UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-K

x ANNUAL REPORT UNDER SECTION 13 or 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended **December 31, 2014**

or

..TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 2-88927

FIRST KEYSTONE CORPORATION

(Exact name of registrant as specified in its Charter)

Pennsylvania

(State or other jurisdiction of incorporation)

23-2249083

(I.R.S. Employer Identification Number)

111 West Front Street Berwick, Pennsylvania

(Address of principal executive offices)

18603

(Zip Code)

Registrant's telephone number, including area code: **(570) 752-3671**

Securities registered pursuant to Section 12(b) of the Act: **None**

Securities registered pursuant to Section 12(g) of the Act: **Common Stock, par value \$2.00 per share**

Indicate by check mark if the registrant is a well-known seasoned issuer as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Exchange Act.

Yes No

Indicate by check mark whether the Registrant (1) filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the past 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if there is no disclosure of delinquent filers in response to Item 405 of Regulation S-K contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definitions of "large accelerated filer," "accelerated filer," and "small reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the registrant's outstanding voting common stock held by non-affiliates on June 30, 2014 determined by using a per share closing price on that date of \$24.85 as quoted on the Over the Counter Market, was \$123,933,063.

At March 2, 2015, there were 5,567,872 shares of Common Stock, \$2.00 par value, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the Registrant's 2015 definitive Proxy Statement are incorporated by reference in Part III of this Report.

Forward Looking Statements

In addition to historical information, this Annual Report on Form 10-K contains forward-looking statements, which are included pursuant to the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. Examples of forward-looking statements include, but are not limited to (a) projections or statements regarding future earnings, expenses, net interest income, other income, earnings or loss per share, asset mix and quality, growth prospects, capital structure, and other financial terms, (b) statements of plans and objectives of management or the Board of Directors, and (c) statements of assumptions, such as economic conditions in First Keystone Corporation’s (the “Corporation”) market areas. Such forward-looking statements can be identified by the use of forward-looking terminology such as “believes”, “expects”, “may”, “intends”, “will”, “should”, “anticipates”, or the negative of any of the foregoing or other variations thereon or comparable terminology, or by discussion of strategy.

Forward-looking statements are subject to certain risks and uncertainties such as local economic conditions, competitive factors, and regulatory limitations. Actual results may differ materially from those projected in the forward-looking statements. Such risks, uncertainties and other factors that could cause actual results and experience to differ from those projected include, but are not limited to, the following: ineffectiveness of the business strategy due to changes in current or future market conditions; the effects of weak economic conditions on current customers, specifically the effect of the economy on loan customers’ ability to repay loans; possible impacts of the capital and liquidity requirements of Basel III standards and other regulatory pronouncements, regulations and rules; effects of short- and long-term federal budget and tax negotiations and their effects on economic and business conditions; changes in accounting principles, policies or guidelines as may be adopted by the regulatory agencies as well as the Public Company Accounting Oversight Board and the Financial Accounting Standards Board, and other accounting standards setters; the effects of competition from other commercial banks, thrifts, mortgage banking firms, consumer finance companies, credit unions, securities brokerage firms, insurance companies, money market and other mutual funds and other financial institutions operating in our market area and elsewhere, including institutions operating locally, regionally, nationally and internationally, together with such competitors offering banking products and services by mail, telephone, computer and the internet; governmental monetary and fiscal policies, as well as legislative and regulatory changes; the risks of changes in interest rates on the level and composition of deposits, loan demand, and the values of loan collateral, securities and interest rate protection agreements, as well as interest rate risks; information technology difficulties, including technological changes; challenges in establishing and maintaining operations in new markets; volatilities in the securities markets; acquisitions and integration of acquired businesses; the failure of assumptions underlying the establishment of reserves for loan losses and estimations of values of collateral and various financial assets and liabilities; acts of war or terrorism; disruption of credit and equity markets; our ability to manage current levels of impaired assets; deposit flows; the loss of certain key officers; our ability to

maintain the value and image of our brand and protect our intellectual property rights; continued relationships with major customers; the potential impact to the Corporation from continually evolving cybersecurity and other technological risks and attacks, including additional costs, reputational damage, regulatory penalties and financial losses; and weak economic conditions.

We caution readers not to place undue reliance on these forward-looking statements. They only reflect management's analysis as of this date. The Corporation does not revise or update these forward-looking statements to reflect events or changed circumstances. Please carefully review the risk factors described in this document and in other documents the Corporation files from time to time with the Securities and Exchange Commission, including the Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, and any Current Reports on Form 8-K.

ITEM 1. BUSINESS

General

First Keystone Corporation (the “Corporation”) is a Pennsylvania business corporation, and a bank holding company, registered with and supervised by the Board of Governors of the Federal Reserve System. The Corporation was incorporated on July 6, 1983, and commenced operations on July 2, 1984, upon consummation of the acquisition of all of the outstanding stock of First National Bank of Berwick (the predecessor to First Keystone Community Bank). The Corporation has one wholly-owned subsidiary, First Keystone Community Bank (the “Bank”), which has a commercial banking operation and trust department as its major lines of business. Since commencing operations, the Corporation’s business has consisted primarily of managing and supervising the Bank, and its principal source of income has been dividends paid by the Bank. Greater than 98% of the Corporation’s revenue and profit came from the commercial bank subsidiary for the years ended December 31, 2014, 2013, and 2012, and was the only reportable segment. At December 31, 2014, the Corporation had total consolidated assets, deposits and stockholders’ equity of approximately \$912 million, \$662 million and \$106 million, respectively.

First Keystone Community Bank was originally organized in 1864 as a national banking association. On October 1, 2010, the Bank converted from a national banking association to a Pennsylvania chartered commercial bank under the supervision of the Pennsylvania Department of Banking and Securities and the FDIC.

Effective November 1, 2007, the Corporation completed its acquisition of Pocono Community Bank through the merger of Pocono with and into the Bank. On the acquisition date, Pocono Community Bank had approximately \$150 million in assets, \$105 million in loans and \$110 million in deposits. Headquartered in Stroudsburg, Pennsylvania, and organized in 1996, Pocono had 4 banking offices located in Monroe County, Pennsylvania. The acquisition expanded the branch network of the Corporation and provides Pocono customers with a broader array of products and services.

The Bank’s deposits are insured by the Federal Deposit Insurance Corporation (the “FDIC”) to the maximum extent of the law regulated by the FDIC and the Pennsylvania Department of Banking and Securities. The Bank is subject to regulation by the Federal Reserve Board governing reserves required to be maintained against certain deposits and other matters. The Bank is also a member of the Federal Home Loan Bank of Pittsburgh, which is one of the twelve regional cooperative banks comprising the system of Federal Home Loan Banks that lending institutions use to finance housing and economic development in local communities.

The Bank’s legal headquarters are located at 111 West Front Street, Berwick, Pennsylvania, from which it oversees the operations of its eighteen branch locations. These locations consist of five branches within Columbia County, eight branches within Luzerne County, one branch in Montour County, and four branches within Monroe County, Pennsylvania. For further information, please refer to Item 2 – Properties, and Note 13 – Commitments and

Contingencies in the notes to the consolidated financial statements.

The Bank is a full service commercial bank providing a wide range of services to individuals and small to medium sized businesses in its Northeastern Pennsylvania market area. The Bank's commercial banking activities include accepting time, demand and savings deposits and making secured and unsecured commercial, real estate and consumer loans. Additionally, the Bank provides personal and corporate trust and agency services to individuals, corporations and others, including trust investment accounts, investment advisory services, mutual funds, estate planning, and management of pension and profit sharing plans. The Bank's business is not seasonal in nature. The Bank has no foreign loans or highly leveraged transaction loans, as defined by the Federal Reserve Board. Substantially all of the loans in the Bank's portfolio have been originated by the Bank. Policies adopted by the Board of Directors are the basis by which the Bank conducts its lending activities.

At December 31, 2014, the Bank had 189 full-time employees and 29 part-time employees. In the opinion of management, the Bank enjoys a satisfactory relationship with its employees. The Bank is not a party to any collective bargaining agreement.

The Corporation's internet website is www.firstkeystonecorporation.com and the Bank's internet website is www.fkcbank.com.

When we say "we", "us", "our" or the "Corporation", we mean the Corporation on a consolidated basis with the Bank.

Primary Market Areas

The Bank's primary market area reaches from Monroe and Montour counties along the Interstate 80 corridor through parts of Columbia and Luzerne counties as well as other adjoining counties. The Bank's eastern market area is centered in Stroudsburg, Pennsylvania and serves all of Monroe county, as well as adjoining counties of Pike and Northampton. The area served by the Bank is a mix of rural communities and small to mid-sized towns. The current population of the Bank's primary four-county footprint has decreased 0.5% since 2010 to 573,000 and is estimated to decrease 0.4% to 571,000 by 2019. As of June 30, 2014, the FDIC deposit market share data ranked the Bank 4th in the deposit market share in the four-county market, with 6.0% of deposits.

The Bank's headquarters, main office, and three of its branch offices are located in Berwick, Pennsylvania. Therefore, the Bank has a very strong presence in the Borough of Berwick, a community with a current population of approximately 10,000. The Bank ranks a commanding first in deposit market share in the Berwick market with 71.1% of deposits as of June 30, 2014, based on data compiled annually by the FDIC.

In the course of attracting and retaining deposits and originating loans, the Bank faces considerable competition. The Bank competes with 26 commercial banks, 3 savings associations, and 49 credit unions for traditional banking products, such as deposits and loans in its primary four-county market area. Additionally, the Bank competes with consumer finance companies for loans, mutual funds and other investment alternatives for deposits. The Bank competes for deposits based on the ability to provide a range of competitively priced products, quality service, competitive rates, and convenient locations and hours. The competition among its peers for loan origination generally relates to interest rates offered, products available, ease of process, quality of service, and loan origination fees charged. The economic base of the Bank's market region is developed around small business, health care, educational facilities (college and public schools), light manufacturing industries, and agriculture.

The Bank continues to assess the market area to determine the best way to meet the financial needs of the communities it serves. Management continues to pursue new market opportunities based on a strategic plan to efficiently grow the Bank, improve earnings performance, and bring the Bank's products and services to new customers. Management strategically addresses growth opportunities versus competitive issues by determining the new products and services to be offered, evaluating expansion opportunities of its existing footprint with new locations, as well as investing in the expertise of skilled staffing. The Bank continues to succeed in serving its customers by living up to its motto, "Yesterday's Traditions. Tomorrow's Vision."

Competition - Bank

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

The Bank's competition is comprised of national, regional and community banking financial institutions. The Bank's major competitors in Columbia, Luzerne, Montour and Monroe counties are:

- First Columbia Bank & Trust Co. of Bloomsburg
 - PNC Bank, N.A.
 - M & T Bank
 - FNB Bank, N.A.
 - Wells Fargo Bank
 - National Penn Bank
 - Citizens Bank
- ESSA Bank & Trust
- First National Community Bank
- Service 1st FCU
- Jersey Shore State Bank
- Bank of America
- Valor FCU

The Bank is generally competitive with all competing financial institutions in its service area with respect to interest rates paid on time and savings deposits, service charges on deposit accounts and interest rates charged on loans.

Concentration

The Corporation and the Bank are not dependent on deposits nor exposed by loan concentrations to a single customer or to a small group of customers, such that the loss of any one or more would not have a materially adverse effect on the financial condition of the Corporation or the Bank. The customers' ability to repay their loans is generally dependent on the real estate market and general economic conditions prevailing in Pennsylvania, among other factors.

Supervision and Regulation

The Corporation is subject to the jurisdiction of the Securities and Exchange Commission (the "SEC") and of state securities laws for matters relating to the offering and sale of its securities. The Corporation is currently subject to the SEC's rules and regulations relating to companies whose shares are registered under Section 12 of the Securities Exchange Act of 1934 (the "Exchange Act"), as amended.

The Corporation is also subject to the provisions of the Bank Holding Company Act of 1956, as amended, and to supervision by the Federal Reserve Board. The Bank Holding Company Act requires the Corporation to secure the prior approval of the Federal Reserve Board before it owns or controls, directly or indirectly, more than 5% of the voting shares of substantially all of the assets of any institution, including another bank.

The Bank Holding Company Act also prohibits acquisition of control of a bank holding company, such as the Corporation, without prior notice to the Federal Reserve Board. Control is defined for this purpose as the power, directly or indirectly, to direct the management or policies of a bank holding company or to vote 25% (or 10%, if no other person or persons acting on concert, holds a greater percentage of the common stock) or more of the Corporation's common stock.

The Corporation is required to file an annual report with the Federal Reserve Board and any additional information that the Federal Reserve Board may require pursuant to the Bank Holding Company Act. The Federal Reserve Board may also make examinations of the Corporation and any or all of its subsidiaries.

The Bank is subject to federal and state statutes applicable to banks chartered under the banking laws of Pennsylvania and to banks whose deposits are insured by the FDIC. The Bank is subject to supervision, regulation and examination by the Pennsylvania Department of Banking and Securities, the FDIC and the Consumer Financial Protection Bureau.

Federal and state banking laws and regulations govern, among other things, the scope of a bank's business, the investments a bank may make, the reserves against deposits a bank must maintain, loans a bank makes and collateral it takes, and the activities of a bank with respect to mergers and consolidations and the establishment of branches.

As a subsidiary of a bank holding company, the Bank is subject to certain restrictions imposed by the Federal Reserve Act on any extensions of credit to the bank holding company or its subsidiaries, on investments in the stock or other securities of the bank holding company or its subsidiaries and on taking such stock or securities as collateral for loans. The Federal Reserve Act and Federal Reserve Board regulations also place certain limitations and reporting requirements on extensions of credit by a bank to principal shareholders of its parent holding company, among others, and to related interests of such principal shareholders. In addition, such legislation and regulations may affect the terms upon which any person becoming a principal shareholder of a holding company may obtain credit from banks with which the subsidiary bank maintains a correspondent relationship.

Permitted Non-Banking Activities

The Federal Reserve Board permits bank holding companies to engage in non-banking activities so closely related to banking, managing or controlling banks as to be a proper incident thereto. The Corporation does not at this time engage in any of these non-banking activities, nor does the Corporation have any current plans to engage in any other permissible activities in the foreseeable future.

Legislation and Regulatory Changes

From time to time, various types of federal and state legislation have been proposed that could result in additional regulations of, and restrictions on, the business of the Bank. It cannot be predicted whether any such legislation will be adopted or how such legislation would affect the business of the Bank. As a consequence of the extensive regulation of commercial banking activities in the United States, the Bank's business is particularly susceptible to being affected by federal legislation and regulations that may increase the costs of doing business.

From time to time, legislation is enacted which has the effect of increasing the cost of doing business, limiting or expanding permissible activities or affecting the competitive balance between banks and other financial institutions. No prediction can be made as to the likelihood of any major changes or the impact such changes might have on the Corporation and the Bank. Certain changes of potential significance to the Corporation which have been enacted recently and others which are currently under consideration by Congress or various regulatory agencies are discussed below.

Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA")

The FDICIA established five different levels of capitalization of financial institutions, with "prompt corrective actions" and significant operational restrictions imposed on institutions that are capital deficient under the categories. The five categories are:

- well capitalized
- adequately capitalized
- undercapitalized
- significantly undercapitalized, and
- critically undercapitalized.

To be considered well capitalized, an institution must have a total risk-based capital ratio of at least 10%, a Tier 1 risk-based capital ratio of at least 6%, a leverage capital ratio of at least 5%, and must not be subject to any order or directive requiring the institution to improve its capital level. An institution falls within the adequately capitalized category if it has a total risk-based capital ratio of at least 8%, a Tier 1 risk-based capital ratio of at least 4%, and a leverage capital ratio of at least 4%. Institutions with lower capital levels are deemed to be undercapitalized,

significantly undercapitalized or critically undercapitalized, depending on their actual capital levels. In addition, the appropriate federal regulatory agency may downgrade an institution to the next lower capital category upon a determination that the institution is in an unsafe or unsound condition, or is engaged in an unsafe or unsound practice. Institutions are required under the FDICIA to closely monitor their capital levels and to notify their appropriate regulatory agency of any basis for a change in capital category. On December 31, 2014, the Corporation and the Bank exceeded the minimum capital levels of the well capitalized category. See Note 15 — Regulatory Matters.

Regulatory oversight of an institution becomes more stringent with each lower capital category, with certain “prompt corrective actions” imposed depending on the level of capital deficiency.

Other Provisions of the FDICIA

Each depository institution must submit audited financial statements to its primary regulator and the FDIC, whose reports are made publicly available. In addition, the audit committee of each depository institution must consist of outside directors and the audit committee at “large institutions” (as defined by FDIC regulation) must include members with banking or financial management expertise. The audit committee at “large institutions” must also have access to independent outside counsel. In addition, an institution must notify the FDIC and the institution’s primary regulator of any change in the institution’s independent auditor, and annual management letters must be provided to the FDIC and the depository institution’s primary regulator. The regulations define a “large institution” as one with over \$500 million in assets, which does include the Bank. Also, under the rule, an institution's independent public accountant must examine the institution's internal controls over financial reporting and perform agreed-upon procedures to test compliance with laws and regulations concerning safety and soundness.

Under the FDICIA, each federal banking agency must prescribe certain safety and soundness standards for depository institutions and their holding companies. Three types of standards must be prescribed:

- asset quality and earnings
- operational and managerial, and
- compensation

Such standards would include a ratio of classified assets to capital, minimum earnings, and, to the extent feasible, a minimum ratio of market value to book value for publicly traded securities of such institutions and holding companies. Operational and managerial standards must relate to:

- internal controls, information systems and internal audit systems
- loan documentation
- credit underwriting
- interest rate exposure
- asset growth, and
- compensation, fees and benefits

The FDICIA also sets forth Truth in Savings disclosure and advertising requirements applicable to all depository institutions.

Real Estate Lending Standards. Pursuant to the FDICIA, federal banking agencies adopted real estate lending guidelines which would set loan-to-value (“LTV”) ratios for different types of real estate loans. The LTV ratio is generally defined as the total loan amount divided by the appraised value of the property at the time the loan is originated. If the institution does not hold a first lien position, the total loan amount would be combined with the amount of all junior liens when calculating the ratio. In addition to establishing the LTV ratios, the guidelines require all real estate loans to be based upon proper loan documentation and a recent appraisal or certificate of inspection of the property.

Regulatory Capital Requirements

The federal banking regulators have adopted certain risk-based capital guidelines to assist in the assessment of the capital adequacy of a banking organization’s operations for both transactions reported on the balance sheet as assets and transactions, such as letters of credit, and recourse agreements, which are recorded as off-balance sheet items. Under these guidelines, nominal dollar amounts of assets and credit equivalent amounts of off-balance sheet items are multiplied by one of several risk adjustment percentages, which range from 0% for assets with low credit risk, such as certain U.S. Treasury securities, to 100% for assets with relatively high credit risk, such as business loans.

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

The following table presents the Bank's capital ratios at December 31, 2014.

	(In Thousands)	
Tier I Capital	\$	77,423
Tier II Capital		6,390
Total Capital	\$	83,813
Adjusted Total Average Assets	\$	897,419
Total Adjusted Risk-Weighted Assets ¹	\$	556,121
Tier I Risk-Based Capital Ratio ²	13.92	%
Required Tier I Risk-Based Capital Ratio	4.00	%
Excess Tier I Risk-Based Capital Ratio	9.92	%
Total Risk-Based Capital Ratio ³	15.07	%
Required Total Risk-Based Capital Ratio	8.00	%
Excess Total Risk-Based Capital Ratio	7.07	%
Tier I Leverage Ratio ⁴	8.63	%
Required Tier I Leverage Ratio	4.00	%
Excess Tier I Leverage Ratio	4.63	%

¹Includes off-balance sheet items at credit-equivalent values less intangible assets.

²Tier I Risk-Based Capital Ratio is defined as the ratio of Tier I Capital to Total Adjusted Risk-Weighted Assets.

³Total Risk-Based Capital Ratio is defined as the ratio of Tier I and Tier II Capital to Total Adjusted Risk-Weighted Assets.

⁴Tier I Leverage Ratio is defined as the ratio of Tier I Capital to Adjusted Total Average Assets.

The Corporation's capital ratios are not materially different than those of the Bank.

The Corporation's ability to maintain the required levels of capital is substantially dependent upon the success of the Corporation's capital and business plans; the impact of future economic events on the Corporation's loan customers; and the Corporation's ability to manage its interest rate risk and investment portfolio and control its growth and other operating expenses. See also the information under Capital Strength in Management's Discussion and Analysis on page 39 of this report.

Regulatory Capital Changes

In July 2013, the federal banking agencies issued final rules to implement the Basel III regulatory capital reforms and changes required by the Dodd-Frank Act. The phase-in period for community banking organizations begins January 1, 2015, while larger institutions (generally those with assets of \$250 billion or more) must begin compliance on January 1, 2014. The final rules call for the following capital requirements:

- A minimum ratio of common tier 1 capital to risk-weighted assets of 4.5%.
- A minimum ratio of tier 1 capital to risk-weighted assets of 6%.
- A minimum ratio of total capital to risk-weighted assets of 8%.
- A minimum leverage ratio of 4%.

In addition, the final rules establish a common equity tier 1 capital conservation buffer of 2.5% of risk-weighted assets applicable to all banking organizations. If a banking organization fails to hold capital above the minimum capital ratios and the capital conservation buffer, it will be subject to certain restrictions on capital distributions and discretionary bonus payments. The phase-in period for the capital conservation and countercyclical capital buffers for all banking organizations will begin on January 1, 2016.

Under the initially proposed rules, accumulated other comprehensive income ("AOCI") would have been included in a banking organization's common equity tier 1 capital. The final rules allow community banks to make a one-time election not to include these additional components of AOCI in regulatory capital and instead use the existing treatment under the general risk-based capital rules that excludes most AOCI components from regulatory capital. The opt-out election must be made in the first call report or FR Y-9 series report that is filed after the financial institution becomes subject to the final rule.

The final rules permanently grandfather non-qualifying capital instruments (such as trust preferred securities and cumulative perpetual preferred stock) issued before May 19, 2010 for inclusion in the tier 1 capital of banking organizations with total consolidated assets less than \$15 billion as of December 31, 2009 and banking organizations that were mutual holding companies as of May 19, 2010. The Corporation does not have trust preferred securities or cumulative perpetual preferred stock with no plans to add these to the capital structure.

The proposed rules would have modified the risk-weight framework applicable to residential mortgage exposures to require banking organizations to divide residential mortgage exposures into two categories in order to determine the applicable risk weight. In response to commenter concerns about the burden of calculating the risk weights and the potential negative effect on credit availability, the final rules do not adopt the proposed risk weights but retain the current risk weights for mortgage exposures under the general risk-based capital rules.

Consistent with the Dodd-Frank Act, the new rules replace the ratings-based approach to securitization exposures, which is based on external credit ratings, with the simplified supervisory formula approach in order to determine the appropriate risk weights for these exposures. Alternatively, banking organizations may use the existing gross-up approach to assign securitization exposures to a risk weight category or choose to assign such exposures a 1,250 percent risk weight.

Under the new rules, mortgage servicing assets and certain deferred tax assets are subject to stricter limitations than those applicable under the current general risk-based capital rule. The new rules also increase the risk weights for past-due loans, certain commercial real estate loans, and some equity exposures, and makes selected other changes in risk weights and credit conversion factors.

The Corporation has assessed the impact of these changes on the regulatory ratios of the Corporation and the Bank on the capital, operations, liquidity and earnings of the Corporation and Bank, and concluded that the new rules will not have a material negative effect.

Effect of Government Monetary Policies

The earnings of the Corporation are and will be affected by domestic economic conditions and the monetary and fiscal policies of the United States government and its agencies.

The Federal Reserve Board has had, and will likely continue to have, an important impact on the operating results of commercial banks through its power to implement national monetary policy in order to, among other things, curb inflation or combat a recession. The Federal Reserve Board has a major effect upon the levels of bank loans, investments and deposits through its open market operations in United States government securities and through its regulations of, among other things, the discount rate on borrowings of member banks and the reserve requirements against member bank deposits. It is not possible to predict the nature and impact of future changes in monetary and fiscal policies.

Effects of Inflation

Inflation has some impact on the Bank's operating costs. Unlike industrial companies, however, substantially all of the Bank's assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on the Bank's performance than the general levels of inflation. Over short periods of time, interest rates may not necessarily move in the same direction or in the same magnitude as prices of goods and services.

