Emclair Financial Corp

Notes to Consolidated Financial Statements (Unaudited)

1. Nature of Operations and Basis of Presentation

Emclair Financial Corp (the Corporation) is a Pennsylvania corporation and the holding company of The Farmers National Bank of Emlenton (the Bank) and Emclair Settlement Services, LLC (the Title Company). The Corporation provides a variety of financial services to individuals and businesses through its offices in Western Pennsylvania. Its primary deposit products are checking, savings and term certificate accounts and its primary lending products are residential and commercial mortgages, commercial business loans and consumer loans.

The consolidated financial statements include the accounts of the Corporation and its wholly owned subsidiaries, the Bank and the Title Company. All significant intercompany transactions and balances have been eliminated in preparing the consolidated financial statements.

The accompanying unaudited consolidated financial statements for the interim periods include all adjustments, consisting of normal recurring accruals, which are necessary, in the opinion of management, to fairly reflect the Corporation's consolidated financial position and results of operations. Additionally, these consolidated financial statements for the interim periods have been prepared in accordance with instructions for the Securities and Exchange Commission's (SEC's) Form 10-Q and Article 10 of Regulation S-X and therefore do not include all information or footnotes necessary for a complete presentation of financial condition, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America (GAAP). For further information, refer to the audited consolidated financial statements and footnotes thereto for the year ended December 31, 2014, as contained in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014 filed with the SEC.

The balance sheet at December 31, 2014 has been derived from the audited financial statements at that date but does not include all the information and footnotes required by GAAP for complete financial statements.

The preparation of financial statements, in conformity with GAAP, requires management to make estimates and assumptions that affect the reported amounts in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, fair value of financial instruments, goodwill, real estate owned, the valuation of deferred tax assets and other-than-temporary impairment charges on securities. The results of operations for interim quarterly or year-to-date periods are not necessarily indicative of the results that may be expected for the entire year or any other period. Certain amounts previously reported may have been reclassified to

conform to the current year's financial statement presentation.

2. Participation in the Small Business Lending Fund (SBLF) of the U.S. Treasury Department (U.S. Treasury)

On August 18, 2011, the Corporation entered into a Securities Purchase Agreement (the Agreement) with the U.S. Treasury Department, pursuant to which the Corporation issued and sold to the U.S. Treasury 10,000 shares of Senior Non-Cumulative Perpetual Preferred Stock, Series B (Series B Preferred Stock), having a liquidation preference of \$1,000 per share, for aggregate proceeds of \$10.0 million, pursuant to the U.S. Treasury's SBLF program. On September 17, 2013, with the approval of the Corporation's primary federal banking regulator, the Corporation redeemed 5,000 shares, or 50%, of its Series B Preferred Stock held by the U.S. Treasury at an aggregate redemption price of \$5.0 million, plus accrued but unpaid dividends. Following this redemption, the Treasury holds 5,000 shares of the Series B Preferred Stock, representing a remaining liquidation value of \$5.0 million.

The Series B Preferred Stock is entitled to receive non-cumulative dividends payable quarterly on each January 1, April 1, July 1 and October 1, beginning October 1, 2011. The dividend rate, which is calculated on the aggregate liquidation amount, was initially set at 5% per annum based upon the current level of Qualified Small Business Lending (QSBL) by the Bank at that time. The dividend rate in the subsequent periods for the first two and one-half years through the quarter ending December 31, 2013 was based upon the percentage change in qualified lending between each dividend period and the baseline QSBL level established at the time the Agreement was entered into. Such dividend rate varied from 1% to 5% per annum. For the two year period beginning January 1, 2014, the dividend rate is fixed at a rate of 2% per annum. If the Series B Preferred Stock remains outstanding for more than four-and-one-half years, beginning January 1, 2016, the dividend rate will be fixed at 9%. The dividend rate was 2.0% for the quarters ended March 31, 2015 and 2014. Such dividends are not cumulative, but the Corporation may only declare and pay dividends on its common stock (or any other equity securities junior to the Series B Preferred Stock) if it has declared and paid dividends for the current dividend period on the Series B Preferred Stock, and will be subject to other restrictions on its ability to repurchase or redeem other securities.

Holders of the Series B Preferred Stock have the right to vote as a separate class on certain matters relating to the rights of holders of Series B Preferred Stock and on certain corporate transactions. Except with respect to such matters, the Series B Preferred Stock does not have voting rights.

The Corporation may redeem the shares of Series B Preferred Stock, in whole or in part, at any time at a redemption price equal to the sum of the liquidation amount and the per-share amount of any unpaid dividends for the then-current period, subject to any required prior approval by the Corporation's primary federal banking regulator. If redeemed in part, payments are required to be at least 25% of the original issuance.

3. Earnings per Common Share

Basic earnings per common share (EPS) excludes dilution and is computed by dividing net income available to common stockholders by the weighted average number of common shares outstanding during the period. Diluted EPS

includes the dilutive effect of additional potential common shares for assumed issuance of restricted stock and shares issued under stock options.

7

3. Earnings per Common Share (continued)

The factors used in the Corporation's earnings per common share computation follow:

(Dollar amounts in thousands, except for per share amounts)	For the three months ended March 31,	
	2015	2014
Earnings per common share - basic		
Net income	\$ 781	\$ 841
Less: Preferred stock dividends	25	25
Net income available to common stockholders	\$ 756	\$ 816
Average common shares outstanding	1,781,416	1,769,389
Basic earnings per common share	\$ 0.42	\$ 0.46
Earnings per common share - diluted		
Net income available to common stockholders	\$ 756	\$ 816
Average common shares outstanding	1,781,416	1,769,389
Add: Dilutive effects of assumed issuance of restricted stock and exercise of stock options	11,550	13,043
Average shares and dilutive potential common shares	1,792,966	1,782,432
Diluted earnings per common share	\$ 0.42	\$ 0.46
Stock options not considered in computing earnings per share because they were antidilutive	67,000	67,000

4. Securities

The following table summarizes the Corporation's securities as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
-------------------------------	-------------------	------------------------------	-------------------------------	---------------

Edgar Filing: EMCLAIRE FINANCIAL CORP - Form 10-Q

(Dollar amounts in thousands)	For the three months ended March 31, 2012	2014
Proceeds	\$-	\$ 21,559
Gains	-	658
Tax provision related to gains	-	224

4. Securities (continued)

Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic, market or other conditions warrant such evaluation. Consideration is given to: (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions and (4) whether the Corporation has the intent to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If the Corporation intends to sell an impaired security, or if it is more likely than not the Corporation will be required to sell the security before its anticipated recovery, the Corporation records an other-than-temporary loss in an amount equal to the entire difference between fair value and amortized cost. Otherwise, only the credit portion of the estimated loss on debt securities is recognized in earnings, with the other portion of the loss recognized in other comprehensive income. For equity securities determined to be other-than-temporarily impaired, the entire amount of impairment is recognized through earnings.

There was one equity security in an unrealized loss position for less than 12 months as of March 31, 2015. Equity securities owned by the Corporation consist of common stock of various financial service providers. The investment security is in an unrealized loss position as a result of recent market volatility. The Corporation does not invest in these securities with the intent to sell them for a profit in the near term. For investments in equity securities, in addition to the general factors mentioned above for determining whether the decline in market value is other-than-temporary, the analysis of whether an equity security is other-than-temporarily impaired includes a review of the profitability, capital adequacy and other relevant information available to determine the financial position and near term prospects of each issuer. The results of analyzing the aforementioned metrics and financial fundamentals suggest recovery of amortized cost as the sector improves. Based on that evaluation, and given that the Corporation's current intention is not to sell any impaired security and it is more likely than not it will not be required to sell this security before the recovery of its amortized cost basis, the Corporation does not consider the equity security with an unrealized loss as of March 31, 2015 to be other-than-temporarily impaired.

