-

Item 2.02 Results of Operations and Financial Condition.

On November 6, 2008, Dynegy Inc. (“Dynegy”) issued a press release announcing its third quarter financial results and updating its 2008 cash flow and earnings estimates. The press release and schedules attached thereto contain non-GAAP financial information; please see below for the definitions, purposes and uses of such non-GAAP financial information. Further, the press release contains updated 2008 cash flow and earnings estimates and other statements intended as “forward-looking statements,” all of which are subject to the cautionary statement about forward-looking statements set forth therein. A copy of Dynegy’s November 6, 2008 press release is furnished herewith as exhibit 99.1 and is incorporated herein by this reference.

In accordance with SEC Release No. 33-8176, the information contained in such press release shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, nor shall it be deemed incorporated by reference in any filing under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such a filing.

Dynegy management will hold an investor conference call at 9:00 a.m. ET (8:00 a.m. CT) on Thursday, November 6, 2008 to review its third quarter 2008 financial results and related information and update its 2008 cash flow and earnings estimates. Participants may access the web cast and the related presentation materials in the “Investor Relations” section of www.dynegy.com.

Non-GAAP Financial Information

In this Form 8-K, we discuss the non-GAAP financial measures included in the press release and the schedules attached thereto, including definitions of such non-GAAP financial information, identification of the comparable GAAP financial measures and the reasons why we believe these measures provide useful information regarding our financial condition, results of operations, cash flows and financial position, as applicable and, to the extent material, the additional purposes, if any, for which these measures are used. Reconciliations of non-GAAP financial measures to the most directly comparable GAAP financial measures are contained in the schedules attached to the press release, to the extent available without unreasonable effort.

EBITDA Measures. We believe that EBITDA and Adjusted EBITDA provide a meaningful representation of our operating performance. We consider EBITDA as a way to measure financial performance on an ongoing basis. Adjusted EBITDA is meant to reflect the true operating performance of our power generation fleet and, as such, excludes the impact of mark-to-market accounting and other items that could be considered “non-operating” or “non-core” in nature. We believe that investors should have a view of the same financial measures that management uses to allocate resources, determine Dynegy’s ability to fund capital expenditures, assess performance against its peers and evaluate overall financial performance. In addition, many analysts, fund managers and other stakeholders that communicate with us typically request our financial results in an EBITDA and Adjusted EBITDA format.

“EBITDA” – We define “EBITDA” as earnings (loss) before interest, taxes, depreciation and amortization.

- When EBITDA is discussed in reference to performance on a *consolidated basis*, the most directly comparable GAAP financial measure to EBITDA is net income (loss). It can be reconciled using the following calculation: Net Income (loss) plus Income tax (benefit) expense, Interest expense and Depreciation and amortization expense.
- However, because management does not allocate interest expense and income taxes on a segment level, the most directly comparable GAAP financial measure to EBITDA when performance is discussed on a *segment level* is Operating income (loss).

Edgar Filing: DYNEGY INC. - Form 8-K

“Adjusted EBITDA” – We define “Adjusted EBITDA” as EBITDA less (1) significant items such as discontinued operations and gains or losses on the sale of assets, and (2) the impact of mark-to-market changes in value in the power generation business.

Cash Flow Measures. Our Cash Flow measures may not be representative of the amount of residual cash flow that is available to us for discretionary expenditures, since they may not include deductions for mandatory debt service requirements and other non-discretionary expenditures. We believe, however, that our Cash Flow measures are useful because they measure the cash generating ability of our operating asset-based energy business relative to our capital expenditure obligations and financial performance. However, these cash flow measures do not have standardized definitions; therefore, it may not be possible to compare these financial measures with other companies’ cash flow measures having the same or similar names. The most directly comparable GAAP financial measure to the below measures is cash flow from operations.

“Adjusted Cash Flow from Operations” – is cash flow from operations excluding cash payments on significant items, such as legal and regulatory payments.

“Adjusted Free Cash Flow” – is cash flow from operations excluding cash payments on significant items less maintenance and environmental capital expenditures.

We believe that the non-GAAP measures disclosed in our filings are only useful as an additional tool to help management and investors make informed decisions about the Company’s financial and operating performance. By definition, non-GAAP measures do not give a full understanding of the Company; therefore, to be truly valuable, they must be used in conjunction with the GAAP measures. Non-GAAP financial measures are not standardized; therefore, it may not be possible to compare these financial measures with other companies’ non-GAAP financial measures having the same or similar names. We strongly encourage investors to review our consolidated financial statements and publicly filed reports in their entirety and not rely on any single financial measure.

We use these non-GAAP financial measures in addition to, and in conjunction with, results presented in accordance with GAAP. These non-GAAP financial measures reflect an additional way of viewing aspects of our operations that, when viewed with our GAAP results and the accompanying reconciliations to corresponding GAAP financial measures included in our earnings release, the press release and schedules attached thereto, may provide a more complete understanding of factors and trends affecting our business. These non-GAAP financial measures should not be relied upon to the exclusion of GAAP financial measures and are by definition an incomplete understanding of the company which must be considered in conjunction with GAAP measures.