Environmental Regulation

There are several federal and state statutes that regulate the obligations and liabilities of financial institutions pertaining to environmental issues. In addition to the potential for attachment of liability resulting from its own actions, a bank may be held liable, under certain circumstances, for the actions of its borrowers, or third parties, when such actions result in environmental problems on properties that collateralize loans held by the bank. Further, the liability has the potential to far exceed the original amount of the loan issued by the Bank. Currently, neither the Corporation nor the Bank is a party to any pending legal proceeding pursuant to any environmental statute, nor are the Corporation and the Bank aware of any circumstances that may give rise to liability under any such statute.

Interest Rate Risk

Federal banking agency regulations specify that the Bank's capital adequacy include an assessment of the Bank's interest rate risk exposure. The standards for measuring the adequacy and effectiveness of a banking organization's Interest Rate Risk ("IRR") management includes a measurement of Board of Directors and senior management oversight, and a determination of whether a banking organization's procedures for comprehensive risk management are appropriate to the circumstances of the specific banking organization. The Bank has internal IRR models that are used to measure and monitor IRR. Additionally, the regulatory agencies have been assessing IRR on an informal basis for several years. For these reasons, the Corporation does not expect the addition of IRR evaluation to the agencies' capital guidelines to result in significant changes in capital requirements for the Bank.

JOBS Act

In 2012, the Jumpstart Our Business Startups Act (the "JOBS Act") became law. The JOBS Act is aimed at facilitating capital raising by smaller companies, banks and bank holding companies by implementing the following changes:

- Raising the threshold requiring registration under the Exchange Act for banks and bank holdings companies from 500 to 2,000 holders of record;

- Raising the threshold for triggering deregistration under the Exchange Act for banks and bank holding companies from 300 to 1,200 holders of record;

- Raising the limit for Regulation A offerings from \$5 million to \$50 million per year and exempting some Regulation A offerings from state blue sky laws;

 - Permitting advertising and general solicitation in Rule 506 and Rule 144A offerings;

- Allowing private companies to use "crowdfunding" to raise up to \$1 million in any 12-month period, subject to certain conditions; and

 - Creating a new category of issuer, called an "Emerging Growth Company," for companies with less than \$1 billion in annual gross revenue, which will benefit from certain changes that reduce the cost and burden of carrying out an equity initial public offering and complying with public company reporting obligations for up to five years.

The JOBS Act has not had any application to the Corporation, and management will continue to monitor the implementation rules for potential effects which might benefit the Corporation.

The Gramm-Leach-Bliley Act of 2000

In 2000, the Gramm-Leach-Bliley Act became law, which is also known as the Financial Services Modernization Act. The act repealed some Depression-era banking laws and will permit banks, insurance companies and securities firms to engage in each others' businesses after complying with certain conditions and regulations. The act grants to community banks the power to enter new financial markets as a matter of right that larger institutions have managed to do on an ad hoc basis. At this time, the Corporation has no plans to pursue these additional possibilities.

The Sarbanes-Oxley Act

In 2002, the Sarbanes-Oxley Act became law. The Act was in response to public concerns regarding corporate accountability in connection with recent high visibility accounting scandals. The stated goals of the Sarbanes-Oxley Act are:

- To increase corporate responsibility;
- To provide for enhanced penalties for accounting and auditing improprieties at publicly traded companies; and
- To protect investors by improving the accuracy and reliability of corporate disclosures pursuant to the securities laws.

The Sarbanes-Oxley Act generally applies to all companies, both U.S. and non-U.S., that file periodic reports with the SEC under the Exchange Act. The legislation includes provisions, among other things:

- Governing the services that can be provided by a public company's independent auditors and the procedures for approving such services;
- Requiring the chief executive officer and chief financial officer to certify certain matters relating to the company's periodic filings under the Exchange Act;
- Requiring expedited filings of reports by insiders of their securities transactions and containing other provisions relating to insider conflicts of interest;
 - Increasing disclosure requirements relating to critical financial accounting policies and their application;
 - Increasing penalties for securities law violations; and
- Creating a public accounting oversight board, a regulatory body subject to SEC jurisdiction with broad powers to set auditing, quality control and ethics standards for accounting firms.

Dodd-Frank Wall Street Reform and Consumer Protection Act

The Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank”) became law in July 2010. Dodd-Frank is intended to affect a fundamental restructuring of federal banking regulation. Among other things, Dodd-Frank created a new Financial Stability Oversight Council to identify systemic risks in the financial system and gave federal regulators new authority to take control of and liquidate financial firms. Dodd-Frank additionally created a new independent federal regulator to administer federal consumer protection laws. Dodd-Frank is expected to have a significant impact on our business operations as its provisions take effect. It is difficult to predict at this time what specific impact Dodd-Frank and the yet to be written implementing rules and regulations will have on community banks. However, it is expected that at a minimum they will increase our operating and compliance costs and could increase our interest expense. Among the provisions that are likely to affect us are the following:

Holding Company Capital Requirements. Dodd-Frank requires the Federal Reserve to apply consolidated capital requirements to bank holding companies that are no less stringent than those currently applied to depository institutions. Under these standards, trust preferred securities will be excluded from Tier 1 capital unless such securities were issued prior to May 19, 2010 by a bank holding company with less than \$15 billion in assets. Dodd-Frank additionally requires that bank regulators issue countercyclical capital requirements so that the required amount of capital increases in times of economic expansion and decreases in times of economic contraction, consistent with safety and soundness.

Deposit Insurance. Dodd-Frank permanently increases the maximum deposit insurance amount for banks, savings institutions and credit unions to \$250,000 per depositor, and extended unlimited deposit insurance to non-interest bearing transaction accounts through December 31, 2012. Dodd-Frank also broadens the base for FDIC insurance assessments. Assessments will now be based on the average consolidated total assets less tangible equity capital of a financial institution. Dodd-Frank requires the FDIC to increase the reserve ratio of the Deposit Insurance Fund from 1.15% to 1.35% of insured deposits by 2020 and eliminates the requirement that the FDIC pay dividends to insured depository institutions when the reserve ratio exceeds certain thresholds. Effective one year from the date of enactment, Dodd-Frank eliminates the federal statutory prohibition against the payment of interest on business checking accounts.

Corporate Governance. Dodd-Frank requires publicly traded companies to give stockholders a non-binding vote on executive compensation at least every three years, a non-binding vote regarding the frequency of the vote on executive compensation at least every six years, and a non-binding vote on “golden parachute” payments in connection with approvals of mergers and acquisitions unless previously voted on by shareholders. The SEC has finalized the rules implementing these requirements which took effect on January 21, 2011. Additionally, Dodd-Frank directs the federal banking regulators to promulgate rules prohibiting excessive compensation paid to executives of depository institutions and their holding companies with assets in excess of \$1.0 billion, regardless of whether the company is publicly traded. Dodd-Frank also gives the SEC authority to prohibit broker discretionary voting on elections of directors and executive compensation matters.

Prohibition Against Charter Conversions of Troubled Institutions. Effective one year after enactment, Dodd-Frank prohibits a depository institution from converting from a state to federal charter or vice versa while it is the subject of a cease and desist order or other formal enforcement action or a memorandum of understanding with respect to a significant supervisory matter unless the appropriate federal banking agency gives notice of the conversion to the federal or state authority that issued the enforcement action and that agency does not object within 30 days. The notice must include a plan to address the significant supervisory matter. The converting institution must also file a copy of the conversion application with its current federal regulator which must notify the resulting federal regulator of any ongoing supervisory or investigative proceedings that are likely to result in an enforcement action and provide access to all supervisory and investigative information relating thereto.

Interstate Branching. Dodd-Frank authorizes national and state banks to establish branches in other states to the same extent as a bank chartered by that state would be permitted. Previously, banks could only establish branches in other states if the host state expressly permitted out-of-state banks to establish branches in that state. Accordingly, banks will be able to enter new markets more freely.

Limits on Interstate Acquisitions and Mergers. Dodd-Frank precludes a bank holding company from engaging in an interstate acquisition — the acquisition of a bank outside its home state — unless the bank holding company is both well capitalized and well managed. Furthermore, a bank may not engage in an interstate merger with another bank headquartered in another state unless the surviving institution will be well capitalized and well managed. The previous standard in both cases was adequately capitalized and adequately managed.

Limits on Interchange Fees. Dodd-Frank amends the Electronic Fund Transfer Act to, among other things, give the Federal Reserve the authority to establish rules regarding interchange fees charged for electronic debit transactions by payment card issuers having assets over \$10 billion and to enforce a new statutory requirement that such fees be reasonable and proportional to the actual cost of a transaction to the issuer. On June 29, 2011, the Federal Reserve Board set the interchange rate cap at \$0.24 per transaction. While the restrictions on interchange fees do not affect banks with assets less than \$10 billion, the rule could affect the competitiveness of debit cards issued by smaller banks.

Consumer Financial Protection Bureau. Dodd-Frank creates a new, independent federal agency called the Consumer Financial Protection Bureau (“CFPB”), which is granted broad rulemaking, supervisory and enforcement powers under various federal consumer financial protection laws, including the Equal Credit Opportunity Act, Truth in Lending Act, Real Estate Settlement Procedures Act, Fair Credit Reporting Act, Fair Debt Collection Act, the Consumer Financial Privacy provisions of the Gramm-Leach-Bliley Act and certain other statutes. The CFPB will have examination and primary enforcement authority with respect to depository institutions with \$10 billion or more in assets. Smaller institutions will be subject to rules promulgated by the CFPB but will continue to be examined and supervised by federal banking regulators for consumer compliance purposes. The CFPB will have authority to prevent unfair, deceptive or abusive practices in connection with the offering of consumer financial products. Dodd-Frank authorizes the CFPB to establish certain minimum standards for the origination of residential mortgages including a determination of the borrower’s ability to repay. In addition, Dodd-Frank will allow borrowers to raise certain defenses to foreclosure if they receive any loan other than a “qualified mortgage” as defined by the CFPB. Dodd-Frank permits states to adopt consumer protection laws and standards that are more stringent than those adopted at the federal level and, in certain circumstances, permits state attorneys general to enforce compliance with both the state and federal laws and regulations.

Available Information

The Corporation’s common stock is registered under Section 12(g) of the Exchange Act. The Corporation is subject to the informational requirements of the Exchange Act, and, accordingly, files reports, proxy statements and other information with the SEC. The reports, proxy statements and other information filed with the SEC are available for inspection and copying at the SEC’s Public Reference Room at 100 F Street, N.E., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The Corporation is an electronic filer with the SEC. The SEC maintains an internet site that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC. The SEC’s internet site address is www.sec.gov.

A copy of the Corporation’s Annual Report on Form 10-K may be obtained without charge at www.fkyscorp.com or via email at info@fkcbank.com. Quarterly reports on Form 10-Q, current event reports on Form 8-K, and amendments to these reports, may be obtained without charge via email at info@fkcbank.com. Information may also be obtained via written request to Investor Relations at First Keystone Corporation, Attention: Cheryl Wynings, 111 West Front Street, P.O. Box 289, Berwick, Pennsylvania 18603, or by telephone at 570-752-3671, extension 1175.

ITEM 1A. RISK FACTORS

Investments in the Corporation’s common stock involve risk. The market price of the Corporation’s common stock may fluctuate significantly in response to a number of factors, including:

The Corporation is subject to interest rate risk.

The Corporation's earnings and cash flows are largely dependent upon its net interest income. Net interest income is the difference between interest income earned on interest-earning assets such as loans and securities and interest expense paid on interest-bearing liabilities such as deposits and borrowed funds. Interest rates are highly sensitive to many factors that are beyond the Corporation's control, including general economic conditions and policies of various governmental and regulatory agencies and, in particular, the Board of Governors of the Federal Reserve System. Changes in monetary policy, including changes in interest rates, could influence not only the interest the Corporation receives on loans and securities and the amount of interest it pays on deposits and borrowings, but such changes could also affect (i) the Corporation's ability to originate loans and obtain deposits, (ii) the fair value of the Corporation's financial assets and liabilities, and (iii) the average duration of the Corporation's mortgage-backed securities portfolio. If the interest rates paid on deposits and other borrowings increase at a faster rate than the interest rates received on loans and other investments, the Corporation's net interest income, and therefore earnings, could be adversely affected. Earnings could also be adversely affected if the interest rates received on loans and other investments fall more quickly than the interest rates paid on deposits and other borrowings.

Although management believes it has implemented effective asset and liability management strategies to reduce the potential effects of changes in interest rates on the Corporation's results of operations, any substantial, unexpected, or prolonged change in market interest rates could have a material adverse effect on the Corporation's financial condition and results of operations.

The Corporation is subject to lending risk.

As of December 31, 2014, approximately 65.4% of the Corporation's loan portfolio consisted of Commercial and Industrial loans and Commercial Real Estate loans (including construction loans) of which both include a tax-free component. These types of loans are generally viewed as having more risk of default than Residential Real Estate loans or Consumer loans. These types of loans are also typically larger than Residential Real Estate loans and Consumer loans. Because the Corporation's loan portfolio contains a significant number of Commercial and Industrial and Commercial Real Estate loans with relatively large balances, the deterioration of one or a few of these loans could cause a significant increase in non-performing loans. An increase in non-performing loans could result in a net loss of earnings from these loans, an increase in the provision for loan losses and an increase in loan charge-offs, all of which could have a material adverse effect on the Corporation's financial condition and results of operations.

If the Corporation's Allowance for Loan Losses is not sufficient to cover actual loan losses, its earnings could decrease.

The Corporation's loan customers may not repay their loans according to the terms of their loans, and the collateral securing the payment of their loans may be insufficient to assure repayment. The Corporation may experience significant credit losses, which could have a material adverse effect on its operating results. In determining the amount of the allowance for loan losses, the Corporation reviews its loans and its loss and delinquency experience, and the Corporation evaluates economic conditions. If its assumptions prove to be incorrect, its allowance for loan losses may not cover inherent losses in its loan portfolio at the date of its financial statements. Material additions to the Corporation's allowance would materially decrease its net income. At December 31, 2014, its allowance for loan losses totaled \$6.4 million, representing 1.36% of its average total loans.

Although the Corporation believes it has underwriting standards to manage normal lending risks, it is difficult to assess the future performance of its loan portfolio due to ongoing new originations. The Corporation cannot assure that its non-performing loans will not increase or that its non-performing or delinquent loans will not adversely affect its future performance.

In addition, federal regulators periodically review the Corporation's allowance for loan losses and may require it to increase its allowance for loan losses or recognize further loan charge-offs. Any increase in its allowance for loan losses or loan charge-offs as required by these regulatory agencies could have a material adverse effect on its results of operations and financial condition.

The Corporation's operations of its business, including its interaction with customers, are increasingly done via electronic means, and this has increased its risks related to cyber security.

The Corporation is exposed to the risk of cyber-attacks in the normal course of business. In general, cyber incidents can result from deliberate attacks or unintentional events. The Corporation has observed an increased level of attention in the industry focused on cyber-attacks that include, but are not limited to, gaining unauthorized access to digital systems for purposes of misappropriating assets or sensitive information, corrupting data, or causing operational disruption. To combat against these attacks, the Corporation has policies and procedures in place to prevent or limit the effect of the possible security breach of its information systems and it has insurance against some cyber-risks and attacks. While the Corporation has not incurred any material losses related to cyber-attacks, nor is it aware of any specific or threatened cyber-incidents as of the date of this report, it may incur substantial costs and suffer other negative consequences if it falls victim to successful cyber-attacks. Such negative consequences could include remediation costs that may include liability for stolen assets or information and repairing system damage that may have been caused; deploying additional personnel and protection technologies, training employees, and engaging third party experts and consultants; lost revenues resulting from unauthorized use of proprietary information or the failure to retain or attract customers following an attack; disruption or failures of physical infrastructure, operating systems or networks that support our business and customers resulting in the loss of customers and business opportunities; additional regulatory scrutiny and possible regulatory penalties; litigation; and reputational damage adversely affecting customer or investor confidence.

The Corporation's information systems may experience an interruption or breach in security.

The Corporation relies heavily on communications and information systems to conduct its business. Any failure, interruption or breach in security of these systems could result in failures or disruptions in the Corporation's customer relationship management, general ledger, deposit, loan and other systems. The Corporation has policies and procedures designed to prevent or limit the effect of the failure, interruption or security breach of its information systems; however, there can be no assurance that any such failures, interruptions or security breaches will not occur. While the Corporation maintains insurance coverage that may, subject to policy terms and conditions including significant self-insured deductibles, cover certain aspects of cyber risks, such insurance coverage may be insufficient to cover all losses. The occurrence of any failures, interruptions or security breaches of the Corporation's information systems could damage the Corporation's reputation adversely affecting customer or investor confidence, result in a loss of customer business, subject the Corporation to additional regulatory scrutiny and possible regulatory penalties, or expose the Corporation to civil litigation and possible financial liability, any of which could have a material adverse effect on the Corporation's financial condition and results of operations.

Severe weather, natural disasters, acts of war or terrorism and other external events could significantly impact the Corporation's business.

Severe weather, natural disasters, acts of war or terrorism and other adverse external events could have a significant impact on the Corporation's ability to conduct business. Such events could affect the stability of the Corporation's deposit base, impair the ability of borrowers to repay outstanding loans, impair the value of collateral securing loans, cause significant property damage, result in loss of revenue and/or cause the Corporation to incur additional expenses. Severe weather or natural disasters, acts of war or terrorism or other adverse external events may occur in the future. Although management has established disaster recovery policies and procedures, the occurrence of any such event could have a material adverse effect on the Corporation's business, which, in turn, could have a material adverse effect on the Corporation's financial condition and results of operations.

The Corporation operates in a highly competitive industry.

The Corporation faces substantial competition in all areas of its operations from a variety of different competitors, many of which are larger and may have more financial resources and greater technology. Such competitors primarily include national, regional and community banks within the various markets in which the Corporation operates. The Corporation also faces competition from many other types of financial institutions, including, without limitation, credit unions, finance companies, brokerage firms, insurance companies, factoring companies and other financial intermediaries. Also, technology has lowered barriers to entry and made it possible for non-banks to offer products and services traditionally provided by banks, such as online account opening, automatic transfer and automatic payment systems. Many of the Corporation's competitors have fewer regulatory constraints and may have lower cost structures.

The Corporation's ability to compete successfully depends on a number of factors, including, among other things:

• The ability to develop, maintain and build upon long-term customer relationships based on top quality service, high ethical standards and safe, sound assets;

- The ability to expand the Corporation's market position;
- The scope, relevance and pricing of products and services offered to meet customer needs and demands;
- The rate at which the Corporation introduces new products and services relative to its competitors;
- Customer satisfaction with the Corporation's level of service; and
- Industry and general economic trends.

Failure to perform in any of these areas could significantly weaken the Corporation's competitive position, which could adversely affect the Corporation's growth and profitability, which, in turn, could have a material adverse effect on the Corporation's financial condition and results of operations.

New lines of business or new products and services may subject the Corporation to additional risks.

From time-to-time, the Corporation may implement new lines of business or offer new products and services within existing lines of business. There are substantial risks and uncertainties associated with these efforts, particularly in instances where the markets are not fully developed. In developing and marketing new lines of business and/or new products and services, the Corporation may invest significant time and resources. Initial timetables for the introduction and development of new lines of business and/or new products or services may not be achieved and price and profitability targets may not prove feasible. External factors, such as compliance with regulations, competitive alternatives and shifting market preferences, may also impact the successful implementation of a new line of business or a new product or service. Furthermore, any new line of business and/or new product or service could have a significant impact on the effectiveness of the Corporation's system of internal controls. Failure to successfully manage these risks in the development and implementation of new lines of business or new products or services could have a material adverse effect on the Corporation's business, results of operations and financial condition.

The Basel III capital requirements may require the Corporation to maintain higher levels of capital, which could reduce its profitability.

Basel III targets higher levels of base capital, certain capital buffers and a migration toward common equity as the key source of regulatory capital. Although the new capital requirements are phased in over the next decade and may change substantially before final implementation, Basel III signals a growing effort by domestic and international bank regulatory agencies to require financial institutions, including depository institutions, to maintain higher levels of capital. As Basel III is implemented, regulatory viewpoints could change or require additional capital to support the Corporation's business risk profile prior to final implementation of the Basel III standards. If the Corporation and the Bank are required to maintain higher levels of capital, the Corporation and the Bank may have fewer opportunities to invest capital into interest-earning assets, which could limit the profitable business operations available to the Corporation and the Bank and adversely impact its financial condition and results of operations.

If the Corporation concludes that the decline in value of any of its investment securities is other than temporary, the Corporation will be required to write down the credit-related portion of the impairment of that security through a charge to earnings.

Management reviews its investment securities portfolio at each quarter-end reporting period to determine whether the fair value is below the current carrying value. When the fair value of any of its investment securities has declined below its carrying value, management is required to assess whether the decline is other than temporary. If management concludes that the decline is other than temporary, management will be required to write down the credit-related portion of the impairment of that security through a charge to earnings. Due to the complexity of the calculations and assumptions used in determining whether an asset is impaired, the impairment disclosed may not accurately reflect the actual impairment in the future.

Future credit downgrades of the United States Government due to issues relating to debt and the deficit may adversely affect the Corporation.

As a result of failure of the federal government to reach agreement over federal debt and the ongoing issues connected with the debt ceiling, certain rating agencies placed the United States government's long-term sovereign debt rating on their equivalent of negative watch and announced the possibility of a rating downgrade. The rating agencies, due to constraints related to the rating of the United States, also placed government-sponsored enterprises in which the Corporation invests and receives lines of credit on negative watch and a downgrade of the United States' credit rating would trigger a similar downgrade in the credit rating of these government sponsored enterprises. Furthermore, the credit rating of other entities, such as state and local governments, may also be downgraded should the United States credit rating be downgraded. The impact that a credit rating downgrade may have on the national and local economy could have an adverse effect on the Corporation's financial condition and results of operations.

The Corporation's profitability depends significantly on economic conditions in the Commonwealth of Pennsylvania.

The Corporation's success depends primarily on the general economic conditions of the Commonwealth of Pennsylvania and the specific local markets in which the Corporation operates. Unlike larger national or other regional banks that are more geographically diversified, the Corporation provides banking and financial services to customers primarily in Columbia, Luzerne, Montour and Monroe counties. The local economic conditions in these areas have a significant impact on the demand for the Corporation's products and services as well as the ability of the Corporation's customers to repay loans, the value of the collateral securing loans and the stability of the Corporation's deposit funding sources. Also, a significant decline in general economic conditions could impact the local economic conditions and, in turn, have a material adverse effect on the Corporation's financial condition and results of operations.

The Corporation's future acquisitions could dilute stockholders' ownership and may cause the Corporation to become more susceptible to adverse economic events.

The Corporation may use its common stock to acquire other companies or make investments in banks and other complementary businesses in the future. The Corporation may issue additional shares of common stock to pay for future acquisitions, which would dilute stockholders' ownership interest in the Corporation. Future business acquisitions could be material to the Corporation, and the degree of success achieved in acquiring and integrating these businesses into the Corporation could have a material effect on the value of the Corporation's common stock. In addition, any acquisition could require the Corporation to use substantial cash or other liquid assets or to incur debt. In those events, the Corporation could become more susceptible to economic downturns and competitive pressures.

The Corporation may not be able to attract and retain skilled people.

The Corporation's success depends, in large part, on its ability to attract and retain key people. Competition for the best people in most activities engaged in by the Corporation can be intense and the Corporation may not be able to hire people or to retain them. The unexpected loss of services of one or more of the Corporation's key personnel could have a material adverse impact on the Corporation's business because of their skills, knowledge of the Corporation's market, years of industry experience and the difficulty of promptly finding qualified replacement personnel.

The Corporation is subject to extensive government regulation and supervision.

The Corporation, primarily through the Bank, is subject to extensive federal and state regulation and supervision. Banking regulations are primarily intended to protect depositors' funds, federal deposit insurance funds and the banking system as a whole, not shareholders. These regulations affect the Corporation's lending practices, capital structure, investment practices, dividend policy and growth, among other things. Congress and federal regulatory agencies continually review banking laws, regulations and policies for possible changes. Changes to statutes, regulations or regulatory policies could affect the Corporation in substantial and unpredictable ways. Such changes could subject the Corporation to additional costs, limit the types of financial services and products the Corporation may offer and/or increase the ability of non-banks to offer competing financial services and products, among other things. Failure to comply with laws, regulations or policies could result in sanctions by regulatory agencies, civil money penalties and/or reputation damage, which could have a material adverse effect on the Corporation's business, financial condition and results of operations.

The Corporation is subject to claims and litigation pertaining to fiduciary responsibility.