There were 53 debt securities in an unrealized loss position as of March 31, 2015, of which 46 were in an unrealized loss position for more than 12 months. Of these 53 securities, 2 were U.S. Treasury securities, 10 were U.S. government sponsored entity and agency securities, 22 were government-backed collateralized mortgage obligations, 17 were state and political subdivision securities and 2 were corporate debt securities. The unrealized losses associated with these securities were not due to the deterioration in the credit quality of the issuer that would likely result in the non-collection of contractual principal and interest, but rather have been caused by a rise in interest rates from the time the securities were purchased. Based on that evaluation and other general considerations, and given that the Corporation's current intention is not to sell any impaired securities and it is more likely than not it will not be required to sell these securities before the recovery of its amortized cost basis, the Corporation does not consider the debt securities with unrealized losses as of March 31, 2015 to be other-than-temporarily impaired.

5. Loans Receivable and Related Allowance for Loan Losses

The Corporation's loans receivable as of the respective dates are summarized as follows:

(Dollar amounts in thousands)	March 31, 2015	December 31, 2014
Mortgage loans on real estate:		
Residential first mortgages	\$ 106,251	\$ 107,173
Home equity loans and lines of credit	87,761	89,106
Commercial real estate	112,407	110,810
	306,419	307,089
Other loans:		
Commercial business	68,072	70,185
Consumer	7,028	7,598
	75,100	77,783
Total loans, gross	381,519	384,872
Less allowance for loan losses	5,340	5,224
Total loans, net	\$376,179	\$379,648

During 2014, the Corporation purchased four syndicated national credits (SNCs) each having a principal amount of \$1.0 million. The SNCs were purchased for a total of \$4.0 million plus a net premium of \$15,000 and other costs totaling \$11,000 which are being amortized over the lives of the loans. The SNCs are recorded as commercial business loans and are collateralized by all business assets of the individual borrowers. These credits have been assigned allowance for loan losses equal to 125% of the Corporation's normal allowance allocation for commercial business loans until sufficient historical performance data can be collected and analyzed. As of March 31, 2015, these SNC's had an outstanding balance of \$3.5 million.

The following table presents impaired loans by class, segregated by those for which a specific allowance was required and those for which a specific allowance was not necessary as of March 31, 2015:

(Dollar amounts in thousands)

Impaired Loans with Specific Allowance			For the three months ended March 31, 2015		Cash Basis
As of March 31, 2015			Average Recorded Investment	Interest Income Recognized in Period	Interest Recognized in Period
Unpaid Principal Balance	Recorded Investment	Related Allowance			

Edgar Filing: EMCLAIRE FINANCIAL CORP - Form 10-Q

Residential first mortgages	\$ 170	\$ 170	\$ 27	\$ 170	\$ 2	\$ 2
Home equity and lines of credit	-	-	-	-	-	-

Total	\$ 2,839	\$ 2,438	\$ 2,409	\$ 2	\$ 2	\$ 2

Unpaid principal balance includes any loans that have been partially charged off but not forgiven. Accrued interest is not included in the recorded investment in loans based on the amounts not being material.

5. Loans Receivable and Related Allowance for Loan Losses (continued)

Troubled debt restructurings (TDR). The Corporation has certain loans that have been modified in order to maximize collection of loan balances. If, for economic or legal reasons related to the customer's financial difficulties, management grants a concession compared to the original terms and conditions of the loan that it would not have otherwise considered, the modified loan is classified as a TDR. Concessions related to TDRs generally do not include forgiveness of principal balances. The Corporation generally does not extend additional credit to borrowers with loans classified as TDRs.

At March 31, 2015 and December 31, 2014, the Corporation had \$5.4 million and \$5.6 million, respectively, of loans classified as TDRs, which are included in impaired loans above. At March 31, 2015 and December 31, 2014, the Corporation had \$496,000 and \$513,000 of the allowance for loan losses allocated to these specific loans. At March 31, 2014, the Corporation had \$2.5 million of loans classified as TDRs with \$56,000 of the allowance for loan losses allocated to these specific loans.

During the three month periods ended March 31, 2015 and 2014, the Corporation did not modify any loans as TDRs.

A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms. During the three month period ended March 31, 2015, there was a default on one \$90,000 residential mortgage loan within 12 months following modification classified as a TDR at March 31, 2015. At March 31, 2015, this loan was 30-59 days past due. During the three month period ended March 31, 2014, the Corporation did not have any loans which were modified as TDRs for which there was a payment default within twelve months following the modification.

Credit Quality Indicators. Management categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information and current economic trends, among other factors.

Commercial real estate and commercial business loans not identified as impaired are evaluated as risk rated pools of loans utilizing a risk rating practice that is supported by a quarterly special asset review. In this review process, strengths and weaknesses are identified, evaluated and documented for each criticized and classified loan and borrower, strategic action plans are developed, risk ratings are confirmed and the loan's performance status is reviewed.

Management has determined certain portions of the loan portfolio to be homogeneous in nature and assigns like reserve factors for the following loan pool types: residential real estate, home equity loans and lines of credit, and consumer installment and personal lines of credit.

The reserve allocation for risk rated loan pools is developed by applying the following factors:

Historic: Management utilizes a computer model to develop the historical net charge-off experience which is used to formulate the assumptions employed in the migration analysis applied to estimate future losses in the portfolio. Outstanding balance and charge-off information are input into the model and historical loss migration rate assumptions are developed to apply to pass, special mention, substandard and doubtful risk rated loans. A twelve-quarter rolling weighted-average is utilized to estimate probable incurred losses in the portfolios.

Qualitative: Qualitative adjustment factors for pass, special mention, substandard and doubtful ratings are developed and applied to risk rated loans to allow for: quality of lending policies and procedures; national and local economic and business conditions; changes in the nature and volume of the portfolio; experiences, ability and depth of lending management; changes in trends, volume and severity of past due, nonaccrual and classified loans and loss and recovery trends; quality of loan review systems; concentrations of credit and other external factors.

5. Loans Receivable and Related Allowance for Loan Losses (continued)

Management uses the following definitions for risk ratings:

Pass: Loans classified as pass typically exhibit good payment performance and have underlying borrowers with acceptable financial trends where repayment capacity is evident. These borrowers typically would have a sufficient cash flow that would allow them to weather an economic downturn and the value of any underlying collateral could withstand a moderate degree of depreciation due to economic conditions.

Special Mention: Loans classified as special mention are characterized by potential weaknesses that could jeopardize repayment as contractually agreed. These loans may exhibit adverse trends such as increasing leverage, shrinking profit margins and/or deteriorating cash flows. These borrowers would inherently be more vulnerable to the application of economic pressures.

Substandard: Loans classified as substandard exhibit weaknesses that are well-defined to the point that repayment is jeopardized. Typically, the Corporation is no longer adequately protected by both the apparent net worth and repayment capacity of the borrower.

Doubtful: Loans classified as doubtful have advanced to the point that collection or liquidation in full, on the basis of currently ascertainable facts, conditions and value, is highly questionable or improbable.

The following table presents the classes of the loan portfolio summarized by the aggregate pass and the criticized categories of special mention, substandard and doubtful within the Corporation's internal risk rating system as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)

	Not Rated	Pass	Special Mention	Substandard	Doubtful	Total
March 31, 2015:						
Residential first mortgages	\$ 105,158	\$-	\$ -	\$ 1,093	\$ -	\$ 106,251
Home equity and lines of credit	87,016	-	-	745	-	87,761

Commercial business	-	65,627	1,292	3,266	-	70,185
Consumer	7,598	-	-	-	-	7,598
Total	\$ 202,745	\$ 169,535	\$ 1,807	\$ 10,785	\$ -	\$384,872

5. Loans Receivable and Related Allowance for Loan Losses (continued)

Management further monitors the performance and credit quality of the loan portfolio by analyzing the age of the portfolio as determined by the length of time a recorded payment is past due. The following table presents the classes of the loan portfolio summarized by the aging categories of performing loans and nonperforming loans as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)

	Performing Accruing Loans Not Past Due	Accruing 30-59 Days Past Due	Accruing 60-89 Days Past Due	Nonperforming Accruing 90 Days + Past Due	Nonaccrual	Total Loans
March 31, 2015:						
Residential first mortgages	\$ 104,215	\$ 949	\$ -	\$ -	\$ 1,087	\$ 106,251
Home equity and lines of credit	86,753	263	-	231	514	87,761
Commercial real estate	109,003	81	-	-	3,323	112,407
Commercial business	65,730	-	24	-	2,318	68,072
Consumer	7,000	28	-	-	-	7,028
Total loans	\$ 372,701	\$ 1,321	\$ 24	\$ 231	\$ 7,242	\$ 381,519
December 31, 2014:						
Residential first mortgages	\$ 104,523	\$ 1,523	\$ 402	\$ 78	\$ 647	\$ 107,173

