceeding the planned delivery date, the Company agreed to provide Bombardier a short term, interest free, loan of \$173.7 million in cash in seven installments beginning on March 22, 2013 and ending on September 20, 2013 pursuant to the terms and conditions of the Agreement. Conditional upon the Company returning to Learjet a flight test vehicle and delivering specified Garmin software and hardware to Learjet no later than July 11, 2013, Bombardier will repay the loan in five installments beginning on November 1, 2013 and ending on March 7, 2014, provided that the repayment dates will be extended on a day for day basis if the July 11, 2013 milestone date is extended. As of March 30, 2013, the Company had advanced \$18.3 million to Bombardier, which is included in prepaid and other current assets in the accompanying condensed consolidated balance sheet.

7. Income Taxes

Our earnings before taxes decreased 18% when compared to the same quarter in 2012, while our income tax expense decreased by \$19,730 to (\$7,032) for the 13-week period ended March 30, 2013, from \$12,698 for the 13-week period ended March 31, 2012. The effective tax rate was (8.6%) in the first quarter of 2013 and 12.8% in the first quarter of 2012. The negative effective tax rate in 2013 was primarily driven by release of uncertain tax position reserves of \$16,536 related to expiration of certain statutes of limitations or completion of tax audits, as well as the impact of \$6,301 of research and development tax credits related to 2012 which were recognized when the related legislation was enacted in January 2013.

8. Marketable Securities

The FASB ASC topic entitled *Fair Value Measurements and Disclosures* defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). The accounting guidance classifies the inputs used to measure fair value into the following hierarchy:

Level 1 Unadjusted quoted prices in active markets for identical assets or liability

Level 2 Observable inputs for the asset or liability, either directly or indirectly, such as quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability

Level 3 Unobservable inputs for the asset or liability

The Company endeavors to utilize the best available information in measuring fair value. Financial assets and liabilities are classified in their entirety based on the lowest level of input that is significant to the fair value measurement. The valuation methods used by the Company for each significant class of investments are summarized below.

Mortgage-backed securities, corporate bonds and obligations of states and political subdivisions – Valued based on prices obtained from an independent pricing vendor using both market and income approaches. The primary inputs to the valuation include quoted prices for similar assets in active markets, quoted prices for identical or similar assets in markets that are not active, contractual cash flows, benchmark yields, and credit spreads.

Common stocks – Valued at the closing price reported on the active market on which the individual securities are traded.

The methods described above may produce a fair value calculation that may not be indicative of net realizable value or reflective of future fair values. Furthermore, while the Company believes its valuation methods are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the fair value of certain financial instruments could result in a different fair value measurement at the reporting date.

Available for sale securities measured at estimated fair value on a recurring basis are summarized below:

9. Share Repurchase Plan

On February 15, 2013, the Board of Directors approved a share repurchase program authorizing the Company to purchase up to \$300,000 of its common shares. A Rule 10b5-1 plan was adopted and allows the repurchase of its shares at times when it otherwise might be prevented from doing so under insider trading laws or because of self-imposed trading blackout periods. The share repurchase authorization expires on December 31, 2014. As of March 30, 2013, the Company had not repurchased any shares under the repurchase plan.

11. Recently Issued Accounting Pronouncements

In July 2012, the FASB issued Accounting Standards Update (ASU) No. 2012-02 “Testing Indefinite-Lived Intangible Assets for Impairment” (ASU 2012-02), which is included in ASC Topic 350 (Intangibles—Goodwill and Other). ASU 2012-02 provides an option for companies to use a qualitative approach to test indefinite-lived intangible assets for impairment if certain conditions are met. The amendments are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. The implementation of the amended accounting guidance did not have a material impact on the Company’s financial statements.

In February 2013, the FASB issued Accounting Standards Update (ASU) No. 2013-02 “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income” (ASU 2013-02), which is included in ASC Topic 220 (Comprehensive Income). The objective of ASU 2013-02 is to improve the reporting of reclassifications out of accumulated other comprehensive income. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. The Company has implemented this amendment and has included the required disclosure in the Notes to Condensed Consolidated Financial Statements.

The Company is a leading worldwide provider of navigation, communications and information devices, most of which are enabled by Global Positioning System, or GPS, technology. We operate in five business segments, the outdoor, fitness, marine, automotive/mobile and aviation markets. Our segments offer products through our network of independent dealers and distributors. However, the nature of products and types of customers for the five segments may vary significantly. As such, the segments are managed separately.

Allocation of certain research and development expenses, and selling, general, and administrative expenses are made to each segment on a percent of revenue basis. The following table sets forth our results of operations (in thousands) including revenue (net sales), operating income, and income before taxes for each of our five segments during the periods shown. For each line item in the table, the total of the outdoor, fitness, marine, automotive/mobile, and aviation segments' amounts equals the amount in the condensed consolidated statements of income included in Item 1.