From time to time, customers make claims and take legal action pertaining to the Corporation's performance of its fiduciary responsibilities. Whether customer claims and legal action related to the Corporation's performance of its fiduciary responsibilities are founded or unfounded, and if such claims and legal actions are not resolved in a manner favorable to the Corporation, they may result in significant financial liability and/or adversely affect the market perception of the Corporation and its products and services as well as impact customer demand for those products and services. Any financial liability or reputation damage could have a material adverse effect on the Corporation's financial condition and results of operations.

The trading volume in the Corporation's common stock is less than that of other larger financial services companies.

The Corporation's common stock is not currently listed on a national stock exchange, but traded on the Over the Counter Market. As a result, trading volume is less than that of other larger financial services companies. A public trading market having the desired characteristics of depth, liquidity and orderliness depends on the presence in the marketplace of willing buyers and sellers of the Corporation's common stock at any given time. This presence depends on the individual decisions of investors and general economic and market conditions over which the Corporation has no control. Given the lower trading volume of the Corporation's common stock, significant sales of the Corporation's common stock, or the expectation of these sales, could cause the Corporation's stock price to fall.

The Corporation's controls and procedures may fail or be circumvented.

Management regularly reviews and updates the Corporation's internal controls, disclosure controls and procedures, and corporate governance policies and procedures. Any system of controls, however well designed and operated, is based in part on certain assumptions and can provide only reasonable, not absolute, assurances that the objectives of the system are met. Any failure or circumvention of the Corporation's controls and procedures or failure to comply with regulations related to controls and procedures could have a material adverse effect on the Corporation's business, results of operations and financial condition.

The Corporation continually encounters technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. The Corporation's future success depends, in part, upon its ability to address the needs of its customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in the Corporation's operations. Many of the Corporation's competitors have substantially greater resources to invest in technological improvements. The Corporation may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to its customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on the Corporation's business and, in turn, the Corporation's financial condition and results of operations.

The Corporation may need or be compelled to raise additional capital in the future, but that capital may not be available when it is needed and on terms favorable to current shareholders.

Federal banking regulators require the Corporation and Bank to maintain adequate levels of capital to support their operations. These capital levels are determined and dictated by law, regulation and banking regulatory agencies. In addition, capital levels are also determined by the Corporation's management and board of directors, based on capital levels that they believe are necessary to support the Corporation's business operations. The Corporation is evaluating its present and future capital requirements and needs, is developing a comprehensive capital plan and is analyzing capital raising alternatives, methods and options. Even if the Corporation succeeds in meeting the current regulatory capital requirements, the Corporation may need to raise additional capital in the near future to support possible loan losses during future periods or to meet future regulatory capital requirements.

Further, the Corporation's regulators may require it to increase its capital levels. If the Corporation raises capital through the issuance of additional shares of its common stock or other securities, it would likely dilute the ownership interests of current investors and would likely dilute the per-share book value and earnings per share of its common stock. Furthermore, it may have an adverse impact on the Corporation's stock price. New investors may also have rights, preferences and privileges senior to the Corporation's current shareholders, which may adversely impact its current shareholders. The Corporation's ability to raise additional capital will depend on conditions in the capital markets at that time, which are outside its control, and on its financial performance. Accordingly, the Corporation cannot assure the shareholders of its ability to raise additional capital on terms and time frames acceptable to it or to raise additional capital at all. If the Corporation cannot raise additional capital in sufficient amounts when needed, its ability to comply with regulatory capital requirements could be materially impaired. Additionally, the inability to raise capital in sufficient amounts may adversely affect the Corporation's operations, financial condition and results of operations.

The Corporation is subject to environmental liability risk associated with lending activities.

A significant portion of the Corporation's loan portfolio is secured by real property. During the ordinary course of business, the Corporation may foreclose on and take title to properties securing certain loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, the Corporation may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require the Corporation to incur substantial expenses and may materially reduce the affected property's value or limit the Corporation's ability to use or sell the affected property. In addition, future laws, or more stringent interpretations or enforcement policies with respect to existing laws, may increase the Corporation's exposure to environmental liability. Although the Corporation has policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on the Corporation's financial condition and results of operations.

The Corporation's ability to pay dividends is subject to limitations.

The Corporation is a bank holding company and its operations are conducted by the Bank, which is a separate and distinct legal entity. Substantially all of the Corporation's assets are held by the Bank.

The Corporation's ability to pay dividends depends on its receipt of dividends from the Bank, its primary source of dividends. Dividend payments from the Bank are subject to legal and regulatory limitations, generally based on net profits and retained earnings, imposed by the various banking regulatory agencies. The ability of banking subsidiaries to pay dividends is also subject to their profitability, financial condition, capital expenditures and other cash flow requirements. There is no assurance that the Bank will be able to pay dividends in the future or that the Corporation will generate adequate cash flow to pay dividends in the future. The Corporation's failure to pay dividends on its common stock could have a material adverse effect on the market price of its common stock.

Pennsylvania Business Corporation Law and various anti-takeover provisions under its Articles of Incorporation and Bylaws could impede the takeover of the Corporation.

Various Pennsylvania laws affecting business corporations may have the effect of discouraging offers to acquire the Corporation, even if the acquisition would be advantageous to shareholders. In addition, the Corporation has various anti-takeover measures in place under its Articles of Incorporation and Bylaws, including a staggered board of directors and the absence of cumulative voting. Any one or more of these measures may impede the takeover of the Corporation without the approval of its Board of Directors and may prevent its shareholders from taking part in a transaction in which they could realize a premium over the current market price of its common stock.

The Corporation's banking subsidiary may be required to pay higher FDIC insurance premiums or special assessments which may adversely affect its earnings.

Poor economic conditions and the resulting bank failures have increased the costs of the FDIC and depleted its deposit insurance fund. Additional bank failures may prompt the FDIC to increase its premiums above the recently increased levels or to issue special assessments. The Corporation is generally unable to control the amount of premiums or special assessments that its subsidiary is required to pay for FDIC insurance. Any future changes in the calculation or assessment of FDIC insurance premiums may have a material adverse effect on the Corporation's results of operations, financial condition, and its ability to continue to pay dividends on its common stock at the current rate or at all.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Corporation and its subsidiary occupy eighteen branch properties in Columbia, Luzerne, Montour and Monroe counties in Pennsylvania, which are used principally as banking offices.

Properties owned are:

- Main Office located at 111 West Front Street, Berwick, Pennsylvania 18603;
 - Salem Office located at 400 Fowler Avenue, Berwick, Pennsylvania 18603;
 - Freas Avenue Office located at 701 Freas Avenue, Berwick, Pennsylvania 18603;
 - Scott Township Office located at 2301 Columbia Boulevard, Bloomsburg, Pennsylvania 17815;
 - Mifflinville Office located at Third and Race Streets, Mifflinville, Pennsylvania 18631;
 - Hanover Township Office located at 1540 Sans Souci Parkway, Hanover Township, Pennsylvania 18706;
 - Danville Office located at 1519 Bloom Road, Danville, Pennsylvania 17821;

Properties leased are:

- Briar Creek Office located inside the Giant Market at 50 Briar Creek Plaza, Berwick, Pennsylvania 18603;
 - Nescopeck Office located at 437 West Third Street, Nescopeck, Pennsylvania 18635;
 - Stroudsburg Office located at 559 Main Street, Stroudsburg, Pennsylvania 18360; and
- Mountain Top Office located at 18 North Mountain Boulevard, Mountain Top, Pennsylvania 18707 (land parcel is leased and the bank building is owned).

ITEM 3. LEGAL PROCEEDINGS

The Corporation and/or the Bank are defendants in various legal proceedings arising in the ordinary course of their business. However, in the opinion of management of the Corporation and the Bank, there are no proceedings pending to which the Corporation and the Bank is a party or to which their property is subject, which, if determined adversely to the Corporation and the Bank, would be material in relation to the Corporation's and Bank's individual profits or financial condition, nor are there any proceedings pending other than ordinary routine litigation incident to the business of the Corporation and the Bank. In addition, no material proceedings are pending or are known to be threatened or contemplated against the Corporation and the Bank by government authorities or others.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED SHAREHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

The Corporation's common stock is traded in the over-the-counter market on the OTC Market under the symbol "FKYS". The following table sets forth:

- The quarterly high and low prices for a share of the Corporation's common stock during the periods indicated as reported to the management of the Corporation;
- Quarterly dividends on a share of the common stock paid with respect to each quarter since January 1, 2013; and
- The quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not represent actual transactions.

MARKET VALUE OF COMMON STOCK

	High	Low	Per Share Dividend Paid
2014:			
First quarter	\$ 27.00	\$ 24.24	\$ 0.26
Second quarter	\$ 26.25	\$ 24.05	\$ 0.26
Third quarter	\$ 25.00	\$ 24.00	\$ 0.26
Fourth quarter	\$ 24.70	\$ 23.05	\$ 0.27
2013:			
First quarter	\$ 26.75	\$ 23.71	\$ 0.26
Second quarter	\$ 26.70	\$ 25.24	\$ 0.26
Third quarter	\$ 27.00	\$ 25.05	\$ 0.26
Fourth quarter	\$ 27.00	\$ 24.50	\$ 0.26

As of December 31, 2014, the Corporation had approximately 928 shareholders of record.

The Corporation has paid dividends since commencement of business in 1984. It is the present intention of the Corporation's Board of Directors to continue the dividend payment policy. Stock value, cost and availability of external capital, and the Corporation's present and anticipated capital needs are weighed in the process of making a responsible decision. Further dividends must necessarily depend upon earnings, financial condition, appropriate legal restrictions and other factors relevant at the time the Board of Directors of the Corporation considers its dividend

policy. Cash available for dividend distributions to shareholders of the Corporation must initially come from dividends paid by the Bank to the Corporation. Therefore, the restrictions on the Bank's dividend payments are directly applicable to the Corporation.

Dividend Restrictions on the Bank

Generally, as a Pennsylvania state chartered bank, under Pennsylvania banking law, the Bank may only pay dividends out of accumulated net earnings.

Dividend Restrictions on the Corporation

Under the Pennsylvania Business Corporation Law of 1988, as amended, the Corporation may not pay a dividend if, after giving effect thereto, either:

- The Corporation would be unable to pay its debts as they become due in the usual course of business; or
- The Corporation's total assets would be less than its total liabilities.

The determination of total assets and liabilities may be based upon:

- Financial statements prepared on the basis of generally accepted accounting principles;
- Financial statements that are prepared on the basis of other accounting practices and principles that are reasonable under the circumstances; or
- A fair valuation or other method that is reasonable under the circumstances.

PERFORMANCE GRAPH

The following graph and table compare the cumulative total shareholder return on the Corporation's common stock during the period December 31, 2009, through and including December 31, 2014, with

The cumulative total return on the SNL Securities Corporate Performance Index¹ for banks \$500 million to \$1 billion in total assets in the Middle Atlantic area², and

- The cumulative total return for all United States stocks traded on the NASDAQ Stock Market.

The comparison assumes \$100 was invested on December 31, 2009, in the Corporation's common stock and in each of the indices below and assumes further the reinvestment of dividends into the applicable securities. The shareholder return shown on the graph and table below is not necessarily indicative of future performance.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The purpose of Management's Discussion and Analysis of First Keystone Corporation, a bank holding company (the "Corporation"), and its wholly owned subsidiary, First Keystone Community Bank (the "Bank"), is to assist the reader in reviewing the financial information presented and should be read in conjunction with the consolidated financial statements and other financial data contained herein. Refer to Forward Looking Statements on page 1 for detailed information.

RESULTS OF OPERATIONS

Year Ended December 31, 2014 Versus Year Ended December 31, 2013

Net income decreased to \$10,211,000 for the year ended December 31, 2014, as compared to \$10,273,000 for the prior year, a decrease of 0.6%. Earnings per share, both basic and diluted, for 2014 was \$1.84 as compared to \$1.87 in 2013, a decrease of 1.6%. Dividends per share increased to \$1.05 in 2014 from \$1.04 in 2013, an increase of 1.0%. The Corporation's return on average assets was 1.13% in 2014 as compared to 1.23% in 2013. Return on average equity decreased to 9.90% in 2014 from 10.12% in 2013. Total interest income in 2014 amounted to \$31,019,000 and was essentially equal to 2013. Total interest expense of \$4,452,000 decreased \$502,000 or 10.1% from 2013. The majority of this decrease related to interest expense on deposits as total interest bearing deposits declined from \$604,919,000 in 2013 to \$565,032,000 in 2014.

Net interest income, as indicated below in Table 1, increased by \$560,000 or 2.2% to \$26,567,000 for the year ended December 31, 2014. The Corporation's net interest income on a fully tax equivalent basis decreased by \$53,000, or 0.2% to \$28,344,000 in 2014 as compared to \$28,397,000 in 2013.

Year Ended December 31, 2013 Versus Year Ended December 31, 2012

Net income increased to \$10,273,000 for the year ended December 31, 2013, as compared to \$10,170,000 for the prior year, an increase of 1.0%. Earnings per share, both basic and diluted, for 2013 was \$1.87 as compared to \$1.86 in 2012, an increase of 0.5%. Dividends per share increased to \$1.04 in 2013 from \$1.01 in 2012, an increase of 3.0%. The Corporation's return on average assets was 1.23% in 2013 as compared to 1.25% in 2012. Return on average equity decreased to 10.12% in 2013 from 10.19% in 2012. Falling yields resulted in an overall decrease of interest income to \$30,961,000, down \$3,975,000 or 11.4% from 2012. There was the accompanying decrease in interest on deposits and borrowings as interest rates declined, which resulted in interest expense of \$4,954,000 in 2013, a decrease of \$1,560,000 or 24.0% from 2012.

Net interest income, as indicated below in Table 1, decreased by \$2,415,000 or 8.5% to \$26,007,000 for the year ended December 31, 2013. The Corporation's net interest income on a fully tax equivalent basis decreased by \$2,685,000, or 8.6% to \$28,397,000 in 2013 as compared to \$31,082,000 in 2012.

¹Tax-exempt income has been adjusted to a tax equivalent basis using an incremental rate of 34%, and statutory interest expense disallowance.

²Installment loans are stated net of unearned interest.

³Average loan balances include non-accrual loans. Interest income on non-accrual loans is not included.

NET INTEREST INCOME

The major source of operating income for the Corporation is net interest income. Net interest income is the difference between interest income on earning assets, such as loans and securities, and the interest expense on liabilities used to fund those assets, including deposits and other borrowings. The amount of interest income is dependent upon both the volume of earning assets and the level of interest rates. In addition, the volume of non-performing loans affects interest income. The amount of interest expense varies with the amount of funds needed to support earning assets, interest rates paid on deposits and borrowed funds, and finally, the level of interest free deposits.

Table 2 on the preceding page provides a summary of average outstanding balances of earning assets and interest bearing liabilities with the associated interest income and interest expense as well as average tax equivalent rates earned and paid as of year-end 2014, 2013 and 2012.

The yield on earning assets was 3.97% in 2014, 4.36% in 2013, and 5.03% in 2012. The rate paid on interest bearing liabilities was 0.64% in 2014, 0.77% in 2013, and 1.04% in 2012. This resulted in a decrease in our net interest spread to 3.33% in 2014, as compared to 3.59% in 2013 and 3.99% in 2012.

As Table 2 illustrates, net interest margin, which is interest income less interest expense divided by average earning assets, was 3.43% in 2014 as compared to 3.71% in 2013 and 4.16% in 2012. Net interest margins are presented on a tax-equivalent basis. In 2014, yield on earning assets fell by 0.39%, from 4.36% to 3.97% while the rate paid on interest bearing liabilities dropped 0.13%. As loans were repaid and refinanced, and as investments were sold, matured or called, the principal balances were reinvested at lower, current rates. This was the primary cause of the lower yields on both loans and investments. Savings, NOW and money market interest expense increased slightly as a result of the introduction of the Kasasa suite of high interest checking and savings accounts in 2014. Interest paid on certificates of deposit declined as they matured and were reinvested at lower rates. Average long-term borrowings increased \$8,838,000 while the average rate paid on these borrowings declined by 0.33% from 2.69% to 2.36%. Therefore, the net interest spread and margin in 2014 as compared to 2013 was negatively impacted. Interest income exempt from federal tax was \$3,520,000 in 2014, \$4,743,000 in 2013, and \$5,317,000 in 2012. Interest income exempt from federal tax decreased due to sales of tax-exempt securities. Tax-exempt income has been adjusted to a tax-equivalent basis using an incremental rate of 34%.

The decline in our net interest margin came from significantly lower earning asset yields and slightly lower funding costs in 2014 and 2013. Fully tax equivalent net interest income fell from 2013 to 2014 by \$53,000 or 0.20% to \$28,344,000. This occurred while the level of average earning assets increased by 7.8%. The Corporation's net interest margin was under pressure when interest rates started to rise since the Corporation continues to be liability sensitive. There will be more liabilities, including deposits, repricing than earning assets (loans and investments). To negate the potential impact of a lesser net interest margin, the Corporation will continue to focus on attracting lower cost checking, savings and money market accounts and reduce somewhat its dependence on higher priced certificates of

deposit.

Table 3 sets forth changes in interest income and interest expense for the periods indicated for each category of interest earning assets and interest bearing liabilities. Information is provided on changes attributable to (i) changes in volume (changes in average volume multiplied by prior rate); (ii) changes in rate (changes in average rate multiplied by prior average volume); and, (iii) changes in rate and volume (changes in average volume multiplied by change in average rate).

In 2014, the decrease in net interest income on a fully tax equivalent basis of \$53,000 resulted from an increase in volume of \$2,035,000 and a decrease of \$2,088,000 due to changes in rate. In 2013, the decrease in net interest income of \$2,685,000 resulted from an increase in volume of \$632,000 and a decrease of \$3,317,000 due to changes in rate.

Table 3 — Rate/Volume Analysis

Net Interest Income	\$2,035	\$(2,088)	\$(53)	\$632	\$(3,317)	\$(2,685)

The change in interest due to both volume and yield/rate has been allocated to change due to volume and change due to yield/rate in proportion to the absolute value of the change in each. Balances on non-accrual loans are included for computational purposes. Interest income on non-accrual loans is not included.

PROVISION FOR LOAN LOSSES

For the year ended December 31, 2014, the provision for loan losses was \$433,000 as compared to \$1,372,000 for 2013 and \$1,600,000 for 2012. The provision in 2014 decreased due to the Corporation's analysis of the current loan portfolio, including historic losses, past-due trends, economic conditions, and other relevant factors. Net charge-offs by the Corporation for the fiscal years ended December 31, 2014, 2013 and 2012 were \$562,000, \$625,000, and \$1,757,000, respectively. See Allowance for Loan Losses on Page 34 for further discussion.

Charge-offs declined in 2014 as compared to the previous year as a result of fewer borrowers defaulting on credit obligations, the Corporation's diligent collection efforts, and the improving economy. These factors also contributed to the decline in net charge-offs in 2013 as compared to 2012. The increased balance of net charge-offs at December 31, 2012 is largely the result of challenges associated with the economy (higher unemployment and increased

delinquencies) that were experienced at that time. While the Corporation cannot accurately predict future charge-offs, it is anticipated that the current level of charge-offs may continue into 2015, as economic conditions remain uncertain.

The allowance for loan losses as a percentage of average loans outstanding was 1.36% as of December 31, 2014, 1.49% as of December 31, 2013 and 1.36% as of December 31, 2012.

On a quarterly basis, management performs, and the Corporation's Audit Committee and the Board of Directors reviews, a detailed analysis of the adequacy of the allowance for loan losses. This analysis includes an evaluation of credit risk concentration, delinquency trends, past loss experience, current economic conditions, composition of the loan portfolio, classified loans and other relevant factors.

The Corporation will continue to monitor its allowance for loan losses and make future adjustments to the allowance through the provision for loan losses as conditions warrant. Although the Corporation believes that the allowance for loan losses is adequate to provide for losses inherent in the loan portfolio, there can be no assurance that future losses will not exceed the estimated amounts or that additional provisions will not be required in the future.

The Bank is subject to periodic regulatory examination by the Pennsylvania Department of Banking and Securities and the FDIC. As part of the examination, the regulators will assess the adequacy of the Bank's allowance for loan losses and may include factors not considered by the Bank. In the event that a regulatory examination results in a conclusion that the Bank's allowance for loan losses is not adequate, the Bank may be required to increase its provision for loan losses.

NON-INTEREST INCOME

Non-interest income is derived primarily from trust department revenue, service charges and fees, income on bank owned life insurance, ATM and debit card income, gains on sales of mortgage loans and other miscellaneous income. In addition, net investment securities gains and losses also impact total non-interest income. Table 4 provides the yearly non-interest income by category, along with the amount, dollar changes, and percentage of change.

Non-interest income through December 31, 2014 was \$7,902,000, an increase of 1.2%, or \$97,000, from 2013. Table 4 provides the major categories of non-interest income and each respective change comparing the last three years. The majority of the 2014 increase was due to an increase in revenue generated from service charges and fees and ATM and debit card income.

During 2014, the Corporation recorded a net gain of \$2,756,000 from the sales of securities in its investment portfolio, a decrease of \$144,000 from 2013. The Bank has taken gains and losses in the portfolio, primarily in municipal securities, to reduce market risk and protect from further changes in value in the face of increases in long-term interest rates. In 2013, gains totaled \$2,900,000, while in 2012 they were \$813,000. These gains resulted from the normal readjustment process within the portfolio.

Gains on sales of mortgage loans provided \$284,000 in 2014 as compared to \$618,000 in 2013 and \$1,016,000 in 2012. The decrease in gains on sales of mortgage loans in 2014 and 2013 was due to rising secondary market rates resulting in a decline in refinanced mortgages. In 2014, the Bank originated \$30,348,000 in residential mortgage loans and sold \$10,972,000. This compared unfavorably to 2013 when the Bank originated \$46,773,000 in residential mortgage loans and sold \$25,653,000. The increase in volume in 2012 was due to the favorable interest rate environment for refinancing. The Corporation continues to service the majority of mortgages which are sold. This servicing income provides an additional source of non-interest income on an ongoing basis.

Service charges and fees increased by \$212,000 in 2014 as compared to 2013, or 15.1% due to an increase in per item overdraft fees and certain other deposit account fees. During 2013, the Bank evaluated competitor fees in the marketplace and determined that higher deposit fees could be supported. In addition, ATM and debit card income increased \$123,000 or 12.3% due to the Bank's new Kasasa rewards checking program which encourages customers to use their debit card more often. Service charges and fees increased \$197,000 in 2013 as compared to 2012, primarily due to prepayment fees relating to certain commercial loans that were paid in advance of their maturity.

Other income, consisting primarily of safe deposit box rentals, income from the sale of non-deposit investment products, and miscellaneous fees, increased \$167,000 or 46.8% in 2014 and decreased \$38,000 or 9.6% in 2013. Commissions earned on sales of retail non-deposit investment products increased 47.3% in 2014 but decreased 11.2%

in 2013.

Table 4 — Non-Interest Income

NON-INTEREST EXPENSE

Non-interest expense consists of salaries and employee benefits, occupancy, furniture and equipment, and other miscellaneous expenses. Table 5 provides the yearly non-interest expense by category, along with the amount, dollar changes, and percentage of change.

Total non-interest expense amounted to \$21,208,000, an increase of \$1,266,000, or 6.3% in 2014 as compared to a decrease of \$579,000, or 2.8% in 2013. Expenses associated with employees (salaries and employee benefits) continue to be the largest non-interest expenditure. Salaries and employee benefits amounted to 54.1% of total non-interest expense in 2014 and 54.8% in 2013. Salaries and employee benefits increased \$546,000, or 5.0% in 2014 and \$516,000, or 5.0% in 2013. The hiring of several new employees, including a Financial Services Officer and a Financial Consultant, among others, contributed to the 2014 increase in salaries and benefits expense. The majority of the salaries and employee benefits increase in 2014 and 2013 was related to the opening of new branches in Dallas, Pennsylvania, on March 18, 2013, and Shickshinny, Pennsylvania, on December 9, 2013. In addition, the Corporation experienced a 3.4% increase in medical insurance for its employees, from \$1,342,000 to \$1,387,000. The number of full time equivalent employees was 205 as of December 31, 2014, 207 as of December 31, 2013, and 193 as of December 31, 2012.