Total loans	\$ 375,150	\$ 2,269	\$ 511	\$ 94	\$ 6,848	\$ 384,872

The following table presents the Corporation's nonaccrual loans by aging category as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)

Not Past Due	30-59 Days Past Due	60-89 Days Past Due	90 Days + Past Due	Total Loans
-----------------	------------------------	------------------------	-----------------------	----------------

March 31, 2015:

Edgar Filing: EMCLAIRE FINANCIAL CORP - Form 10-Q

Residential first mortgages	\$ 188	\$ 170	\$ -	\$ 729	\$1,087
Home equity and lines of credit	32	17	-	465	514
Commercial real estate	2,765	-	-	558	3,323
Commercial business	2,136	-	-	182	2,318
Consumer	-	-	-	-	-
Total loans	\$ 5,121	\$ 187	\$ -	\$ 1,934	\$7,242

December 31, 2014:

Residential first mortgages	\$ 283	\$ -	\$ 80	\$ 284	\$647
Home equity and lines of credit	33	18	-	356	407
Commercial real estate	2,848	-	-	569	3,417
Commercial business	2,151	-	188	38	2,377
Consumer	-	-	-	-	-
Total loans	\$ 5,315	\$ 18	\$ 268	\$ 1,247	\$6,848

An allowance for loan losses (ALL) is maintained to absorb probable incurred losses from the loan portfolio. The ALL is based on management's continuing evaluation of the risk characteristics and credit quality of the loan portfolio, assessment of current economic conditions, diversification and size of the portfolio, adequacy of collateral, past and anticipated loss experience and the amount of nonperforming loans.

5. Loans Receivable and Related Allowance for Loan Losses (continued)

Management reviews the loan portfolio on a quarterly basis using a defined, consistently applied process in order to make appropriate and timely adjustments to the ALL. When information confirms all or part of specific loans to be uncollectible, these amounts are promptly charged off against the ALL.

The following table details activity in the ALL and the recorded investment by portfolio segment based on impairment method:

(Dollar amounts in thousands)

	Residential Mortgages	Home Equity & Lines of Credit	Commercial Real Estate	Commercial Business	Consumer	Total
Three months ended March 31, 2015:						
Allowance for loan losses:						
Beginning Balance	\$ 955	\$ 543	\$ 2,338	\$ 1,336	\$ 52	\$ 5,224
Charge-offs	(4)	(64)	-	-	(22)	(90)
Recoveries	-	4	5	20	8	37
Provision	137	128	(110)	4	10	169
Ending Balance	\$ 1,088	\$ 611	\$ 2,233	\$ 1,360	\$ 48	\$ 5,340
Three months ended March 31, 2014:						
Allowance for loan losses:						
Beginning Balance	\$ 923	\$ 625	\$ 2,450	\$ 822	\$ 49	\$ 4,869
Charge-offs	(78)	-	(2)	(17)	(35)	(132)
Recoveries	-	-	5	7	9	21
Provision	91	(6)	(232)	282	28	163
Ending Balance	\$ 936	\$ 619	\$ 2,221	\$ 1,094	\$ 51	\$ 4,921
At March 31, 2015:						
Ending ALL balance attributable to loans:						
Individually evaluated for impairment	27	-	252	506	-	785
Collectively evaluated for impairment	1,061	611	1,981	854	48	4,555
Total loans:						
Individually evaluated for impairment	281	-	3,418	2,610	-	6,309
Collectively evaluated for impairment	105,970	87,761	108,989	65,462	7,028	375,210

At December 31, 2014:

Ending ALL balance attributable to loans:

Individually evaluated for impairment	27	-	268	495	-	790
Collectively evaluated for impairment	928	543	2,070	841	52	4,434
Total loans:						
Individually evaluated for impairment	285	-	3,529	2,673	-	6,487
Collectively evaluated for impairment	106,888	89,106	107,281	67,512	7,598	378,385

The allowance for loan losses is based on estimates and actual losses may vary from current estimates. Management believes that the granularity of the homogeneous pools and the related historical loss ratios and other qualitative factors, as well as the consistency in the application of assumptions, result in an ALL that is representative of the risk found in the components of the portfolio at any given date.

6. Goodwill and Intangible Assets

The following table summarizes the Corporation's acquired goodwill and intangible assets as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)	March 31, 2015		December 31, 2014	
	Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Goodwill	\$3,664	\$ -	\$3,664	\$ -
Core deposit intangibles	4,027	3,327	4,027	3,278
Total	\$7,691	\$ 3,327	\$ 7,691	\$ 3,278

Goodwill resulted from three previous branch acquisitions. Goodwill represents the excess of the total purchase price paid for the branch acquisitions over the fair value of the assets acquired, net of the fair value of the liabilities assumed. Goodwill is not amortized but is evaluated for impairment on an annual basis or whenever events or changes in circumstances indicate the carrying value may not be recoverable. Impairment exists when a reporting unit's carrying value of goodwill exceeds its fair value. The Corporation has selected November 30 as the date to perform the annual impairment test. No goodwill impairment charges were recorded during 2014 or in the first three months of 2015. The core deposit intangible asset is amortized using the double declining balance method over a weighted average estimated life of nine years and is not estimated to have a significant residual value. During the three month period ending March 31, 2015, the Corporation recorded intangible amortization expense totaling \$49,000, compared to \$57,000 for the same period in 2014.

7. Stock Compensation Plans

In April 2014, the Corporation adopted the 2014 Stock Incentive Plan (the 2014 Plan), which is shareholder approved and permits the grant of restricted stock awards and options to its directors, officers and employees for up to 176,866 shares of common stock, of which 83,433 shares of restricted stock and 88,433 stock options remain available for issuance under the plan.

In addition, the Corporation's 2007 Stock Incentive Plan and Trust (the 2007 Plan), which is shareholder approved, permits the grant of restricted stock awards and options to its directors, officers and employees for up to 177,496 shares of common stock, of which 1,663 shares of restricted stock and 45,283 stock options remain available for issuance under the plan.

Incentive stock options, non-incentive or compensatory stock options and share awards may be granted under the Plans. The exercise price of each option shall at least equal the market price of a share of common stock on the date of grant and have a contractual term of ten years. Options shall vest and become exercisable at the rate, to the extent and subject to such limitations as may be specified by the Corporation. Compensation cost related to share-based payment transactions must be recognized in the financial statements with measurement based upon the fair value of the equity instruments issued.

A summary of option activity under the Plans as of March 31, 2015, and changes during the period then ended is presented below:

	Options	Weighted-Average Exercise Price	Aggregate Intrinsic Value (in thousands)	Weighted-Average Remaining Term (in years)
Outstanding as of January 1, 2015	76,750	\$ 25.16	\$ -	2.7
Granted	-	-	-	-
Exercised	(250)	15.06	-	-
Forfeited	-	-	-	-
Outstanding as of March 31, 2015	76,500	\$ 25.19	\$ 53,185	2.5
Exercisable as of March 31, 2015	76,500	\$ 25.19	\$ 53,185	2.5

7. Stock Compensation Plans (continued)

A summary of the status of the Corporation's nonvested restricted stock awards as of March 31, 2015, and changes during the period then ended is presented below:

	Shares	Weighted-Average Grant-date Fair Value
Nonvested at January 1, 2015	25,450	\$ 23.03
Granted	-	-
Vested	(1,450)	16.44
Forfeited	-	-
Nonvested as of March 31, 2015	24,000	\$ 23.43

For the three month period ended March 31, 2015, the Corporation recognized \$53,000 in stock compensation expense, compared to \$42,000 for the same period in 2014. As of March 31, 2015, there was \$325,000 of total unrecognized compensation cost related to nonvested share-based compensation arrangements granted under the Plans. That cost is expected to be recognized over a weighted-average period of 1.7 years. It is the Corporation's policy to issue shares on the vesting date for restricted stock awards. Unvested restricted stock awards do not receive dividends declared by the Corporation.