Net sales decreased 4% for the 13-week period ended March 30, 2013 when compared to the year-ago quarter. The decrease was primarily driven by automotive/mobile and marine. Automotive/mobile revenue remains the largest portion of our revenue mix at 48% in the first quarter of 2013 compared to 50% in the first quarter of 2012.

Total unit sales decreased 8% to 2,491 in the first quarter of 2013 from 2,712 in the same period of 2012. The decrease in unit sales volume in the first quarter of fiscal 2013 was primarily attributable to reduced PND and marine volumes partially offset by growth in fitness, aviation, automotive OEM and outdoor.

Automotive/mobile segment revenue decreased 10% from the year-ago quarter, as volumes decreased 15% partially offset by average selling price (ASP) improvement primarily due to the amortization of previously deferred revenue exceeding current period revenue deferrals in the first quarter of 2013. Revenues in our marine segment decreased 10% as we discounted our existing product line in anticipation of new product releases in the second quarter of 2013. In addition, we continue to experience a weak global marine electronics industry due to macroeconomic instability. Aviation revenues increased 10% from the year-ago quarter as the OEM market improved in some aircraft categories, as well as contribution from recent share gains. Revenues in our fitness segment increased 2% from the year-ago quarter on the strength of recent cycling product introductions partially offset by the first quarter 2012 launch of the multi-sport Forerunner® 910XT, that contributed to 26% growth in that quarter.

Total	\$ 255,824	48	%	\$ 272,838	49	% \$ (17,014)	-6	%

Cost of goods sold decreased 6% for the 13-week period ended March 30, 2013 when compared to the year ago quarter. The decrease was driven primarily by the automotive/mobile segment which recorded a cost of goods as a percentage of revenues decrease of 310 basis points due to benefit from the amortization of previously deferred revenue and costs exceeding new deferrals on current period sales in the first quarter of 2013. This margin improvement was partially offset by increased cost of goods as a percentage of revenues in marine and outdoor. Marine cost of goods as a percentage of revenue increased by 1330 basis points primarily due to significant pricing discounts on aging inventory ahead of new product releases. Cost of goods as a percentage of revenue for outdoor were negatively impacted by product mix and ASP declines.

Gross Profit

Total	\$ 276,133	52	%	\$ 283,759	51	% \$ (7,626)	-3	%

Gross profit dollars in the first quarter of 2013 decreased 3% while gross profit margin increased 90 basis points compared to the first quarter of 2012 driven primarily by the automotive/mobile segment. The automotive/mobile gross margin improved to 42% driven by the amortization of previously deferred high margin revenues, as discussed above. This improvement was partially offset by a 1330 and 290 basis point decrease in gross profit margin percentage for the marine and outdoor segments, respectively, as discussed above.

Advertising Expense

Total	\$ 22,249	4	%	\$ 23,591	4	% \$ (1,342)	-6	%

Advertising expense decreased 6% in absolute dollars while holding steady as a percent of revenues. The decrease in absolute dollars occurred primarily in marine and automotive/mobile where spending reductions were in line with anticipated revenue declines.

Selling, General and Administrative Expense

Edgar Filing: GARMIN LTD - Form 10-Q

	13-weeks ended March 30, 2013			13-weeks ended March 31, 2012		Quarter over Quarter

Total	\$ 86,269	16	%	\$ 90,116	16	%	\$ (3,847)	-4

Selling, general and administrative expense decreased 4% in absolute dollars and was steady as a percent of revenues compared to the year-ago quarter. The absolute dollar decrease is primarily related to legal fees. The increase in aviation is partially related to an increase in bad debt expense. Other variances by segment are primarily due to the allocation of certain selling, general and administrative expenses based on percentage of total revenues.

Research and Development Expense

	13-weeks ended March 30, 2013		13-weeks ended March 31, 2012		Quarter over Quarter			
	Research & Development	% of Revenues		Research & Development	% of Revenues	\$ Change	% Change

Total	\$ 87,689	16	%	\$ 79,719	14	% \$ 7,970	10	%

Research and development expense increased 10% due to ongoing development activities for new products and the addition of almost 400 new engineering personnel to our staff since the year-ago quarter. In absolute dollars, research and development costs increased \$8.0 million when compared with the year-ago quarter representing a 220 basis point increase as a percent of revenue. Marine and automotive/mobile had the largest increase as a percent of sales as we are investing heavily in marine product enhancements and automotive OEM opportunities.

Operating income decreased 12% in absolute dollars and 120 basis points as a percent of revenue when compared to the first quarter of 2012. An improving gross margin percentage was offset by the effect of declining revenues and increased research and development expense, as discussed above.