Net occupancy expense increased \$154,000, or 10.1% in 2014 as compared to an increase of \$118,000, or 8.4% in 2013. The 2014 increase in net occupancy expense primarily consisted of higher building depreciation, maintenance and repairs, and taxes associated with the new Dallas and Shickshinny branches and the renovation and expansion of the Bank's main headquarters. Furniture and equipment and computer expense decreased \$46,000, or 2.7% in 2014 compared to an increase of \$54,000, or 3.3% in 2013. The increases in 2013 were caused by higher service maintenance on software, higher depreciation, and losses on disposals of furniture and fixtures due to the renovation and expansion of the Bank's main headquarters and the replacement of several ATMs. Pennsylvania shares tax expense decreased \$147,000, or 18.8% in 2014 as a result of a lowered tax rate from the prior year and an increase in the deduction for U.S. Obligations held in the investment portfolio. FDIC insurance expense increased \$83,000, or 19.7% in 2014 as compared to a decrease of \$64,000, or 13.2% in 2013. FDIC insurance expense varies with changes in net asset size, risk ratings, and FDIC derived assessment rates. Data processing fees of \$300,000 were incurred in 2014 as a result of the planned outsourcing of the Bank's core processing system for data security, disaster recovery and system efficiency goals. Foreclosed assets held for resale expense amounted to \$80,000 in 2014, \$41,000 in 2013 and \$654,000 in 2012. The Corporation incurred costs associated with the maintenance and sales of eight foreclosed properties in 2012, but only four properties in 2013 and three properties in 2014. Advertising expenses increased \$128,000 or 29.0% as a result of the rollout of the Bank's new suite of rewards checking products called Kasasa in the first quarter of 2014. FHLB prepayment penalties of \$345,000 were expenses related to the early prepayment of a borrowing with the Federal Home Loan Bank ("FHLB") in 2013. Other expenses increased \$424,000 or 15.7% from 2013 to 2014. The increase was due to higher fees for an enhanced internet and mobile banking platform, Kasasa rewards and success fees, and an increase in charitable donations.

The overall level of non-interest expense remains low, relative to the Bank's peers (community banks from \$500 million to \$1 billion in assets). In fact, the Bank's total non-interest expense was 2.35% of average assets in 2014 and 2.38% in 2013. The Bank's non-interest expense as a percentage of average assets places the Bank among the leaders in its peer financial institution categories in controlling non-interest expense.

INCOME TAX EXPENSE

Income tax expense for the year ended December 31, 2014, was \$2,617,000 as compared to \$2,225,000 and \$2,006,000 for the years ended December 31, 2013 and 2012, respectively. The effective income tax rate was 20.4% in 2014, 17.8% in 2013, and 16.5% in 2012. The increase in the effective tax rate for 2014 was due to sales of tax-free municipal securities during the past year and the reduction in the amount of tax credits from the low-income housing partnerships. The increase in the effective tax rate for 2013 was the result of a reduction in tax-free municipal securities held in the Corporation's investment portfolio. The Corporation looks to maximize its tax-exempt income derived from both tax-free loans and tax-free municipal securities without triggering the alternative minimum tax. The Corporation does not expect a material change in its tax rate for 2015.

FINANCIAL CONDITION

GENERAL

Total assets increased to \$912,353,000 at year-end 2014, an increase of 1.2% from year-end 2013. Total assets as of December 31, 2013 were \$901,514,000, an increase of 9.9% over 2012.

Net loans increased in 2014 from \$439,999,000 to \$481,071,000, a 9.3% increase. Loan demand grew in 2014 as the Bank added loans in commercial and residential mortgage categories. Net loans in 2013 increased from 2012 by \$12,875,000 or 3.0%.

As of December 31, 2014, total deposits amounted to \$661,562,000, a decrease of 4.1% from 2013, while total deposits as of year-end 2013 amounted to \$690,075,000, an increase of 13.3% from 2012. The decrease in 2014 was primarily due to the reduction in balances of one large state and political entity coupled with the decision not to retain maturing large jumbo certificates of deposits. Core deposits, which include demand deposits and interest bearing demand deposits (NOWs), money market accounts, savings accounts, and time deposits of individuals, continue to be the Corporation's most significant source of funds.

The Corporation continues to maintain and manage its asset growth. The Corporation's strong equity capital position provides an opportunity to further leverage its asset growth. Borrowings increased in 2014 by \$29,800,000 and increased in 2013 by \$9,073,000 to fund loan growth.

Total stockholders' equity increased to \$106,271,000 at December 31, 2014, an increase of \$9,920,000 or 10.3% over 2013. Total stockholders' equity decreased to \$96,351,000 at December 31, 2013, a decrease of \$6,979,000 or 6.8% over 2012.

SEGMENT REPORTING

Currently, management measures the performance and allocates the resources of the Corporation as a single segment.

EARNING ASSETS

Earning assets are defined as those assets that produce interest income. By maintaining a healthy asset utilization rate, i.e., the volume of earning assets as a percentage of total assets, the Corporation maximizes income. The earning asset ratio (average interest earning assets divided by average total assets) equaled 91.6% for 2014, compared to 91.3% for 2013 and 92.0% for 2012. This indicates that the management of earning assets is a priority and non-earning assets, primarily cash and due from banks, fixed assets and other assets, are maintained at minimal levels. The primary earning assets are loans and investment securities.

INVESTMENT SECURITIES

The Corporation uses investment securities to not only generate interest and dividend revenue, but also to help manage interest rate risk and to provide liquidity to meet operating cash needs.

The investment portfolio has been allocated between securities available-for-sale and securities held-to-maturity. No investment securities were established in a trading account. Available-for-sale securities decreased \$6,032,000 or 1.7% to \$347,666,000 in 2014. Available-for-sale securities increased \$57,386,000 or 19.4% to \$353,698,000 in 2013. At December 31, 2014, the net unrealized gain, net of the tax effect, on these securities was \$4,330,000 and was included in stockholders' equity as accumulated other comprehensive income (loss). At December 31, 2014, the primary reason for the increase in accumulated other comprehensive income (loss) was due to market value fluctuations. In 2014, held-to-maturity securities decreased \$16,000, or 1.5% to \$1,056,000 after decreasing \$1,489,000, or 58.1% in 2013. Table 6 provides data on the carrying value of the Corporation's investment portfolio on the dates indicated. The vast majority of investment security purchases are allocated as available-for-sale. This provides the Corporation with increased flexibility should there be a need or desire to liquidate an investment security.

The investment portfolio includes U.S. Treasury securities, U.S. Government corporations and agencies, corporate debt obligations, mortgage-backed securities, and obligations of state and political subdivisions, both tax-exempt and taxable. Marketable equity securities consists of common stock investments in other commercial banks and bank holding companies.

Securities available for sale may be sold as part of the overall asset and liability management process. Realized gains and losses are reflected in the results of operations on the Corporation's Consolidated Statements of Income. As of December 31, 2014, the investment portfolio does not contain any off-balance sheet derivatives or trust preferred investments.

¹Mortgage-backed securities are allocated for maturity reporting at their original maturity date.

²Average yields on tax-exempt obligations of state and political subdivisions have been computed on a tax-equivalent basis using a 34% tax rate.

³Marketable equity securities are not considered to have defined maturities and are included in the after ten year category.

LOANS

Total loans increased to \$487,461,000 as of December 31, 2014, as compared to a balance of \$446,518,000 as of December 31, 2013. In 2014, the Corporation set aggressive asset growth goals to combat the challenging rate environment. Table 8 provides data relating to the composition of the Corporation's loan portfolio on the dates indicated. Total loans increased \$40,943,000, or 9.2% in 2014 compared to an increase of \$13,622,000, or 3.1% in 2013.

Increasing demand for borrowing by both individuals and businesses accounted for the 9.2% increase in the loan portfolio from December 31, 2013 to December 31, 2014. The Commercial and Industrial portfolio increased \$3,827,000 to \$64,527,000 as of December 31, 2014, as compared to \$60,700,000 at December 31, 2013. The nominal increase in the Commercial and Industrial portfolio (which includes tax-free commercial and industrial loans) was attributed to new loan originations totaling \$29,433,000 offset by loan payoffs of \$26,126,000, combined with other typical fluctuations in the loan portfolio. The Commercial Real Estate loan portfolio increased \$28,460,000 to \$253,884,000 as of December 31, 2014, as compared to \$225,424,000 at December 31, 2013. The increase was mainly the result of \$53,872,000 in new loan originations, offset by \$13,268,000 in loan payoffs combined with other typical payment amortization in the Commercial Real Estate loan portfolio. Residential Real Estate loans increased \$8,879,000 to \$163,282,000 as of December 31, 2014, as compared to \$154,403,000 at December 31, 2013. The increase was the result of new originations totaling \$30,949,000 offset by loan payoffs of \$16,943,000 combined with other typical payment amortization in the Residential Real Estate loan portfolio. The Corporation continues to originate and sell certain long-term fixed rate residential mortgage loans which conform to secondary market requirements. The Corporation derives ongoing income from the servicing of mortgages sold in the secondary market. The Corporation continues its efforts to lend to creditworthy borrowers despite the continued slow economic conditions.

Management believes that the loan portfolio is well diversified. The total commercial portfolio was \$318,411,000, of which \$253,884,000 or 52.1% of gross loans was secured by commercial real estate.

The largest relationship is comprised of various real estate entities with a mutual owner who began real estate investment and development activities in 1989. The relationship had outstanding loan balances and unused commitments of \$13,168,000 at December 31, 2014. The individual owns a diverse mix of real estate entities which specialize in construction/development projects, leasing of commercial office space, and rental of multi-tenant residential units. This relationship is comprised of \$7,718,000 in long term debt, a construction mortgage of \$4,450,000, and a \$1,000,000 line of credit. The relationship is well secured by first lien mortgages on income producing commercial and residential real estate, plus assignment of governmental leases and collateral pledge of cash accounts and marketable securities.

The second largest relationship consists of a real estate development/holding company that was established in 2006 to construct a multi-tenant medical complex, as well as the medical-related entities that operate out of the complex. The relationship had outstanding loan balances and unused commitments of \$9,004,000 at December 31, 2014. The debt is comprised of \$8,287,000 in term debt, \$450,000 in lines of credit, and \$267,000 in available credit on a real estate term loan. The relationship is secured by commercial real estate and business assets, as well as the assignment of leases and a life insurance policy.

The third largest relationship consists of a municipality founded in 1816 consisting of 35 square miles. According to township officials, the population has been increasing steadily since 2001 and is currently in excess of 11,000 people. In 2012, the township completed its \$74,000,000 sewer expansion project. The relationship had outstanding balances and unused commitments of \$8,521,000 at December 31, 2014, which consists entirely of term debt. The loans are secured by project receivables and the full faith, credit, and taxing power of the township.

The fourth largest relationship is comprised of several first lien mortgages relating to office and professional rental properties and a planned residential community. The principal and related companies have been involved in real estate development since 1974 and have successfully developed residential communities, medical office facilities, and professional office facilities. The entire relationship is secured by a combination of first lien mortgages and the assignment of rents from income producing properties. At December 31, 2014, the relationship had outstanding loan balances and unused commitments of \$8,456,000 after participation shares sold of \$619,000. The debt is comprised of \$6,270,000 in long term debt and a \$2,186,000 letter of credit.

The fifth largest relationship consists of a portion of a large participation loan to a private college. The college was founded in 1946 and offers various academic majors and a variety of student clubs and activities. The proceeds of the participation loan are to be allocated to refinance outstanding bonds, to refinance a line of credit used to renovate dormitories and classroom space, and to purchase an apartment complex to be used for student housing. At December 31, 2014, the relationship had outstanding loan balances and unused commitments of \$8,000,000, which consists of

the outstanding balances of two tax-free loans. The loans are secured by business assets of the college.

Each of the aforementioned relationships is located within the Corporation's market area.

Each of the aforementioned loans are paying as agreed and none of the loans are considered criticized or classified. The property securing each of the loans was appraised at the time the loan was originated. Appraisals are ordered independently of the loan approval process from appraisers on an approved list. All appraisals are reviewed internally for conformity with accepted standards of the Bank.

All loan relationships in excess of \$1,500,000 are reviewed internally and through an external loan review process on an annual basis. Such review is based upon analysis of current financial statements of the borrower, co-borrowers/guarantors, payment history, and economic conditions.

Overall, the portfolio risk profile as measured by loan grade is considered low risk, as \$468,233,000 or 96.1% of gross loans are graded Pass; \$11,596,000 or 2.4% are graded Special Mention; \$7,142,000 or 1.5% are graded Substandard; and \$0 are graded Doubtful. The rating is intended to represent the best assessment of risk available at a given point in time, based upon a review of the borrower's financial statements, credit analysis, payment history with the Bank, credit history and lender knowledge of the borrower. See Note 4 — Loans and Allowance for Loan Losses for risk grading tables.

Commercial and Industrial non-pass grades decreased to \$68,000 as of December 31, 2014, compared to \$86,000 as of December 31, 2013. The \$18,000 decrease was mainly the result of loan payments totaling \$28,000 and three unrelated non-pass grade loans closed during the year totaling \$8,000, offset against the addition of three unrelated loans to non-pass grades during 2014 totaling \$18,000. Commercial Real Estate non-pass grades increased to \$16,480,000 as of December 31, 2014, compared to \$5,499,000 as of December 31, 2013. The \$10,981,000 increase in Commercial Real Estate was mainly the result of the addition of twenty loans belonging to nine different loan relationships to non-pass grades during 2014 totaling \$12,484,000, net against loan payments totaling \$133,000, four non-pass grade loans belonging to three different relationships closed during the year totaling \$690,000, five non-pass grade loans belonging to two different relationships charged-off totaling \$424,000, three unrelated non-pass grade loans charged-down totaling \$158,000, and one loan in the amount of \$98,000 upgraded to pass grade status during 2014. The Residential Real Estate and Consumer non-pass grades increased to \$2,190,000 at December 31, 2014, compared to \$1,113,000 as of December 31, 2013. The \$1,077,000 increase was mainly due to the addition of fourteen unrelated loans to non-pass grades totaling \$1,525,000 and disbursements made on one non-pass grade loan totaling \$9,000, net against loan payments totaling \$32,000, a charge-down on one non-pass grade loan totaling \$15,000, five non-pass grade loans belonging to four different relationships charged-off totaling \$364,000, and one loan in the amount of \$46,000 upgraded to pass grade status during 2014.

The increase in Commercial Real Estate non-pass grade loans was mainly the result of the downgrade of thirteen loans. Two loans totaling \$6,568,000 are with a real estate development company for a multi-tenant housing project that has completed construction but has a very low occupancy rate. Despite the low occupancy rate, the borrower continues to perform. One loan of \$3,896,000 is with a real estate development company. The weak real estate market has hindered the process of the development plans and expected sales have not materialized; however, the borrower remains strong and continues to perform. Two of the loans totaling \$818,000 are with a single individual for an amusement and recreation facility that has experienced significant losses due to flood damage. The facility was renovated and reopened and is experiencing a weak recovery. Eight loans totaling \$607,000 are with a single individual for various multi-tenant housing projects. Unpaid real estate taxes and municipal liens have had a negative impact on the relationship. Despite the circumstances, the borrower continues to perform.

The Corporation continues to internally underwrite each of its loans to comply with prescribed policies and approval levels established by its Board of Directors.

Table 8 — Loans

ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses constitutes the amount available to absorb losses within the loan portfolio. As of December 31, 2014, the allowance for loan losses was \$6,390,000 as compared to \$6,519,000 as of December 31, 2013. The allowance for loan losses is established through a provision for loan losses charged to expenses. Loans are charged against the allowance for possible loan losses when management believes that the collectability of the principal is unlikely. The risk characteristics of the loan portfolio are managed through various control processes, including credit evaluations of individual borrowers, periodic reviews, and diversification by industry. Risk is further mitigated through the application of lending procedures such as the holding of adequate collateral and the establishment of contractual guarantees.

Management performs a quarterly analysis to determine the adequacy of the allowance for loan losses. The methodology in determining adequacy incorporates specific and general allocations together with a risk/loss analysis on various segments of the portfolio according to an internal loan review process. This assessment results in an allocated allowance. Management maintains its loan review and loan classification standards consistent with those of its regulatory supervisory authority.

Management considers, based upon its methodology, that the allowance for loan losses is adequate to cover foreseeable future losses. However, there can be no assurance that the allowance for loan losses will be adequate to cover significant losses, if any, that might be incurred in the future.

Table 10 contains an analysis of the allowance for loan losses indicating charge-offs and recoveries by year. In 2014 and 2013, net charge-offs as a percentage of average loans were 0.1%, compared to 0.4% in 2012. Net charge-offs amounted to \$562,000 in 2014, \$625,000 in 2013, and \$1,757,000 in 2012. During the year ended December 31, 2014, charge-offs decreased primarily in the Residential Real Estate portfolio due to fewer borrowers defaulting on credit obligations, the Corporation's diligent collection efforts, and the improving economy. These factors also contributed to a significantly decreased balance in charge-offs in the Commercial Real Estate category in 2013 and 2014 as compared to 2012. Charge-offs in the Residential Real Estate category were \$209,000 in 2014 compared to \$348,000 and \$404,000 in 2013 and 2012, respectively, and charge-offs in the Commercial Real Estate category were \$328,000 in 2014 compared to \$290,000 in 2013 and \$1,077,000 in 2012.

For the year ended December 31, 2014, the provision for loan losses was \$433,000 as compared to \$1,372,000 for 2013 and \$1,600,000 for 2012. The net effect of the provision, charge-offs and recoveries decreased the year-end allowance for loan losses to \$6,390,000 of which 8.5% was attributed to the Commercial and Industrial component, 49.7% attributed to the Commercial Real Estate component, 30.2% attributed to the Residential Real Estate component (primarily residential mortgages), 1.7% attributed to the Consumer component, and 9.9% being the unallocated component (refer to the activity in Note 4 Loans and Allowance for Loan Losses on page 68). The Corporation determined that the provision for loan losses made during 2014 was sufficient to maintain the allowance for loan losses at a level necessary for the probable losses inherent in the loan portfolio as of December 31, 2014.

Table 10 — Analysis of Allowance for Loan Losses

(Dollars in thousands)	Years Ended December 31,				
	2014	2013	2012	2011	2010
Balance at beginning of period	\$6,519	\$5,772	\$5,929	\$5,701	\$5,322
Charge-offs:					
Commercial and Industrial	107	17	264	485	389
Commercial Real Estate	328	290	1,077	968	1,585
Residential Real Estate	209	348	404	218	193
Consumer	47	39	87	98	95
	691	694	1,832	1,769	2,262
Recoveries:					
Commercial and Industrial	31	24	23	28	38
Commercial Real Estate	81	31	22	51	13
Residential Real Estate	14	5	1	2	1
Consumer	3	9	29	16	14
	129	69	75	97	66
Net charge-offs	562	625	1,757	1,672	2,196
Additions charged to operations	433	1,372	1,600	1,900	2,575
Balance at end of period	\$6,390	\$6,519	\$5,772	\$5,929	\$5,701
Ratio of net charge-offs during the period to average loans outstanding during the period	0.1 %	0.1 %	0.4 %	0.4 %	0.5 %
Allowance for loan losses to average loans outstanding during the period	1.36 %	1.49 %	1.36 %	1.44 %	1.39 %

It is the policy of management and the Corporation's Board of Directors to make a provision for both identified and unidentified losses inherent in its loan portfolio. A provision for loan losses is charged to operations based upon an evaluation of the potential losses in the loan portfolio. This evaluation takes into account such factors as portfolio concentrations, delinquency trends, trends of impaired loans, economic conditions, and other relevant factors.

The loan review process, which is conducted quarterly, is an integral part of the Bank's evaluation of the loan portfolio. A detailed quarterly analysis to determine the adequacy of the Corporation's allowance for loan losses is reviewed by the Board of Directors.

With the Bank's manageable level of net charge-offs and the additions to the reserve from the provision out of operations, the allowance for loan losses as a percentage of average loans amounted to 1.36% in 2014, 1.49% in 2013 and 1.36% in 2012.

Table 11 sets forth the allocation of the Bank's allowance for loan losses by loan category and the percentage of loans in each category to total loans receivable at the dates indicated. The portion of the allowance for loan losses allocated to each loan category does not represent the total available for future losses that may occur within the loan category, since the total loan loss allowance is a valuation reserve applicable to the entire loan portfolio.

NON-PERFORMING ASSETS

Table 12 details the Corporation's non-performing assets and impaired loans as of the dates indicated. Generally, a loan is classified as non-accrual and the accrual of interest on such a loan is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan currently is performing. A loan may remain on accrual status if it is in the process of collection and is either guaranteed or well secured. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed and unpaid interest accrued in prior years is charged against current period income. A modification of a loan constitutes a troubled debt restructuring ("TDR") when a borrower is experiencing financial difficulty and the modification constitutes a concession that the Corporation would not otherwise consider. Modifications to loans classified as TDRs generally include reductions in contractual interest rates, principal deferrals and extensions of maturity dates at a stated interest rate lower than the current market for a new loan with similar risk characteristics. While unusual, there may be instances of loan principal forgiveness. Foreclosed assets held for resale represent property acquired through foreclosure, or considered to be an in-substance foreclosure.

Total non-performing assets amounted to \$4,039,000 as of December 31, 2014 as compared to \$4,349,000 as of December 31, 2013. The economy, in particular, high unemployment/labor underutilization rate, weak job markets, unsettled fuel prices and energy costs, and the continued slowness in the housing industry had a direct effect on the Corporation's non-performing assets. The Corporation is closely monitoring its Commercial Real Estate portfolio because of the current economic environment. In particular, vacancy rates have increased, while property values have declined in some markets. Non-accrual loans totaled \$3,974,000 as of December 31, 2014 as compared to \$3,551,000 as of December 31, 2013. Foreclosed assets held for resale decreased to \$55,000 as of December 31, 2014 from \$480,000 as of December 31, 2013. Loans past-due 90 days or more and still accruing interest amounted to \$10,000 as of December 31, 2014 as compared to \$318,000 as of December 31, 2013. At December 31, 2014, Loans past-due 90 days or more and still accruing interest consisted of two Residential Real Estate loans, which are deemed to be well secured by collateral and are in the process of collection. Non-performing assets to total loans was 0.8% as of December 31, 2014 compared to 1.0% at December 31, 2013. Non-performing assets to total assets was 0.4% as of December 31, 2014 compared to 0.5% at December 31, 2013. The allowance for loan losses to total non-performing assets was 158.2% as of December 31, 2014 as compared to 149.9% as of December 31, 2013. Additional detail can be found in Table 12 – Non-Performing Assets and Impaired Loans and the Loan Receivables on Non-Accrual Status table in Note 4 Loans and Allowance for Loan Losses. Asset quality is a priority and the Corporation retains a full-time loan review officer to closely track and monitor overall loan quality, along with a full-time workout specialist to manage collection and liquidation efforts.

Potential problem loans are defined as performing substandard loans which are not deemed to be impaired. These loans have characteristics that cause management to have doubts regarding the ability of the borrower to perform under present loan repayment terms and which may result in reporting these loans as non-performing loans in the future. Potential problem loans amounted to \$2,477,000 at December 31, 2014, \$1,183,000 at December 31, 2013 and \$3,236,000 at December 31, 2012.

Impaired loans were \$7,044,000 at December 31, 2014 and \$5,974,000 at December 31, 2013. The largest impaired loan relationship at December 31, 2014 consisted of a purchased participation loan secured by commercial real estate. The Corporation's participation share of the loan was \$1,413,000. The collateral evaluation at December 31, 2014 carried a value of \$5,787,000, after considering estimated appraisal adjustments and cost to sell of 40% and considering the total participation outstanding note balance, resulting in the Corporation's specific allocation of \$0. At December 31, 2014, the second largest impaired loan relationship was represented by one performing loan carrying a balance of \$817,000 secured by commercial real estate. The discounted cash flow evaluation at December 31, 2014 resulted in a specific allocation of \$0. The third largest impaired loan relationship at December 31, 2014 was represented by two performing loans carrying a balance of \$672,000 secured by commercial real estate. The discounted cash flow evaluation at December 31, 2014 resulted in a specific allocation of \$1,000. The estimated appraisal adjustments and cost to sell percentages are determined based on the market area in which the real estate securing the loan is located, among other factors, and therefore, can differ from one loan to another. Of the \$7,044,000 in impaired loans at December 31, 2014, none were located outside the Corporation's primary market area.