8. Employee Benefit Plans

The Corporation provides pension benefits for eligible employees through a defined benefit pension plan. Substantially all employees participate in the retirement plan on a non-contributory basis, and are fully vested after three years of service. Effective January 1, 2009, the plan was closed to new participants.

The Corporation provided the requisite notice to plan participants on March 12, 2013 of the determination to freeze the plan (curtailment). While the freeze was not effective until April 30, 2013, management determined that participants would not satisfy, within the provisions of the plan, 2013 eligibility requirements based on minimum hours worked for 2013. Therefore, employees ceased to earn benefits as of January 1, 2013. This amendment to the plan will not affect benefits earned by the participants prior to the date of the freeze. The Corporation recorded an expense associated with plan of \$5,000 for the three month period ended March 31, 2015, compared to a benefit of \$15,000 for the same period in 2014.

9. Fair Value

Fair value is the exchange price that would be received for an asset or paid to transfer a liability (exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. There are three levels of inputs that may be used to measure fair value.

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Corporation has the ability to access at the measurement date.

9.

Fair Value (continued)

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect the Corporation's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

An asset or liability's level is based on the lowest level of input that is significant to the fair value measurement.

The Corporation used the following methods and significant assumptions to estimate fair value:

Cash and cash equivalents – The carrying value of cash and due from banks and interest earning deposits with banks approximates fair value and are classified as Level 1.

Securities available for sale – The fair value of all investment securities are based upon the assumptions market participants would use in pricing the security. If available, investment securities are determined by quoted market prices (Level 1). Level 1 includes U.S. Treasury, federal agency securities and certain equity securities. For investment securities where quoted market prices are not available, fair values are calculated based on market prices on similar securities (Level 2). Level 2 includes U.S. Government sponsored entities and agencies, mortgage-backed securities, collateralized mortgage obligations, state and political subdivision securities and corporate debt securities. For investment securities where quoted prices or market prices of similar securities are not available, fair values are calculated by using unobservable inputs (Level 3) and may include certain equity securities held by the Corporation. The Level 3 equity security valuations were supported by an analysis prepared by the Corporation which relies on inputs such as the security issuer's publicly attainable financial information, multiples derived from prices in observed transactions involving comparable businesses and other market, financial and nonfinancial factors.

Loans – The fair value of loans receivable was estimated based on the discounted value of the future cash flows using the current rates being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification.

Impaired loans – At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive a specific allowance for loan losses. For collateral dependent loans, fair value is commonly based on real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower's financial statements, or aging reports, adjusted or discounted based on management's historical knowledge, changes in market conditions from the time of the valuation, and management's expertise and knowledge of the client and client's business, resulting in a Level 3 classification. Impaired loans are evaluated on a quarterly basis for additional impairment and adjusted accordingly. As of March 31, 2015, the fair value of impaired loans measured using the fair value of collateral consists of loan balances of \$2.9 million, net of a valuation allowance of \$601,000, compared to loan balances of \$3.0 million, net of a valuation allowance of \$596,000, at December 31, 2014. There was no additional provision for loan losses recorded for impaired loans during the three month period ended March 31, 2015. There was \$272,000 of additional provision for loan losses recorded for impaired loans during the three month periods ended March 31, 2014.

9.

Fair Value (continued)

Other real estate owned (OREO) – Assets acquired through or instead of foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. Management's ongoing review of appraisal information may result in additional discounts or adjustments to the valuation based upon more recent market sales activity or more current appraisal information derived from properties of similar type and/or locale. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. As of March 31, 2015, OREO measured at fair value less costs to sell had a net carrying amount of \$20,000, which was made up of the outstanding balance of \$23,000 and write-downs of \$3,000. At December 31, 2014, the Corporation had no OREO measured at fair value. There was \$3,000 of expense recorded during the three months ended March 31, 2015 associated with the write-down of OREO, compared to \$0 for the same period in 2014.

Appraisals for both collateral-dependent impaired loans and OREO are performed by certified general appraisers (for commercial properties) or certified residential appraisers (for residential properties) whose qualifications and licenses have been reviewed by the Corporation. Once received, management reviews the assumptions and approaches utilized in the appraisal as well as the overall resulting fair value in comparison with independent data sources such as recent market data or industry-wide statistics. On an annual basis, the Corporation compares the actual selling price of OREO that has been sold to the most recent appraisal to determine what additional adjustment should be made to the appraisal value to arrive at fair value. The most recent analysis performed indicated that a discount of 10% should be applied.

Federal bank stock – It is not practical to determine the fair value of federal bank stocks due to restrictions placed on its transferability.

Deposits – The fair value of deposits with no stated maturity, such as non-interest bearing demand deposits, checking with interest, savings and money market accounts, is equal to the amount payable on demand resulting in either a Level 1 or Level 2 classification. The fair values of time deposits are based on the discounted value of contractual cash flows. The discount rate is estimated using the rates currently offered for deposits of similar maturities resulting in a Level 2 classification.

Borrowings – The fair value of borrowings with the FHLB is estimated using discounted cash flows based on current incremental borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification.

Accrued interest receivable and payable – The carrying value of accrued interest receivable and payable approximates fair value. The fair value classification is consistent with the related financial instrument.

9. Fair Value (continued)

For assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

(Dollar amounts in thousands)		(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs	(Level 3) Significant Unobservable Inputs
Description	Total			
March 31, 2015:				
U.S. Treasury and federal agency	\$ 1,480	\$ 1,480	\$ -	\$ -
U.S. government sponsored entities and agencies	38,481	-	38,481	-
U.S. agency mortgage-backed securities: residential	37,932	-	37,932	-
U.S. agency collateralized mortgage obligations: residential	35,816	-	35,816	-
State and political subdivision	32,197	-	32,197	-
Corporate debt securities	3,008	-	3,008	-
Equity securities	2,639	1,811	-	828
	\$ 151,553	\$ 3,291	\$ 147,434	\$ 828
December 31, 2014:				
U.S. Treasury and federal agency	\$ 1,456	\$ 1,456	\$ -	\$ -
U.S. government sponsored entities and agencies	35,224	-	35,224	-
U.S. agency mortgage-backed securities: residential	38,771	-	38,771	-
U.S. agency collateralized mortgage obligations: residential	36,617	-	36,617	-
State and political subdivisions	33,024	-	33,024	-
Corporate debt securities	1,998	-	1,998	-
Equity securities	2,771	1,873	-	898
	\$ 149,861	\$ 3,329	\$ 145,634	\$ 898

The Corporation's policy is to transfer assets or liabilities from one level to another when the methodology to obtain the fair value changes such that there are more or fewer unobservable inputs as of the end of the reporting period. During the three month period ended March 31, 2015 and 2014, the Corporation had no transfers between levels. The following table presents changes in Level 3 assets measured on a recurring basis for the three month periods ended March 31, 2015 and 2014:

(Dollar amounts in thousands)	Three months ended March 31,	
	2015	2014
Balance at the beginning of the period	\$ 898	\$ 653
Total gains or losses (realized/unrealized):	-	-

Edgar Filing: EMCLAIRE FINANCIAL CORP - Form 10-Q

Included in earnings	-	-
Included in other comprehensive income	(70)	-
Issuances	-	-
Transfers in and/or out of Level 3	-	-
Balance at the end of the period	\$ 828	\$ 653

9. Fair Value (continued)

For assets measured at fair value on a non-recurring basis, the fair value measurements by level within the fair value hierarchy are as follows:

Description	Total	(Level 1)	(Level 2)	(Level 3)
		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs	Significant Unobservable Inputs
<i>(Dollar amounts in thousands)</i>				
March 31, 2015:				
Impaired commercial real estate loans	\$495	\$ -	\$ -	\$ 495
Impaired commercial business loans	1,794	-	-	1,794
Other residential real estate owned	20	-	-	20
	\$2,309	\$ -	\$ -	\$ 2,309
December 31, 2014:				
Impaired commercial real estate loans	\$495	\$ -	\$ -	\$ 495
Impaired commercial business loans	1,865	-	-	1,865
	\$2,360	\$ -	\$ -	\$ 2,360

The following table presents quantitative information about Level 3 fair value measurements for assets measured at fair value on a non-recurring basis:

<i>(Dollar amounts in thousands)</i>	Valuation Techniques(s)	Unobservable Input (s)	Range
March 31, 2015:			
Impaired commercial real estate loans	\$495	Sales comparison approach/ Contractual provision of USDA loan	Adjustment for differences between comparable sales
Impaired commercial business loans	1,794	Liquidation value of business assets	Adjustment for differences between comparable business assets
Other residential real estate owned	20	Sales comparison approach	Adjustment for differences between comparable sales
December 31, 2014:			
	495	Sales comparison approach/	Adjustment for differences

Impaired commercial real estate loans

Contractual provision of USDA loan between comparable sales

Impaired commercial business loans	1,865	Liquidation value of business assets	Adjustment for differences between comparable business assets	44% - 78%
------------------------------------	-------	--------------------------------------	---	-----------

The two tables above exclude two impaired residential mortgage loans totaling \$143,000, two impaired commercial real estate loans totaling \$1.9 million and a \$258,000 commercial business loan classified as TDRs which were measured using a discounted cash flow methodology at March 31, 2015.