Other Income (Expense)

Edgar Filing: GARMIN LTD - Form 10-Q

	13-weeks ended March 30, 2013	13-weeks ended March 31, 2012
Interest Income	\$ 8,898	\$ 9,671
Foreign Currency Exchange	(8,348)	(1,989)
Other	1,158	1,541
Total	\$ 1,708	\$ 9,223

The average return on cash and investments during the first quarter of 2013 was 1.5% compared to 1.6% during the same quarter of 2012. The decrease in interest income is attributable to declining cash balances and declining interest rates.

Foreign currency gains and losses for the Company are primarily tied to movements by the Taiwan Dollar, the Euro, and the British Pound Sterling. The Taiwan Dollar is the functional currency of Garmin Corporation. The U.S. Dollar remains the functional currency of Garmin (Europe) Ltd. The Euro is the functional currency of most European subsidiaries. As these entities have grown, currency fluctuations can generate material gains and losses. Additionally, Euro-based inter-company transactions can also generate currency gains and losses. Due to the relative size of the entities using a functional currency other than the Taiwan Dollar, the Euro and the British Pound Sterling, currency fluctuations related to these entities are not expected to have a material impact on the Company's financial statements.

The majority of the \$8.3 million currency loss in the first quarter of 2013 was due to the strengthening of the U.S. Dollar compared to the Euro and British Pound Sterling. The strengthening of the U.S. Dollar compared to the Taiwan Dollar contributed a partially offsetting gain. The movements of the Taiwan Dollar and Euro/British Pound Sterling have offsetting impacts due to the use of the Taiwan Dollar for manufacturing costs and cash held in non-functional currency while the Euro and British Pound Sterling transactions relate to revenue. During the first quarter of 2013, the U.S. Dollar strengthened 3.1% and 5.7% compared to the Euro and the British Pound Sterling, respectively, resulting in a loss of \$10.6 million. In addition, the U.S. Dollar strengthened 0.3% against the Taiwan Dollar, resulting in a \$3.3 million gain. The remaining net currency loss of \$1.0 million is related to other currencies and timing of transactions.

The majority of the \$2.0 million currency loss in the first quarter of 2012 was due to the weakening of the U.S. Dollar compared to the Taiwan Dollar. The weakening of the U.S. Dollar compared to the Euro and the British Pound Sterling contributed a partially offsetting gain. During the first quarter of 2012, the U.S. Dollar weakened 1.4% compared to the Taiwan Dollar resulting in a loss of \$17.4 million. Offsetting this loss, the U.S. Dollar weakened 3.0% and 3.5%, respectively, against the Euro and the British Pound Sterling, resulting in a \$13.0 million gain. The remaining net currency gain of \$2.4 million is related to other currencies and timing of transactions.

Income Tax Provision

Our earnings before taxes decreased 18% when compared to the same quarter in 2012, while our income tax expense decreased by \$19.7 million, to (\$7.0) million for the 13-week period ended March 30, 2013, from \$12.7 million for the 13-week period ended March 31, 2012. The effective tax rate was (8.6%) in the first quarter of 2013 and 12.8% in the first quarter of 2012. The negative effective tax rate in 2013 was primarily driven by release of uncertain tax position reserves of \$16,536 related to expiration of certain statutes of limitations or completion of tax audits, as well as the impact of \$6,301 of research and development tax credits related to 2012 which were recognized when the related legislation was enacted in January 2013.

Net Income

As a result of the above, net income increased 2% for the 13-week period ended March 30, 2013 to \$88.7 million compared to \$86.9 million for the 13-week period ended March 31, 2012.

Liquidity and Capital Resources

	March	March
	30,	31,
(In thousands)	2013	2012
Net cash provided by operating activities	\$59,363	\$122,228

The \$62.9 million decrease in cash provided by operating activities in first quarter 2013 compared to first quarter 2012 was primarily due to the following:

other current and noncurrent assets providing \$67.3 million less cash primarily due to a \$41 million tax-related prepayment that will be recovered in the second quarter of 2013 as well as the effect of a cash receipt in first quarter of 2012 of \$22.3 million related to the refund of a withholding tax payment from the Swiss Federal Tax Authority

accounts receivable providing \$32.9 million less cash primarily due to lower revenue in both fourth quarter 2012 and first quarter 2013

- deferred revenue/costs providing \$17.8 million less working capital benefit due to the increased amortization of previously deferred revenue/cost as discussed in the Results of Operations section above
- the impact of decreased stock compensation expense providing \$4.4 million less cash and
- the impact of declining depreciation and amortization providing \$3.5 million less cash

Partially offset by:

accounts payable providing \$39.9 million more cash primarily due to the impact of lower revenues and associated expenses in both fourth quarter 2012 and first quarter 2013 and

other current and non-current liabilities providing \$27.3 million more cash due to lower royalty costs on decreased revenues and the timing of such payments