Loans categorized as TDRs carried an unpaid balance of \$4,708,000 as of December 31, 2014 as compared to \$3,961,000 as of December 31, 2013. The increase was attributable to deterioration in the respective borrowers' financial position, and in some cases a declining collateral value, along with the Bank's proactive monitoring of the loan portfolio resulting in the identification of additional loans classified as TDRs. Of the twenty-four restructured loans at December 31, 2014, three loans are classified in the Commercial and Industrial portfolio, twenty loans are classified in the Commercial Real Estate portfolio, and one loan is classified in the Consumer portfolio. At December 31, 2014, five Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$2,087,000 were not in compliance with the terms of their restructure, compared to December 31, 2013 when three Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$386,000 were not in compliance with the terms of their restructure. The troubled debt restructurings at December 31, 2014 consisted of five interest rate modifications, six term modifications beyond the original stated term, and thirteen payment modifications. As of December 31, 2014, specific allocations of \$27,000 were attributable to the TDRs. There were no unfunded commitments on TDRs at December 31, 2014 and 2013.

The Corporation's non-accrual loan valuation procedure for any loans greater than \$250,000 requires an appraisal to be obtained and reviewed annually at year end. A quarterly collateral evaluation is performed which may include a site visit, property pictures and discussions with realtors and other similar business professionals to ascertain current values.

For non-accrual loans less than \$250,000 upon classification and typically at year end, the Corporation completes a Certificate of Inspection, which includes the results of an onsite inspection, insured values, tax assessed values, recent sales comparisons and a review of the previous evaluations.

Improving loan quality is a priority. The Corporation actively works with borrowers to resolve credit problems and will continue its close monitoring efforts in 2015. Excluding the assets disclosed in Table 12 – Non-Performing Assets and Impaired Loans and the Troubled Debt Restructurings section in Note 4 — Loans and Allowance for Loan Losses, management is not aware of any information about borrowers' possible credit problems which cause serious doubt as to their ability to comply with present loan repayment terms.

Should the economic climate no longer continue to be stable or deteriorate further, borrowers may experience difficulty, and the level of impaired loans and non-performing assets, charge-offs and delinquencies could rise and possibly require additional increases in the Corporation's allowance for loan losses.

In addition, regulatory authorities, as an integral part of their examinations, periodically review the allowance for possible loan losses. They may require additions to allowances based upon their judgments about information available to them at the time of examination.

A concentration of credit exists when the total amount of loans to borrowers, who are engaged in similar activities that are similarly impacted by economic or other conditions, exceed 10% of total loans. As of December 31, 2014, 2013, and 2012 management is of the opinion that there were no loan concentrations exceeding 10% of total loans.

Table 12 — Non-Performing Assets and Impaired Loans

(Dollars in thousands)	December 31,		
	2014	2013	2012
Non-performing assets

Non-performing assets to total assets	0.4 %	0.5 %	0.5 %
Allowance for loan losses to impaired loans	90.7 %	109.1 %	244.3 %
Allowance for loan losses to total non-performing assets	158.2 %	149.9 %	152.6 %

Real estate mortgages comprise 85.6% of the loan portfolio as of December 31, 2014, as compared to 85.1% as of December 31, 2013. Real estate mortgages consist of both residential and commercial real estate loans. The real estate loan portfolio is well diversified in terms of borrowers, collateral, interest rates, and maturities. Also, the residential real estate loan portfolio is largely comprised of fixed rate mortgages. The real estate loans are concentrated primarily in the Corporation's market area and are subject to risks associated with the local economy. The commercial real estate loans typically reprice approximately every three to five years and are also concentrated in the Corporation's market area. The Corporation's loss exposure on its impaired loans continues to be mitigated by collateral positions on these loans. The allocated allowance for loan losses associated with impaired loans is generally computed based upon the related collateral value of the loans. The collateral values are determined by recent appraisals, but are generally discounted by management based on historical dispositions, changes in market conditions since the last valuation and management's expertise and knowledge of the borrower and the borrower's business.

DEPOSITS AND OTHER BORROWED FUNDS

Consumer and commercial retail deposits are attracted primarily by the Bank's eighteen full service office locations and through its internet banking presence. The Bank offers a broad selection of deposit products and continually evaluates its interest rates and fees on deposit products. The Bank regularly reviews competing financial institutions interest rates, especially when establishing interest rates on certificates of deposit.

Deposits decreased by \$28,513,000, or 4.1% for the year ending December 31, 2014. This decrease compares unfavorably to a deposit increase of \$81,241,000, or 13.3% in 2013. Two factors were responsible for the change in deposits from 2013 to 2014. One large municipal depositor had significantly lower balances as of December 31, 2014 when compared to December 31, 2013. Additionally, the Bank chose to reduce certificate of deposit balances by lowering interest rate offerings. The overall increase in deposits in 2013 of \$81,241,000 was due in large part to the attraction of several municipal accounts.

Total borrowings were \$138,462,000 as of December 31, 2014, compared to \$108,662,000 on December 31, 2013. During 2014, long-term borrowings increased from \$40,429,000 to \$65,339,000. The increase in long-term borrowings occurred in order to sustain growth in the Bank's loan portfolio and to secure financing at low market rates. In 2013, long-term borrowings decreased from \$44,520,000 to \$40,429,000. This decrease was primarily due to the maturity of one individual term note with FHLB and the early pre-payment of an additional borrowing at FHLB. Long-term borrowings are typically FHLB term borrowings with a maturity of one year or more.

Short-term borrowings were also used to sustain loan growth and to offset the decrease in deposits. Short-term debt increased from \$68,233,000 in 2013 to \$73,123,000 as of December 31, 2014. Short-term borrowings are comprised of federal funds purchased, securities sold under agreements to repurchase, Federal Discount Window and short-term borrowings from FHLB. Short-term borrowings from FHLB are commonly used to offset seasonal fluctuations in deposits.

In connection with FHLB borrowings, Federal Discount Window, and securities sold under agreements to repurchase, the Corporation maintains certain eligible assets as collateral.

The following table shows information about the Corporation's short-term borrowings as of December 31, 2014 and 2013.

Table 13 Short-Term Borrowings

(Dollars in thousands)	2014			2013		
	Month End Balance	Average Balance	Maximum Month End Balance	Month End Balance	Average Balance	Maximum Month End Balance
Federal funds purchased	\$	\$2	\$	\$	\$	\$
Securities sold under agreements to repurchase	16,730	16,936	18,908	16,261	18,753	22,516

Federal Home Loan Bank	56,393	58,514	93,125	51,972	11,050	51,972
	\$73,123	\$75,457	\$112,033	\$68,233	\$29,803	\$74,488

CAPITAL STRENGTH

Normal increases in capital are generated by net income, less cash dividends paid out. Also, the net unrealized gains or losses on investment securities available-for-sale, net of taxes, referred to as accumulated other comprehensive income (loss), may increase or decrease total equity capital. The total net increase in capital was \$9,920,000 in 2014 after a decrease of \$6,979,000 in 2013. The increase in equity capital in 2014 was due to the retention of \$4,396,000 in earnings, the issuance of new shares through the Corporation's Dividend Reinvestment Program ("DRIP") amounting to \$1,140,000 and the increase in accumulated other comprehensive income (loss) due to market fluctuations. The decrease in equity capital in 2013 related to a significant decrease in accumulated other comprehensive income (loss) due to market fluctuations.

The Corporation had 235,149 shares of common stock as treasury stock as of December 31, 2014 and 2013, at a cost of \$5,823,000.

Return on average equity ("ROE") is computed by dividing net income by average stockholders' equity. This ratio was 9.90% for 2014, 10.12% for 2013, and 10.19% for 2012. Refer to Performance Ratios on page 22 — Selected Financial Data for a more expanded listing of the ROE.

Adequate capitalization of banks and bank holding companies is required and monitored by regulatory authorities. Table 14 reflects risk-based capital ratios and the leverage ratio for the Bank. The Bank's leverage ratio was 8.63% at December 31, 2014 and 8.56% at December 31, 2013.

The Bank has consistently maintained regulatory capital ratios at or above the “well capitalized” standards. To be categorized as “well capitalized”, the Bank must maintain minimum Tier 1 Risk-Based capital, Total Risk-Based capital and Tier 1 Leverage ratios of 4.0%, 8.0% and 4.0%, respectively. For additional information on capital ratios, see Note 15 — Regulatory Matters. As Table 14 indicates, the risk-based capital ratios for the Bank increased over the prior year. The risk-based capital calculation assigns various levels of risk to different categories of bank assets, requiring higher levels of capital for assets with more risk. Also measured in the risk-based capital ratio is credit risk exposure associated with off-balance sheet contracts and commitments.

Table 14 — Capital Ratios

	December 31,	
	2014	2013
Risk-Based Capital:		
Tier 1 risk-based capital ratio	13.92%	13.19%
Total risk-based capital ratio (Tier 1 and Tier 2)	15.07%	14.36%
Leverage Ratio:		
Tier 1 capital to average assets	8.63 %	8.56 %

The Corporation’s capital ratios are not materially different than those of the Bank

LIQUIDITY MANAGEMENT

Effective liquidity management ensures that the cash flow requirements of depositors and borrowers, as well as the operating cash needs of the Corporation, are met.

Liquidity is needed to provide the funding requirements of depositor’s withdrawals, loan growth, and other operational needs. Asset liquidity is provided by investment securities maturing in one year or less, other short-term investments, federal funds sold, and cash and due from banks. The liquidity is augmented by repayment of loans and cash flows from the mortgage backed securities.

Liability liquidity is accomplished by maintaining a core deposit base, acquired by attracting new deposits and retaining maturing deposits. Also, short-term borrowings provide funds to meet liquidity needs.

Management believes its current liquidity position is satisfactory given the fact that the Corporation has a very stable core deposit base which has increased annually. Secondly, the Corporation's loan payments and principal paydowns on its mortgage-backed securities provide a steady source of funds. Also, short-term investments and maturing investments represent additional sources of liquidity.

Finally, the Corporation's subsidiary bank does have access to funds on a short-term basis from the Federal Discount Window. Also, Fed Funds can be purchased by means of a borrowing line at the Atlantic Central Bankers Bank. The Corporation has indirect access to the capital markets through its membership in the Federal Home Loan Bank. Advances on borrowings, both short-term and long-term, are available to help address any liquidity needs.

Table 15 represents scheduled maturities of the Corporation's contractual obligations by time remaining until maturity as of December 31, 2014.

Table 15 — Contractual Obligations

(Dollars in thousands)

December 31, 2014	Less than 1 Year	1 - 3 Years	4 -5 Years	Over 5 Years	Total
Time deposits	\$91,231	\$57,498	\$46,454	\$6,473	\$201,656

Short-term borrowings	56,393				56,393
Long-term borrowings		15,000	43,000	7,000	65,000
Operating lease obligations	172	287	178	2,648	3,285
Capital lease obligations	107	232			339
	\$164,633	\$73,017	\$89,632	\$16,121	\$343,403

Off-Balance Sheet Arrangements

The Corporation is party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and, to a lesser extent, standby letters of credit. At December 31, 2014, the Corporation had unfunded outstanding commitments to extend credit of \$84,983,000 and outstanding standby letters of credit of \$6,322,000. Because these commitments generally have fixed expiration dates and many will expire without being drawn upon, the total commitment level does not necessarily represent future cash requirements. Please refer to Note 16 — Financial Instruments with Off-Balance Sheet Risk and Concentrations of Credit Risk for a discussion of the nature, business purpose, and importance of the Corporation's off-balance sheet arrangements.

MARKET RISK

Market risk is the risk of loss arising from adverse changes in the fair value of financial instruments due to changes in interest rates, exchange rates and equity prices. The Corporation's market risk is composed primarily of interest rate risk. The Corporation's interest rate risk results from timing differences in the repricing of assets, liabilities, off-balance sheet instruments, and changes in relationships between rate indices and the potential exercise of explicit or embedded options.

Increases in the level of interest rates also may adversely affect the fair value of the Corporation's securities and other earning assets. Generally, the fair value of fixed-rate instruments fluctuates inversely with changes in interest rates. As a result, increases in interest rates could result in decreases in the fair value of the Corporation's interest-earning assets, which could adversely affect the Corporation's results of operations if sold, or, in the case of interest earning assets classified as available-for-sale, the Corporation's stockholders' equity, if retained. Under FASB ASC 320-10, *Investment Debt and Equity Securities*, changes in the unrealized gains and losses, net of taxes, on securities classified as available-for-sale are reflected in the Corporation's stockholders' equity. The Corporation does not own any trading assets.

Asset/Liability Management

The principal objective of asset/liability management is to manage the sensitivity of the net interest margin to potential movements in interest rates and to enhance profitability through returns from managed levels of interest rate risk. The Corporation actively manages the interest rate sensitivity of its assets and liabilities. Table 16 presents an interest sensitivity analysis of assets and liabilities as of December 31, 2014. Several techniques are used for measuring interest rate sensitivity. Interest rate risk arises from the mismatches in the repricing of assets and liabilities within a given time period, referred to as a rate sensitivity gap. If more assets than liabilities mature or reprice within the time frame, the Corporation is asset sensitive. This position would contribute positively to net interest income in a rising rate environment. Conversely, if more liabilities mature or reprice, the Corporation is liability sensitive. This position would contribute positively to net interest income in a falling rate environment.

Limitations of interest rate sensitivity gap analysis as illustrated in Table 16 include: a) assets and liabilities which contractually reprice within the same period may not, in fact, reprice at the same time or to the same extent; b) changes in market interest rates do not affect all assets and liabilities to the same extent or at the same time, and c) interest rate sensitivity gaps reflect the Corporation's position on a single day (December 31, 2014 in the case of the following schedule) while the Corporation continually adjusts its interest sensitivity throughout the year. The Corporation's cumulative gap at one year indicates the Corporation is liability sensitive.

Table 16 — Interest Rate Sensitivity Analysis

(Dollars in thousands)

	December 31, 2014				Total
	One Year	1 - 5 Years	Beyond 5 Years	Not Rate Sensitive	
Assets	\$160,281	\$381,143	\$283,842	\$87,087	\$912,353
Liabilities/Stockholders' Equity	201,075	445,737	157,426	108,115	912,353
Interest Rate Sensitivity Gap	\$(40,794)	\$(64,594)	\$126,416	\$(21,028)	
Cumulative Gap	\$(40,794)	\$(105,388)	\$21,028		

Earnings at Risk

The Bank's Asset/Liability Committee ("ALCO") is responsible for reviewing the interest rate sensitivity position and establishing policies to monitor and limit exposure to interest rate risk. The guidelines established by ALCO are reviewed by the Corporation's Board of Directors. The Corporation recognizes that more sophisticated tools exist for measuring the interest rate risk in the balance sheet beyond interest rate sensitivity gap. Although the Corporation continues to measure its interest rate sensitivity gap, the Corporation utilizes additional modeling for interest rate risk in the overall balance sheet. Earnings at risk and economic values at risk are analyzed.

Earnings simulation modeling addresses earnings at risk and net present value estimation addresses economic value at risk. While each of these interest rate risk measurements has limitations, taken together they represent a reasonably comprehensive view of the magnitude of interest rate risk to the Corporation.

Earnings Simulation Modeling

The Corporation's net income is affected by changes in the level of interest rates. Net income is also subject to changes in the shape of the yield curve. For example, a flattening of the yield curve would result in a decline in earnings due to the compression of earning asset yields and increased liability rates, while a steepening would result in increased earnings as earning asset yields widen.

Earnings simulation modeling is the primary mechanism used in assessing the impact of changes in interest rates on net interest income. The model reflects management's assumptions related to asset yields and rates paid on liabilities, deposit sensitivity, size and composition of the balance sheet. The assumptions are based on what management believes at that time to be the most likely interest rate environment. Earnings at risk is the change in net interest income from a base case scenario under various scenarios of rate shock increases and decreases in the interest rate earnings simulation model.

Table 17 presents an analysis of the changes in net interest income and net present value of the balance sheet resulting from various increases or decreases in the level of interest rates, such as two percentage points (200 basis points) in the level of interest rates. The calculated estimates of change in net interest income and net present value of the balance sheet are compared to current limits approved by ALCO and the Board of Directors. The earnings simulation model projects net interest income would decrease 3.8%, 8.2% and 13.2% in the 100, 200 and 300 basis point increasing rate scenarios presented. In addition, the earnings simulation model projects net interest income would decrease 4.1% and 9.8% in the 100 and 200 basis point decreasing rate scenarios presented. All of these forecasts are within the Corporation's one year policy guidelines.

The analysis and model used to quantify the sensitivity of net interest income becomes less reliable in a decreasing rate scenario given the current unprecedented low interest rate environment with federal funds trading in the 0 – 25 basis point range. Results of the decreasing basis point declining scenarios are affected by the fact that many of the Corporation's interest-bearing liabilities are at rates below 1% and therefore cannot decline 100 or more basis points. However, the Corporation's interest-sensitive assets are able to decline by these amounts. For the years 2014 and 2013, the cost of interest-bearing liabilities averaged 0.64% and 0.77%, respectively, and the yield on average interest-earning assets, on a fully taxable equivalent basis, averaged 3.97% and 4.36%, respectively.

Net Present Value Estimation

The net present value measures economic value at risk and is used for helping to determine levels of risk at a point in time present in the balance sheet that might not be taken into account in the earnings simulation model. The net present value of the balance sheet is defined as the discounted present value of asset cash flows minus the discounted present value of liability cash flows. At December 31, 2014, the 100 and 200 basis point immediate decreases in rates are estimated to affect tax-adjusted net present value with a decrease of 2.0% and 8.0%, respectively. Additionally, tax-adjusted net present value is projected to decrease 4.0%, 9.0%, and 17.4% in the 100, 200 and 300 basis point immediate increase scenarios, respectively. All scenarios presented are below the Corporation's policy limits.

The computation of the effects of hypothetical interest rate changes are based on many assumptions. They should not be relied upon solely as being indicative of actual results, since the computations do not contemplate actions management could undertake in response to changes in interest rates.

Table 17 — Effect of Change in Interest Rates

	Projected Change	
Effect on Net Interest Income		
1-Year Net Income Simulation Projection

Critical Accounting Estimates

The Corporation has chosen accounting policies that it believes are appropriate to accurately and fairly report its operating results and financial position, and the Corporation has applied those policies in a consistent manner.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America require that the Corporation make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. These estimates and assumptions are based on historical or other factors believed to be reasonable under the circumstances. The Corporation evaluates these estimates and assumptions on an ongoing basis and may retain outside consultants, lawyers and actuaries to assist in its evaluation. These estimates, assumptions and judgments are based on information available as of the date of the consolidated financial statements; accordingly, as this information changes, the consolidated financial statements could reflect different estimates, assumptions and judgments.

The Corporation considers three accounting policies to be critical because they involve the most significant judgments and estimates used in preparation of its consolidated financial statements. The three policies are the determination of other-than-temporary impairment of securities, the determination of the allowance for loan losses, and the potential impairment of goodwill and core deposit intangibles.

Other-Than-Temporary Impairment of Securities. Valuations for the investment portfolio are determined using quoted market prices, where available. If quoted market prices are not available, investment valuation is based on pricing models, quotes for similar investment securities, and observable yield curves and spreads. In addition to valuation, management must assess whether there are any declines in value below the carrying value of the investments that should be considered other than temporary or otherwise require an adjustment in carrying value and recognition of the loss in the Corporation's Consolidated Statements of Income.

Allowance for Loan Losses. The allowance for loan losses represents management's estimate of probable credit losses inherent in the loan portfolio. Determining the amount of the allowance for loan losses is considered a critical accounting estimate because it requires significant judgment and the use of estimates related to the amount and timing of expected future cash flows on impaired loans, estimated losses on pools of homogeneous loans based on historical loss experience, and consideration of current economic trends and conditions, all of which may be susceptible to significant change. The loan portfolio also represents the largest asset type on the Corporation's Consolidated Balance Sheets.

Goodwill and Core Deposit Intangibles. Accounting Standards Codification ("ASC") Topic 350, *Intangibles - Goodwill and Other*, requires that goodwill is not amortized to expense, but rather that it be tested for impairment at least annually. Impairment write-downs are charged to results of operations in the period in which the impairment is determined. The Corporation did not identify any impairment on its outstanding goodwill from its most recent testing, which was performed as of September 30, 2014. If certain events occur which might indicate goodwill has been impaired, the goodwill is tested when such events occur.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

Information with respect to quantitative and qualitative disclosures about market risk is included in the information under Management's Discussion and Analysis in Item 7 hereof.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

First Keystone Corporation

Berwick, Pennsylvania

We have audited the accompanying consolidated balance sheet of First Keystone Corporation and Subsidiary (the “Company”) as of December 31, 2014 and the related consolidated statements of income, comprehensive income, changes in stockholders’ equity, and cash flows for the year then ended. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First Keystone Corporation and Subsidiary at December 31, 2014, and the results of their operations and their cash flows for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control – Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) and our report dated March 16, 2015 expressed an unqualified opinion.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

BOARD OF DIRECTORS AND STOCKHOLDERS OF FIRST KEYSTONE CORPORATION:

We have audited the accompanying consolidated balance sheet of First Keystone Corporation and Subsidiary as of December 31, 2013 and December 31, 2012 and the related consolidated statements of income, changes in stockholders' equity, comprehensive income, and cash flows for each of the years in the two-year period ended December 31, 2013. First Keystone Corporation's management is responsible for these consolidated financial statements. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of First Keystone Corporation and Subsidiary as of December 31, 2013, and the consolidated results of its operations and its cash flows for each of the years in the two-year period ended December 31, 2013, in conformity with accounting principles generally accepted in the United States of America.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

NOTE 1 — SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies of First Keystone Corporation and Subsidiary (the “Corporation”) are in accordance with accounting principles generally accepted in the United States of America (“GAAP”) and conform to common practices within the banking industry. The more significant accounting policies follow:

Principles of Consolidation

The consolidated financial statements include the accounts of First Keystone Corporation and its wholly-owned subsidiary, First Keystone Community Bank (the “Bank”). All significant inter-company balances and transactions have been eliminated in consolidation.

Nature of Operations

The Corporation, headquartered in Berwick, Pennsylvania, provides a full range of banking, trust and related services through its wholly-owned Bank subsidiary and is subject to competition from other financial institutions in connection with these services. The Bank serves a customer base which includes individuals, businesses, governments, and public and institutional customers primarily located in the Northeast Region of Pennsylvania. The Bank has 18 full service offices and 20 Automated Teller Machines (“ATM”) located in Columbia, Luzerne, Montour and Monroe counties. The Corporation and its subsidiary must also adhere to certain federal and state banking laws and regulations and are subject to periodic examinations made by various state and federal agencies.

Segment Reporting

The Corporation’s subsidiary acts as an independent community financial services provider, and offers traditional banking and related financial services to individual, business, government, and public and institutional customers. Through its branch and ATM network, the Bank offers a full array of commercial and retail financial services, including the taking of time, savings and demand deposits; the making of commercial, consumer and mortgage loans; and the providing of other financial services. The Bank also performs personal, corporate, pension and fiduciary services through its Trust Department.

Management does not separately allocate expenses, including the cost of funding loan demand, between the commercial, retail, trust and mortgage banking operations of the Corporation. As such, discrete financial information is not available and segment reporting would not be meaningful.

Significant Concentrations of Credit Risk

The majority of the Corporation's activities involve customers located primarily in Columbia, Luzerne, Montour and Monroe counties in Pennsylvania. The types of securities in which the Corporation invests are presented in Note 3 – Investment Securities. Credit risk as it relates to investment activities is moderated through the monitoring of ratings and geographic concentrations residing in the portfolio and the observance of minimum rating levels in the investment policy. Note 4 – Loans and Allowance for Loan Losses summarizes the types of lending in which the Corporation engages. The inherent risks associated with lending activities are mitigated by adhering to conservative underwriting practices and policies, as well as portfolio diversification and thorough monitoring of the loan portfolio. It is management's opinion that the investment and loan portfolios were well balanced at December 31, 2014, to the extent necessary to avoid any significant concentrations of credit risk.

Use of Estimates

The preparation of these consolidated financial statements, in conformity with accounting principles generally accepted in the United States of America, requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of these consolidated financial statements and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Material estimates that are particularly susceptible to significant changes include the determination of other-than-temporary impairment on securities, the determination of the allowance for loan losses, and the potential impairment of goodwill and core deposit intangibles.

Subsequent Events

The Corporation has evaluated events and transactions occurring subsequent to the consolidated balance sheet date of December 31, 2014, for items that should potentially be recognized or disclosed in the consolidated financial statements. The evaluation was conducted through the date these consolidated financial statements were issued.

Cash and Cash Equivalents

For purposes of reporting consolidated cash flows, cash and cash equivalents include cash on hand and due from banks, interest-bearing deposits in other banks, and federal funds sold. The Corporation considers cash classified as interest-bearing deposits with other banks as a cash equivalent since they are represented by cash accounts essentially on a demand basis and mature within one year. Federal funds are also included as a cash equivalent because they are generally purchased and sold for one-day periods.