Included in impaired commercial real estate loans is a loan guaranteed by the United States Department of Agriculture (USDA) with a balance of \$344,000 as of March 31, 2015 and December 31, 2014, respectively. The guarantee covers 90% of the principal balance outstanding. In determining the fair value of this loan, the Corporation considered the contractual provisions of the loan and did not rely on the fair value of the underlying collateral. As such, the Corporation applied a 10% discount to the loan which represents the portion of the loan at risk.

9. Fair Value (continued)

The following table sets forth the carrying amount and estimated fair values of the Corporation's financial instruments included in the consolidated balance sheet as of March 31, 2015 and December 31, 2014:

(Dollar amounts in thousands)

Description	Carrying Amount	Fair Value Total	Fair Value Measurements using:		
			Level 1	Level 2	Level 3

11. New Accounting Standards

In January 2014, the Financial Accounting Standards Board (FASB) issued new accounting guidance regarding the reclassification of residential real estate collateralized consumer mortgage loans upon foreclosures. The guidance requires reclassification of a consumer mortgage loan to other real estate owned upon obtaining legal title to the residential property, which could occur either through foreclosure or through a deed in lieu of foreclosure or similar legal agreement. The existence of a borrower redemption right will not prevent the lender from reclassifying a loan to other real estate once the lender obtains legal title to the property. In addition, entities are required to disclose the amount of foreclosed real estate properties and the recorded investment in residential real estate mortgage loans in the process of foreclosure on both an interim and annual basis. The guidance may be applied prospectively or on a modified prospective basis in fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. Early adoption was permitted. The adoption of this guidance did not have a material impact on the Corporation's consolidated financial statements.

In May 2014, the FASB and the International Accounting Standards Board (IASB) jointly issued a comprehensive new revenue recognition standard that will supersede nearly all existing revenue recognition guidance under U.S. GAAP and International Financial Reporting Standards (IFRS). The standard's core principle is that an entity will recognize revenue to depict the transfer of goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. The guidance may be applied retrospectively to each prior reporting period presented or retrospectively with the cumulative effect of initial application recognized at the date of initial application for the fiscal years and interim periods within those fiscal years beginning after December 15, 2017. Entities are permitted to adopt one year earlier if they choose. The Corporation is currently evaluating the impact of the adoption of this guidance on its financial statements.

In June 2014, the FASB issued new accounting guidance regarding share-based grants that require a performance target that affects vesting and that could be achieved after the requisite service period to be treated as a performance condition. An entity should apply existing guidance that relates to awards with performance conditions that affect vesting to account for such awards. The guidance may be applied prospectively or retrospectively and is effective for fiscal years and interim periods within those years beginning after December 15, 2015. Early adoption is permitted. This guidance will not have a material impact upon adoption as the Corporation has no share-based grants with performance targets that could be achieved after the requisite service period.

In August 2014, the FASB issued new accounting guidance regarding the classification and measurement of foreclosed mortgage loans that are guaranteed by the government (including loans guaranteed by the FHA and the VA). The guidance addressed diversity in practice by requiring creditors to derecognize the mortgage loan upon foreclosure and to recognize a separate other receivable if the following conditions are met: (a) the government guarantee of the loan is not separate from the loan before foreclosure; (b) upon foreclosure, the creditor has the intent to convey the real estate to the guarantor and to make a claim on the guarantee, and also has the ability to make a recovery under the claim; and (c) claim amounts based on the fair value of the property are fixed upon foreclosure. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The guidance may be applied prospectively or on a

modified retrospective basis in fiscal years, and interim periods within those fiscal years, beginning after December 15, 2014. The transition method applied should be the same as the transition method applied upon implementation of the new accounting guidance issued in January 2014, described above, regarding the reclassification of residential real estate collateralized consumer mortgage loans upon foreclosure. Early adoption was permitted. The adoption of this guidance did not have a material impact on the Corporation's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This section discusses the consolidated financial condition and results of operations of Emclair Financial Corp and its wholly owned subsidiaries, the Bank and the Title Company, for the three months ended March 31, 2015, compared to the same periods in 2014 and should be read in conjunction with the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014, filed with the SEC and with the accompanying consolidated financial statements and notes presented on pages 1 through 26 of this Form 10-Q.

This Form 10-Q, including the financial statements and related notes, contains forward looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, or the Securities Act, and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. These forward looking statements represent plans, estimates, objectives, goals, guidelines, expectations, intentions, projections and statements of our beliefs concerning future events, business plans, objectives, expected operating results and the assumptions upon which those statements are based. Forward looking statements include without limitation, any statement that may predict, forecast, indicate or imply future results, performance or achievements, and are typically identified with words such as "may," "could," "should," "will," "would," "believe," "anticipate," "estimate," "expect," "intend," "plan" or words or phrases of similar meaning. We caution that the forward looking statements are based largely on our expectations and are subject to a number of known and unknown risks and uncertainties that are subject to change based on factors which are, in many instances, beyond our control. Actual results, performances or achievements could differ materially from those contemplated, expressed or implied by the forward looking statements. Therefore, we caution you not to place undue reliance on our forward looking information and statements. Except as required by applicable law or regulation, we will not update the forward looking statements to reflect actual results or changes in factors affecting the forward looking statements.

CHANGES IN FINANCIAL CONDITION

Total assets increased \$8.3 million, or 1.4%, to \$590.3 million at March 31, 2015 from \$581.9 million at December 31, 2014. This increase resulted primarily from increases in cash and equivalents and securities of \$10.4 million and \$1.7 million, respectively, which were funded by a \$14.2 million increase in customer deposits. This deposit increase also funded a \$3.5 million decrease in borrowed funds.

Total liabilities increased \$7.3 million, or 1.4%, to \$541.2 million at March 31, 2015 from \$533.9 million at December 31, 2014, resulting primarily from a \$14.2 million increase in customer deposits, partially offset by a \$3.5 million decrease in borrowed funds and a \$3.4 million decrease in other liabilities. Deposit growth consisted of a \$7.8 million, or 7.0%, increase in noninterest bearing deposits and a \$6.4 million, or 1.6%, increase in interest bearing deposits. The decrease in borrowed funds resulted from the repayment of overnight borrowings totaling \$3.5 million. Additionally, accrued expenses and other liabilities decreased \$3.4 million, or 33.0%, to \$7.0 million at March 31, 2015 from \$10.4 million at December 31, 2014, resulting from the settlement of syndicated national credits totaling \$3.0 million.

Stockholders' equity increased \$1.1 million, or 2.2%, to \$49.1 million at March 31, 2015 from \$48.0 million at December 31, 2014. Book value and tangible book value per common share were \$24.72 and \$22.27, respectively, at March 31, 2015, compared to \$24.14 and \$21.66, respectively, at December 31, 2014.

