Table of Contents**Consolidated Business Results**

In the third quarter of fiscal 2006, the three months ended December 31, 2005, consolidated operating revenue rose 16.0% to a record ¥227,665 million (US\$1,929.4 million), compared with the same period in the previous fiscal year, due to higher sales of plasma displays and car electronics products. In terms of profit, operating income was ¥5,028 million (US\$42.6 million), 2.8 times higher than in the previous fiscal year's third quarter. This increase was mainly supported by higher gross profit due to sales growth, although the cost-of-sales ratio deteriorated due to falling prices of core products. However, net income was down 21.4% at ¥1,403 million (US\$11.9 million), mainly due to the impact of a foreign exchange loss and higher income taxes. As for exchange rates in the third quarter, the Japanese yen was weaker against the U.S. dollar and the euro by 9.7% and 1.6%, respectively, compared with the same period of the previous fiscal year.

In the third quarter, **Home Electronics** sales increased 11.7% year on year to ¥114,966 million (US\$974.3 million). Plasma display sales rose by approximately 30%. This increase was mainly attributable to higher overseas sales, mainly in Europe and North America, on the back of stronger demand primarily for high-resolution models, despite lower sales in Japan where higher unit sales were insufficient to make up for falling prices arising from intensifying competition. In addition, higher sales of newly developed DVD drive units for camcorders were achieved. Meanwhile, sales of DVD recorders and players declined. In terms of segment sales in Japan and overseas, sales in Japan were down 11.4% at ¥27,405 million (US\$232.2 million), while overseas sales were up 21.6% at ¥87,561 million (US\$742.0 million).

The operating loss in this segment improved to ¥1,733 million (US\$14.7 million) from an operating loss of ¥2,822 million in the third quarter of the previous fiscal year. This mainly reflected the discontinuation of sales of cable TV set-top boxes in North America in fiscal 2005 due to deteriorating profitability.

Car Electronics sales climbed 21.7% to ¥84,403 million (US\$715.3 million) compared with the same period a year earlier. Higher car audio product sales were posted both in consumer markets and on an OEM (original equipment manufacturing) basis. Consumer-market sales expanded primarily in Central and South America, and North America, while OEM sales rose primarily in Japan and North America. Car navigation system sales were also up, reflecting strong demand for Pioneer's recent models in Japan's consumer market, in addition to sales growth in North America. OEM sales represented 34% of total Car Electronics sales in the third quarter, compared with 35% in the same period a year earlier. In terms of segment sales in Japan and overseas, sales in Japan were 8.4% higher at ¥32,051 million (US\$271.6 million), while overseas sales were up 31.5% at ¥52,352 million (US\$443.7 million).

Operating income in this segment rose 57.5% year on year to ¥4,795 million (US\$40.6 million) due to higher sales. In **Patent Licensing**, royalty revenue rose 40.5% year on year to ¥1,977 million (US\$16.8 million). This increase was mainly attributable to revenue from contracts renewed with licensees, despite the impact of the expiration of some patents licensed to the optical disc industry.

However, operating income in this segment decreased 14.8% to ¥1,176 million (US\$10.0 million) compared with the third quarter of the previous fiscal year.

Table of Contents

In the **Others** segment, sales rose 16.6% to ¥26,319 million (US\$223.0 million). This increase was mainly due to higher sales of light-guiding plates for small LCDs (liquid crystal displays) and compact speaker units for cellular phones. Meanwhile, sales declined for factory automation systems and organic light-emitting diode (OLED) display panels. In terms of segment sales in Japan and overseas, sales in Japan were down 10.2% at ¥11,438 million (US\$96.9 million), while overseas sales were up 51.2% at ¥14,881 million (US\$126.1 million).

The operating loss in this segment was ¥512 million (US\$4.3 million), compared with an operating loss of ¥69 million in the third quarter of the previous fiscal year. This mainly reflected deteriorating profitability related to falling sales of factory automation systems.

For the nine-month period ended December 31, 2005, consolidated operating revenue rose 6.7% year on year to ¥577,563 million (US\$4,894.6 million), while the Company reported a net loss of ¥56,641 million (US\$480.0 million) for the period, compared with net income of ¥6,594 million in the corresponding period of the previous fiscal year.

Note: Operating income (loss) in each business segment represents operating income (loss) before elimination of intersegment transactions.

Cash Flows

During the nine-month period ended December 31, 2005, operating activities provided net cash of ¥21,891 million (US\$185.5 million). Despite the net loss of ¥56,641 million (US\$480.0 million) for the period, adjustments for non-cash expenses such as depreciation and amortization of ¥35,422 million (US\$300.2 million), impairment losses of ¥32,543 million (US\$275.8 million) recognized for property, plant and equipment mainly for plasma display production, and equity in losses of affiliated companies of ¥25,132 million (US\$213.0 million) resulted in a positive net cash flow. Meanwhile, investing activities used net cash of ¥18,144 million (US\$153.8 million). This reflected ¥26,331 million (US\$223.1 million) for car electronics- and plasma display-related capital expenditures and other investments, partially offset by proceeds of ¥6,961 million (US\$59.0 million) from the sale of investment securities. Financing activities used net cash of ¥20,672 million (US\$175.2 million), mainly for the redemption of bonds and dividend payments. Consequently, cash and cash equivalents at December 31, 2005 were ¥12,175 million (US\$103.2 million) lower than at March 31, 2005.

Business Forecasts for Fiscal 2006

Notes:

1. The Company's consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America.
2. The consolidated financial statements include the accounts of the parent company and 125 subsidiaries and the investments in 5 affiliated companies accounted for on an equity basis.
3. Effective from fiscal 2005 year-end presentation, operating income (loss) is presented as net sales less cost of sales, selling, general and administrative expenses in order to be consistent with generally accepted financial reporting practice in Japan. The Company believes that such presentation is useful for comparison of the

Company's financial results with those of other Japanese companies. Under the U.S. GAAP, business restructuring expenses and losses on impairment of long-lived assets as well as gains and losses on sale and disposal of fixed assets included in Other net are included in operating income (loss). Previously reported amounts in the consolidated statements of operations and segment information have been reclassified accordingly.

4. Effective from this fiscal 2006, the Company changed business segment classification for certain businesses. Results related to plasma displays for business use and DJ equipment have been moved from Others to Home Electronics. Corresponding figures for the previously reported operating revenue by segment and segment information have been reclassified accordingly.