Time Deposits with Other Banks

Time deposits with other banks consist of fully insured certificates of deposit in other banks with maturity dates between one and five years.

Investment Securities

The Corporation classifies its investment securities as either "Held-to-Maturity" or "Available-for-Sale" at the time of purchase. Investment securities are accounted for on a trade date basis. Debt securities are classified as Held-to-Maturity when the Corporation has the ability and positive intent to hold the securities to maturity. Investment

securities classified as Held-to-Maturity are carried at cost adjusted for amortization of premium and accretion of discount to maturity.

Debt securities not classified as Held-to-Maturity and equity securities are included in the Available-for-Sale category and are carried at fair value. The amount of any unrealized gain or loss, net of the effect of deferred income taxes, is reported as accumulated other comprehensive income (loss) in the Consolidated Balance Sheets and Consolidated Statements of Changes in Stockholders' Equity. Management's decision to sell Available-for-Sale securities is based on changes in economic conditions controlling the sources and applications of funds, terms, availability of and yield of alternative investments, interest rate risk and the need for liquidity.

The cost of debt securities classified as Held-to-Maturity or Available-for-Sale is adjusted for amortization of premiums and accretion of discounts to expected maturity. Such amortization and accretion, as well as interest and dividends, are included in interest and dividend income from investment securities. Realized gains and losses are included in net investment securities gains and losses. The cost of investment securities sold, redeemed or matured is based on the specific identification method.

Restricted Investment in Bank Stocks

The Bank owns restricted stock investments in the Federal Home Loan Bank of Pittsburgh ("FHLB-Pittsburgh") and Atlantic Central Bankers Bank ("ACBB"). These investments do not have a readily determinable fair value because their ownership is restricted and they can be sold back only to the FHLB-Pittsburgh, ACBB or to another member institution. Therefore, these investments are carried at cost. At December 31, 2014, the Corporation held \$5,273,000 in stock of FHLB-Pittsburgh and \$35,000 in stock of ACBB. At December 31, 2013, the Corporation held \$4,726,000 in stock of FHLB-Pittsburgh and \$35,000 in stock of ACBB.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Management evaluates the restricted investment in bank stocks for impairment on an annual basis. Management's determination of whether these investments are impaired is based on management's assessment of the ultimate recoverability of the cost of these investments rather than by recognizing temporary declines in value. The following factors were evaluated to determine the ultimate recoverability of the cost of the Corporation's restricted investment in bank stocks; (i) the significance of the decline in net assets of the correspondent bank as compared to the capital stock amount for the correspondent bank and the length of time this situation has persisted; (ii) commitments by the correspondent bank to make payments required by law or regulation and the level of such payments in relation to the operating performance of the correspondent bank; (iii) the impact of legislative and regulatory changes on the institutions and, accordingly, on the customer base of the correspondent bank; and (iv) the liquidity position of the correspondent bank. Based on the analysis of these factors, management determined that no impairment charge was necessary related to the restricted investment in bank stocks during 2014, 2013 or 2012.

Loans

Net loans are stated at their outstanding unpaid principal balances, net of deferred fees or costs, unearned income and the allowance for loan losses. Interest on loans is recognized as income over the term of each loan, generally, by the accrual method. Loan origination fees and certain direct loan origination costs have been deferred with the net amount amortized using the straight line method or the interest method over the contractual life of the related loans as an interest yield adjustment.

Residential mortgage loans held for resale are carried at the lower of cost or market on an aggregate basis determined by independent pricing from appropriate federal or state agency investors. These loans are sold without recourse.

The loans receivable portfolio is segmented into commercial, residential and consumer loans. Commercial loans consist of the following classes: Commercial and Industrial and Commercial Real Estate.

Commercial and Industrial Lending

The Corporation originates commercial and industrial loans primarily to businesses located in its primary market area and surrounding areas. These loans are used for various business purposes, which include short-term loans and lines of credit to finance machinery and equipment, inventory and accounts receivable. Generally, the maximum term for loans extended on machinery and equipment is based on the projected useful life of such machinery and equipment.

Most business lines of credit are written on demand and are reviewed annually.

Commercial and industrial loans are generally secured with short-term assets; however, in many cases, additional collateral such as real estate is provided as additional security for the loan. Loan-to-value maximum thresholds have been established by the Corporation and are specific to the type of collateral. Collateral values may be determined using invoices, inventory reports, accounts receivable aging reports, business financial statements, collateral appraisals, etc. Commercial and industrial loans are typically secured by personal guarantees of the borrower.

In underwriting commercial and industrial loans, an analysis is performed to evaluate the borrower's character and capacity to repay the loan, the adequacy of the borrower's capital and collateral, as well as the conditions affecting the borrower. Evaluation of the borrower's past, present and future cash flows is also an important aspect of the Corporation's analysis of the borrower's ability to repay.

Commercial and industrial loans generally present a higher level of risk than other types of loans due primarily to the effect of general economic conditions. Commercial and industrial loans are typically made on the basis of the borrower's ability to make repayment from cash flows from the borrower's primary business activities. As a result, the availability of funds for the repayment of commercial and industrial loans is dependent on the success of the business itself, which in turn, is likely to be dependent upon the general economic environment.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Commercial Real Estate Lending

The Corporation engages in commercial real estate lending in its primary market area and surrounding areas. The Corporation's commercial real estate portfolio is secured primarily by commercial retail space, commercial office buildings, residential housing and hotels. Generally, commercial real estate loans have terms that do not exceed twenty years, have loan-to-value ratios of up to eighty percent of the value of the collateral property, and are typically secured by personal guarantees of the borrowers.

In underwriting these loans, the Corporation performs a thorough analysis of the financial condition of the borrower, the borrower's credit history, and the reliability and predictability of the cash flow generated by the property securing the loan. The value of the property is determined by either independent appraisers or internal evaluations by Bank officers.

Commercial real estate loans generally present a higher level of risk than residential real estate secured loans. Repayment of loans secured by commercial real estate is typically dependent upon the successful operation of the related real estate project and/or the effect of the general economic conditions on income producing properties.

Residential Real Estate Lending (Including Home Equity)

The Corporation's residential real estate portfolio is comprised of one-to-four family residential mortgage loan originations, home equity term loans and home equity lines of credit. These loans are generated by the Corporation's marketing efforts, its present customers, walk-in customers and referrals. These loans originate primarily within or with customers from the Corporation's market area.

The Corporation's one-to-four family residential mortgage originations are secured primarily by properties located in its primary market area and surrounding areas. The Corporation offers fixed-rate mortgage loans with terms up to a maximum of twenty years for both permanent structures and those under construction. Generally, the majority of the Corporation's residential mortgage loans originate with a loan-to-value of eighty percent or less, or those with primary mortgage insurance at ninety-five percent or less. Generally, home equity term loans are secured by the borrower's primary residence with a maximum loan-to-value of eighty percent and a maximum term of fifteen years. Generally, home equity lines of credit are secured by the borrower's primary residence with a maximum loan-to-value of eighty percent and a maximum term of twenty years.

In underwriting one-to-four family residential mortgage loans, the Corporation evaluates the borrower's ability to make monthly payments, the borrower's repayment history and the value of the property securing the loan. The ability and willingness to repay is determined by the borrower's employment history, current financial conditions and credit background. A majority of the properties securing residential real estate loans made by the Corporation are appraised by independent appraisers. The Corporation generally requires mortgage loan borrowers to obtain an attorney's title opinion or title insurance and fire and property insurance, including flood insurance, if applicable.

Residential mortgage loans, home equity term loans and home equity lines of credit generally present a lower level of risk than consumer loans because they are secured by the borrower's primary residence. Risk is increased when the Corporation is in a subordinate position, especially to another lender, for the loan collateral.

Consumer Lending

The Corporation offers a variety of secured and unsecured consumer loans, including vehicle loans, stock loans and loans secured by financial institution deposits. These loans originate primarily within or with customers from the market area.

Consumer loan terms vary according to the type and value of collateral and creditworthiness of the borrower. In underwriting personal loans, a thorough analysis is performed regarding the borrower's willingness and financial ability to repay the loan as agreed. The ability to repay is determined by the borrower's employment history, current financial condition and credit background.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Consumer loans may entail greater credit risk than residential real estate loans, particularly in the case of personal loans which are unsecured or are secured by rapidly depreciable assets, such as automobiles or recreational equipment. In such cases, repossessed collateral for a defaulted personal loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. In addition, personal loan collections are dependent on the borrower's continuing financial stability and therefore, are more likely to be affected by adverse personal circumstances. Furthermore, the application of various federal and state laws, including bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

Generally, a loan is considered to be past-due when scheduled loan payments are in arrears 15 days or more. Delinquent notices are generated automatically when a loan is 15 days past-due. Collection efforts continue on past-due loans that have not been brought current, when it is believed that some chance exists for improvement in the status of the loan. Past-due loans are continually evaluated with the determination for charge-off being made when no reasonable chance remains that the status of the loan can be improved.

Commercial and Industrial and Commercial Real Estate loans are charged off in whole or in part when they become sufficiently delinquent based upon the terms of the underlying loan contract and when a collateral deficiency exists. Because all or part of the contractual cash flows are not expected to be collected, the loan is considered to be impaired, and the Bank estimates the impairment based on its analysis of the cash flows or collateral estimated at fair value less cost to sell.

Residential Real Estate and Consumer loans are charged off when they become sufficiently delinquent based upon the terms of the underlying loan contract and when the value of the underlying collateral is not sufficient to support the loan balance and a loss is expected. At that time, the amount of estimated collateral deficiency, if any, is charged off for loans secured by collateral, and all other loans are charged off in full. Loans with collateral are charged down to the estimated fair value of the collateral less cost to sell.

Loans in which the borrower is in bankruptcy are considered on a case by case basis and are either charged off or reaffirmed by the borrower.

Generally, a loan is classified as non-accrual and the accrual of interest on such a loan is discontinued when the contractual payment of principal or interest has become 90 days past due or management has serious doubts about further collectability of principal or interest, even though the loan may currently be performing. A loan may remain on accrual status if it is well secured (or supported by a strong guarantee) and in the process of collection. When a loan is placed on non-accrual status, unpaid interest credited to income in the current year is reversed and unpaid interest

accrued in prior years is charged against interest income. Certain non-accrual loans may continue to perform; that is, payments are still being received. Generally, the payments are applied to principal. These loans remain under constant scrutiny, and if performance continues, interest income may be recorded on a cash basis based on management's judgment as to collectability of principal.

Allowance for Loan Losses

The allowance for loan losses is established through provisions for loan losses charged against income. Loans deemed to be uncollectible are charged against the allowance for loan losses and subsequent recoveries, if any, are credited to the allowance.

The allowance for loan losses is maintained at a level estimated by management to be adequate to absorb potential loan losses. Management's periodic evaluation of the adequacy of the allowance for loan losses is based on the Corporation's past loan loss experience, known and inherent risks in the portfolio, adverse situations that may affect the borrower's ability to repay (including the timing of future payments), the estimated value of any underlying collateral, composition of the loan portfolio, current economic conditions, and other relevant factors. This evaluation is inherently subjective as it requires material estimates including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The allowance consists of specific, general and unallocated components. The specific component relates to loans that are individually classified as impaired. Select loans are not aggregated for collective impairment evaluation, as such; all loans are subject to individual impairment evaluation should the facts and circumstances pertinent to a particular loan suggest that such evaluation is necessary. Factors considered by management in determining impairment include payment status and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. If a loan is impaired, a portion of the allowance may be allocated so that the loan is reported, net, at the present value of estimated future cash flows using the loan's existing rate or at the fair value of collateral if repayment is expected solely from collateral. Troubled debt restructurings are separately identified for impairment disclosures and are measured at the present value of estimated future cash flows using the loan's effective rate at inception. If a troubled debt restructuring is considered to be a collateral dependent loan, the loans may be reported, net, at the fair value of the collateral. For troubled debt restructurings that subsequently default, the Corporation determines the amount of reserve in accordance with the accounting policy for the allowance for loan losses.

The general component covers all other loans not identified as impaired and is based on historical losses and qualitative factors. The historical loss component of the allowance is determined by losses recognized by portfolio segment over a time period that management has determined represents the current credit cycle. Qualitative factors impacting each portfolio segment may include: delinquency trends, loan volume trends, Bank policy changes, management processes and oversight, economic trends (including change in consumer and business disposable incomes, unemployment and under-employment levels, and other conditions), concentrations by industry or product, internal and external loan review processes, collateral value and market conditions, and external factors including regulatory issues and competition.

The unallocated component of the allowance is maintained to cover uncertainties that could affect management's estimate of probable losses. The unallocated component of the allowance reflects the margin of imprecision inherent in the underlying assumptions used in the methodologies for estimating specific and general losses in the portfolio.

The Corporation is subject to periodic examination by its federal and state examiners, and may be required by such regulators to recognize additions to the allowance for loan losses based on their assessment of credit information available to them at the time of their examinations.

A loan is considered impaired when, based on current information and events, it is probable that the Bank will be unable to collect all amounts due according to the contractual terms of the original loan agreement. Under current

accounting standards, the allowance for loan losses related to impaired loans is based on discounted cash flows using the loan's effective interest rate at inception or the fair value of the collateral for certain collateral dependent loans.

The restructuring of a loan is considered a "troubled debt restructuring" if both the following conditions are met: (i) the borrower is experiencing financial difficulties, and (ii) the Bank has granted a concession. The most common concessions granted include one or more modifications to the terms of the debt, such as (a) a reduction in the interest rate for the remaining life of the debt, (b) an extension of the maturity date at an interest rate lower than the current market rate for new debt with similar risk, (c) a temporary period of interest-only payments, and (d) a reduction in the contractual payment amount for either a short period or remaining term of the loan. A less common concession is the forgiveness of a portion of the principal.

The determination of whether a borrower is experiencing financial difficulties takes into account not only the current financial condition of the borrower, but also the potential financial condition of the borrower were a concession not granted. Similarly, the determination of whether a concession has been granted is very subjective in nature. For example, simply extending the term of a loan at its original interest rate or even at a higher interest rate could be interpreted as a concession unless the borrower could readily obtain similar credit terms from a different lender.

Loans modified in a troubled debt restructuring are considered impaired and may or may not be placed on non-accrual status until the Bank determines the future collection of principal and interest is reasonably assured, which generally requires that the borrower demonstrates a period of performance according to the restructured terms of six months.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The Bank utilizes a risk grading matrix as a tool for managing credit risk in the loan portfolio and assigns an asset quality rating (risk grade) to all Residential Real Estate, Consumer, Commercial and Industrial, and Commercial Real Estate borrowings. An asset quality rating is assigned using the guidance provided in the Bank's loan policy. Primary responsibility for assigning the asset quality rating rests with the lender. The asset quality rating is validated periodically by both an internal and external loan review process.

The commercial loan grading system focuses on a borrower's financial strength and performance, experience and depth of management, primary and secondary sources of repayment, the nature of the business and the outlook for the particular industry. Primary emphasis is placed on the financial condition and trends. The grade also reflects current economic and industry conditions; as well as other variables such as liquidity, cash flow, revenue/earnings trends, management strengths or weaknesses, quality of financial information, and credit history.

The loan grading system for Residential Real Estate and Consumer loans focuses on the borrower's credit score and credit history, debt-to-income ratio and income sources, collateral position and loan-to-value ratio, as well as other variables such as current economic conditions, and individual strengths and weaknesses.

Risk grade characteristics are as follows:

Risk Grade 1 – MINIMAL RISK through Risk Grade 6 – MANAGEMENT ATTENTION (Pass Grade Categories)

Risk is evaluated via examination of several attributes including but not limited to financial trends, strengths and weaknesses, likelihood of repayment when considering both cash flow and collateral, sources of repayment, leverage position, management expertise, and repayment history.

At the low-risk end of the rating scale, a risk grade of 1 - Minimal Risk is the grade reserved for loans with exceptional credit fundamentals and virtually no risk of default or loss. Loan grades then progress through escalating ratings of 2 through 6 based upon risk. Risk Grade 2 - Modest Risk are loans with sufficient cash flows; Risk Grade 3 - Average Risk are loans with key balance sheet ratios slightly above the borrower's peers; Risk Grade 4 - Acceptable Risk are loans with key balance sheet ratios usually near the borrower's peers, but one or more ratios may be higher; and Risk Grade 5 – Marginally Acceptable are loans with strained cash flow, increasing leverage and/or weakening markets. Risk Grade 6 - Management Attention are loans with weaknesses resulting from declining performance trends and the borrower's cash flows may be temporarily strained. Loans in this category are performing according to

terms, but present some type of potential concern.

Risk Grade 7 – SPECIAL MENTION (Non-Pass Category)

Generally, these loans or assets are currently protected, but are “Potentially Weak”. They constitute an undue and unwarranted credit risk but not to the point of justifying a classification of substandard.

Assets in this category are currently protected but have potential weakness which may, if not checked or corrected, weaken the asset or inadequately protect the Bank’s credit position at some future date. No loss of principal or interest is envisioned; however, they constitute an undue credit risk that may be minor but is unwarranted in light of the circumstances surrounding a specific asset. Risk is increasing beyond that at which the loan originally would have been granted. Historically, cash flows are inconsistent; financial trends show some deterioration. Liquidity and leverage are above industry averages. Financial information could be incomplete or inadequate. A Special Mention asset has potential weaknesses that deserve management’s close attention.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Risk Grade 8 – SUBSTANDARD (Non-Pass Category)

Generally, these assets are inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged, if any. Assets so classified must have “well-defined” weaknesses that jeopardize the full liquidation of the debt.

They are characterized by the distinct possibility that the Bank will sustain some loss if the aggregate amount of substandard assets is not fully covered by the liquidation of the collateral used as security. Substandard loans have a high probability of payment default; are inadequately protected by the current sound net worth, paying capacity of the borrower, or pledged collateral; and may have other well-defined weaknesses. Such assets require more intensive supervision by Bank Management.

Risk Grade 9 – DOUBTFUL (Non-Pass Category)

Generally, loans graded doubtful have all the weaknesses inherent in a substandard loan with the added factor that the weaknesses are pronounced to a point whereby the basis of current information, conditions, and values, collection or liquidation in full is deemed to be highly improbable. The possibility of loss is extremely high, but because of certain important and reasonably specific pending factors that may work to strengthen the asset, its classification is deferred until, for example, a proposed merger, acquisition, liquidation procedure, capital injection, perfection of liens on additional collateral and/or refinancing plan is completed. Loans are graded doubtful if they contain weaknesses so serious that collection or liquidation in full is questionable.

Premises and Equipment

Premises, improvements, and equipment are stated at cost less accumulated depreciation computed principally utilizing the straight-line method over the estimated useful lives of the assets. Long-lived assets are reviewed for impairment whenever events or changes in business circumstances indicate that the carrying value may not be recovered. Maintenance and minor repairs are charged to operations as incurred. The cost and accumulated depreciation of the premises and equipment retired or sold are eliminated from the property accounts at the time of retirement or sale, and the resulting gain or loss is reflected in current operations.

Mortgage Servicing Rights

The Corporation originates and sells real estate loans to investors in the secondary mortgage market. After the sale, the Corporation may retain the right to service these loans. When originated mortgage loans are sold and servicing is retained, a servicing asset is capitalized based on relative fair value at the date of sale. Servicing assets are amortized as an offset to other fees in proportion to, and over the period of, estimated net servicing income. The servicing asset is included in other assets in the Consolidated Balance Sheets. Gains or losses on sales of mortgage loans are recognized based on the differences between the selling price and the carrying value of the related mortgage loans sold.

Bank Owned Life Insurance

The cash surrender value of bank owned life insurance is carried as an asset, and changes in cash surrender value are recorded as non-interest income.

The Bank entered into agreements to provide post-retirement benefits to two retired employees in the form of life insurance payable to the employee's estate upon their death through endorsement split dollar life insurance arrangements. The Bank's accrued liabilities for this benefit agreement as of December 31, 2014 and 2013 was \$60,000 and \$57,000, respectively. The related expense for this benefit agreement amounted to \$3,000, \$2,000 and \$2,000 for the years ended December 31, 2014, 2013 and 2012, respectively.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Investments in Low-Income Housing Partnerships

The Bank is a limited partner in real estate ventures that own and operate affordable residential low-income housing apartment buildings for elderly and mentally challenged adult residents. The investments are accounted for under the effective yield method. Under the effective yield method, the Bank recognizes tax credits as they are allocated and amortizes the initial cost of the investment to provide a constant effective yield over the period that the tax credits are allocated to the Bank. Under this method, the tax credits allocated, net of any amortization of the investment in the limited partnerships, are recognized in the consolidated statements of income as a component of income tax expense. The amount of tax credits allocated to the Bank were \$230,000 in 2014, \$267,000 in 2013, and \$277,000 in 2012, and the amortization of the investments in the limited partnerships were \$159,000, \$191,000 and \$183,000 in 2014, 2013 and 2012, respectively.

Goodwill and Core Deposit Intangibles

Goodwill resulted from the acquisition of the Pocono Community Bank in November 2007 and of certain fixed and operating assets acquired and deposit liabilities assumed of the branch of another financial institution in Danville, Pennsylvania, in January 2004. Such goodwill represents the excess cost of the acquired assets relative to the assets fair value at the dates of acquisition. During the first quarter of 2008, \$152,000 of liabilities related to the Pocono acquisition were recorded as a purchase accounting adjustment resulting in an increase in the excess purchase price. The amount was comprised of the finalization of severance agreements and contract terminations related to the acquisition. In accordance with current accounting standards, goodwill is not amortized. Management performs an annual evaluation for impairment. Any impairment of goodwill results in a charge to income. The Corporation periodically assesses whether events or changes in circumstances indicate that the carrying amounts of goodwill and other intangible assets may be impaired. Goodwill is evaluated for impairment at the reporting unit level and an impairment loss is recorded to the extent that the carrying amount of goodwill exceeds its implied fair value. The Corporation has evaluated the goodwill included in its consolidated balance sheet at September 30, 2014, and has determined there was no impairment as of that date. In addition, the Corporation did not identify any impairment in 2013 or 2012. No assurance can be given that future impairment tests will not result in a charge to earnings.

Intangible assets are comprised of core deposit intangibles and premium discount (negative premium) on certificates of deposit acquired. The core deposit intangible is being amortized over the average life of the deposits acquired as determined by an independent third party. Premium discount (negative premium) on acquired certificates of deposit resulted from the valuation of certificate of deposit accounts by an independent third party. The book value of certificates of deposit acquired was greater than their fair value at the date of acquisition which resulted in a negative premium due to higher cost of the certificates of deposit compared to the cost of similar term financing. The core deposit intangible is subject to impairment testing whenever events or changes in circumstances indicate its carrying

amount may not reflect its benefit.

Foreclosed Assets Held for Resale

Real estate properties acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value less costs to sell on the date of foreclosure establishing a new cost basis. After foreclosure, valuations are periodically performed and if fair value less costs to sell declines subsequent to foreclosure, a valuation allowance is recorded through expense. Revenues derived from and costs to maintain the assets and subsequent gains and losses on sales are included in non-interest expense on the Consolidated Statements of Income.

Income Taxes

The Corporation accounts for income taxes in accordance with income tax accounting guidance FASB ASC Topic 740, *Income Taxes*.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Current income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. The Corporation determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur.

Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of the evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

The Corporation accounts for uncertain tax positions if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more-likely-than-not means a likelihood of more than 50%; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50% likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment.

The Corporation recognizes interest and penalties on income taxes, if any, as a component of income tax expense.

Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing net income by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Corporation. Potential common shares that may be issued by the Corporation relate solely to outstanding stock options and are determined using the treasury stock method. The following table sets forth the computation of basic and diluted earnings per share.

(In thousands, except earnings per share)

	Year Ended December 31,		
	2014	2013	2012
Net income	\$10,211	\$10,273	\$10,170
Weighted-average common shares outstanding	5,538	5,481	5,455
Basic earnings per share	\$1.84	\$1.87	\$1.86
Weighted-average common shares outstanding	5,538	5,481	5,455
Common stock equivalents due to effect of stock options	4	5	12
Total weighted-average common shares and equivalents	5,542	5,486	5,467
Diluted earnings per share	\$1.84	\$1.87	\$1.86

Trust Assets and Revenues

Property held by the Corporation in a fiduciary or agency capacity for its customers is not included in the accompanying consolidated financial statements since such items are not assets of the Corporation. Assets held in Trust were \$111,513,000 and \$102,665,000 at December 31, 2014 and 2013, respectively. Trust Department income is generally recognized on a cash basis and is not materially different than if it were reported on an accrual basis.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Recent Accounting Standards Updates (“ASU”)

Except as disclosed below, there were no new accounting pronouncements affecting the Corporation during the year ended December 31, 2014 that were not already adopted by the Corporation in previous periods.