At March 31, 2015, the Bank was considered "well-capitalized" under the new Basel III capital rules with a Tier 1 leverage ratio, common equity Tier 1 ratio, Tier 1 risk-based capital ratio and total risk-based capital ratio of 8.43%, 13.52%, 13.52% and 14.78%, respectively. The Bank was also considered "well-capitalized" at December 31, 2014 under the previous U.S. risk-based capital rules with a Tier 1 leverage ratio, Tier 1 risk-based capital ratio and total risk-based capital ratio of 8.25%, 14.84% and 13.58%, respectively.

RESULTS OF OPERATIONS

Comparison of Results for the Three Months Ended March 31, 2015 and 2014

General. Net income decreased \$60,000, or 7.1%, to \$781,000 for the three months ended March 31, 2015 from \$841,000 for the same period in 2014. This decrease was the result of a decrease in noninterest income of \$660,000 and an increase in provision for loan losses of \$6,000, partially offset by an increase in net interest income of \$302,000 and a decrease in noninterest expense and provision for income taxes of \$258,000 and \$46,000, respectively.

Net interest income. Net interest income on a tax equivalent basis increased \$304,000, or 7.3%, to \$4.5 million for the three months ended March 31, 2015 from \$4.2 million for the three months ended March 31, 2014. This increase can be attributed to an increase in tax equivalent interest income of \$291,000 and a decrease in interest expense of \$13,000.

Interest income. Interest income on a tax equivalent basis increased \$291,000, or 5.9%, to \$5.2 million for the three months ended March 31, 2015 from \$4.9 million for the same period in 2014. This increase can be attributed to increases in interest earned on loans, securities, interest earning deposits with banks and dividends on federal bank stocks of \$193,000, \$55,000, \$4,000 and \$39,000, respectively.

Tax equivalent interest earned on loans receivable increased \$193,000, or 4.7%, to \$4.3 million for the three months ended March 31, 2015 compared to \$4.1 million for the same period in 2014. This increase resulted from a \$32.2 million, or 9.1% increase in average loans, accounting for an increase of \$365,000 in interest income. Partially offsetting this favorable volume variance, the average yield on loans decreased 20 basis points to 4.53% for the three months ended March 31, 2015, versus 4.73% for the same period in 2014. This unfavorable yield variance accounted for a \$172,000 decrease in interest income.

Tax equivalent interest earned on securities increased \$55,000, or 7.1%, to \$834,000 for the three months ended March 31, 2015 compared to \$779,000 for the three months ended March 31, 2014. This increase resulted from a \$28.3 million, or 23.2% increase in securities, accounting for an increase of \$165,000 in interest income. Partially offsetting this favorable volume variance, the average yield on securities decreased 34 basis points to 2.25% for the three months ended March 31, 2015, versus 2.59% for the same period in 2014. This unfavorable yield variance accounted for an \$110,000 decrease in interest income.

Interest earned on deposits with banks increased \$4,000, or 36.4%, to \$15,000 for the three months ended March 31, 2015 compared to \$11,000 for the three months ended March 31, 2014. The average yield on these accounts increased 14 basis points to 0.51% for the three months ended March 31, 2015, versus 0.37% for the same period in 2014, accounting for a \$4,000 increase in interest income.

Dividends on federal bank stocks increased \$39,000 to \$74,000 for the three months ended March 31, 2015 from \$35,000 for the same period in 2014. This increased resulted from an increase in the average yield on federal bank stocks to 13.45% for the three months ended March 31, 2015, compared to 4.09% for the same period in 2014. The increase in the yield was the result of an increase in the FHLB's quarterly dividend rate and a 2.50% special dividend paid by the FHLB during the first quarter of 2015. Partially offsetting this favorable yield variance, the average balance of federal bank stocks decreased \$1.2 million, or 35.7%, accounting for a \$16,000 decrease in interest income.

Interest expense. Interest expense decreased \$13,000, or 1.8%, to \$728,000 for the three months ended March 31, 2015 from \$741,000 for the same period in 2014. This decrease in interest expense can be attributed to a decrease in interest incurred on deposits of \$15,000, partially offset by an increase in interest incurred on borrowed funds of \$2,000.

Interest expense incurred on deposits decreased \$15,000, or 2.7%, to \$546,000 for the three months ended March 31, 2015 compared to \$561,000 for the same period in 2014. The average cost of interest-bearing deposits decreased 11 basis points to 0.56% for the three months ended March 31, 2015, compared to 0.67% for the same period in 2014, resulting in a \$95,000 decrease in interest expense. Partially offsetting this favorable variance, the average balance of interest-bearing deposits increased \$52.6 million, or 15.4%, to \$392.9 million for the three months ended March 31, 2015, compared to \$340.4 million for the same period in 2014 causing an \$80,000 increase in interest expense. Average noninterest bearing deposits increased \$7.7 million, or 7.3%, to \$113.3 million from \$105.6 million, facilitating the overall decline in the Corporation's cost of funds.

Interest expense incurred on borrowed funds increased \$2,000, or 1.1%, to \$182,000 for the three months ended March 31, 2015, compared to \$180,000 for the same period in the prior year. The average cost of borrowed funds increased 87 basis points to 3.81% for the three months ended March 31, 2015, compared to 2.94% for the same period in 2014, resulting in a \$44,000 increase in interest expense. Partially offsetting this unfavorable variance, the average balance of borrowed funds decreased \$5.5 million, or 21.9%, to \$19.4 million for the three months ended March 31, 2015, compared to \$24.9 million for the same period in 2014 causing a \$42,000 decrease in interest expense.

Average Balance Sheet and Yield/Rate Analysis. The following table sets forth, for the periods indicated, information concerning the total dollar amounts of interest income from interest-earning assets and the resulting average yields, the total dollar amounts of interest expense on interest-bearing liabilities and the resulting average costs, net interest income, interest rate spread and the net interest margin earned on average interest-earning assets. For purposes of this table, average loan balances include nonaccrual loans and exclude the allowance for loan losses and interest income includes accretion of net deferred loan fees. Interest and yields on tax-exempt loans and securities (tax-exempt for federal income tax purposes) are shown on a fully tax equivalent basis. The information is based on average daily balances during the periods presented.

(Dollar amounts in thousands)	Three months ended March 31,					
	2015			2014		
	Average Balance	Interest	Yield / Rate	Average Balance	Interest	Yield / Rate
Interest-earning assets:						
Loans, taxable	\$358,545	\$3,985	4.51 %	\$333,655	\$3,869	4.70 %

(1) Interest on long-term borrowed funds for the quarterly period ended March 31, 2014 was reduced by \$29,000 related to capitalized interest costs on construction in progress.

Analysis of Changes in Net Interest Income. The following table analyzes the changes in interest income and interest expense in terms of: (1) changes in volume of interest-earning assets and interest-bearing liabilities and (2) changes in yields and rates. The table reflects the extent to which changes in the Corporation's interest income and interest expense are attributable to changes in volume (changes in volume multiplied by prior year rate), rate (change in rate multiplied by prior year volume) and changes attributable to the combined impact of volume/rate (change in rate multiplied by change in volume). The changes attributable to the combined impact of volume/rate are allocated on a consistent basis between the volume and rate variances. Changes in interest income on loans and securities reflect the changes in interest income on a fully tax equivalent basis.

Provision for loan losses. The Corporation records provisions for loan losses to maintain a level of total allowance for loan losses that management believes, to the best of its knowledge, covers all probable incurred losses estimable at each reporting date. Management considers historical loss experience, the present and prospective financial condition of borrowers, current conditions (particularly as they relate to markets where the Corporation originates loans), the status of nonperforming assets, the estimated underlying value of the collateral and other factors related to the collectability of the loan portfolio.