Investing Activities

	March	March
	30,	31,
(In thousands)	2013	2012
Net cash used in investing activities	\$(17,955)	\$(54,846)

The \$36.9 million decrease in cash used in investing activities in first quarter 2013 compared to first quarter 2012 was primarily due to the following:

- decreased net investments in marketable securities providing cash of \$55.6 million

Partially offset by:

- increased cash advanced under a loan receivable commitment with Bombardier of \$18.3 million

It is management's goal to invest the on-hand cash consistent with Garmin's investment policy, which has been approved by the Board of Directors. The investment policy's primary purpose is to preserve capital, maintain an acceptable degree of liquidity, and maximize yield within the constraint of low credit risk. Garmin's average interest rate returns on cash and investments during first quarter 2013 and 2012 were approximately 1.5% and 1.6%,

respectively.

Financing Activities

	13-Weeks Ended	
	March 30,	March 31,
(In thousands)	2013	2012
Net cash used in financing activities	\$(174,286)	\$(74,483)

The \$99.8 million increase in cash used in financing activities in first quarter 2013 compared to first quarter 2012 was primarily due to the following:

- increased dividend payments of \$98.0 million due to the timing of our calendar fourth quarter 2012 dividend occurring after the close of our fiscal year and the increase in our year-over-year dividend rate

Our dividend has progressively increased from \$1.60 per share for the four calendar quarters beginning in June 2011 to \$1.80 per share for the four calendar quarters beginning in June 2012.

We currently use cash flow from operations to fund our capital expenditures, to support our working capital requirements, and to pay dividends. We expect that future cash requirements will principally be for capital expenditures, working capital, payment of dividends declared, share repurchases and the funding of strategic acquisitions. We believe that our existing cash balances and cash flow from operations will be sufficient to meet our projected capital expenditures, working capital and other cash requirements at least through the end of fiscal 2013.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Sensitivity

We have market risk primarily in connection with the pricing of our products and services and the purchase of raw materials. Product pricing and raw material costs are both significantly influenced by semiconductor market conditions. Historically, during cyclical economic downturns, we have been able to offset pricing declines for our products through a combination of improved product mix and success in obtaining price reductions in raw material costs.

Inflation

We do not believe that inflation has had a material effect on our business, financial condition or results of operations. If our costs were to become subject to significant inflationary pressures, we may not be able to fully offset such higher costs through price increases. Our inability or failure to do so could adversely affect our business, financial condition and results of operations.

Foreign Currency Exchange Rate Risk

The operation of the Company's subsidiaries in international markets results in exposure to movements in currency exchange rates. The potential of volatile foreign exchange rate fluctuations in the future could have a significant effect on our results of operations. In accordance with the Accounting Standards Code, the financial statements of all Company entities with functional currencies that are not United States dollars (USD) are translated for consolidation purposes into USD, the reporting currency of Garmin Ltd. Sales, costs, and expenses are translated at rates prevailing during the reporting periods and at end-of-period rates for all assets and liabilities. The effect of this translation is recorded in a separate component of stockholders' equity and have been included in accumulated other comprehensive income/(loss) in the accompanying condensed consolidated balance sheets and condensed consolidated statements of comprehensive income.

Foreign currency gains and losses for the Company are primarily tied to movements by the Taiwan Dollar (TD), the Euro, and the British Pound Sterling. The USD remains the functional currency of Garmin (Europe) Ltd. The Euro is the functional currency of most European subsidiaries, and as a result, Euro currency movement may generate material gains and losses. Additionally, Euro-based inter-company transactions in Garmin Ltd. can also generate currency gains and losses. Due to the relative size of entities using a functional currency other than the Taiwan Dollar,

the Euro and the British Pound Sterling, currency fluctuations within these entities are not expected to have a material impact on the Company's financial statements.

Interest Rate Risk

As of March 30, 2013, we are exposed to interest rate risk in connection with our investments in marketable securities. As interest rates change, the unrealized gains and losses associated with those securities will fluctuate accordingly. As we have no outstanding long term debt, we have no meaningful debt-related interest rate risk.

Item 4. Controls and Procedures

(a) *Evaluation of disclosure controls and procedures.* The Company maintains a system of disclosure controls and procedures that are designed to provide reasonable assurance that information, which is required to be timely disclosed, is accumulated and communicated to management in a timely fashion. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. As of March 30, 2013, the Company carried out an evaluation, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company's disclosure controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded as of March 30, 2013 that our disclosure controls and procedures were effective such that the information relating to the Company, required to be disclosed in our Securities and Exchange Commission ("SEC") reports (i) is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and (ii) is accumulated and communicated to the Company's management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in internal control over financial reporting.* There has been no change in the Company's internal controls over financial reporting that occurred during the Company's fiscal quarter ended March 30, 2013 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.