In January 2014, the Financial Accounting Standards Board (“FASB”) issued ASU 2014-01, *Investments – Equity Method and Joint Ventures (Topic 323)*. The ASU provides guidance on accounting for investments by a reporting entity in flow-through limited liability entities that manage or invest in affordable housing projects that qualify for the low-income housing tax credit. This ASU is effective for annual periods and interim reporting periods within those annual periods beginning after December 15, 2014, and will be applied retrospectively to all periods presented. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

In January 2014, the FASB issued ASU 2014-04, *Receivables – Troubled Debt Restructurings by Creditors (Subtopic 310-40)*. The ASU clarifies that a creditor is considered to have physical possession of residential real estate that is collateral for a residential mortgage loan when it obtains legal title to the collateral or a deed in lieu of foreclosure or similar legal agreement is completed. Consequently, the creditor should reclassify the loan to other real estate owned at that time. The new guidance is intended to resolve the diversity in current practice as to when a creditor should reclassify a loan to other real estate on the balance sheet. This ASU is effective for annual periods beginning after December 15, 2014, and interim periods within those annual periods after December 15, 2015. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*, which supersedes the revenue requirements in *Revenue Recognition (Topic 605)*. This ASU requires entities to recognize revenue when it transfers promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled to in exchange for those goods or services. The ASU is effective for annual reporting periods beginning after December 31, 2016, including interim periods within the reporting period. Early application is not permitted. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

In August 2014, the FASB issued ASU 2014-14, *Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure*. The ASU addresses the classification of certain foreclosed mortgage loans held by creditors that are either fully or partially guaranteed under government programs, whereby creditors will reclassify these loans to “other receivables” upon foreclosure. The ASU is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

In September 2014, the FASB issued ASU No. 2014-11, *Transfers and Servicing (Topic 860)*. The ASU provides guidance on accounting for repurchase-to-maturity transactions and certain linked repurchase financings. This guidance will result in accounting for both types of arrangements as secured borrowings on the balance sheet. Additionally, the ASU introduces new disclosures to (i) increase transparency about the types of collateral pledged in secured borrowing transactions and (ii) enable users to better understand transactions in which the transferor retains substantially all of the exposure to the economic return on the transferred financial asset throughout the term of the transaction. This ASU is effective for annual periods beginning after December 15, 2014, and for interim periods beginning after March 15, 2015. The Corporation is currently evaluating the impact of this ASU on its consolidated financial statements.

Advertising Costs

It is the Corporation's policy to expense advertising costs in the period in which they are incurred.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Transfer of Financial Assets

Transfers of financial assets are accounted for as sales when control over assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Corporation, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Corporation does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity.

Off-Balance Sheet Financial Instruments

In the ordinary course of business, the Bank has entered into off-balance sheet financial instruments consisting of commitments to extend credit and letters of credit. Such financial instruments are recorded in the consolidated balance sheet when they are funded.

Reclassifications

Certain amounts previously reported have been reclassified, when necessary, to conform with presentations used in the 2014 consolidated financial statements. Such reclassifications have no effect on the Corporation's net income.

NOTE 2 — RESTRICTED CASH BALANCES

The Bank is required to maintain certain average reserve balances as established by the Federal Reserve Bank. The amount of those reserve balances for the reserve computation period which included December 31, 2014 and 2013, was \$1,189,000 and \$1,296,000, respectively, which was satisfied through the restriction of vault cash. In addition, the Bank maintains a clearing balance at the Federal Reserve Bank to offset daily cash management activities and specific charges for services. At December 31, 2014 and 2013, the amount of this balance was \$414,000 and \$22,358,000, respectively.

NOTE 3 — INVESTMENT SECURITIES

The amortized cost, related estimated fair value, and unrealized gains and losses for investment securities classified as “Available-For-Sale” or “Held-to-Maturity” were as follows at December 31, 2014 and 2013:

(Dollars in thousands)	Available-for-Sale Securities			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
December 31, 2014:

Securities Available-for-Sale with an aggregate fair value of \$222,847,000 at December 31, 2014 and \$242,839,000 at December 31, 2013, and securities Held-to-Maturity with an aggregate book value of \$1,056,000 at December 31, 2014 and \$1,072,000 at December 31, 2013, were pledged to secure public funds, trust funds, securities sold under agreements to repurchase, FHLB advances and other balances of \$155,895,000 at December 31, 2014 and \$178,814,000 at December 31, 2013.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The amortized cost and fair value of securities, by contractual maturity, are shown below at December 31, 2014. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)

	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
1 year or less	\$3,002	\$3,037	\$1,000	\$1,002
Over 1 year through 5 years	25,650	26,130		
Over 5 years through 10 years	103,919	103,826		
Over 10 years	95,095	99,904		
Mortgage-backed securities	112,146	112,714	56	58
Marketable equity securities	1,208	2,055		
	\$341,020	\$347,666	\$1,056	\$1,060

There were no aggregate investments with a single issuer (excluding the U.S. Government and its political subdivisions and agencies) which exceeded ten percent of consolidated stockholders' equity at December 31, 2014. The quality rating of the obligations of state and political subdivisions are generally investment grade, as rated by Moody's, Standard and Poor's or Fitch. The typical exceptions are local issues which are not rated, but are secured by the full faith and credit obligations of the communities that issued these securities.

Proceeds from sales of investments in Available-for-Sale debt and equity securities during 2014, 2013 and 2012 were \$195,847,000, \$79,981,000 and \$49,235,000, respectively. Gross gains realized on these sales were \$3,354,000, \$3,546,000 and \$1,762,000, respectively. Gross losses on these sales were \$598,000, \$646,000 and \$949,000, respectively. There were no other-than-temporary impairment losses during 2014, 2013 and 2012.

There were no proceeds from sales of investments in Held-to-Maturity debt and equity securities during 2014, 2013 and 2012. Therefore, there were no gains or losses realized during these periods.

Management evaluates securities for other-than-temporary impairment ("OTTI") at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation. Investment securities classified as available-for-sale or held-to-maturity are generally evaluated for OTTI under FASB ASC 320, *Investments - Debt and Equity Securities*. In determining OTTI under the FASB ASC 320 model, management considers many factors,

including (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions, and (4) whether the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary decline exists involves a high degree of subjectivity and judgment and is based on the information available to management at a point in time.

When other-than-temporary impairment occurs on debt securities, the amount of the other-than-temporary impairment recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis less any current-period credit loss, the other-than-temporary impairment shall be recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If an entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis less any current-period loss, the other-than-temporary impairment shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is determined based on the present value of cash flows expected to be collected, and the realized loss is recognized in net investment securities gains on the Consolidated Statements of Income. The amount of the total other-than-temporary impairment related to the other factors shall be recognized in other comprehensive income, net of applicable taxes. The previous amortized cost basis less the other-than-temporary impairment recognized in earnings shall become the new amortized cost basis of the investment.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The fair market value of the equity securities tends to fluctuate with the overall equity markets as well as the trends specific to each institution. The equity securities portfolio is reviewed in a similar manner as that of the debt securities with greater emphasis placed on the length of time the market value has been less than the carrying value and the financial sector outlook. The Corporation also reviews dividend payment activities, levels of non-performing assets and loan loss reserves. The starting point for the equity analysis is the length and severity of market value decline. The realized loss is recognized in net investment securities gains on the Consolidated Statements of Income. The amount of the total other-than-temporary impairment is recognized in other comprehensive income, net of applicable taxes.

The Corporation and its investment advisors monitor the entire portfolio monthly with particular attention given to securities in a continuous loss position of at least ten percent for over twelve months. Based on the factors described above, management did not consider any securities to be other-than-temporarily impaired at December 31, 2014, 2013 and 2012.

In accordance with disclosures required by FASB ASC 320-10-50, *Investments - Debt and Equity Securities*, the summary below shows the gross unrealized losses and fair value of the Corporation's investments, aggregated by investment category, that individual securities have been in a continuous unrealized loss position for less than 12 months or 12 months or more as of December 31, 2014 and 2013:

December 31, 2014

	\$178,689	\$ (6,373)	\$ —	\$ —	\$178,689	\$ (6,373)

The Corporation invests in various forms of agency debt including mortgage backed securities and callable debt. The mortgage backed securities are issued by FHLMC (“Federal Home Loan Mortgage Corporation”) or FNMA (“Federal National Mortgage Association”). The municipal securities consist of general obligations and revenue bonds. The marketable equity securities consist of stocks in other bank holding companies. The fair market value of the above securities is influenced by market interest rates, prepayment speeds on mortgage securities, bid-offer spreads in the market place and credit premiums for various types of agency debt. These factors change continuously and therefore the market value of these securities may be higher or lower than the Corporation’s carrying value at any measurement date. Management does not believe any of their 39 securities with a one year or less unrealized loss position or any of their 29 securities with a greater than one year unrealized loss position as of December 31, 2014, represent an other-than-temporary impairment, as these unrealized losses relate principally to changes in interest rates subsequent to the acquisition of the specific securities.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Commercial and Industrial and Commercial Real Estate include loans categorized as tax-free loans in the amounts of \$30,334,000 and \$3,235,000 at December 31, 2014 and \$27,299,000 and \$3,945,000 at December 31, 2013. Loans held for sale amount to \$2,201,000 at December 31, 2014 and \$0 at December 31, 2013.

The activity in the allowance for loan losses, by loan segment, is summarized below for the years indicated.

(Dollars in thousands)	Commercial and Industrial	Commercial Real Estate	Residential Real Estate	Consumer	Unallocated	Total
2014

From time to time, the Bank may agree to modify the contractual terms of a borrower's loan. In cases where the modifications represent a concession to a borrower experiencing financial difficulty, the modification is considered a troubled debt restructuring ("TDR").

The outstanding balance of TDRs as of December 31, 2014 and December 31, 2013 was \$4,708,000 and \$3,961,000, respectively. The increase in TDRs was attributable to deterioration in the respective borrowers' financial position, and in some cases a declining collateral value, along with the Bank's proactive monitoring of the loan portfolio. As of December 31, 2014 and 2013, there were no unfunded commitments on any TDRs.

For the year ended December 31, 2014, fourteen loans with a combined post modification balance of \$1,880,000 were classified as TDRs compared to the year ended December 31, 2013 when thirteen loans with a combined post modification balance of \$4,382,000 were classified as TDRs. The loan modifications for the year ended December 31, 2014 consisted of one interest rate modification, four term modifications beyond the original stated term, and nine payment modifications. The loan modifications for the year ended December 31, 2013 consisted of four interest rate modifications, two term modifications beyond the original stated term, and seven payment modifications.

The following table presents the unpaid balance of TDRs at the dates indicated:

(Dollars in thousands)

	December 31, 2014	December 31, 2013
Non-accrual TDRs	\$ 1,638	\$ 1,538
Accruing TDRs	3,070	2,423
Total	\$ 4,708	\$ 3,961

At December 31, 2014, five Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$2,087,000 were not in compliance with the terms of their restructure, compared to December 31, 2013 when three Commercial Real Estate loans classified as TDRs with a combined recorded investment of \$386,000 were not in compliance with the terms of their restructure.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The following table presents information regarding the loan modifications categorized as TDRs during the years ended December 31, 2014 and December 31, 2013:

(Dollars in thousands, except number of contracts)

	Year Ended December 31, 2014			
	Pre-Modification Number of Contracts	Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Year-End Recorded Investment
Commercial and Industrial	3	\$ 397	\$ 397	\$ 394

Commercial and Industrial	\$399	\$ 545	\$ —	\$21	\$ 167	\$ —
Commercial Real Estate	\$5,350	\$ 5,800	\$ 38	\$5,022	\$ 5,715	\$ 125
Residential Real Estate	\$1,291	\$ 1,461	\$ 81	\$931	\$ 1,239	\$ 15
Consumer	\$4	\$ 4	\$ —	\$—	\$ —	\$ —

At December 31, 2014 and 2013, \$4,708,000 and \$3,961,000 of loans classified as TDRs were included in impaired loans with a total allocated allowance of \$27,000 and \$0, respectively. The recorded investment represents the loan balance reflected on the Consolidated Balance Sheets net of any charge-offs. The unpaid balance is equal to the gross amount due on the loan.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The average recorded investment and interest income recognized for the Corporation's impaired loans are summarized below for the years ended December 31, 2014, 2013 and 2012.

(Dollars in thousands)

	For the Year Ended December 31, 2014		For the Year Ended December 31, 2013		For the Year Ended December 31, 2012	
	Average Recorded Investment	Interest Income Recognized	Average Recorded Investment	Interest Income Recognized	Average Recorded Investment	Interest Income Recognized
With no related allowance recorded:

Loan receivables on non-accrual status, foreclosed assets held for resale and loans past-due 90 days or more and still accruing, as of December 31, 2014 and 2013 were as follows:

(Dollars in thousands)

	December 31, 2014	December 31, 2013
Commercial and Industrial	\$ 5	\$ 21
Commercial real estate	2,678	2,599
Residential real estate	1,291	931

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

Total non-accrual loans	3,974	3,551
Foreclosed assets held for resale	55	480
Loans past-due 90 days or more and still accruing	10	318
Total non-performing assets	\$ 4,039	\$ 4,349

If interest on non-accrual loans had been accrued at original contract rates, interest income would have increased by \$159,000 in 2014, \$140,000 in 2013, and \$96,000 in 2012.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The following tables present the classes of the loan portfolio summarized by the past-due status at December 31, 2014 and 2013:

(Dollars in thousands)

	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due	Total Past Due	Current	Total Loans	90 Days Or Greater Past Due and Still Accruing
December 31, 2014:

Consumer	27	8		35	5,295	5,330	
Total	\$ 3,754	\$ 873	\$ 3,600	\$ 8,227	\$479,234	\$487,461	\$ 10

(Dollars in thousands)

	30-59 Days Past Due	60-89 Days Past Due	90 Days or Greater Past Due	Total Past Due	Current	Total Loans	90 Days Or Greater Past Due and Still Accruing
December 31, 2013:							
Commercial and Industrial	\$ 7	\$ 7	\$ 40	\$ 54	\$60,768	\$60,822	\$ 19
Commercial Real Estate	875	653	1,367	2,895	222,510	225,405	180
Residential Real Estate	1,751	248	926	2,925	151,750	154,675	119
Consumer	30	12		42	5,574	5,616	
Total	\$ 2,663	\$ 920	\$ 2,333	\$ 5,916	\$440,602	\$446,518	\$ 318

At December 31, 2014 and 2013, there were no commitments to lend additional funds with respect to impaired loans.

NOTE 5 — MORTGAGE SERVICING RIGHTS

The mortgage loans sold and serviced for others are not included in the Consolidated Balance Sheets. The unpaid principal balances of mortgage loans serviced for others were \$92,175,000 and \$89,712,000 at December 31, 2014 and 2013, respectively. The balances of amortized capitalized mortgage servicing rights, included in other assets at December 31, 2014 and 2013, were \$481,000 and \$521,000, respectively.

The following summarizes mortgage servicing rights capitalized and amortized for the years 2014, 2013 and 2012:

(Dollars in thousands)

	2014	2013	2012
Balance, January 1	\$521	\$478	\$421
Servicing asset additions	83	193	230
Amortization	(123)	(150)	(173)
Balance, December 31	\$481	\$521	\$478

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

NOTE 6 — PREMISES AND EQUIPMENT

Premises and equipment at December 31, 2014 and 2013 is as follows:

(Dollars in thousands)

	2014	2013
Land	\$3,180	\$3,180
Buildings	19,062	19,130
Leasehold improvements	286	286
Equipment	7,938	8,236
	30,466	30,832
Less: Accumulated depreciation	9,595	9,316
Total	\$20,871	\$21,516

Depreciation amounted to \$1,279,000 for 2014, \$1,151,000 for 2013 and \$1,023,000 for 2012.

The banking subsidiary leases land and a bank building in Stroudsburg, Pennsylvania, under a lease expiring in 2017. Please refer to Note 13 — Commitments and Contingencies. Included in buildings above is the bank building held under a capital lease with a cost of \$948,000 at December 31, 2014 and 2013, and accumulated amortization of \$810,000 and \$762,000 at December 31, 2014 and 2013, respectively. Amortization of the bank building held under the capital lease was \$48,000 for the year ended December 31, 2014, \$47,000 for the year ended December 31, 2013 and \$48,000 for the year ended December 31, 2012.

NOTE 7 — CORE DEPOSIT INTANGIBLES

Core deposit intangibles were comprised of the following at December 31, 2014 and 2013:

(Dollars in thousands)

Gross	Accumulated
-------	-------------

	Carrying Amount		Amortization	
	2014	2013	2014	2013

Core deposit intangibles	\$ 2,218	\$ 2,218	\$ 2,096	\$ 1,823
--------------------------	----------	----------	----------	----------

Amortization expense of the core deposit intangibles was \$273,000, \$273,000 and \$283,000 for each the years ended December 31, 2014, 2013 and 2012, respectively.

Estimated amortization for the year ending December 31, 2015 is \$122,000.

NOTE 8 — DEPOSITS

Major classifications of deposits at December 31, 2014 and 2013 consisted of:

(Dollars in thousands)

	2014	2013
Non-interest bearing demand	\$96,530	\$85,156
Interest bearing demand	185,511	208,883
Savings	177,865	164,138
Time certificates of deposits less than \$100,000	128,419	148,155
Time certificates of deposits \$100,000 or greater	72,092	82,592
Other time	1,145	1,151
Total deposits	\$661,562	\$690,075

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The following is a schedule reflecting classification and remaining maturities of time deposits at December 31, 2014:

(Dollars in thousands)	Year Ending	
	2015	\$91,231
	2016	33,109
	2017	24,389
	2018	14,301
	2019	32,153
	Thereafter	6,473
		\$201,656

At December 31, 2014, the largest two depositors had aggregate deposits of approximately \$83,023,000 as follows:

School district	\$47,123,000
School district	35,900,000
Total	\$83,023,000

NOTE 9 — SHORT-TERM BORROWINGS

Short-term borrowings include federal funds purchased, securities sold under agreements to repurchase, Federal Discount Window, and Federal Home Loan Bank (“FHLB”) advances, which generally represent overnight or less than 30-day borrowings.

Short-term borrowings and weighted-average interest rates at December 31, 2014 and 2013 are as follows:

(Dollars in thousands)

	2014		2013	
	Amount	Average Rate	Amount	Average Rate
Federal funds purchased	\$—	0.76 %	\$—	0.00 %
Securities sold under agreements to repurchase	16,730	0.24 %	16,261	0.41 %

Federal Discount Window		0.75	%		0.00	%
Federal Home Loan Bank	56,393	0.30	%	51,972	0.25	%
	\$73,123	0.28	%	\$68,233	0.35	%

At December 31, 2014, the maximum borrowing capacity of federal funds purchased and the Federal Discount Window was \$10,000,000 and \$4,193,000, respectively. Please refer to Note 10 Long-Term Borrowings for the Corporation's maximum borrowing capacity at FHLB.

Securities Sold Under Agreements to Repurchase (“Repurchase Agreements”)

The Corporation enters into agreements under which it sells securities subject to an obligation to repurchase the same or similar securities. Under these arrangements, the Corporation may transfer legal control over the assets but still retain effective control through an agreement that both entitles and obligates the Corporation to repurchase the assets.

As a result, these repurchase agreements are accounted for as collateralized financing agreements (i.e., secured borrowings) and not as a sale and subsequent repurchase of securities. The obligation to repurchase the securities is reflected as a liability on the Corporation's Consolidated Balance Sheets, while the securities underlying the repurchase agreements remain in the respective investment securities asset accounts. In other words, there is not offsetting or netting of the investment securities assets with the repurchase agreement liabilities. In addition, as the Corporation does not enter into reverse repurchase agreements, there is no such offsetting to be done with the repurchase agreements.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The right of setoff for a repurchase agreement resembles a secured borrowing, whereby the collateral would be used to settle the fair value of the repurchase agreement should the Corporation be in default (e.g., fails to make an interest payment to the counterparty). The collateral is held by a correspondent bank in the counterparty's custodial account. The counterparty has the right to sell or repledge the investment securities.

The following table presents the short-term borrowings subject to an enforceable master netting arrangement or repurchase agreements as of December 31, 2014 and 2013.

(Dollars in thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Consolidated Balance Sheet	Net Amounts of Liabilities Presented in the Consolidated Balance Sheet	Financial Instruments	Cash Collateral Pledge	Net Amount
December 31, 2014						
Repurchase agreements (a)	\$ 16,730	\$ —	\$ 16,730	\$ (16,730)	\$ —	\$ —
December 31, 2013						
Repurchase agreements (a)	\$ 16,261	\$ —	\$ 16,261	\$ (16,261)	\$ —	\$ —

(a) As of December 31, 2014 and 2013, the fair value of securities pledged in connection with repurchase agreements was \$26,094,000 and \$26,575,000, respectively.

NOTE 10 — LONG-TERM BORROWINGS

Long-term borrowings are comprised of advances from FHLB and a capital lease assumed as a result of the acquisition of Pocono Community Bank. The long-term capital lease balance was \$339,000 and \$429,000 as of December 31, 2014 and 2013. Long-term capital lease scheduled maturities as of December 31, 2014 are: \$107,000 in 2015, \$116,000 in 2016 and \$116,000 in 2017.

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

Under terms of a blanket agreement, collateral for the FHLB loans is certain qualifying assets of the Corporation's banking subsidiary. The principal assets are real estate mortgages and certain investment securities.

A schedule of long-term borrowings by maturity as of December 31, 2014 and 2013 follows:

(Dollars in thousands)

	2014	2013
Due 2014, 1.49%	\$—	\$5,000
Due 2016, 2.69%	5,000	5,000
Due 2017, 1.07%	10,000	
Due 2018, 1.27% to 4.86%	23,000	18,000
Due 2019, 1.79% to 2.11%	20,000	5,000
Due 2020, 1.95%	5,000	5,000
Due 2028, 5.14%	2,000	2,000
	\$65,000	\$40,000

The Corporation's long-term borrowings consist of one adjustable rate convertible note and the remaining notes are at fixed interest rates. At December 31, 2014, the Corporation's maximum borrowing capacity at FHLB, which takes into account FHLB long-term notes and FHLB short-term borrowings, was \$260,500,000.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

NOTE 11 — INCOME TAXES

The current and deferred components of the income tax expense consisted of the following:

(Dollars in thousands)	2014	2013	2012
Federal			
Current	\$2,571	\$2,485	\$2,201
Deferred	46	(260)	(195)
Income tax expense	\$2,617	\$2,225	\$2,006

The following is a reconciliation between the income tax expense and the amount of income taxes which would have been provided at the statutory rate of 34%:

(Dollars in thousands)	2014		2013		2012	
	Amount	Rate	Amount	Rate	Amount	Rate
Federal income tax at statutory rate	\$4,362	34.0%	\$4,249	34.0 %	\$4,140	34.0 %
Tax-exempt income	(1,162)	(9.1)	(1,563)	(12.5)	(1,738)	(14.3)
Low-income housing credits	(230)	(1.8)	(266)	(2.1)	(294)	(2.4)
Bank owned life insurance income	(231)	(1.8)	(234)	(1.9)	(246)	(2.0)
Other	(122)	(0.9)	39	0.3	144	1.2

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

A valuation allowance for deferred tax assets was recorded at December 31, 2014 and 2013 in the amount of \$20,000. The valuation allowance relates to state net operating loss carryforwards for which realizability is uncertain. At December 31, 2014 and 2013, the Corporation had state net operating loss carryforwards of \$459,000 and \$341,000, respectively, which are available to offset future state taxable income, and expire at various dates through 2034. At December 31, 2014 and 2013, the Corporation had no valuation allowance established against its low-income housing tax credit carryforward or alternative minimum tax credit carryforward, as management believes the Corporation will generate sufficient future taxable income to fully utilize these deferred tax assets. The low-income housing credit carryforward will expire between 2017 and 2022, and the alternative minimum tax credit carryforward has no expiration.

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during periods in which those temporary differences become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income and tax planning strategies in making this assessment. Based on the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible and tax planning strategies, management believes it is more likely than not that the Corporation will realize the benefits of these deferred tax assets, net of any valuation allowance at December 31, 2014.

The Corporation did not have any uncertain tax positions at December 31, 2014 and 2013.

The Corporation and its subsidiary file a consolidated federal income tax return. The Corporation is no longer subject to examination by Federal or State taxing authorities for the years before 2011.