Information pertaining to the allowance for loan losses and nonperforming assets for the three months ended March 31, 2015 and 2014 is as follows:

(Dollar amounts in thousands)	As of or for the three months ended

Allowance for loan losses to non-performing loans	71.46	%	82.03	%

30

Nonperforming loans increased \$1.5 million to \$7.5 million at March 31, 2015 from \$6.0 million at March 31, 2014. The increase in nonperforming loans was primarily due to a \$2.4 million loan relationship being placed on nonaccrual status during the quarter ended June 30, 2014 due to the borrower's inadequate cash flow, working capital and liquidity sources. This relationship, which is considered impaired, consists of six commercial business loans, one commercial real estate loan and one residential mortgage. The loans are secured by commercial real estate, residential real estate, equipment, accounts receivable and inventory. This relationship had specific reserves of \$277,000 at March 31, 2015. In addition, a \$525,000 loan relationship consisting of a residential mortgage and a home equity line of credit was placed on nonaccrual status during the quarter ended March 31, 2015 due to the borrower's inadequate cash flow. The loans are secured by a personal residence. Partially offsetting these increases was the full payoff of a \$1.3 million nonperforming loan during the fourth quarter of 2014 and other principal reductions resulting from credit workouts and repayments. Of the \$7.5 million in nonperforming loans, \$5.3 million were not past due at March 31, 2015. During the three months ended March 31, 2015, nonperforming loans increased \$531,000, primarily due to the aforementioned residential mortgage and home equity line of credit being put on nonaccrual status.

As of March 31, 2015, the Corporation's classified and criticized assets amounted to \$12.8 million, or 2.2% of total assets, with \$12.1 million classified as substandard, \$598,000 identified as special mention and \$182,000 identified as doubtful. This compares to classified and criticized assets of \$12.6 million, or 2.2% of total assets, with \$10.8 million classified as substandard and \$1.8 million identified as special mention at December 31, 2014.

The provision for loan losses increased \$6,000, or 3.7%, to \$169,000 for the three months ended March 31, 2015 from \$163,000 for the same period in the prior year. While the Corporation's average loan balances increased \$32.2 million for the three months ended March 31, 2015 compared to the same period in the prior year, the provision for loan losses only increased slightly due to a positive impact in the allowance for loan losses due to an improvement in the historical loss ratios.

Noninterest income. Noninterest income decreased \$660,000, or 45.9%, to \$779,000 for the three months ended March 31, 2015, compared to \$1.4 million for the same period in the prior year. This decrease resulted primarily from gains realized on the sale of securities totaling \$658,000 during the first quarter of 2014 related to a balance sheet management strategy whereby securities were sold to prepay a \$5.0 million FHLB long term advance and associated security gains were used to offset the impact of prepayment penalties associated with the early retirement of the advance. The Corporation did not recognize any security gains during the first quarter of 2015. Excluding the gains on securities, noninterest income decreased \$2,000 to \$779,000 for the quarter ended March 31, 2015 from \$781,000 for the same period in 2014 due to a decrease in fees and service charges of \$29,000, partially offset by an increase in gains recorded on the sale of foreclosed assets of \$30,000.

Noninterest expense. Noninterest expense decreased \$258,000, or 6.1%, to \$4.0 million for the three months ended March 31, 2015, compared to \$4.2 million for the same period in the prior year. This decrease in noninterest expense can be attributed to decreases in other noninterest expense and intangible amortization of \$491,000 and \$8,000, respectively, partially offset by increases in compensation and employee benefits, premises and equipment, professional fees and FDIC expense of \$126,000, \$68,000, \$38,000 and \$9,000, respectively.

Compensation and employee benefits expense increased \$126,000, or 6.5%, to \$2.1 million for the three months ended March 31, 2015 compared to \$1.9 million for the same period in the prior year. This increase can be attributed to normal salary and wage increases and higher payroll taxes, employee benefit costs and employee retirement expenses.

Premises and equipment expense increased \$68,000, or 11.3%, to \$668,000 for the three months ended March 31, 2015 compared to \$600,000 for the same period in the prior year. This increase is primarily related to an increase in depreciation costs associated with the Cranberry Township branch office which opened in May 2014, and the replacement of the Corporation's fleet of automated teller machines during the fourth quarter of 2014.

Professional fees increased \$38,000, or 23.3%, to \$201,000 for the three months ended March 31, 2015 compared to \$163,000 for the same period in the prior year.

The Corporation recognized \$49,000 of core deposit intangible amortization expense during the first quarter of 2015 compared to \$57,000 for the same period in the prior year. This amortization relates to a branch acquisition completed in the third quarter of 2009. Further discussion of goodwill and intangible assets related to the branch office acquisition can be found in the "Notes to Consolidated Financial Statements" beginning on page 6.

FDIC insurance increased \$9,000, or 10.2%, to \$97,000 for the three months ended March 31, 2015 compared to \$88,000 for the same period in the prior year.

Other noninterest expense decreased \$491,000, or 35.8%, to \$880,000 for the three months ended March 31, 2015 compared to \$1.4 million for the same period in the prior year. During the three months ended March 31, 2014, the Corporation recorded a \$550,000 prepayment penalty assessed on the aforementioned early retirement of debt.

Noninterest expense for the three months ended March 31, 2015 included \$122,000 in costs related to the Cranberry Township branch office which opened in May 2014, compared to \$18,000 in costs recognized during the same period in 2014. Excluding the costs related to the new branch office and the aforementioned prepayment penalty, noninterest expense increased \$188,000, or 5.1%, for the three months ended March 31, 2015 compared to the same period in the prior year.

Provision for income taxes. The provision for income taxes decreased \$46,000, or 21.2%, to \$171,000 for the three months ended March 31, 2015 compared to \$217,000 for the same period in the prior year. The Corporation's effective tax rate decreased to 18.0% for the first quarter of 2015 from 20.5% for the same quarter in the prior year. The difference between the statutory rate of 34% and the Corporation's effective tax rate of 18.0% for the quarter ended March 31, 2015 was due to tax-exempt income earned on certain tax-free loans and securities and bank-owned life insurance.

LIQUIDITY

The Corporation's primary sources of funds generally have been deposits obtained through the offices of the Bank, borrowings from the FHLB and Federal Reserve, and amortization and prepayments of outstanding loans and maturing securities. During the three months ended March 31, 2015, the Corporation used its sources of funds primarily to fund security purchases and loan advances and to repay borrowed funds. As of March 31, 2015, the Corporation had outstanding loan commitments, including undisbursed loans and amounts available under credit lines, totaling \$50.6 million, and standby letters of credit totaling \$308,000.

At March 31, 2015, time deposits amounted to \$120.8 million, or 23.4% of the Corporation's total consolidated deposits, including approximately \$30.3 million of which are scheduled to mature within the next year. Management of the Corporation believes (i) it has adequate resources to fund all of its commitments, (ii) all of its commitments will be funded as required by related maturity dates and (iii) based upon past experience and current pricing policies, it can adjust the rates of time deposits to retain a substantial portion of maturing liabilities if necessary.

Aside from liquidity available from customer deposits or through sales and maturities of securities, the Corporation has alternative sources of funds such as a term borrowing capacity from the FHLB and the Federal Reserve's discount window. At March 31, 2015, the Corporation had borrowed funds of \$18.0 million consisting of \$15.0 million in long-term FHLB advances and a \$3.0 million short-term advance on a line of credit with a correspondent bank. At March 31, 2015, the Corporation's borrowing capacity with the FHLB, net of funds borrowed and other commitments, was \$154.7 million.

Management is not aware of any conditions, including any regulatory recommendations or requirements, which would adversely impact its liquidity or its ability to meet funding needs in the ordinary course of business.

RECENT REGULATORY DEVELOPMENTS

In July 2013, the Office of the Comptroller of the Currency and the other federal bank regulatory agencies issued a final rule that revised their leverage and risk-based capital requirements and the method for calculating risk-weighted assets to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision and certain provisions of the Dodd-Frank Act. Among other things, the rule established a new common equity Tier 1 minimum capital requirement (4.5% of risk-weighted assets), increases the minimum Tier 1 capital to risk-based assets requirement (from 4% to 6% of risk-weighted assets), phases out certain kinds of intangibles and instruments treated as capital and assigns a higher risk weight (150%) to exposures that are more than 90 days past due or are on nonaccrual status and to certain commercial real estate facilities that finance acquisition, development or construction of real property. The final rule also requires unrealized gains and losses on certain “available-for-sale” securities holdings to be included for purposes of calculating regulatory capital requirements unless a one-time opt-out is exercised. The Bank elected to opt-out of this regulatory capital provision. By opting out of the provision, the Bank retains what is known as the accumulated other comprehensive income filter. The rule limits a banking organization’s capital distributions and certain discretionary bonus payments if the banking organization does not hold a “capital conservation buffer” consisting of 2.5% of common equity Tier 1 capital to risk-weighted assets in addition to the amount necessary to meet its minimum risk-based capital requirements. The new capital rules maintain the general structure of the prompt corrective action rules, but incorporate the new common equity Tier 1 capital requirement and the increased Tier 1 risk-weighted asset requirement into the prompt corrective action framework.

The final rule became effective for the Bank on January 1, 2015. The capital conservation buffer requirement will be phased in beginning January 1, 2016 and ending January 1, 2019, when the full capital conservation buffer requirement will be effective. The final rule also implements consolidated capital requirements for bank holding companies, such as the Corporation, effective January 1, 2015. However, in April 2015, the Federal Reserve raised from \$500 million to \$1 billion the asset size threshold that qualifies a bank holding company for coverage under the Federal Reserve’s Small Bank Holding Company Policy Statement, provided that it meets certain conditions. Among other things, a qualifying bank holding company is not subject to consolidated regulatory capital requirements. The Corporation qualifies for coverage under the Federal Reserve’s Small Bank Holding Company Policy Statement and, therefore, is not subject to consolidated regulatory capital requirements.

CRITICAL ACCOUNTING POLICIES

The Corporation’s consolidated financial statements are prepared in accordance with accounting principles generally accepted in the United States of America and follow general practices within the industry in which it operates. Application of these principles requires management to make estimates or judgments that affect the amounts reported in the financial statements and accompanying notes. These estimates are based on information available as of the date of the financial statements; accordingly, as this information changes, the financial statements could reflect different estimates or judgments. Certain policies inherently have a greater reliance on the use of estimates, and as such have a greater possibility of producing results that could be materially different than originally reported. Estimates or judgments are necessary when assets and liabilities are required to be recorded at fair value, when a decline in the

value of an asset not carried on the financial statements at fair value warrants an impairment write-down or valuation reserve to be established or when an asset or liability needs to be recorded contingent upon a future event. Carrying assets and liabilities at fair value inherently results in more financial statement volatility. The fair values and the information used to record valuation adjustments for certain assets and liabilities are based either on quoted market prices or are provided by third-party sources, when available. When third-party information is not available, valuation adjustments are estimated in good faith by management primarily through the use of internal cash flow modeling techniques.

The most significant accounting policies followed by the Corporation are presented in Note 1 to the consolidated financial statements included in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014. These policies, along with the disclosures presented in the other financial statement notes provide information on how significant assets and liabilities are valued in the financial statements and how those values are determined. Management views critical accounting policies to be those which are highly dependent on subjective or complex judgments, estimates and assumptions and where changes in those estimates and assumptions could have a significant impact on the financial statements. Management has identified the following as critical accounting policies.

Allowance for loan losses. The Corporation considers that the determination of the allowance for loan losses involves a higher degree of judgment and complexity than its other significant accounting policies. The balance in the allowance for loan losses is determined based on management's review and evaluation of the loan portfolio in relation to past loss experience, the size and composition of the portfolio, current economic events and conditions and other pertinent factors, including management's assumptions as to future delinquencies, recoveries and losses. All of these factors may be susceptible to significant change. Among the many factors affecting the allowance for loan losses, some are quantitative while others require qualitative judgment. Although management believes its process for determining the allowance adequately considers all of the potential factors that could potentially result in credit losses, the process includes subjective elements and may be susceptible to significant change. To the extent actual outcomes differ from management's estimates, additional provisions for loan losses may be required that would adversely impact the Corporation's financial condition or earnings in future periods.

Other-than-temporary impairment. Management evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic, market or other concerns warrant such evaluation. Consideration is given to (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near term prospects of the issuer, (3) whether the market decline was affected by macroeconomic conditions and (4) whether the Corporation has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery.

Goodwill and intangible assets. Goodwill represents the excess cost over fair value of assets acquired in a business combination. Goodwill and intangible assets acquired in a purchase business combination and determined to have an indefinite useful life are not amortized, but instead tested for impairment at least annually. Intangible assets with estimable useful lives are amortized over their respective estimated useful lives to their estimated residual values. The impairment test is a two-step process that begins with an initial impairment evaluation. If the initial evaluation suggests that an impairment of the asset value exists, the second step is to determine the amount of the impairment. If the tests conclude that goodwill is impaired, the carrying value is adjusted and an impairment charge is recorded. As of November 30, 2014, the required annual impairment test of goodwill was performed and management concluded that no impairment existed as of that date.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk for the Corporation consists primarily of interest rate risk exposure and liquidity risk. Since virtually all of the interest-earning assets and interest-bearing liabilities are at the Bank, virtually all of the interest rate risk and liquidity risk lies at the Bank level. The Bank is not subject to currency exchange risk or commodity price risk, and has no trading portfolio, and therefore, is not subject to any trading risk. In addition, the Bank does not participate in hedging transactions such as interest rate swaps and caps. Changes in interest rates will impact both income and expense recorded and also the market value of long-term interest-earning assets and interest-bearing liabilities. Interest rate risk and liquidity risk management is performed at the Bank level. Although the Bank has a diversified loan portfolio, loans outstanding to individuals and businesses depend upon the local economic conditions in the immediate trade area.

One of the primary functions of the Corporation's asset/liability management committee is to monitor the level to which the balance sheet is subject to interest rate risk. The goal of the asset/liability committee is to manage the relationship between interest rate sensitive assets and liabilities, thereby minimizing the fluctuations in the net interest margin, which achieves consistent growth of net interest income during periods of changing interest rates.

Interest rate sensitivity is the result of differences in the amounts and repricing dates of the Bank's rate sensitive assets and rate sensitive liabilities. These differences, or interest rate repricing "gap", provide an indication of the extent that the Corporation's net interest income is affected by future changes in interest rates. A gap is considered positive when the amount of interest rate-sensitive assets exceeds the amount of interest rate-sensitive liabilities and is considered negative when the amount of interest rate-sensitive liabilities exceeds the amount of interest rate-sensitive assets. Generally, during a period of rising interest rates, a negative gap would adversely affect net interest income while a positive gap would result in an increase in net interest income. Conversely, during a period of falling interest rates, a negative gap would result in an increase in net interest income and a positive gap would adversely affect net interest income. The closer to zero that gap is maintained, generally, the lesser the impact of market interest rate changes on net interest income.

Assumptions about the timing and variability of cash flows are critical in gap analysis. Particularly important are the assumptions driving mortgage prepayments and the expected attrition of the core deposits portfolios. These assumptions are based on the Corporation's historical experience, industry standards and assumptions provided by a federal regulatory agency, which management believes most accurately represents the sensitivity of the Corporation's assets and liabilities to interest rate changes. As of March 31, 2015, the Corporation's interest-earning assets maturing or repricing within one year totaled \$176.1 million while the Corporation's interest-bearing liabilities maturing or repricing within one-year totaled \$164.6 million, providing an excess of interest-earning assets over interest-bearing liabilities of \$11.5 million. At March 31, 2015, the percentage of the Corporation's assets to liabilities maturing or repricing within one year was 107.0%.

For more information, see "Market Risk Management" in the Corporation's Annual Report on Form 10-K for the year ended December 31, 2014.

Item 4. Controls and Procedures

The Corporation maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Corporation's Exchange Act reports is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to the Corporation's management, including its Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate, to allow timely decisions regarding required disclosure based on the definition of "disclosure controls and procedures" in Rule 13a-15(e).

As of March 31, 2015, the Corporation carried out an evaluation, under the supervision and with the participation of the Corporation's management, including the Corporation's CEO and CFO, of the effectiveness of the design and operation of the Corporation's disclosure controls and procedures. Based on the foregoing, the Corporation's CEO and CFO concluded that the Corporation's disclosure controls and procedures were effective. There have been no significant changes in the Corporation's internal controls or in other factors that could significantly affect the internal controls subsequent to the date the Corporation completed its evaluation.

There has been no change made in the Corporation's internal control over financial reporting during the period covered by this report that has materially affected, or is reasonably likely to materially affect, the Corporation's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

The Corporation is involved in various legal proceedings occurring in the ordinary course of business. It is the opinion of management, after consultation with legal counsel, that these matters will not materially affect the Corporation's consolidated financial position or results of operations.