NOTE 12 — EMPLOYEE BENEFIT PLANS AND DEFERRED COMPENSATION AGREEMENTS

The Corporation maintains a 401k Plan which has a combined tax qualified savings feature and profit sharing feature for the benefit of its employees. Effective January 1, 2014, the plan became a Safe Harbor Plan. Under the savings feature, the Corporation makes safe harbor matching contributions of 100% of the first 3% of compensation an employee contributes to the Plan and 50% of the next 2% of compensation an employee contributes to the Plan. In 2014, the safe harbor matching contributions amounted to \$280,000. In 2013 and 2012, under the previous savings feature, the Corporation matched 100% of the employee contributions up to 3% of compensation which amounted to \$206,000 and \$190,000 respectively. Under the profit sharing feature, contributions, at the discretion of the Board of

Directors, are funded currently and amounted to \$431,000, \$558,000 and \$488,000 in 2014, 2013 and 2012, respectively.

The Bank also has non-qualified deferred compensation agreements with three of its officers and four retired officers. These agreements are essentially unsecured promises by the Bank to make monthly payments to the officers over a twenty year period. Payments begin based upon specific criteria — generally, when the officer retires. To account for the cost of payments yet to be made in the future, the Bank recognizes an accrued liability in years prior to when payments begin based on the present value of those future payments. The Bank's accrued liability for these deferred compensation agreements as of December 31, 2014 and 2013, was \$1,494,000 and \$1,454,000, respectively. The related expense for these agreements amounted to \$137,000, \$154,000 and \$150,000 in 2014, 2013 and 2012, respectively.

NOTE 13 — COMMITMENTS AND CONTINGENCIES

The Corporation's banking subsidiary currently leases three branch banking facilities and one parcel of land under operating leases. Rent expense for the years ended December 31, 2014, 2013 and 2012 was \$122,000, \$142,000 and \$301,000, respectively. Minimum rental payments required under these operating leases are: 2015 - \$124,000, 2016 - \$95,000, 2017 - \$101,000, 2018 - \$101,000, and 2019 - \$77,000, and thereafter \$2,648,000.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The banking subsidiary leases land and a bank building in Stroudsburg, Pennsylvania, under a lease expiring in 2017. This lease has an operating lease commitment and a capital lease component. Minimum future rental payments as of December 31, 2014 under this non-cancelable operating lease component for land are due as follows and are not included in the amounts of operating lease payments above, 2015 - \$48,000, 2016 - \$48,000 and 2017 - \$43,000.

Minimum future lease payments under the capital lease component for the bank building as of December 31, 2014 for each of the next three years and in the aggregate are:

Year Ending December 31	
2015	\$ 132,000
2016	132,000
2017	120,000
Total minimum lease payments	384,000
Less amounts representing interest	45,000
Present value of net minimum lease payments	\$ 339,000

In the normal course of business, there are various pending legal actions and proceedings that are not reflected in the consolidated financial statements. Management does not believe the outcome of these actions and proceedings will have a material effect on the consolidated financial position of the Corporation.

NOTE 14 — RELATED PARTY TRANSACTIONS

Certain directors and executive officers of First Keystone Corporation and its subsidiary and companies in which they are principal owners (i.e., at least 10% ownership) were indebted to the Corporation at December 31, 2014 and 2013. These loans were made on substantially the same terms and conditions, including interest rates and collateral, as those prevailing at the time for comparable transactions with unrelated parties. The loans do not involve more than the normal risk of collectability nor present other unfavorable features.

A summary of the activity on the related party loans, comprised of directors and executive officers and their related companies consists of the following:

(Dollars in thousands)

	2014	2013
Balance at January 1	\$3,389	\$3,620
Additions	2,700	1,348
Deductions	(2,431)	(1,579)
Balance at December 31	\$3,658	\$3,389

The above loans represent funds drawn and outstanding at the date of the consolidated financial statements. Commitments by the Bank to related parties on lines of credit and letters of credit for 2014 and 2013, presented an additional off-balance sheet risk to the extent of undisbursed funds in the amounts of \$2,921,000 and \$2,707,000 respectively, on the above loans.

Deposits from certain officers and directors and/or their related companies held by the Bank amounted to \$9,899,000 and \$7,567,000 at December 31, 2014 and 2013, respectively.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

NOTE 15 — REGULATORY MATTERS

Under Pennsylvania banking law, the Bank is subject to certain restrictions on the amount of dividends that it may declare without prior regulatory approval. At December 31, 2014, \$7,384,000 of retained earnings were available for dividends without prior regulatory approval, subject to the regulatory capital requirements discussed below. Regulations also limit the amount of loans and advances from the Bank to the Corporation to 10% of consolidated net assets.

The Corporation is subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory — and possibly additional discretionary — actions by regulators that, if undertaken, could have a direct material effect on the Corporation's consolidated financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Corporation must meet specific capital guidelines that involve quantitative measures of the Corporation's assets, liabilities, and certain off-balance sheet items as calculated under regulatory accounting practices. The Corporation's capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Management believes, as of December 31, 2014 and 2013, that the Corporation and the Bank met all capital adequacy requirements to which they are subject.

Quantitative measures established by regulation to ensure capital adequacy require the Bank to maintain minimum amounts and ratios (set forth in the table below) of Total and Tier I Capital (as defined in the regulations) to Risk Weighted Assets (as defined), and of Tier I Capital (as defined) to Average Assets (as defined).

As of December 31, 2014, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as Well Capitalized under the regulatory framework for prompt corrective action. To be categorized as Well Capitalized, the Bank must maintain minimum Total Risk Based, Tier I Risk Based and Tier I Leverage Ratios as set forth in the table. There are no conditions or events since the notification that management believes have changed the Bank's category.

(Dollars in thousands)

Actual	Ratio	For Capital		To Be Well	
		Amount	Ratio	Amount	Ratio

As of December 31, 2014:

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

Total Capital (to Risk Weighted Assets)	\$83,813	15.07%	\$ 44,490	8.00 %	\$ 55,612	10.00 %
Tier I Capital (to Risk Weighted Assets)	\$77,423	13.92%	\$ 22,245	4.00 %	\$ 33,367	6.00 %
Tier I Capital (to Average Assets)	\$77,423	8.63 %	\$ 35,897	4.00 %	\$ 44,871	5.00 %

(Dollars in thousands)

	Actual Amount	Ratio	For Capital Adequacy Purposes Amount	Ratio	To Be Well Capitalized Under Prompt Corrective Action Provisions Amount	Ratio
As of December 31, 2013:						
Total Capital (to Risk Weighted Assets)	\$80,577	14.36%	\$ 44,901	8.00 %	\$ 56,126	10.00 %
Tier I Capital (to Risk Weighted Assets)	\$74,058	13.19%	\$ 22,450	4.00 %	\$ 33,676	6.00 %
Tier I Capital (to Average Assets)	\$74,058	8.56 %	\$ 34,589	4.00 %	\$ 43,236	5.00 %

The Corporation's capital ratios are not materially different from those of the Bank.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

NOTE — FINANCIAL INSTRUMENTS WITH OFF-BALANCE SHEET RISK AND CONCENTRATIONS
16 OF CREDIT RISK

The Corporation is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit and standby letters of credit. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The contract or notional amounts of those instruments reflect the extent of involvement the Corporation has in particular classes of financial instruments. The Corporation does not engage in trading activities with respect to any of its financial instruments with off-balance sheet risk.

The Corporation's exposure to credit loss in the event of nonperformance by the other party to the financial instrument for commitments to extend credit and standby letters of credit is represented by the contractual notional amount of those instruments.

The Corporation uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

The Corporation may require collateral or other security to support financial instruments with off-balance sheet credit risk.

The contract or notional amounts at December 31, 2014 and 2013 were as follows:

(Dollars in thousands)

	2014	2013
Financial instruments whose contract amounts represent credit risk:		
Commitments to extend credit	\$84,983	\$73,700
Financial standby letters of credit	\$471	\$418
Performance standby letters of credit	\$5,851	\$4,449

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses that may require payment of a fee. Since some of the commitments may expire without being drawn upon, the total

commitment amounts do not necessarily represent future cash requirements. The Corporation evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Corporation upon extension of credit, is based on management's credit evaluation of the borrower. Collateral held varies but may include accounts receivable, inventory, property, plant and equipment, owner-occupied income-producing commercial properties, and residential real estate.

Standby letters of credit are conditional commitments issued by the Corporation to guarantee payment to a third party when a customer either fails to repay an obligation or fails to perform some non-financial obligation. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Corporation may hold collateral to support standby letters of credit for which collateral is deemed necessary.

NOTE 17 — STOCKHOLDERS' EQUITY

The Corporation also offers to its shareholders a Dividend Reinvestment and Stock Purchase Plan. Participation in this plan by shareholders began in 2001. The plan provides First Keystone shareholders a convenient and economical way to purchase additional shares of common stock by reinvesting dividends. A plan participant can elect full dividend reinvestment or partial dividend reinvestment provided at least 25 shares are enrolled in the plan. In addition, plan participants may make additional voluntary cash purchases of common stock under the plan of not less than \$100 per calendar quarter or more than \$2,500 in any calendar quarter.

Shares transferred under this Dividend Reinvestment and Stock Purchase Plan were 46,047 in 2014, 39,074 in 2013, and 29,633 in 2012. Remaining shares authorized in the plan were 165,850 as of December 31, 2014.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Shares of First Keystone common stock are purchased for the plan either in the open market by an independent broker on behalf of the plan, directly from First Keystone as original issue shares, or through negotiated transactions. A combination of the previous methods could also occur.

NOTE 18 — STOCK COMPENSATION PLAN

On February 10, 1998, the Board of Directors adopted the 1998 Employee Stock Option Plan and initially reserved 100,000 shares of common stock for issuance under the plan for certain employees of the Bank. After adjustments for the effects of stock dividends, options exercised and options forfeited, there remains 4,323 exercisable options issued and outstanding. Under the Plan, options are granted at fair market value and the time period during which any option granted may be exercised may not commence before six months or continue beyond the expiration of ten years after the option is awarded. Upon exercise of the stock options, shares of the Corporation's stock are issued from Treasury Stock. The Plan expired in 2008, and therefore, no stock options are available for issuance.

The fair value of stock options issued to employees is measured on the date of the grant and is recognized as compensation expense over the requisite service period. Expected volatility and dividend yield are based on historical stock prices and dividend amounts over past time periods equal in length to the life of the options. The risk-free interest rate is determined using the U.S. Treasury yield curve in effect at the date of the grant. The expected life of the options is calculated using the average term of the vesting period and the maximum term.

Information about stock options outstanding at December 31, 2014, 2013 and 2012, is summarized as follows:

	2014		2013		2012	
	Stock Options	Weighted Average Exercise Price	Stock Options	Weighted Average Exercise Price	Stock Options	Weighted Average Exercise Price
Balance at January 1	4,823	\$ 18.12	11,904	\$ 19.90	20,037	\$ 18.18
Exercised			(2,034)	21.11	(5,334)	15.97
Forfeited/Expired	(500)	16.75	(5,047)	21.11	(2,799)	15.08
Balance at December 31	4,323	\$ 18.28	4,823	\$ 18.12	11,904	\$ 19.90
Exercisable at December 31	4,323	\$ 18.28	4,823	\$ 18.12	11,904	\$ 19.90

Under the terms of the stock option incentive plan, the stock options including amendments as to price and terms were adjusted for the stock dividend in 2006.

Exercise prices of options outstanding as of December 31, 2014, ranged from \$16.75 to \$20.95 per share. The weighted average remaining contracted life is approximately 2.17 years.

The 4,323 options outstanding as December 31, 2014 have an intrinsic value, which is the amount that the value of the underlying stock exceeds the exercise price of the options, of \$28,000. The total intrinsic value of the options exercised during the years ended December 31, 2014, 2013 and 2012 was \$0, \$10,000 and \$41,000, respectively. Cash received from stock options exercised for the years ended December 31, 2014, 2013 and 2012 was \$0, \$43,000 and \$85,000, respectively.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The following table summarizes information concerning the 1998 Employee Stock Option Plan at December 31, 2014.

Year	Options Outstanding			Options Exercisable	
	Number Remaining	Weighted Average Contractual Life	Weighted Average Exercise Price	Number Exercisable	Weighted Average Exercise Price
2005	1,573	0.75	\$ 20.95	1,573	\$ 20.95
2007	2,750	3.00	16.75	2,750	16.75
	4,323		\$ 18.28	4,323	\$ 18.28

*As adjusted for stock dividend noted above.

NOTE 19 — FAIR VALUE MEASUREMENTS

Fair value measurement and disclosure guidance defines fair value as the price that would be received to sell the asset or transfer the liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. This guidance provides additional information on determining when the volume and level of activity for the asset or liability has significantly decreased. The guidance also includes information on identifying circumstances when a transaction may not be considered orderly.

Fair value measurement and disclosure guidance provides a list of factors that a reporting entity should evaluate to determine whether there has been a significant decrease in the volume and level of activity for the asset or liability in relation to normal market activity for the asset or liability. When the reporting entity concludes there has been a significant decrease in the volume and level of activity for the asset or liability, further analysis of the information from that market is needed and significant adjustments to the related prices may be necessary to estimate fair value in accordance with the fair value measurement and disclosure guidance.

This guidance clarifies that when there has been a significant decrease in the volume and level of activity for the asset or liability, some transactions may not be orderly. In those situations, the entity must evaluate the weight of the evidence to determine whether the transaction is orderly. The guidance provides a list of circumstances that may indicate that a transaction is not orderly. A transaction price that is not associated with an orderly transaction is given

little, if any, weight when estimating fair value.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Inputs to valuation techniques refer to the assumptions that market participants would use in pricing the asset or liability. Inputs may be observable, meaning those that reflect the assumptions market participants would use in pricing the asset or liability developed based on market data obtained from independent sources, or unobservable, meaning those that reflect the reporting entity's own belief about the assumptions market participants would use in pricing the asset or liability based upon the best information available in the circumstances. Fair value measurement and disclosure guidance establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs. The fair value hierarchy is as follows:

Level 1 Inputs: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities;

Level 2 Inputs: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability;

Level 3 Input: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported by little or no market activity).

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth as follows.

Financial Assets Measured at Fair Value on a Recurring Basis

At December 31, 2014 and 2013, investments measured at fair value on a recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

December 31, 2014	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities:				
U.S. Treasury securities	\$	\$11,378	\$	\$11,378
Obligations of U.S. Government Corporations and Agencies:				
Mortgaged-backed		112,714		112,714
Other		26,510		26,510
Obligations of state and political subdivisions		157,223		157,223
Corporate debt securities		37,786		37,786
Marketable equity securities	2,055			2,055
Total	\$2,055	\$345,611	\$	\$347,666

(Dollars in thousands)

December 31, 2013	Level 1	Level 2	Level 3	Total
Available-for-Sale Securities:				
U.S. Treasury securities	\$	\$	\$	\$
Obligations of U.S. Government Corporations and Agencies:				
Mortgaged-backed		121,224		121,224
Other		32,285		32,285
Obligations of state and political subdivisions		148,389		148,389
Corporate debt securities		49,265		49,265
Marketable equity securities	2,535			2,535
Total	\$2,535	\$351,163	\$	\$353,698

The estimated fair values of equity securities classified as Level 1 are derived from quoted market prices in active markets; these assets consist mainly of stocks held in other banks. The estimated fair values of all debt securities classified as Level 2 are obtained from nationally-recognized third-party pricing agencies. The estimated fair values are derived primarily from cash flow models, which include assumptions for interest rates, credit losses, and prepayment speeds. The significant inputs utilized in the cash flow models are based on market data obtained from sources independent of the Corporation (observable inputs), and are therefore classified as Level 2 within the fair value hierarchy. The Corporation does not have any Level 3 inputs for investments. There were no transfers between Level 1 and Level 2 during 2014 and 2013.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Financial Assets Measured at Fair Value on a Nonrecurring Basis

At December 31, 2014 and 2013, impaired loans measured at fair value on a non-recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2014				
Impaired loans:				
Commercial and Industrial	\$	\$	\$3	\$3
Commercial Real Estate			2,073	2,073
Residential Real Estate			856	856
Total impaired loans	\$	\$	\$2,932	\$2,932

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2013				
Impaired loans:				
Commercial and Industrial	\$	\$	\$21	\$21
Commercial Real Estate			656	656
Residential Real Estate			621	621
Total impaired loans	\$	\$	\$1,298	\$1,298

The Bank's impaired loan valuation procedure for any loans greater than \$250,000 requires an appraisal to be obtained and reviewed annually at year end. A quarterly collateral evaluation is performed which may include a site visit, property pictures and discussions with realtors and other similar business professionals to ascertain current values. For impaired loans less than \$250,000 upon classification and annually at year end, the Bank completes a Certificate of Inspection, which includes an onsite inspection, insured values, tax assessed values, recent sales comparisons and a review of the previous evaluations. These assets are included as Level 3 fair values, based upon the lowest level that is significant to the fair value measurements. The fair value consists of the impaired loan balances less the valuation allowance and/or charge-offs. There were no transfers between valuation levels in 2014 and 2013.

Nonfinancial Assets Measured at Fair Value on a Nonrecurring Basis

Edgar Filing: FIRST KEYSTONE CORP - Form 10-K

At December 31, 2014 and 2013, foreclosed assets held for resale measured at fair value on a non-recurring basis and the valuation methods used are as follows:

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2014				
Other foreclosed assets held for resale:				
Commercial Real Estate	\$	\$	\$ 55	\$ 55
Total foreclosed assets held for resale	\$	\$	\$ 55	\$ 55

(Dollars in thousands)

	Level 1	Level 2	Level 3	Total
Assets at December 31, 2013				
Other foreclosed assets held for resale:				
Commercial Real Estate	\$	\$	\$	\$
Total foreclosed assets held for resale	\$	\$	\$	\$

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

The Bank's foreclosed asset valuation procedure requires an appraisal, which considers the sales prices of similar properties in the proximate vicinity, to be completed periodically with the exception of those cases which the Bank has obtained a sales agreement. These assets are included as Level 3 fair values, based upon the lowest level that is significant to the fair value measurements. There were no transfers between valuation levels in 2014 and 2013.

The following table presents additional quantitative information about assets measured at fair value on a nonrecurring basis and for which the Bank has utilized Level 3 inputs to determine the fair value:

(Dollars in thousands)

	Quantitative Information about Level 3 Fair Value Measurements				Weighted Average
	Fair Value	Estimate Valuation Technique	Unobservable Input	Range	
December 31, 2014					
Impaired loans	\$2,932	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(0%) – (63%)	(37%)
Foreclosed assets held for sale	\$55	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(33%) – (46%)	(37%)
December 31, 2013					
Impaired loans	\$1,298	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(0%) – (43%)	(25%)
Foreclosed assets held for sale	\$	Appraisal of collateral ^{1,3}	Appraisal adjustments ²	(0%) – (0%)	(0%)

¹Fair value is generally determined through independent appraisals of the underlying collateral, as defined by Bank regulators.

²Appraisals may be adjusted downward by management for qualitative factors such as economic conditions and estimated liquidation expenses. The typical range of appraisal adjustments are presented as a percent of the appraisal value.

³Includes qualitative adjustments by management and estimated liquidation expenses.

Fair Value of Financial Instruments

(Dollars in thousands)

Carrying Fair Value Measurements at December 31, 2014

	Amount	Level 1	Level 2	Level 3	Total
FINANCIAL ASSETS:

OFF-BALANCE SHEET FINANCIAL INSTRUMENTS

The following information should not be interpreted as an estimate of the fair value of the entire Corporation since a fair value calculation is only provided for a limited portion of the Corporation's assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Corporation's disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Corporation's financial instruments at December 31, 2014 and December 31, 2013:

Cash and Due From Banks, Interest-Bearing Deposits in Other Banks, Time Deposits with Other Banks, Restricted Investment in Bank Stocks, Accrued Interest Receivable and Accrued Interest Payable

The fair values are equal to the current carrying values.

Investment Securities

The fair value of investment securities are determined by obtaining quoted market prices on nationally recognized securities exchanges (Level 1) or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying on the securities' relationship to other benchmark quoted prices.

Loans

Fair values are estimated for categories of loans with similar financial characteristics. Loans were segregated by type such as Commercial and Industrial, Commercial and Residential Real Estate mortgages and Consumer. For estimation purposes, each loan category was further segmented into fixed and adjustable rate interest terms.

The fair value of each category of performing loans is calculated by discounting future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Fair value for impaired loans is based on management's estimate of future cash flows discounted using a rate commensurate with the risk associated with the estimated future cash flows or based on the value of the collateral if repayment is expected solely from collateral. The assumptions used by management are judgmentally determined using information regarding each specific borrower.

FIRST KEYSTONE CORPORATION AND SUBSIDIARY
Notes to Consolidated Financial Statements

Mortgage Servicing Rights

The fair value of servicing rights is based on the present value of estimated future cash flows on pools of mortgages stratified by rate and maturity date.

Deposits

The fair value of deposits with no stated maturity, such as demand deposits, savings accounts and money market accounts, is equal to the amount payable on demand at December 31, 2014 and 2013.

Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered on similar term borrowings, to a schedule of aggregated expected monthly maturities on time deposits.

Short-Term and Long-Term Borrowings

The fair values of short-term borrowings are equal to the current carrying values, and long-term borrowings are estimated using discounted cash flow analyses based on the Corporation's incremental borrowing rate for similar instruments.

Off-Balance Sheet Financial Instruments

The fair values for the Corporation's off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account the remaining terms of the agreements and the counterparties' credit standing.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors and Stockholders

First Keystone Corporation

Berwick, Pennsylvania

We have audited First Keystone Corporation and Subsidiary's (the "Company") internal control over financial reporting as of December 31, 2014, based on criteria established in *Internal Control-Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying "Item 9A, Management's Report on Internal Control Over Financial Reporting". Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with both generally accepted accounting principles and regulatory reporting instructions. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with both generally accepted accounting principles and regulatory reporting instructions, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become

inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2014, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet and the related consolidated statements of income, comprehensive income, changes in stockholders' equity and cash flows of First Keystone Corporation and Subsidiary as of and for the year ended December 31, 2014, and our report dated March 16, 2015 expressed an unqualified opinion.

/s/ BDO USA, LLP

Harrisburg, Pennsylvania

March 16, 2015

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

As previously reported by the Corporation on a Form 8-K filed February 14, 2014, the Corporation appointed BDO USA, LLP (“BDO”) as the Corporation’s new independent registered public accounting firm for and with respect to the year ending December 31, 2014, and dismissed J. H. Williams & Co., Inc. (“J. H. Williams”) from that role.

During the Corporation’s two most recent fiscal years and the subsequent interim period preceding J. H. Williams’ dismissal, there were: (i) no disagreements with J. H. Williams on any matter of accounting principles or practices, financial statement disclosure, or auditing scope or procedure, which disagreements, if not resolved to the satisfaction of J. H. Williams, would have caused it to make reference to the subject matter of the disagreements in its reports on the consolidated financial statements for the Corporation; and, (ii) no “reportable events”, as such term is defined in Item 304(a)(1)(v) of Regulation S-K.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

First Keystone Corporation maintains disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) designed to ensure that information required to be disclosed in the reports that the Corporation files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission. Based upon their evaluation of those disclosure controls and procedures performed as of the end of the period covered by this report, the Chief Executive Officer and Chief Financial Officer of the Corporation concluded that the Corporation’s disclosure controls and procedures were effective as of December 31, 2014.

Management’s Report on Internal Control Over Financial Reporting

The management of First Keystone Corporation is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities and Exchange Act of 1934). The Corporation’s internal control system was designed to provide reasonable assurance to the Corporation’s management and Board of Directors regarding the preparation and fair presentation of published financial statements.

The management of First Keystone Corporation, along with participation of the Chief Executive Officer and the Chief Financial Officer, assessed the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2014. In making this assessment, we used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in the *Internal Control — Integrated Framework (2013)*. Based on our assessment we believe that, as of December 31, 2014, the Corporation's internal control over financial reporting is effective based on those criteria.

First Keystone Corporation's independent registered public accounting firm that audited the consolidated financial statements has issued an audit report on the effectiveness of the Corporation's internal control over financial reporting as of December 31, 2014. This report can be found in Item 8 of this Form 10-K.

Changes in Internal Control over Financial Reporting

There were no changes in the Corporation's internal control over financial reporting during the fiscal quarter ended December 31, 2014, that materially affected, or are reasonably likely to materially affect the Corporation's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

There was no information required on Form 8-K during this quarter that was not reported.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE
